FORWARD FROM PRESIDENT

It gives me great pleasure to present Helpers Of Africa International Strategic Plan at the launch of this valuable and timely divine vision from God that was birthed when I presented this vision and my achievement through a well packaged website 4 years ago. As the Bible says write the vision and make it clear so that he who reads can run with is Habakuk 2 we got your attention and other very generous, visionary, charitable and development minded partners to raise this global historic fund. Through my professional background and experiences I was able by the grace of God to articulate this vision to empower and refresh Nations through a well thought structure to implement our vision of Charity, Empowerment and development in nations and globally through our 74 departments in the head office that is located in Nairobi Kenya which will be the Headquater of our global operations where we shall soon build a Kingdom Dream City in the surburbs of Nairobi that will host all our departments and 34 Agencies operations. The articulation and exposition of the vision, missions, values, projects and strategic plans of all departments along with agencies forms the basis of this book to you generous, visionally donors and partners to know that we are ready for this Job and we are well organized to manage this historic fund in an organized, professional and well accounted system with highest level of integrity , excellence and efficiency to give value for your sacrificial funds bestored under my trust as the President and Founder of presistgious and valuable Helpers Of Africa International.

Helpers Of Africa International is a charity, empowerment, humanitarian and development bank whose vision is based on a godlly foundation to offer intrinsic valuable impact and rewards refreshing and empowering nations offering community and global financial solutions in the world now and for generations to come. Our programs and projects is to ensure more value to communities and nations in excellence, transparency and productivity will short and long term focus to succeed and make the world to succeed by the grace of God.

Helpers Of Africa International is - Raising Kingdom Champions,, Our Vision is Transforming, Refreshing and Empowering the World and our mission is Impacting Nations environment and Her people through Charity, Development and Holistic empowerment in all sectors towards making nations a comfortable habitation for all. This we shall fulfill through our 34 Agencies mainly Kingdom Global Housing Agency, Kingdom Global Health Agency, Kingdom Global Tourism and Wildlife Agency, Kingdom Global Smart Cities and Slum Upgrade Agency, Kingdom Global Disaster Response Agency, Kingdom Global Genders Empowerment Agency, Kingdom Global Education Agency, Kingdom Global Development Agency, Kingdom Global Charity and Humanitarian Agency, Kingdom Global Insurance Agency, Kingdom Global Enviromental Agency, Kingdom Global Enviromental Agency, Kingdom Global Enviromental Agency, Kingdom Global Aviatiion and Airlines Agency, Kingdom Global Shipping & Blue Economy Agency, Kingdom Global Finance & Economic Agency, Kingdom Global Research & Innovation Agency, Kingdom Global Trade & Investment Agency, Kingdom Global Mining & Oil Agency, Kingdom Global Infrastructure Agency, Kingdom Global Ophans and Vernerable Children Agency, Kingdom Global Disability Agency, Kingdom Global Sports & Talent Development Agency, Kingdom Global Supply Chain Agency, Kingdom Global Honor Agency, Kingdom Global Water and Sanitation Agency, Kingdom Global Food and Agriculture Agency, Kingdom Global Volunteers Agency, Kingdom Global Peace & Conflict Resolution Agency , Kingdom Global Equal Justice Agency, Kingdom Global Leadership & Capacity Building Agency, JBA – Helpers Of Africa International Agency, J.B.A Global Good Samaritan Agency, JBA Global Ministry and Missions Agency and Dr Lukes Foundation (Founders Legacy Foundation). For effective management our headquater will have 74 departments which will both have operations and supportive function to the inter-dependent agencies which include Internal Audits, External Audits, Human Resource- with 7 divisions, Strategic Plan, Finance, Administration , Management, Communication, Public relations, Media, Insuarance, Procurement and supply chain, security, event management, Risk Management among many others whose specific functions, staff , Job descriptions, projects and operations policy are well outlined in this book Volume One and Volume 2.

I expect its implementation to be both challenging also rewarding but through your support in resources, networks, experience and combined with our staff and stakeholder by the grace of God we shall succeed making the world a better place. We now have a robust and clear strategic focus to guide our work in positively transforming lives in cities and communities around the world. We are also well-positioned to take a leading role in Global transformation in all sectors. Our Well-planned and well-governed projects and programs will impact the nations and the world. In this regard, the implementation of the Plan will be driven through global flagship programmes, which will have the benefits of (i) reducing fragmentation in our work, including a better connection between normative and operational elements; (ii) increasing predictability of funding, accountability and enhancing flexibility in the implementation of priorities agreed in the Strategic Plan; vi (iii) establishing long term partnerships as well as donors and countries commitment; (iv) strengthening visibility and global positioning; and (v) enhancing horizontal and vertical integration of sustainable in all global concerns. The successful implementation of flagship programmes will require the identification of "champions" including countries and cities that will strongly promote and provide global visibility to our strategic programmes. Internally, we will need to develop (i) a thorough programme implementation manual, with state-of-theart procedures, workflows and capacity building; and (ii) a monitoring and evaluation system, including an online interactive platform accessible to all partners. In addition, we will establish multi-partner trust-funds, which will constitute the financing vehicles of the flagship programmes.

This 2020 version of the 'Handbook of vision structure exposition, Planning, Monitoring and Evaluating for Development Results' aims to support Helpers Of Africa International, Her Agencies and departments in becoming more results-oriented and to improve its focus on development changes and real improvements in people's lives globally. It will lead to a breakthrough in driving the effective application of the results-based management approach in programming and performance management. The Handbook recognizes that structure, accountability of resources, planning, monitoring and evaluation require a focus on nationally and global owned development priorities and results, and should reflect the guiding principles of national ownership, capacity development and human development. Globally, there has been a significant shift away from the project approach in favour of programme and national approaches. We invite you to read and give us feedback on areas that we may have omitted or need improvement as donors and partners as we own this dream together. My Smart team and I are commited to see this vision fulfilled to make this world a better place in all faces and phases for generations to come as good stewards of God given world as faithful stewards. We look forward for brighter days the best is yet to come as we serve the people to be rewarded by God to prosper in this world and eternal rewards in the life to come after we have finished gracefully our time here on earth to finish the race and work by his grace. Welcome to the Vision & partnership of Helpers Of Africa International her departments, Agencies, prommmes and projects.

God bless you and God bless Helpers Of Africa International, Her Agencies & Projects Globally. In God We Trust

President and Founder
Dr Luke Mwangi

Welcome, Thank you and God bless you for your support towards making the great dream and vision to be a reality of Helpers Of Africa International and her 37 agencies to be born to Empower the World, Refresh Nations Through Charity, Empowerment And Development by the grace of God. I have been prepared and packaged by God professionally, in experience, education, exposure, spiritually and emotionally to be able to handle the weight and demands of this heavy structure and economic capacity of the Helpers Of Africa International and her 37 agencies. Through your support and by the grace of God this vision will impact humanity and nations globally through our well-articulated, cohesive and detailed structure that has a strong headquarter base in Nairobi Kenya to impact billions of people in the world through our 77 departments in the head office in health, education, social-economic empowerment, wealth creation, infrastructure, environment, shelter, food, supply chain, economic development, humanitarian programs and financial refreshment globally. We have learnt to be faithful with the little and do much so this massive divine resources will be well managed professionally, in honesty, integrity, faithfulness and godly stewardship to ensure that the global citizens benefit through a revolving funds management structure where charity and humanitarian donation grants to orphans, disability, disasters, health, environment, groups empowerment, rehabs and others will be revolved back by income from economic wealth creation profitable projects and departments of cities, real estate & housing, mining, schools, hotels, hospitals, stadiums and sports centers so our projects will be sustainable for generations. We shall still seek for more funding, donors and partners but also we shall ensure the right hand of business incomes supports the left hand of charity by balancing and proper management of the 2 arms for future generations. We have already over 100 Hand books for head office departments, projects and Agencies professional management that we have packaged well and smart team of faithful professionals and experience team we shall employ over 50,000 employees Helpers Of Africa International un will be recruited professionally keenly to run our departments and Agencies globally in all continents and millions of humanitarian volunteers worldwide. We shall directly and indirectly impact billions in the world in the coming years by the grace of God through our sound structure and valuable projects through your support and generosity. We shall initiate and support thousands of charity and development projects worldwide, governed by countless demands, guidelines and procedures designed to protect the projects and ensure that aid gets to the poor. Experience shows that capacity in developing countries can be improved and strengthened quickly when donors better coordinate their activities and harmonize their procedures. Helpers Of Africa International Group will work with other international institutions and donors, civil society and professional and academic associations to improve the coordination of aid policies and practices in countries, at the regional level and at the global level.

There is a new geography of trade, investment and humanitarian work operating in an international platform as the world becomes a global village. Helpers Of Africa International will play important locomotive for global economic growth and impact of humanity to continue given the economic challenges which the nations of the world are experiencing.You have came together from big and middle income nations, you decided to believe in the vision and donate even before meeting us the visionaries . God bless you, blessed are those who believe before seeing. Some have knocked on doors , convined meeting to convince your family and partners to give, paid airtickets / fueled jets / and mobilized movement some of you for the first time in Africa, you made phone calls to friends to come who did not know Kenya and the President Dr Luke Mwangi just through the website you believed and you talked to your partners / friends to come and give through this we are now a mighty team to transform the world through your donations in the account and those you will continue to give for generations. For all this efforts for the sake of empowering humanity through Helpers Of Africa International through us, for all this we again say thank you God bless you shall not be disappointed. It is clear that all gathered here have something in common to touch humanity and the world with good things and may this good reach your family, business even before we get started like the prophet told King David when he thought about building Gods house a promise of greatness was given that was fulfilled to the last. This vision has grown and become big in the hearts of many that is why such a prominent gathering from all nations are here full of hope of a better day for the world. God bless you mightly.

We have paid a big price with my wife ,son, the church I pastor along other few people to envision and pilot this dream for 25 years but it is not about us but you the donors and billions of beneficiaries the orphans, the weak, the sick, homeless, depressed nations waiting for us to manifest in this vision, mission and values.We shall acquire buildings , assets and buld cities but it is not about that because all of you have a strong inventory of huge asset base but our story will be about the billions of people we shall empower and facilitate valuable dreams which would be dead exept we have obeyed. I know God is happy with us already that makes the difference and will bless us and our families greatly.

Life is about enjoying every moment and making the world better and safer for our generations caring for Gods creation in the short life we have here on earth as we prepare ourselves to spend eternity after this short life which is important to make our lives in line with Him here in this life to have assuarance of eternity. You are really good people, I will enjoy working with all of you for our cause and we promise to be accountable on resources and vision we have put before you. Your ideas will help us be fairer, keep us honest, work harder and be more excellent and efficient. We need you and the world needs you to establish a better world for generations. Continue with the same tenacity that you showed in raising this. With all humility this amount is beyond the sum of the Top 100 commercial banks put together, what a historic record. Clap for yourselves, neighbors and clap to almighty God who has made all this to happen. With this generosity, energy and network we shall turn many ideas and dream to become a reality and making things happen.

I am truly blessed and consider it a great great great honor to have met all of you to establish one of the greatest banks in the world and in all my years I have spoken to multitudes of hundrends of thousands but have never spoken to such outstanding leaders of the business and economic world this is surely a special and valuable gathering, you are really very very special to us and before God. When you have a wonderful smart team like you sacrificing all your very very valuable time and resources to empower nations and humanity, this is something divine. When you have world economic leaders who work all their lives and earned bringing there resources to build nations, humanity and by extension the Kingdom of God it’s a blessing! When you have men and women of influence becoming a tower of strength and shown more courage than our dreams existed, that’s the finest I know.Today I am delighted to join me launch Helpers Of Africa International whose Vision is to refresh nations and mission is to empower the world through Charity, Development and Empowering Humanity. It is a name that is synonymous with trust, ethics and sound advice. We call it the humanity bank and that is exactly what it is. It will empower humanity; will attend to needs and heart beat of communities and nations. We hope that in launch of this bank to empower communities and nations in the world we will be able to meet the humanitarian demands of nations through this global fund. It will have a strong on-line banking and physical presence in all countries of the world in capitals, cities and counties systematically and simultaneously to our need assessment for the purpose of administering our vision and mission transforming billions of people in the world. In today's fast moving world, though, it really isn't practical to swap a cow for gas for your auto or pay for your groceries with home grown vegetables. We use money to do well to humanity and make our world a better place as custodians of Gods world and we need banks to provide the platform of administration of money. The more money we have the more we needs we shall meets of humanity and we have qualified professionals who will oversee the front and back office of Helpers Of Africa International. We have an able experienced CEO Catherine Mwangi to guide us professionally how to manage this fund across our departments in various nations honestly and in a trustworthy manner as she has faithfully managned our previous phases of our projects with integrity and accountability. You our partners will keep a strong monthly flow quarterly or annual flow as you shall indicate in our FEEDBACK coupons provided to enable us to do good works to communities and nations in Charity, Development and Empowerment of Humanity especially the weak and vulnerable.

PRESIDENT OF HELPERS OF AFRICA INTERNATIONAL OATH OF ETHICS AND MANDATE AS AN ALLIGANCE BEFORE GOD AND PARTNERS / DONORS ON BEHALF OF MANAGEMENT AND STAFF.

I solemnly declare and promise to exercise in all loyalty, discretion and conscience the functions entrusted to me by God entrusted by donors, partners and Trustees of Helpers Of Africa International, to discharge these functions and regulate my conduct with the interests of the Helpers Of Africa International for the welfare of Global Citizens and Kingdom of God. I also solemnly declare and promise to respect the obligations incumbent upon me as set out in the structure stipulated, Staff Regulations and Rules. I will lead Helpers Of Africa International to uphold the highest levels of efficiency, competence and integrity.

This commitment is reflected by my mandate I received from God and brought you as partners and donors to entrust me with this Historic Fund which we shall be faithful stewards before God and earthly accounts. We shall serve fundamentally keeping the interests of Helpers Of Africa International and by Extension the Kingdom of God through the vision, mission and structure presented. We shall respect the public we serve, ahead of our own self-interests. We have established (and encourage), from the top of the organization down, an overall environment that supports ethical behavior and decision-making. We instill in every staff member not only an obligation to do what's right in everything we do, but also expect that this culture will guide them when making any business and/or personal decisions. We shall uphold high standards of Accountability and transparency to maintain a high standard of ethics/integrity and to hold others accountable. Our Business processes and transactions will be transparent, Corruption and bribery avoided. We acknowledge because of this rare historic fund the world will pay close attention to how Helpers Of Africa International will operate, we expect our staff and contractors to lead by example and take ownership for compliance. They strive to avoid even the appearance or inference of impropriety, or of conflicts of interest. Staff members and contractors must demonstrate commitment to the values of the Organization through their personal conduct. This is reflected in our respect for fundamental human rights, the dignity and worth of the human person, equal rights of men and women, and respect for all cultures. These apply in respect of our partners, stakeholders, clients and beneficiaries and our staff. I / we recognize our personnel observe actions and activities that do not live up to Kingdom standards or values, or behaviors fall short, they all are expected to step in and be a champion for change. If they view such prohibited workplace behaviors that violate or ignore policy, they must step in, and immediately raise objections/concerns to management for full investigation.Helpers Of Africa International ethical culture demands that we all hold each other to the same standards of behavior.

We expect that if integrity pervades the organization and those Helpers Of Africa International (KBG) commit misconduct are called to task, the message will become ingrained. Helpers Of Africa International will be looked upon as one of the bench marks of standard bearer for ethical and humanitarian behavior. Our personnel have an obligation to uphold that legacy because individual actions affect Helpers Of Africa International image, credibility and reputation. Adherence by Helpers Of Africa International staff to the highest ethical standards is central to the work of the Organization and the maintenance of its good name. As we collectively endeavor to build a more peaceful and prosperous world, the ethical conduct of all staff members is paramount. We shall seek to build an environment of trust supports and fosters loyalty to Helpers Of Africa International and its aims and values; it is part of our responsibility. Putting Ethics to Work—A Guide for Helpers Of Africa International Staff seeks to provide a better understanding of our ethical standards, so that they may be exercised each and every day as we conduct our work. Where we fall short seek for forgiveness and restoration to the Kingdom of God. Ethical conduct builds trust and translates to a healthy work environment and a global prosperity by the grace of God. Help me God and Help us God with all the management and staff to adhere

God bless you and God bless Helpers Of Africa International, Her Agencies & Projects Globally. In God We Trust

VISION

Transforming and Empowerment of Nations

MISSION

Impacting Nations environment and her people through Charity, Development and Holistic empowerment in all sectors towards making nations a comfortable habitation for all.

Helpers Of Africa International is an international reserve bank. The President / CEO/ Deputy CEO will be directly be the head of the bank and administration oversight will be through the Director Finance & Operations Division. We have already set up a professional Smart team to run both operations of Helpers Of Africa International. We are establishing this bank to provide loans to millions that we have trained and will train on business and to provide a financial base for all the funds for the projects that we shall be undertaking.

Helpers Of Africa International financed by you generous partners will fund nations on repayable loans by buying Treasury bills or sound agreements witnessed by our donor countries and also funding profitable government projects on infrastructure, education, Health many others as per our structures and Agencies . Our Operation Scoope is to the world with regional divisions include Afica Asia & Middle East

HUMANITARIAN DIVISION

Children Homes & Special schools Empowerment department

This department will be hosting Good Samaritan Festival National and County events to bring together the Nation and people for Charity to minister to the needy. under this department also we have programs to support children homes & Special Institutions on child protection, stigma reduction, parenting, personalized counseling , adoptions , immunization, proper nutrition, home based care, birth registrations, clothing, forester care, child development child rights, life skills program, protection from early marriages, protection from female genital mutilation, prevention from sexually transmitted diseases, psycho-social support, sanitary ware to children, education for all orphans and Vulnerable, vocational training, prevention from infection including H.I.V, Supportive intervention, access to health facilities and medicine, Sanitary towers , Support Community Based responses, coordination & structures, legal aid, related institutional support, discrimination stigma, good governance, transparency, care, mosquito nets, income generation activities, succession planning, reintegration of children back to community, bursary funds, HIV/ Fund, school enrollment, School uniforms & Stationery, Safe water access, water harvesting, Sanitation, Teachers Training, empowering Social welfare service providers, monitoring and evaluation and many more , vacation to provide Holidays, Career & Vocation, Education trips, equipping, mentorship, feeding, clothing, facilitation, Bursaries, Children rights along with supporting equipping and empowering schools with furniture, computers, beds, TVs, Radios, Libraries, Dining halls, sound equipments, Books and school uniforms.

Care for Elderly Determent

We seek to ensure the neglected elderly people are cared for and live in a life of honor to bless the coming generations. We conducted a Honor event for Spiritual Fathers and Mothers of Kenya and there was a great release of Gods blessings in the land. We have also been conducting this advocacy for the young to take care of their parents and Grandee's to establish the blessings of long life as the bible commands us to do so. We have a vision of building homes to care for this people including freedom fighters some Helpers Of Africa International are homeless and many Helpers Of Africa International (KBG) have served communities along with honoring them to depart gracefully from this life when God calls them home blessing the land and coming generations.

Rehabs, talent & sports centres department

We have hundreds of ready designs of rehabilitation centers, talent and sports centers that we envision to buy and build. These centers shall be established & run as also for orphans, Vulnerable children, community / business leaders and all groups we are dealing with for recreation, training, team building and vacations. Through this facilities and programs we envision being able to identify and develop in talents in all sports, athletics, movie, art, Music, Crafts, Public Speaking, bykes and motor sports speaking and many more sectors. We have hundred of design concepts of these centers and identified lands in various places with successful team in many sectors to raise champions in all this areas impacting millions in our region of operations. This will include hosting and supporting talent exhibitions in schools, colleges, university, among children homes and specials schools along with reaching out to community youth, women and men in various settings. Africa has a lot of talents in sports as you have seen especially Kenya in athletics. We have been having mentorship programs to motivate many in talents and sports. We have ready designs for athletics and sports stadiums, film production to get products for media houses, motor sports, games. Countries like Nigeria, South Africa, are now great models of how big this sector can become offering Jobs, Capital formation, sustainable infrastructure development and improving livelihood of the people especially youth preventing them from crime through positive and valuable occupation.

Disaster & Relief administration department. – Liason of Kingdom Global Disaster Response Agency in Head Office

This department is involved with administration of help inform food / Clothes/ Tents/ Water / Medicine in disaster and draught, regions along with resettlement programs in areas affected by war, floods, famine, draught, fires slums and having teams ready and facilitated Staff & Volunteers to handle all kinds of disasters. We have capacity and strong smart team of logistics network to operate in the Nation of Kenya Africa, Asia other nations through support through the various embassies and regional directors across the world.

Water & Sanitation department. - Liason of Kingdom Global Water and Sanitation Agency in Head office

This department seeks to address Africa biggest challenge of access to safe water is a big challenge in Africa annually claiming innocent lives of millions of people and livestock. Amazingly research has shown existence of huge water aquifers that exist underground that can be accessed by digging boreholes and through seasonal floods harvest water. Trillions of litres of water trickle down from water catchment hills through rivers, lakes to the sea. We seek to drill Boreholes and establish reserves along with spot treatment points and plants, Construct Dams for water harvesting to harvest water as reserves for dry seasons, revive water catchment areas reforestation areas that have been depleted some are private and others with government partnership. Other communities have access to rivers and lakes but no water treatment plants so that exposes communities to diseases. We have envisioned establishing of water treatment plants in partnership with communities and local government also renewing the ancient technologies that are not effective in some of them. Many Cities in the world had not envisioned growth in design and determination of sewer and sanitation capacities. In certain areas we have confirmed through feasibility that sewage can be converted to energy and fertilizers through modern technology. We shall also do indigenous water harvesting through water tanks for every house hold in drought areas with spot regulated chlorination for boreholes.

Slum Upgrade & Eradication Department.

Many Slums exist because of poverty our business seminar training on entrepreneurship will target slums as one of the areas of focus to empower people for business start ups and development. Some slum don't have reconstruction structure because of Land ownership being so you can only upgrade the houses to better Semi permanent and provide water, electricity, sewerage and infrastructure along with establishing structured trade centers to provide for more business facilities, jobs and improve the livelihood of the people. Entrepreneurship training, Micro financing to school drop outs & Job seekers to stimulate self employment. This will reduce poverty and crime. Many seminars that were done have been fruitful. Training curriculums all set. Business start up & development financing structures all set, for men, women and youth empowerment. Catherine Mwangi also a visionary of helpers for Africa is qualified banker to manage micro finance project along with partnerships with those institutions on the ground in slums to boost their capital base to activate rending capacity.

Charity Buses department, We are acquiring 200 buses to be in our custody in Kenya phase 1 to serve 1000 children homes & special schools for holidays , education trip as many children have never had to tour local holiday centers and hotels for education and vacation. These buses will also serve our other missions, programs and projects also like minded institutions / projects. The launch of the Champions Chariots will be on 23rd June in the Good Samaritan Festival at Kasarani as we commission containers for food to various children homes and hunger stricken regions.

Youth, Men & Women Empowerment Department
Designated to offer packaged programs for the cluster of Youth, Men & Women highlighting Education for all, IT skills, Career, Entrepreneurship, Family matters, Parenting Skills, Life Skills, Gender Issues, Financial Empowerment, Serving Others & Patriotism, Joint Sports & Team building , Life Coaching and other empowerment and mentorship programs .

Environmental Conservation Department
designated to ensure preservation and betterment of environment by improving and programs that entails to game Parks & National Reserves, Water for animals through dams, Endangered species preservation of plants & animals, Cleanliness of Cities and Garbage management, Re forestation in water catchment regions and any other projects to avoid environmental degradation and other programs in line with this vision.

Scholarship School Bursaries Department,
To support ensure no Orphans / Vulnerable and needy children are denied the opportunity for studies ensuring they receive all basics uniform, books and school fees from Pre- School primary, Secondary, College university in our schools and others through this program. Our network of Children Homes/ Special schools, community leaders, Churches provide bases for such evaluation and selection of needy children to benefit from this project and programs.

Special Missions & Ministry Division, Education & Training for Church ministers & Community leaders department
Through Building of (universities & Vocational Colleges hundreds of designs ready and land available in various Towns and counties across the country extending to the continents. We shall also continue to do short refresher courses which we have experienced a very big impact of empowering thousands of community leaders and religious leaders Helpers Of Africa International (KBG) are impacting the community in various spheres of socio-economic fronts to be the gate keepers and agents of sustainable development for our valuable projects and others

Welfare of Community Leaders department.

When you empower the leader's socio economic status you are empowering him to be stable to be a blessing to others. We seek to disburse support in training leaders on entrepreneurship and empower them with ideas of income generation, business plan writing, carrying out feasibility and launch them to business start ups with repayable loans to create sustainable income for socio economic welfare for families and to be empowered to lead various churches, community groups with ease and without stress. This will be a strong base to aid them manage payment of home loans, education fund for their children, mobility project to loan for purchase of motorbikes and cars according to each economic status to repay to sustain a revolving fund. This can be achieved in groups since through our training we were able to cluster many into groups and units.

Outreach & advocacy Missions department,

We have a strong focus to engage & support existing valuable missions some can be seasonal depending on current needs in the community and some continuous. Such programs include advocacy program on Health campaigns, HIV reduction and stigma reduction, Peace campaigns in war torn regions, Conflict resolutions. Other missions include Prayer, Good news campaigns/ festivals / conferences Seminars, Festivals on Peace & integration and caravans

Media Ministry & Missions department,

Establishing Media stations TV/ Radio/ Print & publications that provides positive virtues to community in Mentorship, Education on all spheres, Entrepreneurship, Empowerment, Positive advocacy, Publicity of our programs, Guidance & Counseling. We have smart teams of professional personnel to roll out strong media across Africa, Asia & Middle East to become the platform of promotion of our projects and programs across the designated regions. We have set teams to roll out this across Africa and Asia along with supporting the existing organizations that have similar virtues and vision.

Special missions department, -We have engaged with many fruitful special missions for sometimes on peace building, gospel, Talents and we seek to do much more in mobile and stationed projects which including Mobile education video programs for communities, Mobile Libraries, Mobile Clinic, Rotational or stationed IT Computers training to Schools, running and sponsoring Sports & Talent search & competitions, Community Tournaments, Promotion Sports & Talents in Schools colleges / university, Sourcing for Potential businesses to fund, Free medical checks & vaccination programs, Research for solutions on various community challenges on medical such us jigger infection in communities, Pest control, & many more. under the Special missions we are open -We have engaged with many fruitful special missions many based on mobile units or, seasonal responses as follows Peace & cohesion building Program, Outreach program, Mobile education video program, Books & Mobile Libraries program, Mobile Clinic program, Mobile IT program, Sports & Talent sponsorship / scholarship program, , Free medical checks program , Vaccination programs, Research for community challenges Programs , Jigger infection prevention program, Pest control programs., Healthy Mothers & Healthy Children Project, Education through Innovation project, Children Nutrition Project, Immunizations Project (Covid- Polio) , Education Support to Institutions Project -(Facilitation & Empowerment project- Targeting low performing schools, classrooms, libraries etc), Mental Health Advocacy and Counselling project, Farming & Livestock Productivity Project, Rehabilitation from Substance abuse Project, Malaria Eradication project, Poverty Eradication & Economic Empowerment project, Natural Family Planning Advocacy & Reproductive health Project Culture Preservation Project, Marginalized Communities Empowerment Project, Innovation Project, Leadership Development Project, Community Volunteer Project, Patriotism Advocacy Project Medical Research Project , Widows & Single Mothers Empowerment Project, Rebuilding & Repairing Homes Project, Disease Outbreaks Response Project, Heart , Cancer, Kidney Treatment Project, Adult literacy Project ,Fine Art Development Project and many other focused on Kenya as other Global Agencies focus on internatioanal operations.

Investment & Business Division.

Banking & Micro Finance department- We seek to establish a Bank to provide savings and loans to millions that we have trained on business and to provide a financial base for all the funds for the projects that we shall be undertaking.We have full proposal, trained personnel then through the funds fulfill the deposits needed a full proposal, personnel and networks in place for Ufalme Capital meaning Helpers Of Africa International already registered.

Cities & Real Estate building Department, - This department will provide housing and infrastructure development to package cities. We seek to be involved in building cities & housing in thousands of locations in various nations identified with many design concepts in place. This will generate Jobs, Infrastructure, Capital formation, Increase in trade; improve security, Poverty eradication, enterprise development, utilization of resources, career development. Slums upgrade and eradication through electrification, sanitations, water, infrastructure, education and healthcare projects and programs. Hundreds of Housing designs ready and need assessments done to begin. Profit making real estate ventures also packaged Kenya & African countries have big housing deficit of millions. We have vision to build and provide mortgages for sustainability not just free housing. Some will be based on Industrial concepts because of minerals surrounding, while others based on tourism potential and agriculture and livestock. We have ready 7 cities ready to kick off Taita International Mining and Industrial City, Turkana Industrial Park, Runda Dream City, Seven City, Champions City and many more. Dr Luke Mwangi is a professional and consultant in architectural designs, building and civil engineering with a lot of experience in project management from childhood. Alongside Promote Solar energy generation throughout the continents it is cost effective.

Food Production department - Seeks to boast food production by owning model farm & livestock to produce own food for our Charity programs, Disaster relief, Improve health and livelihood Owning our lands for farming, poultry, livestock for donations & income to support charity programs. We shall also venture in advising farmers on better productive skills, support research and advisory support services to ensure better utilization for land use for appropriate crops and livestock to boast production. We have identified model farms to acquire for this including horticulture, floriculture and all manner of cash & food crops.

Mining, Technology, Value additions & Marketing Support Department -World is endured with Trillions of dollars worth unexploited minerals and on top people dying in poverty. Over 100 types minerals in some regions totally. We seek to Fund & Conduct Geo-survey in Mineral potential areas to verify quality and quantities as basis of planning for potential industrial sites. In Kenya we have the first 7 regions, Providing funding for mining licenses by packaging lands into mining concessions, Providing Machinery /Skills & Technology to boast mining production, Providing International markets for mineral good prices, Improving welfare of miners housing/ schools/ vehicles, hospitals as a win win situation . This will be revolving funds since we project big incomes from Joint venture projects. We have reports of all mineral potential nations and areas 2000 page report done and like Kenya, Congo, Zambia mines that do potential need above. Establishing Industrial Parks & Mining Cities in this Regions for

Industries department -Will create a platform of Job Creation & Job training platform for school leavers, Job seekers, Production and Service providers in various sector improving welfare/ livelihood/ utilization of resources/ opening up closed up communities, Forster International & regional corporations, Boasting Foreign Exchange, Access to Markets & goods, Infrastructure around region, Opening regions for settlement & trade Hub among many other benefits.

Education & Schools Department -This department will buy and build and run well built and furnished Primary, Secondary, Colleges, and universities. We have envisioned buying and constructing schools to both bring income from able learners and establish bursaries to sponsor needy children in a sustainable structure. We shall also use these facilities for our Special missions, Distribution or relief, feeding programs, sports, training, sports, talents centers, community programs, partners and stakeholders. These schools will also bursaries to needy children, orphans and Vulnerable students at all levels. It will also run and support governments in informal education programs for adults, special education and research support throughout Africa . We have been actively involved in empowerment in education through informal sector adult literacy classes, life skills mentorship and coaching, leadership training in all sectors etc. With your partnership many life champions will be raised in professional, talents and business sector

Health Department - Will own & run hospitals to be source Income from Able families and Charity offering help to the needy for sustainability. This will include Buying & Constructing new hospitals hundreds of designs ready, Mobile health services, Base of all medical services to people, High referral and tutorial hospitals along with rural areas clinics and mobile health units. These hospitals will be Bases of all Medical special missions & disaster uptake of victims there have been incidents of victims Helpers Of Africa International (KBG) cannot be admitted because nobody can secure them in prime hospitals.

Job Creation Companies department. -We have registered and ready business plans for hundreds of companies that will established model companies in all sectors for people to learn and offer Job opportunities and Job exposure to school leavers as per website with over 1000 business ideas & opportunities and over 100 registered already this will work alongside Entrepreneurship innovation department thinking / research centers for entrepreneurship opportunities in town and rural areas to fund like Maasai handcrafts, Water projects, Women groups, Fruits companies, Milk plants for livestock, Leather yards for skins, etc Conducting feasibility of new products then fund to begin and employ. We believe the best services and products are to yet to come initiatives in AFRICA, Asia, Middle East and the Rest of the world.

Hospitality and Conferencing Department- We have envisioned buying & building hotels, lodges, conference and conventional centers. This is both for income & hosting our many conferences, Festivals mentorships and all stake holders of our programs above including hosting orphans and Vulnerable Children for vocational along with hosting our local and international guests & donors/ partners, facilitators in various strategic locations. We shall also promote Africa's tourism is the biggest asset of Africa natural heritage to promote Africa as a tourist and investors destination highlighting the sounds, sights and hospitality of Africa and world. This will create more Jobs, improve infrastructure, trade for suppliers and stakeholders, foreign currency exchange, enterprise development, international relationship, and boost economy. The Visionary of Helpers Of Africa International Dr Luke has produced a book Dubbed Kenya the Dreamland to tour and invest which has invited many tourists and investors to Kenya. We have seen the potential of promotion of this sector especially through our vast networks more missionaries, investors and tourist visit.

Helpers Of Africa International

Headquater Vision Kingdom Dream City Nairobi Kenya

Kingdom Dream City the headquarter of Helpers Of Africa International and her 77 departments and 37 Global Agencies will embrace a Smart City with exceptional outlook of ultra modern building we are engaging the Top Architects and we request your referarall of the same to package a real Global Dream City. As your president my main profession is in Architectural and Construction work consolidated over 7000 designs for benchmarking of this project. I have a wide experience in design and project management from my childhood when l was 14 years and since then l have build capacity and networks to come up with a master piece of a city that you will all be proud of by the grace of God.

In conceptualization of Kingdom Dream City I have incorporated the Seven principles for sustainable magnet city to serve our functions of the 12 divisions outlined, Attract young and old wealth creators , Undergo constant physical renewal, well Defined city identity , Connect to other cities to others Nairobi is already central headquarter of UN in Africa, Cultivate new ideas even from you donors and partners, Stimulate investment through global networks and through you experienced donors, Develop strong leadership through our capacity and our smart team of consultants and Keeping a city vision on track We Have a clear plan and cost out the early stages. As the City serves us our administration, humanitarian, health, education, global trade hurb, networking, business & investment promotion and tourism purpose it shall generate income for our growth of our fund for sustainability of our Bank and Agencies for coming generations so we have both short and long-term goals on our City Headquarter. We have packed it in a way to convert ideas into a practical plan of action as they try to move forward. This great vision will help make this conversion from the theoretical to the real easier. In this large, dynamic city which will have many functions and stakeholder groups we shall be open reinvent plans and policies constantly. I have spent 4 years in planning and will be very strategic with Established geographic location with very good weathers and scerene of Kiambu, demographic and thematic priorities. I have Build in wide and repeated consultations on the plan from my smart team and from your networks along with top world planners, architects and engineering firms. Our Kingdom Dream City will be one of the greatest minds that will host largest global events connecting governments, private sector, civil society and international organizations, and general public to showcase innovation, promote progress and foster cooperation. Under the theme "Connecting global Smart thoughts, Creating the Future of the world ", with its three sub-themes, “Networking, Opportunity, Capacity building and Empowerment”, This Hurb city will engage new global partnerships stimulated by you networked valuable donors and partners supporting the effective implementation of global development vision embedded in the Agenda 2050, a large-scale platform for education and international dialogue giving a promising opportunity for the World and Nations seeking to explore opportunities to expand and consolidate win-win partnerships.

The Kingdom Dream City will be a global hurb to provide space for sharing ideas and best practices, fostering creativity, encouraging collaboration and celebrating human ingenuity. The City will have a significant role to ensure world business, investors and humanitarian best and prominent will have operation place in all major sectors through active participation in operations, confrencing and exhibition to showcase progress made in sustainable trade and industrial development, the organization’s efforts to transform and industrialize global economies, and to share knowledge and innovation across Continents , as well as create partnerships between governments, private sector and civil society organizations international to work towards ameliorating socioeconomic challenges on the continent, and advancing the quality of life of its global citizens. This City is focus to have a strong attraction and magnetic pull of investment and humanitarian operations through her clear vision, implemented by strong, inspiring leadership. We seek to attract residents with a demographic international profile that aligns with their vision, for both elderly and young creative thinkers, businesses will relocate to work with those people. The city will develop a reputation as the place to be for industries and lifestyles. We shall grow the city in a global and mass consciousness to form a strong economic global headquarter as we offer a pace and quality of life that differs from the hustle and bustle of global cities. We have packaged it as a global centers of commerce spreading wealth and employment throughout a country, region and the world. Our City will provide accessibility to increased diversity and stimulates innovation. It shall be a city of Champions to attract top talents and investors with good management to manage the exodus of people, energy and resources. It will provide opportunity for people to live and work as well as do businesses and invest well cordinated attraction
It will provide a strong hospitality and recreation appetite with ultra morden buildings and infrasture of roads, railway, airport, underground roads and railways as a global dream city to behold. Thank you for your generosity that will make this dream possible easily without stress and limitation of vision implementation. We have the technical and intellectual capacity to make this dream a reality for benefit of nations and the world by the grace of God

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

Helpers Of Africa International is starting this journey with an abiding faith in you our partners, donors and good will ambassadors to keep the funding on for generations as we the management keeps our word in the vision of refreshing nations, empowering and transforming the world through charity, empowerment developments projects and programs across the continents and nations as per our structure. Lets continue the solidarity and unity we have begun to join together to change the world in ways that would make life better for our generations. Many dreams begin small but through your generosity this one has been born like a mature elephant through this historic fund that has been raised. We shall bring access to platform of prievellage to orphans, weak, sick, street kids & families, depressed and many other hopless people a place of hope. The branches in various countries will have staffs by local people because they will have more understanding of particular needs of locals and creating local jobs.

Today is a day for celebration and I am very glad you have chosen to fund this bank and celebrate with us. To mark this occasion we have printed a pack outlining our structure and services that is your desk. This bank will join the mega reserve banks that exist in Nations and the funding is beyond imagination made possible by your generosity and passion to see a greater and better world to live for billions of people. Our aim is to serve your business and humanitarian interest to communities and nations since you have sacrificed a lot your time and resources to transform humanity, we shall not let you down on our stewardship and effectiveness through our core values. You can trust us with all resources and in your networks, I promise we'll take very good care of all resources, assets professionally, with Godly fear and in respect honor of your sacrifice and ensure nations are refreshed and billions of people are empowered from poverty and venerability by the grace of God. Your generosity will provide sustainability and long term empowerment to billions of people and raise someone else's weak hand. This vision did not happen overnight for 25 years we begun a journey of empowering the poor with our little limited resources and sacrifices selling only car one time, sacrificing only shopping budget to feed orphans and educate communities reaching over 40,000 leaders who influence millions and through media empowering millions. My wife and I have a very rich profile of professional management of institutions and humanitarian experience passion which gives you confidence that your funds are in right hands and the job is in bright experienced minds with network of smart team of huge and strong managment. I give God glory and credit to my family and church I Pastor for releasing us to serve God and humanity availing limited resources to do so much for humanity and Kingdom of God.

This Partnership for Charity, Development and Empowerment of humanity and nations in Helpers Of Africa International through you our dear partners and donors offers us a striking opportunity to concretize international cooperation for a mutually beneficial sustainable development by reviewing three crucial pillars of our vision and mission in Charity, Empowerment and Development in the nations of the world. As you are already aware, International Trade, Investments, Charity and Empowerment of humanity are crucial to international development. We shall stick to those areas through our 77 departments that I will be substantiating very shortly. International trade plays a vital role in economic development since it provides employment, contributes to the transfer of technology and is an important source of foreign exchange needed for imports of capital and intermediate goods. The many nations of the world have seen transformational change in the past two decades – moving from a low income to more upper middle income countries, with absolute poverty declining but much is yet to done because many are still struggling with poverty and Helpers Of Africa International will seek to venture in very deliberate poverty eradication projects and programs impacting children, women, men and youths across the nations. The track record demonstrates the ability for nations revive and with strength to grow economies through economic boast that Helpers Of Africa International will offer to make transformational progress towards growth and welfare improvement nations and citizens.

With primacy of prosperity that God has given you and your partners are also joined an awe inspiring accountability and responsibility to the future of the world. If you look around you, you must feel not only the sense of duty done but also you must feel anxiety of task ahead because of your generosity of the huge fund consolidated. Opportunity is here now, clear and shining for all us to change the world positively. To reject it or ignore it or fritter it away will bring upon us all the long reproaches of the after-time. It is necessary that constancy of mind, persistency of purpose, and the grand simplicity of decision shall guide and rule the generosity you have shown. We must, and I believe we shall, prove ourselves equal to this noble task of Charity, Empowerment and Development the motto of Helpers Of Africa International. When I stand here this quiet moment I shudder to visualise what is actually happening to billions now waiting on us and what is going to happen in this period when famine stalks the earth. None can compute what has been called “the unestimated sum of human pain.” Our supreme task and duty is to guard the world and homes of the common people from the horrors and miseries of poverty, disease, illiteracy and all ripple negative effects that come with this states of pains in communities and nations. With many shaking economies in some nations deficiency of foreign capital flows, inherent sustainability risks and eventual accumulation of macroeconomic imbalances in the external, fiscal and financial sectors has led to collapses of feasible businesses and companies in many nations that Helpers Of Africa International will seek to fix to bail out governments and companies from the global financial crisis that have been experienced lately and revive them to create jobs, capital formation and sustain there citizens . Many countries were affected by global financial crisis, there are today encouraging signs of recovery and rebalancing of growth anchored in macro-fiscal and structural reforms initiated by Governments in various nations that Helpers Of Africa International seeks to stimulate.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

This fund speaks to our highest aspirations beyond the fugure of Trillions of Dollars to me l see the Development and Humanitarian impact in a cruelt and world full of hardship of our world where many have been locked in prison of poverty, diseases, hunger, thirst, poor education, no or poor shelter, poor infrastructure and public amenities that Helpers Of Africa International seeks to deal with. Our actions and generosity matters, and will bend history in the direction of empowerment of many in generations to come. .Your generosity and the labors to be here will impact many at the world stage. Compared to some of organizations who are giants of history who've received this international funding we have begun well though we are not in completion with any but we shall work together in collaboration and partnerships in various fields especially in the area of disaster response and management in disbursement of aid, relief in war torn nations, drought striken regions and extending financial services to many across networks of banks and micro-finance. There are the men and women around the world who have given a lot of time and resources for humanity and many of you have been doing it individually but now we shall have a bigger impact together. We shall work and support humanitarian organizations to relieve suffering; the unrecognized millions whose quiet acts of courage and compassion inspire even the most hardened cynics. I cannot argue with those who find these men and women — some known, some obscure to all but those they help — to be far more deserving but we shall team up.

Most profound issue surrounding this fund of Helpers Of Africa International that will continue to grow with more donations and partners who will join this movement of generosity to empower humanity and develop the world creating a better world tomorrow as we relief many from pain of poverty and lack ensuring that sickness will no longer be a death sentence because of improving health care. Drought, disasters and disease have claimed many lives and this should come to end through us and collaboration of other international arms bringing peace among tribes and civilization to upgrade the lives of many. A decade into a new century, your generosity to help the world is chaing the old architecture of those who have having more and those who are poor continues to perish thank you for changing the world view by joining together to change humanity. The world may no longer shudder at the prospect of poverty, disease, droughts, illiteracy and war if we engage on our vision and mission effectively in partnership with organizations and governments. . Many efforts are being done on peace mediations in nations and communities however wars between nations have increasingly given way to wars within nations. The resurgence of ethnic or sectarian conflicts; the growth of secessionist movements, insurgencies, and failed states — all these things have increasingly trapped civilians in unending chaos. In today's wars, many more civilians are killed than soldiers; the seeds of future conflict are sown, economies are wrecked, civil societies torn asunder, refugees amassed, children scarred. This fund will promote peace building and bridging along with providing humanitarian relief in form of shelter, clothes, food and water to victims especially to children and women in war and conflict zones directly and in partnership and collaboration with organizations and governments. I do not bring with me today a definitive solution to the problems of war. What I do know is that meeting these challenges will require the same vision, hard work, and persistence of those men and women who acted so boldly decades ago. And it will require us to think in new ways about the notions of just war and the imperatives of a just peace.

We shall engage in peace building and initiatives'. Peace is not merely the absence of visible conflict. Only a just peace based on the inherent rights and dignity of every individual can truly be lasting with economic stability also comes rest and peace evading petty crimes and organized crime which people engage for survival. There is a strong connection between poverty and security which we shall actively to enact. It was this insight that drove drafters of the Universal Declaration of Human Rights after the Second World War. In the wake of devastation, they recognized that if human rights that include access to health, shelter, income, good life for all are not protected, peace is a hollow promise. It is undoubtedly true that development rarely takes root without security; it is also true that security does not exist where human beings do not have access to enough food, or clean water, or the medicine and shelter they need to survive. It does not exist where children can't aspire to a decent education or a job that supports a family. The absence of hope can rot a society from within. The programs of Helpers Of Africa International will empower and instill development to create hope that is key to peace.

And that's why helping farmers feed their own people — or nations educate their children and care for the sick — is not mere charity. It's also why the world must come together to better our environment prevent, soil erosion, preserve water catchment areas that we seek to do because if we do nothing, we will face more drought, more famine, more mass displacement — all of which will fuel more conflict for decades. For this reason, it is not merely scientists and environmental activists who call for swift and forceful action security hangs in the balance if all this are not put into account we shall participate and fund such innitiatives. We shall promote Agreements among nations. Strong institutions and Investments in development. As the world grows smaller, you might think it would be easier for human beings to recognize how similar we are; to understand that we're all basically seeking the same things; that we all hope for the chance to live out our lives with some measure of happiness and fulfillment for ourselves and our families along with humanity in the world. Adhering to this law of love has always been the core struggle of human nature. For we are fallible. We make mistakes, and fall victim to the temptations of pride, and power, and sometimes evil. Even those of us with the best of intentions will at times fail to right the wrongs before us.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

I think it would be well to consider the high duties and the responsibilities of philanthropists and humanitarians which a very high prestigious work in humanity and the Kingdom of God. We stand together with no apologies to do well to humanity, roar like a lion of the Mara with hope a new dawn for a brighter world. Charity grew out of human need for it, and it has not changed except to become more needed. Humanity has been passing through a gray and desolate time of confusion and tragedy of universal fear so long sustained that there were no longer problems of the spirit, so that only the human heart in conflict with itself seemed worth writing about relief, peace and community transformation. The work of charity, empowerment and development is delegated to declare and to celebrate man's proven capacity for greatness of heart and spirit – for gallantry in defeat – for courage, compassion and love. We shall engage in strong campaign against weakness and despair, these are the bright rally-flags of hope and of emulation. We shall promote Knowledge through education in schools and other platforms because present universal fear has been the result of a forward surge in our knowledge and manipulation of certain dangerous factors in the physical world. Therefore strong education systems and facilities is key in framing pace and prosperity of our current and future generations. Our action is to help people in situations of crisis. And ours is not a contented action. Bringing medical aid to people in distress is an attempt to defend them against what is aggressive to them as human beings. Humanitarian action is more than simple generosity, simple charity. It aims to build spaces of normalcy in the midst of what is profoundly abnormal. More than offering material assistance, we aim to enable individuals to regain their rights and dignity as human beings. Through our humanitarian volunteers departments and medical services innitiatives, we are committed to bringing direct medical aid to people in need. But we act not in a vacuum, and we speak not into the wind, but with a clear intent to assist, to provoke change, or to reveal pain. Our action and our voice are acts of indignation, a refusal to accept an active or passive assault on the other. We are not sure that words can always save lives, but we know that silence can certainly kill. Humanitarianism occurs where the political has failed or is in crisis. We shall act and do projects and programs not to assume political responsibility, but firstly to relieve the inhuman suffering of that failure. Our programs and projects will be free of political influence. Humanitarian action requires a framework in which to act. In conflict, We have frameworks to act within international humanitarian laws as execute our various projects and program establishing rights for victims and humanitarian organizations and ensure respect of these rights, and to sanction their violation as war crimes. Today this framework is clearly dysfunctional. Access to victims of conflict is often refused. Humanitarian assistance is even used as a tool of war, Sexual violence we shall work hand in hand and fund various authorities to registrate humanitarian structure to ensure that humanitarian work is not abused in various countries. In this dysfunction, we will speak to push the political to assume its inescapable responsibility. Humanitarianism is not a tool to end war or to create peace. It is a citizens' response to political failure. It is an immediate, short-term act that cannot erase the long-term necessity of political responsibility which we shall expect the political leaders and governments to do there needful and rightful role for our humanitarian work.Today humanitarian organization and fund as ours has a new global role, a new informal legitimacy that is rooted in its action and in its support from public opinion. It is also rooted in the maturity of its intent such as environmental and the humanitarian movements, and of course, the movement for equitable trade. Conflict and violence are not the only subjects of concern. As civil society we exist relative to the state, to its institutions and its power. Ours is not to displace the responsibility of the states. The final responsibility of the state is to include, not exclude, to balance public interests over private interests and to ensure that a just social order exists. Ours is not to allow a humanitarian alibi to mask the state responsibility to ensure welfare of humanity is taken care off.

And ours is not to be co-managers of misery but instile hope for our future world. When communities and nations and continents identify a problem, we shall work through existing structures to provide a solution. Today, More than 90% of all death and suffering from infectious diseases occurs in the developing world. Some of the reasons that people die from diseases like AIDS, TB, sleeping sickness and other tropical diseases are that lifesaving essential medicines are either too expensive, are not available because they are not seen as financially viable, or because there is virtually no new research and development for priority tropical diseases. We shall partner and collaborate with governments, International Government Institutions, the Pharmaceutical Industry and other NGOs to solve these challenges in charity and advocating for change funding initiatives that promote health care.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING .

Humanitarian action takes place in the short term, for limited groups and for limited objectives. This is at the same time both its strength and its limitation. Humanitarian action is by definition universal. Humanitarian responsibility has no frontiers. Wherever in the world there is manifest distress, the humanitarian, by vocation, we shall do our best through you to respond. We seek to openly solve the challenges of the weak and vulnerable - no victim can be intentionally discriminated against, or neglected to the advantage of another. Humanitarian action exists only to preserve life, not to eliminate it. Hundreds of thousands of our contemporaries are forced to leave their lands and their family to search for work, food, to educate their children and to stay alive. Therefore peace building will be priority through goodwill ambassadors of Helpers Of Africa International. Our volunteers and staff will live and work among people whose dignity is violated. These volunteers will be trained to choose freely to use their liberty to make the world a more bearable place. The act of humanitarianism comes down to one thing: individual human beings reaching out to those others who find themselves in the most difficult circumstances.All this, in the hope that the cycles of violence and destruction will not continue endlessly. We shall play the role of Good Samaritan, healing the wounds of war and attempting to prevent conflict without compromising its neutrality. The extent of disaster response will include humanitarian, development, peace and human rights. Social support, health-care, water-supply and infrastructure networks that are often destroyed in armed conflict. People's needs are the basis for all humanitarian work, and those needs are undergoing a profound change. It would be impossible, today, to limit humanitarian work to health care, water and shelter and a strict interpretation of international humanitarian law. We must acknowledge that people's need for peace, development are needs that an organization such as ours cannot ignore. Humanitarians take a different, much more consensus-based approach to these needs. But peace remains the ultimate goal of neutral and impartial humanitarian work, and that goal is also political. So through our good will ambassadors who have experienced in mediation to form a team that will be accompanying us in this kind of challenges we shall be calling for this session as we establish the departments please write in our feedback coupon your interest and abilities in this area and all other areas you would like to participate in so that we can engage you accordingly. The changing face of war and disasters in relations with the shift in people's needs we shall review and revise continually pragmatic extension to our mandate on a case-by-case basis, with the aim of: preventing war and community crises affecting humanity, implementing political agreements with a humanitarian component, building the trust needed to begin peace processes and consensus building. We shall not engage to finish, frustrate or suffocate any humanitarian organization the world is too big with a lot of needs of humanity that cannot be met by one organization. We shall support, pray, complement and collaborate with all other organizations even individual, religious and community that shares our common virtues. We shall under no circumstances shall we participate in negotiations aiming for separate peace since separate peace is not peace but rather a political manoeuvre and an act of war. There must be a solid consensus in favor of our involvement before we can get involved in peace processes. We shall be careful not take any action in the area of prevention of conflicts that may endanger our humanitarian mission or our ability to help the victims of war, should our efforts to avoid a conflict fail. We shall play role of neutrality and embrace Fundamental Principles of neutrality, impartiality and independence, which also guide our work in conflict prevention, work with local populations, and allows us to understand people's needs. We shall promote strong advocacy to ensure that Rape and other forms of sexual violence are unacceptable weapons in any and all warfare, we shall support people like Nobel Price winners such as Denis Mukwege, Nadia Murad and to meet the needs of the thousands of women victimized by these war crimes. Please refer such people to us support in your countries who are impacting humanity in various areas for support and collaboration. We shall set up Hospitals to provide trauma treatment and programmers to reintegrate women, children and all victims of violence, rape and war. We seek to rehabilitate those in shock, pain, fear and sense of debasement in collaboration with persons and organization dealing with such. Please write such in feedback coupons provided also so that we begin with those who have appraisals from our partners before scouting for more and those will be landing projects in your countries as we work together with you in impacting humanity in your country. Provide contacts of such person please. If anything close to a stable peace is to be achieved, respect for each other's character, integrity and dignity is an absolute requirement.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We stand here today to launch the road map to deliver billions of people who are victims of war, violence, racism, oppression, repression and the impoverishment of an entire people. Because of your generosity, courage and persistence in our vision we shall be gathering annually to join together to celebrate many achievements and outstanding human victories of our century we already have thousands of victory reports on poverty eradication programs where many have been lifted from poverty and now own their businesses, orphans educated and facilitated to champions in their career, health care support that has saved lives, institutions that take care and empower Vulnerable facilitated and established. That triumph will gradually and finally bring to a close history of hundred years of African and world suffering from poverty. This reports on our projects and programs that we shall be posting and reporting will mark a great step forward in history and also serve as a common pledge of the peoples of the world to fight poverty, draughts, disease , illiteracy and all other negative norms that affect society negatively in whatever disguise and assume it. We shall also be celebrating those who have paid price in humanity who will shall be awarding Kingdom Humanitarian Award during our gathering and throughout the year organize over 70 other awards ceremonies to motivate and reward humanitarian, creativity, innovation, talents, education, health, economic revolutions, Job creation, advocacy, charity, peace, human dignity, Rescue, First aid , parenting in children homes and other sectors we shall begin with Kenya then extend to other countries so our annual summits will also be celebrating meetings. This reward will not be measured in money only but with honors and enthroning many goodwill ambassadors in various sectors who will represent our organization in many events and functions internationally. Our joy of celebrating humanity, empowerment and development heroes will be measured by the happiness and welfare impact upon humanity who were transformed from state of vulnerable citizens in any society and the greatest of our treasures. We shall work together to empower our children and the future generations through over 100 programs and projects including orphans as stated in our children empowerment department .The children of the world must, at last, play in the open veld, no longer tortured by the pangs of hunger or ravaged by disease or threatened with the scourge of ignorance, molestation and abuse, and no longer required to engage in deeds whose gravity exceeds the demands of their tender years. In front of all you distinguished audience, we commit Helpers Of Africa International to the relentless pursuit of the purposes defined by our vision of Charity, Empowerment and Development with strong explosion of our 1000 book Human resource and strategic management manuals to offer the best to humanity and the world for the coming generations. [1]The vision will bring happiness and welfare of the mothers and fathers of these children, who must walk the earth without fear of being robbed, killed for political or material profit, or spat upon because they are beggars. They too must be relieved of the heavy burden of despair which they carry in their hearts, born of hunger, homelessness and unemployment. This mega fund will be valued by not only the many assets we shall acquire to facilitate our projects and programs in the nations to also create a continuous revenue stream throughout generations but by the value that we shall give to relief suffering and by the happiness and welfare of all the people of nations who will have been torn down the inhuman suffering of poverty, disease walls that divide them. The value of our shared reward will be measured by the joyful peace which will triumph, because the common humanity that bonds people in the world, will have said to each one of us that we shall all live like the children of paradise. Our solidarity to empower humanity and develop the world in all sectors shall create and recognize that all people including orphans, widows , those living with disability are born equal, with each entitled in equal measure to life, liberty, prosperity and good governance. You will be surely be blessed for this sufficient reason to realize that history will not be denied and that our new partnership will do good to humanity and the world around us. We would also like to take advantage of this occasion to pay tribute to the many formations and organizations of charity, empowerment and development that you represent as individuals that have similar vision and mission please highlight in the feedback the operation scope of your organization to strategize on platforms of partnership and collaboration in various fields in various countries instead of beginning from scratch we can begin from Known to unknown for valuable networking. We shall seek to make our world free from the horrors of poverty, hunger, deprivation and ignorance, relieved of the threat and the scourge of civil wars that are attached to economic collapse and external aggression and unburdened of the great tragedy of millions forced to become refugees.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We understand our call, that we devote what remains of our lives, resources and experiences together to demonstrate, in practice, that the normal condition for human existence non-racism, non-sexism, prosperity for everybody, a healthy environment and equality and solidarity among the peoples. Moved by that appeal and inspired by the eminence you have thrust upon us, we undertake that we too will do what we can to contribute to the renewal of our world so that none should, in future, be described as people who failed there generation and failed to attend to God divine given assignment. Let it never be said by future generations that selfishness made us fail to live up to the ideals of humanism and to develop the world for future generations. We are aware of the cost that this divide imposes on the poor and dispossessed who are no less deserving of human dignity, fundamental freedoms, security, food and education than any of us. This destiny of humanity will be born ultimately by all of us. Let no walls separate us to do good to humanity and attend to crises in the world in spirit of brotherhood and sisterhood. We have entered the third millennium through a gate of hope, we see better, and we see further – we will realize that humanity is indivisible. New threats make no distinction between races, nations or regions have entered every mind, regardless of wealth or status. A deeper awareness of the bonds that bind us all – in pain as in prosperity – has gripped young and old. In the early beginnings of the 21st century – a century of many hopes that progress towards global peace and prosperity is inevitable — this new reality can no longer be ignored. The opportunity must be seized to impact humanity and that is why this network of generous partners of Helpers Of Africa International has been divinely been set up to bring new hope to the world by the grace of God. The 20th century was perhaps the deadliest in human history, devastated by innumerable conflicts, untold suffering, and unimaginable crimes. Time after time, a group or a nation inflicted extreme violence on another, often driven by irrational hatred and suspicion, or unbounded arrogance and thirst for power and resources. In response to these cataclysms, the leaders of the world came together at mid-century to unite the nations as never before. So our unity brings new hope to world as an additional initiative to add value to coming generations to affirm the dignity and worth of every person, and to secure peace and development for all peoples. We shall recognize and address the needs of the poor, conserve the resources and beauty of nature, advocate the equal rights of orphans, provide for the safety and infrastructure of future generations. We have a strong focus to vanquish poverty, ignorance and disease. Awareness of the sanctity and dignity of every human life, regardless of race or religion. This will require us to look beyond the framework of States, and beneath the surface of nations or communities. We must focus, as never before, on improving the conditions of the individual men and women who give the state or nation its richness and character. Saving one life is to save humanity itself. Poverty begins when even one child is denied his or her fundamental right to education. What begins with the failure to uphold the dignity of one life, all too often ends with a calamity for entire nations. Economic stability and peace belongs not only to states or peoples but to each and every member of community. The sovereignty of States should not a hindrance for people to join up together for the common good of humanity as we have joined today to do good to humanity. For Peace to be sound and lasting you can't delink it from economic stability to be made real and tangible in the daily existence of every individual in need. Peace must be sought, above all, because it is the condition for every member of the human family to live a life of dignity and security. Eradicating poverty prevents conflict, only in a world that is rid of poverty can all men and women make the most of their abilities. I have witnessed this in poverty eradication and economic empowerment forums I have hosted impacting thousands of job seekers, school leavers that men and women are full of potential just need motivation, coaching and mentorship to bring out there talents- sports / arts/ music/ , identify problems in community, stir up creativity & innovation, Education Exposure , Utilization of Natural Resources (mining very very rich in Africa Vegetation & Livestock, blue economy) INCASE YOU ARE IN MINING I HAVE MINES WITH TRILLIONS OF DOLLARS WORTH IN KENYA AND DATA with networks in Africa which we shall explorer as Helpers Of Africa International and help you partners to opportunity to harvest for your sowing, Information & Observation through networking, pray for Divine Ideas (Divine direction; Dreams, Prophesies), engage in Research & Brainstorming (Research, Academic, Social), alignment with National Economic Streams (Agriculture, Tourism, etc), Extension of established organization products, systems & services (Nation-to-Nation; Region-to-Region; Estate-to-Estate)

INCASE YOU HAVE INDUSTRIES THAT NEED TO FIND MARKETS FOR PRODUCTS AND SERVICES IN AFRICA PLEASE NOTE IN THE FEEDBACK COUPON PLEASE we shall have separate meeting after to discuss everything you need done in africa to work for you partners to serve you for your generosity. Thro this enlightment have seen business potentials released and unveiled in a big way and thousands come out of poverty and millions impacted and regions transformed. Through our Training, innovation, industries department much will be accomplished.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

Only in good environment can prosperity thrive in all good will of placing based at the centre of everything. The answer to settle humanity in prosperty, health, literacy, peace and tranquility is not one person's job but collective responsibility of smart team of you distinguished guests partnering with this vision and many other organizations that we shall corroborate with. We understand, as never before, that each of us is fully worthy of the respect and dignity essential to our common humanity. We recognize that we are the products of many cultures, traditions and memories; that mutual respect allows us to study and learn from other cultures; and that we gain strength by combining the foreign with the familiar. Our passion for empowering humanity is founded on the principle of the equal worth of every human being. It is the nearest thing we have many humanitarian institutions that can address the interests nations beyond there own borders impacting and empowering people from all sides. Through this universal fund contributed by you generous and kind people from many nations Helpers Of Africa International will be a strong platform of human progress. Individuals united as we are - can serve the interests of the citizens of the world by recognizing common interests and pursuing them in unity as we have purposed by this expression of unity.

It is clear with globalization no individual business or organization will be able survive but through networking where one business produces the other buys and provides market this will also be a benefit to each other value addition as we plan to benefit the world. This era of global challenges leaves no choice but cooperation at the global level and international level in business and humanitarian work lets seize this opportunity to light another candle to light the room because by sharing the light we don't lose we just become better. When your neighbor is empowered your estate is safe and you can really on them in solidarity. Our effort to refresh economies of nations will improve better will create environment that allows each individual to flourish, and each States to thrive. Our hope is that our mission will motivate the world to collectively begin to define a new roadmap to raise many good will ambassadors of humanitarian work. Taking action is a choice, it is a choice whether or not to see sickness destroy humanity, whether or not orphans will be denied education for backgrounds they are not in control off, Whether or not millions of slum dwellers will stay in houses made with paper and sewage pouring into there rooms, Whether or not people in Africa will live on top of minerals God given wealth with trillions of dollars of unexploited minerals because the lack machinery / markets / technology with wealth value that can build cities, .

whether or not we shall watch potential industries clash with millions of jobs because of cash flow that can be injected to sustain jobs for families and transform communities, Whether or not we shall watch environment and wildlife destroyed and water reserves drying up because of deforestation and soil erosion denying opportunity for our children to enjoy and be refreshed the way we are enjoying in this conservancy, Whether or not we shall watch destruction of human life helplessly by disease outbreaks / draughts / floods / hurricanes as we watch helplessly, Whether or not a woman in an interior village should go for two days to get water for the family carrying infants on their back only to come back and decide whether they will save the children or the only cow yet they are seated on billions of billions of litres of water underneath the surface and also affected by regular flood that can be harvested in dams, Whether or not the elderly poor will continue to die without honor cursing because of hunger and neglect after having serving the world for over 70 years. ***Brethren we have made the right choice to impact, empower and develop the world. God bless you for making the right choice.***

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

If someone had ever told me that I had the slightest chance of managing one of the biggest fund in the world when l grew up in middle family in Kenya I would have said they are dreaming. But by the grace of God and humility with obedience to the call of God and concern for a better world and humanity the truth is right here in our eyes now to steward this mega fund with a noble purpose. I can't say I am the best but by the grace of God with limited resources my family, church and I have done our best for 25 years silently with no international funding and recognition but we are very grateful to you to recognize us and make us your partners and team leaders of this fund. So, I recognize that I am in a very rare company of very highly esteemed leaders and for that l give God all the glory.

I was receiving continuous updates of the culmination of this fund from my friend Jack deckkers as he was briefed close by abele mine was to continue to pray for Gods grace which l have received and will continue to receive, prepare and structure more to handle and look for able men and women who could lead our 70 departments to make this vision of Helpers Of Africa International credible and effective with spirit of excellence we are set for the Job and stewardship. It has taken time to process the vision and function of Helpers Of Africa International in bits and pieces before assembling all into one well monitored and managed structure as you can see. Like William Shakespeare, the great literary figure. I would reckon he thought of himself as a dramatist. His creative vision and ambitions were no doubt at the forefront of his mind, but there were also more mundane matters to consider and deal with. "Is the financing in place?" "Are there enough good seats for my patrons?" "Where am I going to get a human skull?" I would bet that the farthest thing from Shakespeare's mind was the question "Is this *literature*?" That is how my journey has been full of good works yet with many setbacks especially financial with great sacrifice by still believing that I am in the right truck to touch a life in seminars, children feeding programs, health seminars, poverty eradication and economic empowerment summits and festivals in cities and interior just to touch a life that we sponsored depleting at time every single coin available and selling cars and land to do the will of God and impact humanity. When I started envisioning to do charity, empowerment and development 25 years ago l begun to write books which I did 17 books on various subjects ranging from entrepreneurship, management, spiritual nourishment, investment, tourism, humanitarian, counseling, mentorship, development programs / projects and just finished over 70 books to administer the organization with 1000 pgs Human Resource and 500 pg Strategic management book of the organization.

I started to achieve some renown for my abilities, my aspirations for these books and seminars only went so far but for real never thought it would lead to custody and stewardship of such a big fund for real but by your generosity and friends, kindness, passion for humanity and development you have bought the vision we displayed in the website and by the grace of God you gave and now have come to witness the launch and connect with us the visionary for more intimate partnership which by the grace of God will go for many days to prosper the nations and the world. If I was really dreaming big, maybe I could imagine getting to make a just a national impact only because by the grace of God in this country I am renoun hosted meetings graced by President, Deputy President, Ministers of Government, Speaker of National Assembly but had not thought of meeting International Presidents, CEOs and world billioners that now I can see here and many more I will meet. Well, I've been doing what I set out to do for a long time, now. I've hosted over 1000 summits , seminars and festivals in Africa , featured in Many Radio and Television stations to mobilize and mentor of Charity, Empowerment and development we seek to do more with your support. By the grace of God my books and training programs especially on entrepreneurship seemed to have found a place in the lives of many people throughout many different cultures and I'm grateful for that.

Helpers Of Africa International Global Empowerment through Charity, Empowerment and Development

I accept this mandate as the President of Helpers Of Africa International with humility as your team leader and custodian of all this historic mega resources for charity, empowerment and development to stimulate prosperity and Peace at a moment. I accept this responsibility in confidence of your support, determination and a majestic scorn for risk to establish a reign of freedom from poverty and economic empower humanity and nations. I am mindful that only yesterday and today a child somewhere is dying of disease and hunger crying out for someone who can stretch his or her hand of brotherhood and sisterhood thank you for answering such a cry with your generosity you have shown now and in the years to come. Our Solidarity to transform humanity is a mindful that debilitating and grinding poverty afflicts many people and chains them to the lowest rung of the economic ladder .This task and fund has been given custody to a movement which is committed to unrelenting struggle which has won the very confidence of you dear partners in peace and brotherhood which is the essence of our focus, vision and mission of this fund.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

After contemplation, I receive this fund on behalf of this transformation movement is a profound recognition that is the answer to the crucial question of our time in the world today – the need for man to overcome economic oppression of vulnerable and a powerful economic movement we are birthing today will bring a social transformation. Sooner or later all the people of the world will have to discover a way to live together in peace, prosperity and unity through our network into a creative psalm of brotherhood and sisterhood. If this is to be achieved, our nations must be engaged in beneficial socio economic activities for youth, women and men to evade human conflicts rejecting negative impacts of poverty which include revenge, aggression and retaliation. This roadmap will impact billions in Africa and all our continents and nations to find a new sense of dignity. This same roadmap through our vision and mission will open billions in the world to a new era of progress and hope. Our achievements with limited resources has impacted many and now with your huge capacity will, I am convinced, be widened and lengthened into a super highway of prosperity in increasing numbers create alliances for more of your prospered friends, relatives and business partners to be involved in this honorable movement of transformation of the world.

We accept this vision in joint focus with an abiding faith in God and you our partners from all over the world and an audacious faith in the future of mankind. Let's refuse to accept despair as the final response to the ambiguities of history. Lets refuse to accept the idea that children , orphans, widows , those living with disability will die as we watch from diseases and poverty being denied opportunity of education all setbacks of nature makes people morally incapable of reaching up for the eternal. Let's refuse to accept the idea that man is helpless in the river of life, unable to influence the unfolding events which surround him. Lets refuse to accept the view that mankind is so tragically bound to the starless midnight of dark world of poverty and economic oppression that the bright daybreak of peace, prosperity and brotherhood can be achieved through our strong teamwork of mobilization of resources and by the grace of God change our generations. Lets refuse to accept the cynical notion that nation after nation will continue to collapse economically and making many vernurable to poverty, disease, lack of shelter, water and sanitation including the basic rights of education, electricity, safety, proper environment and must spiral down stairway into the hell of destruction when we can help. I believe that unarmed truth and unconditional love will have the final word in reality. This is why right act of goodness temporarily defeated is stronger than evil triumphant because light finally overcomes the darkness. I believe that even amid today's poverty, disease and illiteracy, there is still hope for a brighter tomorrow. I believe that many wounded people in Africa community and nation can, can be lifted from this dust of shame to reign supreme among the children of men and women.

I have the audacity to believe that peoples everywhere can have three meals a day for their bodies, education and culture for their minds, and dignity and freedom for their spirits. I believe that what self-centered people have torn down, generous and humanitarian people like us can build up. I still believe that mankind will bow before the altars of God and be crowned triumphant over war and bloodshed, and nonviolent redemptive good will liberate many from poverty "And the lion and the lamb shall lie down together and every man shall sit under his own vine and fig tree and none shall be afraid." The faith, vision, generosity, kindness and courage we have exhibited to be here in the famous wonder of the world the Mara can give us courage to face the uncertainties of the future and create another wonder of the world of impacting humanity as we have already exhibited the wonder of raising one of the biggest fund ever raised anywhere. It will give our tired feet new strength as we continue our forward stride toward the world of freedom. Today I come to mara with all humility to meet you very blessed, humble and generous people as a trustee, inspired and with renewed dedication to humanity. I accept this mandate to be a steward of this fund on behalf of all who love peace, brotherhood, sisterhood and being our brothers and sisters keeper.

I say I come as a trustee, for in the depths of my heart I am aware that this fund is much more than my personal or organization but to empower many in the world and establish solid infrastructure for billions of people to be refreshed and facilitated for their dreams fulfillment. Every time I take a flight, I am always mindful of the many people who make a successful journey possible – the known pilots and the unknown ground crew. So you honor to entrust us with such big fund through our solid structure will never be forgotten as dedicated pilots of our vision and mission of Charity, Empowerment and Development in the nations of the world beginning with Africa this continent of potential and beauty. We may have made headlines of the prosperity and income of our businesses , companies, countries and our organizations but with this solidality will touch the heart of God as we impact humanity together, men and women and children will be taught that we have a finer land, a better people, a more noble civilization – because of your generosity touching the many humble children of God.This fund speaks to our highest aspirations beyond the fugure of Trillions of Dollars to me I see the Development and Humanitarian impact in a cruelt and world full of hardship of our world where many have been locked in prison of poverty, diseases, hunger, thirst, poor education, no or poor shelter, poor infrastructure and public amenities that Helpers Of Africa International seeks to deal with. Our actions and generosity matters, and will bend history in the direction of empowerment of many in generations to come. .Your generosity and the labors to be here will impact many at the world stage. Compared to some of organizations who are giants of history who've received this international funding we have begun well though we are not in completion with any but we shall work together in collaboration and partnerships in various fields especially in the area of disaster response and management in disbursement of aid, relief in war torn nations, drought striken regions and extending financial services to many across networks of banks and micro-finance. There are the men and women around the world who have given a lot of time and resources for humanity and many of you have been doing it individually but now we shall have a bigger impact together. We shall work and support humanitarian organizations to relieve suffering; the unrecognized millions whose quiet acts of courage and compassion inspire even the most hardened cynics. I cannot argue with those who find these men and women — some known, some obscure to all but those they help — to be far more deserving but we shall team up.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

Most profound issue surrounding this fund of Helpers Of Africa International that will continue to grow with more donations and partners who will join this movement of generosity to empower humanity and develop the world creating a better world tomorrow as we relief many from pain of poverty and lack ensuring that sickness will no longer be a death sentence because of improving health care. Drought, disasters and disease have claimed many lives and this should come to end through us and collaboration of other international arms bringing peace among tribes and civilization to upgrade the lives of many. A decade into a new century, your generosity to help the world is chaing the old architecture of those who have having more and those who are poor continues to perish thank you for changing the world view by joining together to change humanity. The world may no longer shudder at the prospect of poverty, disease, droughts, illiteracy and war if we engage on our vision and mission effectively in partnership with organizations and governments. . Many efforts are being done on peace mediations in nations and communities however wars between nations have increasingly given way to wars within nations. The resurgence of ethnic or sectarian conflicts; the growth of secessionist movements, insurgencies, and failed states — all these things have increasingly trapped civilians in unending chaos. In today's wars, many more civilians are killed than soldiers; the seeds of future conflict are sown, economies are wrecked, civil societies torn asunder, refugees amassed, children scarred. This fund will promote peace building and bridging along with providing humanitarian relief in form of shelter, clothes, food and water to victims especially to children and women in war and conflict zones directly and in partnership and collaboration with organizations and governments. I do not bring with me today a definitive solution to the problems of war. What I do know is that meeting these challenges will require the same vision, hard work, and persistence of those men and women who acted so boldly decades ago. And it will require us to think in new ways about the notions of just war and the imperatives of a just peace.

We shall engage in peace building and initiatives'. Peace is not merely the absence of visible conflict. Only a just peace based on the inherent rights and dignity of every individual can truly be lasting with economic stability also comes rest and peace evading petty crimes and organized crime which people engage for survival. There is a strong connection between poverty and security which we shall actively to enact. It was this insight that drove drafters of the Universal Declaration of Human Rights after the Second World War. In the wake of devastation, they recognized that if human rights that include access to health, shelter, income, good life for all are not protected, peace is a hollow promise. It is undoubtedly true that development rarely takes root without security; it is also true that security does not exist where human beings do not have access to enough food, or clean water, or the medicine and shelter they need to survive. It does not exist where children can't aspire to a decent education or a job that supports a family. The absence of hope can rot a society from within. The programs of Helpers Of Africa International will empower and instill development to create hope that is key to peace.

And that's why helping farmers feed their own people — or nations educate their children and care for the sick — is not mere charity. It's also why the world must come together to better our environment prevent, soil erosion, preserve water catchment areas that we seek to do because if we do nothing, we will face more drought, more famine, more mass displacement — all of which will fuel more conflict for decades. For this reason, it is not merely scientists and environmental activists who call for swift and forceful action security hangs in the balance if all this are not put into account we shall participate and fund such innitiatives. We shall promote Agreements among nations. Strong institutions and Investments in development. As the world grows smaller, you might think it would be easier for human beings to recognize how similar we are; to understand that we're all basically seeking the same things; that we all hope for the chance to live out our lives with some measure of happiness and fulfillment for ourselves and our families along with humanity in the world. Adhering to this law of love has always been the core struggle of human nature. For we are fallible. We make mistakes, and fall victim to the temptations of pride, and power, and sometimes evil. Even those of us with the best of intentions will at times fail to right the wrongs before us.

I think it would be well to consider the high duties and the responsibilities of philanthropists and humanitarians which a very high prestigious work in humanity and the Kingdom of God. We stand together with no apologies to do well to humanity, roar like a lion of the Mara with hope a new dawn for a brighter world. Charity grew out of human need for it, and it has not changed except to become more needed. Humanity has been passing through a gray and desolate time of confusion and tragedy of universal fear so long sustained that there were no longer problems of the spirit, so that only the human heart in conflict with itself seemed worth writing about relief, peace and community transformation. The work of charity, empowerment and development is delegated to declare and to celebrate man's proven capacity for greatness of heart and spirit – for gallantry in defeat – for courage, compassion and love. We shall engage in strong campaign against weakness and despair, these are the bright rally-flags of hope and of emulation. We shall promote Knowledge through education in schools and other platforms because present universal fear has been the result of a forward surge in our knowledge and manipulation of certain dangerous factors in the physical world. Therefore strong education systems and facilities is key in framing pace and prosperity of our current and future generations. Our action is to help people in situations of crisis. And ours is not a contented action. Bringing medical aid to people in distress is an attempt to defend them against what is aggressive to them as human beings. Humanitarian action is more than simple generosity, simple charity. It aims to build spaces of normalcy in the midst of what is profoundly abnormal. More than offering material assistance, we aim to enable individuals to regain their rights and dignity as human beings. Through our humanitarian volunteers departments and medical services innitiatives, we are committed to bringing direct medical aid to people in need. But we act not in a vacuum, and we speak not into the wind, but with a clear intent to assist, to provoke change, or to reveal pain. Our action and our voice are acts of indignation, a refusal to accept an active or passive assault on the other. We are not sure that words can always save lives, but we know that silence can certainly kill. Humanitarianism occurs where the political has failed or is in crisis. We shall act and do projects and programs not to assume political responsibility, but firstly to relieve the inhuman suffering of that failure. Our programs and projects will be free of political influence.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

Humanitarian action requires a framework in which to act. In conflict, We have frameworks to act within international humanitarian laws as execute our various projects and program establishing rights for victims and humanitarian organizations and ensure respect of these rights, and to sanction their violation as war crimes. Today this framework is clearly dysfunctional. Access to victims of conflict is often refused. Humanitarian assistance is even used as a tool of war, Sexual violence we shall work hand in hand and fund various authorities to registrate humanitarian structure to ensure that humanitarian work is not abused in various countries. In this dysfunction, we will speak to push the political to assume its inescapable responsibility. Humanitarianism is not a tool to end war or to create peace. It is a citizens' response to political failure. It is an immediate, short-term act that cannot erase the long-term necessity of political responsibility which we shall expect the political leaders and governments to do there needful and rightful role for our humanitarian work.Today humanitarian organization and fund as ours has a new global role, a new informal legitimacy that is rooted in its action and in its support from public opinion. It is also rooted in the maturity of its intent such as environmental and the humanitarian movements, and of course, the movement for equitable trade. Conflict and violence are not the only subjects of concern. As civil society we exist relative to the state, to its institutions and its power. Ours is not to displace the responsibility of the states. The final responsibility of the state is to include, not exclude, to balance public interests over private interests and to ensure that a just social order exists. Ours is not to allow a humanitarian alibi to mask the state responsibility to ensure welfare of humanity is taken care off. And ours is not to be co-managers of misery but instile hope for our future world. When communities and nations and continents identify a problem, we shall work through existing structures to provide a solution. Today, More than 90% of all death and suffering from infectious diseases occurs in the developing world. Some of the reasons that people die from diseases like AIDS, TB, sleeping sickness and other tropical diseases are that lifesaving essential medicines are either too expensive, are not available because they are not seen as financially viable, or because there is virtually no new research and development for priority tropical diseases. We shall partner and collaborate with governments, International Government Institutions, the Pharmaceutical Industry and other NGOs to solve these challenges in charity and advocating for change funding initiatives that promote health care.

Humanitarian action takes place in the short term, for limited groups and for limited objectives. This is at the same time both its strength and its limitation. Humanitarian action is by definition universal. Humanitarian responsibility has no frontiers. Wherever in the world there is manifest distress, the humanitarian, by vocation, we shall do our best through you to respond. We seek to openly solve the challenges of the weak and vulnerable - no victim can be intentionally discriminated against, or neglected to the advantage of another. Humanitarian action exists only to preserve life, not to eliminate it. Hundreds of thousands of our contemporaries are forced to leave their lands and their family to search for work, food, to educate their children and to stay alive. Therefore peace building will be priority through goodwill ambassadors of Helpers Of Africa International.

Our volunteers and staff will live and work among people whose dignity is violated. These volunteers will be trained to choose freely to use their liberty to make the world a more bearable place. The act of humanitarianism comes down to one thing: individual human beings reaching out to those others who find themselves in the most difficult circumstances.All this, in the hope that the cycles of violence and destruction will not continue endlessly. We shall play the role of Good Samaritan, healing the wounds of war and attempting to prevent conflict without compromising its neutrality. The extent of disaster response will include humanitarian, development, peace and human rights. Social support, health-care, water-supply and infrastructure networks that are often destroyed in armed conflict. People's needs are the basis for all humanitarian work, and those needs are undergoing a profound change. It would be impossible, today, to limit humanitarian work to health care, water and shelter and a strict interpretation of international humanitarian law. We must acknowledge that people's need for peace, development are needs that an organization such as ours cannot ignore. Humanitarians take a different, much more consensus-based approach to these needs.

But peace remains the ultimate goal of neutral and impartial humanitarian work, and that goal is also political. So through our good will ambassadors who have experienced in mediation to form a team that will be accompanying us in this kind of challenges we shall be calling for this session as we establish the departments please write in our feedback coupon your interest and abilities in this area and all other areas you would like to participate in so that we can engage you accordingly.

The changing face of war and disasters in relations with the shift in people's needs we shall review and revise continually pragmatic extension to our mandate on a case-by-case basis, with the aim of: preventing war and community crises affecting humanity, implementing political agreements with a humanitarian component, building the trust needed to begin peace processes and consensus building. We shall not engage to finish, frustrate or suffocate any humanitarian organization the world is too big with a lot of needs of humanity that cannot be met by one organization. We shall support, pray, complement and collaborate with all other organizations even individual, religious and community that shares our common virtues. We shall under no circumstances shall we participate in negotiations aiming for separate peace since separate peace is not peace but rather a political manoeuvre and an act of war. There must be a solid consensus in favor of our involvement before we can get involved in peace processes. We shall be careful not take any action in the area of prevention of conflicts that may endanger our humanitarian mission or our ability to help the victims of war, should our efforts to avoid a conflict fail. We shall play role of neutrality and embrace Fundamental Principles of neutrality, impartiality and independence, which also guide our work in conflict prevention, work with local populations, and allows us to understand people's needs.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We shall promote strong advocacy to ensure that Rape and other forms of sexual violence are unacceptable weapons in any and all warfare, we shall support people like Nobel Price winners such as Denis Mukwege, Nadia Murad and to meet the needs of the thousands of women victimized by these war crimes. Please refer such people to us support in your countries who are impacting humanity in various areas for support and collaboration. We shall set up Hospitals to provide trauma treatment and programmers to reintegrate women, children and all victims of violence, rape and war. We seek to rehabilitate those in shock, pain, fear and sense of debasement in collaboration with persons and organization dealing with such. Please write such in feedback coupons provided also so that we begin with those who have appraisals from our partners before scouting for more and those will be landing projects in your countries as we work together with you in impacting humanity in your country. Provide contacts of such person please. If anything close to a stable peace is to be achieved, respect for each other's character, integrity and dignity is an absolute requirement. We stand here today to launch the road map to deliver billions of people who are victims of war, violence, racism, oppression, repression and the impoverishment of an entire people. Because of your generosity, courage and persistence in our vision we shall be gathering annually to join together to celebrate many achievements and outstanding human victories of our century we already have thousands of victory reports on poverty eradication programs where many have been lifted from poverty and now own their businesses, orphans educated and facilitated to champions in their career, health care support that has saved lives, institutions that take care and empower Vulnerable facilitated and established. That triumph will gradually and finally bring to a close history of hundred years of African and world suffering from poverty. This reports on our projects and programs that we shall be posting and reporting will mark a great step forward in history and also serve as a common pledge of the peoples of the world to fight poverty, draughts, disease , illiteracy and all other negative norms that affect society negatively in whatever disguise and assume it. We shall also be celebrating those who have paid price in humanity who will shall be awarding Kingdom Humanitarian Award during our gathering and throughout the year organize over 70 other awards ceremonies to motivate and reward humanitarian, creativity, innovation, talents, education, health, economic revolutions, Job creation, advocacy, charity, peace, human dignity, Rescue, First aid , parenting in children homes and other sectors we shall begin with Kenya then extend to other countries so our annual summits will also be celebrating meetings. This reward will not be measured in money only but with honors and enthroning many goodwill ambassadors in various sectors who will represent our organization in many events and functions internationally. Our joy of celebrating humanity, empowerment and development Heroes will be measured by the happiness and welfare impact upon humanity who were transformed from state of vulnerable citizens in any society and the greatest of our treasures.

We shall work together to empower our children and the future generations through over 100 programs and projects including orphans as stated in our children empowerment department .The children of the world must, at last, play in the open veld, no longer tortured by the pangs of hunger or ravaged by disease or threatened with the scourge of ignorance, molestation and abuse, and no longer required to engage in deeds whose gravity exceeds the demands of their tender years. In front of all you distinguished audience, we commit Helpers Of Africa International to the relentless pursuit of the purposes defined by our vision of Charity, Empowerment and Development with strong explosion of our 1000 book Human resource and strategic management manuals to offer the best to humanity and the world for the coming generations. [1]The vision will bring happiness and welfare of the mothers and fathers of these children, who must walk the earth without fear of being robbed, killed for political or material profit, or spat upon because they are beggars. They too must be relieved of the heavy burden of despair which they carry in their hearts, born of hunger, homelessness and unemployment.This mega fund will be valued by not only the many assets we shall acquire to facilitate our projects and programs in the nations to also create a continuous revenue stream throughout generations but by the value that we shall give to relief suffering and by the happiness and welfare of all the people of nations who will have been torn down the inhuman suffering of poverty, disease walls that divide them. The value of our shared reward will be measured by the joyful peace which will triumph, because the common humanity that bonds people in the world, will have said to each one of us that we shall all live like the children of paradise.

Helpers Of Africa International Global Empowerment through Charity, Empowerment and Development

Our solidarity to empower humanity and develop the world in all sectors shall create and recognize that all people including orphans, widows , those living with disability are born equal, with each entitled in equal measure to life, liberty, prosperity and good governance. You will be surely be blessed for this sufficient reason to realize that history will not be denied and that our new partnership will do good to humanity and the world around us. We would also like to take advantage of this occasion to pay tribute to the many formations and organizations of charity, empowerment and development that you represent as individuals that have similar vision and mission please highlight in the feedback the operation scope of your organization to strategize on platforms of partnership and collaboration in various fields in various countries instead of beginning from scratch we can begin from Known to unknown for valuable networking. We shall seek to make our world free from the horrors of poverty, hunger, deprivation and ignorance, relieved of the threat and the scourge of civil wars that are attached to economic collapse and external aggression and unburdened of the great tragedy of millions forced to become refugees.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We understand our call, that we devote what remains of our lives, resources and experiences together to demonstrate, in practice, that the normal condition for human existence non-racism, non-sexism, prosperity for everybody, a healthy environment and equality and solidarity among the peoples. Moved by that appeal and inspired by the eminence you have thrust upon us, we undertake that we too will do what we can to contribute to the renewal of our world so that none should, in future, be described as people who failed there generation and failed to attend to God divine given assignment. Let it never be said by future generations that selfishness made us fail to live up to the ideals of humanism and to develop the world for future generations.We are aware of the cost that this divide imposes on the poor and dispossessed who are no less deserving of human dignity, fundamental freedoms, security, food and education than any of us. This destiny of humanity will be born ultimately by all of us. Let no walls separate us to do good to humanity and attend to crises in the world in spirit of brotherhood and sisterhood. We have entered the third millennium through a gate of hope, we see better, and we see further – we will realize that humanity is indivisible. New threats make no distinction between races, nations or regions have entered every mind, regardless of wealth or status. A deeper awareness of the bonds that bind us all – in pain as in prosperity – has gripped young and old. In the early beginnings of the 21st century – a century of many hopes that progress towards global peace and prosperity is inevitable — this new reality can no longer be ignored. The opportunity must be seized to impact humanity and that is why this network of generous partners of Helpers Of Africa International has been divinely been set up to bring new hope to the world by the grace of God. The 20th century was perhaps the deadliest in human history, devastated by innumerable conflicts, untold suffering, and unimaginable crimes. Time after time, a group or a nation inflicted extreme violence on another, often driven by irrational hatred and suspicion, or unbounded arrogance and thirst for power and resources. In response to these cataclysms, the leaders of the world came together at mid-century to unite the nations as never before. So our unity brings new hope to world as an additional initiative to add value to coming generations to affirm the dignity and worth of every person, and to secure peace and development for all peoples. We shall recognize and address the needs of the poor, conserve the resources and beauty of nature, advocate the equal rights of orphans, provide for the safety and infrastructure of future generations.

We have a strong focus to vanquish poverty, ignorance and disease. Awareness of the sanctity and dignity of every human life, regardless of race or religion. This will require us to look beyond the framework of States, and beneath the surface of nations or communities. We must focus, as never before, on improving the conditions of the individual men and women who give the state or nation its richness and character. Saving one life is to save humanity itself. Poverty begins when even one child is denied his or her fundamental right to education. What begins with the failure to uphold the dignity of one life, all too often ends with a calamity for entire nations. Economic stability and peace belongs not only to states or peoples but to each and every member of community. The sovereignty of States should not a hindrance for people to join up together for the common good of humanity as we have joined today to do good to humanity. For Peace to be sound and lasting you can't delink it from economic stability to be made real and tangible in the daily existence of every individual in need. Peace must be sought, above all, because it is the condition for every member of the human family to live a life of dignity and security.Eradicating poverty prevents conflict, only in a world that is rid of poverty can all men and women make the most of their abilities. I have witnessed this in poverty eradication and economic empowerment forums I have hosted impacting thousands of job seekers, school leavers that men and women are full of potential just need motivation, coaching and mentorship to bring out there talents- sports / arts/ music/ identify problems in community, stir up creativity & innovation, Education Exposure , Utilization of Natural Resources (mining very very rich in Africa Vegetation & Livestock, blue economy)

INCASE YOU ARE IN MINING WE HAVE MINES WITH TRILLIONS OF DOLLARS WORTH of minerals in Africa AND DATA with networks in Africa which we shall explorer as Helpers Of Africa International and help you partners to opportunity to harvest for your sowing, Information & Observation through networking, pray for Divine Ideas (Divine direction; Dreams, Prophesies), engage in Research & Brainstorming (Research, Academic, Social), alignment with National Economic Streams (Agriculture, Tourism, etc), Extension of established organization products, systems & services (Nation-to-Nation; Region-to-Region; Estate-to-Estate) INCASE YOU HAVE INDUSTRIES THAT NEED TO FIND MARKETS FOR PRODUCTS AND SERVICES IN AFRICA PLEASE NOTE IN THE FEEDBACK COUPON PLEASE we shall have separate meeting after to discuss everything you need done in africa to work for you partners to serve you for your generosity. Thro this enlightment have seen business potentials released and unveiled in a big way and thousands come out of poverty and millions impacted and regions transformed. Through our Training, innovation, industries department much will be accomplished.

Only in good environment can prosperity thrive in all good will of placing based at the centre of everything. The answer to settle humanity in prosperty, health, literacy, peace and tranquility is not one person's job but collective responsibility of smart team of you distinguished guests partnering with this vision and many other organizations that we shall corroborate with. We understand, as never before, that each of us is fully worthy of the respect and dignity essential to our common humanity. We recognize that we are the products of many cultures, traditions and memories; that mutual respect allows us to study and learn from other cultures; and that we gain strength by combining the foreign with the familiar. Our passion for empowering humanity is founded on the principle of the equal worth of every human being. It is the nearest thing we have many humanitarian institutions that can address the interests nations beyond there own borders impacting and empowering people from all sides.

Through this universal fund contributed by you generous and kind people from many nations Helpers Of Africa International will be a strong platform of human progress. Individuals united as we are - can serve the interests of the citizens of the world by recognizing common interests and pursuing them in unity as we have purposed by this expression of unity.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

It is clear with globalization no individual business or organization will be able survive but through networking where one business produces the other buys and provides market this will also be a benefit to each other value addition as we plan to benefit the world. This era of global challenges leaves no choice but cooperation at the global level and international level in business and humanitarian work lets seize this opportunity to light another candle to light the room because by sharing the light we don't lose we just become better. When your neighbor is empowered your estate is safe and you can really on them in solidarity. Our effort to refresh economies of nations will improve better will create environment that allows each individual to flourish, and each States to thrive. Our hope is that our mission will motivate the world to collectively begin to define a new roadmap to raise many good will ambassadors of humanitarian work. Taking action is a choice, it is a choice whether or not to see sickness destroy humanity, whether or not orphans will be denied education for backgrounds they are not in control off, Whether or not millions of slum dwellers will stay in houses made with paper and sewage pouring into there rooms, Whether or not people in Africa will live on top of minerals God given wealth with trillions of dollars of unexploited minerals because the lack machinery / markets / technology with wealth value that can build cities, whether or not we shall watch potential industries clash with millions of jobs because of cash flow that can be injected to sustain jobs for families and transform communities, Whether or not we shall watch environment and wildlife destroyed and water reserves drying up because of deforestation and soil erosion denying opportunity for our children to enjoy and be refreshed the way we are enjoying in this conservancy, Whether or not we shall watch destruction of human life helplessly by disease outbreaks / draughts / floods / hurricanes as we watch helplessly, Whether or not a woman in an interior village should go for two days to get water for the family carrying infants on their back only to come back and decide whether they will save the children or the only cow yet they are seated on billions of billions of litres of water underneath the surface and also affected by regular flood that can be harvested in dams, Whether or not the elderly poor will continue to die without honor cursing because of hunger and neglect after having serving the world for over 70 years. *Brethren we have made the right choice to impact, empower and develop the world. God bless you for making the right choice.* Poverty goes hand in hand with malnutrition and disease. The incidence of malnutrition and deficiency diseases is very high amongst especially Africans. Tuberculosis, pellagra, kwashiorkor, and scurvy bring death and destruction of health. The incidence of infant mortality is one of the highest in the world some of this diseases result in retarded mental conditions and lack of initiative, and reduce powers of concentration affecting families, communities, the standard of work and life. The treatment bring families to bankaptsy so setting up of hospitals and packaging free medical services will save many families from collapse because of fund raising for medical bills. There are two ways to break out of poverty. The first is by formal education, and the second is by the worker acquiring a greater skill at his work and thus higher wages. Some children from poor families don't get a meal before school so we shall introduce supplemental meals and meals in schools in addition to uniforms, books, equipments to ensure that we raise a strong generation of champions.

We shall focus on food production directly by owning farms for humanitarian and consumption in our institutions of charity children home and income in our hotels and conferences as we support gorverments towards supporting **Subsistence Farming, Commercial Agriculture, Shifting Agriculture, Extensive AgricultureIntensive Agriculture, Plantation Agriculture**, **Wet Land Farming**, **Dry Land Farming to** be **Major Source of Food, Boast National Incomes**, **Development of the Industrial Sector based on agriculture and livestock,** create **Employment Opportunities**, **Boost in Foreign Trade in Nations, Generation of Government Revenues in agriculture rich countries** and boost **Formation of Capital.** We are leaving here having embraced a new vision for humanity, a new idea, one based not only on the principle of national self-determination and shared values by all delegates to stand in solidarity in Charity, Empowerment and development to the inherent dignity of every single individual in world that we are able to reach. We shall develop nation's market-based economies, development movements, health and safety sectors, commercial regulations, access to public education expansion, social welfare systems, and enhance ability to provide opportunity to all through our structure and programs. Through your sacrificial generosity and our unwavering leadership our moral example we shall signify something larger to impact humanity. We are a team that together will embody the universal aspirations of dispossessed people all around the world with hopes for a better life, the possibility of a moral transformation in the conduct of human affairs will be achieved. With Solidarity in humanitarian our light will shine brightly and refresh nations as indicated in our logo light on top of globe and well refreshing the globe from this summit and festival of all gathered here in mara our friends, partners, financial partners all included in this network that will be a new voice of humanity and development empowering nations. With this new wave of hope many will be washed through hearts all around the world. We shall engage forces of progress to those who are discouraged marching towards a better world and life in every step we take some movement in the communities and nations will be felt. We shall experience Gods grace and generosity in all the good we do to humanity.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We have been given a chance to participate in the work of building a better world by this platform of Helpers Of Africa International in her Vision, Mission and refined leadership by the grace God lets us sieze this moment to see the world change and transformed by your resource mobilization and we as your foot soilders forge forward in the ground through an able, passionate qualified staff engage the practical job through well stipulated job descriptions of all departments not assuming anything. We shall run this vision in a progressive and attempt to make this vision victorious by the grace of God setting terms and parameters of engagement for the next generations of real meaning of progress is wholistic going with the sick, weak, old and young as Moses told praroah in the time of exodus not leaving any sector, segment, group behind development. Our intervention will open up Market-based principles to open up economies and forces of global integration powered by new technologies unleashing entrepreneurial talents to those that have no exposure to participate in the periphery of the world economy to make many count and to have there vision be valid.

We shall support and fund innovation to facilitate scientific breakthroughs and new infrastructure to lift billionaires lifted from poverty and starving nations to feed their people, and infant mortality rates reduced .We shall also promote IT to schools and communities providing and promoting internet services to make it possible for people to connect across oceans, and cultures and continents instantly so that all the world's knowledge can be in the hands of a small child in even the most remote villages. We have many other projects and programs under our IT department that will make us effectively reach out to communities including providing computers to schools, setting up internet libraries in the estates and villages along with empowering the existing schools with this useful facilities. Our projects across 77 departments are very broad and deep to transform change across human history to make entire world grow in a freer, healthier, wealthier, less violent, more tolerant and transferring this virtues to the next generations. Helpers Of Africa International in various spheres will impact international order positively in business and investment where get income to do humanitarian work to sustain it through generations. We have not just done over 70 management books to administer Helpers Of Africa International and this wonderful pronouncements but we have done real feasibility hands on in the ground to ensure we shall deliver we have thousands of designs hospitals, schools, community centers, stadiums, cities, mines already done and list of immediate properties to be procured to facilitate our projects and program not just a mere talk. We shall work towards relieving humanity from accumulated disadvantages of years of institutionalized oppression and create to boast incomes, wealth, education, health, personal safety and access to credit. In our structure we shall create room for both men and Women to rise to any opportunity that is why our CEO is lady and many others within the hierarchy who receive same pay as men serving in the same positions. We shall advocate for economic opportunity for all and participation for all in the global economy. We shall advocate for globalization and technology to open up new opportunities managing that it doesn't deprive job opportunities in the world in agriculture, mining and manufacturing sector making decisions are inline with human soliadility. . Our unity in our common humanity does not mean that we have to abandon our companies, organizations or unique ethnic and national and religious identities. It is just to gather our resources for a common good and participate in making the world a better place. Lets be joyful in our effort to empower humanity to make that truth manifest here on earth so that in 100 years from now, future generations will look back and say, "they kept the march going, that's why we live under new banners of financial freedom.

You are blessed people but by being here and looking at the magnitude of resources you have raised it is clear indicator that you have made the struggle of the world humanity your struggle. The triumph we shall achieve will be your triumph. Your dignity and your hope has found expression in humanity and developing a better world. Your financial freedom will result to great generosity and humanitarian heart will remain a cherished legacy.When our days on earth are fulfilled we shall live a giant of history as people who moved a nations towards charity, Empowerment and Development movement moved billions around the world and join apostle paul who said he has fought a good fight and finished the race what God purposed for him to do- . Some of you have made your wealth from simplicity of life and now own powerful wealthy establishments may that story be told and true for millions we shall impact through Helpers Of Africa International projects and programs. We shall erect a humanitarian order to preserve freedom for future generations. Our work together will give us a sweep of his life, the scope of accomplishments, the adoration that will be rightly earned. We shall remove doubts and his fears of many in putting a meal on the table, death because of sickness and disease, whether an orphan will finish school, whether a certain widow or widower will survive after demise of spouce, whether there is victory and light at the end of tunnel of darkness. We may not be perfect but we shall keep trying and dreaming until we see humanity transformed. We are made by flesh and blood and all are weak please help us with your experience to perfect things in our structure, projects and programs.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We shall earn our place in history through our efforts and sacrifices to support others in shrewdness, persistence and faith. We shall make lives and dreams possible not just in the pages of history books, but in the lives of many lives in our generations and generations to come. Let's exhibit power of action and taking risks on behalf of our ideals, passions and for the good of others too. May our children inherit from us this heart of generosity and kindness with concern for others so that this humanitarian projects and programs of humanity can be extended to coming generations. Like Nelson mandera said I will have a desire to fight the system that imprisoned my people," he said. So we give and work towards releasing many from poverty and lack. Other people have channeled their desires to support violence but we have chosen the better option empowering organization and establish international platforms, networks and strategies for action to support humanity with positive energy so that men and women can stand up for their God-given dignity. Moreover we must accept the consequences of our action to sustain and continue to give for what we have begun to generations. It would be unkind and not good to begin educating orphans and leave them half way, or projects that we can't finish, bore holes, hospitals, schools unfinished- because of reduced or disconnect of funding living people, families, nations and communities that once hopeful hanging in the balance. We shall resolve to keep this funding ongoing and for this reason we kindly request to indicate your monthly, quarterly or annual contribution and years in the feedback coupon to help us budget and plan accurately so that we don't make decisions to bite what we cannot swallow. We shall celebrate a freer and economically empowered society in which all persons live together in harmony and [with] equal opportunities for the weak and hurting. This is a worthy ideal to we should hope to live for and sustain sacrificially. Our movement will be kept by generosity on funding along the power of action and power of ideas; the importance of reason and kindness to give the right resolve. The Spirit of Teamwork thrives at times to work and play with not only those who you agree with, but also those who you don't agree with for the mutual benefit off our common cause. Our nations of origin may not agree on every matter on business, trade, positions on faith, political stands and other matters, but we here will agree on one good that will unite us all charity, empowerment and development for humanity. Our ideas cannot be contained by national differences or extinguished by changing season because our cause is permanent for this life and life to come. Our eloquence to advocate for humanity and passion will motivate many to join this movement of impacting humanity. We have had various experiences in various places and we are bringing it together to sharpen each other's so your ideas are very welcome. . Together with good action and ideas we shall work together with governments to establish favourable humanitarian laws in various countries on children rights, registration of charities challenged by many nations in fear of abuse but ends up killing humanitarian and development dreams and other to ensure they are chiseled into law and institutions. Our beliefs maybe tested in certain communities with adverse opinion but we shall triumph against the hard surface of circumstance and history because of our core principles we uphold and our focur in the larger goal.

We shall continue to understand the ties that bind our humanitarian and development role though in different countries and continents we shall be bound together in ways that are invisible to the eye; that there is a oneness to humanity; that we achieve ourselves by sharing ourselves with others, and caring for those around us. Our empathy and understanding will help us compact diseases such as HIV/ Aids, Malaria, Ebora, Cancers of all kinds of sickness and diseases through hospitals, extended programs and also teach many to truth on health and wealth within themselves. Our Solidarity to do charity, Empowerment and Development show that you must trust others so that they may trust us with inclusion and generosity and truth but he also changing many hearts we shall celebrate and raise many heroic lives. As we help many it will be a time of self-reflection with honesty, regardless of our situation we have shown highest level of generosity. This fund is sacrifice of countless people, known and unknown, to see the dawn of a new day. We shall work hard all around the globe, we cannot allow our progress to cloud the fact that our work is not yet done.

The struggles that follow the victory of formal equality or universal franchise may not be as filled with drama and moral clarity as those that came before, but they are no less important. For around the world today, we still see children suffering from hunger and disease. We still see run-down schools which we focus to buy and upgrade equipping with great modern facilities including furniture and computers. There are many young people without prospects for the future after school whom we seek to empower with skills and entrepreneurship knowledge through our career and vocational schools to prepare them for Job markets. We are acting well on behalf of justice of humanity a, prosperity and peace in the world. There are too many people who are waiting on us and will happily embrace vision and mission putting a strong legacy of racial reconciliation; we shall passionately resist challenge chronic poverty. With your generosity our voices will be heard. The questions we face how to eradicate poverty will be answered by our response and interventions through our various programs and projects promote equity uphold financial freedom. Our Unity shows we can change the world that we can choose a world defined not by our differences, but by our common hopes. We can choose a world defined not by conflict, but by peace and opportunities.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

Every opportunity we have we will never see it again so we shall use this as faithful stewards because of days ahead and accounts we shall give before God. Your many years of experience and the struggles you have gone through to make it will be important motivation for many we request those of you who can be available for motivational seminars to indicate in the feedback coupons so that we can inform you of scheduled summits and festival where we shall be gathering thousands to motivate and empower many. Our partnership in our projects and programs will relieve the world from mourning and shock for losing children, women and men to disease and poverty. As we keep our compassion in duty we shall of beautify the world. We shall be symbol of selfless humanity in the world and a standard bearer for the rights of the truly downtrodden transcending nationality.

We shall brighten lives of many through our programs and projects as God grants us long live to do so as a blessing in Psalms 41. 1-4 blessed is who has regard for the weak and poor, the Lord delivers him in times of trouble. The Lord will protect him and preserve his life, he will bless him in the land and not surrender him to the desire of his foes, and The Lord will sustain him on his sick bed and restore him from his bed of illness. (I pray for anyone sick or a sick relative to be healed and sustained by the power of this word- testimony of healing of skin of children home mama). We shall never feel cheated in our generosity to the weak and poor because God has over 100 promises and blessings to those who care for such but we shall be grateful that you came along to meet us to lead you to good works to humanity and develop the world. Without your giving this mandate is not easy severally we had given up we seemed to be fighting a lonely battle of big dreams with no provisions I have been mocked by relatives and friends for thinking and speaking big this of touching and transforming humanity yet looking very depleted and helpless in presence of my declarations. I had to do DVDs of my 25 years of achievements and documentary you saw in the website to keep the vision clear like Joseph and David to stay focused.

Your partnership has added life to me and this dream, just this month I saw my wife calling people to donate Christmas meals to 3 children homes we have been supporting and once I was in tears as we fed them in the last Christmas many were seeing a sausage for the first time and one home did not even have a meal on a Christmas day a representation of many desparate situation that we now end because of your generosity. Thank you for easing our burden, we are not alone in the struggle to redeem humanity. We had despaired at our loss of a big dream until God brought you to our lives and may you bring many more to this humanitarian movement of change with your solidarity that has afforded us the strength to move forward. Lets not be tempted to rush to canonize our legacy this is a long term project that we shall do together as God will give us long life like Dorcas in the bible who took care of windows and when she died the cry of widows brought her back and like King Hezekiah who was healed and added 15 years to do good, there is no need to do so. We shall stand tall enough as a human beings of unique qualities not to need to be seen as a saints because of this noble cause of empowering humanity. There is joy in serving God and humanity we shall experience this when we see a smile and a dance of a child receiving a precious meal, a uniform for school, only shoe and report of a widow or widower that the school fees has been paid for the child. But our greatest gift is that of love to humanity and your generosity it is a gift we shall use wisely and well. This is what will underpin all our other wonderful attributes and if we look to analyze what it is about us that has such a wide appeal and it will be found in our instinctive feel for those who are weak and in pain. Without your God-given sensitivity dear partners we would be immersed in greater ignorance at the anguish of AIDS and H.I.V. sufferers, the plight of the homeless, the isolation of weak, the random destruction of many lives.

The experiences that we have gone in life births innermost feelings of suffering that made it possible for her to connect with her constituency of the rejected. My partners in Charity , Empowerment and Development you are men and women of status, the glamour, the applause but you have expressed a heart of humility with strong passion to do good for others to release your innermost feelings of unworthiness to lift the lowly for this God will bless you. The world will sense this part of our character and cherished will cherish us . We shall empower many as we recognize the need for them to experience as many different aspects of life as possible to arm them spiritually and emotionally for the years ahead. Your beauty of heart both internal and external, will never be extinguished from the minds of many people.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We shall spend valuable days together with dignity, humor, and kindness so that when God call us finally to meet Him we shall go with courage and with joy in the promise of what lies ahead. It is ethical to be busy, in constant motion but never too busy to share love of life with those around us and those who need our help seeing hopeful horizons and bright days for others with optimistic focus of better world for all. We have broadened our horizons with daring decisions to lay our lives for others. We have exhibited patriotism to the world. With high positions you have shown you can relate with people from all walks of life and being empathetic to people you valuing character over high status. When you help people it is good sign that you are looking for the good in people and we shall find. *P*ublic service is noble and necessary that one can serve with integrity and hold true to the important values of humanity. I strongly believe that it is important to give back to the world and serving others enriches the giver's soul. Our projects and programs will help many not to be defined by failure and setbacks can strengthen the orphans and Vulnerable. We shall participate in mentorship to listen, to console and to facilitate the needy and the weak we are not wasting time we are investing time responding to people hurt with the great gift of unconditional love. We shall serve with integrity, with courage, and acts with love in his heart for the citizens of our country. It is good to live physical things to our children but is also noble to inject heart of mercy and care for the needy, loyal friend of the world and God who leaves his world better than he found it. Charity give as soberness that we are not driven to succeed alone but even those around us thinking about health of a sick child, a hungry person has food on the table, homeless has shelter.

I see optimism, I see hope, I see the future and I know that each and every one of you has the opportunity to help someone else. All you need to do is help one person, expecting nothing in return. To me, that is a humanitarian.You don't have to be rich to be a humanitarian. You don't have to be rich to help somebody. You don't gotta be famous. You don't even have to be college-educated. You are not just donors you are the hands and hearts of God on the ground for those who have ever needed a voice, a path forward, or a safe space, you have provided these and more. We shall help countless people and their loved ones get back on their feet, and our social safety net to be much wider, and much stronger to provide a holistic community of support for the vulnerable and less fortunate amongst us. By growing volunteerism opportunities, coordinating partnerships, and building the capabilities of individuals and our organization to our solidarity, we hope to create a society where people come together, and inspire each other to give. It is our hope that the spirit of giving and heart for others will spread throughout our world. Each of you serve in various capacities, but what we share in common is an instinctive heart to give yourselves in service of others, and an intuitive spirit of giving back to our community and world.

This is the spirit that we wish to build - the spirit of a caring and inclusive society, where people find it in to offer a hand to another in need, and where every person asks themselves the question, 'If not me, and then who?' I know it has been a tedious, but loving and heartwarming adventure to help the poor, needy and hurting. We shall treasure our warm homage and with a fabulous adventure to the nations. The fund that I will be custodian as your president signifies a light that restores the blessings of hope that could rekindle a new era of human giving. It is befitting to acknowledge that many of us have dedicated our lives to improving the quality of life for many in the world and together we shall do more. We shall raise the hopes of many, through your giving you have shown you care for mankind. Many are bleeding; everyone should pay attention as you have knowing this that every little assistance we give to needy benefits them greatly. Without our help, many in the world are helpless can't help themselves. We shall do more many by providing economic, educational, and, medical assistance by building clinics, and libraries, or by providing school and athletic resources.

It is my hope we shall grow in renewed sense of compassion and generosity and with humane collectivization from my struggles to uplift people with such humanitarian efforts; we will be able to build our world with excitement, determination, and with a sense high economic, and human power. All of us are angels and leaders in this world sent by God we must also recognize the responsibilities that follow. The responsibility to help those in need, and to do what we can, and to try to do more – to raise the quality of life of all of people in the world and to fill their lives with the promises of a better tomorrow. Developing skills in others, watching them succeed, and having a hand in a good result are all much higher on my value set.

We shall care for environment because when the environment is destroyed, plundered, or mismanaged, we undermine our quality of life and that of our future generations. Tree planting prevention of soil erosion since it is simple, attainable, and guarantees quick, successful results within a reasonable amount of time. These are all important to sustain interest and commitment.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

My strong aim in life is that every child is free to be a child, free to grow and develop free to eat, sleep, and see daylight, free to laugh free to play and learn, free to go to school, and above all, free to dream. This Global Fund will rehabilitate the weak and victims in many areas of natural and human disasters refugees of war, tribal crashes, victims of family and sexual violence, orphans, widows, widowers, people living with disability. There are millions of people across the globe who have stood shoulder to shoulder with those campaigners to show hundreds of millions more that a different future is truly possible. Those who say that future is not possible need to get out of the way of those making it a reality like you generous people gathered here. As we are here during Christmas it reminds us that Jesus declared his mission is to bring good news to the poor and prince of peace as refered to by many other religious books. So there is no other better Christmas than this of gathering and launching this fund that will raise many broken hearted, feed the hungry as Jesus did, restoring the broken hearted, setting captives of oppression free, ministering to the Sick as He did, Teaching and Training many empowering his disciples in life skills and wisdom what a wonderful way to celebrate Christmas. He being God became man in all things like us except sin, and he proclaimed very clearly that he had come to give the good news. The news was peace to all of good will and this is something that we all want--the peace of heart--and God loved the world so much that he gave his son--it was a giving--it is as much as if to say it hurt God to give, because he loved the world so much that he gave his son, and he gave him to the world for salvation. You have exhibited the character of God when he gave the very best for salvation of humanity. When Mary conceived she went in haste to convey good news and child in her John limped with Joy. I see the same joy to the world coming with the launch of this fund to bring hope to many. Merry Christmas with generosity and Kindness.

The bible I preach and many other religious books speak of love to humanity as per the parable of the Good Samaritan that is exactly what gathers us here to be good Samaritans. to give that good news, and as she came into the house of her cousin, the child--the unborn child--the child in the womb of Elizabeth, leapt with joy. He was that little unborn child, was the first messenger of peace. He recognised the Prince of Peace, he recognised that Christ has come to bring the good news for you and for me. And as if that was not enough--it was not enough to become a man--he died on the cross to show that greater love, and he died for you and for me and for that leper and for that man dying of hunger and that naked person lying in the street in the world. The word of God cautions us not to say we love God and not care for our neighbour, but I do not love my neighbor. St. John says you are a liar if you say you love God, and you don't love your neighbor. How can you love God whom you do not see, if you do not love your neighbor whom you see, whom you touch, with whom you live. And so this is very important for us to realise that love, to be true, has sacrifices. Thanks for sacrifing your time and resources to love people you have never met or you may never meet to express Gods love to man-kind. We have been created to love and be loved, and then he has become man to make it possible for us to love as he loved us. He cautioned in judgment day some will wonder when he shall say I was sick you never attended to me, was in prison you never visited me, was naked never clothed me , was hungry you never fed me as much as you did to this little ones you do unto me.

Many children in the streets will be have homes and will be not segregated will be mixed and visited by others in the community and schools not to feel neglected with others to have a home they can be loved and received. We shall show acceptance and sense of belonging to children who feels is shut out, that feels unwanted, unloved, terrified, the person that has been thrown out from society--that poverty is so hurtable and so much, and I find that very difficult. We have dealth a lot with this kind of state of people. We shall also post important humanitarian festivals in our website especially the National Good Samaritan Festivals where we shall gathering thousands of orphans and vulnerable children for charity every first and second week of December please purpose to sacrifice to be present to participate we shall inform you as you visit some of our charity home to practically show love jointly I know many do it in your nation but this experience of doing it together will be different a smile is the beginning of love for somebody. You can also come or send volunteers whom we can be hosting and working with us in various children orphans' homes and schools of disability that we may remain faithful to the gift of God, to love Him and serve Him in the poor together with you.

Our giving is good from unbandance lets keep up and give until it hurts. The word of God exhorts us to give cheerfully but many time people have given tearfully like Abraham giving his only son he had waited for 25 years and God asked him to give his only son whom he loves. That is the experience my family, church and friends around us have endured giving all for the sake of humanity but the word of God says when we give to needy we rend to God.

The bible I preach and many other religious books speak of love to humanity as per the parable of the Good Samaritan that is exactly what gathers us here to be good Samaritans. to give that good news, and as she came into the house of her cousin, the child--the unborn child--the child in the womb of Elizabeth, leapt with joy. Being honest, the journey towards the project accomplishment and subsequently towards this fund was not easy; in fact it was very long. Right from the moment when the idea was conceived to the outline of the project which was initiated later on and until today, a lot of work has been done. Transforming the idea to the real output required a good deal of efforts and various challenges came in the way. I was not alone though, I had my colleagues who walked along with me together, and we overcame every problem and challenges which have now become the milestones for us. The project was also very close to my heart because it's about innovating means and methods to save energy and water and ultimately support sustainability. I am very glad to announce that we did it! I would like to utilise this platform to express my deep gratefulness to all the partners and donors for historic fund. the members of the project who worked relentlessly on this project for one year. Needless to say, every participant of the project has contributed equally to the project.

Being the Project Manager, I am greatly honoured to say that the team had converted into a family; our project being our child. I still remember the brainstorming sessions and the candid and ferocious discussions, sometimes at odd hours which ultimately resulted into the fruitful decisions. I am sure all my colleagues and team members do remember the time spent in the office after the working hours as and when an inspiration came in. Despite all the odds, we were certain about one thing that we were going to achieve success. The most memorable part of this project was to convince the higher management to introduce changes in manufacturing processes and methods. Though it was challenging, but I am glad that the management understood the essence of the proposal and thus our project was born. The entire journey was a learning experience for me and with the success of this project; I am more energised and charged up to take up new and challenging projects which would work in the benefit of my organisation and the environment. Poverty goes hand in hand with malnutrition and disease. The incidence of malnutrition and deficiency diseases is very high amongst especially Africans. Tuberculosis, pellagra, kwashiorkor, and scurvy bring death and destruction of health. The incidence of infant mortality is one of the highest in the world some of this diseases result in retarded mental conditions and lack of initiative, and reduce powers of concentration affecting families, communities, the standard of work and life.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

The treatment bring families to bankruptcy so setting up of hospitals and packaging free medical services will save many families from collapse because of fund raising for medical bills. There are two ways to break out of poverty. The first is by formal education, and the second is by the worker acquiring a greater skill at his work and thus higher wages. Some children from poor families don't get a meal before school so we shall introduce supplemental meals and meals in schools in addition to uniforms, books, equipments to ensure that we raise a strong generation of champions. We shall focus on food production directly by owning farms for humanitarian and consumption in our institutions of charity children home and income in our hotels and conferences as we support gorverments towards supporting **Subsistence Farming, Commercial Agriculture, Shifting Agriculture, and Extensive Agriculture. Intensive Agriculture, Plantation Agriculture**, **Wet Land Farming**, **Dry Land Farming to** be **Major Source of Food, Boast National Incomes**, **and Development of the Industrial Sector based on agriculture and livestock,** create **Employment Opportunities**, **Boost in Foreign Trade in Nations, Generation of Government Revenues in agriculture rich countries** and boost **Formation of Capital.** We are leaving here having embraced a new vision for humanity, a new idea, one based not only on the principle of national self-determination and shared values by all delegates to stand in solidarity in Charity, Empowerment and development to the inherent dignity of every single individual in world that we are able to reach. We shall develop nation's market-based economies, development movements, health and safety sectors, commercial regulations, access to public education expansion, social welfare systems, and enhance ability to provide opportunity to all through our structure and programs.

Through your sacrificial generosity and our unwavering leadership our moral example we shall signify something larger to impact humanity. We are a team that together will embody the universal aspirations of dispossessed people all around the world with hopes for a better life, the possibility of a moral transformation in the conduct of human affairs will be achieved. With Solidarity in humanitarian our light will shine brightly and refresh nations as indicated in our logo light on top of globe and well refreshing the globe from this summit and festival of all gathered here in mara our friends, partners, financial partners all included in this network that will be a new voice of humanity and development empowering nations. With this new wave of hope many will be washed through hearts all around the world. We shall engage forces of progress to those who are discouraged marching towards a better world and life in every step we take some movement in the communities and nations will be felt. We shall experience Gods grace and generosity in all the good we do to humanity.
We have been given a chance to participate in the work of building a better world by this platform of Helpers Of Africa International in her Vision, Mission and refined leadership by the grace God lets us sieze this moment to see the world change and transformed by your resource mobilization and we as your foot soilders forge forward in the ground through an able, passionate qualified staff engage the practical job through well stipulated job descriptions of all departments not assuming anything. We shall run this vision in a progressive and attempt to make this vision victorious by the grace of God setting terms and parameters of engagement for the next generations of real meaning of progress is wholistic going with the sick, weak, old and young as Moses told praroah in the time of exodus not leaving any sector, segment, group behind development. Our intervention will open up Market-based principles to open up economies and forces of global integration powered by new technologies unleashing entrepreneurial talents to those that have no exposure to participate in the periphery of the world economy to make many count and to have there vision be valid. We shall support and fund innovation to facilitate scientific breakthroughs and new infrastructure to lift billionaires lifted from poverty and starving nations to feed their people, and infant mortality rates reduced

We shall also promote IT to schools and communities providing and promoting internet services to make it possible for people to connect across oceans, and cultures and continents instantly so that all the world's knowledge can be in the hands of a small child in even the most remote villages. We have many other projects and programs under our IT department that will make us effectively reach out to communities including providing computers to schools, setting up internet libraries in the estates and villages along with empowering the existing schools with this useful facilities. **Our projects across 77 departments are very broad and deep to transform change across human history to make entire world grow in a freer, healthier, wealthier, less violent, more tolerant and transferring this virtues to the next generations. Helpers Of Africa International in various spheres will impact international order positively in business and investment where get income to do humanitarian work to sustain it through generations. We have not just done over 70 management books to administer Helpers Of Africa International and this wonderful pronouncements but we have done real feasibility hands on in the ground to ensure we shall deliver we have thousands of designs hospitals, schools, community centers, stadiums, cities, mines already done and list of immediate properties to be procured to facilitate our projects and program not just a mere talk. We shall work towards relieving humanity from accumulated disadvantages of years of institutionalized oppression and create to boast incomes, wealth, education, health, personal safety and access to credit. In our structure we shall create room for both men and Women to rise to any opportunity that is why our CEO is lady and many others within the hierarchy who receive same pay as men serving in the same positions. We shall advocate for economic opportunity for all and participation for all in the global economy.**

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We shall advocate for globalization and technology to open up new opportunities managing that it doesn't deprive job opportunities in the world in agriculture, mining and manufacturing sector making decisions are inline with human soliadility. . Our unity in our common humanity does not mean that we have to abandon our companies, organizations or unique ethnic and national and religious identities. It is just to gather our resources for a common good and participate in making the world a better place. Lets be joyful in our effort to empower humanity to make that truth manifest here on earth so that in 100 years from now, future generations will look back and say, "they kept the march going, that's why we live under new banners of financial freedom. You are blessed people but by being here and looking at the magnitude of resources you have raised it is clear indicator that you have made the struggle of the world humanity your struggle. The triumph we shall achieve will be your triumph. Your dignity and your hope has found expression in humanity and developing a better world. Your financial freedom will result to great generosity and humanitarian heart will remain a cherished legacy.

When our days on earth are fulfilled we shall live a giant of history as people who moved a nations towards charity, Empowerment and Development movement moved billions around the world and join Apostle Paul who said he has fought a good fight and finished the race what God purposed for him to do- . Some of you have made your wealth from simplicity of life and now own powerful wealthy establishments may that story be told and true for millions we shall impact through Helpers Of Africa International projects and programs. We shall erect a humanitarian order to preserve freedom for future generations. Our work together will give us a sweep of his life, the scope of accomplishments, and the adoration that will be rightly earned.

We shall remove doubts and his fears of many in putting a meal on the table, death because of sickness and disease, whether an orphan will finish school, whether a certain widow or widower will survive after demise of spouce, whether there is victory and light at the end of tunnel of darkness. We may not be perfect but we shall keep trying and dreaming until we see humanity transformed. We are made by flesh and blood and all are weak please help us with your experience to perfect things in our structure, projects and programs. We shall earn our place in history through our efforts and sacrifices to support others in shrewdness, persistence and faith. We shall make lives and dreams possible not just in the pages of history books, but in the lives of many lives in our generations and generations to come. Let's exhibit power of action and taking risks on behalf of our ideals, passions and for the good of others too. May our children inherit from us this heart of generosity and kindness with concern for others so that this humanitarian projects and programs of humanity can be extended to coming generations. Like Nelson mandera said I will have a desire to fight the system that imprisoned my people," he said. So we give and work towards releasing many from poverty and lack. Other people have channeled their desires to support violence but we have chosen the better option empowering organization and establish international platforms, networks and strategies for action to support humanity with positive energy so that men and women can stand up for their God-given dignity. Moreover we must accept the consequences of our action to sustain and continue to give for what we have begun to generations.

It would be unkind and not good to begin educating orphans and leave them half way, or projects that we can't finish, bore holes, hospitals, schools unfinished- because of reduced or disconnect of funding living people, families, nations and communities that once hopeful hanging in the balance. We shall resolve to keep this funding ongoing and for this reason we kindly request to indicate your monthly, quarterly or annual contribution and years in the feedback coupon to help us budget and plan accurately so that we don't make decisions to bite what we cannot swallow. We shall celebrate a freer and economically empowered society in which all persons live together in harmony and [with] equal opportunities for the weak and hurting. This is a worthy ideal to we should hope to live for and sustain sacrificially. Our movement will be kept by generosity on funding along the power of action and power of ideas; the importance of reason and kindness to give the right resolve. The Spirit of Teamwork thrives at times to work and play with not only those who you agree with, but also those who you don't agree with for the mutual benefit off our common cause. Our nations of origin may not agree on every matter on business, trade, positions on faith, political stands and other matters, but we here will agree on one good that will unite us all charity, empowerment and development for humanity. Our ideas cannot be contained by national differences or extinguished by changing season because our cause is permanent for this life and life to come. Our eloquence to advocate for humanity and passion will motivate many to join this movement of impacting humanity.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

We have had various experiences in various places and we are bringing it together to sharpen each other's so your ideas are very welcome. . Together with good action and ideas we shall work together with governments to establish favourable humanitarian laws in various countries on children rights, registration of charities challenged by many nations in fear of abuse but ends up killing humanitarian and development dreams and other to ensure they are chiseled into law and institutions. Our beliefs maybe tested in certain communities with adverse opinion but we shall triumph against the hard surface of circumstance and history because of our core principles we uphold and our focur in the larger goal. We shall continue to understand the ties that bind our humanitarian and development role though in different countries and continents we shall be bound together in ways that are invisible to the eye; that there is oneness to humanity; that we achieve ourselves by sharing ourselves with others, and caring for those around us. Our empathy and understanding will help us compact diseases such as HIV/ Aids, Malaria, Ebora, Cancers of all kinds of sickness and diseases through hospitals, extended programs and also teach many to truth on health and wealth within themselves.

Our Solidarity to do charity, Empowerment and Development show that you must trust others so that they may trust us with inclusion and generosity and truth but he also changing many hearts we shall celebrate and raise many heroic lives. As we help many it will be a time of self-reflection with honesty, regardless of our situation we have shown highest level of generosity. This fund is sacrifice of countless people, known and unknown, to see the dawn of a new day. We shall work hard all around the globe, we cannot allow our progress to cloud the fact that our work is not yet done. The struggles that follow the victory of formal equality or universal franchise may not be as filled with drama and moral clarity as those that came before, but they are no less important. For around the world today, we still see children suffering from hunger and disease. We still see run-down schools which we focus to buy and upgrade equipping with great modern facilities including furniture and computers. There are many young people without prospects for the future after school whom we seek to empower with skills and entrepreneurship knowledge through our career and vocational schools to prepare them for Job markets. We are acting well on behalf of justice of humanity a, prosperity and peace in the world. There are too many people who are waiting on us and will happily embrace vision and mission putting a strong legacy of racial reconciliation; we shall passionately resist challenge chronic poverty. With your generosity our voices will be heard. The questions we face how to eradicate poverty will be answered by our response and interventions through our various programs and projects promote equity uphold financial freedom. Our Unity shows we can change the world that we can choose a world defined not by our differences, but by our common hopes. We can choose a world defined not by conflict, but by peace and opportunities.

Every opportunity we have we will never see it again so we shall use this as faithful stewards because of days ahead and accounts we shall give before God. Your many years of experience and the struggles you have gone through to make it will be important motivation for many we request those of you who can be available for motivational seminars to indicate in the feedback coupons so that we can inform you of scheduled summits and festival where we shall be gathering thousands to motivate and empower many. Our partnership in our projects and programs will relieve the world from mourning and shock for losing children, women and men to disease and poverty. As we keep our compassion in duty we shall of beautify the world. We shall be symbol of selfless humanity in the world and a standard bearer for the rights of the truly downtrodden transcending nationality. We shall brighten lives of many through our programs and projects as God grants us long live to do so as a blessing in Psalms 41. 1-4 blessed is who has regard for the weak and poor, the Lord delivers him in times of trouble. The Lord will protect him and preserve his life, he will bless him in the land and not surrender him to the desire of his foes, and The Lord will sustain him on his sick bed and restore him from his bed of illness.

I pray for anyone sick or a sick relative to be healed and sustained by the power of this word- testimony of healing of skin of children home mama). We shall never feel cheated in our generosity to the weak and poor because God has over 100 promises and blessings to those who care for such but we shall be grateful that you came along to meet us to lead you to good works to humanity and develop the world. Without your giving this mandate is not easy severally we had given up we seemed to be fighting a lonely battle of big dreams with no provisions I have been mocked by relatives and friends for thinking and speaking big this of touching and transforming humanity yet looking very depleted and helpless in presence of my declarations. I had to do DVDs of my 25 years of achievements and documentary you saw in the website to keep the vision clear like Joseph and David to stay focused. Your partnership has added life to me and this dream, just this month I saw my wife calling people to donate Christmas meals to 3 children homes we have been supporting and once I was in tears as we fed them in the last Christmas many were seeing a sausage for the first time and one home did not even have a meal on a Christmas day a representation of many desparate situation that we now end because of your generosity. Thank you for easing our burden, we are not alone in the struggle to redeem humanity. We had despaired at our loss of a big dream until God brought you to our lives and may you bring many more to this humanitarian movement of change with your solidarity that has afforded us the strength to move forward.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

Lets not be tempted to rush to canonize our legacy this is a long term project that we shall do together as God will give us long life like Dorcas in the bible who took care of windows and when she died the cry of widows brought her back and like King Hezekiah who was healed and added 15 years to do good, there is no need to do so. We shall stand tall enough as a human beings of unique qualities not to need to be seen as a saints because of this noble cause of empowering humanity. There is joy in serving God and humanity we shall experience this when we see a smile and a dance of a child receiving a precious meal, a uniform for school, only shoe and report of a widow or widower that the school fees has been paid for the child. But our greatest gift is that of love to humanity and your generosity it is a gift we shall use wisely and well. This is what will underpin all our other wonderful attributes and if we look to analyze what it is about us that has such a wide appeal and it will be found in our instinctive feel for those who are weak and in pain. Without your God-given sensitivity dear partners we would be immersed in greater ignorance at the anguish of AIDS and H.I.V. sufferers, the plight of the homeless, the isolation of weak, the random destruction of many lives.

The experiences that we have gone in life births innermost feelings of suffering that made it possible for her to connect with her constituency of the rejected. My partners in Charity , Empowerment and Development you are men and women of status, the glamour, the applause but you have expressed a heart of humility with strong passion to do good for others to release your innermost feelings of unworthiness to lift the lowly for this God will bless you. The world will sense this part of our character and cherished will cherish us. We shall empower many as we recognize the need for them to experience as many different aspects of life as possible to arm them spiritually and emotionally for the years ahead. Your beauty of heart both internal and external, will never be extinguished from the minds of many people.

We shall spend valuable days together with dignity, humor, and kindness so that when God call us finally to meet Him we shall go with courage and with joy in the promise of what lies ahead. It is ethical to be busy, in constant motion but never too busy to share love of life with those around us and those who need our help seeing hopeful horizons and bright days for others with optimistic focus of better world for all. We have broadened our horizons with daring decisions to lay our lives for others. We have exhibited patriotism to the world. With high positions you have shown you can relate with people from all walks of life and being empathetic to people you valuing character over high status. When you help people it is good sign that you are looking for the good in people and we shall find. *P*ublic service is noble and necessary that one can serve with integrity and hold true to the important values of humanity. I strongly believe that it is important to give back to the world and serving others enriches the giver's soul. Our projects and programs will help many not to be defined by failure and setbacks can strengthen the orphans and Vulnerable. We shall participate in mentorship to listen, to console and to facilitate the needy and the weak we are not wasting time we are investing time responding to people hurt with the great gift of unconditional love.We shall serve with integrity, with courage, and acts with love in his heart for the citizens of our country. It is good to live physical things to our children but is also noble to inject heart of mercy and care for the needy, loyal friend of the world and God who leaves his world better than he found it. Charity give as soberness that we are not driven to succeed alone but even those around us thinking about health of a sick child, a hungry person has food on the table, homeless has shelter. I see optimism, I see hope, I see the future and I know that each and every one of you has the opportunity to help someone else. All you need to do is help one person, expecting nothing in return. To me, that is a humanitarian.You don't have to be rich to be a humanitarian. You don't have to be rich to help somebody. You don't gotta be famous. You don't even have to be college-educated.

You are not just donors you are the hands and hearts of God on the ground for those who have ever needed a voice, a path forward, or a safe space, you have provided these and more. We shall help countless people and their loved ones get back on their feet, and our social safety net to be much wider, and much stronger to provide a holistic community of support for the vulnerable and less fortunate amongst us. By growing volunteerism opportunities, coordinating partnerships, and building the capabilities of individuals and our organization to our solidarity, we hope to create a society where people come together, and inspire each other to give. It is our hope that the spirit of giving and heart for others will spread throughout our world. Each of you serve in various capacities, but what we share in common is an instinctive heart to give yourselves in service of others, and an intuitive spirit of giving back to our community and world. This is the spirit that we wish to build - the spirit of a caring and inclusive society, where people find it in to offer a hand to another in need, and where every person asks themselves the question, 'If not me, then who?'

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

I know it has been a tedious, but loving and heartwarming adventure to help the poor, needy and hurting. We shall treasure our warm homage and with a fabulous adventure to the nations. The fund that I will be custodian as your president signifies a light that restores the blessings of hope that could rekindle a new era of human giving. it is befitting to acknowledge that many of us have dedicated our lives to improving the quality of life for many in the world and together we shall do more. We shall raise the hopes of many, through your giving you have shown you care for mankind. Many are bleeding; everyone should pay attention as you have knowing this that every little assistance we give to needy benefits them greatly. Without our help, many in the world are helpless can't help themselves. We shall do more many by providing economic, educational, and, medical assistance by building clinics, and libraries, or by providing school and athletic resources. It is my hope we shall grow in renewed sense of compassion and generosity and with humane collectivization from my struggles to uplift people with such humanitarian efforts; we will be able to build our world with excitement, determination, and with a sense high economic, and human power. All of us are angels and leaders in this world sent by God we must also recognize the responsibilities that follow. The responsibility to help those in need, and to do what we can, and to try to do more – to raise the quality of life of all of people in the world and to fill their lives with the promises of a better tomorrow. Developing skills in others, watching them succeed, and having a hand in a good result are all much higher on my value set. We shall care for environment because when the environment is destroyed, plundered, or mismanaged, we undermine our quality of life and that of our future generations. Tree planting prevention of soil erosion since it is simple, attainable, and guarantees quick, successful results within a reasonable amount of time. These are all important to sustain interest and commitment.

This Global Fund will rehabilitate the weak and victims in many areas of natural and human disasters refugees of war, tribal crashes, victims of family and sexual violence, orphans, widows, widowers, people living with disability. There are millions of people across the globe who have stood shoulder to shoulder with those campaigners to show hundreds of millions more that a different future is truly possible. Those who say that future is not possible need to get out of the way of those making it a reality like you generous people gathered here. As we are here during launch it reminds us that Jesus declared his mission is to bring good news to the poor and prince of peace as refered to by many other religious books.

So there is no other better timing than this of gathering and launching this fund that will raise many broken hearted, feed the hungry as Jesus did, restoring the broken hearted, setting captives of oppression free, ministering to the Sick as He did, Teaching and Training many empowering his disciples in life skills and wisdom what a wonderful way to celebrate Christmas. He being God became man in all things like us except sin, and he proclaimed very clearly that he had come to give the good news. The news was peace to all of good will and this is something that we all want--the peace of heart--and God loved the world so much that he gave his son--it was a giving--it is as much as if to say it hurt God to give, because he loved the world so much that he gave his son, and he gave him to the world for salvation. You have exhibited the character of God when he gave the very best for salvation of humanity. When Mary conceived she went in haste to convey good news and child in her John limped with Joy. I see the same joy to the world coming with the launch of this fund to bring hope to many. Merry Christmas with generosity and Kindness.

This fund speaks to our highest aspirations beyond the fugure of Trillions of Dollars to me l see the Development and Humanitarian impact in a cruelt and world full of hardship of our world where many have been locked in prison of poverty, diseases, hunger, thirst, poor education, no or poor shelter, poor infrastructure and public amenities that Helpers Of Africa International seeks to deal with. Our actions and generosity matters, and will bend history in the direction of empowerment of many in generations to come. .Your generosity and the labors to be here will impact many at the world stage. Compared to some of organizations who are giants of history who've received this international funding we have begun well though we are not in completion with any but we shall work together in collaboration and partnerships in various fields especially in the area of disaster response and management in disbursement of aid, relief in war torn nations, drought striken regions and extending financial services to many across networks of banks and micro-finance. There are the men and women around the world who have given a lot of time and resources for humanity and many of you have been doing it individually but now we shall have a bigger impact together. We shall work and support humanitarian organizations to relieve suffering; the unrecognized millions whose quiet acts of courage and compassion inspire even the most hardened cynics. I cannot argue with those who find these men and women — some known, some obscure to all but those they help — to be far more deserving but we shall team up.

Most profound issue surrounding this fund of Helpers Of Africa International that will continue to grow with more donations and partners who will join this movement of generosity to empower humanity and develop the world creating a better world tomorrow as we relief many from pain of poverty and lack ensuring that sickness will no longer be a death sentence because of improving health care. Drought, disasters and disease have claimed many lives and this should come to end through us and collaboration of other international arms bringing peace among tribes and civilization to upgrade the lives of many. A decade into a new century, your generosity to help the world is chaing the old architecture of those who have having more and those who are poor continues to perish thank you for changing the world view by joining together to change humanity. The world may no longer shudder at the prospect of poverty, disease, droughts, illiteracy and war if we engage on our vision and mission effectively in partnership with organizations and governments. . Many efforts are being done on peace mediations in nations and communities however wars between nations have increasingly given way to wars within nations.

OUR STRATEGIC PLAN TOWARD GLOBAL REFRESHMENT OF NATIONS AND THE GLOBE THROUGH CHARITY, EMPOWERNMENT AND DEVELOPMENT, OUR ACCEPTANCE TO THIS DIVINE GLOBAL CALLING

The term cousin means the son or daughter of an uncle or aunt. Uncle and aunt mean the brother or sister of one’s mother or father whether the relationship is by blood or adoption. The spouse of an uncle or aunt is not a close relative by reason of the marriage.

We shall all operate under One Vision Statement - EMPOWERING THE WORLD, REFRESHING NATIONS THROUGH CHARITY, EMPOWERMENT AND DEVELOPMENT

HELPERS OF AFRICA INTERNATIONAL AND AGENCIES DEPARTMENTAL AND PROJECT GLOBAL ROLL OUT STRATERGY

Helpers Of Africa International and Agencies will launch the 72 departments and 30 Agencies through 10 steps strategic plan as follows after appointment of Directors, Departmental Heads, Project Managers and Agencies Director Generals and assistances

Set goals effectively clearly and objectively. An accepted framework to use to help write effective goals is SMART:

S – Specific, M – Measurable, A – Achievable/Attainable, R – Results-Oriented/Realistic/Relevant, T – Time-Bound

Begin with performance planning- Using established goals as a basis, performance planning sets the stage for the year by communicating objectives, and setting an actionable plan to guide the employee to successfully achieve goals. Using the performance plan as a reference document, the employee and manager then should regularly monitor progress against goals, problem-solve road blocks, re-assess goals, change goals as business direction changes, and re-evaluate training and resource needs.

Create an ongoing process Performance management – including goal setting, performance planning, performance monitoring, feedback and coaching – should be an ongoing and continuous process, support for building constructive feedback into the fabric of day-to-day interactions, then the environment will encourage development and drive goal-directed performance improvement.

Improve productivity through better goal management- Regular goal tracking allows for the opportunity to provide feedback as needed, make adjustments to performance plans, tackle obstacles and prepare contingencies for missed deadlines. Without a mechanism to regularly track progress against goals, the ongoing, cyclical nature of the process falls apart and productivity dips.
Gather information from multiple sources- Gathering performance information from a variety of sources increases objectivity and ensures all factors impacting performance are considered.
Document, document, document- Note-taking must be consistent and include all significant occurrences, positive or negativeDocumentation is important to support performance decisions, and notes should be written with the intent to share. In addition to documenting the details of an occurrence, any subsequent follow up should be detailed.

Prepare and train your managersManaging the performance of another individual is not an easy task and requires many skills. Training may be required to ensure managers feel adequately prepared to effectively complete all the tasks related to performance management. This is especially the case for newly promoted supervisors. Managers need to understand human behavior, how to motivate, how to develop, provide coaching and deal with conflict. To a great extent, managers must be observers and able to assess a situation, provide motivation and identify problems that interfere with performance. In addition, managers must understand that individuals at different levels of comfort, ability and experience with their jobs will require different levels of input, support and supervision. A manager who feels adequately prepared to provide and receive feedback, deliver a performance evaluation and conduct a performance evaluation meeting will be a major contributor to a successfully functioning process. Perfect the performance review- The employee performance appraisal or review should be a summary of all that has been discussed. Based upon job expectations and key areas of contribution, and previously discussed goals and evaluation methods, the appraisal should be a written confirmation of what has already been discussed with the employee job responsibilities, current project work, relevant competencies, goals and achievements. Link performance with rewards and recognition- linking performance to compensation. This link, however, cannot effectively be established without the existence of sound performance management processes that are seen as fair and equitable formal recognition events, informal public recognition or privately delivered feedback.Encourage full participation and successThe performance management process must add value, otherwise problems with resistance and non-participation will surface. In addition, the process itself must be as efficient and simple as possible. Automated reminders and scheduling tools can help keep the process on track.Instant form routing and paperless processes, Goal tracking and cascading functionality for complete visibility and alignment, Automated goal management and performance review reminders, Legal scan wizards to ensure appropriate/legal use of language, Writing assistants to help managers prepare appraisal forms, Support tools providing coaching support to managers when they need it most, Dashboards to deliver company-wide, aggregated or individual reportin. - People — hiring high quality employees through intense interview and recruitment, empowering them to do great work and coaching/mentoring them to become future leaders is necessary for building a great company.
- Culture — Setting a bottom-up culture that empowers people to high levels of excellence, building a strong transparent organization that has accountability, ownership and trust as its core values and that focuses on company first are all very important dimensions that require careful consideration in building a world-class team.
- Process — Relentless focus on understanding, measuring and driving impact by showing a common purpose as well as setting a high bar and driving excellence is important for building a world class organization.
- Leadership involvement – ensuring senior management is committed and actively involved in establishing and communicating direction.
- Alignment – understanding the organization is a system of interrelated and interconnected work processes and all activities need to be aligned with the established direction.
- Focus on customer and donors – ensuring the primary aim of everyone in the organization is to understand and meet the needs of the customers, donors, investors and partners.
- People involvement – nurturing and reinforcing cooperation and teamwork and giving employees the opportunity to develop their full potential.
- Prevention based process management – establishing consistency in work processes and developing a mindset of prevention.
- Partnership development – developing and maintaining value-adding relationships with donors, partners and stakeholders.

Helpers Of Africa International and Her Agencies will seek

- Continuous improvement – harnessing the collective knowledge, skills, and creativity of stakeholders to relentlessly pursue improvement.
- Data based decision making – basing decisions on performance measurement findings.
- Societal commitment – striving to understand and demonstrate corporate commitment to society.
- Practices A synopsis of the best management practices that fall into nine key management.
- Governance - identifying governance responsibility to stakeholders, implementing an effective governance system and acting as a model of good practice to internal and external stakeholders.
- Leadership - creating a culture committed to excellence, developing a strategic plan and communicating it to stakeholders, sharing responsibility and accountability throughout the organization, communicating openly about organizational performance, and removing barriers to organizational effectiveness.
- Planning - creating a business plan that aligns with strategic direction, communicating the plan to stakeholders, allocating resources to ensure effective implementation, monitoring and reviewing the plan regularly and making changes as required.
- Customer - understanding the customer, aligning employees on the importance of the customer, making it easy for the customer to do business and provide feedback, and reaffirming the organization's presence and approach in the marketplace.
- Employees – undertaking human resource planning that supports organizational plans, recruiting, selecting, training, and developing employees, encouraging employees to share suggestions and ideas aimed at improvement, rewarding and recognizing strong performance of individuals and teams, and ensuring a healthy workplace environment.
- Resource Management – defining resource requirements, developing a strategy to manage resources wisely, managing the adverse impact of operations on the environment and society, and preparing for resource interruptions.
- Continuous Improvement and Performance Measurement – the plan-do-study-act cycle used to improve performance and the measures used to monitor performance. Measures include those for each management area and for the organization overall.
- Work and project Processes – designing, documenting, and managing work processes, analyzing and improving work processes, taking corrective action when problems occur, preventing recurrence of problems by making changes to work processes, and using benchmarking to evaluate performance.
- Supplier and Partner - using criteria to select suppliers and partners, developing win-win relationships, sharing information about strategic and business plans, and working together to develop products, services and standards.

ORGANIZATIONAL EXCELLENCE FRAMEWORK CONSIDERATIONS SUMMARY

Helpers Of Africa International and Agencies Benefits of attaining Organization excellence

1. Provide the foundation on which to develop an organization. Our model provides a collection of best management practices for each key management area (e.g. governance, leadership, planning, customers, employees, work processes, suppliers and partners, resource management, performance measurement). These practices will be implemented at all stages of our organization's life cycle. We shall implement the best management practices right the first time launches of Bank, Agencies and projects as we build on our strengths and capitalize on opportunities for improvement.

2. Provide an integrated and coordinated way to drive tangible results in the bank, Agencies and our projects. Our Strategic plan and structure model provides a well-defined path for the excellence journey. For each key management area, there are practices to implement and measures that will be used to gauge progress with Measurement results highlighting where the organization is doing well and where it needs to improve and allow for databased decision making.

3. Identify the interdependencies and interrelationships between all management areas across all 72 departments in Head Office and 30 agencies. Each best management practice is related to other practices our strategic plan and implementing all the practices contributes to creating a culture of excellence that is characterized by the principles of Organizational Excellence Framework that integrates the leading models, customer practice aimed at 'determining project and customer needs and expectations' related to the leadership practice of 'developing a strategic plan with goals and objectives that will guide the organization towards its vision', the planning practice of 'using factual information to provide input to the business planning process'. The employee practice of 'encouraging employees to share their ideas and suggestions the work processes practice of 'involving donors, customers, suppliers and partners in designing and analyzing processes, and the performance measurement practice 'measuring the level of service quality' This collaborations will involve monthly and annual evaluation through real time technology feedback and communication.

4. Reduce non-value add activities in Helpers Of Africa International and Agencies. Any project that does not add humanitarian and economic value will be evaluated regularly through structure and performance review to identify and repackage on errors, rework, duplication, sources of customer and employee dissatisfaction, and activities that do not contribute to the organization's vision and mission. The use of our Organization Excellence models will reduce non-value activity by ensuring that all work activity in the organization is aligned with the vision and mission and by investing in prevention and appraisal activities that reduce failures.

5. Our Organization Excellence will contribute to Helpers Of Africa International and Agencies to become employers and organizations of choice to donors, nations and project beneficiaries. We shall seek to focus on donors satisfaction and employee health /wellness to contribute towards greater improvements in organizational performance. We shall undertake human resource planning that supports organizational plans, train and develop employees so they can be valued contributors, encourage donors and employees to share ideas and suggestions aimed at improvement, and reward and recognize strong performance of individuals and teams. Helpers Of Africa International will also invest in a healthy and wellness to achieve business objectives such as reducing health care costs, improving productivity, improving workforce morale, and reducing employee absenteeism.

6. Provide a performance benchmarking programs. Helpers Of Africa International and her Agencies will enact Performance measures common to track performance internally and compare performance externally with other organizations and projects across all our 72 departments and 30 agencies globally such as United Nations & World Bank agencies, International Development agencies, Regional and Top private / national banks to learn from experiences through joint staff collaboration programs visits, joint venture in our endeavors. Helpers Of Africa International her Agencies has unique identity, opportunities and funding benchmarking or learning from the experience of others is a powerful method for breakthrough thinking, innovation, improvement, and for delivering exceptional bottom-line results.

7. Helpers Of Africa International & agencies will provide a platform for long term organizational success. We seek to build a strong culture of excellence that will be developed year by year through our leadership and structure committed to excellence to reinforce OE as a strategic imperative and use appreciative inquiry to build on strengths and engage employees, donors and partners in a discussion about what is going well and what can be done better.

8. Helpers Of Africa International & agencies complement other excellence programs. We are not coming in as competitors to global agencies and organizations rather to complements as we acknowledge for runners who have kept the world going in all the sectors that the bank and agencies are coming to add value. We salute and recognize all other organizations and we extend the right hand of fellowship and friendship through partnership and collaboration we shall do a lot more to make the world a better place in generations to come. The umbrella and platforms under which other programs, initiatives, tools ,techniques and good will operate will be brought together to form a comprehensive system in which we shall spring and operate on standards, statistics, global networks, research and other experiences related to customer service, health and safety, and environment, and tools and techniques

9. Increase the value of a vision and business. Helpers Of Africa International & Agencies recognize that having an Organization Exellence model in place increases the value of business, projects and humanitarian work. Acknowledging that all this run well with structures even when the owners are absent with best practices providing a good checklist for assessing the business and the balanced system of measurement along with thorough feedback on performance.

10. Provide a healthy return-on-investment. All projects and programs of Helpers Of Africa International & agencies run on quality management system (i.e. excellence model) to give good returns of investment to donors and investors along with efficiently investing the global welfare of all by the grace of God who will reward us for adding value to creation and world. Therefore our return on investment is both earthly by seeing value and eternal blessings in the life to come for donors, employees and partners that is our greatest return, reward and blessing. We all need something to aim towards in life, and nowhere is this more relevant than worthy vision of Helpers Of Africa International. We shall set high standards that constitutes a great day in the world, to reach goals quicker and be far more inspired to do so. We seek that the benefits of measurement work ethic with high standards of excellence.

11. Finance stewardship and accountability - Higher sales, Capacity utilization, Cost control or reduction , Stronger cash flow, Greater asset productivity, Higher capital efficiency, Shorter payment cycles, Reduced receivables, Efficiencies in supply chain.
12. Operations -Decreased accident rates or time lost to injuries, Improvement in defect or error rates, Fewer regulatory or compliance issues, Higher customer satisfaction , Less waste in value stream, Smaller environmental footprint, Reduced downtime, Greater customer retention , Higher output or productivity, Increased training and number of employees with key skills, Greater employee engagement, Enhanced accountability by individual team members, Improvement in cross-department cooperation, Higher employee satisfaction scores, Closing the addressable gap between the current state and optimal performance, Realizing the financial value of that gap, Reaching a level of operational excellence maturity relative to industry standards .Operational Excellence Metrics- Efficiency, Effectiveness, Capacity, Productivity, Quality, Profitability, Competitiveness, Value
13. Set goals effectively clearly and objectively. An accepted framework to use to help write effective goals is SMART:
S – Specific, M – Measurable, A – Achievable/Attainable, R – Results-Oriented/Realistic/Relevant, T – Time-Bound

14. Begin with performance planning- Using established goals as a basis, performance planning sets the stage for the year by communicating objectives, and setting an actionable plan to guide the employee to successfully achieve goals. Using the performance plan as a reference document, the employee and manager then should regularly monitor progress against goals, problem-solve road blocks, re-assess goals, change goals as business direction changes, and re-evaluate training and resource needs.

15. Create an ongoing process Performance management – including goal setting, performance planning, performance monitoring, feedback and coaching – should be an ongoing and continuous process, support for building constructive feedback into the fabric of day-to-day interactions, then the environment will encourage development and drive goal-directed performance improvement.
16. Improve productivity through better goal management- Regular goal tracking allows for the opportunity to provide feedback as needed, make adjustments to performance plans, tackle obstacles and prepare contingencies for missed deadlines. Without a mechanism to regularly track progress against goals, the ongoing, cyclical nature of the process falls apart and productivity dips.
17. Gather information from multiple sources- Gathering performance information from a variety of sources increases objectivity and ensures all factors impacting performance are considered.
18. Document, document, document- Note-taking must be consistent and include all significant occurrences, positive or negativeDocumentation is important to support performance decisions, and notes should be written with the intent to share. In addition to documenting the details of an occurrence, any subsequent follow up should be detailed.
19. Provide an informal, confidential, trustworthy and readily accessible source of early assistance for staff with questions or concerns regarding a respectful workplace or Helpers Of Africa International (KBG) want information about where to seek assistance. Issues might include interpersonal conflicts, unfair treatment, harassment, disrespectful and (KBG)ethical behaviors, employment or performance, misconduct and other workplace stresses;
20. Brief management on general respectful workplace trends while maintaining confidentiality.

OUR CREDO, FOCUS, AGENDAS, ETHICS, PHILOSOPHIES, MANDATE, CULTURE AND PRINCIPLES OF OPERATION

"Connect the world's professionals..."transparency and sincerity, "We are inclusive and collaborative...". "Create a better everyday life..."Paying attention to detail, having emotional commitment to humanity, Supporting creativity and innovation, giving value to donors and investors. Making ourselves admirable, Passion, Ownership, Intentional, Nurturing and Trust.

Helpers Of Africa International

Enhacing Professional and Fruitful Staff Work Ethics

Helpers Of Africa International **code of ethics**, also known as a **code of conduct** or **statement of values,** is a policy statement of our Bank Company's values, responsibilities, and conduct expectations. The purpose of a code of ethics is to guide employees in handling ethical dilemmas. It is essentially a moral compass. This credo expresses the company's values and gives employees the guidance they need to make ethical decisions.

- Responsibility: we ensure the efficient and responsible delivery of humanitarian aid with the means and the resources that have been entrusted to us.
- Impact: we are committed to having the most sustainable impact for the communities and the people with Helpers Of Africa International we engage.
- Enterprising-spirit: we are enterprising and engage in our work with a spirit that creates value and overcomes challenges.
- Inspiration: we strive to inspire all those around us through our vision, values, approaches, choices, practice, actions and advocacy.
-

Helpers Of Africa International & Agencies Ethics & Induction Training

We rely on Gods grace to promote unity and ethics in our organization with personal responsibility well taken care of on ethics besides our comprehensive interview oral, written, practical and panels we seek we have to injuct our workers through 7 to 21 days ethics induction training depending on the Position and responsibility. Having codes and policies in place that address ethics is not enough. Employees need to be taught how to respond in situations involving ethics. Ethics programs often involve activities that encourage ethical behavior and reinforce Helpers Of Africa International and All agencies, Volunteers, partners into our ethics code/policies. We also package team building activities that express various ethics. One ethics activity involves having employees match various scenarios on one set of cards with the possible responses on another set of cards. Every scenario will have appropriate and inappropriate answers. After the participants match scenarios with responses, the group discusses the decision. Discussing the responses gives managers the opportunity to explain why some policies are in place and demonstrate how employees should respond in ethical situations they will likely face on the job. We know that we shall reap the benefit of sound ethics, higher employee job satisfaction, increased legal compliance and rule-following, increased organizational commitment, increased cooperation, increased change management success, increased attraction of high potential talent, Lower turnover, Lower health care costs, and Lower legal risk. Our Ethical Clarity We make our ethical expectations—our values, norms and rules—clear, concrete and understandable for all recruits, managers and employees. Self-Transcending Values The values that drive our mission and value-creation insist on employees' excellence in serving the welfare and interests of our customers, clients and co-workers.

Helpers Of Africa International and Her Agencies will seek Ethical Competency Our ethics training includes clear criteria for the competencies we expect managers to possess or develop to fulfill the organization's ethical expectations. We have following in place Code of ethics book and e-copy, Ethics department under HR division, Ethics training and communications regulary, Pre-employment screening on ethics, Monitoring and auditing of ethics, Ethics reporting mechanism ("hotline") free from retribution or fear of retaliation, Incentives and reward policies for ethical conduct, Policies to hold staff accountable for unethical conduct and Response policies for unethical conduct.

Selecting and Hiring Ethical Employees

Our comprehensive recruitment is targeted in having to first hire ethical employees to give us a good beginning. For this reason our interviews are quite comprehensive and at the same time looks too ambitious but through this door we seek to allow only the best qualified in academic, experience and attitudes should be given the first opportunity of valuable and rare opportunity in the Helpers Of Africa International and Her Agencies in both Management and casual. Since our mission and our responsibility to God and world is very important with atmost urgency we don't want to be slowed or stopped by people Helpers Of Africa International (KBG) don't uphold team ethics to make us win easily and safely to the other side of many global victories with billions of people waiting on us through our Departments, Agencies, projects and Program. Our Lord Jesus Christ was slow and keen to prayerfully appoint His 12 disciples, then 70 then 120 Helpers Of Africa International (KBG) he trained through intensity on ethics of the Kingdom of God and commissioned and today we have billions of faithful followers all over the world. It is better to hire someone Helpers Of Africa International (KBG) is naturally inclined to behave in an ethical manner than to rely on a company code of ethics to encourage an unethical employee to make ethical choices. Our ethics plan is designed to provide accurate and authoritative information regarding the expectation of all workers and partners along with collaborators of our projects to have a stong common face globally.

KECs DO NOT intervene, investigate, mediate or participate in resolving issues (not a Workers union). They do not represent staff or carry a staff member' issue to a higher authority. They do not choose a course of action for staff members. At all times KCEs must follow the KCEs Standards of Practice*, by being: confidential, respectful, ethical, informal, trustworthy, independent, impartial and competent.We rely on Gods grace to promote unity and ethics in our organization with personal responsibility well taken care of on ethics besides our comprehensive interview oral, written, practical and panels we seek we have to injuct our workers through 7 to 21 days ethics induction training depending on the Position and responsibility. - Inspired and innovative Our Core Values
- Personal honesty, integrity, commitment
- Working together in teams — with openness and trust
- Empowering others and respecting differences
- Encouraging risk-taking and responsibility
- Enjoying our work and our families

Benefits of Ethics in the Workplace:

The following mentioned are few advantages of ethics in the workplace.

1. Asset Protection and Assurance: When your workers possess an ethical working environment and ethical behavior in the workplace, your companies maintenance cost decreases to a remarkable extent because they are well aware of their duties and responsibilities towards the company.They also realize that they should not do any damage to any of the machines and equipment are given to them as they are very valuable for the company and doing damage to these things will be a wrong act, so automatically things will be taken care of and everything will work systematically.
2. Productivity will increase: When the working staff and the workers value the work given to them and then they will do all the given work in time and achieve their set targets, this will greatly affect the sales and the productivity of the company.Due to this, it is assured that you will have a group of people who will sail your business even in the worst of the downfall of the market, and keep the growth of the company and business consistent.
3. Team Work will develop: When all the workers do their jobs in a responsible way, then a time comes when they have achieved the target way before the given deadline, then question arises What Next? So the situation automatically bonds up all the individuals into a team. These individuals now work as a team and work in the benefit of the company for which they will be getting or achieving their incentives. This mutual understanding of the employees is a positive signal that the company will sustain for a very long period in the variable market conditions.
4. Public Image and Brand Value Increases:Yes if all the members of the company are dedicated to work as well as figure out there values and responsibility towards the environment, then it is for sure that the type of cleanliness and the disposal of the waste product of the company will be unbeatable in the market, hence resulting in attracting a bigger customer base due to the clean and quality of the services or products.Moreover, an increase in the public image and an increase in the customer base is directly proportional to an increase in brand value. In simpler words when you gain popularity amongst your customers you start to develop your company into a brand.
5. Adaptive to changes:-Workers with professional ethics in the workplace are definitely the master key to the lock of success. The team of understanding, trustworthy, reliable, motivate, concern and responsible people will defiantly adapt themselves into any kind of position and work they are filled with.
6. Moreover, in general, it has been seen worldwide that in the digressive market conditions, if the company asks for any changes in the production or changes in the kind of work then the workers oppose.
7. Helpers Of Africa International and Her Agencies will seek In some situations, the company is left empty-handed falling short of workers as they leave the company due to changes, but things are just opposite when you have a trustworthy and responsible bunch of people as they themselves demand changes according to the companies situation and let the company run even in the hard market situations.

8. Decision making and implementing is always easy: Whenever there is a need to take a big decision then the best one made is by the advice of the employees of the company, and what will be better than every single employ respecting the decision and supporting the company to go ahead with their decision.
9. This is the power of ethics in the employers who respect the decision of the company and let it go along with the flow. This is very rare in the big companies but where this scene happens; the company turns big brands over the night.
10. Trouble-free working environment: Generally, where everyone is unknown and moreover no one wants to know each other there are higher chances of great trouble and where there is a friendly, respectful and great workplace or environment between the employees there are fewer chances of the least troubles from the employees end.
11. If in case, a situation arises where there is some little misunderstanding between the employees, it gets solved within them due to a better and strong understanding between all the employees. Even the management does not have to bother about those small little things as they know that the employees will take better care of themselves.
12. There is no one left negative: When people are detached from one another and someone gets negative regarding the companies' work then it has been seen that from that single negative employee many are affected. Thus there is a sudden decline in the working of the employees, but when everything is good to go and everyone is concerned about one another then things become systematic and in case if someone gets negative, the positive and supportive environment works as a boost up for the person and again he/she starts working to their best.
13. Less Legal Issues:When everything is systematic and functional and in addition your workers are cooperative and understanding then you won't be facing any problems or legal obligations from the employee's end, because all the workers are treated equally and all are well known with their duties which the job requires from them.
14. When everything is managed and systematic then all the paperwork and the legal formalities are the primary things which are considered the most, so there is no question of any legal issues.
15. The company will Touch New level of Success: When everything is so managed and systematic along with the understanding of the employees because of their strong ethics, the company will surely touch new heights of success and even the growth of your business will be assured. When your employees become experts in their respective works and respective fields, then their dedication and will, to do the work will show true colors and give more fruitful results.
16. Leads towards a successful and healthier life. Ethical behavior in the workplace helps us to remain healthy. Yes healthy, but healthy not only means to remain healthy physically but it gives you the mental peace of mind. This experience is the most beautiful experience of life, when you don't have any regrets for anything and daily you are appreciated for who you are, gives your mind so much satisfaction and peace that in difficult situations when others can't think of any solution, you are the only one thinking calmly and quietly and finally coming up with the solution.
17. Avoiding ethical risk, and prevents the escalation of unproductive behaviour – This will help the bank remain profitable and successful. Every company should make these values and ethics known and continuously sustain them in all human resources and management practices. It is then the leadership's responsibility to create a culture of integrity and respect. However, when it comes to enforcing ethical standards, individual workers - both executives and team members - bear the ultimate responsibility for creating and maintaining excellent corporate cultures and ethical values. While many companies have anonymous reporting processes, workers should feel able to ask questions tactfully. They may not understand a process and only need an honest explanation. Or they may identify a problem of which management is unaware. This Helpers Of Africa International Human Resource Management training seminar on Corporate & Employee Best Practices will provide key insights into building company values and aligning personal goals that will ensure an outstanding work ethic and consequently warrant success both for the individual and the organisation.

Our comprehensive recruitment is targeted in having to first hire ethical employees to give us a good beginning. For this reason our interviews are quite comprehensive and at the same time looks too ambitious but through this door we seek to allow only the best qualified in academic, experience and attitudes should be given the first opportunity of valuable and rare opportunity in the Helpers Of Africa International and Her Agencies in both Management and casual. Since our mission and our responsibility to God and world is very important with atmost urgency we don't want to be slowed or stopped by people who don't uphold team ethics to make us win easily and safely to the other side of many global victories with billions of people waiting on us through our Departments, Agencies, projects and Program. Our Lord Jesus Christ was slow and keen to prayerfully appoint His 12 disciples, then 70 then 120 who he trained through intensity on ethics of the Kingdom of God and commissioned and today we have billions of faithful followers all over the world. It is better to hire someone who is naturally inclined to behave in an ethical manner than to rely on a company code of ethics to encourage an unethical employee to make ethical choices. Our ethics plan is designed to provide accurate and authoritative information regarding the expectation of all workers and partners along with collaborators of our projects to have a stong common face globally.

Our Kingdom Ethics Keepers, The Bank Group's Kingdom Ethics and Corporate Conduct Department (KECC) promotes the development and application of the highest ethical standards by staff members in the performance of their duties. EBC is committed to integrity, impartiality and independence in its work and reports to the Managing Director and Helpers Of Africa International Group Chief Administrative Officer and has direct access to the President whenever the situation or subject matter requires. Standard setting through the design and stewardship of ethical policy, practices, decisions, and behavior, including administering Declarations of Interest Programs to ensure public confidence. Outreach and training to strengthen Bank Group values, foster a culture of respect and integrity, and build bridges between scientific research and practice in ethical development. Advice to staff and clients by sharing ethics expertise and spotting trends—providing counsel on conflicts of interest and compliance-related issues as needed. Addressing misconduct by reviewing concerns, recommending actions, and facilitating resolutions.

Helpers Of Africa International and Her Agencies will seek -Kingdom Ethics Counsellors (KEC) are a network of volunteer peers. The additional responsibilities of the KEC Program are to build capacity within the KEC by:

Prepare and train your managers- Managing the performance of another individual is not an easy task and requires many skills. Training may be required to ensure managers feel adequately prepared to effectively complete all the tasks related to performance management. This is especially the case for newly promoted supervisors. Managers need to understand human behavior, how to motivate, how to develop, provide coaching and deal with conflict. To a great extent, managers must be observers and able to assess a situation, provide motivation and identify problems that interfere with performance. In addition, managers must understand that individuals at different levels of comfort, ability and experience with their jobs will require different levels of input, support and supervision. A manager who feels adequately prepared to provide and receive feedback, deliver a performance evaluation and conduct a performance evaluation meeting will be a major contributor to a successfully functioning process.

Perfect the performance review- The employee performance appraisal or review should be a summary of all that has been discussed. Based upon job expectations and key areas of contribution, and previously discussed goals and evaluation methods, the appraisal should be a written confirmation of what has already been discussed with the employee job responsibilities, current project work, relevant competencies, goals and achievements.

Link performance with rewards and recognition- linking performance to compensation. This link, however, cannot effectively be established without the existence of sound performance management processes that are seen as fair and equitable formal recognition events, informal public recognition or privately delivered feedback.

Encourage full participation and successThe performance management process must add value, otherwise problems with resistance and non-participation will surface. In addition, the process itself must be as efficient and simple as possible. Automated reminders and scheduling tools can help keep the process on track that involves
Instant form routing and paperless processes, Goal tracking and cascading functionality for complete visibility and alignment, Automated goal management and performance review reminders, Legal scan wizards to ensure appropriate/legal use of language, Writing assistants to help managers prepare appraisal forms, Support tools providing coaching support to managers when they need it most, Dashboards to deliver company-wide, aggregated or individual reporting and feedbacks

- Extended Term Temporary (ETT): ET appointments are for a minimum of 12 months, renewable for an additional 12 months—subject to a lifetime maximum of two years.
- Extended Term Consultant (ETC):

Our Credo, Focus, Agendas, ethics, philosophies, mandate, culture and principles of operation

We shall go to the last mile and spent the last coin to see that the world is empowered and developed by the grace of God as we do the best and God does the rest. To save lives and support people in meeting their needs in Continents, countries, cities, counties and hard to reach areas. To develop and implement programs that target the most vulnerable amongst populations that have suffered from conflict, natural disaster, or socio-economic hardship. To approach our projects and programs to look beyond the immediate emergency towards opportunities for longer term livelihoods reconstruction and sustainable development. To respect the sovernity of countries even as we seek there support in and collaboration in our projects and programs, To be committed to immediate humanitarian relief to support those in urgent need and uphold human dignity while co-creating longer term opportunities for sustainable growth and fulfilling people's potential. To respond to humanitarian crises and build resilience, To promote inclusive and sustainable global economic growth. To Support the world to construct effective governance and support the building of a strong world full of hope by by investing in people and their potential. To help build a world where every human being has the right to live in empowered in all areas and in dignity, To act swiftly for immediate rescue and change in the lives of those are in urgent need of help especially in Global disaster, To create new possibilities in the world and impactful sustainable change together with people by investing in their potential. To work very hard to make the world's dreams be closer than others think for this generation and generations to come. To promote and market our values, projects and programs aggressively to potential donors and partners for collaboration and support because we believe in our noble course. 'Be Remarkable, Take Ownership, Be Introspective, Be uncomfortable, Execution Matters.'enterprising-spirit and inspiration. Being Empathetic, Take Ownership, Be uncomfortable with mess, Execution Matters, Being Curious and Keen, our values of Faith, Family, Integrity, Respect, and Excellence daily.protect people's dignity, Caring, High Standards, Making a Difference, Respect, and Empowerment.' "Connect the world's professionals..."transparency and sincerity, "We are inclusive and collaborative" "Create a better everyday life..."Paying attention to detail, having emotional commitment to humanity, Supporting creativity and innovation, giving value to donors and investors. Making ourselves admirable, Passion, Ownership, Intentional, Nurturing and Trust.

Helpers Of Africa International Enhacing Effectiviness through Global Stratergy, Values and Structure

Helpers Of Africa International will work towards private sector growth, promote international trade mitigating risks, Poverty eradication and economic empowerment along with lowering the poverty rate and also increasing shared prosperity. That shared prosperity higher median incomes, better living standards, and better social circumstances within countries. So, it's a goal that probably we all share: to have better prospects for people around the world and especially in developing countries. We are adding to this legacy under my leadership by the grace of God in promoting public health and addressing global challenges. The Foundation is focused on four core commitments: to end energy poverty, achieve health for all, nourish the world, and expand economic opportunity. We are pursuing these goals through innovative partnerships and through impact investments that find new ways to leverage private capital for social good.

These teams ensure regular communication between consortium managers at different geographical levels of the response, and close operational coordination with national governments, partners across all sectors, and services at all levels. The many Helpers Of Africa International responses to the situation will be coordinated by our interial scernergy of our 72 departments through the mechanisms established under our interial and exterial governance programme. Helpers Of Africa Internationals disaster management, Health, Humanitarian, Charity, communication, public relations, events, social, industry, procurement, insuarance, strategic management, Human resourse, volunteers, finance and bank branches will work together with key operational partners under the leadership of the President and CEO long with Divisional / departmental directors head of sections. The President and CEO have already packaged strategic plans and networks is bringing together key technical and operational partners to meet on a regular basis to provide updates on the outbreak and take decisions. At working level, operational partner coordination is being managed through partnerships and collaborations of technical agencies, NGOs, and international development agencies. This coordinated global partnership work on surveillance, epidemiology, modelling, diagnostics, clinical care and treatment, and other ways to identify, manage, and limit onward transmission of the virus. Our Continental, Regional and National Directors will chair our responses in various dimensions rapidly establishing international coordination and operational support response

Helpers Of Africa International has structures and systems to receive daily / weekly reports & reconciliations along with monthly internal audits backed up by quarterly & annual external audits across all departments, operations and projects to ensure sound accountability of the funds we have received from donors, well wishers and investors. does every three years, we're currently inviting the nineteenth replenishment of the International Development Association, it is based upon this that more funds will be released through same structures for various expenses through the bible principle of he who is faithful with little much will be added. The same principle will apply to loans and grants given to countries we shall develop a joint venture arrangement of funding and running the projects to ensure that all funds are well used for the designated purpose. Procurement rules as per international organizations stardard of 3 quotes for every payment based on non conspiracy open or selective tendering to get the best rules efficient, transparent, best practices, professional and ethical rules. We have clear outlined financial management systems that every transanction reflects on minimum of 7 departments and with close monitoring accountability. Helpers Of Africa International will seek to stimulate upward recovery path, of nations through partnerships with governments and private investments of our own projects of income generation that will also support our charity programs to enhance sustainability for many years. Our Fiscal policy remains geared toward stabilization, As the economy stabilizes, a key challenge is what it will take to accelerate growth and job creation, that is what Helpers Of Africa International will seek to provide answers through our departments and branches all over the world. This requires fostering private sector growth and investment along with packaging nations to be attractive investment destination in line with every nation and community strengths for foreign investors and an equally attractive business environment for the private sector. Helpers Of Africa International will stimulate fiscal consolidation and stimulation of trade to the private sector in partnership with governments enhance public finance management especially for projects we fund in Joint ventures or absolute funding to ensure value for money for all banks investments across the nation to promote proper stewardship. Through Regional Governments such as Africa Union and others Helpers Of Africa International will work in advocating for better management of public investment, credible public procurement, and concessionary contracts based on value for money, improve business climate through establishing fair and transparent competition among private operators especially on projects that we shall be funding. Regarding the financial sector ensure banks are sufficiently-capitalized and provisions are adequate, the high ratio of non-performing loans needs to be reversed and preparing reforms for instituting much needed improvements in the bankruptcy framework and removal of barriers to collateral execution. Timely implementation of these changes will lower the risk premiums and stimulate growth in nations. Kingdom will support the current regulators and monitoring institution in this effort in a collaboration.

Helpers Of Africa International Enhacing Effectiviness through Global Stratergy, Values and Structure

We get a lot done and have fun along the way. **We are owners.** Every day, we take initiative—with integrity and courage—to make our company better.

- **We choose speed.** We make thoughtful decisions quickly, execute them with intensity, and simplify where we can especially responding to global emergencies.
- **We create a more diverse and inclusive.** Our differences—when embraced with humility and respect—drive smarter decisions, increased innovation, stronger performance, and a culture where everyone can be themselves.
- **We obsess over donors and customer satisfaction.** We value ALL interactions with our customers and—by partnering with them to understand and analyze their needs—we build solutions that they love.
- **We help each other thrive.** We show up as real, vulnerable, transparent human beings who speak from the heart, value others' contributions, and invest in each other's growth through our donors and partners.
- **We are Bold:** Building great things means taking risks. We have a saying: "The riskiest thing is to take no risks." in a world that's changing so quickly you're guaranteed to fail if you dont take any risks.

- **We Focus on Impact:** To make the most impact, we need to solve the most important global problems. We expect Kingdom employees and partners to avoid wasting time on minor issues and focus on truly big challenges.
- **We embrace Moving Fast:** We believe that it's better to move fast and make mistakes than to move slowly and miss opportunities. Doing so enables us to build more things and learn faster.
- **We seek to Be Open:** Informed people make better decisions and make a greater impact — so we work hard to ensure that everyone in Helpers Of Africa International to access as much information about the company as possible.
- **Build Social Value:** At Facebook, we're trying to bring the world closer together — not just grow our business. Our people focus on creating real value for the world — every day and in everything they do.
- **Creative Leadership:** We inspire growth and innovation through learning and bold action. **We believe in Changing the Game,** Deliver innovation that matters. Be what's next. **Passion for Progress:** We have an uncompromising focus on impact and excellence.
- **Responsibility:** We act with honesty, integrity, and thoughtfulness.
- **Ownership mentality:** Every partner, donor and employee has the power to make our company better.
- **Don't optimize for the short term:** Short-term gains never justify long-term sacrifice. Invest in the future.
- **We are all builders:** We are collectively building the product and company of our dreams.
- **We believe in Going the extra mile:** Go beyond delivering what works. Discover what delights.
- **Do what's right:** What is right isn't the same as what is easy.
- **We believe in being transparent:** Share information. Share mistakes. Share victories.
- **Selfless drive:** We want passionate collaborators, people who are dedicated to improving the health and happiness of the world.**Courageous hearts:** We are and recruit compassionate people who make the workplace a training ground for personal growth and transformation. We move quickly and deliberately, using data to guide our decisions and testing to achieve breakthroughs.
- **We Achieve Excellence Together:** Collaborate and celebrate. Drive forward as a team toward our mission. We play to win and openly discuss options when our goals compete. We unite to deliver results for our company and customers.
- **Openness:** We welcome new ideas and opinions, especially if they challenge our beliefs. We actively listen with humility and respect.

- **One Team: Participation:** We communicate directly, share feedback at all levels, and engage in debate while maintaining our objectivity.
- **We believe in Mastery at the same time diversity:** We offer an environment of continuous development where you can do, and become, your best.

- **We offer Hospitality:** We go beyond the expected to provide unparalleled experiences and help our clients and customers do the same.

- **We believe in Communities:** We believe in the power of the communities we create and serve, our community of team members and in giving back to the communities and nations we live in.**We enjoy what we do:** This isn't just a job; it's a calling, and we love it!

- **Accountability:** We do what we say we're going to do. If something happens to prevent that, we determine the new course and communicate quickly. **We support each other as we grow:** We structure our work environment so each person is enabled to create their best work and achieve their maximum potential. We promote values a culture of creativity, individual expression, inclusion, team spirit, diversity of opinion, and freedom of communication. Paramount to maintaining this free and creative culture is respect for the opinions, ideas, and feelings of others. We take ownership for the quality of our individual work but also take pride in what we deliver as a team; our focus is on a successful outcome for all. When things don't go as planned we proactively use it as an opportunity to share and learn. Greatness comes from unlocking each other's potential
  We believe that seeking and giving feedback are essential for us to learn; we want to inspire each other to achieve great things. As each individual grows, so does the whole organization.

Helpers Of Africa International appreciates and salutes the humanitarian, empowerment and development global & regional economic blocs, global banks, international development agencies, international banks and NGO that have tirelesslessly worked towards the global welfare of humanity and nationals over the years. We are glad we are not coming to operate in a vacuum but in a space that has been occupied, kept warm and alive by very important players who have kept the world moving in areas that we also are coming in to add value as development partners, colaborators, brothers and sisters in development. We extend a hand of friendship, solidarity, partnership and collaboration to this like minded organizations, institutions and networks that have had there big share of success in health, humanitarian, wealth creation, development , environment and conservation, mining, city and urban development, infrastructure, finance and economic empowerment, poverty eradication, food and agriculture, transport, conflict resolutions and peace building, water and sanitation, education and many other sectors which have made the world a better place building a foundation, pillars and blocks which Helpers Of Africa International seeks to build with and upon.
We are coming in strongly and humbly to the world of giants who have done well to join hands to make world better for this generations and generations to come in all sectors and fields that many have played well and won many victories. We request for hand of fellowship and networking from our elder brothers and sisters in all this platforms together we can win and be stronger. The power of unity and team work in all dimensions bible has over 100 scriptures that promote and advocate this important virtue upon which our partnership will make us win. We request for support, teamwork, partnership and collaboration in the continents, regions, countries, cities, towns and villages through all our projects, programs, plans and inniatives we shall be stronger together.

Since Covid-19 disease originated in December 2019, Wuhan, Hubei Province, China, WHO has declared the COVID-19 pandemic as a global health emergency, It has affected society and global economy and affected the socio lives of the people drastically. The COVID-19 pandemic is considered as the most crucial global health calamity of the century and the greatest challenge that the humankind faced since the 2nd World War. COVID-19 has rapidly spread around the world, posing enormous health, economic, environmental and social challenges to the entire human population. The coronavirus outbreak is severely disrupting the global economy. Almost all the nations are struggling to slow down the transmission of the disease by testing & treating patients, quarantining suspected persons through contact tracing, restricting large gatherings, maintaining complete or partial lock down etc. COVID-19, apart from becoming the greatest threat to global public health of the century, is being considered as an indicator of inequity and deficiency of social advancement. Apart from COVID-19, the human civilization has witnessed at least five pandemics in the current century, e.g. H1N1 in 2009, polio in 2014, Ebola (out broke in West Africa in 2014), Zika (2016) and Ebola (Democratic Republic of Congo in 2019). Subsequently COVID-19 outbreak has been declared as the sixth public health emergency of international concern. As Helpers Of Africa International we seek to participate actively to camb this war of this pademics jointly in partnership with countries and stake holder organizations. These worldwide outbreaks triggered a large number of fatalities, morbidities, and cost billions of dollars. Compared to other diseases and their respective burdens, COVID-19 is likely to cause as much or greater human suffering than other contagious diseases in the whole world. In addition, other global environmental changes such as soil degradation, ozone layer depletion, pollution, and urbanization, changing environment creates an indisputable threat to our planet and human health. Besides its upsetting effects on human life, the novel corona virus disease (COVID-19) has significantly slowdown and shutdown the economy of the world as a whole. Therefore, healthcare personnel, governments and the public in general need to show solidarity and fight shoulder to shoulder for prevention and containment of the pandemic. COVID-19 had spread in more than 200 countries. This virus is highly infectious and can be transmitted through droplets and close contact. The human to the human spreading of the virus occurs due to close contact with an infected person exposed to coughing, sneezing, respiratory droplets or aerosols. These aerosols can penetrate the human body (respiratory system) via inhalation through nose or mouth. The clinical spectrum for individuals with COVID-19 infection ranges from mild or non-specific signs and symptoms of acute respiratory illness such as fever, cough, fatigue, shortness of breath, to severe pneumonia with respiratory failure and septic shock, which are very similar to other coronavirus diseases. Loss of lives due to any pandemic causes definite irretrievable damage to the society. But apart from this, COVID-19 has severely demobilized the global economy. In order to restrict further transmission of the disease in the community, many of the affected countries have decided to undergo complete lock down.

Major international flights and also all types of business transports have been deferred amid different countries. Due to lockdown all domestic flights, railway service (except goods trains), bus, truck, and vehicles transports are suspended with special exemption to those associated with essential commodities. In almost all the COVID-19 stricken countries, entire educational, commercial, sports and spiritual institutions are closed. Industries are suffering a lot as many of these excepting those related to essential amenities, are closed for a long time in many countries. People belonging to the tourism and transportation industry are also facing utmost difficulties. Production level has gone very low. Economy of even powerful countries are now facing the threat of high inflation and increasing unemployment as a result of lack of productivity and excessive expenditure for the treatment and rehabilitation of the COVID-19 victims and their families

Many effects are very negative but the pandemic has brought in new thoughts, creativity, Emerging of more businesses in IT, online Shopping & Delivery, Explosion ofmedical facilities, among many others this are sectors to develop more in preparedness of the future so that Due to non-functioning of industries, industrial waste emission has decreased to a large extent. Vehicles are hardly found on the roads resulting almost zero emission of green-house gases and toxic tiny suspended particles to the environment. Due to lesser demand of power in industries, use of fossil fuels or conventional energy sources have been lowered considerably. Ecosystems are being greatly recovered. In many big cities the inhabitants are experiencing a clear sky for the first time in their lives. The pollution level in tourist spots such as forests, sea beaches, hill areas etc. is also shrinking largely. Ozone layer has been found to have revived to some extent. The pandemic has displayed its contrasting consequence on human civilization, in the sense that, on one hand it has executed worldwide destruction, but created a very positive impact on the world environment on the other hand.

The Helpers Of Africa International and this fund has come timely in the Nations when the world has been shaken many lives and livelihoods lost , economies of the world shaken and future of many families and nation ruined. God has brought us in the picture like Joseph of the bible to be an answer and a solution to Nations, companies, organizations and families by the grace of God. As the world battles the COVID-19 pandemic, we have all become acutely aware of the capacity and resilience of Nations, especially the millions of people in the world that keep systems and services functioning has been globally affected.

We are full of gratitude for the service and sacrifice of health and social care workers across the world. Public service and Health workers are being celebrated in capitals, cities and towns across the world for saving lives as vessels in Gods hands It is right to applaud, acknowledge and celebrate. COVID-19 is facing us and many others pestilences deseases globally.To the contrary, the pandemic is growing. The number of cases and deaths continues to rise and the Helpers Of Africa International and Helpers Of Africa International cant watch without action.Many forums have been hosted and convined across the world from all over the world came to launch the Access to COVID-19 responses to mitigate infection and treatment for infected and affected through many ways of production of masks, to hasten the development, production and equitable distribution of vaccines, diagnostics and therapeutics we shall seek to support this inniatives across the globe through Nations and factories that have proved faithful and reliable in this cause.

The production of masks, test kits, medical equipments fast enough to safe lives and also ensure that they can reach benefiatiaries in Nations, Cities, Towns and remote villages without loses and damage safely from networks of corruption and poor supply chain systems that have been challenged. We shall invest because we value lives. The COVID-19 pandemic will make us focus our resources to important matters of attention to establishing resilient health systems that can withstand adversity and dissasters along with solidarity and support of infected / affected as protecting others while protecting ourselves. The welfare and investment in the health workforce, who care for us throughout our lives, in every corner of the world is paramount. Investing in health workers and security agencies enforcing rules is not a cost or waste but a great investment to the future. Helpers Of Africa International through Gorvernments, Organizations and existing credible structures, platforms, networks will support and commit to allocate the necessary resources in health workers as the foundation of a safer, more equitable world besides production of vassines, medical support equipments and emergency response facilities in form of tents, domes, ambulances and life supports. In countries, regions, cities and towns that have high infections and vitalitie it is fair for health workers to be accorded insuarance policies, reliable salaries and incentives for over time including facilitation support for movements, communication , accomodations and social welfare. We shall advocate right to health and safety in their workplace, including the personal protective equipment they need to do their jobs safely to be produced and delivered on time.

Thanks for the resources that have been mobilized beyond our expectation but we are still open that you can still support to mobilize more to support and monitor the implementation of activities in your countries of origin through your networks. Country level will work through the regional to provide guidance and assist national management authorities to implement: enhanced surveillance recommendations; risk communications for the public regarding trade and travel; management of imported cases; and response to local outbreaks. In countries where our Humanitarian System-Wide Scale-Up Activation for Infectious Disease Events protocols are activated, a Humanitarian Country Team will be established with context-appropriate coordination structures of which you partners contributions and support will be faithfully coordinated by Helpers Of Africa International faithfully through our head office in Kenya. Me as your president will be launching National, Regional and Continenatal operations to ensure everything is in place as the CEO and Deputy CEO office through Divisional & departmental Directors will ensure Directors coordination hubs will be deployed, including space for non-governmental organizations/civil society involvement, and immediate surge capacity deployments will be requested from other partner organizations where needed. A package of technical guidance, essential supplies, and operational support will also be provided in such circumstances.

The Early epidemiologic investigations by us and other global health international organizations will be critical to address key unknowns. In my diverse strong experience projects only succeed when they are managed from Known to unknown we appreciate all efforts done to give us a base for known as we venture to the unknow. The data collected from such studies will be used to refine recommendations for surveillance and case definitions, to characterize the key epidemiological transmission features of Covid-19, to help understand spread pertains, severity, spectrum of disease, impact on the community, and to inform operational models for implementation of countermeasures. Accurate analysis and forecasting rely on accurate and timely data. Helpers Of Africa International has already taken rapid action with partners to establish a global surveillance system that gathers standardized data at the level of individual cases where appropriate, and at the aggregate level for countries with sustained transmission. We and our Partners will continue to collaborate closely to use these data in concert with other data sets (e.g., travel and trade volume data, migration patterns, knowledge and attitude surveys) to forecast epidemiological trends at national and global levels, and ensure that national and global preparedness and response plans are informed by the most robust and accurate analyses possible.

The latest epidemiological updates are currently provided by WHO daily as a public situation report which will be our basis to respond as an entry point before we begin our own centers. It will be crucial for partners to maintain formal communication channels among partners States and countries of origin, international organizations, key stakeholders, and technical/professional associations to facilitate information sharing. Risk communication and managing the infodemic. The Covid-19 outbreak and response has been accompanied by an "infodemic:" an over-abundance of information — some accurate and some not — that makes it hard for people to find trustworthy sources and reliable guidance when they need it. Due to the high demand for timely and trustworthy information, Helpers Of Africa International communication and social media teams department in partnership with other credible organizations are working closely to track and respond to myths and rumours. Helpers Of Africa International and partners are working 24 hours a day to identify the most prevalent rumours that can potentially harm the public's health, such as false prevention measures or cures to share with other health organizations. These myths are then refuted with evidence-based information. Helpers Of Africa International and partners will support and finance making public health information and advice on the 2019-nCoV, including mythbusters, available on social media channels (including Weibo, Twitter, Facebook, Instagram, LinkedIn, and Pinterest) and organizational websites. In addition, an expanding group of global response organizations dealing with children, charity, humanitarian responses and donor agencies support coordinated efforts with WHO statistics to ensure that biomedical recommendations can be applied at the community level. We have identified organizations that are active at the global, regional, and country level to ensure that affected populations have a voice and are part of the response. We shall support that global responses recommendations and communication are tested, adapted, and localized with help countries better control the 2019-nCoV outbreak. We shall support Laboratory and diagnostics Partners to work together to strengthen global diagnostic capacity for 2019-nCoV detection in order to improve surveillance and track the spread of disease to sensitize nations and partner organizations. We shall support Public health efforts to limit spread and strengthen disease control in countries with imported cases depend critically on the ability to detect the pathogen. Through Helpers Of Africa International departments and partners we shall activate global networks of specialized referral laboratories with demonstrated expertise in the molecular detection of coronaviruses to support them in finances and facilities be effective in development of vacines and medications along with controls. These international laboratories can support national laboratories to confirm new cases with recommendations. Analysis by Helpers Of Africa International and other international organisations on trade-related issues and impacts in the context of the current pandemic could help inform possible discussions among governments on a trade and health initiatives. Wise and swift Decisions on trade matter now, will ensure that trade can help support recovery. With COVID-19 hitting countries at different times and rates, access to global demand via open markets and continued trade will be important for supporting and sustaining economic recovery. There is thus a need to consider how to keep trade flowing in the current crisis and to ensure it can help underpin global recovery. This means both actions and decisions today and with an eye to the future Helpers Of Africa International analysis will help inform governments as they consider the priorities for action, both nationally and – critically – as they act together to build a more sustainable, inclusive and resilient global economy. Other additional areas of consideration include Trade facilitation, Government support, Global Value Chains for essential goods and Services trade. Our consultants and others now believe likely, the cumulative loss external shocks alone could amount to between 2.1% and 4.8% of GDP in 2020 and beyong that is why switch action is needed. Importantly, our simulations measure only the effects that might result from specific impact channels, e.g., foreign sources of remittances and revenues. Domestically, restrictions on movement of people and goods within the countries and on certain productive activities may also have adverse economic impacts. On the other hand, some sectors have benefited, such as information and communications technologies, food delivery, or the health-related goods and services sectors.

Some gorvernments have begun a course of decisive action to curb the virus outbreak by allocating stimulus funds and have ena cted tax breaks for industrial and tourism businesses, reducing the cost of electricity and natural gas to industries, and cutting interest rates, and is considering pro viding grants to seasonal workers. Additional measures may also be in the works, such as increasing cash transfer payments to poor households, increasing unemployment benefits, and providing targeted support to specific sectors. Such countries will be considered by Helpers Of Africa International for partnership, Grants and loans because of exhibiting good will to the people easily. While the country's focus currently is rightly on fighting the health crisis and mitigating its immediate impacts, planning o n how to re-open the economies globally should be our support as Helpers Of Africa International.

Helpers Of Africa International transformation of lives is the most noble coarse that your resources will benefit others because after all is done we can onl y sleep in one bed at a time and with the extra you can put a smile in a child, orphan, save the dying as we jointly respond to dis asters around the world. This link between income from various income ventures to fund charity will ensure the well of funds you have provided and continue to provide will sus tain our projects and programs for generations. This departments will be empowered and supported by strong departments of finance, operations, administration & maintainace, communication, travel and hospitality accommodation, Human resource , legal administration, risk and compliance, internal audits, central security, strategic management, insurance, procurement, transport and logistics, property acquisition, infrastructure, shipping, clearing and forwarding which are strong departments with well defined job descriptions in a 1000 pages job specifications and departmental mandate outlay that will guide our operations. I sincerely thank my son Sammy an e conomic students and wife who jointly brainstormed over this initial structure for 2 years and your suggestions as stakeholders, funders, donors and good will ambassadors are very welcome in our feedback session or through your comments in the feedback sheet. We highly regard your ideas, expertise, experience, in the business w orld that has made you acquire such huge resources that you have donated to this noble course. We shall have an open door to receive your views continuously through a nnual meeting and networking summits like this as your schedule allows where we shall table our achievements and challenges to walk together in the journey we have begun today. We shall organize for management to visit your countries, companies and organizations to learn as we engage with you at individual level on a win win business deals so that you can also benefit from our partnership. Kindly write your contacts as you highlight some ideas in the feedback form provided to contact you for visits and futu re. Helpers Of Africa International will assist the development, promoting foreign investment and promoting short and long-term growth in international trade along with a strong peace economy at times providing guarantee on private loans or capital investment on national and private projects. The Bank will e stablish Kingdom Institute of Economic Management an Institution to train expatriates who will advice nations on socio economic reforms and help individual companies economic recovery and restructurin g. The bank will give **loans** to governments and also to private borrowers (to industrial concerns for particular projects). In the l ater case the bank will require guarantee from the government, the central bank and similar organizations of the region in which the project is to be undertaken. The bank gener ally will not provide the entire cost of a private project. The organizers will be expected to bear at least a part of the cost and backed up with our technical expertize.

Helpers Of Africa International will support Stable and sustainable development of individual businesses and governments. The objective is to support sustai nable and steady development create and promote markets for donors and members which takes into account people's wellbeing and social n eeds. We now have the highest number of developing countries in recession since 2009, ending extreme poverty and boosting shared prosperity is our bottom line. Helpers Of Africa International will promote Entrepreneurship innovation, Scientific and technological development businesses pilots and supports the advancement of scien ce and technology and invest in education. Another objective is to achieve a skilled workforce and a high standard of technological production. Promote investors and partner's solidarity by providing platforms of networking and marketing for donors like the summit we have now to update you on matters pertaini ng projects and programs progress in various parts of the world.

Helpers Of Africa International will seek lay path is to accelerate inclusive and sustainable economic growth. Through Governments lay the foundations for more effective public services, by improving governance and tackling corruption, by accelerating infrastructure investment, by lowering real and perceived risks for private investment, by making trade work for everyone, and by creating markets to bring the benefits of private sector rigor and innovation to developing countries Invest more effectively in people that the premium on human capital will get higher and higher every year. The demands for digital competency are accelerating, as indicators suggest that automation will replace many of the less complex and low-skilled jobs. The remaining jobs will demand new and more sophisticated skills through our Training Departments. Investing in human development has to start early – by ensuring that women have access to prenatal healthcare, including the right nutrition; by preventing malnutrition in children, so they can develop properly; by ensuring access to quality health care for all; by providing education that prepares students for the jobs of the future and by building social safety nets that meaningfully protect the poor. Helpers Of Africa International Through our Disaster Response and Management Department respond to disasters directly or through other agencies red cross, World food program, national and community agencies supporting countries hosting refugees.We shall honestly distribute any aid accorded to us and procure more to avoid Trust Deficit Disorder which has destroyed many charities and institutions restoring and building the trust that our world so desperately needs. Yes, global economies are stabilizing but with many disasters and human displacement because of war and risks of human stability mounting rapidly. But we know there are many obstacles and challenges on the road to humanity– climate change, rising inequality, illicit financial flows, the impacts of the 4th industrial revolution, rapid urbanization, migration. Alongside these mega-trends, the increased volatility in financial markets and global trade tensions also loom large.

Financial market conditions have tightened in several countries and with further spillovers from trade disputes. However, because of the rising debt levels, countries have less space to react so many will need the help of Helpers Of Africa International to stabilize. .To this comes the major risk of rising debt, Thirty least developed and low-income countries are already in debt distress or at high risk of getting there. Many more countries — including many characterized as middle income — are facing levels of debt service that shrink their fiscal space at a time when much more public spending would be needed to achieve stability and this underlines the importance of international cooperation and of the full motivation and attraction of the private sector to fully play and Helpers Of Africa International is positioned to sort this challenges of refreshing nations. The financial contribution you have made and you will continue to make will be a vital component in making this great vision succeed and enormous amounts of investment are going to be needed we have begun well beyond normal expectations this will bring sustainable development in the broadest sense will bring many rewards to you and your families to your generations. We shall manage this fund with long-term sustainability even as we solve the immediate humanitarian needs of nations. Your partnership and sacrificial funding will lift hearts in dark times, give hope in despair, empower humanity, inspire brave feats, give courage to the weary and change the course of history. It is my desire that this bank will become a lasting resource not only to those who wish to become great, but to all men who wisely seek out to solve world problems of history as guides on the path to virtuous humanity. It ought to be axiomatic that every man and woman must devote a reasonable share of his time and resources to doing good works to others in the life of the community.

We need a surge in investment, long-term financing and global stability that is what through your global participation and networks we seek to address. Kindgom Bank will seek to remain relevant with other financial organization in aligning with global financial and economic policies, enhancing national and regional sustainable financing and investment strategies., encouraging financial inclusion and equitable access to finance for all, particularly for women and youth, through financial innovations, new technologies and digitalization, framing the policies needed to stabilize financial flows and minimize the disruptions that could otherwise accompany the normalization of monetary policy, address rising global indebtedness in a coherent manner that does not derail our progress towards poverty eradication and empowerment of Nations. We shall strengthen our institutions of global economic and financial governance to reinforce our rules-based multilateral system against the threats to assail it, including now in the area of trade. The management of Helpers Of Africa International through our able CEO Catherine Mwangi and able smart team team of Divisional and Departmental directors will bear the responsibility for formulating national budgets that support international sustainable development strategies that are fully aligned with this agenda. They will set up fiscal policies to create positive incentives for longer-term sustainable investments and a transition to sustainable, equitable and inclusive growth.Through this budgets we shall guide and regulate the financial flow, and work to minimize the adverse impact of prudential regulations on longer-term capital flows, while preserving short-term financial stability of Helpers Of Africa International.

Helpers Of Africa International will seek to eradicate extreme poverty, Ten per cent of the world's population remain in extreme poverty. And in our world of plenty, more than 700 million people are unable to meet their basic daily needs. Conflicts hinder further progress in poverty eradication, Discrimination and rising inequalities also pose major challenges. Women's unequal access to opportunities has real impacts not just on their lives, but on families and communities a s well. Youth, older people, indigenous peoples, people with disabilities and migrants are also disproportionately affected. Our d epartments are structured to deal with all this matters including financial literacy and entrepreneurship training combined with microfinance for business start up. Every year, disasters push millions of people around the world into poverty. More than ever, we can see the urgency of climate action and efforts to build resilient societies through our environment department and di saster response we seek to stabilize this matter. As we provide charity which is short term we shall empower people toward self emp loyment and enterprise development by promoting entrepreneurship, I am a qualified trainer and I have written 3 books on entrepreneurship which I have been using to train th ousands and with your support now we shall go to higher dimension as we raise thousands of entrepreneurship trainers and consultants to train through our training department to train youth, school leavers, community women & men groups and guide them towards business plan writing, incubation and pilot activities and business start up through funding and follow up across the continents and nations. We seek to empower millions of people through this cycle that we have done for 25 years with limi ted resources and with your generosity of providing unlimited resources we shall do more for humanity by the grace of God. Helpers Of Africa International will promote entrepreneurship that is the basis of creativity in business ideas and opportunity generation, business start up, building businesses, making profits, capital form ation and enterprise development, creating good jobs, developing new products and devising ways to serve others. Entrepreneurship is also the fuel for prosperity that puts rising economies on the path to success. It's what gives young people chance to channel energy and passio n into something that is bigger. It allows world to come together across countries and cultures to solve some of the world's greatest challenges as we have gathered in this summit. We shall provide skills and training, access to capital, coaching and ment orship. We shall set up Youth / Women / Men / Orphans & Vurnerable / Children and people living with Disability Entrepreneurship centers to give platform t o creativity, innovativeness and brainstorming. I hail the vision of Helpers Of Africa International for the betterment and uplifting of generations our whole effort should be toward securing a combination of the strong qualities with those qualities which we term virtues. Without malice toward none, with charity for all, with fi rmness in the right as God gives us to see the right, let us strive on to finish the work we are in, to bind up the nation's wounds, to care for him who shall have borne the battl e and for his widow and his orphan, to do all which may achieve and cherish a just and lasting peace a mong ourselves and with all nations. Quote from George Washington

Our strong agenda is commitment as embodied in the first of the Sustainable Development Goals: to "end poverty in all its for ms and everywhere". Poverty is not inevitable. It is not a natural state of being or occurrence. It is most often the outcome of choices that societies have made.Today we must choose to buil d a fair globalization that creates opportunities for all. Inclusive growth supported by economic and social policies that empower people and provide equal opportunities and make the difference. We need policies that create a strong enabling economic environment and that promote access to education, health services, de cent work and social protection to everybody. And we need policies that dismantle barriers that contribute to the perpetuation of poverty. Helpers Of Africa International will engage governments to see that this environment is created. I Sincere thank God for you despite your enomous blessings and wealth you have taken ti me to be here to bring your resources and to think about how you can empower someone else. The financial and economic crisis which struck the world as well know was ignited by excessive debt, by mismangment of resources. However its root causes are the ch anges that have been taking place in the world and the deep seated imbalances that have been building particularly over recent decades.However, poverty is not receding at the pace of economic growth and some countries have a challenge of reachin g there apex of economic growth yet they have minerals, resources, agriculture, livestock, trade, industrial potentials and opportunities. Helpers Of Africa International will help access and stimulate national strengths to stir up economic growth This is why we have to keep our leadership of the global community on development assistance and to make efforts to turn it more effective. It will be crucial to step up our engagement with in nations of the world that have undeveloped potentials and thr ough the joint partnership we accomplish much. Through strong regulations of our projects will also determine how well we capture the enormous potential of innovative finan cial technologies and digitalization to promote a more inclusive financial system, capable of providing a ccess to finance to all. We shall partner with banks across the nations to provide liquidy and lending capacity to strengthen existing banks.

We all know that some nations in the world especially Africa, Asia, South America are in a desperate economic condition. But common people, victimized by poverty have a right to live, to give birth to babies, and to enjoy families. The women and children suffer from malnutrition and hard conditions of life because of war yet many are brave to sustain their families.However, the conditions are grave. Poor medical care, if any, a high rate of infant deaths - one can hardly imagine that all this may be possible in the first decade of the 21st century. We are living in the world that needs great intervention; we are responsible for the future of the world as well. Thank you for availing yourself to this noble assembly of charity and business to impact humanity. Your generosity will bring forth freedom in the struggle for life for many. It is hard to have freedom without striving and sacrificing to help another to succeed, without labor and effort, without self-denial and the people who say that they have no time to attend to humanitarian; charity and empowerment of others are simply saying that they are unfit to live in a free community and world the financial liberty of others affects us directly, indirectly and our generations. As the President of Helpers Of Africa International I have full confidence that if all of us continue to do our duty of raising funds, if nothing is neglected, and if the best arrangements are made, as they are being made, we shall prove ourselves once again able to help many weak and vulnerable to ride out the storm of poverty and lack to outlive the menace of tyranny, if necessary for years, if necessary alone. At any cost, that is what we are going to try to do help and empower humanity like good comrades to the utmost of our strength. Even though nations and communities have been challenged by poverty, Helpers Of Africa International will be a refuge to many and we shall go on to the end, we shall fund to recovery of humanity to save lives. We shall fund with growing confidence and growing strength in all continents and nations to give value of life to billions in the strength and life that God has given us with all power and might, steps forth to the rescue and the liberation of many lives that are waiting on us.

In the long history of the world, Generations have been granted the role of empowering the world and bring financial freedom to billions that opportunity has been given to us in the partnership of Helpers Of Africa International let's not ever shrink from this responsibility lets welcome it whole heartedly. Every generation has an assignment from God to deliver there generation and others to come. I do not believe that any of us would exchange places with any other any other generations so it is rightful we are doing the right thing in this generation. The energy, the faith, the devotion which you have brought to this endeavor will light and refresh the world. That is why we chose in our logo a light shining over the nations and below a spring from below refreshing the world and all who serve it . The the glow from Helpers Of Africa International can truly light the world.

Let's resolve to align ourselves with JF Kennedy - And so ask not what your country/ world can do for you — ask what you can do for your country/ world. My fellow citizens of the world: ask not what country will do for you, but what together we can do for the freedom of humanity. I know you have joined in this effort through your donations. And you can count on the Helpers Of Africa International management to keep the vision and mission. For what we shall do for humanity together we shall be honored by humanity and God for touching humanity with comfort and assurance to a rattled people. The future doesn't belong to the fainthearted; it belongs to the brave. Thanks for being of one opinion of doing charity, development and empowering humanity and nations together taking courage, forgetting every doubts and we march forward with a firmer step in the full assurance that our cause will bear me out, and that we shall be able to justify upon the clearest principles of socio-economic revolution through every solution through the vision and mission of Helpers Of Africa International. The greatness of a man is determined by the cause he lives for and the price he is determined to fulfil it. Thanks and God bless you for the price of generosity you have paid and continue to pay for this noble cause. We shall leave a legacy to generations for good works you have shown to lift the weak and wearily all the time. As we stand up and pay the price to empower nations, the world will be free from poverty and the life to move forward into broad, sunlit upwards. But if we fail, then the whole world, including our generations including all that we have known and cared for will not stand the test of time. So lets put the right pillars in place. Let us therefore brace ourselves to our duties raising funds and on the administration side we shall be good stewards of the fund and keep our word to you dear and great funders, and so bear ourselves that the world prosperity will last for generations and our children children will say they did their best in the finest hour. It cannot be overstated that you are pioneers in a new and unprecedented project in mankind's history, that of representing not the interest of one nation and not an empire but a group of free willing nations you generous people that have decided that by pooling their resources and acting together they would be more effective in defending their interests and promoting their values and empowering billions in the world.As I recalled this at the start of my intervention, because it is important to always keep in mind our starting point, which models and shapes all our actions, including Charity, Development and Empowerment action. This is also something that is important to recall, at a point where world is faced with very important challenges and very important choices that have a clear impact on our external action and on our capacity to shape the world in future generations.

We need each other for a better world. The "spirit of unity and teamwork" in divine projects and activities like this with ambition to move on by your own means, and hard work. But together, here today, we also celebrate the spirit of equality and fraternity, the spirit of our common, universal values of Health and socio welfare. We have a vision to ensure diseases are not death sentences like before by equipping hospitals with modern facilities, building new hospitals, providing health care services for all through Insuarances, social protection, reduce Deaths related to pregnancy and child birth remain unacceptably, Supporting Training of health workers and, financing health services. The safety of the world requires more unity forums such as this gathered to do well and change the world from various dimensions and we thank God for all the other organizations and agencies doing good to humanity among many other charities that we shall collaborate with in our mission. I am sure that our fortunes are still in our own hands and that we hold the power to save the future, that I feel the duty to speak out now that I have the occasion and the opportunity to do so. The world difficulties and dangers will not be removed by closing our eyes to them. They will not be removed by mere waiting to see what happens; They will be removed by a united people like us with the right vision as Helpers Of Africa International acting alongside others. What is needed is engagement on variable vision without delay or denial of great needed help to humanity.

The world will be transformed by people who will look beyond their needs only but to empowering continents and to the opportunities in the wider world in which we win trade agreements with old friends and new partners, In which we support and advocate for wealth and health in the world, In which we play our full part in promoting peace and prosperity around the world.

The Mission to empower humanity is for the strong, for the vigilant, the active, the brave and the godly. Thank you for enrolling for this divine mission. We have chosen to refresh and transform nations empowering the world not because it is easy but is the right thing to do. This goal will serve to organize and measure the best of our resources, energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one which we intend to win, and the others, too. The delegates gathered today you are have a rich inheritance of justice, liberty, prosperity, and financial freedom. We appreciate that you desire and are determined to extend this to orphans, homeless, vulnerable, forsaken and refresh communities with water, food, education, health, settlement and all vitues that make humanity comfortable. May God bless you.

One Wiseman said "Only the dead have seen the end of mission of saving humanity the living continues saving lives so as we live let's add value to others."

The credit belongs to the man and woman who is this mission of empowering humanity, whose face is marred by dust and sweat of Africa gathered here to transform lives of billions in the world through Helpers Of Africa International Vision and Mission who strives to do good deeds, who knows great enthusiasms, the great devotions, who spends himself in a worthy cause, who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat- We are here to win in our mission. We are here to offer our toil, tears, sweat and incomes from God's blessings in the business world to help lift billions of lives. We have before us an ordeal mission of the most valuable kind. We have before us many years of doing together as we adjoin our children children and those who will take over our business empires, organizations, companies so that the work of doing good will be felt even after our existence on earth to be remembered for good works like King David left wealth to Solomon to continue to build the house of God and there family generation was blessed with more wealth, wisdom, kingdom honor, favors, good health and long life. Like King Hezekiah whose life was extended with 15 years, like Abraham who did good and his generations continue to be blessed. Do not grow wearly in doing good for in due season you will reap if you don't lose heart. Our mission is to save humanity in all platforms with all our might and with all the strength God has given us. Blessed are the merciful for they shall obtain mercy, blessed are the pure in heart: for they shall see God, Blessed are the peacemakers: for they shall be called the children of God.

In light of divine truth You have come amongst us in Africa the continent of potential and resources where many are needy and our humanitarian programs will be of great value. Besides recreation your resolve of being here in the dusty environment leaving good and clean cities for the purpose of charity, empowerment and development of humanity is a great resolve to lay down your life for God and others is very valuable for Helpers Of Africa International and for humanity people not even related to you. Human life is sacred, as we sacrifice to save lives we are in partnership with God as we take care of His people, environment and animals through our mission. You must see that it sustains no damage; it must not suffer while under your roof or ability to help. You cannot leave it carelessly. This is a righteous mission of expressing goodwill, compassion, support, friendship and shows a readiness to help. Charity based on the concepts of love, justice, equity, faith, peace, and happiness. As I end my exhaltation to enter more into our technical operations and departmental exposition of Helpers Of Africa International.

Finally and Once more allow me to seize the opportunity to congratulate us and thank you most sincerely on launching this out standing Helpers Of Africa International and historic fundraising campaign in which many organizations, nations, companies, and families are involved. Our donations so far in this month have amounted to great sum. In our website www.helpersof africa.org we have detailed our structure and our milestones in all our departments and we shall continue to update you more and more on these projects and programs updates. To achieve this noble goal, we shall have an annual meeting to update you as you choose various locations in the world but I welcome you again to Kenya hope you enjoyed your stay. I am honored to thank all sponsors, governments, organizations and private persons, who care for people in need in the heart of the African continent and the world. .

We appreciate that all here have not been constrained by our own domestic affairs but we are here for the sake others. We think of our own future, with hopes at the time of recession but others are suffering even more. We have visited and mapped very impoverished communities, children homes, rehab centers and we are glad that shall have more and better solutions through your generous support. The most unprotected circles of African society are kids. It frightened us to see how mother and kids suffer in remote regions of Africa, in the hot climate fight against infectious diseases, Water supplies are limited, and drinking water is of notorious low quality. We have developed programs that will gradually change the many situations through many special missions. Life is so beautiful. God presents us with this gift of life not to suffer from what we can have as our right. Health care protection is a hot issue in developing countries. On paper, kids are protected and have primary care. In reality, the situation is quite, quite different. Our mutual efforts, our support - all this African moms need most of all. Together, we will fulfill our duty of cherishing every human life.

Helpers Of Africa International will refresh nations economically and also through supporting refreshing activities of sports, games in the world by supporting tournorments in regional, national and football world cup, regional/ national athletics and Olympics, Golf tournorments, Clickets, Arts, Cynastics, Film industry, Water sports and Swimming, Talents centres , motor sports and all the others in funding events and building facilities across the nations alongside other infrastructures and institutions that contribute to resfresh and empower humanity.

To emerge stronger after the COVID-19 crisis, both the public and private sectors should continue to strengthen their collaboration.The government should work to further improve the business climate for the private sector and continue undertaking serious reforms to overcome institutional weaknesses. The crisis may also provide an opportunity to strengthen analytical capacity to provide policy makers with research-based solutions for safeguarding global economy during future pandemics and other crises. Unless governments around the world take decisive action, the case of individual countries that poverty is likely to increase in especially where where tourism, supply chains trading and remittances play a large role. It is also a strong reminder of the interconnectedness of the world and the importance of global cooperation to end this crisis and to be better prepared for the future. To ensure effective coordination of international partners and stakeholders outlined above at global, regional and country levels. Helpers Of Africa International will establish integrated incident management teams at the global, regional and country levels consisting of funders, government leaders, health organizations and experts as required.

These teams ensure regular communication between consortium managers at different geographical levels of the response, and close operational coordination with national governments, partners across all sectors, and services at all levels. The many Helpers Of Africa International responses to the situation will be coordinated by our interial scernergy of our 72 departments through the mechanisms established under our interial and exterial governance programme. Helpers Of Africa Internationals disaster management, Health, Humanitarian, Charity, communication, public relations, events, social, industry, procurement, insuarance, strategic management, Human resourse, volunteers, finance and bank branches will work together with key operational partners under the leadership of the President and CEO long with Divisional / departmental directors head of sections. The President and CEO have already packaged strategic plans and networks is bringing together key technical and operational partners to meet on a regular basis to provide updates on the outbreak and take decisions. At working level, operational partner coordination is being managed through partnerships and collaborations of technical agencies, NGOs, and international development agencies. This coordinated global partnership work on surveillance, epidemiology, modelling, diagnostics, clinical care and treatment, and other ways to identify, manage, and limit onward transmission of the virus. Our Continental, Regional and National Directors will chair our responses in various dimensions rapidly establishing international coordination and operational support response

Helpers Of Africa International will support inniatives rapid risk and vulnerability mapping has been done based on country capacity as measured through Member States annual reporting core capacities, and the likelihood of importation of cases based in international travel. Helpers Of Africa International will support Country-level coordination in national risk management, the government is the natural leader for overall coordination and communication efforts through willing nations. Helpers Of Africa International will support building on global risk assessments to inform national risk assessments and to decide on actions needed, the national governments should help public and private agencies and organizations by providing guidance, planning assumptions and making appropriate modifications to the laws or regulations at all levels and sectors to enable an effective response. These efforts are supported by Helpers Of Africa International and other Global organizations, and through the Cluster-coordination approach where relevant. The process should build on existing public health emergency contingency, preparedness and response plans, including for pandemic influenza. A key step is the activation of existing national emergency response committee(s) to take the lead in coordination of these functions, and to provide the forum for partners to be involved in response operations.

Helpers Of Africa International will support Public Health Emergency of International Concern will test the resilience of nations, businesses, and communities, depen ding on their capacity to respond. No single agency or organization can prepare for or respond to such an event on its own. Inadequ ate or uncoordinated preparedness of interdependent public and private organizations will reduce the ability of the health sector to control disease spread. A com prehensive approach to risk management is therefore required and must take a whole-of-society and whole-ofgovernment approach. All entities need to consider supportive financial resources for response operations, and to develop plans for essential service continuity and recovery operations. Risk communication and community e ngagement Country risk communication and community engagement is a critical public health intervention in all countries. Countries should prepare to communicate r apidly, regularly and transparently with the population. All countries should prepare existing public health communica tion networks, media and community engagement staff to be ready for a possible case, and for the appropriate response if this happens. Countries should coordinate communications with other response organizations and in clude the community in response operations. Partners stand ready to coordinate with partners to support countries in their communication and community engagement r esponse. Surveillance National authorities must notify WHO of detected cases and undertake case-based and/or aggregated reporting as per global surveillance guidance. Helpers Of Africa International and Partners will provide any support necessary to enable authorities to fulfil these obligations. Helpers Of Africa International will support organizations to provide disaggregated data on age, sex, pregnancy status and outcome (as appropriate) to be reported. It will be important to enhance existing respirato rydisease-surveillance systems, including indicator-based surveillance, community event-based surveillance, and sentinel surveillance (e.g., Severe Acute Respiratory Infection and Influenza-like illness), and establish active case finding at points of entry, health facilities and in communities. It may be necessary to engage the private sector in case identification and surveillance where appropriate.

Helpers Of Africa International will support and finance where possible epidemiological analysis and forecasting to get ahead of the outbreak we need to answ er two urgent questions: Early epidemiologic investigations are critical to carry out early in an outbreak of a new virus to address key unknowns. The data collected from such studies are used to refine recommendations for surveillance and case definitions, to characterize the key epidemiological transmission fe atures of 2019-nCoV, help understand spread, severity, spectrum of disease, impact on the community, and to inform operational models for implementation of countermeasure s. Accurate analysis and forecasting rely on accurate and timely data. WHO has already taken rapid action with partners to establish a global surveillance system that gathers standardized data at the level of individual cases where appropriate, and at the aggregate level for countries with sustained transmission. Helpers Of Africa International and Partners will continue to collaborate closely to use these data in concert with other datasets (e.g., travel and trade volume data, migration patterns, knowledge and attitude surveys) to forecast epidemiological trends at national and global levels, and ensure that national and global preparedness and response plans are informed by the most robust and accurate analyses possible. The latest epidemiological updates are currently provided by WHO daily as a public situation report. It wi ll be crucial for partners to maintain formal communication channels among Member States, international organizations, key stakeholders, and technical/professional associa tions to facilitate information sharing. Risk communication and managing the infodemic The 2019-nCoV outbreak and response has been accompanied by an “infodemic:” an over-abundance of information — some accurate and some not — that makes it hard for people to find trustworthy sources and reliable guidance when they need it. Due to the high demand for timely and trustworthy information about 2019-nCoV. The technical risk communication and social media teams have been working closely to track and respond to myths and rumours. WHO and partners are working 24 hours a day to identify the most prevalent rumours that can potentially harm the public’s health, such as false prevention measures or cures. These myths are then refuted with evidence-based information. Helpers Of Africa International and partners are making public health information and advice on the 2019-nCoV, including mythbusters, available on social media channels (including Weibo, Twitter, Facebook, Instagram, LinkedIn, and Pinterest) and organizational websites. In addition, an expanding group of global response organizations such as the United Nations Children’s Fund (UNICEF) and the International Federation of Red Cross and Red Crescent Societies (IFRC) are coordinating efforts with WHO to ensure that biomedical recomme ndations can be applied at the community level. These organizations are active at the global, regional, and country level to ensure that affected populations have a voice and are part of the response. Ensuring that global recommendations and communication are tested, adapted, and localized will help countries better control the 2019-nCoV outbreak. Laboratory and diagnostics Partners will work together to strengthen global diagnostic capacity for 2019-nCoV detection in order to improve surveillance and track the spread of disease. Public health efforts to limit spread and strengthen disease control in countries with imported cases depend critically on the ability to detect the pathogen.

Helpers Of Africa International and partners will work to ensure the availability of tests, including through the screening validation of current academic and commercially available assays. Helpers Of Africa International will work with commercial and non-commercial agencies with the capacity to manufacture and distribute newly-developed 2019-nCoV molecular assays. Helpers Of Africa International will begin supporting health organizations its regional and country offices to function for wholistic response globally. Helpers Of Africa International will support Strategic Preparedness and Response Plan Technical expertise and guidance. We shall support publications and other modes of communication through our Health department and other Global health players for all countries on how they can prepare for and respond cases and clusters of 2019-nCoV, including handling possible cases, how to identify and monitor sick people, collect and test samples, treat patients, prevent onward spread, control transmission in healthcare facilities, maintain adequate stocks of supplies, and communicate with the public about 2019-nCoV infection. Through our innovation and research departments and partners we shall gather information on Guidance and lessons developed from existing materials for MERS-CoV and updated with input from a global network of partners from affected countries, and global partners with expertise in laboratory, clinical management, infection prevention and control, mathematical modelling, risk communication, and community engagement. We shall support technical guidance and following guidance materials are reviewed and updated regularly as new information becomes available: • Surveillance case definitions for human infection with 2019-nCoV;
Areas that we shall support through various global health organizations and partners include

- Interim guidance on laboratory testing of human cases suspected of 2019-nCoV infection, and protocols for molecular testing for 2019-nCoV;
- Clinical management of severe acute respiratory infection when 2019-nCoV infection is suspected;
- Infection prevention and control during healthcare when 2019-nCoV infection is suspected;
- Home care for patients with suspected 2019-nCoV infection presenting with mild symptoms and management of contacts;
- Guidance on risk communication and community engagement and initial response;
- Recommendations on the prevention of transmission from animals to humans;
- Early investigations of suspected cases. We shall also partner with countries to package readiness checklist made available to support teams to review their capacities to detect, manage, and respond to suspect cases and clusters. A disease commodity package for 2019-nCoV outlines the supplies needed for surveillance, laboratory analysis, clinical management, and infection prevention and control.

Global coordination of technical expertise for laboratory, clinical management, infection prevention and control, risk communication and community engagement, and mathematical modelling will continue to gather real-time information and be incorporated into available guidance. Travel and trade continues to be affected because of restricting the movement of people and goods during public health emergencies is affected, and interrupt vital aid and technical support, disrupt businesses, and have a negative impact on the economies of affected countries and their trading partners. However, in certain specific circumstances, such as uncertainty about the severity of a disease and its transmissibility, measures that restrict the movement of people may prove temporarily useful in outbreaks to allow time to implement preparedness activities, and to limit the international spread of potentially highly infectious cases. In such situations, countries should perform risk and cost-benefit analyses before implementing such restrictions, to assess whether the benefits outweigh the drawbacks. Helpers Of Africa International will support publishing and regular through various platforms and media update advice for international travel and trade, which includes advice for international travelers, as well as measures for international travel such as entry or exit screening. Helpers Of Africa International will continue to support monitoring additional health measures under that countries implement in response to the current outbreak. In the event of measures that interfere significantly with international traffic (travel bans, refusal of entry or exit of passengers or cargo for more than 24 hours) through Global health organizations authorized. Helpers Of Africa International and partners will support maintain communication with representatives of airlines and international tourism organizations to exchange information (with a focus on case management on-board aircraft) and reporting should a traveler with respiratory disease symptoms be detected. We shall support organizations such as International Air Transport Association guidance for cabin crew to manage suspected communicable diseases on board an aircraft.

Helpers Of Africa International will support Scaling up country readiness and response operations Beyond establishing international coordination and operational support, it is crucial to scale up country preparedness and response operations, including the rapid identification, diagnosis and management of cases, identification and follow up of contacts when feasible (with priority given to high-risk settings such as healthcare facilities), infection prevention and control in healthcare settings, implementation of health measures for travelers, and awareness raising in the population though risk communication and community engagement. All countries are at risk and need to prepare for 2019-nCoV. Helpers Of Africa International and Partners will support in prioritization of countries with weak health systems and significant gaps in preparedness capacity for technical and operational support.

I Quote a Kenya Health Cabinet Secretary who says if we take the covid usually, it will treat us unusually. As Helpers Of Africa International we seek to where we can in partnership and collaboration with others globally to take every step that can save lives and livelihoods including health workers. Many health workers experience mental health challenges from the stress of responding to the pandemic and others health workers have contracted COVID-19 while in the service of others along with other health workers have lost their lives.To handle the current pandemic and others in the future it is important to invest in capacity building – in the education and training that is necessary to deal with the current emergency, and to build the future health workforce that is fit-for-purpose with the competencies to deliver quality care and Health For All. We shall work with gorvements and stakeholders ensure that health workers are protected from stigma, harassment and attacks by providing physical security and safe places to stay between shifts, as needed. At the system-wide level, we need to accelerate additional recruitment, redeploy workers within and across sectors, and activate partnerships for public purpose with the private sector and civil society. We shall support advocacy the facts and evidence about COVID-19 so that the public continue to understand and value the dedicated and selfless health workers and support staffs. We shall advocate through government and stakeholders to co-opt policies and regulatory environments to enable, support and protect health workers to deliver safe care within there countries. We shall also advocate for governments, the private sector and other international financing partners award a high level of priority to health and, within that, to the public sector health workforce, without whom there can be no care, no response, no recovery.

Helpers Of Africa International will finance and support the stronger establishment of stronger health systems globally in hospitals, dispensaries, care homes and more qualified jobs for workers in health and social care for all- including for women and young people - and stronger, healthier populations that can resist and bounce back from epidemics. We shall advocate for protection of the rights, roles and responsibilities of all health workers and public servants if they are to achieve their full potential in managing the pandemic, building back better and advancing public policy and the Sustainable Development Goals. We shall finance and empowers and enables health workers as the foundation of the healthier, safer, fairer world we all want. We request our partners and donors to support and for your solidarity in this noble cause.

This disease Awareness and advocacy is low in some countries and communities others are unaware, ignonorant or in denial Helpers Of Africa International will support advocacies including in education institutions, communities, social groups, professional organizations and networks though mobiliza tion, media, community leaders and grassroots networks along with innovations of building more capacity. We shall use our schools and education institutions to build this capacity in conjunction and partnerships with gorvernments globally along with credible Institutions. We shall also support and finance online learning a nd awareness platforms for nations and health workers through partnership with various online and mobile companies. All this inniatives will also create thousands of jobs at a time of his toric levels of unemployment that have affected many socio- economic lives. It can also address unpaid social care in homes and com munities, which is disproportionately provided by women. We shall seek to empower and facilitate health industry globally to provide the essential equipment and supplies to keep public servan ts safe.

Helpers Of Africa International shall will seek support where we can to safe water for all to facilitate Hand washing where access for such is a privilege in some slums especially in low economies and developing land. Provision for clean water points and flowing water systems in nations, cities, towns, slums and villages is crucial along with availability, access and affordability of Hand sanitizers and masks through cost effective production through partnerships with relevant industries. We shall support nations to restore economies capacity incase of lockdowns people can afford to stay at home with basic livelihood. We shall support where we can humanitarian donations in form of food, water, medical equipment etc since many have lost

In the world workforce over 50% of people are employed in low-income, unstable jobs—the segment of the working population that is becoming the first to lose their jobs due to the pandemic. Left to face increased financial burdens, they are becoming more fearful in not knowing where their next income will come from the loss of their livelihoods, they are unable to pay for basic necessities including rent, utilities, and food. Schools were often providers of meals for children, now leaving these children at risk of facing hunger with schools closed. With state of hunger, homelessness, and certain hopelessness on the rise for this already vulnerable population Helpers Of Africa International support is needed more than ever. Together, WE CAN OVERCOME! Together, WE ARE STRONGER. Big or small, every effort counts and it will all have a great impact on someone's life. With this dire situation in mind, Helpers Of Africa International is launching a campaign with your help to provide as many people as we can through gorvernments and organizations with with financial assistance for rent, food, and utilities during the Coronavirus pandemic. We simply cannot leave vulnerable population to face this hardship on their own, and we know that especially in times of collective concern, we must come together to protect those who are unable to protect themselves.

With our partnership we can help ease the burden of these people in need in the world by donating whatever we can to our campaign. It is high time that during these difficult times to come together, unite, and BE AS ONE. If not NOW, when? If not YOU, then who? You and I can be that positive change you have been waiting to see in the world.
Alone we can do so little; together, we can do so much. This too shall pass, and in the end, there's a bright light waiting for all of us at the end of this dark tunnel. Individually, we are just one drop. TOGETHER, WE ARE AN OCEAN. Now the World faces among the heaviest financial tolls from the pandemic in the History of the world, and the deepest recession in 300 years. In the background is the specter of c ompounding the pains that have overlap from wars, famines, droughts, other diseases, poverty and economic challenges among nations. Some countries that have successfully suppressed transmission are now seeing a n upswing in cases as they reopen their societies and economies. All countries are facing a delicate balance, between protecting their people, while minimizing the social and economic damage. We shall advocate for gorvernments to balance between lives and livelihoods we shall emphasize to the countrie s we shall partner and support to do both. We shall support and work with countries to be innovative, careful and creative in finding solutions that enable people to stay safe while getting on with t heir lives.

We seek to support strong advocacy of public health measures of Finding and testing suspected cases, Isolating and caring for the sick, Tracing and quarantining contacts in homes of care centers, protecting health workers, maintain physical distance, Continue cleaning your hands, wearing a mask where appropriate and sharing medical skills about how to treat the sick.

We shall seek to support the increase production and rapidly and equitably distribute of any medically approved medication and vaccine such UK dexamethason e's and others along with the research of the same worldwide, focusing on where they are needed most as they are invented. We seek to support inexpensive medicine and support manufacturers worldwide, who we are confident to accelerate production. We shall support guided by solidarity, countr ies must work together to ensure supplies are prioritized for countries where there are large numbers of critically ill patients, and that supplies remain available to treat other diseases for which the vacines and medicine that will be deemed to work. Transparency and constant monitoring thro our medical technocrats and those of various Nations will be key to ensuring needs dictate supplies, rather than means. We shall work together with international and National stakeholders important to check t hat suppliers can guarantee quality, as there is a high risk of substandard or falsified products entering the market.

The Socio-consequences of these disruptions will be felt for many years to come. The world is learning the hard way that health is not a luxury item; it's the cornerstone of security, stability and prosperity. We shall support countries to respond urgently to the pandemic, and we shall invest in strong health systems domestically, and in global health security. We shall support adopt innitiatives on universal health coverage and care. Now more than ever, we shall advo cate that all countries must make universal health coverage a priority. It's not a question of whether countries can afford to do this, it's a question of whether they c an afford not to and with partnership of international donors as we chip in where we are able.

The world has been affected and attacked by other global apedemic leading to more deaths than wars. The 1918 flu pandemic, which erupted durin g the First World War, and although it killed more people than the war itself, was quickly forgotten and its lessons went unheeded. We shall seek to turn this painful experience of the world into a progressive legacy of education that will keep us focused on pandemic preparedness than emergency response. This experience h as shown that devastating epidemic can start in any country at any time, and kill millions of people, because we are not prepared. Since we do not know when and where or when the next globa l pandemic will occur, but we do know that it will exact a terrible toll, both on human life, and on the global economy we need to caution such situation through research because bibilical prophecy confirms vernurability of the world I watched a CNN research that bats ONLY contain over 1400 different virus not wi thstanding other animals, birds, chemical contamanations etc projected to be breeding grounds to dangerous pandemics. Pademics has proved that they can cause political, social and economic instability.The COVID-19 pandemic has demonstrated that indeed, the world was not prepared to combat an invisible enemy but we were ready fo r military and other warfares becoming helpless in the sight of unexpected enemy that made even superpowers to look vernurable.

This pandemic has really brought world to a different unusual sites empty churches, parks, stadiums, games without spectators . The biggest threat now is complacency. Studies show that most people are still susceptible to infection.Countries must continue with active surveillance to ensure t he virus does not rebound, especially as mass gatherings of all kinds are starting to resume.Without proper safeguards and monitoring, a resurgence is a real threat. Lockdown, curfews and slowdowns measures have been successful in many countries in slowing transmission. To actually stop transmission, countries must have a comprehensive approach: find, isolate, test and care for every case, and trace and gracefully quarantine every contact.

We intend to broaden Partners Platform enables countries to enter planned activities for which they need support, and allows us to match our contributions to these activities. We intend to set app an online progress and need assessment interative platform for leaders of Nations and Organi zations to update us and also request for funding on specific phases because physical confrences and interactions is practice a gainst the ethics of this season. This include COVID 19 Funding and Facility Portol for organizations and countries to request critical supplies of diagnostics, protective equipment and other essential medical pro visions. Through our Shipping Department and Logistics we shall deliver such requests including personal protective equipment. Through Health organizations and stakeholde rs we shall recruit humanitarian and health care volunteers of interns from low- and middle-income countries to be managed by our volunteer Department. This will be mixed group of youth, elderly, women, men also to be coordinated by our respective departments to also offer jobs and career steps orientation. We shall however focus more on youth volunteers to invest in young health leaders, who will play a major role in building strong, resilient health systems in all Member States in the years to come.

As Helpers Of Africa International we have a structure of diversity that has a model for the kind to mobilize a global solidarity we need to take on the COVID-19 pandemic. We are fortunate that many countries have not had as high a caseload as had been feared especially in Africa but this does not give us a reason to relax and assume all is well but we should take this as a window for building capacity to position ourselves like Joseph in the bible days who used the 7 years of Harvest to position to manage 7 years of drought. This is testament to the grace of God and prayers offered all over the world and good work done by countries and regions with long experience in disease outbreaks, and you have taken measures swiftly, and that's helping But we must not let down our guard. We still have a long way to go, and many risks remain since the disease and infections are still growing in phase 1 and others in phase 2. We shall work and support financially globally to ensure that all countries have timely access to high-quality, affordable diagnostics, medicines, vaccines, and other essential health technologies as a wholistic approach.

We advocate for Countries to take a comprehensive and balanced approach – find, isolate, test and care for every case, and trace and quarantine every contact. We shall support this this comprehensive approach as we empower nations to maintain all essential health services. As we support Covid response we shall not overlook vaccination and prevention programs for diseases like HIV, measles, polio, malaria and many others could put millions of children and adults at risk. The worlds Disaster preparedness and response has been tested by COVID-19 is a brutal reminder that the time to ready ourselves for outbreaks and other health emergencies is before the crisis hits. The impact on lives, livelihoods and the economy is a clear illustration that preparedness is not a cost, it is an investment, and that the most costly thing of all is to do nothing.

We seek to support countries, organizations and institutions to establish Strong health systems that are accessible and affordable to all is the only way forward. Universal health coverage is at the core of global health security and resilience. We have to start plans and programs that align to the new normal as many are calling it, we cannot afford to go back to business as usual. We must rethink how we have been doing things and build back better. We seek to invest in green technologies, water and sanitation infrastructure, and health workers through countries and health organizations. Helpers Of Africa International seeks to invest and support health systems through existing institutions and also own, build and run through our health departments. We shall seek for partnerships and colaborations with national gorvernments and regional Unions in Africa, America, Australia, European, and Asia and across the world globally to manage the spread of this Virus and many others to make the world a better place for us and future generations. Many good innitiatives and programs have been well managed and implemented we are coming just to energize the efforts.

We shall seek to fill the gaps and cracks that have come because of omittions in laying out disaster response programs not only in health but also through other calamities. Disaster preparedness is a strong pillar that Helpers Of Africa International seeks to work to develop through our Disaster management Department. Animals use the power of unity and solidality to protect each other. We are strong as the weakest opening in the team therefore solidality is key and working together. We shall support and facilitate countries, health providers and organizations to ensure that Essential Health Services are maintained and strengthened throughout the pandemic and beyond along with close monitoring and evaluation to be able to maintain control of statistics in various various treads of infections and recovery which the WHO and global network is managing very very well we congratulate them on this greatly we shall support where needed in this noble coarse. Otherwise, there is a high risk of a resurgence. So we need a comprehensive approach of find, isolate, test and care for every case, whilst opening.

We want to assure our commitment of working with all of your countries and credible organizations to promote health, keep the world safe and serve the vulnerable. Our joint advocacy and one voice to bring the world together and lead to a joint solidarity. Without solidarity the virus will create havoc. Many pademics including Smallpox was eradicated because the world came together, Even during the Cold War the US and Russia came together in that time. Many economic melt downs have been sorted because of unity and solidarity as the Bible teaches on the blessings and strength of unity as good Samaritans to the nations

COVID-19 is a global threat that requires a global response involving all countries. Governments should be responsible for providing exact information to help the public face this novel infection. To decrease the damage connected with COVID-19, public health and infection control actions are immediately necessary to limit the global spread of the virus. We shall continue to support Some Global strategies.

This Covid has brought Restricting mass gathering for business, shopping, schools, worship is being replaced by online communications such as facebook, You Tube Streems, Zoom and others. So we shall support creativity in IT and also support existing providers to build more capacity to expand serve more people even rural villages of Africa by providing computer Hurbs libraries that the world can be networked globally for information and communication globally.
Preventing SARS-CoV-2 transmission by restricting mass gathering is an important objective of public health care system. COVID-19 is spread from person to person through direct contact. Thus, the spread of respiratory illnesses during the mass gathering is a major public health concerns with the potential of distribution of these infectious diseases. Based on earlier knowledge of MERS and SARS infections, the WHO in order to reduce the general risk of transmission of COVID-19 has recommended some precautionary measures such as avoiding close contact with people suffering from acute respiratory illness, regular hand washing with soap & water or hand sanitizer particularly after direct contact with sick people or their environment, maintaining cough etiquette, and avoiding unprotected contact with farm or wild animals etc. Govt. of different countries postponed all types of religious, cultural, social, scientific, sport, and political mass gathering events in different parts of the world. Media and information technology are providing significant support to the society for prevention and control of COVID-19 outbreak. So, restricting mass gathering could be the primary preventive strategy for COVID-19.

On Medicine & Vaccine

This outbreak of COVID-19 has become a clinical threat to the common population and healthcare workers worldwide. Since this is a very new virus, much knowledge about this novel virus is therefore not available. So far, there are no exact antiviral treatments or vaccines for COVID-19 disease. Therefore, it is an urgent necessity of time to develop a safe and stable COVID-19 vaccine and treatment. Helpers Of Africa International will support the research and trials along with making it cost effective to ordinary citizens together with distribution. Research will continue to play an important role to discover new drugs or vaccines to prevent and control the COVID-19 infections with other stakeholders and through our health and hospitals department by the grace of God.

On Forestation

According to World Wildlife Fund, forests cover more than 30% of the Earth's land surface. The unstoppable growths in human population lead to deforestation for resources, industries and land for agriculture or grazing. Rising average temperature and ocean levels, and increased rate of extreme weather events affect not only the global land and ecosystem, but also human health. Deforestations are also linked to different types of disease due to the birds, bat-borne viral outbreaks. It is suspected highly that COVID-19 is bat related epidemic but researches. To prevent this outbreak, billions of dollars are being spent to developing diagnostic, treatment, and medicine. But we are neglecting the primary tools of prevention such as forestation and respecting wildlife habitats.It is therefore very much important for the world to realize the significance of the forests, and to encourage afforestation as much as possible throughout the world. Through our Enviromental conservation department and other stakeholders we shall handle this task professionally and massively across the countries by the grace of God.

Addressing food problem

Environment change is likely to have various impacts on human health. Environment change has been positively related to human influences.A very important factor is rapid human population growth, which has been accompanied by enormous economic development and increasing sources of pollution such as vehicles and polluting industries. In some countries the unstoppable increase in human population growth and insufficient livestock has lead to deforestation and the people eat different types of bats, frogs, snakes, birds, and animals. COVID-19 is reported as a bat related epidemic originated there is danger for more inffections if people continue to eat this class of animals. Revealing exceedingly vulnerable populations to new pathogens by increased human relocation to previously isolated areas may bring together infectious diseases. Control of population growth verses food production is therefore very essential in this regard.Through our food production department we shall boast food and livestock department through countries and farmers organizations as per policies guiding this department.

Health Department

Will own & run hospitals to be source Income from Able families and Charity offering help to the needy for sustainability. This will include Buying & Constructing new hospitals hundreds of designs ready, Mobile health services, Base of all medical services to people, High referral and tutori al hospitals along with rural areas clinics and mobile health units. These hospitals will be Bases of all Medical special missions & disaster uptake of victims there have be en incidents of victims who cannot be admitted because nobody can secure them in prime hospitals.

SUPPORT OF Global ban on wildlife trade

The starting point of COVID-19 outbreak was Hunan seafood market, Wuhan, China. China has temporary put a ban on wildlife markets where animals such as c ivet, bat, wolf pup, pangolin etc. are kept alive in small cages while on sale. 60% of emerging transferable diseases originate from animals, and 70% of these are supposed to originate in wild animals. So, the unrestricted wildlife trade might enhance the risks of emerging new viruses. Many scientis ts have urged different countries to permanently ban the wildlife markets and trades. These actions would help to protect human lives from future pandemics like COVID -19. Therefore, considering the national security, biosafety, and public health, it is essential to globally ban wildlife markets and trades. We shall advocate through various countries that such banns can remain to avoid through our environmental and wildlife conservation department. Environment change is one of the biggest and most vital chall enges of the 21st century. In spite of all their efforts to restore the nature during the last few decades, humans could only move a few steps forward. But during the l ast few months, consequences of the pandemic have successfully recovered the environment to a large extent that should de finitely set positive impact on global climate change. Whatever be the cause or origin, the occurrence of COVID-19 has emphasized to improve the mutually-affective connection between humans and nature. At this point of time, it is indispensable to control the source of disease, cut off the transmission path, and use the existing drugs & means to control the progress of the disea se proactively. Like all the preceding disasters on the earth, let all be optimistic enough that, human beings will definitely win over the pandemic in due course of time, but they should know the limits to which they can thrust nature, before it is too late. We seek to support inniatiatives that will make our environment and reduce hum an and wildlife conservation.

Economic Empowerment & policies and COVID-19—Mitigate harm and plan for the future The direct cost that COVID-19 inflicts on human health is obviously its most important effect on society. But this direct cost can be worsened by flawed economic and policy structures. And the indirect damage the disease causes through economic ripple effects could be large, so policymakers in various countries should do everything they can to minimize them. Past decisions that have weakened economic policy infrastructure will hamper response to COVID-19; this is already baked into the cake. But there are some short-run ameliorative actions we can take that might help, and there are long-run policy changes that will aid our response to future epidemics. In technical economic terms, COVID-19 combines potential supply shocks with sector-specific demand shocks. Basically, supply shocks hamper our ability to produce goods and services, and demand shocks are sharp cutbacks in spending from households, businesses, or governments.

The supply shocks come from disrupted global value chains, as, for example, production countries of inputs used by U.S. manufacturing and construction firms are not delivered on time because Chinese factories have temporarily closed. In countries where schools are shut down for long periods of time, a shock to labor supply can occur as working parents have to stay home to care for kids. The potential sector-specific demand shock is to businesses where consumption is largely social—done with other people around. Think bars, restaurants, grocery stores, and malls. As people avoid social contact to minimize disease transmission, this leads to less activity in these sectors. These effects mean it will be hard indeed for policymakers to spare the economy any pain from this. There's very little that can be done about the supply-side shocks—particularly in the short run. Demand-side shocks are generally easier to address with policy (in theory—policymakers still often fumble the ball in this regard), but the specific nature of the demand shocks associated with COVID-19 make them slightly harder to address. Simply giving households more money is good but it is not sustainable and won't boost consumption much in the sectors likely to be affected—the pullback in consumption is not driven by income constraints, but due to concerns over catching the illness. This means that while traditional stimulus can be useful in keeping this sector-specific demand shock from spilling over to the economy more widely, it likely will not be able to completely neutralize the effects of this sector-specific shock. Helpers Of Africa International will seek to engage economic minds and think tanks to be thinking about as they wrestle with the economic effects of COVID-19 and (hopefully) think about the next epidemic? In the long run, the list is obvious.

Halt the steady downward trend of nondefense discretionary spending in the federal budget. This portion of the budget funds agencies like the Centers for Disease Control and Prevention (CDC) and the National Institutes of Health (NIH). Higher levels of this spending could also finance greater aid to states, including for public investments like universal high-speed broadband. This would allow many businesses to continue to operate during the next epidemic with many employees working remotely to avoid spreading the illness. Nondefense discretionary spending has been cut to the bone in recent decades, and the result is a less robust public health infrastructure. Advocate for gorvernments **health system to expand coverage and reduce cost.** Epidemics thrive on people being reluctant to obtain health care because of its financial burden. **Advocate for gorvernments to Reform unemployment insurance (UI).** The UI system provides income support to laid-off workers so that temporary spells of joblessness (like those caused by the cutback in social consumption and its spillover benefits) are less damaging. In recent years, cutbacks to Unemployment Insuarance generosity and eligibility have greatly weakened the readiness of the Unemployment Insuarance system for an economic shock.

Besides helping individual recipients, by supporting laid-off workers' incomes and consumption during their period of joblessness, Unemployement Insuarance keeps this initial shock from snowballing into a wider slowdown. But all of these options will take a long time to phase in and will likely miss the current COVID-19 epidemic.Advocacy for gorvernments to obtain an obscure provision in the law governing Medicare for governments to expand its coverage to anybody experiencing health costs due to pandemic

Gorvernments can pass measures to provide short-term cash payments to households. This could plug some (but likely not all) of the demand hole caused by the cutback of social consumption. These payments would yield the highest bang-for-buck if they are targeted at low- and moderate-income households. This means by definition that centering income tax cuts as a mechanism for this is the wrong approach.

Gorvernments could increase funds temporarily for short-time compensation (STC) benefits. STC benefits essentially make up the income difference for workers who have their hours of work reduced. Congress could provide a premium to STC benefits for the duration of the virus. This would encourage sectors exposed to the COVID-19 demand shock—like restaurants—to cut hours across the board rather than lay off workers. A number of states have decent existing infrastructure to allow this kind of work-sharing.

Gorverments could enact temporary payroll tax cuts (both to workers and to employers) and mandate temporary paid sick leave. Payroll tax cuts could provide demand stimulus generally but also give firms affected by the temporary cutback in spending some breathing room to pay bills during the demand slowdown. The employer-side payroll tax cut would help firms finance the week of mandated paid sick leave. As always, any temporary cut to payroll taxes must be accompanied by provisions to hold harmless the trust funds (Social Security and Medicare, most importantly) that these taxes finance.

The use of Gorverment Federal Reserve, even as their main instrument to boost demand (cutting interest rates) operates with a lag that is long enough to likely miss much of the epidemic's duration. Further, unlike fiscal policy responses, the Fed's tool really cannot be tailored or targeted in any way to alleviate particular distress. If a knock-on effect of the economic damage done by COVID-19 includes distress in the financial sector, then the Fed can usefully provide liquidity and other support to banks (in exchange for banks' forbearance in collecting debts from affected businesses).

Globally, the pandemic is still accelerating. But we know the pandemic is so much more than a health crisis. It's an economic crisis; a social crisis; and in many countries, a political crisis. Its effects will be felt for decades to come. Just as the pandemic has affected every sector, so the response must involve every sector. A whole-of-government and whole-of-society approach is essential, not only for defeating the pandemic, but for the recovery.

We shall seek to support WHO has been working day and night to coordinate the global response, provide evidence-based scientific and technical guidance, catalyze research and development, and provide direct support to countries most in need. We encourage countries to take a comprehensive approach, while maintaining essential health services. We shall work with governments and Health Stakeholders nationally and internationally to bring together experts to analyze the evolving evidence and strategic plans. We shall support international trials to find answers fast about how to address various segments of concern in various fronts.We shall support production of test kits and protective gear all around the world to be able to support the highly needy and desparate regions along with supporting of training of millions of health workers around the world through health stakeholders and acreditted institutions and also online learning platform.

We shall support tech companies to establish solutions on various fronts including communication and form global collaboration to accelerate the development, production, and equitable distribution of COVID-19 diagnostics, therapeutics and vaccines. No organization and no country can fight this pandemic alone. Only by working together will we overcome this global threat so we seek to mobilize more collaboration meetings. The greatest threat we face now is not the virus itself but other effects of socio economic domino back clashes through global solidarity in giving, response and global leadership we shall give more what Helpers Of Africa International seeks to offer.

Together, we must work to ensure the lessons of this pandemic and other world disasters is learned and the world never again finds itself unprepared. For far too long, the world cycle of panic, neglect and reactive not pro active. We throw money at an outbreaks and disasters, then do little to prevent the next one. Through our department of research and innovation we seek to sustainable solutions that affect the world on hunger, disease, security, poverty, technology, environment, conflicts and others. We seek to deal with current disasters aggressively and accurately as we equip the world on Preparedness is not a one-time investment. It's an ongoing investment in all sectors.

Helpers Of Africa International seeks to transform and strengthen the world not only to strengthen our ability to respond to world emergencies, but also to support countries to prepare through capacity building. Our mission Statement is Transforming the World through Charity, Empowerment and Development making ourselves more both reactive and pro active to prevent, detect and respond rapidly to world disasters through our Disaster response department in collaboration with world gorverrnments and like minded institutions & organization. When disasters hit the negative impact on lives, livelihoods and the global economy is a clear illustration that preparedness is not a cost, it's an investment, and that the worst thing of all is to do nothing. Health security and health systems are two sides of the same coin that needs to be handled together, A strong health system is a resilient health system. Many countries have managed to successfully control COVID-19, even without vaccines, by mobilising people to do contact tracing and other essential public health functions, and redeploying health workers from non-affected to affected areas. Good health is a political choice, strong health systems are the foundation of global health security, and of social and economic development. Now more than ever, we shall support all countries in our ability to make universal health coverage a priority. It's not a question of whether countries can afford to do this, it's a question of whether they can afford not to.

On Africa our seat of operation as Helpers Of Africa International & Helpers Of Africa International status of Covid is still real. **The** COVID-19 **crisis is affecting the entire world economy and that of Africa. Some key sectors of the African economy are already experiencing a slowdown and shutdowns as a result of the pandemic. Tourism, air transport, and the oil sector are visibly impacted. However, invisible impacts of COVID-19 are expected in 2020 regardless of the duration of the pandemic. By the grace of God only the spread is not as was predicted. Fortunately too African countries had earlier opportunity to see the effects of the virus in first nations and many leaders positioned themselves to be both reactive and pro active to respond and prevent.** The global economy is in a recession with the direct and indirect effects of the crisis (e.g. supply and demand shocks, commodity slump, fall in tourism arrivals a major foreign income streem for Africa, etc.). However, as the pandemic progresses slowly on the African continent, studies by international organizations have less addressed the economic impact and the spread of the virus has reached 50 African Union States showing no signs of slowing down. Africa, because of its openness to international trade and migration, is not immune to the harmful effects of COVID-19,

The double sided effects of Covid -19 are endogenous and exogenous. The **exogenous effects** come from direct trade links between affected partner continents such as Asia, Europe and the United States; tourism; the decline in remittances from African Diaspora; Foreign Direct Investm ent and Official Development Assistance; illicit financing flows and domestic financial market tightening, etc. The **endogenous effects** occur as a result of the rapid spread of the virus in many African countries. On one hand, they are linked to morbidity and mortality. On the other hand, they lead to a disruption of economic activities. This may cause, a decrease in domestic dem and in tax revenue due to the loss of oil and commodity prices coupled with an increase in public expenditure to safeguard human he alth and support economic activities.

It is important to assess the socio-economic impact of COVID-19 closely and periodically, although the pandemic is at a less advanced stage in Africa due to its lesser quantity of international migrants' arrivals relative to Asia, Europe, and North America, and strong precautionary measures in some African countries. African economies remain informal and very vulnerable to external shocks. Due to the difficulty of quantifying the real impact as a result of t he uncertainty, the rapidly evolving nature of the pandemic, and scarcity of the data and statistics of acuarate economic trends, the Helpers Of Africa International will seek to respond to various dimensions and faces to this crisis along with possible socio-economic repercussions.Both Africa and Nations of the world needs coordinated, predictable, transparent, broad-based and flexible funding to fully implement the International Health Regulations which we shall seek to support and your support. Africa and the world needs a step-change towards coordinated and capacitated data management, analytics and real-time communications. Africa and the world needs to fundamentally shift the atomized and uncoordinated mechanisms by which essential health commodities are managed. Africa and the world needs to support Global Health Emergency by WHO and other like minded institutions Stockpile for medical equipment and supplies, based on both physical stocks and a virtual Pandemic Supply Chain Network.

All countries must invest in their health workforce as the backbone of health systems and health security. A skilled workforce is the best defence for respo nding to outbreaks at national level, and for deploying internationally. Africa and the world urgently needs a coordinated approach to discover, develop and deliver effective and fit-for-purpose tools and technologies, such as vaccines, diagnostics and therapeutics. All countries must make universal health coverage a priority, built on strong health systems and the foundation of primary health care. Africa and the whole world is in desperate need of national unity and global solidarity. the pandemic has shown that we are humanity, one humanity, and none of us are safe until all of us are safe. This is a lesson that we must learn anew, and that we must learn together. Helpers Of Africa International remains committed to working with all countries to create the healthier, safer, fairer world that our children and grandchild ren deserve. The pandemic and other deseases are accelerating,The world is in a new and dangerous phase. Many people are understandably fed up with being at home. Countries are understandably eager to open up their societies and economies. But the virus is still spreading fast, it's still deadly, and most people are still vurnerable. We shall support and finance advocacy by nations and communities that call on all countries and all people to exercise extreme vigilance as per medical ad vices to Continue maintaining distance from others. Stay home for the sick, covering your nose and mouth when you cough. Wear a mask when appropriate cleaning of hands. We shall support nations to focus on the basics: find, isolate, test and care for every case. Trace and quarantine or encourage self quarantine all contacts.

As the pandemic gathers pace, All countries rich and poor have populations who are vulnerable to a higher risk of severe disease and death. We shall extend the care and support to Refugees who are particularly at risk of COVID-19 because they often have limited access to adequate shelter, water, nutrition, sanitation, and health services. Over 80 per cent of the world's refugees and nearly all the world's internally displaced people are hosted in low- and middle-income countries. This is a very real and present danger of widespread transmission of COVID-19 in refugee camps. Beyond the health threat posed by the virus, COVID-19 is also exposing many refugees to even more severe hardship.

A report published by the International Red Cross and Red Crescent Movement showed that a bout 70 percent of refugees surveyed in Turkey reported having lost their jobs since the start of the pandemic. We shall work in partnership with refugee organization and countries towards shared duty to do everything we can to prevent, detect and respond to transmission of COVID-19 among refugee populations. Through countries, organizations and Health departments we shall support Public health measures that reduce transmission of COVID-19 require strict and sustained implementation. This is difficult to achieve in refugee camps, where the public health situation is weak. We shall invest and support health care programs to safeguard the rights and well-being of refugees to promote health, keep the world safe and serve the vulnerable.

We shall partner and collaborate with organizatizations and gorvernments in countries, regions to strengthen and advance pub lic health services for the millions of forcibly displaced people around the world. COVID-19 and other infectious diseses has demonstrated that no one is safe until we're all safe. We shall support and finance many collaboration inniatiatives of countries and organizations to make a difference. Nations are most vulnerable when we are divided, but with solidarity and cooperation, we will overcome this pandemic, and be better prepared for the crises of the future like you partners, donors and well wishers o f Helpers Of Africa International have shown.

The refugee challenge beside Covid -19 is a strong focus of Helpers Of Africa International , One country in conflict zone of middle east has population 6 million people, of which 1.5 million are refugees There are also more than half a million migrant workers in one country. In partnership with Health organizations through our health department we shall establish mobile clinics, dispensaries and hospitals in major refugee camps across the world along with h ealth institutions and academies. We shall invest heavily in health care systems normative function to produce evidence-based guidance to deliver the impact in countries.

From this institutions that we shall establish world wide in partnership with gorvernments and global health providers / organizations we shall deliver online programs to rural areas and remote villages So we are reaching out to empower millions of health workers throughout the nations. We shall support Global Sustainable Development Goals in the years to come to help countries be on track to meet all of the health-related targets by revolutionizing health learning globally, while substantially increasing professional development in the Health Sector. Through our I T departments we seek to set u p state-of-the-art Online learning schools of health and other sectors to deliver high-quality, multi-lingual learning, both on-line and in-person, alongside a cutting-edge simulation centre for health emergencies. We aim to build one of the world's largest and most innovative digital learning platforms to enhance the competencies of a large number of humanitarian volunteers in he alth, disaster response, counsellors and professionals every year to support nations across the countries. This network of Instit utions, volunteers and online platforms will contribute to improving the speed, efficiency and effectiveness with which information gets to volunteers and workers to accelerate advancements in humanitarian medical care and practices to patients and communities for first aid and long term health goals.The online training platform for education, health, disaster responses , minist ry and charity will be a powerful professional development tool for the world to help Organizations and other workers / volunteers. Through this we shall raise "training the trainers" in entrepreneurship, health, empowerment and mentorship programs across the world. We shall draw pool of experts from the world to form a consorti um of advisors and experts in health, enterprenuership, economic, investment, development, charity and humanitarian networks of specialists. We will engage with regulatory authoriti es responsible for the accreditation and recognition of education, training and regulation of professional practice in the health, business, humanitarian, development and charity sectors in nations to develop an open certification scheme to recognize lifelong learning. We welcome the engagement of all Helpers Of Africa International donors, partners and investors to bring in ideas and networks of friends who can bring our vision of Charity, Empowerment and Development to fulfilment through our many exciting initiatives, which we believe will play a crucial role in achieving our shared mission to promote prosperity, empowerment , develo pment and health to keep the world safe and serve the vulnerable, by training hundreds of millions of volunteers ,health workers and development team of smart team of able res ponse team globally.

Thank you and God bless you for your interest in the Helpers Of Africa International vision, mission, projects and programs globally. The partners, contributors, donors and investors of this historic funds are experienced in diverse areas and we are open that you will bring in even out of the box and "crazy ideas" for making Helpers Of Africa International stronger through our 70 departments whose tentacles will spread through the world to implement many projects and programs to the welfare of humanity and nations. Your contribution in finances and Ideas will ensure Helpers Of Africa International will support and invest heavily in the world normative function to produce evidence-based guidance in all projects and programs through disseminating knowledge and evidence even more urgent.

We shall develop cirriculums and forums in institutions based along with online training, capacity building , coaching and mentorship to impact all our depar tments and areas that affect humanity globally including the empowerment of women, youth, men, those living with Disability, health, disaster response , education impacting charity, empowerment and development globally. This empowerment will be done in various launguages and platforms of meetings and exist ing networks from grassroots to

National level. Our experience and thoughts put in to packaging of this vision and by the grace of God provides powerful proo f of concept for implementation of our vision and mission through various projects and programs.
As Helpers Of Africa International we seek to caution the socio-economic implications of the coronavirus pandemic (COVID-19) and diseases to the world economy, focusing on **primary sectors** which include industries involved in the extraction of raw materials, **secondary sectors** involved in the production of finished products and **tertiary sectors** including all service provision industries.

In Agriculture - The resilience of the agricultural sector has been tested by the COVID-19 outbreak. A global crash in demand from hotels and restaurants has seen prices of agricultural commodities drop by 20% . Countries around the world have imposed a number of protective measures to contain the exponentially increasing spread. This includes social distancing, avoiding unnecessary travel, and a ban on congregations. Advice on self-isolation upon contact with suspected carriers of thevirus is likely to impact the number of available inspectors and delivery staff critical to ensuring verification and transportation of products. This will have pronounced implications for perishable goods such as meat and vegetables. Furthermore, markets have gone a step further by shutting down floor trading wh ich has impacted the ability to exchange commodities including 'Panic buying' is further complicating shortages beyond supermarket shelves. We shall work with various gorvernments and relevant national and global organizations in agriculture to stabilize the agriculture sector which is key through our food production department.

In Petroleum & oil industry, Our Survey and reports indicate many meetings have been done by Petroleum Exporting Countries to stabilize production and prises of Oil and petroleum products. As we work with countries and organizations to control the spread of virus and deceleration in the number of COVID-related deaths and other diseases, this will stabilise oil prices, there is still much uncertainty that will destroy this sector. Many of our partners & donors in Helpers Of Africa International so we are very keen to ensure that the revenue streems from this sector is maintained so that you can give more and keep the stability of this bank for generations.
On the background of a viral outbreak already dampening the demand for oil, this oil-price war is predicted to have grave implications for the global economy. In more ordinary times, cheap oil may have functioned as an advantage for economies but a set back on producers and stakeholders . However, savings on petrol are unlikely to be redirected into more spending as populations are instructed to practise social distancing and the working class are uncertain about job security. Furthermore, any increase to consumer activity is likely to be outweighed by damage caused to populations reliant on revenue from other forms of energy. Ideas of having and supporting more exploration of oil, harvesting, setting up more refineries to reduce transportion cost and logistics to consumers are being considered through your advice and networks.
We shall work with various gorvernments and relevant national and global organizations in mining and oil to stabilize this sector which is key through mining and oil production department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.
Mining, Technology, Value additions & Marketing Support Department

Africa is endured with Trillions of dollars worth unexploited minerals and on top people dying in poverty. Over 100 types minerals in some regions totally. We seek to Fund & Conduct Geo-survey in Mineral potential areas to verify quality and quantities as basis of planning for potential industrial sites. In Kenya we have the first 7 regions, Providing funding for mining licenses by packaging lands into mining concessions, Providing Machinery /Skills & Technology to boast mining production, Providing International markets for mineral good prices, Improving welfare of miners housing/ schools/ vehicles, hospitals as a win win situation . This will be revolving funds since we project big incomes from Joint venture projects. We have reports of all mineral potential nations and areas 2000 page report done and like Kenya, Congo, Zambia mines that do potential need above. Establishing Industrial Parks & Mining Cities in this Regions for

In Manufacturing industry and sector, Our Survey and reports indicate that COVID-19 is impacting negatively on manufacturing businesses in the world in a decline in turnover as a ripple effect of business operations and consumer markets. Importation challenges and staffing deficiencies stood out as the key concerns for businesses due to disruption to supply chains and self-isolation policies. Indeed, for many roles within a manufacturing company, 'working from home' is not a viable option. Helpers Of Africa International will promote protective measures to the rest of the world, and due to the global overlap of supply chains and protect these anxieties to transcend borders. We seek to support main industries and manufacturers with short term and long term loans to protect them from collapse since many of them were functional, profitable, useful and still have this potential just need bridging. This will be done through Stimulus loan to gorvernments, organizations of industries and manufacturers in various countries along with direct engagement and evaluation through the bank directly for mega players. Industries and Manufacturers provide products needed for livelihoods along with Jobs for many we cannot watch this sectors collapse in our nations helplessly without offering a hand to sustain lives, livelihoods and valuable sector. We shall work with various gorvernments and relevant national and global organizations in manufacturing and industries to stabilize this sector which is key through our industries development department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.

Industries department

Will create a platform of Job Creation & Job training platform for school leavers, Job seekers, Production and Service providers in various sector improving welfare/ livelihood/ utilization of resources/ opening up closed up communities, Forster International & regional corporations, Boasting Foreign Exchange, Access to Markets & goods, Infrastructure around region, Opening regions for settlement & trade Hub among many other benefits.

In Education, COVID-19 has affected all levels of the education system, from pre-school to tertiary education. Different countries have introduced various policies, ranging from complete closure of schools in many nations. UNESCO estimates that close to 900 million learners have been affected by the closure of educational institutions. So most of those schools that have kept learning are through online programs such as zoom etc. This has activated the urgency of Helpers Of Africa International vision of extension of education through technology by availing technical Gargets I Pads to students in Especially in Africa and in partnership with Mobile and communication companies to spread affordable Wifi networks across the world to ensure such learning would still continue even after the pandemic to facilitate distant learning. Retraining of teachers through resfresher coarses is crucial to effectively administer such is crucial learning services to ensure that technology would boast the stardards of learning not to lower the stardards.

This pandemic has brought this matter of online learning a reality which previously was far fetched idea and Helpers Of Africa International will work with governments to finance this ventures in countries some of this will be in term of education loans to high end schools and donations to low end public schools that cannot afford such essential services. Education, health, Shelter and food are the greatest investment that governments and donors should give as a top priority to shape the world in this and coming generations. This pandemic and others in future should not collapse this sector in the world. Your support in this vision will keep over 1 billion students learning and position them for career, jobs, valueable values, esteem, and status as we shape and raise a generation of future champions.

Through our education department we shall support educations through gorvernments and direct engagements of schools ensure no Orphans / Vulnerable and needy children are denied the opportunity for studies ensuring they receive all basics uniform, books and school fees from Pre- School primary, Secondary, College University in our schools and others through this program. Our network of Children Homes/ Special schools, community leaders, religious institutions provide bases for such evaluation and selection of needy children to benefit from this project and programs.

Education & Training for religious institutions & Community leaders department .Through Building of Universities & Vocational Colleges hundreds of designs ready and land available in various Towns and counties across the country extending to the continents. We shall also continue to do short refresher courses which we have experienced a very big impact of empowering thousands of community leaders and religious leaders who are impacting the community in various spheres of socio-economic fronts to be the gate keepers and agents of sustainable development for our valuable projects and others

Through our Education & Schools Department This department will buy and build and run well built and furnished Primary, Secondary, Colleges, and Universities. We have envisioned buying and constructing schools to both bring income from able learners and establish bursaries to sponsor needy children in a sustainable structure. We shall also use these facilities for our Special missions, Distribution or relief, feeding programs, sports, training, sports, talents centers, community programs, partners and stakeholders. These schools will also bursaries to needy children, orphans and Vulnerable students at all levels. It will also run and support governments in informal education programs for adults, special education and research support throughout Africa . We have been actively involved in empowerment in education through informal sector adult literacy classes, life skills mentorship and coaching, leadership training in all sectors etc. With your partnership many life champions will be raised in professional, talents and business sector.

Through Children Homes & Special schools Empowerment department , This department will be hosting Good Samaritan Festival National and County events to bring together the Nation and people for Charity to minister to the needy. Under this department also we have programs to support children homes & Special Institutions on child protection, stigma reduction, parenting, personalized counseling , adoptions , immunization, proper nutrition, home based care, birth registrations, clothing, forester care, child development child rights, life skills program, protection from early marriages, protection from female genital mutilation, prevention from sexually transmitted diseases, psycho-social support, sanitary ware to children, education for all orphans and Vulnerable, vocational training, prevention from infection including H.I.V, Supportive intervention, access to health facilities and medicine, Sanitary towers , Support Community Based responses, coordination & structures, legal aid, related institutional support, discrimination stigma, good governance, transparency, care, mosquito nets, income generation activities, succession planning, reintegration of children back to community, bursary funds, HIV/ Fund, school enrollment, School Uniforms & Stationery, Safe water access, water harvesting, Sanitation, Teachers Training, empowering Social welfare service providers, monitoring and evaluation and many more , vacation to provide Holidays, Career & Vocation, Education trips, equipping, mentorship, feeding, clothing, facilitation, Bursaries, Children rights along with supporting equipping and empowering schools with furniture, computers, beds, TVs, Radios, Libraries, Dining halls, sound equipments, Books and school uniforms. This very valuable department expected to impact millions of Vulnerable children through our network to be champions in all areas of life in partnership and network with schools.

Still on Education The closures have had widespread socioeconomic implications, COVID-19 has had an impact on social mobility whereby schools are no longer able to provide free school meals for children from low-income families, social isolation and school dropout rates. It has also had a significant impact on childcare costs for families with young children therefore feeding programs will be vital that will be administered through our Food and disaster management department. Additionally, there exists a wide disparity amongst populations with a higher income who are able to access technology that can ensure education continues digitally during social isolation through our IT department we shall support and partner with IT companies to extend technology where we can.

Priority of COVID-19 has also influenced the tertiary sector. As well as the impact on undergraduate education, the most significant impact is on the postgraduate research community with research into many non-COVID related topics being placed on hold. The national funding body for health research has halted all non-COVID research in order to allow clinically trained staff who are normally on academic secondments to return to the frontline. In the United States, similar action has been taken by the National Institute for Health to shut down all non-critical research in order to free up staff and resources for 'mission-critical' research. Outside of the healthcare research setting, several institutions have put research in fields such as the humanities and social sciences. We seek to support the research of Vacine and medication along with expanding health research system to ensure other diseases are attended to. Additionally, concerns have been raised regarding the number of scientific conferences that have been cancelled or postponed. These conferences are the key to scientific research in many disciplines, allowing dissemination of research as well as providing networking opportunities for collaboration and job-seeking. Many conferences have moved online, however these 'virtual conferences' are often not as amenable to networking and informal means of scientific communication. We shall work with various gorvernments and relevant national and global organizations in education sector to stabilize this sector which is key through our Education department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.

On financial industry COVID-19 has affected communities, businesses and organisations globally, inadvertently affecting the financial markets and the global economy. Uncoordinated governmental responses and lockdowns have led to a disruption in the supply chain. Lockdown restrictions significantly reduced the production of goods from factories, while quarantine and self-isolation policies decreased consumption, demand and utilisation of products and services. As COVID-19 has progressed to affect the world, Helpers Of Africa International will support recoverly of economy at National and International levels faster than through coordinated, regulated and strategic stimulus plans, strengthening trade negotiating power, stock market floatations, supporting revival of supply chains and support of the capital market sector. The decline in global stock markets has festered a volatile environment with critical liquidity levels. Helpers Of Africa International will work towards supporting stock markets against collapse that we seek to help float. Helpers Of Africa International will combat these effects by supporting Central banks globally to intervene to ensure liquidity is maintained and mitigate the economic shock, with several leaders embarking on a 'Whatever it takes' approach. Our research has shown that this responds worked to restore economies in past resessions and collapses mainly after Second World War eras where public sector liabilities rose greatly. Bond markets could have difficulties in coping with large scale government bond issuance and that central banks may have to intervene by purchasing these bonds on an unprecedented scale as Helpers Of Africa International supports the Central banks on loans to gorvernments.

Helpers Of Africa International will set apart huge rescue package in an attempt to dampen the economic effects of COVID-19 in the Nations of the world through Central banks with recommendations of partners and evaluation of integrity, credibility and credit rating of Nations. We shall also seek to sustain economies through asset-purchase programme with an aim of stabilising and strengthening thro investment fund to help nations to have relaxed policy on budget rules to encourage public spending and the support of affected businesses by corresponding governments through Central Banks. We shall provide loans to aid companies affected by the pandemic, dubbed Kingdom Revival scheme to help support businesses directly and others through gorvernments.

We shall work through Gorvernment and also directly through organizations to access Emergency loan guarantees SCHEME to help nations and global companies in financial difficulty. We shall also set apart huge amount for fiscal support to save mega global businesses phase 1 then phase 2 national companies through gorvernments. The gorvernments and central banks in various countries will be encouraged and required to package various business salvaing schemes to be extended to needy and profitable businesses to extend Job Retention Schemes, Relief of VAT and Income Tax payments, Statutory Sick Pay relief package for SMEs (Small and Medium sized Enterprises), business rates holiday for all retail, hospitality, leisure / nursery businesses, Small business grant funding & relief or rural rate relief, loans for corporations, funding for retail,The Coronavirus Business Interruption Loan Scheme, Bridging and support revolving scheme,

Helpers Of Africa International will further aid the market by purchasing bonds investing Asset Backed Loan to support economies of Nations through these times, Structured revolving Unemployment compensation, loan insuarance and guarantees schemes, Extension of Student loan, Mortgage Extension Schemes, Basic Needs Humanitarian sponse (rents, food, Healthcare Schemes / programs), Farmers Loan Support, Maintain bank liquidity, Credible research and reports from various economic crisis experts and analysits show the crisis and recoverly will take the form of a 'V' shaped curve, with a sharp and short-lived dip, followed by a rapid recovery and economic growth and other say the road to economic recovery is more likely to resemble a 'U' shaped curve, with a prolonged period of economic inactivity for years to come as Helpers Of Africa International we are prepared to support and work with countries Nations either way. Our Concerned departments Banking & Micro Finance department- We seek to establish a Bank to provide savings and loans to millions that we have trained on business and to provide a financial base for all the funds for the projects that we shall be undertaking. We have full proposal, trained personnel then through the funds fulfill the deposits needed a full proposal, personnel and networks in place for Ufalme Capital meaning Helpers Of Africa International already registered. We shall work with various gorvernments and relevant national and global organizations in Finance sector to stabilize this sector which is key through our Global Branches and Finance department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.

Our Support towards pharmaceutical industries & Healthcare will be a strong focus in our budget allocation. The COVID-19 pandemic has caused an unprecedented challenge for healthcare systems worldwide. In particular, the risk to healthcare workers is one of the greatest vulnerabilities of healthcare systems worldwide. Considering most healthcare workers are unable to work remotely, strategies including the early deployment of viral testing for asymptomatic and/or frontline healthcare staff is imperative. High healthcare costs, shortages of protective equipment including N95 face masks, and low numbers of ICU beds and ventilators have ultimately exposed weaknesses in the delivery of patient care. Globally there is concern regarding uninsured individuals, who may work in jobs predisposing them to viral infection which may lead to significant financial consequences in the event of illness.Profound changes to the dynamics of healthcare are likely to ensue, leading to massive investment into disease prevention infrastructure, and the accelerated digital transformation of healthcare delivery. Strong healthcare policy and clinical management as new evidence emerges. Active pharmaceutical ingredients are imported largely from Asia (31%), (26%) Europe. Production has slowed down due to supply chains interruption, slow-downs and limitations in supply inadvertently leading to revenue loss and risk of defficificency of medicine and equipment to handle other sicknesses. Helpers Of Africa International will work towards activating supply chain deficeints in freight companies, mining and outsourcing all ingredients. Challenge and Opportunities for companies engaged in vaccine and drug development have simultaneously emerged. Helpers Of Africa International will support and finance collaborative plans to develop a viral vaccine in clinical trial evaluating and investigations COVID-19 vaccine is currently underway.

On Hospitality, tourism and Aviation

The hospitality and travel industry have perhaps been most hard-hit, with hourly workers facing potentially devastating hardships. Millions of workers are retrenched, laid off or compulsory leaves to ease the budgets. Bridging revolving loans will be necessary worldwide to preserve money and to maintain flexibility “in light of uncertainty in the global markets”. Hotel industry revenue has fallen to lowest ever globally due to travel challenges, restrictions and lock downs. The COVID-19 crisis has led to international distortions for the hospitality industry, and significant slumps for the Global hotel market. The tourism sector is currently one of the hardest-hit by the outbreak of COVID-19, with impacts on both travel supply and demand. As a direct consequence of COVID-19, The World Travel and Tourism Council has warned that 50 million jobs in the global travel and tourism sector may be at risk yet one of the most potential.

The Aviation, travel & Hospitality industry is grappling with an unprecedented wave of cancellations and a significant drop in demand amid strict governmental instructions to implement social distancing and the restriction of unnecessary travel. Globally, border closures are on the rise. Through our Hospitality department we have highlighted the need to implement urgent measures with various gorvernments and organizations. These include temporary state aid for the tourism and travel sector from national governments as well as fast and easy access to short- and medium-term loans to overcome liquidity shortages, mentainance and Unemployment Reinsurance Scheme. Stigma reduction advocacy and campaigns needs to be activated globally with hospitalities protocals well defined cohesively, professionally and in simplicity. Cordinated controls of opening borders is important to keep infections low and manageable there Global Networking is paramount and necessary. Helpers Of Africa International will fund and invest in such summits and networking to activate this sector. Many Airlines are grounded but yet profitable just needs activation and stimulations to take off through emergency bailouts to prevent a widespread shutdowns. Strategic economically viable plans are necessary to ensure the decisions on routes, destinations, marketing, operation and maintaince are well evaluated before funding to ensure that more money is not lost in the process of activations in this valuable yet sensitive industry. We shall support and collorganizations such us AITA and

Hospitality And Conferencing Department

We have envisioned buying & building hotels, lodges, conference and conventional centers. This is both for income & hosting our many conferences, Festivals mentorships and all stake holders of our programs above including hosting orphans and Vulnerable Children for vocational along with hosting our local and international guests & donors/ partners, facilitators in various strategic locations. We shall also promote Africa's tourism is the biggest asset of Africa natural heritage to promote Africa as a tourist and investors destination highlighting the sounds, sights and hospitality of Africa. This will create more Jobs, improve infrastructure, trade for suppliers and stakeholders, foreign currency exchange, enterprise development, international relationship, and boost economy. The Visionary of Helpers Of Africa International Dr Luke has produced a book Dubbed Kenya the Dreamland to tour and invest which has invited many tourists and investors to Kenya. We have seen the potential of promotion of this sector especially through our vast networks more missionaries, investors and tourist visit. We shall work with various gorvernments and relevant national and global organizations in hospitality, aviation and travel sector to stabilize this sector which is key through our Global Branches and Finance department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.

The real estate industry is facing great uncertainty due to COVID-19. At an individual level, social distancing precautions have reduced house views, a key part of the selling process, and both buyers and sellers are having to reconsider their plans. Increasingly, sellers are looking for reassurance regarding the health of potential buyers coming to view properties [84]. Some brokers are offering house tours via Skype and FaceTime to minimise the risk of infection propagation. Brokers around the world are also asking potential buyers to preregister for viewings in order to gauge their level of interest and likelihood of purchase. Additionally, thousands of workers around the world have been made redundant or have been placed on temporary, unpaid leave of absence. Inevitably this will have a significant impact on individuals' abilities to pay rent, mortgages and various household expenditures. Banks need to be empowered with liquidty for Mortgage lenders to avoid meltdowns and not bringing transactions to a halt. Many are worried that the world may face another financial crisis, similar to that of 2008 that will impact confidence in real estate. Banks have begun to take precautions and lenders require up to 40% deposits for a new mortgage to be approved. It is however too early to speculate on long treads term but Helpers Of Africa International will be seeking intervention in this sector to ensure sustainability of housing and real estate market. Cities & Real Estate building Department, This department will provide housing and infrastructure development to package cities. We seek to be involved in building cities & housing in thousands of locations in various nations identified with many design concepts in place. This will generate Jobs, Infrastructure, Capital formation, Increase in trade; improve security, Poverty eradication, enterprise development, utilization of resources, career development. Slums upgrade and eradication through electrification, sanitations, water, infrastructure, education and healthcare projects and programs. Hundreds of Housing designs ready and need assessments done to begin. Profit making real estate ventures also packaged Kenya & African countries have big housing deficit of millions. We have vision to build and provide mortgages for sustainability not just free housing. Some will be based on Industrial concepts because of minerals surrounding, while others based on tourism potential and agriculture and livestock. We have ready 7 cities ready to kick off Taita International Mining and Industrial City, Turkana Industrial Park, Runda Dream City, Seven City, Champions City and many more. I the President I am a professional and consultant in architectural designs, building and civil engineering with a lot of experience in project management from childhood. Alongside Promote Solar energy generation throughout the continents it is cost effective. We shall work with various gorvernments and relevant national and global organizations in Real Estate sector to stabilize this sector which is key through our Global Branches and Cities and real estate department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.

Sports industry COVID-19 is having a substantial impact on sporting schedules as some of the world's largest sporting events have been postponed and Football's, basket ball , clicket, motor sports and many others are hosted without spectators reducing revenues of clubs reducing incomes to sports men & women. Grand Prix, golf, tennis, athletics, basketball, rugby, cycling, boxing, snooker and ice-skating fixtures have all faced cancellations and delays in an attempt to curb the spread of disease. Inevitably this will have a significant financial burden, the gravity of which has yet to come to light. Helpers Of Africa International will support activation of this fixtures to avoid collapse of sports sector that creates livelihood for many and Jobs along with refreshment and entertainment through games and sports. We see the value of this sector to be kept going to uphold current talents & future of our youth and future generations.

Through Rehabs, talent & sports centres department, We have hundreds of ready designs of rehabilitation centers, talent and sports centers that we envision to buy and build. These centers shall be established & run as also for orphans, Vulnerable children, community / business leaders and all groups we are dealing with for recreation, training, team building and vacations. Through this facilities and programs we envision being able to identify and develop in talents in all sports, athletics, movie, art, Music, Crafts, Public Speaking, bykes and motor sports speaking and many more sectors. We have hundred of design concepts of these centers and identified lands in various places with successful team in many sectors to raise champions in all this areas impacting millions in our region of operations. This will include hosting and supporting talent exhibitions in schools, colleges, university, among children homes and specials schools along with reaching out to community youth, women and men in various settings. Africa has a lot of talents in sports as you have seen especially Kenya in athletics. We have been having mentorship programs to motivate many in talents and sports. We have ready designs for athletics and sports stadiums, film production to get products for media houses, motor sports, games. Countries like Nigeria, South Africa, are now great models of how big this sector can become offering Jobs, Capital formation, sustainable infrastructure development and improving livelihood of the people especially youth preventing them from crime through positive and valuable occupation. **We shall work with various gorvernments and relevant national and global organizations in sports, games & talent sector to stabilize this sector which is key through our Global Branches in sports and talents department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.**

Information technology, media, research & development,

IT firms have expanded greatly With this pandemic because of use of IT solutions for teaching, learning, conferencing, meetings and entertainment / travel. This new normal and culture has actually introduced a new demention of doing business though affecting the emotional effects and interaction in all this but has also shown the need for investing and supporting IT, Communication and Media avenues Televison, Radio, Tele-Communication, social media that should be supported for keeping the world going. Helpers Of Africa International will invest and partner with many players in this sector for humanitarian and business purposes to establish this sector to make it affordable and easily accessessible.

On research we shall support and fund creadible research of vaccines along with cost effective production of medicine across the world to make it accessible to all. The research is not only in Medicine but in Technology, manufacturing and other sectors that require innovation and creativity through our department. COVID-19 has left several hospitals in turmoil, having reached maximal capacity. As a result, various countries are turning towards technological solutions, to care for patients and at the same time, minimise the risk of person to person transmission. In various countries, tele-response bots powered by fifth-generation wireless networks are being utilised that allow health care staff to communicate with patients, monitor their health and deliver medical supplies. Drones that deliver medication and work-from-home apps are also being adopted. Automation of services has been a major goal for many countries. COVID-19 has helped to accelerate uptake and has taken the world one step closer to accepting technology and openness to innovation.

The demand for respiratory ventilators has skyrocketed due to the outbreak of COVID-19. However, it is clear that the current supply across the nations does not meet demand. Governments around the world are attempting to buy ventilators and other medical equipments. We shall seek to support companies that have potential to divert or diversify to professionally as per WHO stardards to produce medical equipment and accessories along with medicines.

In Food sector, The food sector, including food distribution and retailing, has been put under strain as a result of people panic-buying and stockpiling food. This has led to increased concerns about shortages of food products such as long-life milk, pasta, rice and tinned vegetables. Panic-buying has resulted in an increase of billions worth of food in homes. This high demand on food products has also affected online food delivery. Companies are struggling with excessive bookings, with deliveries arriving late or not at all. Moreover, food banks have also been affected by panic-buying and food stockpiling as donations have reduced. Concerns about food running out also means that vulnerable populations who can not afford to stockpile, may not find food.

In response to these concerns, the Helpers Of Africa International will promote through governments on food production and security globally along with supporting establishing supply chains that can provide certain populations with food parcels and free meals to collect and take home through our Food department and disaster management departments working through various gorvernments and organizations. These populations include high-risk vulnerable individuals such as the elderly who have no support network, and school children of low-income families.

We shall advocates that governments reduce restrictions on delivery hours for retailers in order to allow stores to restock with basic food products. Food production and security can be high but supply chains and networks through poor infrastructure access roads etc hinder the flow from source to consumers. Therefore besides food production infrastructure especially in economically low nations is an important factor that will be supported in partnership with gorvernments to improve infrastructure in affordable loans, grants and joint venture packaged infrastructure projects through our department and collaborations.

Food management and equitable distribution networking is key. Helpers Of Africa International will support of training of traders through gorvernments and organizations in various on humanitarian approach especially during disasters to educate society and community such as restricting the amount of each product that an individual can buy, providing more new jobs to meet the high pressure of restocking shelves, and setting special shopping hours for the elderly, vulnerable populations, health workers, volunteers, disaster management staff. Further changes that we shall advocate balancing well between the range of products being made by manufacturers, grown and other avenues with the aim of focusing on products that are in greater need.

Food Production department

Seeks to boast food production by owning model farm & livestock to produce own food for our Charity programs, Disaster relief, Improve health and livelihood Owning our lands for farming, poultry, livestock for donations & income to support charity programs. We shall also venture in advising farmers on better productive skills, support research and advisory support services to ensure better utilization for land use for appropriate crops and livestock to boast production. We have identified model farms to acquire for this including horticulture, floriculture and all manner of cash & food crops.

Gorvernments have also to educate Independent supermarkets on humanitarian responses by educating on how to deal with high demand on food products, Measures implemented including free delivery of food products to customers to avoid panic-buying, putting restrictions on the number of customers allowed in at any given time to avoid overcrowding, and expanding on the number of suppliers whom they buy their products from to avoid food shortage etc. Although supermarkets have seen a huge demand on food products, restaurants and cafes have been forced to close. As a result, many of these stores are at risk of permanent closure and many of their employees have lost their jobs. The security of people cooking at home has increased many restaurants are turning to shops as business transformational shifts.

Through Disaster & Relief administration department. This department in this Covid pandemic and beyond will be involved with administration of help inform food / Clothes/ Tents/ Water / Medicine in disaster and draught, regions along with resettlement programs in areas affected by war, floods, famine, draught, fires slums and having teams ready and facilitated Staff & Volunteers to handle all kinds of disasters. We have capacity and strong smart team of logistics network to operate in the Nation of Kenya Africa, Asia other nations through support through the various embassies and regional directors across the world.

Through Care for Elderly Department, We seek to ensure the neglected elderly people are cared for and live in a life of honor to bless the coming generations. We conducted a Honor event for Spiritual Fathers and Mothers of Kenya and there was a great release of Gods blessings in the land. We have also been conducting this advocacy for the young to take care of there parents and Grandies to establish the blessings of long life as the bible commands us to do so. We have a vision of building homes to care for this people including freedom fighters some who are homeless and many who have served communities along with honoring them to depart gracefully from this life when God calls them home blessing the land and coming generations.

Welfare of Community Leaders department.
When you empower the leader's socio economic status you are empowering him to be stable to be a blessing to others. We seek to disburse support in training leaders on entrepreneurship and empower them with ideas of income generation, business plan writing, carrying out feasibility and launch them to business start ups with repayable loans to create sustainable income for socio economic welfare for families and to be empowered to lead various churches, community groups with ease and without stress. This will be a strong base to aid them manage payment of home loans, education fund for their children, mobility project to loan for purchase of motorbikes and cars according to each economic status to repay to sustain a revolving fund. This can be achieved in groups since through our training we were able to cluster many into groups and units.

Outreach & advocacy Missions department,
We have a strong focus to engage & support existing valuable missions some can be seasonal depending on current needs in the community and some continuous. Such programs include advocacy program on Health campaigns, HIV reduction and stigma reduction, Peace campaigns in war torn regions, Conflict resolutions. Other missions include Prayer, Good news campaigns/ festivals / conferences Seminars, Festivals on Peace & integration and caravans

Media Ministry & Missions department,
Establishing Media stations TV/ Radio/ Print & publications that provides positive virtues to community in Mentorship, Education on all spheres, Entrepreneurship, Empowerment, Positive advocacy, Publicity of our programs, Guidance & Counseling. We have smart teams of professional personnel to roll out strong media across Africa, Asia & Middle East to become the platform of promotion of our projects and programs across the designated regions. We have set teams to roll out this across Africa and Asia along with supporting the existing organizations that have similar virtues and vision.

Special missions department,

We have engaged with many fruitful special missions for sometimes on peace building, gospel, Talents and we seek to do much more in mobile and stationed projects which including Mobile education video programs for communities, Mobile Libraries, Mobile Clinic, Rotational or stationed IT Computers training to Schools, running and sponsoring Sports & Talent search & competitions, Community Tournaments, Promotion Sports & Talents in Schools colleges / university, Sourcing for Potential businesses to fund, Free medical checks & vaccination programs, Research for solutions on various community challenges on medical such us jigger infection in communities, Pest control, & many more. Under the Special missions we are open

Family dynamics: domestic violence & home video-gaming

Lockdown and social distancing measures to prevent spread of COVID-19 have heightened fears of increasing levels of domestic violence, which includes physical, emotional and sexual abuse. Some domestic abuse charities have reported a 25% increase in calls made to its helpline since lockdown measures were announced. The concentrated time spent in lockdown means that vulnerable people are more exposed to abuse and it is more difficult for them to seek help. In response to increasing concern, some governments have published guidelines on how to recognise domestic abuse, how to report it and where, with a list of all the services available along with how to manage stress. Helpers Of Africa International will seek to support publications, raise more counselors and volunteers along with stress reduction facilities in communities that can go beyond this pademics because this are social problems that exist normally but activated by stress of environment and status.

In addition, a significant impact of the COVID-19 pandemic has been seen within the video-gaming industry. With many individuals self-isolating and/or remaining home under strict governmental regulations, online gaming has seen the emergence of record numbers of players, which has facilitated a boost in revenue for many companies. Conversely, negative impacts include cancellation of the annual and major trade event

Youth, Men & Women Empowerment Department

Designated to offer packaged programs for the cluster of Youth, Men & Women highlighting Education for all, IT skills, Career, Entrepreneurship, Family matters, Parenting Skills, Life Skills, Gender Issues, Financial Empowerment, Serving Others & Patriotism, Joint Sports & Team building , Life Coaching and other empowerment and mentorship programs .

Slum Upgrade & Eradication Department.

This department in this pandemic and beyond will seek to offer shelter for many helpless and upgrade the livehoods of in poverty in many countries especially many have been rendered homeless and oppressed further due to lose of jobs .Many Slums exist because of poverty our business seminar training on entrepreneurship will target slums as one of the areas of focus to empower people for business start ups and development. Some slum don't have reconstruction structure because of Land ownership being so you can only upgrade the houses to better Semi permanent and provide water, electricity, sewerage and infrastructure along with establishing structured trade centers to provide for more business facilities, jobs and improve the livelihood of the people. Entrepreneurship training, Micro financing to school drop outs & Job seekers to stimulate self employment. This will reduce poverty and crime. Many seminars that were done have been fruitful.

Job Creation Companies department.

We have registered and ready business plans for hundreds of companies that will established model companies in all sectors for people to learn and offer Job opportunities and Job exposure to school leavers as per website with over 1000 business ideas & opportunities and over 100 registered already this will work alongside Entrepreneurship innovation department thinking / research centers for entrepreneurship opportunities in town and rural areas to fund like Maasai handcrafts, Water projects, Women groups, Fruits companies, Milk plants for livestock, Leather yards for skins, etc Conducting feasibility of new products then fund to begin and employ. We believe The best services and products are to yet to come initiatives in AFRICA, Asia, Middle East and the Rest of the world.

Training curriculums all set. Business start up & development financing structures all set, for men, women and youth empowerment. Catherine Mwangi also a visionary of helpers for Africa is qualified banker to manage micro finance project along with partnerships with those institutions on the ground in slums to boost their capital base to activate rending capacity.
Charity Buses department, We are acquiring 200 buses to be in our custody in Kenya phase 1 to serve 1000 children homes & special schools for holidays , education trip as many children have never had to tour local holiday centers and hotels for education and vacation. These buses will also serve our other missions, programs and projects also like minded institutions / projects. The launch of the Champions Chariots will be on 23rd June in the Good Samaritan Festival at Kasarani as we commission containers for food to various children homes and hunger stricken regions.

With fears of a new recession and financial collapse, times like these call for resilient and strong leadership in healthcare, business, government and wider society. Immediate relief measures need to be implemented and adjusted for those that may fall through the cracks. Medium and longer term planning is needed to re-balance and re-energise the economy following this crisis. A broad socioeconomic development plan including sector by sector plans and an ecosystem that encourages entrepreneurship is also needed so that those with robust and sustainable business models can flourish. It is prudent that governments and financial institutions constantly re-assess and re-evaluate the state of play and ensure that the '*whatever it takes*' promise is truly delivered.

Water & Sanitation department. This department in this Pademic season and beyond will seek to address Africa biggest challenge of access to safe water is a big challenge in Africa annually claiming innocent lives of millions of people and livestock. Amazingly research has shown existence of huge water aquifers that exist underground that can be accessed by digging boreholes and through seasonal floods harvest water. Trillions of litres of water trickle down from water catchment hills through rivers, lakes to the sea. We seek to drill Boreholes and establish reserves along with spot treatment points and plants, Construct Dams for water harvesting to harvest water as reserves for dry seasons, Revive water catchment areas reforestation areas that have been depleted some are private and others with government partnership. Other communities have access to rivers and lakes but no water treatment plants so that exposes communities to diseases. We have envisioned establishing of water treatment plants in partnership with communities and local government also renewing the ancient technologies that are not effective in some of them. Many Towns in Africa had not envisioned growth in design and determination of sewer and sanitation capacities. In certain areas we have confirmed through feasibility that sewage can be converted to energy and fertilizers through modern technology. We shall also do indigenous water harvesting through water tanks for every house hold in drought areas with spot regulated chlorination for boreholes.

Environmental Conservation Department
designated to ensure preservation and betterment of environment by improving and programs that entails to game Parks & National Reserves, Water for animals through dams, Endangered species preservation of plants & animals, Cleanliness of Cities and Garbage management, Re forestation in water catchment regions and any other projects to avoid environmental degradation and other programs in line with this vision.
We shall seek to support Industries less reliant on high social interaction in trade and agriculture, will be comparatively less vulnerable but will still face challenges as demand wave management of this new massive debt that gorvernments have brough through the policy response in the aftermath of the crisis will shape our society determining the economic balance between generations, the actual opportunities for future generations, and the technological disruption and transformation that was already in place before this outbreak. The world must make up our minds whether we shall Control, or we shall be controlled, by the Pandemic Crisis. This Pademic has tested nations and leaders in this moments of medical and crisis managment grandiose performance. For others, it has turned into a strategic failure in a public health crisis and ultimately a medical letdown. In early 1970s, Rawls wrote "no one knows his place in society, his class position or social status; nor does he know his fortune in the distribution of natural assets and abilities, his intelligence and strength, and the like." With the nightmarish Coronavirus self-isolation and social distancing, there is now a ticker veil of ignorance among governments and international organizations about how to end the pandemic; while individuals are navigating between infection, death, and the hope of being safe. This is a battle in which we are facing two terrible enemies: panic and selfishness. In this Coronavirus crisis we are at war with an invisible enemy we are declaring as Helpers Of Africa International.

Africa a Safe humanity Kingdom Operation in defence for our countries and the world through a world Revolution. Let us take inspiration from our fathers who overcame previous pademics that hit the world and still overcame making the world a better place for all. The nuclear and military battles that all the nations have been ready for investing heavily has shifted towards public health policies crisis management, and executive leadership to overcome an invisible enemy. The nations of the world need to show a transparent and pragmatic approach in management of this crisis. Maintaining an open democracy in times of crisis.

The nations, cities and villages that have been epicenter of the outbreaks have a lot to share with the discovery of the vaccines and medicines because of their experiences because of the evolution of the virus from one nation to another that requires for a united front in medical research so that all who are dealing can read from the same script. Helpers Of Africa International will finance and support a Global reinforced containment among countries and nations. The recruitment of more health workers ranging from medical students studying medicine in colleges and universities, volunteer workers who can undergo professional health care and retired doctors under 70 will be necessary and Helpers Of Africa International will seek to support such. We shall support to Keep the trade in essential medical supplies flowing means removing barriers such as *tariffs* on medical goods essential for combatting COVID-19 (e.g. several countries maintain tariffs of COVID test kits) requires global subsidies. Helpers Of Africa International in collaboration with and partnership with countries will support expediting certification iprocedures to allow new medical products to be traded as soon as possible and ensuring that technical requirements are science-based and do not unnecessarily restrict trade. E*nhanced trade facilitation* to keep goods moving as quickly as possible – including identifying key actions needed to ensure smooth customs procedures with limited human intervention oline automated import, export and clearing procudures to avoid delays from human intervention.

There are particular issues with keeping *food and medical supply chains* flowing. In addition to the impacts of reduced air and sea cargo possibilities, are additional challenges related to the risk of *food loss and waste* and expirly of medicines through delays to handling difficulties, and the sudden collapse of food and medical supply chains. There is also a need to ensure that food and medical supply flows to quarantined areas, and that *appropriate biosecurity arrangements* are in place, requiring changes to how food and medicine is produced, consumed and distributed – while also ensuring that COVID-19 related sanitary and phytosanitary (SPS) requirements remain science based and not unnecessarily restrictive. While at present global food and medical markets remain well-balanced and cereal stocks are high, it will be important to continue to closely monitor developments, given accumulating risks such as the lack of seasonal labour for planting and harvesting crops. This we shall monitor closely through our medical and food production departments globally through partner organizations and institutions in support of countries and gorvernments.

Helpers Of Africa International will support and advocate some practical things to keep trade flowing and to increase how trade can support the fight against COVID-19,

- *Speeding up border checks for medical products and food* and minimising the need for physical interaction between Customs and other border officials and traders at borders, by digitising processes to the extent possible. Also important will be efforts to expedite standard formalities to leave room for any necessary additional COVID-19 controls. Efforts to boost international co-operation on risk management will also be important in tackling the virus and facilitating movement of goods, as will continued assistance for lower income countries.
- *Making it cheaper and easier for people to stay connected to jobs, markets – and each other* – by: reducing tariffs on information and communication technology goods and measures affecting access to digitally enabled services; temporarily increasing *de minimis* thresholds to cut delays in cross-border e-commerce; and keeping trade moving without physical contact through enacting regulations to enable e-payments, e-signatures and e-contracts.
- *Helping medical researchers co-operate on COVID-19 through enabling data flows*. Access to detailed health information is critical to finding a cure for COVID-19. Yet health data are often subject to strict localisation requirements and cross-border data flow restrictions. Governments could enable processing and cross-border transfer of sensitive data to monitor epidemics, and promote the use of restricted access and secure sandboxes to pool health data on COVID-19.

There are many unavoidable costs in the current pandemic; all the more reason to avoid actions that add to costs for traders and consumers. Chief among these is the need to *avoid export restrictions on essential goods, such as medical equipment and, especially, food products*. Currently, many nations have restricted exports of essential goods and increasingly agriculture and food products. While trade was one of the first victims of the global economic crisis in 2008, new trade restricting measures affected only about 1% of world imports. Global leaders should affirm there committment to refrain from protectionist measures and to uphold the rules-based trading system, and trading rules created for businesses and stabilised the system by placing a ceiling on tariff measures. While there are some differences, as well as similarities, in the current crisis the uncertain economic environment going into today's crisis *increases the need for a commitment to rules-based trade*. We shall work with countries and relevant organizations to ease stress of doing business.

We shall collaborate and recommend solutions to policy makers on ways to confront the significant challenge of COVID-19, and use the lessons from the experience of the global economic crisis, and previous health crises. Through our able consultants and smart team we shall seek to come up with pro active solutions to be used by the coming generations in boasting confidence effects, economic activity shut down, how to avoid Widespread of pademics in future, simultaneously & instantaneously responses, easing of Mobility restrictions, limiting of automatic stabilisers/offsetting actions (informal work, share economy), biosecurity of food & medication / medical facilities, dealing with SMEs. Collapses, pressure on supply chains, knock-on effects from problems in one sector or country rebound and create new problems in other sectors (e.g. between the financial sector and the real economy) or countries. Mitigation of Second- and third-order effects of policy actions to ease employment crisis, supporting workers in mass unemployment, reducing staggered effects globally, ensuring the health and economic security, of their people today, the OECD can play a particularly important role in looking ahead and, in light of past and current helping governments to ensure a recovery that is robust, widespread, and sustainability.

Helpers Of Africa International will motivate and empower Governments to necessarily and rightly providing huge amounts of support to prevent the COVID-19 crisis from destroying livelihoods, businesses and production capacity. Governments will need to take a careful look at the measures in place to ensure that they have not become sources of unfair competition and distortions in the global economy in excuse of the pademic. While this is tomorrow's problem, the way such support is designed now will affect the shape of the global economy to come, and whether that economy benefits – and is seen to benefit – everyone.

Support granted today will have an important impact on the global level playing field. Helpers Of Africa International & government supports will have important effects on production levels and global competition. This work will highlight new trends towards non-transparent and significant government support provided through the financial system in the form of below-market loans and government equity. Given that these tools will be important and widely used in the crisis – equity positions in particular can be an effective way for governments to support ailing firms in the short term – how governments approach this support, and its unwinding (or not) will be critical to the future shape of competition in the global economy. There will be a need to consider carefully which sectors the states needs to be involved in for longer, and where it should exit as soon as possible.

The current crisis may well result in a longer-lasting change in the role of the states in the economy – which will also have implications for the development of any new trade rules to address government support. Given that experience across a range of sectors, from agriculture to fossil fuels, suggests that any form of support, once given, can be hard to remove, there is significant potential for a wide range of support to persist. *How support is provided in this crisis will also have important implications for the distribution of the gains from interconnected markets at the national level*. A significant concern from the previous global crisis was that bailouts benefitted large corporations' more than ordinary people. This exacerbated existing trends towards greater inequality of wealth, income and – most importantly – of opportunity within countries around the world. It will be critical to ensure that support given now is – and is seen to be – targeted at the public interest, rather than vested interests, and at public welfare, rather than just corporate welfare only.

These elements are mutually reinforcing. The scale of public investments needed during and after the crisis – from health systems and social protection, to access to education and digital networks – underscores the need for support to firms and sectors to be as efficient as possible to maximise available public resources. Well-designed support will also be less market-distorting and give rise to fewer concerns about the impact on international competition. Fairness – in both the national-level distribution of benefits and in global competition – is essential for maintaining public support for trade and the open markets needed to get through and emerge from the crisis.

Even now, as governments are in crisis mode, there is a need to pay attention to the design of essential support. There is a wealth of experience on minimising the competitive distortions from support on which to draw, including in relation to government & invested firms globally on a win win situation. We shall need to keep *key principles* including transparent through solid financial monitoring and accountability systems, non-discriminatory considerations in helping affected firms and targeting those experiencing the most disruption, while avoiding rescue for those who would have failed absent the pandemic. Our Solidary is time bound because the pandemic is not waiting for anyone and its dominal effects are being felt all over.

Ongoing work by Helpers Of Africa International is how to partner with governments and give support to recover from market-distortions and include a focus on providing insights to help inform governments' choices on the design of support in the crisis. Firms and governments will need to re-think resilience in global supply chains some suggestions of global production and global supply chains backed up with re-nationalised, or at least shortened, to reduce risks from global exposure. From this perspective, firms may need to re-think sourcing decisions, resulting in re-ordering of global production, with potentially far-reaching implications especially for developing countries. Equally, it is argued that governments will need to reconsider the list of strategic goods for which there is a re quirement for domestic production, or impose new sourcing constraints on businesses. Government procurement practices may also be revisited and we shall advocate for gorvernm ents to restratergize there approach.

Yet there is a danger of making quick assumptions about what is necessary to ensure resilience. Internationally, diversified production is often a source of resilience and adjustment for firms in an adverse environment, while experience in the agrifood sector has shown that self-sufficiency of supply is not the same as security of supply. There will also be a need for both firms and governments to think again about how best to ensure the resilience of supply cha ins. This will require a better understanding of the strengths and vulnerabilities of key supply chains in the current crisis and looking again at resilience toolkits in light of this. For firm strategies, this can mean re-examining, for example, the structure of businesses globally including in relation to redundancy capacity and inventory stock s. For governments there will be a need to consider the trade and investment policy environment that can best support resilience; for example, the availability of digit al infrastructure to reduce productivity hits in pandemics or improvements to trade facilitation practices to minimise scope for disruptions related to face-to-face processes. Governments may also need to consider special arrangements for specific supply chains for strategic goods such as medical equipment; however, this should not neces sarily be equated with re-shoring of production. For face masks, for example, it would be very costly for each country to develop a production capacity matching t he current crisis demand and encompassing the whole value chain; an alternative, effective and more cost-efficient solution may involve development of strategic stocks or upstream agreements with companies enabling rapid conversion of assembly lines during crises. The Helpers Of Africa International will be supporting governments in their consideration of these issues through investigation of the consequence of COVID-19 on sourcing decisions of firms and the resilience and vulnerabilities of particular global supply chains, including by dra wing on the insights gained by other trade & health global organizations that are doing more on trade and health to be ready for to manage future heath and economic crisis. The current crisis offers an opportunity to develop readiness for future pandemics. In addition to national measures to ensur e supply, there may be scope for an international agreement to provide greater predictability and certainty on availability of key supplies in international mark ets and build confidence that trade will keep flowing to support the management of future pandemics.

Suggested remedies to engage countries to implement stimulus and economic activation plans such as

- *Ensuring transparency*: for governments to share information on markets, policies and stocks for key commodities has underscored the value of timel y information and transparency in preventing crises induced by panic buying, hoarding or export restrictions. Ensuring transparency in relation to trade-related measures related to medical supplies, such as through sharing information with relevant organizations, can play an important ro le in maintaining confidence in global supply.
- *Cutting tariffs on essential medical products* – countries could explore initiative to remove tariffs on a to-be-agreed list of essential medical supplies (similar to the agreement reached on Information Technology products).
- *Disciplines on export restrictions* – this could range from agreement to prohibit export bans for certain kinds of goods, or to codify strict conditions on their u se, building on the current trade agreements that states that: "emergency mea sures designed to tackle COVID-19, if deemed necessary, must be targeted, proportionate, transparent and temporary, and that they do not create unnecessary barriers to trade or disruption to global s upply chains, and are consistent with trade rules
- *Upfront investments in co-operative solutions* – the creation of stockpiles of essential medical supplies could include co-operative arrangements for creation of such stockpiles, including on a regional basis. Helpers Of Africa International will advance funds needed for this piles to make them accessible.
- *Addressing the needs of the most vulnerable countries* – measures, for example in relation to export restrictions and creation of regional stockpiles, could include specific exemptions or assistance to address the needs of the poorest countries.

Travel and trade Evidence has shown that restricting the movement of people and goods during public health emergencies may be ineffective, and may interrupt vital aid and technical support, disrupt businesses, and have a negative impact on the economies of affected countries and their trading partners. However, in certain specific circumstances, such as uncertainty about the severity of a disease and its transmissibility, measures that restrict the movement of people may prove temporarily useful at the beginning of an outbreak to allow time to implement preparedness activities, and to limit the international spread of potentially highly infectious cases. In such situations, countries should perform risk and cost-benefit analyses before implementing such restrictions, to assess whether the benefits outweigh the drawbacks. WHO has published and will regularly update advice for international travel and trade, which includes advice for international travelers, as well as measures for international travel such as entry or exit screening. WHO will continue to monitor additional health measures under IHR (2005) that countries implement in response to the current outbreak. In the event of measures that interfere significantly with international traffic (travel bans, refusal of entry or exit of passengers or cargo for more than 24 hours), in accordance with Article 43 of IHR (2005), States Parties are obliged to send WHO the public health rationale for any such measures, and WHO is obliged to share this information with other States Parties. WHO and partners will maintain communication with representatives of airlines and international tourism organizations to exchange information (with a focus on case management on-board aircraft) and reporting should a traveler with respiratory disease symptoms be detected. This will be done in accordance with the International Air Transport Association guidance for cabin crew to manage suspected communicable diseases on board an aircraft.
Helpers Of Africa International and partners will support advocacy that Points of entry Countries should establish or update a multi-sectoral contingency plan at points of entry, integrated with other emergency operational plans at point of entry, covering relevant stakeholders, and conduct simulation exercises to assess the operational applicability of the plan. In terms of physical infrastructure it will be necessary to designate an appropriate place, separate from other travelers, where travelers who meet the definition of a suspected 2019-nCoV case can be interviewed in a safe (including provision of personal protective equipment) and dignified way away from other travelers. Any suspected cases should be granted access to medical follow up by establishing arrangements with local medical facilities for isolation, treatment, and other support services that may be required, including for sample collection and transport for laboratory testing. Protocols and referral pathways should be established to guide safe transport of patients and their close contacts to designated medical facilities. Points of entry authorities should also establish mechanisms and procedures for communicating information to travelers via travel health clinics, travel agencies, tour operators and at points of entry, about the disease, preventative measures to reduce the general risk of acute respiratory infections, and how and where to seek medical attention.

Helpers Of Africa International will support Rapid response teams National rapid-response team training and equipping for investigation of suspected 2019-nCoV cases and initial treatment where appropriate. This will require the preparation and dissemination of case investigation protocols and supplies, establishment of a system for contact tracing and monitoring, and the implementation of a community-based surveillance mechanism. Helpers Of Africa International will support laboratory system and stakeholders for Surveillance and Response System will be used by countries as a mechanism to test clinical samples at international referral laboratories from patients who meet the suspect-case definition including mobile laboratory units. Helpers Of Africa International will support national capacity for detection of the novel coronavirus also needs to be strengthened so that diagnostic testing can be performed rapidly without the need for overseas shipping. One way this can be achieved is by working with existing global networks for detection of respiratory pathogens, such as existing National Influenza Centres. Working and empowering regional and national laboratory focal points, Helpers Of Africa International will empower compiled a global list of laboratories that have the technical capability to test for 2019-nCoV but that lack the necessary reagents. Helpers Of Africa International will procure and distribute testing kits to laboratories on this list that request reagents. The first shipment of kits will supply tests to screen suspect cases. Infection prevention and control Infection prevention and control (IPC) measures are absolutely essential to ensure healthcare workers are protected from infection with 2019-nCoV and amplification events in healthcare facilities. Helpers Of Africa International will support existing IPC programme at national and facility level with a dedicated and trained team, or at least an IPC focal point, should be in place and supported by the national authorities and facility senior management. In countries where IPC is sub-optimal or limited, Helpers Of Africa International and partners will need to support national authorities to ensure that at least minimum requirements for IPC are in place as soon as possible, both at the national and facility level, and to gradually progress to achievement of all requirements of the IPC core components according to local priority plans. Partners should support national authorities to undertake a risk assessment of IPC capacity at all levels of the healthcare system (includes availability of triage and appropriately ventilated isolation rooms) and, on the basis of this assessment, define a referral pathway in collaboration with case management capacity.

Particular attention should be given to ensuring IPC compliance with basic IPC principles at the first point of care (usually primary care). Capacity for triage, early recognition, standard precautions, isolation capacity, and referral procedures should align with global heath IPC guidance on 2019-nCoV. If supplies are needed to implement recommended protocols (e.g., hand hygiene resources, personal protective equipment, environmental cleaning, and waste management), partners should assist national authorities in procurement and supply where appropriate. Helpers Of Africa International and Partners will support national efforts to identify IPC surge capacity (numbers and competence) that can be deployed to strategic locations. It will be important to monitor, analyse, and feedback to relevant stakeholders any data on healthcare-associated infections in patients and in healthcare workers to ensure such infections are prevented.
In order to strengthen readiness, Helpers Of Africa International and partners will support national authorities when requested to disseminate information, train and refresh medical/ambulatory teams in the management of severe acute respiratory infections and 2019-nCoV specific protocols. Helpers Of Africa International with global Health regulators will work with partners to develop a 2019-nCoV critical care app for mobile phones to rapidly disseminate information to front-line healthcare workers. Public health clinical operations should be informed by a 2019-nCoV clinical database platform. National authorities can play an important role in supporting research and development blueprint efforts by preparing to rapidly assess laboratory diagnostics, therapeutics, and vaccines for trials, regulatory approval, market authorization, and post-market surveillance.

Helpers Of Africa International has also imbedded in this program a framework for finance organizations and countries can access to directly address the health emergency. Partners and well wishers we invite your additional, co-financing and parallel financing through these programs. Building on this first response, we are undertaking new support programs that, in coming years, will help developing countries overcome the pandemic and reclaim focus on growth and sustainable development. We are committed in this crisis to providing large additional financial resources for the world's poorest countries during this difficult time in loans and grants accordingly.

These steps won't be enough, given the combination of a severe health crisis, a deep global recession and unprecedented societal impacts. Our programs are working to address as many of these problems as we can, and I invite you to join in these efforts with additional financing. Credible estimates shows that the pandemic, and the economic shutdown of the advanced economies, will push over close to billion people into extreme poverty in coming years if quick action is not taken, increasing the number of the world's population living on less than $1.90 per day toward 700 million people and causing the global poverty rate to rise for the first time since 1998, when the previous Financial Crisis hit. We worry that these numbers will go higher. School closures in 191 countries are affecting 1.5 billion students. Reduced incomes for migrant workers will lower remittance flows back to home countries, while migrant labor shortages in the agriculture sector of advanced economies pose food supply risks. Case management and continuity of essential services Partners will support vulnerable countries affected by widespread transmission to ensure the continuity of essential health services, including through the provision of personnel, medicines, diagnostics, and other supplies. National authorities, with the support of partners where requested, should designate referral facilities for care of patients with 2019-nCoV, and map existing public and private health facilities and referral systems in case they need to be brought into the response as surge capacity. Supplies for case management and infection control should also be reviewed, resupplied if necessary, and pre-positioned at strategic locations.

Helpers Of Africa International is working to help countries boost health spending, strengthen social safety nets, maintain both public services and a private sector that creates jobs, and counter financial disruptions. We are able to deploy a huge amount including the frontloading, grants and highly concessional resources from the replenishment. The wide spillover from the pandemic and the shutdown in advanced economies hits the poor and vulnerable – women, children, elderly, and healthcare workers – hardest, deepening the inequality from lack of development and making the health crisis even worse. Millions of people in Africa are facing a triple crisis, the health emergency, the global recession, and locust swarms that are threatening food security and livelihoods. Helpers Of Africa International will also fight other crisis and disasters such us locust crisis. There is an urgent need for additional financial action through the pathways we have available and I again invite you to join that financing effort.

We strongly welcome the prompt support of the individuals, companies and countries on our projects and programs around the world along with you partners around the world. You can also recommend organizations and corporations that have investment transparency to work with that have greater investment and growth. Transparency is vital to ensuring accountability, developing reliable estimates of debt sustainability, and will bring in new high-quality investment especially for those that we shall loan for this crisis and other projects. I invite you partners, donors and charity / humanitarian well wishers global to join me in providing a clear voice for these initiatives including the participation by all potential bilateral partners. I invite partners to agree on terms of reference to encourage participation of more in there networks , especially given the focus of empowering and the debt relief for the the world's poorest. I encourage each other and nations as we communicate clearly our vision, mission and goals along with projects as possible and work together as much as possible to achieve the goals of sustainable development. Helpers Of Africa International will support delivery of procured medical supplies and equipment to remote areas in developing countries. We are also partnering to ensure food security and nutrition programs further stepping up collaboration in countries of need. We seek to enhance digital connectivity, including digital learning tools, to help children's continued schooling. In that context, we shall be coordinating with other Global organizations and supporting governments in strengthening distance learning and facilitating the reopening of schools. We have a strong Global Economic Agenda to respond to a global economy suffering a devastating blow. The pandemic and the economic shutdowns have shaken billions of lives. Even Developing countries will still need our help since they are also facing an unprecedented health and economic crisis. This is jeopardizing decades of development progress, threatening to push many to poverty. The poor and most vulnerable are hardest hit, adding to the deep inequality caused by growth that was often too slow to bring jobs, higher median incomes and better living standards.

Helpers Of Africa International will provide strong net positive flows, especially to the poorest countries. We have startergies and plans for working intensely on fast, broad actions to help poor countries overcome the pandemic and reached a milestone by quickly implementing programs in over 100 developing countries. These programs reinforce healthcare systems, protect the poorest households, save jobs and businesses, and get money to people who need it most. We shall work with countries to expand the coverage of social safety net programs. We seek to finance the private sector in developing countries and helping to provide a more stable environment for investment by mitigating and managing risks arising from uncertainty of the crisis. Facing the pandemic, we're shall be working to limit the harm and help countries prepare for recovery so they can rebuild better and stronger than before. Countries will need to allow an orderly allocation of capital toward sectors that are productive in the new post-pandemic structures – using systems that can build and retain more human and physical capital during the recovery. There will be a need for new types of jobs, businesses and governance systems. Through creativity and innovation we shall encourage nations towards an attractive investment climate that can bring in the massive amounts of effective new investments they will need to build stronger economies. Countries are already being differentiated in financial markets by these factors. Substantial progress can be made, Transparency should cover all government financial commitments and debt-like instruments and needs to reduce the use of non-disclosure agreements, collateral, liens and contracts based on assymetrical information – where the lender knows more than the people in the borrowing country. Steps toward financing, liquidity and transparency are important and will help a lot.

Helpers Of Africa International seeks to support the world from deep global recession, accompanied by a collapse in global trade, tourism and commodity prices and extraordinary market volatility. The pandemic will also have severe and long-lasting socioeconomic impacts that may weaken long-term economic growth prospects, lower investment because of elevated uncertainty, and lead to the erosion of human capital. Beyond coping with the immediate crisis to limit the harm, policymakers can make a robust recovery more likely by maintaining private sector systems and infrastructure and allowing markets to allocate resources toward productive activities. The balance sheet stress imposed by the recession may reveal sovereign and corporate weaknesses. Policymakers can resolve balance sheet related problems by ensuring transparency of financial commitments Banks, corporates and SMEs need much more transparency and by offering faster, more efficient dispute resolution mechanisms. Many countries are already taking steps to facilitate resolution of corporate distress. Litigiousness and drawn-out resolutions are important problems. Some countries have introduced time-bound moratoriums on bankruptcy proceedings during the pandemic to encourage speedier forms of resolution. Conversely, other initiatives might undermine restructuring and slow the recovery, such as prolonged disruptions to insolvency proceedings.

Despite the challenges people are facing, the biggest concerns are yet to be fulfilled so our funds, vision and dreams for the world are valid. Many resolves that have been done in global summits are yet to be implemented. Helpers Of Africa International has the resources, the vision, mission and favour of God most of the export restrictions have affected economies that need reviews and considerations. We seek to support important advances being made in digital connectivity in developing economies. One benefit is the ability of some governments to reach some of the poorest households with support payments. It is clear that more needs to be done to improve digital infrastructure in developing economies, an important part of our vision where we hope to see advances. I am very pleased with the vision, mission, projects, programs and solid Helpers Of Africa International structure that I have envisioned for over 25 years and through your support much will be established and fulfilled to make the world a better place. We will continue to take broad, fast action in our response to the needs of people in poor and developing countries.

The packaged Helpers Of Africa International strategic structured plan by the grace of God will be one of the largest, fastest and heavily funded crisis response in history of the world, marks a milestone in implementing the Helpers Of Africa International pledge to make available Trillions of dollars in loans grants and financial support to help poor and developing countries respond to the health, social and economic impacts of COVID-19 and the economic shutdown in advanced countries. “The pandemic and shutdown of advanced economies could push as many people into extreme poverty – erasing much of the recent progress made in poverty alleviation but there is still hope by this vision of Helpers Of Africa International, historic fund and grace of God to restore world economies. The Helpers Of Africa International Group will move quickly and decisively to establish emergency response operations in countries in the world through our solid structures by the Grace of God, with mechanisms that allow other donors to rapidly expand the programs. To return to growth, our goal must be rapid, flexible responses to tackle the health emergency, provide cash and other expandable support to protect the poor, maintain the private sector, and strengthen economic resilience and recovery.”

We shall fast-track support to businesses in developing countries, including trade finance and working capital to maintain private sectors, jobs and livelihoods. Helpers Of Africa International contribution and support through grants, loans and equity investments will be supplemented by the contribution of individual countries and like minded organizations since we may not be able to bite the whole pie by ourselves to have more financial resources to respond to the COVID-19 pandemic and fund critical, lifesaving emergency responses. Strong accountability and transparency will increase the confidence in the investment climate & investment in the future.”

The Helpers Of Africa International operational response by the grace of God will strengthen health systems, support the poorest households, and create supportive conditions to maintain livelihoods and jobs for those hit hardest. Country operations will deliver help to the poorest families through cash transfers and job support; maintain food security, nutrition and continuity of essential services such as clean water and education; target the most vulnerable groups, including women and forcibly displaced communities, who are most likely to be hit hard; and engage communities to support vulnerable households and foster social cohesion. The scale and speed of the Bank response is critical in helping countries mitigate the adverse impacts of this crisis and prioritize the human capital investments that can accelerate recovery. The Helpers Of Africa International Global operations in countries around the world aim to save lives, protect livelihoods, build resilience, and boost recovery by Strengthening health systems, monitoring, and prevention, particularly in low-income countries and in fragile and conflict-affected situations. The Bank health response addresses emergency containment and mitigation needs for COVID-19, including strengthening countries’ health systems to treat severe cases and save lives. Establishing and supporting efforts in fragile and conflict-affected situations is a priority, given the rapidly growing number of cases in some of these countries.After evaluating the nation’s capacity and credibility we shall disburse the funds according to need and structure which includes funding to strengthen disease surveillance systems, public health laboratories, and epidemiological capacity for early detection, enhance testing, minimize spread through contact tracing of confirmed cases, and provide laboratory and protective equipment for health care staff. Scaling up social protection: The Bank Group is leveraging countries’ existing social protection systems to help families and businesses restore income, preserve livelihoods, and compensate for increasing prices and unexpected medical expenses. These safety nets will need to be augmented with safe, direct food distribution, accompanied by key information on nutrition, social distancing, and hygiene. We shall evaluate countries existing portfolio to help finance additional social benefits and grants to small and medium-size enterprises through structures that exist in the nations and previous handling of such programs and work towards capacity building to Support businesses and preserve jobs: Through our industry and entrepreneurship arm we shall set apart huge amount which aims to keep companies in business and preserve jobs globally.

In Procuring medical equipment and supplies: Many developing countries import most, and in some cases all, of the medical supplies critical for fighting COVID-19, leaving them extremely vulnerable to supply disruptions and export restrictions. Production of personal protective equipment (PPE) – including masks, gloves, protective suits, gowns, coveralls, shoe covers, goggles, and face shields key equipment such as mechanical ventilators, cardiac monitors, and portable x-ray machines – and delivery to needy hospitals doctors and paramedics through existing global health structures will be of high priority. Through our Departments and partners along with countries structures emergency cash transfers to poor and vulnerable households will be important. This will help finance the supply of essential equipment and supplies and strengthen intensive care unit (ICU) capacity at public hospitals.

COVID Capacity Building Workshops- Helpers Of Africa International in collaboration and partnership with health, economic, industry and country leaders will hold online and congregational workshops to understand the requirements and needs of health systems to respond to the novel coronavirus and which digital health solutions are available for government health systems and a comprehensive need assessment on Surveillance, Prevention. Diagnosis, and Treatment issues faced by health systems and develop uses cases faced by four different cadres of people: Client, Provider, Manager, Policy Maker. These use cases will help governments, donors, and health workers understand which digital health application would be the best solution for their context.

COVID Response Digital Health Solutions- Helpers Of Africa International will finance developing of digital health solutions that could be used (or are already being used) to contain the coronavirus. The public solutions spreadsheet is for donors, governments, and health workers to identify new technologies for deployment to contain the coronavirus.This highlight solutions on ICTworks and in the COVID Response Workshop that can be employed by health systems to survey populations for the corona virus, communicate how to avoid coronavirus infection, understand who might be infected with COVID-19, and track treatment protocols and adherence.

We have identified through our research some of this solutions and we shall seek to support and partner with various companies to make them available for many countries and health sector providers globally along with citizens for mobile applications that can be freely distributed to all citizens. Here are more COVID response global digital health solutions.

Digital Solutions for COVID Surveillance

1. Health Check- Health Check allows travelers to report on their symptoms through automated calls with an Interactive Voice Response (IVR) system. Health agencies can then periodically and automatically monitor the symptoms and wellbeing of at-risk individuals.
2. Safiri Smart- Safiri Smart is a disease and epidemic surveillance and awareness system that uses USSD to alert Safaricom subscribers of disease and epidemics via their mobile phones. Users who travel to areas with ongoing epidemics will receive Kenyan Ministry of Health information as soon as they travel to the affected region.
3. HealthAlert- HealthAlert is a WhatsApp-based helpline to disseminate accurate and timely information about COVID-19 from the National Department of Health to the South African public. It includes a helpdesk with automated response and triage to answer user's queries and real-time data insights for national policy decisions.
4. Interactive FM Radio- Interactive radio that pairs AM and FM radio broadcasts with mobile phone responses is a proven methodology for reaching rural and remote communities at scale in local languages, to increase knowledge, change attitudes and practices. Interactive radio interventions can answer listeners' questions, offer information, allay fears, dispel myths, and survey listener's attitudes.
5. Inclusive eLearning- Inclusive eLearning meets individuals with intellectual disabilities at their level of engagement and supports prevention efforts by educating everyone on good hygiene practices. The Coronavirus Outbreak: What you need to know eLearning Module will be deployed on March 16th, to educate the entire Special Olympics community about COVID-19 prevention strategies.
6. Triage CheckUp- Triage CheckUp is an automated risk assessment application for health workers that can check a patient's symptoms and epidemiological factors using Korean coronavirus guidelines for front line triage, and will soon be available in English, Korean, French and Vietnamese. A companion application, Diagnosis CheckUp is a self-reporting tool for the general public to assess their risk factors for coronavirus infection.
7. NoviGuide- NoviGuide is a decision support platform that transforms static guidelines into point-of-care decision trees for health systems to rapidly new deploy guidance and monitor use. Its dashboard helps visualize clinician concern, an important indicator of disease spread in epidemics where testing is unavailable or limited.
8. OpenELIS Global- OpenELIS Global is an open source enterprise-level laboratory information system tailored for LMIC public health laboratories that uses HL7 open standards. OpenELIS lab information system can help with the receipt and tracking of of potential COVID19 samples, assisting labs to process them effectively, and report back findings to clinicians.
9. WelTel- WelTel is a secure, web-based, communication platform that uses SMS for maximum reach and voice or video outreach when appropriate for integrated virtual care & patient engagement. Cases and their contacts can be connected to healthcare providers with data captured in a secure, consolidated database for real-time monitoring and epidemiological evaluation.

This list above is just a synopsis of potential solutions. Technologists, we need your ideas to build a truly comprehensive list of possible digital health solutions. Governments, donors, and implementers.

Helpers Of Africa International by the grace of God is not just handling responses but will work towards a proactive role in ensuring that stable and sustain able economic urgent recovery and growth in developing countries. Development of innovation and creativity in entr prenuership will set free the poor and improves their lives. Many more liberalizations are needed, through micro-loans to support SMEs like Fuliza, Mpesa Daily Loans for market dealers and fast moving goods.

Digital Cash Transfers

Across Kenya, mobile money has been taking off. M-Pesa is a service that allows people, some with the most basic cell phones, to transfer funds simply by sending a text. Now, 96 percent of households outside Nairobi use M-Pesa. It's given households a chance to transact and save without some of the historical costs and risks of cash and the banking establishment. The M-Pesa system helped small businesses, especially women entrepreneurs, gain access to funds. It's transformational in terms of the ability of women to participate in the economy and society--with cash, physical possession is nine-tenths of the law, but with a gender-neutral digital system, women have more control of their budgets. And it has spawned a famously constructive environment for start-ups in greater Nairobi, including developers of applications for M-Pesa users. We shall use the same to release support to our volunteers that we shall recruit beginning in Kenya

I've told you the end of the story--millions of people using a system that empowers them. The story began years ago with entrepreneurial ingenuity helped by sound regulatory policy. A critical early step was for the central bank to allow the entry by a mobile-phone provider into the financial sector. Entrepreneurs were able to spark a new industry that's delivering real benefits to people. It's the kind of liberalization process we need to unleash across the developing world.

The Helpers Of Africa International seeks to support this platforms in developing countries as it has worked for Nations across the world as has worked for kenya even in this season of Covid 19 to both disburse immediate aid to families and support health care to health providers through robust mobile banking systems. This type of development outcome directly addresses our two goals--to end extreme poverty and achieve broad-based growth that boosts shared prosperity.

Poverty reduction has made great strides in many countries, yet 700 million people still live in extreme poverty. That's abou t one in 12 people on the planet. Many of them live in fragile and conflict-torn places where institutions may not exist to deliver benefits to those in need. Digital cash programs may be able to help --both the transaction-focused systems like in my country Kenya's and the electronic cash-transfer programs being set up elsewhere. Helpers Of Africa International will be supporting establishment of secure systems that would allow poor people to electronically receive remittances, foreign aid, and social s afety-net payments as well as their earnings, and then be allowed to save and transact freely. That would be revolutionary because it allows people the freedom and opportu nity they need to improve their living conditions. Once more countries enable these technologies, the innovation may turn out to be as big an advance in development policy as the ones that allowed people to move from a barter economy to a market economy.

Creating Broad-Based Growth

In order to make progress on broad-based growth and poverty alleviation, we need to be ready to shake up the world--because we live in a particularly challenging time for development. Global economic growth is slowing because of Covid-19 crises above the previous economic challanges and trade uncertainty. Moreover, in much of the developing world, investment growth is too sluggish for future incomes to rise in a meaningful way. Even with the global economy in a fragile position, I believe that strong policy frameworks and robust institutions would allow almost all developing countries to deliver broad-based growth that reduces poverty and allows shared prosperity.

Helpers Of Africa International Smart team of technical and program experts is positioned to help governments create improvements through trade facilitation is a critical part of many of our countries programs because the economic benefits from commerce and trade are immense, and constructive policies--such as customs processing, tariff harmonization and standardized bills of lading--are achievable through bridging between supply time and payment popualry known as invoice discounting. This push for better country policies will be strengthened by our ability to make loans and grants to governments and, when governments allow better private sector conditions, make investments in private-sector debt and equity. We shall establish this kind of bridging to keep business flows through our bank branches and through other financial institutions before we are able to spread all over the world so that we don't delay remittances that can bring help to many. We shall be working cooperatively with countries and the development community to launch country platforms. The goal is to help countries prioritize their key development issues and get development partner financiers we being one among many but very big financial portfolio by the grace of God, including non-traditional donors and the private sector, engaged in the most constructive way. There continue to be many international groups setting up discussion groups on how to define, standardize, centralize and empower countries, Helpers Of Africa International is coming in not as a competitor but as a stimulator to this movement strongly to move forward. There's been ample discussions in our 25 years of incubating this vision and we have made observations and many empowerment pilots and brain storming incubation of ideas. We as Helpers Of Africa International will not just help countries with loans and grants but also improve countries credit worthiness especially in this season of Covid-19. We shall harmonize our activities, projects and programs with other donors to avoid unfruitful duplication of funding and donations. The outcomes will be tailored to the countries and their needs, and will be particularly focused on private-sector involvement and engagement. Countries need to provide strong leadership to choose a path that works economically, socially and politically. It's clear that the quality of policies and institutions plays a key role in explaining why some developing countries have been able to make the leap out of poverty, and others have been unable to advance. It's also clear that development cannot be imposed from outside--country leadership and ownership matter.

Your Exellencies Ladies and Gentlemen (1)

We have a strong focus to Make something better through hunger and passion for global stability and success in all faces and we structured to face tough problems and new challenges to develop global solutions for future generations not saying "I don't know how" or "I can't" when faced with a hurdle, we jump to seek for solution to help world now & future.

We seek to create wildly successful leaders in all platforms of business, humanitarian, organization and government leaders by mentorship, coaching, exposure and impartation doing whatever it takes to enable our champions to be transformational leaders and their staff to be superstars.

To Deliver outstanding results by establishing a culture of exceptional execution of our projects and programs by rewarding those who create great outcomes in our organizations and in globally by supporting Various global awards schemes kingdom leadership awards, Kingdom Talent awards, education , creativity, industry and other 100 sectors etc in countries globally.

To be optimistic continuously improve by viewing the business from a "Glass Half Empty" perspective to intensely focus global goals and agendas on how we can operate more effectively.

We seek to develop our people by providing an environment that fosters personal development and professional growth.

Operate with transparency by communicating internally and externally with unwavering candor, honesty and respect.

To be accountable by measuring ourselves against the highest standards of integrity and fiscal responsibility in running the bank along with all our projects and programs throught regulations and structures of openness and audits.

To be Transparent as we pride ourselves on providing complete visibility into the successes, and sometimes failures, of our business as we grow and scale. It is an integral part of our culture as we collaborate and work towards a common goal across all our functions.

To stimulate Control and ownership of global responsibility of solutions by raising patriotism to own up being solution giver, good Samaritan, good will ambassador of humanitarian and supporting others impacting projects empowers our world to think critically and contribute to the development of global industry challenging platform.

To be Flexible and relevant in our programs and structure to accommodate new challenges like Covid 16 and others that meet the world unawares empower countries and organizations in a work environment that is conducive to creating the optimal work/life global balance.

Priority to Global Agenda. Our Bank and all her organizations exists to help world to be come a better place for all of us through our valuable vision, mission, cuture, projects and programs to make every decision and measure every outcome based on how well it serves our world in this generations and coming ones by the grace of God.

Helpers Of Africa International is a team on a global and divine mission of generous amazing donors and partners individuals and through teamwork that we achieve greatness relying on the glory and power of God. We're committed to helping our world, nations and communities by working together with equal parts humility and ambition in covenant and partnership with God maintain a divine back up. **Helpers Of Africa International thinks big to become one among** the world's leading commerce and humanitarian platform thro vision, innovation, wise execution in investment and business along with humanitarian responses globally. We shall not never settle — in everything we do, we challenge our ideas of what's possible in order to better meet the needs of people globally. **Helpers Of Africa International acts with integrity** with honest, transparent and committment to doing what's best for our donors, partners and investors with open collaboration in pursuit of the truth and our valuable vision without allowing internal politics hidden agendas or passive-aggressive behavior to affect our integrity.
Helpers Of Africa International seeks to Make a difference every day to one soul, to a community, to a nation , to a continent and to the world daily by the grace of God as we constantly push ourselves to be our best, we focus on solutions, and we arrive every day inspired to make an impact through our talents, passion and hard work in our vision and structures.**Helpers Of Africa International seeks to break down barriers on boundaries, religion, race and status as we use** good judgment to launch our projects and programs by hiring incredible people so we don't have to institute cumbersome rules or processes to b e free to think, create and get things done through structured open decisions in partnership and collaborations with like minded stakeholders. **Helpers Of Africa International seeks to insteal** positive energy and happy people globally more efficient and creative in all aspects of global operations and humanity
Helpers Of Africa International seeks longevity in partnership and hiring, we take the long view and long term relations, when you join us, and you're stuck with us because we shall try our best to keep you fulfilled by the grace of God in our best ability. We value long term relations and partnership without breaking bridges select ing the best people and valuable partnerships on win-win situations and engagements value our partnersip with empathy and humility, we seek win-for-all solutions. **We seek to Own up** we hold ourselves accountable for outcomes, good and bad we don't pass the buck learning through mistakes. We seek to be **Admirable by** honoring our word and choosing candor, respect, and kindness by the grace of God esteeming the biblical principle that a good name is to be chosen beyond silver and gold. **We seek to be a sign of hope and Wonder execution** seeking to understand global challenges and solutions with curiosity and vulnerability. **We seek to always Find A Better Way of making the world a better place through** a culture of innovation and continuous improvement constantly seeking global economic and humanitarian expansion and creativity. We never give up seeking creative ways to solve tough problems.
We seek to Give Joy and smile to an orpan, to homeless, to a destitute, to a desolate, to a jobless and to sick and hungry to, t o those living with disability and create Laughter, Be grateful to God our faithful creator, positive and hospitable doing our best Make people feel good in this world. We seek to be and raise Helpers Of Africa International Champions in **Boldness,** Take action, be bold without shying away from challenges that seems insurmountable or opportunities that feel impossible, think outside the box; write new stories of overcoming, feel empowered to make decisions and take action. Stop wondering "wouldn't it be cool if we were not in this..." and start living to every global challenge, taking steps that many in the world feel as a burden , unsu re about the next step to take, building confidence and momentum to find solutions to global challenges.
We seek to Build Relationships and Deliver Results by connecting the stakeholders in various platforms of humanitarian, finance, and investment, socio economic circles with customers, partners, consumers and each other to drive success. Relationships deliver results because we can't do our jo bs without each other. When a person goes above and beyond in this area, they own their impact on our business and our partners' success. They dive deep to understand how and why our industry and our customers tick. We're all about providing great service - to consumers, to customers, to our communities and to each other. A true champion of this mindset takes pride i n knowing that we're making a real difference by working together.

To overcome challenges through Collaboration welcoming valuable networking and valuable hard conversations on global solutions without assumptions, find solutions, develop tough skin to toughest critics & partner with biggest challengers to be our loudest supporters to change the world.

We seek motivation by Focusing On the Outcome taking steps to begin and support journies to roadmaps of global success in different challenges every time being outcome-focused embrace learning curves; innovate, iterate, err, improve, repeat. **Our Vision and our donors is a top** priority and every day we're hyper-focused on making our donors get value for there donations and investments embracing this value making every decision, no matter how big or small and make global experiences better. We are honest and forthright in our dealings. Building trust builds a better company and organizations.

We seek to Stay Open to promote strong partnership overlooking differences in opinions and seeking what unites strengthen our teams globally as they serve in projects in trust, respect we have to partners individual and organization infusing passion into everything we do considering alternat ives, looks at things through a different lens. Opening our minds and combining our different backgrounds, experiences, world views and expertise make us savvier problem solvers and drive better global results. **Being Helpful being solution based where we offer a hand of compassion with the principles of if** you know the best way to do something, you'll do good work. If you share that knowledge with others, you'll become a leader.**We are Hungry to touch lives to see the world transformed in a great way in all aspects that affect the welfare of citizens through impacting positive change.**

We seek to create a Happy environment for the stressed in the nations to be around happy, motivated, and positive people the world and our institution will be a better place for generations to come boasting productivity. Pausing to ensure we're finding peace and joy along our journey i s an invaluable component to sustainable and lasting success. **Though with big dreams and financial ability we seek to embrace godly Humility to the world as an institution with acknowledgement that it is only God who can make us be great and remain to serve the needs of people**. We advocate, practice and finance **Improvement of individuals and countries** to continuous investments in the growth of our all sectors globally along with our staff donors and partners. We seek to activel y take responsibility for self-development to empower nations. DISSABILTY HELPERS OF AFRICA INTERNATIONAL

Helpers Of Africa International will support the cause of those who live with disability On behalf of the Bank, I would like to thank you for the opportunity to participate in the of the bank and also this inniative of empowerment of Disability plan and Framework. This is an important step towards scaling up global efforts to address disability inclusion - by enabling each individual to tap into her full potential, and for society to benefit from a diverse set of abilities. Our departments' effort to unlock the potential of opportunity through this disability framework sets an example for the international community to deepen its commitment to inclusive development. We all recognize that disability, as a development issue, cuts across the core mission of our strategic plan, the Helpers Of Africa International Group and the international development community to reduce poverty. We are looking forward to learn from the implementation of our strategic plan and framework, and to strengthen our partnership on this crucial agenda. This platform today provides a further boost to a valued partnership with likeminded organizations, where all organizations will aggressively and collaboratively move forward towards a common goal.

Today Over one billion people globally live with some form of disability, and disability prevalence is higher for developing countries. The social exclusion of persons with disabilities is unacceptable in the face of economic and social progress witnessed around the globe. They are over-represented amongst the persistently poor, and are less likely than others to be able to move themselves out of poverty. They are also harder to reach via traditional poverty alleviation and social protection programs. More people with disabilities live in poverty and more people in poverty have a disability. People with disabilities may also face cumulative disadvantage depending on their gender and ethnicity. We, as the Helpers Of Africa International Group, and as the world, will not be able to achieve our primary goal of eliminating extreme poverty by Global agenda 2030 unless we aggressively address the disability agenda. Addressing the agenda aggressively not only requires doing more and scaling up, but also developing a comprehensive vision on disability that also addresses issues related to perceptions and dignity in our interventions.

We need to move beyond traditional ways of doing business In Disability strategic plan and Framework contains features that will vastly bolster our approach on disability especially this time of Covid 19 including a solid grounding on data, a commitment to identify and act upon evidence related to what works and what doesn't, building staff capacity, and working with an in-house disability expert group; and the framework promotes both stand-alone activities and a re-energized focus on including a disability lens into education, health, and infrastructure projects, which is something that we in the World Bank Group are trying to promote as well. We are all fully committed to advancing our efforts in the same direction, and to move beyond traditional ways of doing business. Exclusion and stigmatization around the globe have helped perpetuate an environment which hinders people with disabilities from accessing goods, services and opportunities vital to their development and well-being. Be it education, health, labor markets, transport, social protection, or social networks, people with disabilities are marginalized at a higher rate across the development spectrum, and not enough is being done to address this problem.

There may also be a perception that addressing these issues is costly, complex and often with unclear results. We need to correct this. The most efficient way to give this issue the attention and action it deserves, and to get the most impact is by working closely together with governments and civil society, and in partnership with all like-minded partners. We would therefore like to partner with you and other key stakeholders in helping promote and advance this framework. The timing of this framework couldn't be more fortuitous. The Bank is trying to further strengthen its own stance and engagement on disability as part of its twin goals of ending poverty and boosting shared prosperity, so this is the right moment for us to build this partnership. What have we accomplished over the past few years is an asset as individuals dealing with those in diability will go a long way in supporting even the orphans.

The Bank's commitment on disability issues is channeled across all aspects of our work through a three-pronged approach—*building evidence, promoting operational interventions, and establishing partnerships.* On Building evidence In collaboration with other organizations, the Helpers Of Africa International will published the strategic plan on Disability, the first of its kind, has significantly contributed to the international discourse on disability and development. The plan will analyze the socio-economic impact of disability based on the best empirical evidence available; filling major knowledge gaps, particularly in health, education, humanitarian care and labor, and recommended clear, implementable actions to improve the lives of people with disability. We are also developing the Model Disability Research (MDS) with other organizations. This research will address the lack of accurate and comparable data on disability both at national and international levels, which was identified by previous Global reports the on Disability as one of the major impediments in developing a better understanding of disability and to the development and implementation of disability inclusion policies. The Helpers Of Africa International also will produces independent empirical studies on poverty and disability, disability and education, and disability and labor markets in developing countries . We are also focusing the process of conducting disability assessments and certification, which will help develop useful operational tools, and build the capacity of the Helpers Of Africa International and client agencies for improving these systems. The Bank is currently finalizing a comprehensive piece of work on Disability Pensions and Insurance that countries can engage along with health care scheme Good Samaritan Cards that we want to support to provide recommendations for developing. The study assesses the design, outreach and costs of social insurance programs and takes stock of existing programs and institutions to promote opportunities and provide income protection for persons with disabilities. The Bank's plan encompases all sectors on transport sector of special buses of those with disability in many countries where those living with disability are not included in the normal transport system denying them the rights for movement and enjoying holidays. Our strategic plan book includes design guidelines and information on the adoption of low-cost technologies/practices in the transport sector; and lessons learned on "what" and "how-to" from operational work. " Today, one billion people globally live with some form of disability, and disability prevalence is higher for developing countries. The social exclusion of persons with disabilities is unacceptable in the face of economic and social progress witnessed around the globe. " Promoting integration into operations and socio-economic inclusion:

We shall scale up our efforts in developing interventions that directly include people with disabilities. In this regard, Helpers Of Africa International and other organizations will finance projects and programs in this directions will contribute to evidence into specific actions and projects. We've also made increased efforts to make *social inclusion* a more fundamental issue in operations, and make it more central in our efforts to achieve our core goal of eliminating extreme poverty. This has had significant implications on how we treat the issue of social inclusion in all of our activities. The integration of disability issues into Bank operations spans a wide range of sectors and covers a broad typology of interventions, which include promoting access to infrastructure facilities and social services, rehabilitation, skills development, creating economic opportunities, working with Disabled People's Organizations, focusing on the most vulnerable among people with disabilities, such as women and children, and influencing policies and institutional development. We have made significant strides and the list is long but will highlight a few here. We seek to support expanding the network of services for children-at-risk (including children with disabilities) in alignment with the legal and policy framework with the Rights of Child while strengthening the capacity of the institutions responsible for designing and overseeing programs for child protection. We shall launch entrepreneurship enhanced economic opportunities for rural populations and the most vulnerable groups, including those with phyiscal disabilities, though self-help groups including supporting inclusive education for children with disabilities including those with learning disabilities focusing on providing services for intellectual and developmental disabilities. We shall also seek to strengthen technical education targeted especially to disadvantaged groups, including persons with disabilities including marketing products and equipments that have been made by people living with disability. This will be done through supporting to short-term training of youth between 16-40 years of age through designated training,, for trainees with disabilities. Our projects will work with civil society organizations to reach marginalized groups and currently includes a pillar on disability that focuses on capacity building and grant financing for disabled people's organizations (DPOs). We shall seek to build Social safety nets and support Integrated Early Childhood Development Project including components to provide education and health services to children with disabilities. We shall seek to support the creation of community-based infrastructure services (including health clinics and schools) with focus on accessibility of people with disabilities. We shall support the design of projects and programs living with disability to improve accessibility measures including advocating for parking slots, shoping malls, markets and buildings , airports that accommodate and are disability friendly. We shall also support factories and industries that make disability equipments and accessories with loans and grants respectively through our industry development departments.

Helpers Of Africa International will launch a Development and Loan to help governments to build cities and townships with action plan on accessibility and urban transport with specific focus on identifying priority interventions in select major cities and review of construction code to promote accessibility. We shall support and finance global, continental and national workshops to engage policy and decision makers at the ministerial level, and the recommendations of the national plans to care for disability friendly systems integrations and interventions. We seek also to ensure that Covid 19 protection gears, water and stilizers are provided along with medication along with the delivery of improved rehabilitation and prosthetic services for people with disabilities. We shall support for improving services and employment opportunities for people with disabilities. Through our innovation and creativity department we shall seek to design equipment's universal mobility. We shall also support to improve policy-making and the institutional framework addressing people with disability along with supporting education programs and institutions improvements of education for children with disabilities.

We cannot do this alone but we shall Building Partnerships globally with organizations, institutions and platforms globally to build partnerships with crucial roles both at the strategic level, by developing policy and institutional frameworks, and at the project level, through joint implementation with National and community based organizations to promote inclusion of people with disabilities across all areas that affect lives and livelihoods in shelter, clothing, food, education, health, insuarances, pensions, disaster management etc. We shall finance disability interventions in all faces and sectors through Helpers Of Africa International projects and departments of children, orphans, men, women, youth, mining, agriculture & food production to ensure that there is total inclusivity of those living with Disability globally. We shall also host donor forums of International development agencies, NGOs, Gorvernments ministries and departments all major bilateral and multilateral development agencies with the objective of fostering international cooperation for the implementation of a global disability plan.

Helpers Of Africa International will continue to engage with as many disabilty Support Groups globally on the Implementation of the Convention on the Rights of Persons with Disabilities. The Bank serves as an observer to promote mainstreaming of benefitial programs reaching even to refugees along with all humanitarian and development agencies. We shall advocate the progress in disability mainstreaming across countries and agencies, and shares knowledge and best practice. We shall support The development community to make some impressive gains in addressing disability through your partnership donors we shall do much more. There is tremendous potential to increase our impact by doing things differently and more inclusively on matters that pertains to disability. There are huge challenges ahead, but we believe that by moving beyond traditional way of doing business, by the grace of God who helps us to be blessed by supporting the weak we shall achieve more to see much better results in the implementation of disability inclusive development. The Helpers Of Africa International's short to medium term (2-3 years) goal is to vastly increase the Bank's ability to incorporate disability effectively, further strengthening our multi-dimensional approach. To accomplish this further, we shall set up groups of focal points from across the organization and globe to oversee the implementation of the agenda. The newly created Social, Urban, Rural and Resilience Global Practice, which houses the disability agenda, works towards building sustainable, inclusive communities, in both rural or urban settings. Disability is at the core of these efforts to build sustainable, inclusive communities. To further strengthen our joint efforts on disability, we plan to establish a platform drawing upon colleagues from various units across the Helpers Of Africa International Group - transport, water and sanitation, health, education, social protection, fragility conflict and violence etc., including other organizations to bring in private sector approaches to address issues of disability. This group will promote disability related work in their respective organizational units, and would work with social development specialists to ensure that the voices of the poor and vulnerable are reflected in our operations. We have also appoint Disability Advisors, who will work across all global practices and regions.

Building staff skills for scaling up of our interventions and identifying additional entry points in projects and programs. We shall set up mechanisms for doing for social development specialists we have in the Practice who help conduct social analysis and assessments in a vast majority of operations, and who will play a key role in identifying and addressing disability issues in our projects. We plan to train them to better identify and address disability issues in operational and analytical work). Enhancing the knowledge and skills of these staff on "how to" include persons with disabilities is crucial. Joint staff learning between relevant organizations will be crucial to help all of us become stronger and better at addressing this important agenda. Addressing disability issues in business processes and developing guidelines: Building on the analytical and operational work outlined earlier, we will make a more concerted effort to flag disability at the project concept stage, so that it can be integrated into project design and implementation, wherever feasible and pertinent. Discussing this at the project concept stage enables us to discuss it more systematically and explicitly with our clients. We are also updating the social assessment guidelines for the Helpers Of Africa International, which form the basis for providing advice to clients on how to identify and address social issues in operations, to include a section on disability issues. The objective is to make disability an integral part of our poverty and shared prosperity agenda. Doing things differently implies focusing on the enhancing the abilities, opportunities, and also the dignity of people with disabilities to help them become agents of development. It is important to shift the paradigm from seeing persons with disabilities solely as recipients of charity to strengthening their participation and role in the development process. This new approach should go beyond the socio-economic inclusion of people with disabilities and move towards a framework that recognizes their abilities as an asset to their communities and beyond.

I am keenly looking forward to learning from the experience and insights of you our donors and your partners in all areas especially in this platforms and all our departments including how to deal with disability on how we can collective help promote this global ambitious and transformational agenda. In this agenda and strategic plan we seek to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all" we aim to make all the Helpers Of Africa International financed projects/programs in education disability from our onset ensuring all education projects/programs are disability-inclusive. The Helpers Of Africa International welcomes the opportunity to host the Initiative for Inclusive Education with support from like minded organizations and will support clients with the necessary technical expertise and resources to help catalyze their progress in reaching children with disabilities and in exploring innovative and inclusive pedagogies and learning environments with new ways of facilitating education. We shall also support private sector projects, committed to promote an inclusive agenda, which includes the right environment for equal opportunities for people with disabilities (including physical, learning, sensory, emotional), as well as non-discrimination. The Kingdom Education team, together with input from the Helpers Of Africa International, aims to develop a set of principles for education investments which will help push forward the inclusion and non-discrimination agenda in the sector, complementing other relevant focus areas such as gender, race, ethnicity, language, harassment and will include specific references to disability inclusion.

On Technology and Innovation We shall encourage and advocate all digital development projects will be screened to ensure that they are disability sensitive including through the use of universal design and accessibility standards and we shall support technology companies we shall support in loans or grants on health, education and manufacturing etc. Achieving disability inclusion and empowerment demands transformative shifts and innovative solutions for removing structural barriers. Innovation and technology provide unprecedented opportunities in this regard, particularly for persons with disabilities, children with disabilities, and many persons with invisible disabilities experiencing marginalization. Social innovations have the potential to serve as a powerful tool to break trends and increase the awareness, access and availability of opportunities for marginalized groups. Innovative approaches are central to delivering solutions for all. Information and Communication Technology (ICT)-enabled services and resources are often major elements of development projects, including initiatives to promote access to banking, expand health care, education, and income generation, strengthen disaster response and management, or access any government-related services. ICT can make previously inaccessible forms of written and spoken communication accessible to all. The multiple modes of communication can improve the functional capabilities of individuals with disabilities in an affordable way.

Helpers Of Africa International will consider initiatives that could facilitate the deployment of assistive technologies in emerging markets. We shall fund a feasibility studies to help inform how best to accelerate the deployment of assistive technologies in the emerging markets. We shall also be introducing a category for awards on Assistive Technology as part of motivation for various humanitarian achievements done by various people annually to strengthen those that are involved with humanitarian work globally especially on work of disabilities. We shall also commit resources to support strengthened disability data and those organizations that deal with them currently because without data and statitics there is no effective response. Under the Helpers Of Africa International Strategy for Household Surveys to address data deprivation the Helpers Of Africa International will provide technical assistance and analytical support to client countries in their efforts to scale up the collection, and the effective use, of disability data from future national surveys and population censuses, guided by global standards and best practices, The Helpers Of Africa International Group will provide its project staff with clear and openly accessible guidelines for disability data collection globally based on disability questions for them to provide appropriate advice to its client countries.

Helpers Of Africa International In the short and medium-term, the Helpers Of Africa International Group commits to work with countries to:

1. Take stock of disability data in existing household surveys and censuses to establish a baseline
2. Include the short set disability questions in all censuses of the 2021 round supported by Helpers Of Africa International Group, via lending and/or TA.
3. Incorporate the Washington Group short set questions in countries with upcoming household surveys supported by the KBG.
4. Provide Technical Assistance that nudges all countries and organizations working with the WBG on collecting Household Surveys to use set disability questions as a default. The KBG will adapt its household survey guidance to recommend the set disability questions as best practice to collect data for disaggregating by disability. Furthermore, even among surveys not supported by the KBG, the KBG will advocate for collection of disability data globally
5. Include profiles of the disabled population in our publications such as poverty assessments and poverty and equity briefs, as data becomes available. This will help make this invisible dimension, much more visible in everything we do.

In the long term we will work towards mainstreaming of the inclusive data agenda in all countries we support by also building administrative systems to collect data on disability going forward along with other datas of education, health, humanitarian support.

Our Strategic plan will also stretch to Women and Girls with Disabilities, The KBG commits to exploring opportunities to focus more deliberately on the economic empowerment of women and girls with disabilities. Through our Women and Youth Girls Wing departments we shall creates a unique opportunity to tackle, comprehensively, the full range of barriers facing women across developing countries. Future rounds of our funding will provide opportunities to focus more deliberately on the economic empowerment of women and girls with disabilities, by addressing the policy and regulatory frameworks; designing projects, for example, in the transport and ICT sectors, with a gender disability lens; and developing and rolling out new products, for example, disability insurance. The next round of the Women department will feed into a dataset on empowerment and development projects to support women and girls into global opportunities, will extend to those who live with disabilities. Our Humanitarian programs will include projects financing public facilities in post-disaster reconstruction efforts will be disability-inclusive including feeding, shelter, education, slums upgrade, cities development, food production , refugees,

We shall advocate that all Transport in new urban mobility and rail projects supporting public transport services will be inclusive in their designs so as to incorporate key universal access features for people with disability and limited mobility. Ensuring that equity considerations, including access to persons with disabilities, continue to remain at the forefront of the Sustainable Mobility for All initiative. Currently under this initiative a Global Roadmap of Action is being developed by over 50+ global actors in transport. Under the Universal Access theme (one of 5 themes) the roadmap will propose actionable recommendations with regard to access for persons with disabilities. Advocate for enhanced road safety outcomes, given that road crashes are one of the most significant public health issues of the century, causing both death and disability. This work will be led by the Global Road Safety Facility which provides funding, knowledge, policy guidance, and technical assistance and generates research to leverage road safety investments in transport and health operations. We shall commit funds to support a specific research program on disability from road crashes and how to mitigate it globally through road safety. On Private Sector Enhanced due diligence on private sector projects. KBG will consider ways to enhance its due diligence regarding disability inclusion, including encouraging clients to adopt Good International Industry Practice (GIIP) related to disability inclusion and access. KBG will also prepare a Good Practice in industries favor people living with disability.
On Social Protection, we shall seek to advocate countries adopt projects that have Social Protection globally will be disability inclusive.

On our Staffing, We shall also ensure our staff in KBG Include people living with disability. Currently, the Bank follows a process of voluntary disclosure of staff with disabilities. The Bank commits to actively seeking to hire and retaining staff with disabilities, and to improving accessibility, services and inclusion. Our Strategic plan will canvas policies and, to the extent possible, practices of major multilateral and bilateral development agencies, aimed at including disability in development. Development that includes disability in which persons with disabilities participate as both actors and beneficiaries. This will be achieved by disability specific initiatives, by adding disability-specific components to development programs, by fully inclusive programming, designed to include disability concerns into all development processes, or by a combination of these approaches globally. We may not cover every one single case but by the grace of God, your funding and collaborations we shall attempt to provide as comprehensive as possible an overview of policies and practices on disability and development through the network of Nations we shall engage and partner globally and among major bilateral development agencies.

It should be noted that this is a dynamic issue and thus many development agencies are either in the process of crafting new disability policies or strategies or are currently reviewing their existing approaches with a view to modifying or amending them. We shall support international legal and policy framework pertinent to the consideration of D&D with particular attention to the Convention on the Rights of Persons with Disabilities and Global Development Goals. We shall partner with multilateral agencies and structures, particularly those who will seek our hand of partnership and reviews their existing policies and/or practices related to disability participation in development. We shall enhance our regional structures supporting the inclusion of disability in development. We shall advocate, promote and finance systems and global policies to take steps to design and implement programs and practices that are inclusive of disability.

It is estimated that 10 percent of the world's population. The majority of persons with disabilities are estimated to live in developing countries, the fact that reflects the distribution of the world's population. The prevalence of disability is observed to increase with the age of the population. Some Facts from Around the World Disability is a stronger correlate of non-enrollment in school than either gender or class. "Analysis of 14 household surveys from 13 developing countries suggests that 1-2 percent of the population have disabilities. Adults with disabilities typically live in poorer than average households: disability is associated with about a 10 percentage point increase in the probability of falling in the two poorest quintiles. Much of the association appears to reflect lower educational attainment among adults with disabilities. People of ages 6-17 with disabilities do not live in systematically wealthier or poorer households than other people of their age, although in all countries studied they are significantly less likely to start school or to be enrolled at the time of the survey. The order of magnitude of the school participation deficit associated with disability - which is as high as 50 percentage points in three of the 13 countries - is often larger than deficits related to other characteristics, such as gender, rural residence, or economic status differentials.

The global crisis of COVID-19 is deepening pre-existing inequalities, exposing the extent of exclusion and highlighting that work on disability inclusion is imperative. People with disabilities—one billion people— are one of the most excluded groups in our society and are among the hardest hit in this crisis in terms of fatalities. Even under normal circumstances, persons with disabilities are less likely to access health care, education, employment and to participate in the community. They are more likely to live in poverty, experience higher rates of violence, neglect and abuse, and are among the most marginalized in any crisis-affected community. COVID-19 has further compounded this situation, disproportionately impacting persons with disabilities both directly and indirectly. An integrated approach is required to ensure that persons with disabilities are not left behind in COVID-19 response and recovery. It calls for placing them at the centre of the response, participating as agents of planning and implementation. All COVID-19 related action must prohibit any form of discrimination based on disability and take into consideration the intersections of gender and age, among other factors. This is necessary effectively and efficiently to address and prevent barriers that may arise during response and recovery. Disability inclusion will result in a COVID19 response and recovery that better serves everyone, more fully suppressing the virus, as well as building back better. It will provide for more agile systems capable of responding to complex situations, reaching the furthest behind first. This Policy Brief highlights the impact of COVID19 on persons with disabilities and in doing so, outlines key actions and recommendations to make the response and recovery inclusive of persons with disabilities. While the brief contains specific recommendations focusing on key sectors, it identifies four overarching areas of action that are applicable for all.

1. Ensure mainstreaming of disability in all COVID-19 response and recovery together with targeted actions. A combination of mainstream and disability-specific measures are necessary to ensure systematic inclusion of persons with disabilities.
2. Ensure accessibility of information, facilities, services and programmes in the COVID-19 response and recovery. Accessibility is fundamental to the inclusion of persons with disabilities in the immediate health and socio-economic response to COVID-19. If public health information, the built environment, communications. A DISABILITY-INCLUSIVE RESPONSE TO COVID-19 technologies, and goods and services are not accessible, people with disabilities cannot take necessary decisions, live independently and isolate or quarantine safely, or access health and public services on an equal basis with others. 3. Ensure meaningful consultation with and active participation of persons with disabilities and their representative organizations in all stages of the COVID-19 response and recovery. Persons with disabilities have important contributions to make in tackling the crisis and building the future. Many persons with disabilities have experience of thriving in situations of isolation and alternate working arrangements that can offer models for navigating the current situation. Perspectives and lived experiences of disability contribute to creativity, new approaches and innovative solutions to challenges.
   Your Exellencies ladies and gentlemen,
   Helpers Of Africa International will support the Establishment of accountability mechanisms to ensure disability inclusion in the COVID-19 response. Ensure inclusive investments to support disability-inclusive outcomes. Governments, donors, development agencies and other actors need to establish mechanisms to monitor investments to ensure it is reaching persons with disabilities. Disaggregating data by disability is key to ensure accountability. Inclusion of persons with disabilities in the COVID-19 response and recovery is a vital part of achieving the pledge to leave no one behind, and a critical test of the global commitments of the Convention of the Rights of Persons with Disabilities (CRPD), the 2030 Agenda for Sustainable Development, the Agenda for Humanity and the Global Disability Inclusion Strategy. It is also central to the Helpers Of Africa International commitment to achieve transformative and lasting change on disability inclusion.

A DISABILITY-INCLUSIVE RESPONSE TO COVID-19 technologies, and goods and services are not accessible, people with disabilities cannot take necessary decisions, live independently and isolate or quarantine safely, or access health and public services on an equal basis with others.

3. Ensure meaningful consultation with and active participation of persons with disabilities and their representative organizations in all stages of the COVID-19 response and recovery. Persons with disabilities have important contributions to make in tackling the crisis and building the future. Many persons with disabilities have experience of thriving in situations of isolation and alternate working arrangements that can offer models for navigating the current situation. Perspectives and lived experiences of disability contribute to creativity, new approaches and innovative solutions to challenges.
4. Establish accountability mechanisms to ensure disability inclusion in the COVID-19 response. Ensure inclusive investments to support disability-inclusive outcomes. Governments, donors, development agencies and other actors need to establish mechanisms to monitor investments to ensure it is reaching persons with disabilities. Disaggregating data by disability is key to ensure accountability. Inclusion of persons with disabilities in the COVID-19 response and recovery is a vital part of achieving the pledge to leave no one behind, and a critical test of the global commitments of the Convention of the Rights of Persons with Disabilities (CRPD), the 2030 Agenda for Sustainable Development, the Agenda for Humanity and the United Nations Disability Inclusion Strategy.

It is also central to the Helpers Of Africa International commitment to achieve transformative and lasting change on disability inclusion. How COVID-19 impacts persons with disabilities Persons with disabilities are disproportionately impacted by the COVID19 outbreak. An estimated 46% of older people aged 60 years and over are people with disabilitie. One in every five women is likely to experience disability in her life, while one in every ten children is a child with a disability.2 of the one billion population of persons with disabilities, 80% live in developing countries.

This special population represent they represent a diverse population of people with different impairments and support requirements, who face significant barriers in exercising their rights throughout the lifecycle. Some groups face even greater marginalization—for example persons with intellectual and psychosocial disabilities, persons who are deafblind—who are more likely to be excluded from services, live or be detained in institutions, and experience higher rates of violence, neglect and abuse. Our strategic plan is a Shared Responsibility, Global Solidarity' with other players on the socio-economic impact of the pandemic reflects, COVID-19 is not simply a health crisis—it is attacking societies at their core.The response is feeding on pre-existing social and economic inequalities associated with disability and threatens to exacerbate them further.

Even in past disasters of earth quakes, floods, pademics etc people living with diasabilities were more affected more than others they are among the most marginalized people in crisis-affected communities 2 and are disproportionately affected by conflict and emergency situations. In disasters, their mortality rate is two to four times higher than that of persons without disabilities. Persons with disabilities are not aœhomogeneous group. They are diverse in their experience, in the ways that attitudinal, physical and communication barriers impede their participation and inclusion in humanitarian action, and in their identity, including their age, gender, ethnicity, location and race. Due to the intersectionality of these factors, persons with disabilities face greater marginalization and discrimination. During humanitarian crises, for example, children with disabilities are at higher risk of abuse and neglect, and women with disabilities are at higher risk of sexual violence.

Persons with disabilities are at greater risk of contracting COVID-19. They may experience barriers to implement basic protection measures such as hand-washing and maintaining physical distancing for several reasons: lack of accessibility of water, sanitation and hygiene (WASH) facilities; a reliance on physical contact to get support; inaccessibility of public health information; or being placed in institutional settings which are often overcrowded and unsanitary. These barriers are exacerbated for those living in informal settlements and/ or affected by humanitarian emergencies. Persons with disabilities are at greater risk of developing more severe health conditions and dying from COVID-19. They have greater health requirements and poorer health outcomes. For example, they are more susceptible to secondary conditions and co-morbidities, such as lung problems, diabetes and heart disease, and obesity, which can worsen the outcome of COVID-19 infections.

The barriers to accessing healthcare are further exacerbated during the COVID-19 crisis, making timely and appropriate care difficult for persons with disabilities. Persons with disabilities living in institutions are more likely to contract the virus and have higher rates of mortality. Persons with disabilities, including older people with disabilities, represent the majority of institutionalized people globally. People with disabilities are also overrepresented in the prison population, particularly persons with intellectual and psychosocial disabilities.

People in institutional settings, such as nursing homes, social care homes and psychiatric facilities, as well as detention facilities and penitentiaries, experience significant barriers to implement basic hygiene measures and physical distance, and have limited access to COVID-19-related information, testing and healthcare. Emerging evidence indicates that people in institutional settings are experiencing the highest rates of infection and mortality from COVID-19.The percentage of COVID-19 related deaths in care homes—where older persons with disabilities are overrepresented—ranges from 19% to 72% in countries in which official data is available. Persons with disabilities are at greater risk of discrimination in accessing healthcare and life-saving procedures during the COVID19 outbreak. In some countries, health care rationing decisions, including triage protocols, Moreover, access to healthcare, rehabilitation and assistive technologies for persons with disabilities, including with respect to accessibility and affordability,can also be curtailed due to the increased pressure on healthcare systems. Persons with disabilities are particularly disadvantaged by the socio-economic consequences of COVID-19 and measures to control the pandemic. COVID-19 has both shortterm and far-reaching implications for people with disabilities in many areas of life, which may be further exacerbated in humanitarian and disaster contexts and fragile settings: • Impact on employment and social protection. Already facing exclusion in employment, persons with disabilities are more likely to lose their job and experience greater difficulties returning to work during recovery. In most countries social protection systems offer little support to persons with disabilities and their families with much less access to social insurance. Only 28% of persons with significant disabilities have access to disability benefits globally, and only 1% in low-income countries. The increased demand for unpaid care and domestic work in the context of the pandemic is deepening already existing inequalities which may be exacerbated for women with disabilities.

Impact on education. While reliable figures on students with disabilities are not yet available, it is likely that the current crisis has exacerbated their exclusion from education. As detailed in the policy brief on the impact of COVID-19 on children, students with disabilities are least likely to benefit from distance learning solutions. Lack of support, access to the internet, accessible software and learning materials is likely to deepen the gap for students with disabilities. Disruption to skills and training programmes are likely to have far-reaching effects on youth with disabilities who face a multitude of barriers to entering the workforce. • Impact on support services. For many people with disabilities, access to support services is essential to lead safe, healthy and independent lives. Measures to contain the spread of COVID-19 have resulted in 12 A. support systems and informal networks, such as personal assistance, sign language and tactile interpretation, and psychosocial support. The economic impact of COVID-19 may also lead to even greater cuts within existing services in the post-pandemic period. • Impact of violence on persons with disabilities.

The policy brief on the impact of COVID-19 on women documents early reports which indicate a substantial increase of domestic violence in the midst of lockdown measures, which has a particular impact on women and girls with disabilities. Given that both children and adults with disabilities are at much higher risk of violence than their peers without disabilities, it can be assumed that they are disproportionately impacted. Increased stigma and discrimination against persons with disabilities within communities has also been reported. A human rights-based approach to disability is required to ensure persons with disabilities are not left behind. Both the CRPD and the 2030 Agenda call for placing persons with disabilities at the centre of all our efforts, as agents of planning and implementation. A combination of mainstreaming and targeted measures is necessary in all interventions. Persons with disabilities share the same primary needs as everyone else: health protection and treatment, basic services, shelter and income. The best way to address their inclusion is through mainstreaming disability in all plans and efforts. Targeted measures need to complement disability mainstreaming by addressing specific requirements that cannot be met by making general responses inclusive. Non-discrimination is a core human rights principle. COVID-19 response and recovery must prohibit discrimination on the basis of disability, as well as any criteria which could have a disproportionate impact on persons with disabilities. It is necessary to recognise and take measures against disadvantage experienced by persons with disabilities by taking proactive steps, including through reasonable accommodation, to ensure they equally benefit from COVID-19 response measures. Persons with disabilities experiencing intersectional and multiple discrimination as a result of their gender identity, age, ethnicity, race, sexual orientation, origin, location and legal status, among other factors, will carry a heavier burden of the immediate and longterm economic and social consequences of the pandemic.

COVID-19 response and recovery needs to reflect and respond to the multiple and intersecting forms of discrimination faced by persons with disabilities to ensure that the most marginalised groups among them are not left behind. Foundations for a disability-inclusive COVID-19 response and recovery. We are all in this together dear partners and donors for Reasonable Accommodation "Necessary and appropriate modification and adjustments not imposing a disproportiona te or undue burden, where needed in a particular case, to ensure to persons with disabilities the enjoyment or exercise on an equal basis with others of all human rights and fundamental freedoms". Our Disability and Development strategic plan will work towards, realizing the Global Sustainable Development Goals by, for and with persons with disabiliti es, Ensuring accessibility of facilities, services and information is fundamental to a disability inclusive COVID-19 response and recovery. If public health information, buildings, transport, communications, technologies, goods and services are not accessi ble, persons with disabilities cannot take necessary decisions, live independently and isolate or quarantine safely, or access health and public services on an equal basis with others. Such measures do not need to add great ly to overall cost especially if the needs of the maximum number of users are considered in the initial design.

This stratergic plan Research shows that if they are considered from the design stage, ensuring accessibility. Participation of Persons living with disabilities have the right to participate fully and effectively in decisions that affect their lives. They are a diverse, non-homogenous population who possess unique knowledge and lived experience of disability that others do not. Close consultation and active involvement of people with disabilities and their representative organizations at all stages–from planning and design to implementation and monitoring— is key to ensuring inclusive response. Partnerships and collaboration will improve effectiveness and accountability, assist i n directly achieving inclusion and ensuring that all action related to COVID-19 benefits persons with disabilities, and contributes to longer-term development and recovery. We shall seek a great global partnership with like minded organizations and institu tions to be able to reach every continent, countries, cities, counties and villages reaching to every community. Accountability is essential for ensuring that the COVID-19 response and recovery is inclusive and respectful of the rights of persons with disa bilities. Governments, Helpers Of Africa International departments, sections and entities and other actors are accountable to affected populations, including persons with disabilities, and mechanisms need to be established to engage with communities to inf orm programming and adjust it according to feedback.

Helpers Of Africa International will support global data disaggregation to understand the different ways in which people with disabilities experience the imp act of COVID19, and to monitor their inclusion in all phases of the response and recovery, ensuring the collection and availability of disaggregated data by disability i s essential. To that end, data will be collected using internationally recognized methods, such as the countries census protocals w ith partnerships with governments. More in-depth qualitative data can be collected through needs assessments and surveys, such as the Global Model Disability Survey. For planning purposes, wh ere primary data collection is not undertaken or secondary data sources on disability is not available. Other global organizations have more accurate 15 per cent estimate of persons with dis abilities in the population may be used. Our Global Universal design stardards means the design of products, environments, programm es and services to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design to get more accurate datas.

Our Structure outlines key actions to protect persons with disabilities from contracting COVID-19 and the impact of lockdowns, physical distancing and isolation measures, and to achieve a disability-inclusive response and recovery. To Support health of People with disabilities are more susceptible to contracting COVID-19, and barriers to accessing health services, including testing, are exacerbated during the crisis. Lockdowns can lead to restricted access to essential g oods and medicines, as well as limit access to supports. The disruption of wider health services puts persons with disabilities at a disadvantage as they may require more frequent access due to underlying health conditions.

We shall support to ensure accessible public health information with an appropriate response that requires measures to ensure that information is accessible, up to date, and keeps pace with the rapidly changing knowledge evidenced during the pandemic and after that will help us manage other pademics in future in the same platform .We shall support some countries that have already begun to produce information and links on COVID-19 in Easy-toRead format in multiple languages. Through the joint Global Partnership on the Rights of Persons with Disabilities programme information on COVID-19 included accessibility features, including sign language. Implement protective measures against COVID-19 and Access to appropriate WASH facilities that make frequent hand-washing possible is essential, as is the targeted provision of protective measures for those providing support to persons with disabilities either at home or in institutions. The distribution of personal protective equipment to persons with disabilities needs to be tailored to their impairment. For example, given that masks make it impossible to read lips or see facial expressions, deaf and hard of hearing persons will benefit better from face shields. Ensure accessibility to services. Measures need to be put in place to facilitate the timely access to health services for persons with disabilities, such as transportation to healthcare facilities, access to sign language interpretation in hospitals, as well as the procurement of goods, medicines and services. Essential health services, including sexual and reproductive health, must be accessible—for example, ensuring telehealth programmes are accessible for persons with disabilities who require different modes of communication.

We shall support national programme to test persons with disabilities in their homes, COVID-19 tests of persons with disabilities. Ensure non-discrimination in the allocation of scarce medical resources. It is important to mitigate the risk of discriminatory decisions in resource allocation that put people with disabilities at a high level of disadvantage by applying ethical principles that prioritize treatment for persons in situations of particular vulnerability. Make mental health interventions inclusive of persons with disabilities. Anxiety, lockdowns, isolation, and information consumption, loss of livelihoods and support systems due to the pandemic impact on mental health of all people, including persons with disabilities. As documented in the policy brief on the impact of COVID-19 on older persons, physical distancing measures that restrict visitors and group activities in institutions can also negatively affect physical, as well as mental health and well-being. Mental health and psychosocial support needs to be accessible and not discriminate against persons with disabilities. We seek an to support a disability-inclusive response to covid-19 protecting people in institutional settings Institutional settings have become COVID-19 hotspots, highlighting systemic challenges in these settings. People with disabilities in institutional settings face heightened risk of contracting and dying from COVID-19. Their situation is compounded by greater risks, such as abuse, restraint, isolation and violence. Prepare institutions to prevent and respond to potential infections.

We shall support prioritising testing and preventive measures within institutions to reduce infection risks, addressing overcrowding, isolation and physical distancing measures among residents, modifying visiting hours, ensuring use of protective equipment is mandatory, and improving hygiene conditions. It is important to guarantee that those who contract the virus receive adequate treatment and health care and, when needed, are transferred to hospitals and/or emergency care units, In some countries priority testing guidelines have been issued with specific measures for institutional settings. Reduce the number of people within institutions. It is important to take immediate action to discharge and release persons with disabilities from institutions, whenever possible. Deinstitutionalization strategies need to be accelerated and reinforced with clear timelines and concrete benchmarks. Reduce the number of persons with disabilities in prisons. Whenever possible, it will be important to explore early release and probation or shorten or commute sentences. Other possible measures would include reducing the use of pre-trial detention, and promptly ensuring support in the community through family and/or informal networks.
In a number of countries around the world prisoners with disabilities have been released.

We shall support services for people living with disabilities. Many persons with disabilities rely on support services for daily living and to participate in their communities. These include personal assistance, sign language and tactile interpretation, in-home services and peer support, amongst others. Ensure the continuity of support services. It is important to develop and implement service continuity plans, particularly for people with disabilities with high support needs, as well as measures to reduce potential exposure to COVID-19 during the provision of services. This includes practical guidance and updated advice to informal carers on how to support persons with disabilities in a manner safe for everyone. Expand community support for persons with disabilities. The growth in demand for support services in the community without a corresponding supply of services can increase pressure on families to provide unpaid, informal care, with negative consequences on both persons with disabilities and family members, particularly women. In some countries persons who provide support to people with disabilities are exempted from restrictions of movement and physical distancing.We shall recruit and train volunteers as social, health and first aid workers to support persons with disabilities and older persons with their groceries and other purchases.

We shall support and advocate social protection and employment for people living with disability. Social protection has already proven a key element in the immediate relief to be provided to persons affected by the socio-economic impact of the crisis. It is particularly relevant for persons with disabilities out of work, who have lost their job or their income resulting from the informal economy, all of which are at risk of poverty and extreme poverty. Expand mainstream and disability-targeted social protection and adapt delivery mechanisms to provide adequate relief and support to persons with disabilities and their families.

This strong support is crucial through your funds and this can be done by: advancing and/ or increasing payments of disability benefits; extending coverage to persons with disabilities already registered but who were not previously eligible, and through (online) registration of persons with disabilities; providing disability top-ups to beneficiaries of mainstream social assistance schemes, including to family members who have to stop work to support persons with disabilities; and establishing electronic payment and home delivery for cash and essential food and non-food items. Employment and working conditions need to be responsive to accessibility and inclusion. Persons with disabilities who continue working, whether essential workers or others, may need specific protection or adjustments to stay safe during the pandemic. At all times it is important that employers and workplaces provide accessible environments and reasonable workplace adjustments based on individual needs. Persons with disabilities who own businesses or work in the informal economy may need particular support to be able to maintain their livelihoods. Alternate working arrangements and conditions made accessible and inclusive. Platforms and new ways of meeting must be accessible to all, and adequate adjustments put in place to allow persons with disabilities to work from home. This we shall advocate and support strongly.

We shall support governments and organizations to ensure disability-inclusive Occupational Health and Safety (OSH) measures. New OSH measures may apply particularly to persons with disabilities. In such cases, different arrangements may be required, such as priority to work from home or placed in paid leave. Approaches to coming out of lockdown need to be sensitive to the particular situation of persons with disabilities. Persons with disabilities and their family members or support services have different levels of vulnerability to COVID-19. Some persons with disabilities, including older persons with disabilities, may need to isolate for longer than other groups. Social protection and working arrangements need to be adaptive to support their ability to do this. Together with other institutions we shall develop more action plans developed a guidance note on socioeconomic actions for persons with disabilities. We shall avail Information on disability inclusion in COVID-19 and the world of work and Social protection measures for persons with disabilities in the COVID-19 crisis.

On EDUCATION Students with disabilities are likely to face greater barriers in accessing distance learning or rejoining classes once they are available, and face increased risk of dropping out of education during disruptions to learning. Ensure distance learning is accessible to, and inclusive of, students with disabilities. Education actors need to take measures to ensure continuity of learning for students with disabilities and return to school programmes. This may include providing specialized equipment to support their learning, including assistive technology and devices, and support to caregivers/parents of children with disabilities.

We shall partner and support production of material a guidance note for staff and partners on supporting the learning of children in areas of school closures, which includes guidance on making learning accessible to children with disabilities. We shall address impacts that go beyond learning. For many children with disabilities, peer relations, social perception and social competence are significant aspects of their Individual Education Plans, all of which are challenged in the context of school closures. School closings can also mean that many children with disabilities will not access complementary services, such as food and medical check-ups, or referral mechanisms for abuse and neglect. Ensure that return to school programmes are inclusive. Education actors need to ensure that return to school programmes are inclusive of children and young persons with disabilities, in recognition of the increase in the learning/achievement gap. This may include development of plans for accelerated education, remedial, and catch-up programmes.

We shall assist mitigation and prevention of and response to violence Persons with disabilities often face incidents of violence in situations of isolation, with women and girls with disabilities at even higher risk. Reporting and access to domestic violence services and assistance are particularly challenging, as these are commonly not inclusive of, nor accessible to persons with disabilities. Ensure inclusive and accessible victim assistance services. It is important to ensure that reporting mechanisms and access to victim assistance services are accessible to persons with disabilities. Being proactive and innovative in outreach to those who are isolated, including through voluntary networks, has proven to be a key measure, as well as ensuring that online counseling and other technology based solutions are accessible and respond to the diversity of people with disabilities. Strengthen awareness raising and knowledge. Building capacity of services and communities to prevent disability-related violence is key, as is promoting awareness-raising about violence against persons with disabilities, particularly women and girls. We shall collaborate with like minded institutions working with partners to integrate COVID-19 aspects to improve quality and standards for counselling and case management services that will particularly target women with disabilities to run campaigns on ending violence against women in a pandemic.

We shall also support the humanitarian outcomes that come with Persons with disabilities in humanitarian and disaster contexts face specific and heightened challenges in the COVID-19 outbreak: barriers to implementing basic hygiene measures; physical distancing limitations in high-density sites; barriers to accessing health care on the basis of both disability and legal status, which may determine and restrict their access to health care and other services. We shall form Inter-Agency Committees and forums to layout Guidelines on Inclusion of Persons with Disabilities in Humanitarian Action provide detailed sectoral information for stakeholders working in humanitarian contexts Ensuring disability-inclusive humanitarian assistance and disaster response.

We shall support National and local coordination mechanisms and networks, as well as Preparedness and Response Plans need to be disability-inclusive. In particular, it is important to ensure that Humanitarian Response Plans factor in responses targeted towards persons with disabilities, including in WASH, health, and food and nutrition, with adequate resourcing, monitoring and adjustment, as required. Concrete adaptions in humanitarian assistance could include, for example, improving accessibility of WASH facilities; distribution of additional or disability-specific hygiene items and supplies; targeted shelter assistance for at-risk individuals to allow for physical distancing; in-kind provision of goods, cash and voucher assistance, and direct service provision; and providing alternative arrangements for food and non-food items distribution to households of persons with disabilities along with “Sexual and reproductive health and rights of girls with disabilities: a review of the literature”,

Everything we do during and after the COVID-19 crisis must have a strong focus on building more equal, inclusive and sustainable economies and societies that are more resilient in the face of pandemics and the many other global challenges we face. Countries' immediate efforts towards social and economic recovery will be crucial for progress towards the Sustainable Development Goals (SDGs), including addressing inequalities and ensuring that no one is left behind. While building back better, it is critical that persons with disabilities are part and parcel of the response which countries, with the support of Helpers Of Africa International prepare plans for countries. These responses, if well designed, can address the exclusion and discrimination faced by persons with disabilities, thus creating more resilient communities and systems. To build equal, inclusive and resilient communities it is important to meaningfully engage persons with disabilities at all stages of the response: When supporting local initiatives, governments, our partner entities, international donors and civil society organizations need to promote, fund and monitor the inclusion of persons with disabilities in all stages of design and implementation of the relevant measures. We shall seek to Prioritize persons with disabilities in the socio-economic response: National and sub-national economic models and assumptions need to be critically reviewed to identify gaps that disproportionately impact persons with disabilities and take into account the cost of underinvestment in disability-inclusion. Track inclusion and empowerment of persons with disabilities in national response and recovery plans: A long-term inclusive response needs to be closely tied to inclusive national development planning and financing processes. Disability inclusion should be a requirement in all COVID-19 actions and systems to allow tracking and accountability.

We shall seek to improve health outcomes for persons with disabilities: This entails building accessible health systems, rights-based training of health personnel and ensuring universal health coverage for persons with disabilities as a cornerstone for achieving the health-related global targets. Further, improving the determinants of health for persons with disabilities is critical.

We shall seek to build sustainable and disability inclusive social protection systems, Universal disability allowances across the life cycle addressing disability-related. Delivering on global health goals. We shall set extra funds to design that these are compatible with employment and other social assistance schemes aiming at basic income security and Address the specific situation of workers with disabilities in all sectors: Stimulus packages, including those that will promote training and jobs in the transition to a green economy should explicitly include persons with disabilities in general, as well as women and youth with disabilities in particular by Investing in community-based solutions now: Particular attention needs to be given to persons with disabilities living in residential institutions and funds should be used to initiate, accelerate and complete deinstitutionalization strategies and transition to community-based solutions. This includes investing and developing support services and implementing inclusive services at local level, such as education and primary health care, including rehabilitation, as cornerstones for achieving the global health goals and targets for persons with disabilities.

We shall mobilize, support and Initiate multi-stakeholder dialogue and collaboration: Inter-sectoral linkage is required to address the multi-dimensional nature of disability and the intersectoral response that is necessary. Bringing together all stakeholders— government, Helpers Of Africa International entities, private sector, organizations of persons with disabilities and broader civil society—in the design, implementation and monitoring of the long-term rebuilding plan will be critical.

COVID-19 has created a human crisis of unprecedented scale, which is disproportionately impacting one billion people with disabilities. This requires an unprecedented response—an extraordinary scale-up of support and political commitment—to ensure that people with disabilities have access to essential services, including to immediate health and social protection services, to tide over the crisis. A disability inclusive COVID-19 response and recovery will better serve everyone. It will provide for more inclusive, accessible and agile systems capable of responding to complex situations, reaching the furthest behind first. It will pave the way for a better future for all.

Our strategic plan on disability will be produced in partnership with the other like minded organizations, as previous experience has shown the benefit of collaboration between agencies for increasing awareness, political will and action across sectors. Our strategic plan will help policy-makers, practitioners, researchers, academics, development agencies, and civil society.

Aims the overall aims of the Report are:

- To provide governments and civil society with a comprehensive description of the importance of disability and an analysis of the responses provided, based on the best available scientific information.
- Based on this analysis, to make recommendations for action at national and international levels.

The Scope of the strategic plan focuses on measures to improve accessibility and equality of opportunity; promoting participation and inclusion; and increasing respect for the autonomy and dignity of persons with disabilities. We shall seek to define disability, discusses prevention and its ethical considerations, introduces the International Classification of Functioning, Disability and Health and the, and discusses disability and human rights, and disability and development, will reviews the data on disability prevalence and the situation of people with disabilities worldwide. Will also explores access to mainstream health services for people with disabilities. Will also discusses rehabilitation, including therapies and assistive devices. It will investigate support and assistance services and explore inclusive environments, both in terms of physical access to buildings, transport, and so on, but also access to the virtual environments of information and communication technology. It will also discusses education and review employment for people with disabilities.

Our smart team of consultants globally dealing with research on health, education, food production, development, charity, shelta, orphans etc of all our projects and programs consists of consultants, reseachers, editors, experienced people in all fields with global exposure along with an editorial board led by people with various disabilities.

Our strategic plan charts the steps that are required to improve participation and inclusion of people with disabilities. The aspiration of Helpers Of Africa International and her entities / departments. Our strategic plan on disability is that it contributes to concrete actions at all levels and across all sectors, and thus helps to promote social and economic development and the achievement of the human rights of persons with disabilities across the world.

For us to really under the need try to figure out the Environment A person's environment has a huge impact on the experience and extent of disability. Inaccessible environments create disability by creating barriers to participation and inclusion. Examples of the possible negative impact of the environment include:

- A Deaf individual without a sign language interpreter
- A wheelchair user in a building without an accessible bathroom or elevator
- A blind person using a computer without screen-reading software. Health is also affected by environmental factors, such as safe water and sanitation, nutrition, poverty, working conditions, climate, or access to health care.

Such changes can be brought about by legislation, policy changes, capacity building, or technological developments leading to, for instance: accessible design of the built environment and transport;

- Signage to benefit people with sensory impairments;
- More accessible health, rehabilitation, education, and support services;
- More opportunities for work and employment for persons with disabilities. Environmental factors include a wider set of issues than simply physical and information access. Policies and service delivery systems, including the rules underlying service provision, can also be obstacles.

Our strategic plan focuses human functioning in three interconnected areas:

- Impairments are problems in body function or alterations in body structure – for example, paralysis or blindness;
- Activity limitations are difficulties in executing activities – for example, walking or eating;
- Participation restrictions are problems with involvement in any area of life – for example, facing discrimination in employment or transportation. Disability refers to difficulties encountered in any or all three areas of functioning

We shall also focus on “physical” and “mental” health. “Health conditions” are diseases, injuries, and disorders, while “impa irments” are specific decrements in body functions and structures, often identified as symptoms or signs of health conditio ns. Disability arises from the interaction of health conditions with contextual factors – environmental and personal factors as shown in the figure below. Representation of the International Classification of Functi oning, Disability and Health Health condi tion (disorder or disease) Body functions and structures Activities Participation Environmental factors Personal factors. However, policy-making and service delivery might require thresholds to be set for impairment severity, activity limitations, or parti cipation restriction. It is useful for a range of purposes – research, surveillance, and reporting – related to describing and measuring health and disability, including: assessing individual functioning, goal setting, treatme nt, and monitoring; measuring outcomes and evaluating services; determining eligibility for welfare benefits; and developing health and disability surveys.

Stigmas reduction include dealing with

- Children bullying other children with disabilities in schools
- Bus drivers failing to support access needs of passengers with disabilities
- Employers discriminating against people with disabilities
- Strangers mocking people with disabilities. Negative attitudes and behaviours have an adverse effect on children and adults with disabi lities, leading to negative consequences such as low self-esteem and reduced participation. People who feel harassed because of their disability sometimes avoid going to places, changing their routines, or even moving from their homes. Stigma and discrimination can be combated,
- Reach of media campaign. The radio and TV spots were seen by 59% of respondents, or 275 million people.
- Transmissibility and curability. The proportion of people who believed leprosy was transmitted by touch fell from 52% to 27%. The proportion believing that people with leprosy who take multidrug therapy are still infectious fell from 25% to 12%. Those who knew that leprosy was curable ro se from 84% to 91%. they undertake to:
    - Adopt legislation and other appropriate administrative measures wh ere needed;
    - Modify or repeal laws, customs, or practices that discriminate directly or indirectly;

The strategic plan to support those living in disabilities includes

- Include disability in all relevant policies and programmes;
- Refrain from any act or practice inconsistent with health stardards
- Take all appropriate measures to eliminate discrimination against persons with disabilities by any person, organization, or private enterprise.
- People with disabilities may have extra costs resulting from disability – such as costs associated with medical care or assistive devices, or the need for personal support and assistance – and thus often require more resources to achieve the same outcomes as non-disabled people. This is what Amartya Sen has called "conversion handicap"
- Because of higher costs, people with disabilities and their households are likely to be poorer than non-disabled people with similar incomes
- Households with a disabled member are more likely to experience material hardship – including food insecurity, poor housing, lack of access to safe water and sanitation, and inadequate access to health care
- Information about programmes should be accessible and reach the intended recipients. This may require targeted outreach;
- Proxies designated by persons with disabilities should be allowed to conduct many of the transactions in accessing programmes;
- The welfare offices, as well as the transport system, need to be accessible;
- Programmes' eligibility criteria may need to specifically include disability;
- Means testing mechanisms may need to take into account the extra costs of disability;
- Cash transfers might provide higher payments to beneficiaries with disabilities to help with extra costs of living with a disability;
- Conditional cash transfers may need to be adjusted to specific circumstances of children with disabilities;
- Workfare can introduce quotas and be sensitive to disability;
- Labour activation measures should be sensitive to disability.
- promote the need for inclusive development for people with disabilities in the mainstream health, education, social, and employment sectors;
- Emphasize the need to promote the empowerment of people with disabilities and their family members;
- Through the provision of practical suggestions, position CBR as a tool that countries can use to implement the Convention on the Rights of Persons with Disabilities. There was a high degree of consistency between the responses to the census
- Of those in private households who reported a disability in the census, also reported a disability;
- Of those in non-private households who reported a disability in the census, also reported a disability.
- Of those in private households who did not report a disability in the census, were found to have a disability in the NDS. Extrapolating the NDS findings to the whole population produced an overall national disability rate of 18.5%.
- The differences in the disability rates obtained in the census may result from the following:
- Used face-to-face interviews, while the census forms were self-completed.
- The census was a large survey designed for a range of purposes. Define the difficulties in functioning in any of the following domains: seeing, hearing, speech, mobility and dexterity, remembering and concentrating, intellectual and learning, emotional, psychological, and mental health, and pain and breathing.
- The inclusion of a pain domain in the resulted in a significantly higher disability rate, with of those not reporting disabilities in the census reporting pain.
- Those who only reported a disability had a lower level of difficulty and were more likely to have only a single disability, rather than disabilities in several domains.
- More children reported a disability than in the census,
- Complications and long-term disability from traumatic injuries, from lack of appropriate follow-up;
- Complications and premature mortality in individuals with chronic diseases, as a result of suspended treatment and delayed access to health care;
- Permanent hearing loss caused by explosions, stemming from the lack of early screening and appropriate treatment;

- Long-term mental health problems from the continuing insecurity and the lack of protection. A variety of measures can reduce the vulner ability of persons with disabilities including:
- Effective planning to meet disability needs by humanitarian organizations before crises;
- Assessments of the specific needs of people with disabilities;
- Provisions of appropriate services;
- Referral and follow-up services where necessary.
- Base definitions and national data standards on the ICF.

The strategic plan to support those living in disabilities includes

- As a first step national population census data can be collected in line with recommendations fr om the United Nations Washington Group on Disability and the United Nations statistical commission.
- A cost-effective and efficient approach to gain comprehensive data on persons with disabilities is to add disability questions – or a disability module
- Dedicated disability surveys can be carried out to gain extensive information on disability and functioning – such as prevalence, health conditions associated with disability, use of and need for services, and other environmental factors, including on person s living in institutions and children.
- Data on persons with disabilities or those at particular risk of disability, including displaced persons, can also be collect ed through specific surveys in humanitarian crises. 46 World report on disability
- Administrative data collections can provide information on users, types and quantity of services and cost of services. In mainstream administrative data collections, standard disability identifiers can be included to monitor access to services by people with disab ilities.
- Statistical linkage of various data sets can allow countries to bring together an array of information on a person from diffe rent time points, while at the same time protecting that individual's confidentiality. These linkage studies can often be conducted quickly and at relatively low cost.
- Assess existing policies, systems, and services, including an analysis of the needs, experiences, and views of people with di sabilities, identify gaps and priorities to reduce health inequalities and plan improvements for access and inclusion.
- Make required changes in policies, systems, and services to comply with the CRPD.
- Establish health care standards related to care of persons with disabilities and frameworks and enforcement mechanisms to ens ure standards are met.
- Involve people with disabilities in audits and related development and implementation of policies and services. Financing and affordability
- Ensure that people with disabilities benefit equally from public health care programmes.
- In countries where private health insurance dominates health care financing, ensure that people with disabilities are not denied insurance and consider measures to make the premiums affordable for people with disabilities.
- Use financial incentives to encourage health-care providers to make services accessible and provide comprehensive assessments, evidence-based treatment, and follow-ups.
- In low-income and middle-income countries, where effective primary care and mechanisms of disbursement exist, consider targeted con ditional cash transfer schemes linked to the use of health care to improve affordability and the use of services.
- Consider options for reducing or removing out-of-pocket payments for people with disabilities who do not have other means of financing health care services.
- Consider providing support to meet the indirect costs associated with accessing health care, such as transport. Service deliv ery
- Empower people with disabilities to maximize their health by providing information, training, and peer support. Where appropriate, include family members.
- Provide a broad range of reasonable accommodations.
- Support primary health-care workers with specialists, who may be located elsewhere.

- Explore the options for use of communication and information technologies for improving services, health care capacity, and information access to persons with disabilities.
- Identify groups who require alternative service delivery models, for example, targeted services, care coordination to improve access to health care.
- In high-income countries incorporate disability access and quality standards into contracts with public, private, and voluntary service providers.
- Promote community-based rehabilitation, specifically in less-resourced settings, to facilitate access for disabled people to existing services. Human resources
- Integrate disability education into undergraduate and continuing education for all health care professionals.
- Involve people with disabilities as providers of education and training wherever possible.
- Provide evidence-based guidelines for assessment and treatment emphasizing patient-centred care.
- Train community workers so that they can play a role in screening and preventive health care services. Data and research
- In health and disability related research use the ICF, to provide a consistent framework.
- Conduct more research on the needs, barriers to general health care, and health outcomes for people with specific disabilities.
- Establish monitoring and evaluation systems to assess interventions and long-term health outcomes for people with disabilities.
- Include people with disabilities in research on general health care services.
- Include people with disabilities in health care surveillance by using disability.
- Prevention of the loss of function
- Delivering simple therapeutic strategies through rehabilitation workers, or taught to individuals with disabilities or a family member. Examples include adopting a better posture to prevent contractures, and training in daily living skills
- Providing individual or group-based educational, psychological, and emotional support services for persons with disabilities and their families.
- Involving the community. quality, the devices need to:
- Suit the environment donate more wheelchairs in low-income and middleincome countries,
- Be suitable for the user. Poor selection and fit of assistive devices, or lack of training in their use, may cause further problems and secondary conditions. Devices should be selected carefully and fitted properly. Users should be engaged in assessment and selection to minimize abandonment because of a mismatch between need and device.
- Include adequate follow-up to ensure safe and efficient use.
- Video and teleconferencing technologies in accessible formats;
- Mobile phones to those living with disability to imporove communication
- Remote data-collection equipment and telemonitoring – for example, cardiac monitors. Technology may be used by people with disabilities, rehabilitation workers, peers, trainers, supervisors, and community workers and families.
- Telepsychiatry services, cardiac rehabilitation, speech and language therapy, and cognitive rehabilitation for people with traumatic brain injury;
- Remote assessments to provide home modification services to underserved elderly people
- Training and support of health-care personnel;
- Computerized guidelines to help clinicians use appropriate interventions;
- Consultation between tertiary hospital and community hospitals for problems related to prosthetics, orthotics, and wheelchair prescription;
- Sharing professional expertise between countries, as well as at critical times such as in the aftermath of a disaster. is needed, particularly on
- The link between rehabilitation needs, receipt of services, health outcomes (functioning and quality of life), and costs;
- Access barriers and facilitators for rehabilitation, models of service provision, approaches to human resource development, financing modalities, among others;
- Cost–effectiveness and sustainability of rehabilitation measures, including community-based rehabilitation programmes. Obstacles to strengthening research capacity include insufficient rehabilitation researchers, inadequate infrastructure to train and mentor researchers, and the absence of partnerships between relevant disciplines and organizations representing persons with disabilities. Obtain information on good practices through:

- Guidelines that apply research knowledge, usually on a specific health condition, to actual practice for clinici ans.
- An independent search for specific interventions.
- Continuing professional education.
- Clinical guidance notes on good practice from employers and health organizations.
- Discipline-specific Internet databases that appraise the research for clinicians.
- Guide policy-makers in developing appropriate services
- Allow rehabilitation workers to employ appropriate interventions
- Support people with disabilities in decision-making. Long-term longitudinal studies are needed to ascertain if expenditure for health and health-related services decreases if rehabilitation services are provided.
- Involve end-users in planning and research, including people with disabilities and rehabilitation workers, to increase the probability th at the research will be useful.
- Use the ICF framework to help develop a global common language and assist with global comparisons.
- Use a range of methodologies. More research such as that by the Cochrane Collaboration (Rehabilitation and Related
- Systematically disseminate results so that: policy across government reflects research findings, clinical practice can be evidencebased, and people with disabilities and their families can influence the use of research.
- Enhance the clinical and research environment. Providing international learning and research opportunities will often involve linking universities in developing countries with those in high-income and middleincome countries. Disability A broad range of stakeholders have roles to play:
- Advocate to Governments to develop, implement, and monitor policies, regulatory mechanisms, and standards for rehabilitation services, as well as promoting equal access to those services.
- Service providers should provide the highest quality of rehabilitation services.
- Other stakeholders (users, professional organizations etc.) should increase awareness, participate in policy development, and monitor implementation.
- International cooperation can help share good and promising practices and provide technical assistance to countries that are introducing and expanding rehabilitation services. Policies and regulatory mechanisms
- Assess existing policies, systems, services, and regulatory mechanisms, identifying gaps and priorities to improve provision.
- Develop or revise national rehabilitation plans, in accord with situation analysis, to maximize functioning within the population in a financially sustainable manner.
- Where policies exist, make the necessary changes to ensure consistency with the Global stardards.
- Where policies do not exist, develop policies, legislation and regulatory mechanisms coherent with the country context and with the CRPD. Prioritize setting of minimum standards and monitoring. Financing Develop funding mechanisms to increase coverage and access to affordable rehabili tation services. Depending on each country's specific circumstances, these could include a mix of:
- Public funding targeted at persons with disabilities, with priority given to essential elements of rehabilitation including a ssistive devices and people with disability who cannot afford to pay.
- Promoting equitable access to rehabilitation through health insurance.
- Expanding social insurance coverage.
- Public-private partnership for service provision.
- Reallocation and redistribution of existing resources.
- Support through international cooperation including in humanitarian crises. Human resources Increase the numbers and capacity of human resour ces for rehabilitation. Relevant strategies include:
- Where specialist rehabilitation personnel are in short supply, develop standa rds in training for different types and levels of rehabilitation personnel that can enable career development and continuing education across levels.
- Establish strategies to build training capacity in accord with national rehabilitation plans.

- Identify incentives and mechanisms for retaining personnel especially in rural and remote areas.
- Train non-specialist health professionals (doctors, nurses, primary care workers) on disability and rehabilitation relevant to their roles and responsibilities.
- Developing basic rehabilitation services within the existing health infrastructure.
- Strengthening rehabilitation service provision through community-based rehabilitation.
- Prioritizing early identification and intervention strategies using community workers and health personnel. Where services exist, expand service coverage and improve service quality. Relevant strategies include:
- Developing models of service provision that encourage multidisciplinary and client-centred approaches.
- Ensuring availability of high quality services in the community.
- Improving efficiency by improved coordination between levels and across sectors. In all settings, three principles are relevant:
- Include service-users in decision-making.
- Base interventions on sound research evidence.
- Monitor and evaluate outcomes. Technology Increase access to assistive technology that is appropriate, sustainable, affordable, and accessible. Relevant strategies include:
- Establishing service provision for assistive devices.
- Training users and following up.
- Promoting local production.
- Reducing duty and import tax.
- Improving economies of scale based on established need. To further enhance capacity, accessibility and coordination of rehabilitation measures the use of information and communication technologies - telerehabilitation - can be explored. Research and evidencebased practice
- Increase research and data on needs, type and quality of services provided, and unmet need (disaggregated by sex, age, and associated health condition).
- Improve access to evidence-based guidelines on cost-effective rehabilitation measures.
- Disaggregate expenditure data on rehabilitation services from other health care services.
- Community access – including day care centres;
- Information and advice services – including professional, peer support, advocacy, and supported decision-making;
- Assistance animals – such as dogs trained to guide people with a visual impairment.
- In childhood – respite care, special needs assistance in education;
- In adulthood – advocacy services, residential support, or personal assistance in the workplace;
- In old age – day centres, home-help services, assisted living arrangements, nursing homes, and palliative care. Often, problems in service provision occur between these stages – such as between childhood and adulthood.
- Communication support. Deaf people frequently have difficulties in recruiting and training interpreters, particularly in rural or isolated communities
- Respite services. In the United Kingdom a large study of family caregivers of adults with intellectual disability found that 33% had a high but unmet need for respite services and 30% a high but unmet need for home-based services.
- The ageing of consumers and ageing of family members who provide support point to a greatly increased demand for support services.
- Excessive demands on children. When adults acquire a disability, children are often asked to help.
- Greater difficulties as family member's age. As parents or other family members contributing to care grow older and become frail or die, it can be difficult for the remaining family to continue providing care.
- Deal with slums challnges open sewage, rotting garbage, broken glass, and excrement and urine strewn around wards and common areas;
- Inadequate staffing in schools
- A lack of proper medical attention and medical record-keeping;

- Shortages of food and medicines;
- The detention of children with adults;
- A lack of adequate mental health services or rehabilitation.
- Support institutional assistance and support services, including: health care, crisis response systems, housing assistance, income support
- Support for social networks of people living in the community.
- Vocational training and resource centres;
- Rehabilitation centres providing specialist secondary and tertiary services;
- Smaller home units where people with complex impairments can live semi-independently with some support;
- Respite facilities where people with disabilities can come for short breaks and training;
- Clubs or similar centres for people with mental health issues to achieve peer support and respite;
- Emergency sheltered accommodation, not only for people with disabilities but for all who may be vulnerable to abuse or exploitation
- A needs assessment. This identifies and ranks the care and support needs of a person, without taking into account possible funding and services;
- Service coordination or planning. This identifies the most appropriate services and support options to meet the assessed needs, within the available funding;
- Provision of services. This is generally a support package of services for the person with disability, as well as for the family, where appropriate.
- Improving health and well-being.
- Improving the quality of life
- Making a positive contribution to livehood
- Choice and control
- Freedom from discrimination
- Economic well-being
- Personal dignity.
- Quality standards
- Simplifying funding procedures
- An assessment system
- As participants on management boards
- As members of advisory groups of people with disabilities
- In making decisions for themselves.
- More Advocates & good will amabassadors – where the person is supported one-on-one by a trained and skilled individual to make and carry through a decision.
- Increase is Support systems & Circles of support – networks of supporters and friends who know the person well and who can make decisions to which the person freely consents.
- KeyRing or living support networks – where people with intellectual impairments live in the community, but with a “community living worker” available to provide support and help make connections in the community.
- User-controlled independent living trusts – similar to circles of support, but with a legal structure that sets up the necessary framework of decision-making around the individual.
- Service brokerage – where a skilled supporter enables the person to choose services, helping with the assessment process and supporting implementation of assistance packages.
- The independent living movement brings together people from different impairment groups, and offers services such as peer support, information, training and personal assistance, with staff who themselves have disabilities. However, unlike those in developed countries, centres for independent living do not tend to receive money from the state, but instead have to raise their own funds, such as through employment brokerage services.

- Developing a multisectoral programme in partnership with the Department of Education and the parents association. It supports the training of teachers and parents on providing appropriate personal assistance, so that children with severe impairments can attend local mainstream schools.
- Setting up national association of parents of disabled children found that parents required support in how to teach, train and handle their child; information about the rights of people with disabilities and how to work with professionals; and information on how to create teaching aids and obtain equipment.
- Supporting community-based daycare centres for children with intellectual disabilities and cerebral palsy, with the help of local government and parents. The community contributes the venue and provides lunch for the children.
- Advocate with the government providing funding, direction, advice, and monitoring at the national and district levels. As the CBR model strengthens the quality of the relationship between people with disabilities and their families, it can bring significant support to people with disabilities and caregivers
- Advocating to Countries to entrence National Disability Discrimination Act (1992) encourages organizations to create action plans to eliminate discrimination in provision of goods, services and facilities.
- Supporting and advocating gorvernments to offer framework for government to begin removing barriers to the participation of people with disabilities
- Supporting the vision of complete access and seeks to eliminate discrimination at all levels. CBR programmes can also promote local action plans in low-income and middleincome countries
- Plan adequately for the transition to a community-based service model, including human resources and sufficient funding for the transition phase.
- Progressively develop and reallocate resources to build community support services, including the possible transformation of institutions into alternative care services such as resource or day care centres. Foster development of the support services infrastructure
- Include the introduction and development of formal assistance and support services – customized to different economic and social environments – in national disability action plans to improve participation of persons with disabilities.
- Support the development of a range of providers – state, not-for-profit providers, for-profit entities, and individuals – and models to meet, in a cost-effective manner, the diverse assistance and support needs of people with disabilities.
- Consider a variety of financing measures including: contracting out services to private providers, offering tax incentives, and devolving budgets to people with willing to implement our strategic plan on disability disabilities and their families for direct purchases of services.
- In low-income and middle-income countries, support service provision through civil society organizations, which can expand the coverage and range of services. Ensure maximum consumer choice and control This is more likely to be achieved by formal services when:
- Services are individualized and flexible rather than “one size fits all” agency-based and controlled services.
- Consumers are involved in decisions on the type of support and direct the care tasks wherever possible rather than being a passive recipient of care.
- Providers are accountable to consumers and their relationship is regulated through a formal service arrangement.
- Allocation of resources well and raising more partners and donors and good distribution sytem and accountability
- Direct or indirect financial support. Provide some cash benefit for caregivers in families with people with disabilities (62, 159).
- Psychosocial support services to improve family well-being.
- Paid sick leave and other support from employers to facilitate family caring. Families can benefit from opportunities for autonomy and support services.
- In complaints procedures
- During evaluation and feedback
- Assess the service outcomes and economic benefits of rehabilitation.
- Community support and independent living – assistance with self-care, household care, mobility, leisure, and community participation;
- Residential support services – independent housing and congregate living in group homes and institutional settings;
- Respite services – short-term breaks for caregivers and people with disabilities;
- Support in education or employment – such as a classroom assistant for a child with a disability, or personal support in the workplace;
- Communication support – such as signlanguage interpreters;

- It will include the people with disabilities in development initiatives by training community development workers, villages, to identify people with disabilities, deliver basic care and refer.
- It will increase the proportion of persons with paraplegia having access to both hospital and community-based rehabilitation services.
- It will increase awareness among community and family members, disabled persons, and professionals about disability prevention and disability management, through publishing eight new awareness materials in the local language.
- Identifying people with impairments and facilitating referrals.
- Ensure that data collection cover the broad array of ICF domains – impairments, activity limitations and participation restrictions, related health condition, environmental factors – even if a minimal set of data items is to be selected. Improve national disability statistics At the national level, information about people with disabilities is derived from censuses, population surveys and administrative data registries.
- Employ a "difficulties in functioning approach" instead of an "impairment approach" to determine prevalence of disability to better capture the extent of disability.
- Slowing the rate of loss of function
- Improvement or restoration of function
- Compensation for lost function
- People who are hard of hearing may need speech-reading, assistive listening devices, and good environmental acoustics in indoor settings (16). Deaf and deafblind people use sign languages. hearing loss in both ears.
- People who are blind or have low vision require instruction in Braille, equipment to produce Braille materials, and access to library services that provide Braille, audio and large-print materials, screen readers, and magnification equipment. About 314 million people around the world have impaired vision, due either to eye diseases or uncorrected refractive errors. Of this number, 45 million people are blind.
- People with intellectual impairments need information presented in clear and simple language. People who have severe mental health conditions need to encounter healthworkers who have the communication skills and confidence to communicate effectively with them.

- "Supported decision-making" is available for people who have difficulties making choices independently – for example, people with severe intellectual impairment or mental health conditions.
- Support families as assistance and support providers Separate the needs and rights of informal caregivers from the needs and rights of persons with disabilities. A balance must be found so that each person has independence, dignity, and quality of life.
- Promote collaboration between families and family organizations, governmental and nongovernmental organizations, including disabled peoples' organizations, to provide support for families through a range of systems and services including by:
- Arranging for respite care, which can provide a short break from care and psychosocial counselling to improve family well-being.
- Providing direct or indirect financial support.
- Providing information about the services available for caregivers and people with disabilities.
- Organizing opportunities for families, who share similar experiences in supporting relatives with disabilities, to come together and offer mutual information and support.
- Support Community-based rehabilitation workers, social workers, or community workers can provide these opportunities for families. Useful family-oriented approaches also include developing communities of care and social networks.
- Step up training and capacity building Effective assistance and support services require training of both care recipients and care providers, irrespective of whether the care is provided formally or informally.
- Formal support workers, regardless of setting and service, should be provided with relevant professional training, which takes into account the principles of global health stardards and preferably involves people with disabilities as trainers to sensitize and familiarize service providers with their future clients.

- Provide training to families on working with caregivers, defining roles, setting boundaries, and on how to empower their rela tive with disability.
- In low-income settings, community-based rehabilitation programmes can provide training to people with disabilities and their families to manage their support needs and create links with self-help groups for information and advice.
- Persons with disabilities directly employing support workers using allocated public funds may need training and assistance in recruitment, management and fulfilling their employer responsibilities.
- Training schemes for sign-language interpreters and advocacy workers will help improve supply of these vital personnel. Assistance and Support Improve the quality of services
- To ensure that formal assistance and support services are of good quality, the following are recommended:
- Develop sound and fair disability assessment criteria and procedures, focusing on support needs to maintain and improve functioning. Use our strategic plan as a guiding framework in developing disability assessment criteria.
- Develop clear eligibility criteria for assistance and support services and transparent decision-making processes. In resource constrained environments, focus on people with disabilities most in need of support services – those without any informal caregiver and limited means.
- Set standards of services, enforce them, and monitor compliance.
- Monitor service provision.
- Keep updated records of users, providers, and services provided.
- Ensure coordination across different government agencies and service providers, possibly through introducing case management, referral systems, and electronic record-keeping.
- Establish complaints mechanisms.
- Introduce mechanisms to detect and prevent physical and sexual abuse in both residential and community settings.
- Ensure that support staff have appropriate training, proper levels of pay, status, and working conditions.
- Encourage the monitoring of service quality by disabled peoples' organizations and other
- Ramps in all polling stations.
- Braille numbers by ballot buttons on Electronic Voting Machines.
- Separate queues for disabled people at polling stations.
- Electoral staff trained to understand and respect the needs of people with disabilities. As a result of the campaigning and awareness-raising, the leading parties explicitly mentioned disability issues in their manifestos.
- Non-speaking individuals need access to "augmentative and alternative communication" systems and acceptance of these forms of communication where they live, go to school and work. These include communication displays, sign language and speech-generating devices.
- Injecting more financial resources;
- Planning well and show design capacity;
- Support research and information;
- Advocate and support cooperation between institutions taking care of disability
- Advacate to gorvernments and institutions to enforcement mechanisms;
- Promote user participation;
- Stabilize geographic and climatic constraints;

- Promote disability-awareness component in the training curricula of planners, architects and construction engineers. Standards.
  The basic features of access in new construction should include:
    - Provision of curb cuts (ramps)
    - Safe crossings across the street
    - Accessible entries and an accessible path of travel to all spaces
    - Access to public amenities, such as toilets. Systematic comparison is difficult, but several practices can lead to better enfo rcement:
    - Laws with mandatory access standards are the most effective way to achieve accessibility… Standards and compliance should be regulated and mandated by law.
    - Good design reviews and inspections ensure that accessibility will be provided from the day a building is completed. Accessib ility standards thus need to be part of building regulations. The delays caused by the denial of permits for construction or occupancy should provide an incentive for builders and developers to meet the rules.
- Accessibility audits can also be conducted by disability organizations – or even by individual citizens. Such audits can encourage compliance.
- Set up pilot projects around the country, to make local communities better able to provide accessibility for people with disabili ties (64).
- Promote working with the municipal administration in an assessment of barriers, with recommendations for their removal
- Following the development of accessibility standards in association with the government, a National Accessibility Audit Team N ational Association on Physical Disability. There is an important role for people with disabil ities and other members of the general public to be vigilant and seek redress, through legal and administrative actions, when building owners do not fulfil their obligations under the law.
- A combination of regulation, persuasion, and powerful interest gro ups can be most effective
- Buildings without barriers in to ensure that people with disabilities have the same rights and opportunities as others.
  Promotes rights of access for persons with disabilities to public facilities, housing, transport, and ICT, as well as to education and employment, cultural life and sport.
- The government priorities are to increase public awareness of the needs of disabled people and to encourage young designers t o create more innovative and inclusive designs. Local authorities in the country require architects and builders to adhere to the Standard Codes of Practice for building plans to be approved t hat are disability friendly
- After a building is constructed, an “access audit” examines its usability by disabled people. The purpo se of this audit is:
- To increase awareness among planners and architects about barrier-free environments for people with disabilities;
- To ensure, in both new buildings and retrofitting, the use of universal design concepts and adherence to the standard c odes relating to people with disabilities;
- To evaluate the degree of access to existing public buildings and recommend improvements. University schools of architecture can be a focus of education and research efforts for both students and practicing professionals.
- Create awareness of design issues for children, disabled people and older people;
- Conduct research and develop new technologies of equipments that can be used by people with disability and support productions of such.
- Promote disseminate information;

- Educate the design profession and the public on design regulations. Enabling Environments Education and campaigning Education, along with technical assistance on enforcement procedures, is essential to improve awareness of the need for accessibility and understanding of universal design. Educational programmes should be targeted to all those involved in enforcing accessibility laws and standards – including people with disabilities, design educators and professionals, government regulators, business owners and managers, and building developers and contractors.
  Support advocacy identified accessibility to physical spaces as a key area for mainstreaming the rights of people with disabilities. A project was launched to build awareness in the region on accessibility, increase the capacity for local action, and build strategic alliances for advocacy by:
  - Setting up an informal "access resource group", bringing together architects, builders, designers, engineers, people with disabilities, and development and rehabilitation professionals;
  - Staging public events highlighting what can be done to improve access; greater stress was placed on the message that "access benefits all". Campaigns have the greatest impact when user groups acted collectively for their rights;
  - Conducting media training;
  - Holding workshops on accessibility, including national policies on disability and access;
  - Producing educational materials
  - Providing accessible parking spaces, ramps, and lifts
  - Installing accessible toilets
  - Adjusting counter heights
  - Providing tactile maps and improving signage. a seating platform next to a communal hand pump to provide an opportunity for rest and enable small children to reach the pump;
  - Ramped access and a concrete apron at the pump post to help wheelchair users, making it possible to bring large, wheeled water containers to the village pump and reduce the number of trips;
  - A bench fitted over a pit latrine, making latrine use easier. An important application for universal design is to provide for emergency evacuations from buildings. Transportation systems focus primarily on:
  - Improving accessibility to public transportation infrastructure and services;
  - Setting up "special transport services" for people with disabilities;
  - Developing campaigns and education programmes to improve policies, practices, and the use of services. Specific obstacles are related to each of these goals. Immediate surroundings of stations. Common problems here include:
  - Nonexistent or poorly maintained pavements;
  - Inaccessible overpasses or underpasses;
  - Crowded pavements in the vicinity of stations and stops;
  - Hazards for people with visual impairments and deafblind people;
  - Traffic controls;
  - Lack of aids at street crossings for people with visual impairments;
  - Dangerous local traffic behaviours.

- Existing rail systems presents various technical difficulties, including:
  - Dealing with the size of the gaps between vehicle floors and the platforms, which may be different at every station;
  - Increasing space in vehicles for wheelchair access;
  - Providing access to tracks at different levels within stations. Technologies for automated lifts, bridgeplates, and ramps overcome the problems with platforms. Curbs and short-ramp access from street levels.
  - Lifts or ramps on all transit vehicles – not only on a limited number;
  - A raised pad at a bus stop with ramp access, making it easier for someone with mobility impairment to enter a bus, helping visually impaired and cognitively impaired individuals find the stop, and improving the safety of all those waiting for a bus;
  - Real-time information on waiting times;
  - Smart cards for fare collection, gates, and ticketing;
  - Visual and tactile warning systems at the edge of platforms – or full safety barriers along the entire platform; railings and posts painted in bright contrasting colours;
  - Audible signs to help people with web access to real-time information about accessible routes and temporary obstacles, such as a lift out of order. Simple low-cost examples of universal design include: lower first steps; better interior and exterior handrails at entrances to buses; priority seating; improved lighting;

- Designing and planning disability friendly cities raised paved loading pads where there are no pavements; the removal of turnstiles. Curitiba's integrated system is a good model of a less expensive universal design approach express bus lines with dedicated right-of-way routes into the city centre; conventional local bus routes connecting at major terminals; interline "connector" buses travelling around the perimeter of the city; "Parataxi" vans for door-to-terminal service for those requiring them. All terminals, stops, and vehicles are designed to be accessible. Are newer rapid-transit systems in existence, lessons can be learned from Curitiba. Even in developing countries accessibility can be provided relatively easily throughout a transportation system if it is an integral part of the overall plan from the start. Platform boarding allows for the convenient and rapid movement of passengers and provides full accessibility. The construction of "tube" stations requires the express buses to stop at a distance from the edge of the platform, to avoid hitting the curved station walls. Methods for achieving the goal include: determining the initial priorities, through consultations with people with disabilities and service providers; introducing accessibility features into regular maintenance and improvement projects; developing low-cost universal design improvements that result in demonstrable benefits to a wide range of passengers, thus gaining public support for the changes. As hearing aids or screen readers. Overcoming this requires: designing the mainstream features for the widest possible range of user capabilities; ensuring the device is adaptable for an even wider range of capabilities; ensuring the device can connect with a wide range of user interface devices. People with disabilities should have the same choice in everyday telecommunications as other people – in access, quality, and price. People with hearing and speech impairments, including the deafblind, need public or personal telephones with audio outputs adjustable in volume and quality, and equipment compatible with hearing aids.

  Many people need text telephones or videophones with visual displays of text, or sign language in real-time telephone communications. A relay service with an operator is also required, so that users of text telephones and videophones can communicate with users of ordinary voice telephones.
- People who are blind or deafblind and cannot access visual displays at all require other options such as speech and audio and Braille. Those with low vision need visual presentations to be adjusted for font type and size, contrast, and use of colours. People with dexterity impairments and upper extremity amputees may experience difficulties with devices requiring fine manipulation, such as small keyboards. Switch interfaces, alternative keyboards or use of head and eye movement can be possible solutions to access computers. To use computers and access the web, some people with disabilities need screen readers, captioning services, and web page design features such as consistent navigation mechanisms. People with cognitive impairments, including age-related changes in memory, and older adults may find the various devices and online services difficult to understand. Plain language and simple operating instructions are important.

- Captioning requirements for both analogue and digital television such as: several ICT accessibility projects, including improving pay phone access for people with disabilities. set up a system to evaluate and correct access problems on web sites. The ministry also helps other government organizations make web sites more accessible for people with disabilities including older persons. National Accessibility Portal that can handle many languages. The portal is accessed by computers in service centres with accessible equipment and through a telephone interface. Innovations in mobile telephony include: Hand-held devices, using mobile phones as platforms, can deliver a range of services, including route guidance for people with motor disabilities – video sign-language communication for deaf people – memory aids for older users and people with cognitive disabilities. The "VoiceOver", a screen reader that "speaks" whatever appears on the display of the "iPhone" mobile device, lets visually impaired users make calls, read e-mail, browse web pages, play music, and run applications The cognitive accessibility of mobile phones can be increased for people with intellectual impairments. A special phone has been designed for those who find the ordinary mobile device too com plicated, with a large back-lit keyboard and simple menus and access options. In Australia the mobile telephone industry has laun ched a global information service for reporting the accessibility features of mobile phones. Australia and the United States also require that accessible information be prov ided with telecom equipment. Deaf people often use SMS (texting on mobile telephones) for face-to-face as well as long distance communication. In Japan the Raku Raku phone has been universally designed, with a large screen, dedicated buttons, read aloud menus, voice input text messages, and an integrated DAISY player. More than 8 million have been sold, particularly for the ageing population, previously an untapped market for mobile phone manufacturers. Disabled people's organizations have called for universal design in computers and the web – a proactive rather than reactive approach to accessible technology. Suggests areas for improvement: procurement processes that require tenderers to consider accessibility and usability; better communication with stakeholders; marketing of accessible products and services as an ethical choice; wider access to information and mechanisms for sharing knowledge about the needs of older and disabled people. Removing operat ional barriers can also enable companies to benefit from the expertise of disabled workers. Specific measures that can improve accessibility. Across domains of the environment Accessibility policies and standards should meet the needs of all people with disabilities. Monitor and evaluat e the implementation of accessibility laws and standards. An impartial monitoring body, preferably outside government, and with a significant membership of disabled people, could be designated and funded to track progress on accessibility and recommend improvements. Awareness-raising is needed to challenge ignorance and prejudice surrounding disability. Personnel working in public and private services should be trained to treat disabled customers and clients on an equal bas is and with respect. Professional bodies and educational institutions can introduce accessibility as a component in training curri cula in architecture, construction, design, informatics, marketing, and other relevant professionals. Policy-makers and those working on behalf of people with disabilities need to be educated about the importance and public benefits of accessibility.
- International organizations can play an important role by: – Developing and promoting global accessibility standards for each domain of the physical environment that are widely relevant, taking into account constraints such as cost, heritage, and cultural dive rsity. – Funding development projects that comply with relevant accessibility standards and promote universal design. – Supporting research to develop an evidence-based set of policies and good practices in accessibility and universal design, with particular emphasis on solutions appropriate in low-income settings. – Developing indices on accessibility and reliable methods of data collection to measure progress in improving accessibility. Industry can make important contributions by promoting accessibil ity and universal design in the early stages of the design and development of products, programmes, and services.

Persons with disabilities and their organizations should be involved in accessibility efforts – for example, in the design and development of policies, products and services to assess the need of users, but also for monitoring progress and responsiveness. Public accommodations – building and roads Adopt universal design as the conceptual approach for the design of buildings and roads that serve the public.

- Develop and mandate minimum national standards. Full compliance should be required for new construction of building and roads that serve the public. for developing countries a strategic plan with priorities and a series of increasing goals can make the most of limited resources. Policy and standards should be flexible to account for differences between rural and urban areas. Transportation Introduce accessible transportation as part of the overall legislation on disability rights. Identify strategies to improve the accessibility of public transport, including: – Applying universal design principles in the design and operation of public transport, for example in the selection of new buses and trams or by removing physical barriers when renovating stops and stations. 195 Chapter 6 Enabling Environments – Requiring transportation agencies, in the short-term, to provide STS such as shared vans or accessible taxis. – Making public transport systems more flexible for the user by optimizing the use of information technology. – Make provisions for alternative forms of transport such as tricycles, wheelchairs, bicycles, and scooters by providing separate lanes and paths. Establish continuity of accessibility throughout the travel chain by improving the quality of pavements and roads, pedestrian access, installing ramps (curb cuts), and ensuring access to vehicles. To improve affordability of transport, subsidize transport fares for people with disabilities who may not be able to afford them. Educate and train all parties involved in transportation: managers need to understand their responsibilities and front-line staff need to ensure customer care. Public awareness campaigns can assist the educational process: posters, for example, can teach passengers about priority seating. Pavements, and the removal of turnstiles. Accessible information and communication
- Producers and providers should incorporate accessibility features in the products and services they design and sell. Support the education and training of persons with disabilities to take advantage of ICT – including training to ensure digital literacy and skills. important for four main reasons. Education contributes to human capital formation and is thus a key determinant of personal well-being and welfare. Excluding children with disabilities from educational and employment opportunities has high social and economic costs. For example, adults with disabilities tend to be poorer than those without disabilities, but education weakens this association. Countries cannot achieve Education for All or the Millennium Development Goal of universal completion of primary education without ensuring access to education for children with disabilities (9). Countries that are signatories to the CRPD cannot fulfil their responsibilities under Educational. The requirement for inclusive schools to educate all children together means that the schools have to develop ways of teaching that respond to individual differences, to the benefit of all children. Social. Inclusive schools can change attitudes towards those who are in some way “different” by educating all children together. This will help in creating a just society without discrimination. Economic. Establishing and maintaining schools that educate all children together is likely to be less costly than setting up a complex system of different types of schools specializing in different groups of children.. While placement was not the critical factor in student outcomes, the review found: slightly better academic outcomes for students with learning disabilities placed in special education settings; Fig. 7.3. Delivery of education by type of model for selected European countries Note: The data refer to pupils who have been officially identified as having SEN. inclusive settings. Source (28, 34). 212 World report on disability higher dropout rates for students with emotional disturbances who were placed in general education; better social outcomes for students with severe intellectual impairments who were taught in general education classes. While children with hearing impairments gained some academic advantage in mainstream education, their sense of self suffered. most of the studies reviewed were not of good quality methodologically, and dependent measures varied widely across studies; the researchers often had difficulty separating educational settings from the types and intensity of services; the research was frequently conducted before critical policy changes took place; much of the research focused on how to implement inclusive practices, not on their effectiveness. Zealand shows how government ministries can promote an understanding of the right to education of disabled students by: publicizing support available for disabled children reminding school boards of their legal responsibilities reviewing information provided to parents reviewing complaints procedures

A survey of low-income and middle-income countries found that if political will is lacking, legislation will have only a limited impact. Other factors leading to a low impact include insufficient funding for education, and a lack of experience in educating people with disabilities or special educational needs. reflect international commitments to the right of disabled children to be educated; identify the number of disabled children and assess their needs; stress the importance of parental support and community involvement; plan for the main aspects of provision – such as making school buildings accessible, and developing the curriculum, teaching methods, and materials to meet a diversity of needs; increase capacity, through the expansion of provision and training programmes; make available sufficient funds; 218 World report on disability conduct monitoring and evaluation, and improve the qualitative and quantitative data on students . Funding There are basically three ways to finance special needs education, whether in specialized institutions or mainstream schools: through the national budget, such as setting up a Special National Fund (as in Brazil), financing a Special Education Network of Schools (as in Pakistan), or as a fixed proportion of the overall education budget (0.92% in Nicaragua and 2.3% in Panama); through financing the particular needs of institutions – for materials, teaching aids, training, and operational support (as in Chile and Mexico); through financing individuals to meet their needs (as in Denmark, Finland, Hungary, and New Zealand). Other countries, including Switzerland and the United States, use a combination of funding methods that include national financing that Box Inclusion is possible in Viet Nam – but more can be done In the early 1990s Viet Nam launched a major programme of reform to improve the inclusion of students with disabilities in education. The Centre for Special Education worked with an international nongovernmental organization to set up two pilot projects, one rural and one urban. Local steering committees for each project were active in raising awareness in the community and conducting house-to-house searches for children who were missing from official school lists. The pilot projects identified 1078 children with a wide range of impairments who were excluded. Training was provided to administrators, teachers, and parents on: the benefits of inclusive education special education services individualized educational programmes carrying out accommodation and environmental modifications assessment family services. complex. Whichever funding model is used, it should: be easy to understand be flexible and predictable provide sufficient funds be cost-based and allow for cost control connect special education to general education be neutral in identification and placement (98, 99). One system for comparing data on resources between countries categorizes students according to whether their needs arise from medical conditions, behavioural, or emotional conditions, or socioeconomic or cultural disadvantages an educational or interactive approach. The following principles were proposed: Assessment procedures should promote learning for all students. All students should be entitled to be part of all assessment procedures. The needs of students with disabilities should be considered within all general assessment policies as well as within policies on disability-specific assessment. The assessment procedures should complement each other.

- Adocacy of more teachers with disability In Uganda teachers' attitudes improved simply by having regular contact with children with disabilities (56). In Mongolia a training programme on inclusive education was run for teachers and parents with the support of specialist teachers. The 1600 teachers trained had highly positive attitudes towards the inclusion of children with disabilities and towards working with the parents: the enrolment of children with disabilities in preschool facilities and primary schools increased from 22% to 44% . practices that link CBR to inclusive education can be found in many low-income countries: In the Karamoja region of Uganda, where most people are nomads and only 11.5% of the population are literate, children's 224 World report on disability domestic duties are essential to the survival of their families. crop production.

- The Oriang project in western Kenya has introduced inclusive education in five primary schools. Technical and financial assistance is provided by Leonard Cheshire Disability (60). The support includes training new teachers and working with students, parents, teachers, and the wider community to change attitudes and build the right structures for delivering inclusive education. are designed to increase the variety and quality of sport choices available for children in Fijian schools. Its activities include: Pacific Junior Sport – a games-based programme that provides opportunities for children to participate and develop their skills; qito lai lai ("children's games") for smaller children; arranging for sport federations – such as those of golf, table tennis, tennis, and archery – to run sessions in schools; supporting schools so that students can play popular sports, such as football, volleyball, and netball, and paralympic sports such as boccia, goalball, and sitting volleyball; managing regional and national sport tournaments, as well as festivals in which students test their skills in football, netball, and volleyball against children from mainstream schools; providing role models through the athlete ambassador programme, in which athletes with a disability regularly visit schools, including mainstream schools. Sport can improve the inclusion and well-being of people with a disability: by changing what communities think and feel about people with a disability – and in that way reducing stigma and discrimination; by changing what people with a disability think and feel about themselves – and in that way empowering them to recognize their own potential; by reducing their isolation and helping them integrate more fully into community life; by providing opportunities which assists young people to develop healthy body systems (musculoskeletal, cardiovascular) and improve coordination. particularly effective in bringing out the views of children in a range of socioeconomic settings . Young people in nine Commonwealth countries were consulted about their views on the CRPD through a series of focus groups. The right to education featured in the top three issues in three quarters of these group. In a refugee programme in Jhapa, Nepal, children with disabilities were found to be a neglected and vulnerable group . A full-time disability coordinator for the programme was therefore appointed to undertake participatory action research. Disabled children talked about their family lives and described how they were taunted if they left their homes. Both children and parents listed education as the top priority. After 18 months more than 700 children had been integrated into schools, and sign-language training had been introduced in all refugee camps, for Deaf and non-deaf children. In September 2007 the Portuguese Ministry of Education organized a Europewide consultation in collaboration with the European Agency for Development in Special Needs Education (133). The young people consulted favoured inclusive education, but insisted that each person should be able to choose where to be educated. Develop a clear national policy on the inclusion of children with disabilities in education supported by the necessary legal framework, institutions, and adequate resources. Definitions need to be agreed on what constitutes "inclusive education" and "special educational needs", to help policy-makers develop an equitable education system that includes children with disabilities. Identify, through surveys, the level and nature of need, so that the correct support and accommodations can be introduced. Some students may require only modifications to the physical environment to gain access, while others will require intensive instructional support. Establish monitoring and evaluation systems. Data on the numbers of learners with disabilities and their educational needs, both in special schools and in mainstream schools, can often be collected through existing service providers. Research is needed on the cost–effectiveness and efficiency of inclusive education. Share knowledge about how to achieve educational inclusion among policymakers, educators, and families. For developing countries the experience of other countries that have already moved towards inclusion can be useful. Model projects of inclusive education could be scaled up through local-to-regional-toglobal networks of good practice. Adopt strategies to promote inclusion Focus on educating children as close to the mainstream as possible. This includes, if necessary, establishing links between special education facilities and mainstream schools. Do not build a new special school if no special schools exist. Instead, use the resources to provide additional support for children with disabilities in mainstream schools. Ensure an inclusive educational infrastructure – for example, by mandating minimum standards of environmental accessibility to enable access to school for children with disabilities. Accessible transport is also vital. Make teachers aware of their responsibilities towards all children and build and improve their skills for teaching children with disabilities. Educating teachers about including children with disabilities should ideally take place in both pre-service and in-service teacher education. It should have a special emphasis on teachers in rural areas, where there are fewer services for children with disabilities. Support teachers and schools to move away from a one-size-fits-all model towards flexible approaches that can cope with 227 Chapter 7 Education diverse needs of learners – for example, individualized education plans can ensure the individual needs of students with disabilities are met. Provide technical guidance to teachers that can explain how to group students, differentiate instruction, use peers to provide assistance, and adopt other low-cost interventions to support students having learning difficulties.

- Increase investment in school infrastructure and personnel so that children with disabilities that are identified as having special educational needs obtain the needed support, and continue to receive that support during their education. Make available speech and language therapy, occupational therapy, and physiotherapy to learners with moderate or significant disabilities. In the absence of specialist providers, use existing community-based rehabilitation services to support children in educational settings. If these resources are absent, an attempt should be made to develop these services gradually. Consider introducing teaching assistants to provide special support to children with disabilities, while ensuring that this does not isolate them from other students. Support participation Involve parents and family members. Parents and teachers should jointly decide on the educational needs of a child. Children do better when families get involved, and this costs very little. Involve the broader community in activities related to the education of children with disabilities. This is likely to be more successful than policy decisions handed down from above. Develop links between educational services and community-based rehabilitation – and other rehabilitation services, where they exist. In this way, scarce resources can be used more efficiently, and education, health care, and social services can be properly integrated. Encourage adults with disabilities and disabled people's organizations to become more involved in promoting access to education for children with disabilities. Consult and involve children in decisions about their education. Participation of people with disabilities in the labour force is important for other reasons: Maximizing human resources. Productive engagement of persons with disabilities increases individual well-being and contributes to the national output. Promoting human dignity and social cohesion. Apart from income, employment brings personal and social benefits, adding to a sense of human dignity and social cohesion. All individuals should be able to freely choose the direction of their personal lives, to develop their talents and capabilities to the full. Accommodating the increasing numbers of people with disabilities in the working age population. The prevalence of disability is expected to increase in the coming decades because of a rise in chronic conditions together with improved health and medical rehabilitation services that preserve and prolong life.: the unemployment rate is the number of unemployed people expressed as a percentage of the labour force; the employment rate is the share of the working age population which works for pay; the labour force participation rate is the proportion of the adult population which is economically active, whether employed or unemployed. the employment ratio is the ratio of the employment rate of people with disabilities compared to the employment rate of the general population. world to address barriers to the labour market: laws and regulations tailored interventions vocational rehabilitation and training self-employment and microfinance social protection working to change attitudes. Not all of these reach workers in the informal sector, which predominates in many countries. To counter these obstacles, various financial incentives can be offered: Tax incentives are often offered to employers, especially smaller employers. Government employment agencies can provide advice and funding for employment-related accommodations, as with one state's vocational rehabilitation agency in the United States. Workplace modifications can be supported. In disabilities is changing:
- There has been a move from a model of job placement that tried to fit people into available job openings to a "person-centred" model involving the interests and skills of the individual. The aim is to find a match that will lead to viable longer term employment and a life-long career. There has been a shift from using sheltered employment towards supported employment – that is, from "train and place" to "place and train". The idea is to employ people first, before they are trained, to help dispel beliefs that disabled people cannot perform a particular job. Several successful user-controlled disability employment services have been launched in recent years: In Rio de Janeiro, Brazil, the Centro de Vida Independiente serves as an employment broker and ongoing support agency for disabled people. In Spain Fundación ONCE was founded in 1988 to promote training and employment and accessibility, funded by the national lottery – which is operated by ONCE, the association of blind people. In Manchester, United Kingdom, "Breakthrough" is an innovative usercontrolled employment service that works with disabled people and employers, helping to find and sustain employment and to find training for work. In South Africa, Disability Employment Concerns was established in 1996 with the aim of emulating the ONCE model. Owned by disabled people's organizations, it invests in and supports companies to promote disability employment equity targets. In India the National Centre for Promotion of Employment for Disabled People sensitizes the corporate world, campaigns for access, promotes education, and raises awareness. vocational services for people with disabilities in New Zealand In 2001 the New Zealand government launched Pathways to Inclusion to increase the participation of people with disabilities both in the workforce and in communities. People with disabilities working in sheltered workshops had been paid less than the minimum wage, regardless of their skills or abilities. Providers of sheltered employment, with advice and government funding, shifted their operations to include supported employment and community participation services. Although sheltered work is still part of a

- range of vocational services funded through the Ministry of Social Development, supported employment services have now largely replaced it. An evaluation of the Pathways to Inclusion programme since its inception found the following (100): the number of people participating in vocational services increased from 10 577 in
- 2003 to 16 130 in 2007; employment outcomes have improved, with more participants either moving off benefits or declaring earnings while remaining on benefits; the number of providers of vocational services that aim to achieve paid employment increased from 44% to 76% over three years;
- As employers, lead by example in promoting the employment of disabled people in the public sector. Public programmes Make mainstream vocational guidance and training programmes accessible to people with disabilities. Make mainstream employment services available to persons with disabilities on an equal basis with other job seekers. Develop services tailored to individual and community needs, rather than services of a "one-size-fits-all" nature. Ensure that mainstream social protection programmes include people with disabilities, while at the same time supporting their return to work, and not creating disincentives to those seeking work or returning to work. Design safety net interventions to promote labour market inclusion of disabled people by including assistance and support services or covering the additional costs incurred by those who enter employment – such as the cost of travel to work and of equipment. Adjust disability assessment systems so that they assess the positive aspects of functioning (as opposed to disability) and capacity to work. Monitor and evaluate labour market programmes aimed at facilitating and increasing employment of persons with disabilities and scale up those that deliver results with focus on inclusive, not segregated solutions. Provide adequate and sustainable funding for training programmes, to build a skilled workforce of people with disabilities. Data collection Include persons with disabilities in labour market data collection activities, for instance labour force survey. Use internationally agreed (for example ILO) labour market indicators to measure and monitor the labour market status and livelihood experiences of people with disabilities. Employers Hire people with disabilities, making reasonable accommodations available where needed. Set up disability management programmes to support the return to work of employees who become disabled. Develop partnerships with local employment agencies, educational institutions, skill training programmes, and social enterprises to build a skilled workforce that includes people with disabilities. Ensure that all supervisors and human resource personnel are acquainted with the requirements for accommodation and nondiscrimination with regard to individuals with disabilities. World report on disability For larger businesses, aim to become model employers of people with disabilities. Other organizations: NGOs including disabled people's organizations, microfinance institutions, and trade unions For organizations providing mainstream training opportunities, include people with disabilities. Provide targeted support when mainstream opportunities are not available. Support community-based rehabilitation, to enhance the development of skills and enable people with disabilities to make a decent living. Where the informal economy is predominant, promote micro-enterprises and selfemployment for people with disabilities. For microfinance institutions, improve access to microfinance for persons with disabilities through better outreach, accessible information and customized credit conditions. Support the development of networks of people with disabilities that can campaign for the rights of people with disabilities. For labour unions, make disability issues, including accommodations, part of their bargaining agendas. of barriers, including the following. Inadequate policies and standards. Policy design does not always take into account the needs of people with disabilities, or existing policies and standards are not enforced. Examples include a lack of clear policy of inclusive education, a lack of enforceable access standards in physical environments, and the low priority accorded to rehabilitation.
- Negative attitudes. Beliefs and prejudices constitute barriers when health-care workers cannot see past the disability, teachers do not see the value in teaching children with disabilities, employers discriminate against people with disabilities, and family members have low expectations of their relatives with disabilities. Lack of provision of services. People with disabilities are particularly vulnerable to deficiencies in services such as health care, rehabilitation, or support and assistance. Problems with service delivery. Issues such as poor coordination among services, inadequate staffing, staff competencies, and training affect the quality and adequacy of services for persons with disabilities. Inadequate funding. Resources allocated to implementing policies and plans are often inadequate. Strategy papers on poverty reduction, for instance, may mention disability but without considering funding. The way forward: recommendations Lack of accessibility. Built environments (including public accommodations) transport systems and information are often inaccessible. Lack of access to transport is a frequent reason for a person with a disability being discouraged from seeking work or prevented from accessing health care. technologies such as telephones and television. Lack of consultation and involvement. Often people with disabilities are excluded from decision-making in matters directly affecting their lives. Lack of data and evidence. A lack of rigorous and comparable data on disability and evidence on programmes that work often impedes understanding and action. How are the lives of people with disabilities affected? These barriers contribute to the disadvantages experienced by people with disabilities, such as the following.

They have poor health outcomes. Depending on the group and setting, persons with disabilities may experience greater vulnerability to preventable secondary conditions and co-morbidities, untreated mental health conditions, poor oral health, higher rates of HIV infection, higher rates of obesity, and premature mortality. They have lower educational achievements. Children with disabilities are less likely to start school than their peers without disabilities. They also have lower rates of staying in school and of being promoted, as well as lower transition rates to postschool education. They are less economically active. People with disabilities have lower employment rates than people without disabilities. Where people with disabilities are employed, they commonly earn less than their counterparts without disabilities. They experience higher rates of poverty. Households with a person with a disability have higher rates of poverty than households without disabled members. As a group and across settings, people with disabilities have worse living conditions and fewer assets. Poverty may lead to disability, through malnutrition, poor health care, and dangerous working or living conditions. Disability may lead to poverty through lost earnings, due to lack of employment or underemployment, and through the additional costs of living with disability, such as extra medical, housing, and transport costs.

- Australia's support is bolstering partner Government's efforts, such as in Papua New Guinea, Cambodia and TimorLeste, towards more equitable national development that benefits all citizens, including people with disability. Investments in leadership by people with disabilities, together with advocacy by Australian leaders internationally, is helping to increase the priority and resources for inclusive development globally. AusAID's processes, systems and information about the aid programme are more accessible to people with disabilities. Key programme areas such as scholarships have revised guidelines resulting in increased number of scholars with disabilities. The strategy takes a rights-based approach, is sensitive to the diversity of people with disabilities, gender issues, and focuses on children with disabilities. 265 Chapter 9 The way forward: recommendations strategies. the impact of environmental factors (policies, physical environment, attitudes) on disability and how to measure it; the quality of life and well-being of people with disabilities; barriers to mainstream and specific services, and what works in overcoming them in different contexts; accessibility and universal design programmes appropriate for low-income settings; the interactions among environmental factors, health conditions, and disability – and between disability and poverty; the cost of disability and the cost–effectiveness of public spending on disability programmes. Research requires focused investments in human and technical capacity, particularly in low-income and middle-income countries. A critical mass of trained researchers on disability needs to be built. Stakeholders can take. Governments can: Review and revise existing legislation and policies for consistency with the CRPD; review and revise compliance and enforcement mechanisms. Review mainstream and disability-specific policies, systems, and services to identify gaps and barriers and to plan actions to overcome them. Develop a national disability strategy and action plan, establishing clear lines of responsibility and mechanisms for coordination, monitoring and reporting across sectors. Regulate service provision by introducing service standards and by monitoring and enforcing compliance. Allocate adequate resources to existing publicly-funded services and appropriately fund the implementation of the national disability strategy and plan of action. Adopt national accessibility standards and ensure compliance in new buildings, in transport, and in information and communication. Introduce measures to ensure that people with disabilities are protected from poverty and benefit adequately from mainstream poverty alleviation programmes. Include disability in national data collection systems and provide disability-disaggregated data wherever possible. Implement communication campaigns to increase public knowledge and understanding of disability. Establish channels for people with disabilities and third parties to lodge complaints on human rights issues and laws that are not implemented or enforced. United Nations agencies and development organizations can: Include disability in development aid programmes, using the twin-track approach (mainstreaming and targeted). Exchange information and coordinate actions – to agree on priorities for initiatives to learn lessons and to reduce duplication of effort. 269 Chapter 9 The way forward: recommendations Provide technical assistance to countries to build capacity and strengthen existing policies, systems and services – for example, by sharing good and promising practices. Contribute to the development of internationally comparable research methodologies for collecting and analysing data relating to people with disabilities.

- Regularly include relevant disability data into statistical publications. Disabled people's organizations can: Support peopl e with disabilities to become aware of their rights, to live independently, and to develop their skills. Support children with disabilities and their families to ensure inclusion in education. Represent the views of their constituency to international, national, and local decisionmakers and service providers, and advocate for their righ ts. Contribute to the evaluation and monitoring of services, and collaborate with researchers to support applied research that can contribute to service developme nt. Promote public awareness and understanding by professionals about the rights of persons with disabilities – for example, through campaigning, advocacy, and disability-equality training. Conduct audits of environments, transport, and other systems and services to promote barrier removal. Service providers can: Carry out access audits, in partnership with local disability groups, to identify physical and information barriers that may exclude persons with disabilities. Ensure that staff are adequately trained about disability, implementing training as required and including service users in developing and delivering training. Develop individual service plans in consultation with disabled people, and their families where necessary. Introduce case management, referral systems, and elec tronic record-keeping to coordinate and integrate service provision. Ensure that people with disabilities are informed of their rights and the mechanisms for complaints. Academic institutions can: Remove barriers to the recruitment and participation of students and staff with disabilities. Ensure that professional train ing courses include adequate information about disability, based on human rights principles. Conduct research on the lives of persons with disabilities a nd on disabling barriers, in consultation with disabled people's organizations. The private sector can: Promote div ersity and inclusion in working environments. Facilitate employment of persons with disabilities, ensuring that recruitment is equitable, that reasonable accommodations are provided, and that employees who bec ome disabled are supported to return to work. Remove barriers of access to microfinance, so that persons with disabilities can develop their own businesses. Develop a ran ge of quality support services for persons with disabilities and their families at different stages of the life cycle. Ensure tha t construction projects, such as public accommodations, offices and housing include adequate access for persons with disabilities. Ensure that ICT products, systems, and services a re accessible to persons with disabilities. World report on disability Communities can: Challenge and improve their own beliefs and attitudes. Protect the rights of persons with disabilities. Promote the inclusion and participation of disabled people in their community. Ensure that community environments are access ible for people with disabilities, including schools, recreational areas and cultural facilities.
- The project combines several components including: country pilot tests of standard question sets; targeted training of stat istical experts and health professionals; country advisory services; development of knowledge management tools and the establishment of a regional network of national disability statistics experts working within governments, to facilitate cross-country cooperation. to participation and inclusion. Examples of the possible negative impact of the environment include: a Deaf individual without a sign language interpreter a wheelchair user in a building without an accessible bathro om or elevator a blind person using a computer without screen-reading software. Health is also affected by environmental factors, such as safe water and sanitation, nutrition, poverty, working conditions, climate, or access to health care. As the World Health Organization (WHO) Commission on Social Determinants of He alth has argued, inequality is a major cause of poor health, and hence of disability. The environment may be changed to improve health conditions, prevent imp airments, and improve outcomes for persons with disabilities. Such changes can be brought about by legisl ation, policy changes, capacity building, or technological developments leading to, for instance: accessible design of the built environment and transport; signage to benefit people with sensory impairments; more accessible health, rehabilitation, education, and support services; more opportunities for work and employment for persons with disabilities. Environmental factors i nclude a wider set of issues than simply physical and information access. Policies and service delivery systems, including the rule s underlying service provision, can also be obstacles. Analysis of public health service financing in Australia.. New emphasis on environmental factors The International Classification of F unctioning, Disability and Health advanced the understanding and measurement of disability. It was developed through a long process involving academics, clinicians, and – importantly – persons with disabilities.

- The ICF emphasizes environmental factors in creating disability, which is the main difference between this new classification and the previous International Classification of Impairments, Disabilities, and Handicaps (ICIDH). In the ICF, problems with human functioning are categorized in three interconnected areas: impairments are problems in body function or alterations in body structure – for example, paralysis or blindness; activity limitations are difficulties in executing activities – for example, walking or eating; participation restrictions are problems with involvement in any area of life – for example, facing discrimination in employment or transportation.. Negative attitudes towards disability can result in negative treatment of people with disabilities, for example: children bullying other children with disabilities in schools bus drivers failing to support access needs of passengers with disabilities employers discriminating against people with disabilities strangers mocking people with disabilities. Negative attitudes and behaviours have an adverse effect on children and adults with disabilities, leading to negative consequences such as low self-esteem and reduced participation. adopt legislation and other appropriate administrative measures where needed; modify or repeal laws, customs, or practices that discriminate directly or indirectly; include disability in all relevant policies and programmes; refrain from any act or practice inconsistent with the CRPD; take all appropriate measures to eliminate discrimination against persons with disabilities by any person, organization, or private enterprise. Employment, earnings, and increased expenditures related to disability. Children with disabilities are less likely to attend school, thus experiencing limited opportunities for human capital formation and facing reduced employment opportunities and decreased productivity in adulthood. People with disabilities are more likely to be unemployed and generally earn less even when employed. Both employment and income outcomes appear to worsen with the severity of the disability. It is harder for people with disabilities to benefit from development and escape from poverty due to discrimination in employment, limited access to transport, and lack of access to resources to promote self-employment and livelihood activities. People with disabilities may have extra costs resulting from disability – such as costs associated with medical care or assistive devices, or the need for personal support and assistance – and thus often require more resources to achieve the same outcomes as non-disabled people. This is what Amartya Sen has called “conversion handicap”. Because of higher costs, people with disabilities and their households are likely to be poorer than non-disabled people with similar incomes. Households with a disabled member are more likely to experience material hardship – including food insecurity, poor housing, lack of access to safe water and sanitation, and inadequate access to health care. Special measures may be needed to ensure that safety nets are inclusive of disabled people. For example: information about programmes should be accessible and reach the intended recipients. This may require targeted outreach; proxies designated by persons with disabilities should be allowed to conduct many of the transactions in accessing programmes; the welfare offices, as well as the transport system, need to be accessible; programmes’ eligibility criteria may need to specifically include disability; means testing mechanisms may need to take into account the extra costs of disability; cash transfers might provide higher payments to beneficiaries with disabilities to help with extra costs of living with a disability; conditional cash transfers may need to be adjusted to specific circumstances of children with disabilities; workfare can introduce quotas and be sensitive to disability; labour activation measures should be sensitive to disability. Some countries, such as Albania, Bangladesh, Brazil, China, Romania, and the Russian Federation also have specific programmes targeted at people with disabilities. regional networks such as the CBR Africa Network, the CBR Asia-Pacific Network, and the CBR American and Caribbean Network. The recent publication of the CBR guidelines joins the development and human rights aspects of disability.
- Challenge violence against and bullying of people with disabilities. People with disabilities and their families can: Support other people with disabilities through peer support, training, information, and advice. Promote the rights of persons with disabilities within their local communities – for example by conducting access audits, delivering disability equality training, and campaigning for human rights. Become involved in awareness-raising and social marketing campaigns. Participate in forums (international, national, local) to determine priorities for change, to influence policy, and to shape service delivery. Participate in research projects. the current initiatives to improve disability statistics, the work of five organizations is described here. They are: The guidelines: promote the need for inclusive development for people with disabilities in the mainstream health, education, social, and employment sectors; emphasize the need to promote the empowerment of people with disabilities and their family members; through the provision of practical suggestions, position CBR as a tool that countries can use to implement the Convention on the Rights of Persons with Disabilities. high degree of consistency between the responses to the census and the NDS: of those in private households who reported a disability in the census, 88% also reported a disability in the NDS;

- Of those in non-private households who reported a disability in the census, 97% also reported a disability in the NDS; of those in private households who did not report a disability in the census, 11.5% were found to have a disability in the NDS. Extrapolating the NDS findings to the whole population produced an overall national disability rate of 18.5%. The differences in the disability rates obtained in the census and the NDS may result from the following: The NDS used face-to-face interviews, while the census forms were self-completed. The census was a large survey designed for a range of purposes. The NDS focused solely on disability defined as difficulties in functioning in any of the following domains: seeing, hearing, speech, mobility and dexterity, remembering and concentrating, intellectual and learning, emotional, psychological, and mental health, and pain and breathing. The inclusion of a pain domain in the NDS resulted in a significantly higher disability rate, with 46% of those not reporting disabilities in the census reporting pain in the NDS. Those who only reported a disability in the NDS had a lower level of difficulty and were more likely to have only a single disability, rather than disabilities in several domains. More children reported a disability in the NDS than in the census, perhaps because of the more detailed questions in the NDS. Disability and Health (ICF). International frameworks and resources are important in these efforts. Policy frameworks and agreed principles are set out in the CRPD. Information-related standards are provided by the ICF. Attempts to harmonize and standardize question sets for assessment of health status and disability at population level are in progress (see Technical appendix B for information on European Statistical System, United Nations Washington Group on Disability Statistics, United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP), WHO Regional Office for the Americas/Pan American Health Organization/Budapest Initiative). A training manual on disability statistics, prepared by WHO and UNESCAP, provides useful guidance on how countries can enhance their national statistics. Prevalence of disability – difficulties in functioning In examining the prevalence of disability in the world today, this Report presents survey were chosen based on several considerations: the need to fill data gaps in geographical regions where data were most lacking, such as sub-Saharan Africa; a spread of countries that would include high-income, middle-income, and lowincome countries with a focus on lowincome and middle-income countries; inclusion of countries with large adult populations complications and long-term disability from traumatic injuries, from lack of appropriate follow-up; complications and premature mortality in individuals with chronic diseases, as a result of suspended treatment and delayed access to health care; permanent hearing loss caused by explosions, stemming from the lack of early screening and appropriate treatment; long-term mental health problems from the continuing insecurity and the lack of protection. Humanitarian organizations do not always respond to the needs of people with disabilities promptly, and gaining access to persons with disabilities who are scattered among affected communities can be difficult. A variety of measures can reduce the vulnerability of persons with disabilities including: effective planning to meet disability needs by humanitarian organizations before crises; assessments of the specific needs of people with disabilities; provisions of appropriate services; referral and follow-up services where

- necessary. These measures may be carried out directly or through mainstreaming.– a global picture to face discrimination and restricted access to social services, including early-childhood education; to be underweight and have stunted growth; to be subject to severe physical punishment from their parents . provide a standard for health and disability statistics and help in the difficult task of harmonizing approaches across sources of disability data. To achieve this, countries can: Base definitions and national data standards on the ICF. Ensure that data collection cover the broad array of ICF domains – impairments, activity limitations and participation restrictions, related health condition, environmental factors – even if a minimal set of data items is to be selected. Improve national disability statistics At the national level, information about people with disabilities is derived from censuses, population surveys and administrative data registries. Decisions on how and when to collect data depend on the resources available. Steps that can be taken to improve disability data, prevalence, need and unmet need, and socioeconomic status are outlined below. Disaggregating data by sex, age, and income or occupation will provide information about subgroups of persons with disabilities, such as children and older persons. Employ a "difficulties in functioning approach" instead of an "impairment approach" to determine prevalence of disability to better capture the extent of disability.
- As a first step national population census data can be collected in line with recommendations from the United Nations Washington Group on Disability and the United Nations statistical commission. Census data can provide an estimate of prevalence, information on socioeconomic situation, and geographical data and be used to identify populations at risk. It can also be used to screen respondents to implement more detailed follow up surveys. A cost-effective and efficient approach to gain comprehensive data on persons with disabilities is to add disability questions – or a disability module – to existing sample surveys such as a national household survey, national health survey, a general social survey or labour force survey. Dedicated disability surveys can be carried out to gain extensive information on disability and functioning – such as prevalence, health conditions associated with disability, use of and need for services, and other environmental factors, including on persons living in institutions and children. Data on persons with disabilities or those at particular risk of disability, including displaced persons, can also be collected through specific surveys in humanitarian crises. Administrative data collections can provide information on users, types and quantity of services and cost of services. In mainstream administrative data collections, standard disability identifiers can be included to monitor access to services by people with disabilities. Statistical linkage of various data sets can allow countries to bring together an array of information on a person from different time points, while at the same time protecting that individual's confidentiality. These linkage studies can often be conducted quickly and at relatively low cost. Where resources exist, collect longitudinal data that include questions on disability. Longitudinal data – the study of cohorts of people and their environments over time – allow researchers and policy-makers to understand better the dynamics of disability. Such analyses would provide better indications of what happens to individuals and their households after disability onset, how their situation is impacted by public policies aimed at improving the social and economic status of disabled people, of the causal relationship between poverty and disability, and how and when to instigate prevention programmes, modify interventions, and make environmental changes. Improve the comparability of data Data gathered at the national level
- Standardize metadata on national disability prevalence, for example, by defining the measures of disability, purpose a measurement, indicate which aspects of disability are included, and define the cut-off on the continuum. This will facilitate the compilation of country-reported disability prevalence in international data repositories such as WHO's Global Health Observatory. Refine methods of generating prevalence rates using a continuous metric that measures multidomain functioning levels. This would include more work on the various approaches for setting thresholds, including sensitivity analyses of the different thresholds and the implications for services and policies. Comparable definitions of disability, based on the ICF, and uniform methods for collecting data on people with disabilities need to be developed, tested across cultures, and applied consistently in surveys, censuses and administrative data. Extended measures of disability should be developed and tested that can be incorporated into population surveys, or used as supplements to surveys, or as the core of a disability survey as initiated by the United Nations Washington Group on Disability Statistics and the Budapest Initiative. Develop appropriate instruments for measuring childhood disability. Improve collaboration and coordination between various initiatives to measure disability prevalence at global, regional and national levels (including the Budapest Initiative, European Statistical Commission, UNESCAP, United Nations Statistical Commission, Washington Group, WHO, United States and Canada). Develop appropriate tools and fill the research gaps To improve validity of estimates – further research is needed on different types of investigation, such as self-report and professional assessment. To gain a clearer understanding of people in their environments and their interactions – better measures of the environment and its impacts on the different aspects of disability need to be developed.

- These will facilitate the identification of cost-effective environmental interventions. To understand the lived experiences of people with disabilities, more qualitative research is required. Measures of the lived experience of disability need to be coupled A global picture with mea surements of the well-being and quality of life of people with disabilities. To better understand the interrelationships and
- develop a true epidemiology of disability – studies are needed that bring health condition (including co-morbidity) aspects of disability into a single data set describing disability, and that explore the interactions between health conditions and disability and environmental factors. To better understand the costs of disability – technical agreement is required on definitions and methods of calculating the extra costs of living with a disability. A child born blind may not specifically require ongoing health care for a primary health condition and associated impairment (20). An adolescent with a traumatic spinal cord injury may have considerable health care needs during the acute phase of the primary condition but thereafter may require only services to maintain hea lth – for example, to prevent secondary conditions. Adults with chronic conditions such as multiple sclerosis, cystic fibrosis, se vere arthritis, or schizophrenia may have complex and continuing health care needs related to their primary health condition or associated impairments. autism: Had more chronic h ealth conditions than the general population. They were more likely to be obese and have heart disease, high blood pressure, respiratory disease, diabetes, strokes, or breast cancer. Developed chronic health conditions at a younger age than other people.
- Reforming policy and legislation addressing barriers to financing and affor dability addressing barriers to service delivery addressing human resource barriers filling gaps in data and research. Reforming policy and legislation International, regional, and national policy and legislat ion can help meet the health care needs of people with disabilities where political will, funding, and technical support accompany implementation. indicates the followin g areas for action: Accessibility – stop discrimination against people with disabilities when accessing health care, health servic es, food or fluid, health insurance, and life insurance. This includes making the environment accessible. Affordability – ensure that people with disabilities get the same variety, quality, and standard of free and affordable health care as other people. Availability – put early intervention and treatment services as close as possible to where people live in their communities. Quality – ensure that health workers give the same quality care to people with disabilities as to others. Formal acknowledgement, within national. People-centred approaches should: Educate and support people with disabilities to manage their health. Self-management approaches have been effective in improving health outcomes and quality of life for a range of chronic conditions, and in some instances have lowered costs for the health care system. Provide time-limited, self-management courses, involving peer support to enable persons with disabilities to better manage their health. In Nicaragua, where the health syst em is overburdened with increasing patients with chronic disease, “chronic clubs” have been established in health centres to teach people with diabetes about ri sk factors, disease management, signs of complications, and healthy lifestyles. In Rwanda a study regarding the h ealth promotion needs of individuals with lower limb amputation recommended workshops to enable people with disabilities to share experiences and motivate each other to improve health behaviours. Invo lve family members and caregivers in service delivery where appropriate. Family members and caregivers may have limited knowledge and skills. They may not understand the importance of a healthy lifestyle, or they may not be able to provide General health care Develop an individual care plan. A customized care plan is important to bridge current and past care and for arranging future needs. A plan should be flexible enough to accommodate changes in people’s needs and circu mstances. Enhanced Primary Care in Australia encourages general practitioners to carry out comprehensive health assessments, multidisciplinary care plans, and case conferences with older people, people with chronic illness, and people with intellectual impairment. Provide appropriate referral and effective information transfer to other services. Timely referral can facilitate access and decrease stress, frustration, and the development of secondary conditions. Good communicat ion between service providers is critical. Electronic records or client passbooks – which include information on a person’s abilities, challenges, and methods of learning or communicating – can support transition between child and adult services and between multiple health care practitioners. Inventories of relevant s ervices and community resources also may be useful. Use information and communication technologies Information and communication technologies can increase the capacity of health care services, improve the delivery of services and enable people to bett er manage their own health. Evidence on the efficacy of some technologies is limited, or shows limited effect, while other technologies promise benefits for the health care system a n Electronic medical records – shared electronic medical records can overcome common problems in care continuity.

- Telemedicine services – people receiving psychiatric telemedicine services, such as psychiatric evaluations and medication management, have reported high satisfaction with their care, and video conferencing also has successfully delivered self-management programmes. Consumer health informatics – internetbased, self-management programmes have helped people with chronic disease. successful outcomes across a range of health professionals: A study of Australian fourth-year undergraduate medical students indicated a significant change in attitudes towards people with developmental disabilities following a three-hour communication skills workshop . In a United States study, third-year medical students reported that they felt less "awkward" and "sorry for" people with disabilities after attending a 90-minute education session. A study found that medical students educated by individuals with disabilities helped students to learn how disability affects treatment plans, and helped students reflect on, and recognize, attitudes about disability. A study of fourth-year medical students used panel presentations led by individuals with disabilities. Students reported that they valued hearing about the personal experiences of people with disabilities, and about what worked and what did not in the medical setting and in patient-provider relationships. Introductory courses for students enrolled in the first occupational therapy and post-diploma management courses in the Russian Federation, developed and taught by the All-Russian Society of the Disabled, successfully developed positive attitudes in the students. A study to determine whether a change in curriculum affected nursing student's attitudes towards people with disabilities showed that their attitudes were more positive at the completion of their senior year. Provide health-care workers with continuing education Many health-care workers acknowledge a need for continuing education about disability. below. Health services research Data needed to strengthen health care systems include: number of people with disabilities health status of people with disabilities social and environmental factors influencing the health of people with disabilities responsiveness of health care systems to people with disabilities use of health care services by people with disabilities need, both met and unmet, for care. People with disabilities should be included in all general health care surveillance, and data on people with disabilities should be disaggregated. A good comparability, quality, and disability research capacity include:
- Organizations funding research could routinely require researchers to include people with disabilities in their population samples. Despite challenges, randomized controlled trials with people with intellectual impairment are possible. Researchers should be required to justify restricted eligibility criteria on scientific grounds. People with intellectual disabilities, people who face communication barriers, and others with low levels of literacy may need support completing survey instruments or participating in interviews. People with disabilities can actively participate in research, as researchers themselves, as participants in consultations or advisory groups, or playing a central role in commissioning and monitoring research. The International Classification of Functioning, Disability and Health (ICF) – which uses accepted and understood terminology, language, and concepts – can ensure consistency across studies and settings, thus removing these as barriers to progress in disability and health research and public policy. A range of research methods are needed including clinical trials, observational and epidemiological studies, health services research, surveys, and social and behavioural studies. Well designed, qualitative research can be used to investigate the full range of barriers and document good practices. Capacity building, research tools, and research training on disability are needed. Good instruments are particularly important for disability outcome research given evidence that people with disabilities often perceive health status and quality of life differently than people without disabilities. Conclusion and recommendations People with disabilities experience health disparities and greater unmet needs in comparison to the general population. All countries need to work towards removing barriers and making existing health care systems more inclusive and accessible to people with disabilities. strengthen existing policies, system, and services. Policy and legislation Assess existing policies, systems, and services, including an analysis of the needs, experiences, and views of people with disabilities, identify gaps and priorities to reduce health inequalities and plan improvements for access and inclusion. Make required changes in policies, systems, and services to comply with the CRPD. Establish health care standards related to care of persons with disabilities and frameworks and enforcement mechanisms to ensure standards are met. Involve people with disabilities in audits and related development and implementation of policies and services. Financing and affordability Ensure that people with disabilities benefit equally from public health care programmes. In countries where private health insurance dominates health care financing, ensure that people with disabilities are not denied insurance and consider measures to make the premiums affordable for people with disabilities. Use financial incentives to encourage health-care providers to make services accessible and provide comprehensive assessments, evidence-based treatment, and follow-ups.
-

- In low-income and middle-income countries, where effective primary care and mechanisms of disbursement exist, consi der targeted conditional cash transfer schemes linked to the use of health care to improve affordability and the use of services. Consider options for reducing or removing out-of-pocket payments for people with disabilities who do not have other means of financing health care services. Consider providing support to meet the indirect costs associated with accessing health care, such as transport. Service delivery Empower people with disabilities to maximize their health by prov iding information, training, and peer support. Where appropriate, include family members. Provide a broad range of reasonable accommodations. 83 Chapter 3 General health care Support primary health-care workers with specialists, who may be located elsewhere. Explore the options for use of communication and information technologies for improving services, health care capacity, and information access to persons with disabilities. Identify groups who require alternative service delivery models, for example, targeted services, care coordination to improve access to health care. In high-income countries incorporate disability access and quality standards into contracts with public, private, and voluntary service providers.
- Promote community-based rehabilitation, specifically in less-resourced settings, to facilitate access for disabled people to existing services. Human resources Integrate disability education into undergraduate and continuing education for all health care professionals. Involve people with disabilities as providers of education and training wherever possible. Provide evidence-based guidelines for assessment and treatment emphasizing patient-centred care. Train community workers so that they can play a role in screening and preventive health care services. Data and research In health and disability related research use the ICF, to provide a consistent framework. Conduct more research on the needs, barriers to general health care, and health outcomes for people with specific disabilities. Establish monitoring and evaluation systems to assess interventions and long-term health outcomes for people with disabilities. Include people with disabilities in research on general health care services. Include people with disabilities in health care surveillance by using disa bility identifiers - see Chapter 2 for more information incorporated research to inform the project's activities and evaluate outcomes. The project has resulted in many positive achievements in two years including: The Ugandan Ministry of Health has approved the Ponseti method as the preferred treatment for clubfoot in all its hospitals. 36% of the country's public hospitals have built the capacity to do the Ponseti procedure and are using the method. 798 health-care professionals received training to identify and treat clubfoot. Teaching modules on clubfoot and the Ponseti method are being used in two medical and three paramedical schools. 1152 students in various health disciplines received training in the Ponseti method. 872 children with clubfoot received treatment, an estimated 31% of infants born with clubfoot during the sample period – very high, given that only 41% of all births occur in a health care centre. Public awareness campaigns were implemented – including radio messages and distribution of posters and pamphlets to village health teams – to inform the general public that clubfoot is correctable. The project shows that clubfoot detection and treatment can quickly be incorporated into settings with few resources. The approach requires: Sc reening infants at birth for foot deformity to detect the impairment. Building the capacity of health-care professionals across the continuum of care, from community midwives screening for deformity, to NGO technicians making braces, and orthopaedic officers performing tenotomies. Decentralizing clubfoot care services, including screening in the community, for example through communitybased rehabilitation workers, and treatment in local clinics, to address treatment adherence barrier s. Incorporating Ponseti method training into the education curricula of medical, nursing, paramedical, and infant health-care students. Establishing mechanisms to address treatment adherence barriers including travel distance and costs. 100 World report on disability Rehabil itation medicine has shown positive outcomes, for example, in improving joint and limb function, pain management, wound healing, and psychosocial well-being (40–47). Therapy Therapy is concerned with restoring and compensating for the loss of functioning, and preventing or slowing deterioration in functioning in every area of a person's life. Therapists and rehabilitation worker s include occupational therapists, orthotists, physiotherapists, prosthetists, psychologists, rehabilitation and technical assistan ts, social workers, and speech and language therapists. Therapy measures include:

- Training, exercises, and compensatory strategies education support and counselling modifications to the environment provision of resources and assistive technology. Convincing evidence shows that some therapy measures improve rehabilitation outcomes. study found that: Minor adaptations (rails, ramps, over-bath showers, and door entry systems, for example) – most costing less than £500 – produced a range of lasting, positive consequences for virtually all recipients: 62% of respondents suggested they felt safer from the risk of accident, and 77% perceived a positive effect on their health. Major adaptations (bathroom conversions, extensions, lifts, for example) in most cases had transformed people's lives. Before adaptations, people used words like "prisoner", "degraded", and "afraid' to describe their situations; following adaptations, they spoke of themselves as "independent", "useful", and "confident". Where major adaptations failed, it was typically because of weaknesses in the original specification. Adaptations for children sometimes failed to allow for the child's growth, for example. In other cases, policies intended to save money resulted in major waste. Examples included extensions that were too small or too cold to use, and cheap but ineffective substitutes for proper bathing facilities. The evidence from recipients suggests that successful adaptations keep people out of hospitals, reduce strain on carers, and promote social inclusion. Benefits were most pronounced where careful consultation with users took place, where the needs of the whole family had been considered, and where the integrity of the home had been respected. with disabilities". Common examples of assistive devices are: crutches, prostheses, orthoses, wheelchairs, and tricycles for people with mobility impairments; hearing aids and cochlear implants for those with hearing impairments; white canes, magnifiers, ocular devices, talking books, and software for screen magnification and reading for people with visual impairments; communication boards and speech synthesizers for people with speech impairments; devices such as day calendars with symbol pictures for people services and may be useful for setting appropriate priorities for rehabilitation. The number of people needing hearing aids worldwide is based on 2005 World Health Organization estimates that about 278 million people have moderate to profound hearing impairments. In developed countries, industry experts estimate that about 20% of people with hearing
- impairments need hearing aids, suggesting 56 million potential hearing-aid users worldwide. Hearing aid producers and distributors estimate that hearing aid production currently meets less than 10% of global need, and less than 3% of the hearing aid needs in developing countries are met annually.

The International Society for Prosthetics and Orthotics and the World Health Organization have estimated that people needing prostheses or orthotics and related services represent 0.5% of the population in developing countries; and 30 million people in Africa, Asia, and Latin America require an estimated 180 000 rehabilitation professionals. In 2005 there were 24 prosthetic and orthotic schools in developing countries, graduating 400 trainees annually. Worldwide existing training facilities for prosthetic and orthotic professionals and other providers of essential rehabilitation services are deeply inadequate in relation to the need (92). A national survey of musculoskeletal impairment in Rwanda concluded that 2.6% of children are impaired and that about 80 000 need physical therapy, 50 000 need orthopaedic surgery, and 10 000 need assistive devices (93). Most of the available data on national supply and unmet need are derived from Rehabilitation disability-specific surveys on specific

Promote National studies on living conditions of people with disabilities conducted in Malawi, Mozambique, Namibia, Zambia, and Zimbabwe (94–98) revealed large gaps in the provision of medical rehabilitation and assistive devices. Gender inequalities in access to assistive devices were evident in Malawi (men 25.3% and women 14.1%) and Zambia (men 15.7% and women 11.9%). A survey of physical rehabilitation medicine in Croatia, the Czech Republic, Hungary, Slovakia, and Slovenia found a general lack of access to rehabilitation in primary, secondary, tertiary, and community health care settings, as well as regional and socioeconomic inequalities in access In a study of people identified as disabled from three districts in Beijing, China, 75% of those interviewed expressed a need for a range of rehabilitation services, of which only 27% had received such services. A national Chinese study of the need for rehabilitation in 2007 found that unmet need was particularly high for assistive devices and therapy. United States surveys report considerable unmet needs – often caused by funding problems – for assistive technologies.

Addressing barriers to rehabilitation The barriers to rehabilitation service provision can be overcome through a series of actions, including: reforming policies, laws, and delivery systems, including development or revision of national rehabilitation plans; developing funding mechanisms to address barriers related to financing of rehabilitation; increasing human resources for rehabilitation, including training and retention of rehabilitation personnel; expanding and decentralizing service delivery; increasing the use and affordability of technology and assistive devices; expanding research programmes, including improving information and access to good practice guidelines. Reforming policies, laws, and delivery systems A 2005 global survey of the implementation of the nonbinding, United Nations Standard Rules on the Equalization of Opportunities for Persons with Disabilities found that: in 48 of 114 (42%) countries that responded to the survey, rehabilitation policies were not adopted; in 57 (50%) countries legislation on rehabilitation for people with disabilities was not passed; in 46 (40%) countries rehabilitation programmes were not established. Many countries have good legislation and related policies on rehabilitation, but the implementation of these policies, and the development and delivery of regional and local rehabilitation services, have lagged. Systemic barriers include: Lack of strategic planning. A study of rehabilitation medicine related to physical impairments – excluding assistive technology, sensory impairments, and specialized disciplines – in five central and eastern European countries suggested that the lack of strategic planning for services had resulted in an uneven distribution of service capacity and infrastructure. Lack of resources and health infrastructure. Limited resources and health infrastructure in developing countries, and in rural and remote communities in developed countries, can reduce access to rehabilitation and quality of services . In a survey on the reasons for not using needed health facilities in two Indian states, 52.3% of respondents indicated that no healthcare facility in the area was available. Other countries lack rehabilitation services that have proven effective at reducing longterm costs, such as early intervention for children under the age of. A study of users of community-based rehabilitation (CBR) in Ghana, Guyana, and Nepal showed limited impact on physical well-being because CBR workers had difficulties providing physical rehabilitation, assistive devices, and referral services. In Haiti, before the 2010 earthquake, an estimated three

Lack of agency responsible to administer, coordinate, and monitor services. In some countries all rehabilitation is integrate d in health care and financed under the national health system. In other countries responsibilities are divided between different ministries, and rehabilitation services are often poorly integrated into the overall system and not well coordinated. A report of 29 African countries found that many lack coordination and collaboration among the diff erent sectors and ministries involved in disability and rehabilitation, and 4 of the 29 countries did not have a lead ministry. Inadequate health information systems and communication strategies can contribute to low rates of participation in rehabilitation. Aboriginal Australians have high rates of cardiovascular disease but low rates of participation in cardiac rehabilitation, for example. Barriers to rehabilitation include poor communication across the health care sector and between providers (notably b etween primary and secondary care), inconsistent and insufficient data collection processes, multiple clinical information systems, Rehabilitation and incompatib le technologies. Poor communication results in ineffective coordination of responsibilities among providers. Complex referral systems can limit access. Where access to rehabilitation services is controlled by doctors, medical rules or attitudes of primary physicians can obstruct individuals with disabilities from obtaining services. People a re sometimes not referred, or inappropriately referred, or unnecessary medical consultations may increase their costs. This is particularly relevant to people with complex needs requiring multiple rehabilitation measures.

Absence of engagement with people with disabilities. The study of 114 countries mentioned above did not consult with disabled people's organizations in 51 countries, and did not consult with families of persons with disabilities about design, implementation, and evaluation of rehabilitation pro grammes in 57 of the study countries. The Council has been very successful in developing physical rehabilitation and supporting professional training (physical therapy , prosthetics, orthotics, wheelchairs, and CBR) . Further benefits include: joint negotiation for equipment and supplies; sharing knowledge and expertise; continuing education through sharing specialist educators, establishing clinical education sites, reviewing and revising curricula, and disseminating information; 106 World report on d isability support for the transition from expatriate professional services to local management. Developing funding mechanisms for rehabilitation The cost of rehabilita tion can be a barrier for people with disabilities in high-income as well as low-income countries. effectiveness before being implemented. Financing strategies may include the following: Reallocate or redistribute resources. Public rehabilitation services should be reviewed and evaluated, with resources reallocated effective ly. Possible modifications include: – changing from hospital or clinic-based rehabilitation to community-based interventions ; – reorganizing and integrating services to make them more efficient; – relocating equipment to where it is most needed. Cooperate internationally. Developed cou ntries, through their development aid, could provide long-term technical and financial assistance to developing countries to strengthen rehabilitation services, including rehabilitation personnel development. Aid agencies from Australia, Germany, Italy, Japan, New Zealand, Norway, Sweden, the United Kingdom, and the United States have supported such activities.

Include rehabilitation services in foreign aid for humanitarian crises. Conflict and natural disaster cause injuries and disa bilities and make people with existing disabilities even more vulnerable – for example, after an earthquake there are increased difficulties in moving around due to the rubble from collapsed buildings and the loss of mobility devices. Foreign aid should also include trauma car e and rehabilitation services. Combine public and private financing. Clear demarcation of responsibilities and good coordination among sectors is needed for this strategy to be effective. Some services could be publicly funded but priva tely provided – as in Australia, Cambodia, Canada, and India. Target poor people with disabilities. The essential elements of rehabilitation need to be identified, pub licly funded, and made available for free to people with low incomes, as in South Africa (149) and India (8). Evaluate coverage of health insurance, including criteria for equitable access. A study in the United States on access to physical therapy found that health care funding sources provided different coverage for physical therapy services d epending on whether people had cerebral palsy, multiple sclerosis, or spinal cord injury. universities, and private companies. Several approaches were instrumental i n the success of this training initiative: Strong partnership. An established education institution with strong pedagogical expertise, University Don Bosco was identified to assume overall responsibility for the training.

The German Technical Cooperation agency, experienced in developing prosthetics and orthotics training programmes in Asia and Africa, provided the technical and financial support. Long-term vision for sustainable training provision. A six-month orientation phase enabled the different partners to agree on details of project implementation, including objectives, activities, indicators, responsibilities, and resources. A 7–10 year strategy enabled the programme to become self-sustaining. Internationally recognized guidelines. All University Don Bosco training programmes have been developed with support from the International Society for Prosthetics and Orthotics, accredited based on the international guidelines for training developed by the Society and by WHO. Capacity building. Technical content was developed and delivered by two advisors from the German Technical Cooperation for the initial three-year training programme degree programme in prosthetics and orthotics (ISPO /WHO Category I) was started. Ensuring recruitment. Prosthetic and orthotic technicians and engineers were integrated into the general health system in El Salvador, and support was provided to other countries to establish similar programmes. Choosing appropriate technologies. Identifying and developing appropriate technologies ensured sustainable provision.World report on disability across the world: three years in China (Chinese Standards), at least four years in Europe (37), and five years in the United States. Help coordinate the delivery of rehabilitation services, and having an interdisciplinary health care team under one roof can provide essential health care at an affordable cost. Improve availability, accessibility, and affordability (200) which can overcome barriers to referral, such as inaccessible locations, inadequate services, and the high costs of private rehabilitation. Improve patient experience by ensuring services are available early and that waiting time and travelling time are reduced. Together with patient involvement in service development, this can produce better outcomes, improve compliance with treatment, and increase satisfaction among patients and rehabilitation personnel. rehabilitation strategies, to reduce secondary conditions.

This requires:

Acute care doctors recognizing patients with disabling injuries, and involving the rehabilitation team in their care as early as possible; a small and well trained team in the general hospital; basic rehabilitative care directed towards health promotion and prevention of complications, initiated soon after the acute phase of trauma care; provision of basic equipment and supplies. Source (215). 116 World report on disability Box 4.7. Physical assistance to earthquake victims and rehabilitation service strengthening in Gujarat, India On 26 January 2001 an earthquake measuring 6.9 on the Richter scale struck Gujarat State, India. An estimated 18 000 people were killed and 130 000 people were injured in the Kutchch District of Gujarat, creating a heavy burden on an already fragmented health care system.

The response shows that overall care – particularly rehabilitation services for people with disabilities – can be considerably strengthened affordably and sustainably even in low-income and post-disaster settings. In the wake of the disaster, a partnership between the state government of Gujarat, Handicap International (an international nongovernment organization) and the Blind People's Association (a local cross-disability NGO) was established to build the capacity of existing services. Tertiary level The project improved equipment and infrastructure for physiotherapy and other aspects of facility-based rehabilitation at the Civil Paraplegic Hospital and in Kutchch. It improved discharge planning for people with disabilities admitted to the Civil Paraplegic Hospital Centre through the training of social workers. Prior to the earthquake no referral system existed. Referral rates improved for people with disabilities from the Civil Hospital to a new community network of 39 disability and development organizations supporting community-based rehabilitation services. District, secondary level The project improved rehabilitation service delivery by providing technical assistance to the Blind People's Association to establish one secondary-level rehabilitation centre – providing prosthetics and orthotics, and physical therapy (by eight visually impaired physiotherapists) near the new Kutchch District Hospital. Nearly 3000 people received orthopaedic devices, an additional 598 received free assistive devices through the Government assistance scheme, and 208 people were fitted with devices in their homes by physical therapists. The referral centre supported satellite centres for six months after the earthquake. Coordination improved between different levels of government health providers, and between government health providers and nongovernmental organizations, with mechanisms for referral, treatment, and follow-up, which helped ensure access and continuity of service. An individual case record system and a directory of all rehabilitation facilities in and around Kutchch were developed and managed by the primary health care centres. Community level The project strengthened primary health care, training 275 health-care workers to identify people with disabilities and provide appropriate interventions and referral. An evaluation eight months after the training showed high knowledge retention, with many workers able to identify children with disabilities under 10 months old. It improved the provision of rehabilitation services at a community health centre through the establishment of a physiotherapy programme. It included the people with disabilities in development initiatives by training 24 community development workers, in 84 of 128 villages, to identify people with disabilities, deliver basic care and refer. It increased the proportion of persons with paraplegia having access to both hospital and community-based rehabilitation services. It increased awareness among community and family members, disabled persons, and professionals about disability

Identifying people with impairments and facilitating referrals. CBR workers in Bangladesh were trained as “key informants” to identify and refer children with visual impairments to specialist eye camps; referrals by the informants accounted for 64% of all referrals to the eye camps. Children were identified earlier and were more representative of the overall incidence of blindness across the community. A subsequent review of 11 similar studies that used Participatory Rural Appraisal and informants to identify disabled children concluded that community-based methods were consistently less expensive than other methods, and that children benefited from longer engagement with subsequent community interventions . Delivering simple therapeutic strategies through rehabilitation workers, or taught to individuals with disabilities or a family member. Examples include adopting a better posture to prevent contractures, and training in daily living skills. Providing individual or group-based educational, psychological, and emotional support services for persons with disabilities and their families. A study of a CBR model for people with chronic schizophrenia in rural India found that while the community-based rehabilitation model was more time- and resource-intensive than outpatient services, it was more efficient, better at overcoming economic, cultural, and geographic barriers, better for programme compliance, and appropriate for resourcepoor settings (211). Another study on CBR in Italy found that people with mental illness experienced improved interpersonal relationships and social inclusion. Very isolated people also benefited from the close relationship developed between the patient and the CBR worker. Involving the community. In Thailand a study in two rural districts building capacity for CBR used group meetings for people with disabilities, their families, and community members to manage rehabilitation problems collaboratively (167). Increasing the use and affordability of technology Assistive devices Many people around the world acquire assistive technology on the open market. Access to assistive technology can be improved by improving economies of scale in purchasing and production to reduce cost. Suit the environment. A large number of wheelchairs in low-income and middleincome countries, donated by the international community without related services, are rejected because they are not appropriate for the user in their environment (238, 239). Be suitable for the user. Poor selection and fit of assistive devices, or lack of training in their use, may cause further problems and secondary conditions. Devices should be selected carefully and fitted properly. Users should be engaged in assessment and selection to minimize abandonment because of a mismatch between need and device. Include adequate follow-up to ensure safe and efficient use. A study in rural Finland on why prescribed hearing aids remain unused found that follow-up care, including counselling, resulted in increased and more consistent use of the devices. Availability and affordability of local maintenance is also important. Access to batteries affects ongoing hearing-aid use, for instance. Improved hearing-aid battery technologies are needed for resource-poor settings. A project in Botswana discovered that rechargeable batteries using solar power offered a promising option. Telerehabilitation The use of information, communication, and related technologies for rehabilitation is an emerging resource that can enhance the capacity and accessibility of rehabilitation measures by providing interventions remotely. Telerehabilitation technologies include:

Video and teleconferencing technologies in accessible formats; mobile phones; remote data-collection equipment and telemonitoring – for example, cardiac monitors. Technology may be used by people with disabilities, rehabilitation workers, peers, trainers, supervisors, and community workers and families. Where the Internet is available, e-health (telehealth or telemedicine) and telerehabilitation techniques have enabled people in remote areas to receive expert treatment from Rehabilitation specialists located elsewhere. Examples of telerehabilitation include: telepsychiatry services , cardiac rehabilitation , speech and language therapy , and cognitive rehabilitation for people with traumatic brain injury remote assessments to provide home modification services to underserved elderly people; training and support of health-care personnel; computerized guidelines to help clinicians use appropriate interventions; consultation between tertiary hospital and community hospitals for problems related to prosthetics, orthotics, and wheelchair prescription; sharing professional expertise between countries, as well as at critical times such as in the aftermath of a disaster. Growing evidence on the efficacy and effectiveness of telerehabilitation shows that telerehabilitation leads to similar or better clinical outcomes when compared to conventional interventions (255). Further information on resource allocation and costs is needed to support policy and practice. Expanding research and evidence-based practice Some aspects of rehabilitation have benefited from significant research, but others have received little attention. the link between rehabilitation needs, receipt of services, health outcomes (functioning and quality of life), and costs; access barriers and facilitators for rehabilitation, models of service provision, approaches to human resource development, financing modalities, among others; cost–effectiveness and sustainability of rehabilitation measures, including community-based rehabilitation programmes. Obstacles to strengthening research capacity include insufficient rehabilitation researchers, inadequate infrastructure to train and mentor researchers, and the absence of partnerships between relevant disciplines and organizations representing persons with disabilities. obtain information on good practices through: Guidelines that apply research knowledge, usually on a specific health condition, to actual practice for clinicians.

An independent search for specific interventions. Continuing professional education. Clinical guidance notes on good practice from employers and health organizations. Discipline-specific Internet databases that appraise the research for clinicians. A wide variety of sources, including general bibliographic databases and databases specializing in rehabilitation research, are available on the Internet. Most of these databases have already evaluated the research for quality, provided ratings of research studies, and summarized the evidence. effectiveness of interventions and programmes is extremely beneficial to: guide policy-makers in developing appropriate services allow rehabilitation workers to employ appropriate interventions support people with disabilities

I want to express my deepest gratitude for all you do to advance the rights of persons with disabilities across our agenda and around the world through your generosity and networks. Your giving will be vital in our hands – not just for persons with disabilities, but, indeed, for all people in the world through all spheres of life in education, health, shelter, environment, socio-economic life etc. Disability inclusion is a fundamental human right. When we fight to secure those rights, we move our world closer to upholding the core values and principles of global humanitarian Charter. Disability inclusion is central to the promise of the 2030 Global Agenda on Sustainable Development. When we remove policies or biases or obstacles to opportunity for persons with disabilities, the whole world benefits we shall support and work on this.

Indeed, the International Labour Organization found that excluding people with disabilities from the world of work can rob countries of as much as 7 per cent of their Gross Domestic Product. Realizing the rights of persons with disabilities is a matter of justice as well as a common-sense investment in our common future. Our strategic plan will go a long way to go in changing mindsets, laws and policies to ensure the rights, opportunity and dignity for persons with disabilities around the world. So we are here, together, to take action to make the goals and the objectives of welfare of the world a reality on the ground including orphans and those who live with disability. We shall promote stronger collaboration among donors and partners, the Global system, civil society organizations -- in particular, organizations of persons with disabilities / charity / empowerment and development partners – as well as the private sector and institutions through your networks our donors and partners.

And we are here as friends of the world and humanity “to transform society, community and development the world to be inclusive, accessible and sustainable for all”. The global progress has highlights core challenges: disproportionate levels of poverty, lack of access to education, health services, employment and the under-representation of persons with disabilities in decision-making and political participation. That is what we seek to we must do much more to address discrimination and exclusion -- particularly against girls and women with disabilities. We must do much more to ensure full accessibility to schools, health care and services, the workplace, leisure and recreational activities, sports, and all areas of life. We must also do much more on transportation, infrastructure and information and communications technology to make our cities, rural areas, and societies inclusive. Our destination is clear: a world in which all persons – including those with disabilities – can enjoy equal opportunities, have a full say in decision-making processes and truly benefit from economic, social, political and cultural life.

I urge all donors to be more ambitious in implementing financial commitments to ensure the realization of Helpers Of Africa International programs and plans including the rights of all persons with disabilities. We have some examples of good practices – but the review shed light on gaps – big gaps – across all our work from headquarters Kenya to the country level. The rep understanding and systemic approaches to ensure we fulfil our responsibilities. It showed unevenness in our approach – in our use of existing tools and mechanisms – in not only our strategies, but even in awareness of core policies.

Our strategic plans in Helpers Of Africa International in all spheres is not a strategy of words – it is a strategy of action – action to raise the standards of our performance in the global sphere among many players disability inclusion across the board – and action to bring about the unified and transformative change we need globally. We have accountability framework to monitor progress and to make sure we address the challenges and gaps – not only in headquarters but in the field through a strong monitoring and evaluation with real time, online reporting time. We have established clear benchmarks and a focus on critical areas including leadership, strategic planning, accessibility, participation, programming, procurement and a call for more persons with disabilities working with us and better supported by the organization.

I want the Helpers Of Africa International to be an employer of choice for persons with disabilities. I want our humanitarian, development and peace operations to fully recognize and advance the rights of persons with disabilities. And I want the Helpers Of Africa International to be fully accessible for one and all. We cannot be a platform for change when persons with disabilities cannot access that platform to speak globally and that is what we seek to do. And I count especially on persons with disabilities and on other project to ensure that the entire Helpers Of Africa International family makes good on the promise of this strategy across all departments and divisions. We are a family as Donors and as workers implementers. Together, with persons with disabilities as agents of change, we can build an inclusive, accessible and sustainable world and together, we can create the conditions to realize the dream of a better world

Disabilty should not prevent people from having a prominent career. We shall work hard to make those who live with disability to benefit from the good world that God has in this world access to class medical care. We shall create a support system that make it possible to live and work in comfort and dignity. Avail good health, shelter, jobs, business opportunities, talent and career development. We shall support those with disabilities with technology in communication, mobility and function to live a worthwhile life. It is very clear that the majority of people with disabilities in the world have an extremely difficult time with everyday survival, let alone productive employment and personal fulfilment. Our strategic plan makes a major contribution to our understanding of disability and its impact on individuals and society. It highlights the different barriers that people with disabilities face – attitudinal, physical, and financial. Addressing these barriers is within our reach. We have a moral and godly duty to remove the barriers to participation, and to invest sufficient funding and expertise to unlock the vast potential of people with disabilities. Governments throughout the world can no longer overlook the hundreds of millions of people with disabilities who are denied access to health, rehabilitation, support, education and employment, and never get the chance to shine.

Our Strategic plan makes recommendations for action at the local, national and international levels. It will thus be an invaluable tool for policy-makers, researchers, practitioners, advocates and volunteers involved in disability. It is my hope that our coming in global affairs will be value addation. In the years ahead, disability will be an even greater concern because its prevalence is on the rise. This is due to ageing populations and the higher risk of disability in older people as well as the global increase in chronic health conditions such as diabetes, cardiovascular disease, cancer and mental health disorders. Across the world, people with disabilities have poorer health outcomes, lower education achievements, less economic participation and higher rates of poverty than people without disabilities. This is partly because people with disabilities experience barriers in accessing services that many of us have long taken for granted, including health, education, employment, and transport as well as information. These difficulties are exacerbated in less advantaged communities. To achieve the long-lasting, vastly better development prospects that lie at the heart of global Development Goals and beyond, we must empower people living with disabilities and remove the barriers which prevent them participating in their communities; getting a quality education, finding decent work, and having their voices heard. As a result, Helpers Of Africa International Group will join world players and stakeholders to provide the evidence for innovative policies and programmes that can improve the lives of people with disabilities, and facilitate implementation as a global response to humanitarian response. Our plans and actions in all sectors of global affairs education, health, environment, shelter, food, groups empowerment, cities & urban development, mining, infrastructure and other will reinforced a global impact and understanding of development as we join other players. The our global strategic plans suggests steps for all stakeholders – including governments, civil society organizations and disabled people's organizations – to create enabling environments, develop rehabilitation and support services, ensure adequate social protection, create inclusive policies and programmes, and enforce new and existing standards and legislation, to the benefit of people with disabilities and the wider community. People with disabilities should be central to these endeavors. Our driving vision is of an inclusive world in which we are all able to live a life of health, comfort, and dignity. Our historical commitment funds reaffirms that people like you who have been blessed by God can step in to make the lives of others better in being a blessing and to orphans and those with disabilities are entitled to exactly the same rights as everyone else, and that societies must be organized so that all people, including those with disabilities, can exercise their rights freely. We shall engage Countries to accept and adobt our development policies, investments and legal systems, to leave no one behind as moses of the bible told pharoh we are going all of us not leaving the weak and elders or youthful to serve God in the promised land. Societies will never succeed without the full participation of everyone, including people with disabilities. We cannot afford to ignore or marginalize the contributions of 1.5 billion people. Upholding the rights of people with disabilities is a moral imperative. But it is not an act of charity. It is a recognition of rights and a practical necessity, if we are to build healthy, sustainable societies to the benefit of everyone – those with disabilities, and those without.

I strongly believe that despite many international agreements and initiatives, we must all support civil society, the private sector, and all stakeholders – do much more to ensure that people with disabilities have full access to opportunities and can participate fully in society. This is why advancing the rights of persons with disabilities and orphans is firmly situated at the heart of our global blueprint for peaceful, prosperous societies on a healthy planet. From the workplace to public transport systems, from concert halls to cyberspace and daily social interactions, people with disabilities face overt discrimination, stereotyping, and lack of respect for their basic human rights. There is also a strong gender dimension to disability. Women and girls are disproportionately affected, particularly in the poorest countries in the world. Every minute, more than 30 women are seriously injured or disabled during childbirth. Women and girls with disabilities face multiple barriers to accessing education, health services and jobs. Without women's empowerment and gender equality, millions of women will continue to suffer from double discrimination based on both their gender and their disability.

We must all find new approaches and tools to work for and with people with disabilities. These should include mainstreaming disability in national legislation and development strategies; and engaging and empowering people with disabilities, and the organizations that represent them. It must also include raising awareness. Discrimination against people with disabilities has been going on for centuries. It will take major efforts to challenge stereotypes and to change mindsets. The powerful advocacy of the disability rights movement and the inspiring achievements of women and men with disabilities in all walks of life, from the science lab to the sports field, are creating lasting change. It will also be crucial to support the work Governments and global institutions to develop their capacity on these issues. We need to strengthen the policy frameworks and laws on orhans and disability at the multilateral and global level together with others. If people with disabilities are to be part of our efforts to achieve global future fo all we must make institutions, mechanisms and processes coherent and coordinated.

There is still a lot to go, and employment to mainstreaming disabilities across all our work, particularly development and humanitarian aid. It will inform a new Helpers Of Africa International Action Plan and an accountability framework to help us aim higher and live up to our promises. Together, we can remove barriers and raise awareness, so that people with disabilities can play a full part in every sphere of society, around the world. The world's poor are significantly more likely to have or incur a disability within their lifetime compared to more financially privileged populations. The rate of disability within impoverished nations is notably higher than that found in more developed countries. Since the early 2010s there has been growing research in support of an association between disability and poverty and of a cycle by which poverty and disability are mutually reinforcing. Physical, cognitive, mental, emotional, sensory, or developmental impairments independently or in tandem with one another may increase one's likelihood of becoming impoverished, while living in poverty may increase one's potential of having or acquiring special needs in some capacity.

A multitude of studies have been shown to demonstrate a significant rate of disability among individuals living in poverty. "People with disabilities in developing countries are over-represented among the poorest people. They have been largely overlooked in the development agenda so far, but the recent focus on poverty reduction strategies is a unique change to rethink and rewrite that agenda."[3] The link between disability and development has been further stressed. Over 10,000 individuals with disabilities die each day as a result of extreme poverty, showing that the connection between these two constructs is especially problematic and deep-seated.This connection is also present in developed countries, with the Disability Funders Network reports show those with disabilities are twice as likely to live below the poverty line as those without special needs.**"Persons with disabilities on average as a group experience worse socioeconomic outcomes than persons without disabilities, such as less education, worse health outcomes, less employment, and higher poverty rates."Researchers have demonstrated that these reduced outcomes may be attributed to a myriad of institutional barriers and other factors. Furthermore, the prevalence of disabilities in impoverished populations has been predicted to follow a cyclical pattern by which those who live in poverty are more likely to acquire a disability and those who have a disability are more likely to become impoverished.**

There is vicious circle we need to break, Experts from the United Kingdom Disabled Persons Council attribute the connection between disability and poverty to many systemic factors that promote a “vicious circle.”Statistics affirm the mutually reinforcing nature of special needs and low s ocioeconomic status, showing that people with disabilities are significantly more likely to become impoverished and people who are impoverished are significantly more like ly to become disabled. Barriers presented for those with disabilities can lead individuals to be deprived of access to es sential resources, such as opportunities for education and employment, thus causing them to fall into poverty. Likewise, poverty places individuals at a much greater risk of acquiring a disability due to the general lack o f health care, nutrition, sanitation, and safe working conditions that the poor are subject to

Experts assert that this cycle is perpetuated mainly by the lack of agency afforded to those living in poverty. The few options available to the poor often necessitate that these individuals put themselves in harms way, consequently resulting in an increase in the acquisition of preventable impairments. Living in poverty is also shown to decrease an individual's access to preventive health services, which results in an increase in the acquisition of potentially preventable disabilities. In a study by credible organizations found that well over half of the instances of childhood blindness and hearing impairment in Africa and Asia were considered preventable or treatable. Another estimate released provides further evidence of this vicious circle, finding that 100 million people living in poverty suffer from impairments acquired due to malnutrition and lack of proper sanitation.

Discrimination Prejudice held against individuals with disabilities, otherwise termed ableism, is shown to be a significant detriment to the successful outcomes of persons in this population. According to one study following the lives of children with disabilities in the children in the sample described "discrimination from other metal children and adults in the community as their most significant daily problem. Additional forms of discrimination may lead disability to be more salient in already marginalized populations. Women and individuals belonging to certain ethnic groups who have disabilities have been found to more greatly suffer from discrimination and endure negative outcomes. Some researchers attribute this to what they believe is a “double rejection” of girls and women who are disabled on the basis of their sex in tandem with their special needs.

The stereotypes that accompany both of these attributes lead females with disabilities to be seen as particularly dependent upon others and serve to amplify the misconception of this population as burdensome. The societal consequences of having a disability while belonging to an already marginalized population were highlighted, stating, “A disabled women suffers a multiple handicap. Her chances of marriage are very slight, and she is most likely to be condemned to a twilight existence as a non-productive adjunct to the household of her birth... it is small wonder that many disabled female babies do not survive.” Additionally, women with disabilities are particularly susceptible to abuse. A 2004 UN survey in Orissa, India, found that every women with disabilities in their sample had experienced some form of physical abuse. This double discrimination is also shown to be prevalent in more industrialized nations. In Some developed countries 72 percent of women with disabilities live below the poverty line. The intensified discrimination individuals with disabilities may face due to their sex is especially important to consider when taking into account that, according to the Organisation for Economic Co-operation and Development, women report higher incidences of disability than men. Furthermore, the connection between disability and poverty holds particular significance for the world's women, with females accounting for roughly 70 percent of all individuals living in poverty. Institutional discrimination also exists as there are policies existing in organizations that result in inequality between a disabled person and non-disabled person. Some of these organizations systematically ignore the needs of disabled people and some interfere in their lives as a means of social control.[16]

Access to Health care, Another reason individuals living with disabilities are often impoverished is the high medical costs associated with their needs. One study, conducted in villages in South India, demonstrated that the annual cost of treatment and equipment needed for individuals with disabilities in the area ranged from three days of income to upwards of two years' worth, with the average amount spent on essential services totaling three months worth of income. This figure does not take into account the unpaid work of caregivers who must provide assistance after these procedures and the opportunity costs leading to a loss of income during injury, surgery, and rehabilitation. Studies reported by medical anthropologists Benedicte Ingstad and Susan Reynolds Whyte have also shown that access to medical care is significantly impaired when one lacks mobility. They report that in addition to the direct medical costs associated with special needs, the burden of transportation falls most heavily on those with disabilities.

This is especially true for the rural poor whose distance from urban environments necessitates extensive movement in order to obtain health services. Due to these barriers, both economic and physical, it is estimated that only 2 percent of individuals with disabilities have access to adequate rehabilitation services. The inaccessibility of health care for those living in poverty has a substantial impact on the rate of disability within this population. Individuals living in poverty face higher health risks and are often unable to obtain proper treatment, leading them to be significantly more likely to acquire a disability within their lifetime. Financial barriers are not the only obstacles those living in poverty are confronted with. Research shows that matters of geographic inaccessibility, availability, and cultural limitations all provide substantial impediments to the acquisition of proper care for the populations of developing countries. Sex-specific ailments are particularly harmful for women living in poverty. The World Health Organization estimates that each year 20 million women acquire disabilities due to complications during pregnancy and childbirth that could be significantly mitigated with proper pre-natal, childbirth, and post-natal medical care.[21] Other barriers to care are present in the lack of treatments developed to target diseases of poverty. Experts assert that the diseases most commonly affecting those in poverty attract the least research funding. This discrepancy, known as the 10/90 gap, reveals that only 10 percent of global health research focuses on conditions that account for 90 percent of the global disease burden. Without a redistribution in research capital, it is likely that many of the diseases known to cause death and disability in impoverished populations will persist. Institutional barriers, Researchers assert that institutional barriers play a substantial role in the incidence of poverty in those with disabilities. Physical environment may be a large determinant in one's ability to access ladders of success or even basic sustenance. Professor of urban planning Rob Imrie concluded that most spaces contain surmountable physical barriers that unintentionally create an “apartheid by design,” whereby individuals with disabilities are excluded from areas because of the inaccessible layout of these spaces. This "apartheid" has been seen by some, such as the United Kingdom Disabled Persons Council, as especially concerning with regard to public transportation, education and health facilities, and perhaps most relevantly places of employment. Physical barriers are also commonly found in the home, with those in poverty more likely to occupy tighter spaces inaccessible to wheelchairs. Beyond physical accessibility, other potential excluding agents include a lack of Braille, sign language and shortage of audio tape availability for those who are blind and deaf.

Education

The roots of unemployment are speculated to begin with discrimination at an early age. UNESCO reports that 98 percent of children with disabilities in developing countries are denied access to formal education. This statistic is even more jarring for women with disabilities, with the United Nations Development Program reporting that the global literacy rate for this population is a mere 1 percent. This may be attributed to the fact that, according to the World Health Organization, boys with disabilities are significantly more likely to receive an education than similarly abled girls. Beyond simply the skills obtained, experts such as former speculate that the societal value of education and the inability of schools to accommodate special needs children substantially contributes to the discrimination of these individuals.It is important to note that the deprivation of education to individuals with special needs may not be solely an issue of discrimination, but an issue of resources. Children with disabilities often require specialized educational resources and teaching practices largely unavailable in developing countries.

On Employment

Some sociologists have found a number of barriers to employment for individuals with disabilities. These may be seen in employer discrimination, architectural barriers within the workplace, pervasive negative attitudes regarding skill, and the adverse reactions of customers. According to sociologist Edward Hall, "More disabled people are unemployed, in lower status occupations, on low earnings, or out of the labour market altogether, than non-disabled people. The International Labour Organization estimates that roughly 386 million of the world's working age population have some form of disability, however, up to eighty percent of these employable individuals with disabilities are unable to find work. Statistics show that individuals with disabilities in both industrialized and developing countries are generally unable to obtain formal work. In India, only 100,000 of the country's 70 million individuals with disabilities are employed. In the United States, 14.3 of a projected 48.9 million people with disabilities were employed, with two-thirds of those unemployed reporting that they were unable to find work. Similarly in Belgium, only 30 percent of persons with disabilities were able to find gainful employment. In the United Kingdom, 45 percent of adults with disabilities were found to live below the poverty line. Reliable data on the rate of unemployment for persons with disabilities has yet to be determined in most developing countries.

Sociologists Colin Barnes and Geof Mercer demonstrated that this exclusion of persons with disabilities from the paid labor m arket is a primary reason why the majority of this population experiences far greater levels of poverty and are more reliant on the financial support of others. In addition to the economic gains associated with employment, researchers have shown that participation in the formal economic sector reduces discrimination of persons with disabilities. One anthropologist who chronicled the lives of persons with disabilities in Botswana noted that individuals who were able to find formal employment "will usually obtain a position in society equal to that of non-disabled citizens." Because the formal workplace is such a social space, the exclusion of individuals with disabilities from this realm is seen by some sociologists to be a significant impediment to social inclusion and equality.

Equity in employment has been strategized by some, such as sociologists Esther Wilder and William Walters, to depend on heightened awareness of current barriers, wider use of assistive technologies that can make workplaces and tasks more accessible, more accommodating job development, and most importantly deconstructing discrimination.Creating inclusive employment that better facilitates the participation of individuals with disabilities is demonstrated to have a significantly positive impact on not only the lives of these individuals, but also the economies of nations who implement such measures. The International Labour Organization estimates that the current exclusion of employable individuals with special needs is costing countries possible gains of 1 to 7 percent of their GDP.

Implications

The relationship between disability and poverty is seen by many to be especially problematic given that it places those with the greatest needs in a position where they have access to the fewest resources. Researchers from the United Nations and the Yale School of Public Health refer to the link between disability and poverty as a manifestation of a self-fulfilling prophecy where the assumption that this population is a drain of resources leads society to deny them access to avenues of success. Such exclusion of individuals on the basis of their special needs in turn denies them the opportunity to make meaningful contributions that disprove these stereotypes. Oxfam asserts that this negative cycle is largely due to a gross underestimation of the potential held by individuals with disabilities and a lack of awareness of the possibilities that each person may hold if the proper resources were present.

The early onset of preventable deaths has been demonstrated as a significant consequence of disability for those living in poverty. Researchers show that families who lack adequate economic agency are unable to care for children with special medical needs, resulting in preventable deaths.[9] In times of economic hardship studies show families may divert resources from children with disabilities because investing in their livelihood is often perceived as an investment caretakers cannot afford to make.Benedicte Ingstad, an anthropologist who studied families with a member with disabilities, asserted that what some may consider neglect of individuals with disabilities "was mainly a reflection of the general hardship that the household was living under." A study conducted by Oxfam found that the rejection of a child with disabilities was not uncommon in areas of extreme poverty. The report went on to show that neglect of children with disabilities was far from a deliberate choice, but rather a consequence of a lack of essential resources. The study also demonstrated that services necessary to the well being of these children "are seized upon" when they are made available. The organization thus concludes that if families had the capacity to care for children with special needs they would do so willingly, but often the inability to access crucial resources bars them from administering proper care.

Current initiatives

Initiatives on the local, national, and transnational levels addressing the connection between poverty and disability are exceedingly rare. According to the UN, only 45 countries throughout the world have anti-discrimination and other disability-specific laws. Additionally, experts point to the Western world as a demonstration that the association between poverty and disability is not naturally dissolved through the development process. Instead, a conscious effort toward inclusive development is seen by theorists, such as Disability Policy expert, as essential in the remediation process. Disability rights advocates that it is crucial to better incorporate the voices of individuals with disabilities into the decision making process. literature on disability rights made popular the slogan, "Nothing about us without us," evidencing the need to ensure those most affected by policy have an equitable hand in its creation. This need for agency is an issue particularly salient for those with special needs who are often negatively stereotyped as dependent upon others.

Furthermore, many who are part of the disability rights movement argue that there is too little emphasis on aid designed to eliminate the physical and social barriers those with disabilities face. The movement asserts that unless these obstacles are rectified, the connection between disability and poverty will persist. Employment is seen as a critical agent in reducing stigma and increasing capacity in the lives of individuals with disabilities. The lack of opportunities currently available is shown to perpetuate the vicious cycle, causing individuals with disabilities to fall into poverty. To address these concerns many recent initiatives have begun to develop more inclusive employment structures.[31] Some good model stresses education and pairs individuals with intellectual disabilities with mentors until they have developed the skills necessary to perform their roles independently. The program then matches individuals with local employers. This gradualist model ensures that people who may have been deprived of the resources necessary to acquire essential skills are able to build their expertise and enter the workforce. This are good models that Helpers Of Africa International seeks to support

Many global institutions have been at the forefront of initiating legislation that aims to deter the current toll disabilities take on individuals in society, especially those in poverty. "Particular efforts should be made to integrate the disabled in the development process and that effective measures for prevention, rehabilitation and equalization of opportunities are therefore essential." The global Standard Rules encourages states to remove social, cultural, economic, educational, and political barriers that bar individuals with disabilities from participating equally in society. Proponents claim that these movements on behalf of Global Agencies helped facilitate more inclusive development policy and brought disability rights to the forefront.

Helpers Of Africa International will invest heavily in the welfare of orphans globally, Orphans and Vulnerable Children Defined- The concept of orphans and vulnerable children (OVC) does not adhere to a universal definition and varies across countries in sub-Saharan Africa. The following definitions of a child, an orphan and of vulnerability have been adopted:

The child- Defined by the UN Convention on the Rights of the Child as “every human being below the age of eighteen years unless under the law applicable to the child, majority is attained earlier." The orphan -The official definition of an orphan is a child aged zero to 17 years whose mother, father, or both have died . There are, however, other children who are referred to as social orphans even though one or both their parents may still be alive but who have been unable to perform parental duties because of illness or acute poverty among other reasons.Vulnerability -Vulnerability is viewed as "a high probability of a negative outcome" , or an expected welfare loss above a socially accepted norm, which results from risky or uncertain events, and the lack of appropriate means to deal with them. Vulnerability leaves one at risk of exposure to stressful situations. The degree and type of vulnerability however, varies in each context and overtime.Vulnerable child -A vulnerable child is defined as being under the age of 18 years and currently at high risk of lacking adequate care and protection. Accordingly, all children are vulnerable by nature compared to adults, but some are more critically vulnerable than others. “Child vulnerability is a downward spiral where each shock leads to a new level of vulnerability, and each new level opens up for a host of new risks. In other words, the probability of a child experiencing a negative outcome rises with each shock.”

Our scoope of concern and care in the orphans department: , orphaned by the death of one or both parents, abandoned by parents, living in extreme poverty, living with a disability, affected by armed conflicts, abused by parents or their carers, malnourished due to extreme poverty, HIV-positive and finally, those marginalized, stigmatized, or even discriminated against. All vulnerable children have one common denominator: they have no reliable social safety networks on hand to depend upon in order to adequately manage the risk to which they daily exposed. Vulnerable Child: A child who, because of circumstances of birth or immediate environment, is prone to abuse or deprivation of basic needs, care, and protection, and is thus disadvantaged relative to his or her peers. Below are the categories of vulnerable children, as defined during consultations with stakeholders from the six geopolitical zones in Nations, Children who have lost one or both parents, Children living with terminally or chronically ill parent(s) or caregiver(s) , Children on or of the street (i.e., child hawkers) , Children living with aged or frail grandparent(s) , Children who get married before 18 years , Neglected and abandoned children , Children in child-headed homes , Children infected with HIV , Child beggars/destitute children (including exploited almajiris) , Internally displaced or separated children , Child domestic servants , Child sex workers , Children with special challenges or disability, or whose parents have disability , Trafficked children , Children in conflict with the law , Children of migrant workers (e.g., fishermen or -women, nomads) ƒ Children living with teenage unmarried parent(s)

We stand today on a critical threshold for global health and development. A quarter century ago, more than half a million women worldwide died annually due to childbirth, and more than 12 million children perished before the age of five, mainly from preventable causes. Helpers Of Africa International leadership and commitment is critical for all our current efforts. We shall support the charge to ensure that we meet our commitment to improve maternal health, reduce child mortality and take care of orphans. Too many women and children are still dying because they lack access to quality health care – especially in the least developed countries. Over 8 million children under age five died – that's nearly 18,000 every day. The maternal and child mortality rates in the least developed countries are about *30 times* those in high-income countries, with half the global burden. Children globally should have the same opportunity to be born safely, and to have her mother survive childbirth to care for her.The future should be brighter for every woman and every child. A global convergence on maternal, newborn, and child health is possible within a generation – that is, *if* governments and donors invest sufficiently and smartly. And these investments will not only save lives, they will drive economic growth and prosperity. We as Helpers Of Africa International shall invest wisely results-oriented service delivery. Shifting our focus from inputs to paying for results has been proven to be extremely effective in getting high quality, essential health services to women and children. Empowering frontline health workers -- with the autonomy and resources to develop strategies to improve service delivery -- has resulted in transformational changes in access and quality.

This results-oriented approach enables health systems to innovate, and become more efficient and accountable for delivering timely and quality services. Coupled with independent verification, it ensures accountability and transparency in the use of donor and government resources faithfully which we seek to do as Helpers Of Africa International. Research has shown countries that have invested have reduced by 74 to 90 percent. We seek has been able to support mothers and children through our partnership in results–based financing. We're shall be commiting huge amount of funds for Successful pilots have been carried out by organizations and governments are so our allocating will just boast the program that has been confirmed to work to sustain and scale up successful programs. I urge every development partner and donor in this room to join with us and know that your interventions will save many lives of potential God given children for future generations through us to help scale up investments in maternal and child health.

A second smart investment to improve maternal and child health is to build a well-functioning civil registration and vital statistics system. To stop mothers and young children from dying, we first need to know who is dying, from what causes, and where. Vital statistics systems are also a keystone of any country's development infrastructure for our global response so we shall work with governments to establish this research. Donors and Policymakers can't plan and allocate resources effectively unless they have accurate data on the health and welfare of their country and global citizens. We have many researches that will be the first base of take off then we shall invest further in this sensitive area.

Vital statistics promote accountability by providing a baseline for measuring progress, and for better targeting of health and other development programs -- like education and safety nets and vital statistics provide legal rights to families, for example, in conferring property. Research shows Only 34 developing countries have high quality, easily accessible data on something as important as the causes of death for their citizens and Two-thirds of all deaths globally are not counted at all. In some countries, particularly in Africa, as many as *80 percent* of deaths go unreported. Part of the problem lies in outdated, inaccurate definitions. Take the example of birth registration. The current definition of registration "at birth" is children registered *by age 5*. Only 10 percent of births are registered in the first year. This means that most still births and neonatal deaths go unregistered. This means that those lives are not counted. This is unacceptable – but it's a problem that the global community can solve. We have the technology no country should have to rely on passive, paper-based records systems.

We have the human resources. Health workers are present at vital events of birth and death, and we can empower them to record these events in real time. We have the know-how. If we can attend every delivery, then we can register every maternal and child outcome. We will support and advocate countries to register every single pregnancy and every single birth. In partnership with other organizations many others, we've developed a plan to improve and scale up existing registration systems. Every country should have a 21st century, active, digital, and truly "vital" system. These smart investments in results-oriented service delivery and vital statistics systems will help countries achieve the goal of universal health coverage. More than one billion people lack access to health care, and about 100 million people fall into poverty every year from paying out-of-pocket costs for health care. Universal health coverage is the progressive pathway that will save lives, increase economic growth, and help millions of people lift themselves out of poverty. Universal health coverage and saving women's and children's lives are mutually reinforcing goals. Universal health coverage is about ensuring that everyone – women, men, and children – can access a package of essential health services.

No one should fall into poverty or be kept in poverty to pay for the health care they need. Universal health coverage is about equity, and delivering on the social contract. A growing number of countries at all income levels are pursuing universal global health coverage. They are responding to their emerging health needs and disease burdens, closing gaps in access to quality care, and protecting their poorest and most vulnerable populations. As more countries move toward universal coverage, fewer mothers die in childbirth, and more babies are born healthy.

Our contribution will help lead to a significant reduction in maternal and child mortality. Our support will help health coverage. Now, 30 percent of insured poor women deliver their babies in a health facility with a skilled birth attendant, as compared to just 10 percent for uninsured households. We shall continue to invest in a myriad of health programs that are not very well-coordinated and have limited impact -- *or*, we can begin to consolidate and leverage our resources around the most equitable, effective, and efficient initiatives, backed by evidence jointly as Helpers Of Africa International.

Helpers Of Africa International Global Orphans and Vurnerable Children Response Strategic Plan & Beyond

You dear partners and donors of Helpers Of Africa International this room have done some extraordinary things. As a global health and development community, we have collectively mobilized once unthinkable resources over the last decade and saved hundreds of millions of lives. On the on set of Helpers Of Africa International we are committed to empower countries to deliver essential, quality health care to every woman, every child, every family, everyone, everywhere through partnerships and collaborations.

Many children have been made vulnerable by poverty and HIV/AIDS. Our strategic plan to support orphans seeks to provide a social protection system through regular cash transfers to families living with OVCs in order to encourage fostering and retention of such children within their families and communities and to promote their human capital development.

Our General Focus on orphans program across the globe include

- Education: increase school enrolment, attendance and retention for 6 to 17 year old children in basic school (up to standard 8).
- Health: reduce the rate of mortality and morbidity among 0 to 5 year old children, through immunizations, growth monitoring and vitamin A supplement provision.
- Civil registration: encourage caregivers to obtain identity cards within the first six months after enrolment, birth certificates for children and death certificates for deceased parents.
- Strengthening capacities within the household: Coordinate with other Ministries and partners training on areas such as nutrition and reproductive health. Provide guidance and refer cases related to HIV/AIDS, both among adults and children who are members of the household.
- To support countries to carry out feasibility of all operational registered and unregistered children homes and institutions caring for the Vulnerable children schools in nations and categorize them in classes for need assessment through county leaders , children departments, directories and convene meetings for bonding
- To safeguard the rights of orphans and vulnerable children against any form of violation
- To initiate and promote targeted programs that build the capacity of the community to effectively cater for the basic needs of the children
- To provide orphans and vulnerable children with access to the basic human needs including food, shelter, healthcare, clothing and education
- To create linkages focused on eliminating all forms of vulnerability in children thereby enhancing their safety and well being.

Our global OVC vision across countries is to advocate and facilitate children respect and value where all children are cherished and supported; where they enjoy a fulfilling childhood and realize their full potential and to provide a foundation for the physical, social, emotional and spiritual well being of orphans and disadvantaged children. We want to be the manifestation of God's caring grace and perfect love to OVCs in globally. We will endeavor to protect shelter, clothe, feed, educate, disciple and support them in an environment of family and community.

Food and Nutrition Program- In addition to providing shelter, the Helper of Africa caters for the daily nutritional needs of the OVCs under our care and in the neighborhood. Education program -Our programs seeks to offer full educational sponsorship program up to secondary our schools level. The sponsorship includes our schools uniforms, stationery and field study tours. There is also a leadership development component under this program that will ensure children's leadership capacities are developed while at a young age. The other children from the community benefit from this program.

Healthcare program- We take the health of the OVCs seriously because we know and believe that a healthy child is a successful child. The management organizes periodical free medical camps in various children homes where the children's health is well checked and relevant and appropriate medication administered. Those who fall ill are referred to the local dispensary near the our schoolss.

Bible Club program-The home is built on a Spiritual foundation, to help children grow in the fear of God, was initiated. We believe through the program the home will develop future God fearing generation out of crime and drugs

Mentorship program- We seeks to deploy and implement evidence-based, sustainable, high quality essential Programs that strengthen the capacity of OVCs to cope with their problems, mobilize resources to help them transition smoothly to the community upon attaining the age of 18.

Equipping the children who are finishing High Our schools for University and College life, those leaving college and universi ty life for self employment on entrepreneurship skills and how to attend interview and fit in the job markets. Providing facilitation for children in our schoolss including, Our schools Uniforms, Bags, Books, Shoes, for existing our schoolss and our schools fees for extremely needy children. Providing basic equipments such as computers to exis ting our schoolss and supporting the feeding programs.
Your Exellencies ladies and gentlemen,

Our General Focus on orphans program across the globe include
Helpers Of Africa International Orphans Children's program not only feeds, clothes and educates the children in their care, but also have the mission to encourage the orphans to strive to become the next generation of leaders. We seek to do this by instilling identity, faith, creating self-sufficient communities, teaching social justice, and emphasizing the importance of an excellent education and leadership training. Most of the children are orphans who come from poor family backgrounds. They have lost one or both parents from epidemics like HIV (Aids), hunger, ethnic violence, accidents or just common diseases like mala ria and typhoid. Due to their poor environment the children often end up in the streets and in search for food. Our strategic plan will also initiate rescue of children fro m such dangerous situations and provide them with care, food, education and accommodation. One of the ways we want to do that is by helping to start small Agri-enterprises to support our programs.We seek globally through countries and institutions to network, care and develop Children Homes & Special Schools to own / support and run hu ndreds of schools across the country, continent and the world. The persons in charge at the 3 levels will maintain a far sightedness in order to ensure that the funds are uti lized well and run our schools in an Excellent & professional way market the schools through Education Champions quarterly magazine, Education Champions exhibitions to market all our schools. Market schools for domestic through our organization network of churches, Saccos, work places, unions, sports clubs, constituencies, wards, counties, community groups and reach across all nursery & kinder gardens in the country etc in all our other departmental events through PR / Events / Communication and our media houses. This department will be hosting Good Samaritan Festival National and County events to bring together the Nation and people for Charity to minister to the needy. Under this department also we have programs to support children homes & Special Institutions on child protection, stigma reduction, pare nting, personalized counseling , adoptions , immunization, proper nutrition, home based care, birth registrations, clothing, forester care, child development child rights, life skills program, protection f rom early marriages, protection from female genital mutilation, prevention from sexually transmitted diseases, psycho-social support, sanitary ware to children, education for all orphans and Vulnerable, vocational training, prevention from infection including H.I.V, Supportive intervention, access to health facilities and me dicine, Sanitary towers , Support Community Based responses, coordination & structures, legal aid, related institutional support, discrimination stigma, good governance, transparency, ca re, mosquito nets, income generation activities, succession planning, reintegration of children back to community, bursary funds, HIV/ Fund, our schools enrollment, Our schools Uniforms & Stationery, Safe water access, water harvesting, Sanitation, Teachers Training, empowering Social welfare service providers, monitoring and evaluation and many more , vacation to provide Holidays, Career & Vocation, Education trips, equipping, mentorship, feeding, clothing, facilitation, Bursaries, Children rights along with supporting equipping and empowering our schoolss with furniture, computers, beds, TVs, Radios, Libraries, Dining halls, sound equipments, Books and our schools uniforms. This very valuable department expected to impact millions of Vulnerable children through our network to be champions in all areas of life in partnership and network with our schools. The department will host organizational departmental events in liason and EARLY requisition from directors including management training through HR, Compliance and other departments as authorized by CEO office or Director Division for regulation and monitoring. The department will work from onset with the property procurement team to begin to access and profile the hotel and participate in valuation, due diligence, handing o ver and taking over with HR, Communication and PR management staff transition through fresh staff evaluation and re-engagement or fresh recruitment.

This department will buy and build and run well built and furnished Primary, Secondary, Colleges, and Universities and empower orphans and Vulnerable children from there. We have envisioned buying and constructing our schools to both bring income from able learners and establish bursaries to sponsor needy children in a sustainable structure. We shall also use these facilities for our Special missions, Distribution or relief, feeding programs, sports, training, sports, talents centers, community programs, partners and stakeholders. These our schools will also bursaries to needy children, orphans and Vulnerable students at all levels. It will also run and support governments in informal education programs for adults, special education and research support throughout Africa.

We have been actively involved in empowerment in education through informal sector adult literacy classes, life skills mentorship and coaching, leadership training in all sectors etc. With your partnership many life champions will be raised in professional, talents and business sector Through Building of Universities & Colleges hundreds of designs ready and land available in various Towns and counties across the country extending to the continents. We shall also continue to do short refresher courses which we have experienced a very big impact of empowering thousands of community leaders and religious leaders who are impacting the community in various spheres of socio-economic fronts to be the gate keepers and agents of sustainable development for our organization. We have already been very instrumental in empowering children homes and Vulnerable children home. We historically gathered 1000 leaders of these institutions. TOT- For Our schools owners and administrators on Life mentorship Skills, Career, How to prepare the children to excel in Education and career, Talent Development Quarterly 7 regional summits to equip the mature children directly on Life mentorship Skills, Career, How to prepare the children to excel in Education and career, Talent Development Equipping the children who are finishing High Our schools for University and College life, those leaving college and university life for self-employment on entrepreneurship skills and how to attend interview and fit in the job markets. Providing facilitation for children in our schools including Our schools Uniforms, Bags, Books, Shoes, for existing our schools and our schools fees for extremely needy children. Providing basic equipment such as computers to existing our schools and supporting the feeding programs

Our Global Specific objectives across the globe include

- Advocate and Mobilize on the importance of appropriate family/household based care is available to the child.
- Advocate and Mobilize on the importance to ensure that the family and child have appropriate housing or shelter
- Advocate and Mobilize to ensure that the child has received all required immunizations as defined by Ministry of Health and indicated in the Ministry's immunization schedule.
- Advocate and Mobilize to ensure that the child and caregivers visit the facility to receive health services under the Ministry of Health package/strategy
- Advocate and Mobilize to ensure that the child receives proper nutrition, and that the household is food secure.
- Advocate and Mobilize to ensure that the child has obtained an official birth certificate
- Advocate and Mobilize to ensure that the child has appropriate clothing
- Advocate and Mobilize to ensure that a child aged 4-5 has access to early childhood development (ECD).
- Advocate and mobilize to ensure that the child and caregiver receive psychosocial support when appropriate.

- Advocate and Mobilize to ensure that the child's caregiver receives Advocate and Mobilize to information on care of OVC including information on health issues of children, nutrition, foster care, acquisition of birth certificate, child development , child rights, child protection, chil d HIV status and treatment where appropriate, among others.

- Advocate and Mobilize to Home visits by social workers
- Advocate and Mobilize to Community based day-care centers for children whose head of household has to go to our schools
- Advocate and Mobilize to provision of insecticide treated bed-nets
- Advocate and Mobilize to Sanitary towels for adolescent girls who are OVC
- Strengthen the capacity of families to protect and care for OVC through seminars and training.
- Mobilize and support community based responses
- Ensure access for OVC to essential services, including but not limited to education, health care, birth registration, psychos ocial support and legal protection
- Ensure that improved policy and legislation are put in place to protect the most vulnerable children
- Create a supportive environment for children and families affected by HIV/AIDS
- Strengthen and support national coordination and institutional structur es.
- Strengthen national capacity to monitor and evaluate Program effectiveness and quality.
- To increase family based care and retention of OVC within family/household set up.
- To increase care and support of OVC by communities
- To increase access by OVC to essential services including but not limited to education, health care, nutrition , birth registration, legal aid, and reprodu ctive health
- To ensure that appropriate policies and legislation for protection and care of OVC are in place and operational
- To create a supportive environment for children and families affected by HIV/AIDS
- To increase the capacity of government and other institutional structures to coordinate OVC interventions.

- To increase the capacity of the county and government to monitor and evaluate effectiveness of OVC structures and interventio ns. To empower families, extended families, county and the State organizations to remain the primary support structures for the care, protection and support of OVC.
- To package Programs for the care, support, protection and development of OVC to respect cultural belief systems and ethica l values – except where these are determined to cause harm to the child – and shall be guided by relevant national and international legal and policy instruments
- To monitor those children shall be discriminated against in regard to access and provision of care, support and protection in Our schoolss.
- To advocate that gender sensitivity and inclusiveness shall be emphasized and programming shall recognize and address the spe cial needs of boys and girls
- To advocate likewise that, programming shall respond appropriately to the needs of children who are marginalized or who have special needs.
- To motivate Home based care that Institutional care shall be a last resort, when all other social safety nets are not availab le, or are not the best option for the child's care, support and protection.
- To build capacity through seminars on management that transparency, accountability and good governance shall be required of all stakeholder s providing care, support and protection to OVC.
- To the best interests of the child shall guide all decision making and child parti cipation will be upheld at all levels.
- Mobilize the Increased number of households taking care of OVC enrolled in social safety net systems Social safety net for f amilies taking care of OVC in place
- Help children homes to establish and expanded cash transfer system to poor household taking care of OVC.
- Improve economic capacity of the household through increasing household income by: training on income generation activities, establishing/strengthening financial schemes, loans to families and other micro enterprise development systems for caregivers taking care of OVC.
- Research on Mechanisms for providing psychosocial support to OVC and their families in place.
- Develop standard guidelines on psychosocial support in Kenya. Mainstream psychosocial support in OVC Programs.
- Mentor on Succession planning mainstreamed into interventions programs for OVC .Develop mechanisms for protecting inheritance rights of OVC through training on memory books, will writing and training on legal provisions such as the role of pu blic trustees.
- Sensitize ill parents to identify guardians for their children. Develop training Programs for NGOs and other service delivery agencies on succession planning.
- Accessing treatment and support of sick parents and children by , Increase access of HIV + caregivers to VCT services, Ensuring that HIV+ caregivers are accessing ARV/T, Increase diagnosis and timely treatment of opportunistic infections, Provide home-based care for HIV+ caregivers, Promotion of preventive programs.
- Increased knowledge and skills of OVC care givers to care and protect OVC. Provide skills training programs for care givers/child headed househol ds on: parenting, financial management, nutrition and health, legal affairs, safe sex, gender concerns, etc. Establish systems to monitor child-headed households Training older OVC and young people on vocational training, Facilitate the formation and strengthening of support groups and networks of familie s with OVC Develop and disseminate IEC materials for OVC care and protection, Integrate reproductive health and HIV/AIDS risks and prevention education in OVC, programs.
- Empower the Increased capacity of communities to respond to the needs of OVC by Mobilizing and organizing for early identific ation of OVC and develop monitoring systems for service provision.
- Develop the capacity of communities to respond to OVC through training of community leaders, community local committees like Area Advisory Councils (AAC), FBOs, CBOs, Men groups, youth groups etc. to respond to the needs of OVC Support the establishment of OVC rescue centers and provide needed trainings and materials to community resource persons on OVC issues such as paralegals, teachers, counselors and nutritionists, among other s.
- Develop supplementary fortified food schemes and enhance food security initiatives at community level Identify and support good practice models that support OVC.
- To mobilize Increased number of OVC taken up by families within their communities through formal processes (guardianship, fos ter care and adoption) and kinship foster care.
- Develop and enforce regulations that promote domestic guardianship , foster care and adoption of children as opposed to insti tutionalization of these children
- Strengthen the capacity of social work systems, adoption organiza tions and societies to ensure adoption regulations are adequately followed.

- Increased co-ordination for OVC Programs at district level, constituency and county levels. Support the establishment of a community referral system. Strengthen linkages between community based initiatives and available government funds such as Community Development Fund (CDF), Local Authorities Trust Fund (LATF), Bursary Fund, HIV/AIDS funds, among others Establish and maintain a database of OVC services at community level
- Increased mobilization of local resources to take care of OVC Support community based income generating activities (IGA) and micro enterprise development initiative (MEDI) Programs where the funds generated will be used for OVC support. Initiate community banking and revolving funds Build the capacity of community committees(AAC, Our schools Management Committee) to mobilize resources for OVC support , i.e., fund raising strategies
- Ensure access for OVC to essential services, including education, healthcare, nutrition, birth registration and other necessi ties.
- This strategic area therefore calls for establishment of mechanisms at all levels th at ensure OVC have access to essential services
- Establish joint networks of other stakeholders dealing with OVCs. The Government and other development partners are already o ffering some of the essential services such as the Free Primary Education (FPE), free health services to children below five years, provision of ARV, provision of free TB and malaria treatments, among others. Despite these efforts, many OVC are unable to access these services due to their difficult circumstances.
- Mobilize for Increased our schools enrolment, attendance, retention and completion for OVC Support identification and address barriers that hinder O VC from accessing and completing FPE e.g. uniforms, shoes, our schools bags, food, books, etc.
- Support OVC to access Early Childhood Development (ECD) services Support non-formal/special education for OVC who cannot attend formal education Support our schools feeding Programs
- Initiate and expand peer to peer interventions to encourage out of our schools OVC to re- enroll, and attend primary our schools Advocate for greater allocation of Bursary Fund to needy OVC.
- Mobilize resources for Increased number of OVC accessing safe water and sanitation, Support the installation of safe water po ints at our schoolss and community levels, Support the capacity of communities on water harvesting, water storing, water purifying and improving sanitation facility at the fa mily level, Increase access to sanitation and hygiene services for orphaned and vulnerable girls in and out of our schools, includi ng provision of sanitary towels and sanitary ware (safe toilets/latrines).
- Mobilize resources for Increased number of OVC accessing reproductive health facilities and services, Strengthen capacity of reproductive health providers to deal with OVC, Support research on the situation of reproductive health for OVC to inform programs, Support awareness strategies for older OVC on re productive health and prevention of HIV infections, Support development and dissemination of IEC and messages for OVC and youth on reproductive health.
- Increased number of OVC accessing health and nutritional services, Support health services systems within the communities to ensure OVC access health services, Support sensitization of our schoolss/communities on primary health care, Support Programs within the community that promote nutritional status of OVC. Support HIV + children to access pediatric ARV and treatment for opportunistic disease, Advocate for medical fee waiver for O VC.
- Increased number of OVC that are legally protected within their families and communities, Support the establishment of community level child protection committees, Support the training of community level paralegals on legal issues impacting on OVC, Support the establishment of community based paralegals structure, Strengthen the capacity of law enforcing officers to protect OVC, Support provision of legal aid to OVC
- To advocate and mobilize for Increased number of OVC obtaining birth registration certificates, Support awareness strategies on importance of birth registration of OVC to attain birth certificates, Support families to attain birth certificates for OVC, Address barriers that hinder OVC fro m accessing their birth certificates
- Support Programs that ensure families caring for OVC have appropriate shelter and Identify and support families caring for OVC that have inappropriate shelter.
- Mobilize for Increased number of OVC receiving psychosocial support, Develop national guidelines on psychosocial support to OVC, Support set up of community based psychosocial interventions for OVC, Integrate psychosocial support interventions into OVC Programs, Train teachers on psychos ocial support for OVC in our schools set up
- Increased number of leaders engaged in campaigning for reduction of stigma and discrimi nation Support training and sensitizing leaders, including members of parliament on HIV/AIDS, OVC issues and impact of stigma and discrimination to the families and the country as a whole, Devel op and disseminate IEC materials to leaders, Disseminating the OVC policy, guidelines and other legislative provisions to leaders.

- Mobilize towards Increased public awareness on the situation of OVC and dangers of stigma and discrimination, Develop and implement a comprehensive stakeholder's communication strategy on HIV/AIDS, Develop and implement dissemination mechanisms and strategies for essenti al OVC information and data (e.g. Situation Analysis findings, the HIV/AIDS indicators survey), Support community open forum discussion son HIV/AIDS and protection of O VC and their families,
- Support the teaching of life skills for in and out of our schools children Support local actors i.e. teach ers, health care workers, social welfare service providers, Men groups, youth groups among others, to integrate into their work discussions of protection as it relates to HIV/AIDS Support partnership with the media to highlight issues of HIV/AIDS, stigma and discrimination.
- Mobilize to develop and Implement an integrated Monitoring and Evaluation Plan developed and implemented, Develop an integrat ed Monitoring and Evaluation Plan, Define indicators for use by all OVC stakeholders to monitor national prog ress on responding on OVC, Establish baseline data of agreed indicators, Strengthen institutional capacity of the Department of Children Services to monitor, OVC interventions, Develop and dissemin ate monitoring tools, Strengthen capacity of stakeholders implementing OVC interventions at all levels on monitoring progress of OVC.

- Advocate for OVC indicators incorporated and enshrined into national data/information systems, Lobby for mainstreaming of OV C agenda/indicators into periodic national data collection efforts such as national census, integrated household surveys and poverty, surveys among others, Lobby for generation and provision of OVC data by key social services ministries providing services to children, e.g., the our schools enrolment and re tention data by Ministry of Education, immunization data by Ministry of Health and civil registration data by the and Department of Civil Registrar, among others
- Advocate for OVC information sharing system/mechanism in place and functional to Review, str engthen and harmonize the existing information data base on children and OVC under the coordination of Department of Children Services. We seek to also to strengthen the capacity of sta keholders on information generation, analysis and utilization and Support the development of a dissemination mechanism on OVC responses along with Support operational research on OVC issues.
    - Respect for children's rights
    - Service and dedication to the well being of children
    - Integrity and honesty in the discharge of our mandate
    - Professionalism, efficiency and effectiveness
    - Non-discrimination
    - Equality and fairness
    - Transparency and accountability
    - Justice
    - Partnership, collaboration and networking
    - Eligibility
    - The household must be extremely poor
    - The household must have OVCs
    - Household must not be enrolled in other CT Programmes

- Mobization and search of OVCs from governments and countries settings & datas through ministries and children departments alo ng with further seek and vet through religious settings, saccos, work places, unions, sports clubs, constituencies, wards, counties, community groups , Primary Schools, Secondary schools, Colleges, Universities etc. The four pillars of this department are Networking, Empowerment, Ministry, Mentorship and welfare . Organize one annual national for Business Youth Festival and others in the counties as many as can be organized upto 47 to form county networks that will faci litate the National network. Some of this can be co-hosted with Children, Teens and Youth departments in partnership with PR / Communication / Event Management department and Media

- Specific mandate / activities / focus include
- Buy and Building Children (THOUSANDS OF DESIGNS DONE) & Youth Empowerment and Conference centers within our County Mega all inclusive Complexes establishment across all counties in the country in the malls etc

This can also work by engaging there tea chers to sort certain problems that are bringing discomfort to effectiveness. .Especially for students who are economically disadvantaged.
- Providing technology exposure through our community / county / IT hurbs we shall launch through our IT department across the country to take care of C hildren, Teens & Youth whose schools are not equipped with IT facilities and libraries brimming with real-world equipment for students to use.
- Developing manufacturing hurbs, lab facilities as research vessel and learn about ecology and water sources as hands-on learning experiences to allow Teens and Youth to engage with their social and biological communities as well as gain useful, career-based training with new technologies.
- Provide seminars to mentor Primary school graduate entering secondary life , Secondary graduates of University and College li fe transition and College to work place employability skills writing letters of job request, CVs, ethics of interviews, Work ethics to fit well into job markets with follow ups to ensure counseling in work cycles experience.
- Establish Career hurbs and curriculums to direct Teens and Youth to projects from studies in an area of self-directed interest, thesis-based research paper, a portfolio reflecting the scholar's growth over the course of their high school career, and a presentation in front of a panel of judges.
- Sponsoring and rewarding creativity that they are capable and that they a re invested in their own progress – entering "life after school" with vigor and maturity.
- Helping Teens and Youth gain an understanding and respect for diversity in our physical, social, and cultural environments.
- Mentorship on relationships and the importance of community and valuable culture, The power of respect for diversity in a world where this balance is currently threatened, could be one of the most important lessons we hope our teens learn.
- Through close instructors and mentors focus on nurturing the whole young adult, making for a truly "competitive" individual.
- Grounding Teens and Youth in child development principles
- Package mentorships and coaching programs that are evidence-based that Shows effects on child outcomes
- Comprehensive mentorship and coaching across learning domains
- Formulate Specific learning goals for various age groups within Children / Teen / Youth and senior groups
- Formulate curriculums well-designed with learning activities for seminars and outings, team building activities
- Formulating policies and manuals with responsive teaching
- Create forums for Supports for individualized instruction and coaching.
- Package Culturally and linguistically responsive seminars to boast leadership acumen and improve child in all areas.
- Package mentorship and coaching that has ongoing assessments
- Offer a wholistic mentorship that has professional development opportunities
- Package mentorship with involvement materials
- Assist Teens and Youth in achieving highest education level they can and skills essential for success in a technical college, career and work
- Incorporate a developmental program that helps Teens and Youth develop attitudes more wholesome, healthy and rewarding
- Deal with the Teens and Youth social disorientation and provide a course of readjustment rehabilitation from drugs , alcohol, smoking and substance abuse.
- After assessment of potential, purpose and weakness develop personalized instruction for Teens and Youth in camps for intensi fied coaching and mentorship.

- Package teachings and team building activity that encourage the development of character, including the skill of appropriate decision making, encompassing honesty, integrity and persistence in adversity.
- Mentor Teens and youth on how to combine school and work for those who must work because of personal and/or financial need and deployment in our companies so that they don't lose academic excellence for temporary work engagement.
- Mentorship in the development of marketable job skills
- Mentorship & coaching in the development of parenting skills for our teen parents
- Increase access to and coordination of quality mental health care, AODA, and medical services through our hospitals to Teens and Youth
- Develop wholistic competence in a number of areas, including: physical, social and emotional health, employability, intellectual curiosity and learning, confidence and character education, and parenting skills.

We shall buy , build , own and run hundreds of schools and rehabes across the countries, continents and the world. We have hundreds of ready designs of rehabilitation centers, talent and sports centers that we envision to buy and build. These centers shall be established & run as also for orphans, Vulnerable children, community / business leaders and all groups we are dealing with for recreation, training, team building and vacations. Through this facilities and programs we envision being able to identify and develop in talents in all sports, athletics, movie, art, Music, Crafts, Public Speaking, bikes and motor sports speaking and many more sectors. We have hundred of design concepts of these centers and identified lands in various places with successful team in many sectors to raise champions in all this areas impacting millions in our region of operations. This will include hosting and supporting talent exhibitions in our schools, colleges, university, among children homes and specials our schools along with reaching out to community youth, Men and men in various settings. Africa has a lot of talents in sports as you have seen especially Kenya in athletics. We have been having mentorship programs to motivate many in talents and sports. We have ready designs for athletics and sports stadiums, film production to get products for media houses, motor sports, games. Countries like Nigeria, South Africa, are now great models of how big this sector can become offering Jobs, Capital formation, sustainable infrastructure development and improving livelihood of the people especially youth preventing them from crime through positive and valuable occupation. Focus activities; Organizing sports, fun days, unity bonding forums for orphans, vulnerable children across 1000 children homes and special our schools in our network and acquisition and running of social centers of stadium and other sports and get-together facilities. It is also focused for talent development in athletics, soccer, volleyball, rugby, hockey, basketball, swimming, baseball, tennis, motor sports and many others including indoor games.

1) Organize Kingdom Sports Honor Awards and Tournaments KINGDOM CUP in football, Volleyball, Rugby, marathons, indoor games, basket ball, Golf all sports across professional groups, our schools, industries, communities, prisons etc using sports for peace, rehabilitation of drugs, prostitutes, crime, bringing communities together, politicians , children homes and special our schoolss in liason with PR and HR also our organization team building events.
2) Partner and sponsor sports events, clubs , marathons, tournaments from grass routes Primary/ Secondary/ Colleges / Institutes / University Championships including drama / Music festivals / Science Congress etc.

Our stadiums will serve children, orphans and Vulnerable students at all levels for various recreations and team building centers. It will also run and support governments in facilitating national events.

STRUCTURE OF OUR OUR SCHOOLS MANAGEMENT- SCHOOLS DEPARTMENT.

We shall build new schools we have thousands of designs in place and buy existing to upgrade them accordingly and convert oth er building that we shall buy to upgade to the standards expected. Our Education institutions will have a unique brand to be a social institution that will guide the society's transmission of knowledge - including basic facts, job skills, spiritual nourishment, moral standards and also valuable cultural norms and values to its members. In industrial societies education is largely a matter of Our schools setting up formal instruction under the direction of specially trained teachers. The extent of our schools in any society is closely be tied to its level of economic development. Industrial, high- income societies endorse the idea that everyone should go to schools that requirement is putting a great demand on education in the entire Africa and our vision is to meet this need efficiently and effectively. Our schools in low-income communities & nations will offer free or subsidized fees to ensure that all children be it orphans Vulnerable children across Africa will have access to education. All our schools through the bursary department will ensure a percentage of students ranging from 10% to 50% are caring for needy children who will be recruited through our network of children homes across the cou ntry and nations. Some of this school will be for 100% sponsored children who are helpless and forsaken in the society offering a comprehensive package of education, accommodation and homely environment to ensure they are well packaged that no child will lack what they need for this life to become society champions in all sectors since In low income countries and communities there is not much of it. About one half of all elementary age children ever get to school, and perhaps only one half of them reach the secondary grades. Structural-functional analysis looks at how formal education contributes to the operation of society. The important functions performed by our schools include:

Socialization

Technologically simple societies transmit their ways of life informally from parents to children. As societies develop complex technology, kin can no longer stay abreast of rapidly expanding information and skills. Thus our schools gradually will emerge as a distinctive social institution employing specially trained personnel to Convey the knowledge needed for adult roles.

In primary our schools children learn basic language and mathematical skills, social skills and orientation.
Secondary our schools build on this foundation, and for many, college allows further specialization. Will also major on
Our schools pass on society's core values from one generation to another. Our schools are used for the inculcation of work values in relation to job markets to prepare them for great to fit in, family, population, democracy, justice, and so on.

Our schoolss explicitly instruct students in constructive participation in political life not to be misused for political gains in violence but participate in a sober and appropriate way. From the earliest grades, rituals such as saluting the flag and singing the national anthem foster patriotism. Similarly classroom drills will develop competitive individualism, respect for authority, and a sense of fair play.

Cultural Innovation

Education creates as well as transmits culture. Our schools stimulate intellectual inquiry and critical thinking, sparking the development of new ideas. At college and university the teachers are busy in research to expand our knowledge in countless areas. Medical research conducted at major universities over the years has increased our life expectancy, just as research by sociologists and psychologist helps us to take advantage of our longevity.

Social Change

Our schools will generate new knowledge, they are also the means for bringing social change.
Education may lead to dispelling the traditional attitudes and values. Education is likely to widen the Perspectives of the youth make them `rational', willing to accept new ideas and carrying the message forward.

Social Integration

Our schools help forge a mass of people into a unified society. This integrative function is especially Important in nations with pronounced social diversity, where various cultures know little about or may even be hostile to one another. A basic way our schools integrate culturally diverse people is by teaching a common language that encourages broad communication and builds a national identity.

Social Placement

Our schools help in identifying and developing each student's aptitudes and abilities and then evaluating a student's performance in terms of achievement rather than social background.
Teachers encourage the "best and the brightest" to pursue the most challenging and advanced studies, while guiding students with more ordinary ability into educational programs suited to their talents. In this way our schools enhances meritocracy by making personal merit a foundation of future social position

Main Function of our schools

- **Conservation and promotion culture:**- Our schools conserve the valuable culture, tradition, values of the society and helps in promoting and developing these with the rolling of the time. It also spreads the store of culture to the next generation.
- **All-round development of the individual:**- For all-round development of the individual our schools has a package of program. Through its different activities, it draws out the hidden potentialities of the child and develops them in a proper way.
- **Development of higher values of life and life skills coaching:**- Our schools helps in developing and cultivating good and higher values like truth, sympathy, love, cooperation, etc. in child. Through different social interactions and moral teachings, it spreads the message of righteous living in a society.
- **Development of social responsibility:**- Our schools are a society in miniature. Because in our schools child shares feelings with various children coming from different strata. So they learn the lessons of social duty, responsibilities and understanding the feelings of others. So our schools help in social change and social control.
- **Citizenship training:**- Our schools creates the first civic society for the child. So child learns the duty and civic rights for the country as a responsible citizen. So our school trains the lessons of citizenship to a child.
- **Adjustability in society:**- Our schools prepares child to face the problems of the society. So proper adjustment and application of learned knowledge can be checked and guided by our schools. So the main function of the our schools is to develop adjustment capacity of an individual.
- **Vocational training:**- Through different activities, our our schools provides training in different vocations. It also cultivates the values of dignity of work and labor. It prepares children to face any challenge in the future to solve their bare necessities.
- Hurb of learning - The role of our schools cannot be confined with these lines. In modern days, the role of our schools has been increasing day by day. It is called the hub of learning. Every developed state gives first priority our schools for total national development. Really, our schools is now a prestigious institution in the society, which can be called a man-making factory.
- Instill Confidence in a child- access to classes, teachers, and administrators, interaction, sports, talent exposure etc will build self esteem and confidence.
- Platform for positive Socialization- Many valuable relations have been built in school relationship in classes, inter school networks across our network of schools as a strong family, friendships that contribute a child wholistic social growth. Our schools will cultivate this platform to provide wholistic growth to millions of children.
- Promoting Teamwork & Networking virtue - Cultivate important of team work and networking virtue which is key to any success of individual life. Friendships aren't the only important relationships that can be built through our schools. A schools environment offers students the opportunity to learn to work with others, which is a very important "real world" skill. Through games and projects, and even participation in after-our schools sports, children can learn the importance of forging relationships with each other. These activities can also help us learn to manage difficult personalities, find our way as leaders, and better understand the way we work as individuals.

- These lessons provide valuable experiences that as adults, we use everyday. Working with others is all about managing different personalities and finding ways to make your workday run more smoothly.
- Preparation- Our schools don't merely teach facts and figures and numbers and letters. But the experience of preparing for exam, science congress, a sport , interview, a talent show will improve child focus to prepare for certain things in life which is a great virtue in life.
- Getting information- Perhaps one of the most important reasons to attend our schools is the wealth of knowledge and information provided within the our schools setting. Our schools provide a safe haven for the spread of ideas, and often gives us access to subjects and ideas that we wouldn't regularly find in our homes or with our friends. Learning a new language, for example, is often best done within the confines of the language's native country. Most people do not have the means to spend the many years it would take living in a foreign country to learn another language. Our our schools ofter access to those who have had the opportunity to really study a second or third language, and those educators can give a first hand advice on pronunciation, culture, sentence structure.

- Inspiration- Our schools don't just help develop lifelong friendships, work strategies, and career goals, but also functions to inspire. Taking a course often reignite energy and passion in life. Our schools benefits everyone at every level to inspire them in all sectors, and it's important to remember that everyone can better himself through learning to be inspired to undertake life challanges.

- Sense of belonging to a Community- Our schools are packaged to function as the center of a person's community and can act as a meeting place, a place for children to grow, and a second home to appreciate the sense of safety and comfort, so many of the activities that gives my identity as a youth is cultivated at our schools. The schools will facilitate community facilities such us swimming pools, libraries, hospitals, sports fields, a centerpiece of community gathering for kids and parents bond.
- Schools not only important to us as individuals our schools will help society progress by educating its members who bring their newly acquired information to the workforce. Our schools boost confidence and teach us to establish and maintain friendships, and help us learn how to work together as a team, which is a primary tenet of any successful society. Without schools, knowledge would not spread as quickly, and our access to new ideas and people could easily be cut off. A world without our schools would create difficulties in language learning, and would stall the dispersion of economic growth, tolerance, and the appreciation of our fellow human beings. Our Schools will also be operation bases for stations of various education, health and social economic activities for community such as Health campaigns, HIV reduction and stigma reduction, Peace campaigns in war torn regions, Conflict resolutions., Good news campaigns/ festivals / conferences Seminars, Festivals on Peace & integration and caravans ,Mobile education video programs for communities, Mobile Libraries, Mobile Clinic, Rotational or stationed IT Computers training to Our schoolss, running and sponsoring Sports & Talent search & competitions, Community Tournaments, Promotion Sports & Talents in Our schools colleges / university, Sourcing for Potential businesses to fund, Exhibitions, Free medical checks & vaccination programs, Research for solutions on various community challenges on medical such us jigger infection in communities, Pest control, Peace & cohesion building Program, Gospel Outreach program, Mobile education video program, Books & Mobile Libraries program, Mobile IT program, Sports & Talent sponsorship / scholarship program , Free medical checks program ,

Vaccination programs, Research for community challenges Programs , Jigger infection prevention program , Pest control programs, Healthy Mothers, Healthy Children Project, Education through Innovation project, Children Nutrition Project, Immunizations Project (Polio) Education Support to Institutions Project -(Facilitation & Empowerment project- Targeting low performing our schools, classrooms, libraries etc), Mental Health Advocacy and Counseling project, Farming & Livestock Productivity Project, Rehabilitation from Substance abuse Project, Malaria Eradication project, Poverty Eradication & Economic Empowerment project, Natural Family Planning Advocacy & Reproductive health Project , Culture Preservation Project, Marginalized Communities Empowerment Project, Access to Information Project, Innovation Project,

Leadership Development Project., Community Volunteer Project, Patriotism Advocacy Project, Medical Research Project , Widows & Single Mothers Empowerment Project, Rebuilding & Repairing Homes Project, Disease Outbreaks Response Project, Heart , Cancer, Kidney Treatment Project, Adult literacy Project ,Fine Art Development Project , Election Centers of government, grounds for hire for weddings, sports, drama / music festivals, parking of our missions trucks / buses al ong with equipment storage for counties and regions and other community valuable programs. This will be in liason with General man agers and school administrations to advice on space and facilities availability at a time not to disrupt normal school programs others considering school holiday s when students are out of school when most of this programs can be run by General Managers and Principles of all our education institutions. A proper Annual calendar by special missions department, events and HR should be discussed to slot in such to avoid administration ambush by any of our departments in using facilitie s.

Bursary and general support fund

We to support as many children and students BEYOND OUR SCHOOLS who are economically challanged through schools from primary t o university levels including those in Children Homes & Special Schools across the country, continent and the world and ensure as many Orphans & Vulnerable children get education from play school to University in our schools or we pay for them where they are studying currently including international scholarships. The pers ons in charge will maintain a far sightedness in order to ensure that the funds are utilized well and educate as many OVC and those with special needs along with those from fin ancially disadvantaged families. Scholarship Our schools Bursaries Department, To support ensure no Orphans / Vulnerable and needy children are denied the opportunity for studies ensuring they receive all basics uniform, books and our schools fees from Pre- Our schools primary, Secondary, College University in our schools and others through this program. Our network of Children Homes/ Special our schools, community leaders, Churches provide bases for such evaluation and selection of needy children to benef it from this project and programs.

- Identify Children with needs across all Slums through our slum upgrade program and churches, Primary Schools/ Secondary schools head teachers association meetings and exhibition Children homes & Special schools in our meeting with heads and through Good Samaritan Festival, Speci al schools, MPs through CDF. Through Men, Women, Teens, Pastors welfare, Hospitals, Saccos, Women groups enlist all needy children, Christian Union Welfare, Media adverts through PR and Communication department register the school fees and other needs such us uniform/ shoes/ bags/ books pocket money etc .

- Attach children to Fathers and Mothers Mentors through Men & Women Departments who can also be visiting these children during visits in schools and walk with them through their school life to career and family settlement.
- Involve the children in joint activities Patriotic programs (tree plan ting, cleaning the city, attending to street children) and church missions
- Organize Tournaments during holidays Champion / Kingdom Breakthrough Cup for football, all sports end of year and end of year party.
- With our donors and international partners arr ange for scholarship programs abroad for exemporary talents and performances.

Our Global Strategic plan to restore global economy and job creation and SMEs empowerment through our Kingdom Global Job Creation & SME Agency

Helpers Of Africa International will heavily invest in children and Youth welfare both OVCs and those in ordinary settings including those in Disability in state in which a person has a visual, hearing, speech, physical, mental, emotional, or intellectual impairment that may be present singly or in combination; may be mild, moderate, or severe in nature.

We seek to empower youth Economically and build there career placement potential without subjection to Child labor. A broad concept that encompasses most productive activities undertaken by children, whether for the market or not, paid or unpaid, for a few hours or full time, on a casual or regular basis. It excludes chores undertaken in the child's own household or schooling. To be counted as economically active, a child must have worked for at least one hour on any day during a seven-day reference period Extended Family: A collection of a number of households or families of individuals who are related by blood and with social ties and responsibilities toward one another. Most communities especially in the rural areas depend on extended families for nutrition, care, and support. 6 Extreme Poverty: The state in which a person is living at a subsistence level that is below the minimum requirements for physical well-being, usually based on a quantitative proxy

In the light of this we shall make some of our grants and loans public so that we can get easy feedback and reactions from other donors on client nations, organizations and corporations that we are funding or working with in project partnership. The goal of our country programs and our cooperation with other donors is to have good development outcomes continent by continent country by country and region by region. There are many measures of success --some of you are familiar with our to track country performance in health and education and tries to improve outcomes. Measuring results is an important step in creating good results. We have developed strong feedback and reporting systems including internal and external audit system some online, digital and personal visits to monitor all our projects, programs and operations globaly with real time through our IT Department and Internal audits.

Helpers Of Africa International seeks to be at the heart of successful development is broad-based growth. It has been shown to be indispensable to poverty reduction and shared prosperity. A key measure of success in this area is to see people's incomes rise. Global Poverty defined as the number of people living on less than $1.90 a day and this is what we seek to handle from grass root education to affecting employment, business and promotion of entrepreneurship culture across the world. It's important that our work creates jobs and opportunities across different sectors of the economy and every segment of society. The urgency of this agenda cannot be overstated. The world's labor force is estimated to grow by 620 million people from 2020 to 2035, with most of the growth in the poorest countries. Employment is the best safety net, and we're working in many countries to address the obstacles to starting a business, as well as to address labor-market demand and supply constraints and enhance opportunities for women and youth.

With global growth slowing, it's paramount that countries carry out well-designed structural reforms to ignite domestic growth. No country in history has been able to sustain poverty reduction without economic growth. For the developing countries that have had the most success over the last decade at reducing poverty, growth in labor incomes accounted for more than half the reduction.

Helpers Of Africa International will work to achieve these gains requires electricity and clean water, as well as progress on the rule of law, health, nutrition and education, the full inclusion of girls and women, full attention to the environment, climate and private-sector conditions, and improvements in the government's spending, tax and infrastructure policies. We shall invest heavily on environmental conservation and development to address climate change.

The private sector plays a pivotal role in growth and jobs. Through our 7 departments that deal with development of private s ector we're working to create stronger private sectors that will create profitable opportunities for investors and many more job opportunities. This requires a clear analysi s and understanding of a country's laws and regulations and a path of reforms or catalytic investments that will expand the private sector.

We shall advocate through countries to overcome one of the toughest barriers is this: there needs to be a sound rule of law t hat provides a level playing field so that the private sector is allowed to compete fairly with state-owned enterprises and the government itself. For many countries, this means opening up their closed and protected markets, allowing prices to be determined by market forces, and liberalizing capital flows. The payoff is that countries that make this step attract more investment, both foreign and domestic, and can generate growth that benefits a broader part of the population.

Across the Globe especially with Covid 19 crisis, credit conditions for many SMEs deteriorated in the aftermath of the global crisis, exacerbating the effects of long-standing challenges, such as lack of collateral and fixed costs for banks in processing loan applications. The spread in the average i nterest rates charged to SMEs and to large firms has considerably widened compared to the pre-crisis period, even though the costs of financing have been decreasing steadily in recent years, pointing to a higher credit risk for SMEs. The gap in credit costs between SMEs and large enterprises has widened Average interest rate charged to SMEs a nd average spread between interest rates charged to SMEs and large enterprises, median values. Helpers Of Africa International will invest heavyily to float cashflows among SMEs through Regional Banks, Private Banks, Central Banks and Regional banks along with like minded organiizations will need to allocate huge amount in close monitoring of our management as repayable loans and grants for training and supporting policy

In this clobal crisis has recognised this financing needs and constraints vary widely across the busines s population and along the life-cycle of firms, High-level Principles on SME Financing call for strengthening SME access to credit, while also supporting the diversification of their financing sourc es. In fact, most SMEs, including new, innovative and fast-growing firms, remain heavily reliant on internal resources and traditional bank debt. The lack of appropriate forms of finan ce, especially of the equity-type, stands in contrast with large businesses, and is limiting entry, long-term investment, expansion and innovation. The availability of bank lending and of alternative sources of finance is held back by a combination of demand-side barriers, most notably limitations in financial knowledge, strategic vision, resources and sometimes even the willingness or awareness to successfully attract sources, as well as supply-side hurdles, such as the overall opacity of the SME finance market, a lack of exit options for investors in SME finance markets, persistent regulatory impediments, such as to the broadening of the investors' base to retail and institutional investors, and costs of regulatory compliance. Skills shortages, poor management practices and workforce training limit SME productivity and innovati on. SME participation in the knowledge-based economy is held back by skills shortages, poor internal management practices and low levels of workforce training. There is evidence tha t SMEs have higher skills deficiencies than large firms and SME training effort is on average significantly weaker per employee tha n in larger firms. SMEs often face challenges in attracting and retaining highly qualified personnel and staff with relevant skills, and have greater difficulties in identifying workers wit h sought-after skills in the labour market. SMEs appear to be relatively behind in establishing collaboration with education and training institutions, and in the use of company -level learning strategies, i.e. the use of managerial practices and methods that promote learning and autonomy. Lack of investments in this area also limits the uptake of digital technologies and their effective use to enhance productivity and access markets. In addition, lack of entrepreneurial skills may hold back adjustment to and g reater participation of SMEs and entrepreneurs in the "new world of work" brought about by increasing digitalisation and fragmentation of production processes.We shall invest heavily in this sectors as a way of jump starting the global economy from world back crash that has come from this crises.

This Helpers Of Africa International Strategic plan outlines the need to provide capital to Small and Medium Enterprises (SMEs) in developing countries. It shows the impact of this capital on economic development, and the role for International Finance Institutions (IFIs) and donors in the provision of this capital. This plan outlines recommendations for additional interventions and further research. SMEs in developing countries face a financing gap especially with Covid crises that undermines economic prosperity SMEs are a fundamental part of the economic fabric in developing countries, and they play a crucial role in furthering growth, innovation and prosperity. Unfortunately, they are strongly restricted in accessing the capital that they require to grow and expand, with nearly half of SMEs in developing countries rating access to finance as a major constraint. SMEs might not be able to access finance from local banks at all, or face strongly unfavourable lending conditions, even more so following the recent financial crisis. Banks in developing countries are in turn hampered by the lack of lender information and regulatory support to engage in SME lending. The overall result is absence of a well-functioning SME lending market, and SMEs are impeded in their growth, with negative consequences for innovation, economic growth and macro-economic resilience in developing countries. With targeted interventions, IFIs play an important role in closing this gap Targeted IFI support, such as guarantees or technical assistance, helps to build up the knowledge and expertise of intermediaries with respect to SME lending, thus helping to catalyse an independently sustainable SME lending market. In this way,

Helpers Of Africa International and very generous donors play an important role in catalysing the SME lending market in developing countries. As with any public intervention in private markets, the benefits need to outweigh the costs, potential adverse incentives and unintended consequences. However, IFIs are often better placed to support SMEs than local governments, whose support schemes often are less cost-efficient and more susceptible to political capture. IFIs achieve their cost-efficiency by working through local intermediaries, with the additional benefit of stimulating the creation of a local lending industry. Financial and social sustainability is further enhanced by judiciously selecting and screening intermediaries, applying strict lending standards and carefully calibrating controls and incentives. A clear research agenda has been identified to further enhance the effectiveness of interventions. Increased research and empirical evidence will help to further strengthen the case for SME support and the effectiveness of specific interventions. Additional research on the overall impact of capital provision to (different types of) SMEs on economic and social indicators would be helpful for the overall advocacy for SME interventions. Research on the optimal structure of interventions would help to further increase the financial and social sustainability of SME interventions. This strategic plan on SME development in developing countries through financial intermediaries. Access to finance is necessary to create an economic environment that enables firms to grow and prosper. SMEs in developing countries, however, face significant barriers to finance.

Dealing with another big obstacle to investment is the amount of a country's sovereign and the lack of transparency surrounding the debt. When used wisely, debt can be a good way to finance growth. Yet public debt in emerging markets and low-income countries has risen to levels not seen since the 1980s, and too much of that debt isn't transparent. When countries are transparent, they typically enjoy higher credit ratings, lower borrowing costs and better ability to attract foreign direct investment. Transparency also helps enhance public accountability and reduce risk of corruption. But we've found that less than half of the countries we've reviewed meet minimum requirements for debt recording, monitoring and reporting. Lenders need to be more transparent, eliminating confidentiality clauses in their lending to sovereign borrowers. It is also critical to have transparency, sustainability and effectiveness in public spending.

The Helpers Of Africa International conducts public expenditure reviews to understand gaps in service delivery relating to resource allocation decisions and process-related bottlenecks.These diagnostics will help countries develop more effective and transparent budget allocations, including in specific sectors such as health care, education or infrastructure. Our development policy financing, will disburse against impactful prior policy reforms, will increasingly play a role in encouraging more transparent and sustainable borrowing practices as well as more effective and efficient public spending, so that citizens can see their government's obligations and the use of proceeds.

Staying Focused on the Mission

In all these efforts, we shall work hard to cooperate with you donors, investors and international development partners. There's been a degree of progress in this regard, this cooperation involves too many development conferences and international working groups. Our main focus is on the practical in-country approaches and actions that we've discussed today. My goal is to put direct priority on alleviating poverty and boosting shared prosperity. Helpers Of Africa International has structures and systems to receive daily / weekly reports & reconciliations along with monthly internal audits backed up by quarterly & annual external audits across all departments, operations and projects to ensure sound accountability of the funds we have received from donors, well wishers and investors. does every three years, we're currently inviting the nineteenth replenishment of the International Development Association, it is based upon this that more funds will be released through same structures for various expenses through the bible principle of he who is faithful with little much will be added. The same principle will apply to loans and grants given to countries we shall develop a joint venture arrangement of funding and running the projects to ensure that all funds are well used for the designated purpose. Procurement rules as per international organizations stardard of 3 quotes for every payment based on non conspiracy open or selective tendering to get the best rules efficient, transparent, best practices, professional and ethical rules. We have clear outlined financial management systems that every transanction reflects on minimum of 7 departments and with close monitoring accountability

Helpers Of Africa International will seek to support Small and Medium Enterprises (SMEs) which play a major role in most economies, particularly in developing countries. SMEs account for the majority of businesses worldwide and are important contributors to job creation and global economic development. They represent about 90% of businesses and more than 50% of employment worldwide. Formal SMEs contribute up to 40% of national income (GDP) in emerging economies. These numbers are significantly higher when informal SMEs are included. According to estimates, 600 million jobs will be needed by 2030 to absorb the growing global workforce, which makes SME development a high priority for many governments around the world. In emerging markets, most formal jobs are generated by SMEs, which create 7 out of 10 jobs. However, access to finance is a key constraint to SME growth, it is the second most cited obstacle facing SMEs to grow their businesses in emerging markets and developing countries. Small and medium-sized enterprises (SMEs) play a key role in the economies of all the countries in the world by their contribution to the national economic growth and employment. Nowadays, in a complex, competitive and volatile business environment, the adoption of Sustainability principles is of utmost importance for a steady and sustainable growth of the small and medium-sized enterprises and to a large extent their survival depends on it. Yet, the relationship between the SMEs and Sustainability is mutually interdependent and the success of Sustainability agenda is very much conditioned by SMEs while the growth of SMEs cannot be achieved without the integration of Sustainability principles into their business strategies.

SMEs are the main drivers of the global economic growth SMEs contribute greatly to job creation and overall economic growth. Enhancing the Contributions of SMEs in a Global and Digitalised Economy. These facts clearly indicate that the role of SMEs in Sustainability is of tremendous importance for Sustainability agenda to be realized and prove that the relationship between SMEs and Sustainability is irrevocably tied. **SMEs are a strong involvement in Economic Sustainability** although SMEs comprise an enormous large part of the national and global economies, they are involvement in Sustainability is barely satisfactory since a very small numbers of them have adopted and integrated Sustainability principles in their business strategies and daily operations. So, there is a question why Sustainability is not entrenched in SMEs

- Lack of awareness among employees about the importance of Sustainability
- Lack of awareness of business owners of the benefits of Sustainability practices
- Not available access to affordable financial resources
- Inadequate and insufficient skills and management developed practises
- Lack of information how to implement Sustainability
- The interference of intended sustainability initiatives with other business initiatives

Helpers Of Africa International will support the Sustainability integration of SME in long term. There is no doubt that SMEs have the potential to become the foundation of the domestic and global Economic Sustainability agenda. In order to successfully integrate Sustainability principles and practices within the SME business culture, SMEs should understand the emerging opportunities and the relevance to them. In many cases, the message and narrative of the Sustainable Development Goals has not penetrated SMEs, and often SMEs are not aware of brave Sustainability decisions they already have been implementing. Research has pointed out that SMEs struggle to identify how they could use Sustainability as a force for growth and adapt to megatrends such as increased globalization, digitalization, the new industrial revolution, the changing nature of work and demographic changes. We shall host Kingdom SME conferences to engage governments and international bodies to design policies and strategies for effective deployment, measurement and monitoring of Sustainability integration in micro firms, young, innovative and high-growth SMEs. SMEs also depend on the vote of trust of citizens, private and third sector as they embark on a journey of discovery. For the Sustainability agenda to be attained in the next eleven years, communities, countries and regions need to bring SMEs at the centre of the business stage and assure their growth potential is realized. SMEs are less likely to be able to obtain bank loans than large firms; instead, they rely on internal funds, or cash from friends and family, to launch and initially run their enterprises. Research from many credible organizations estimates that 65 million firms, or 40% of formal micro, small and medium enterprises (MSMEs) in developing countries, have an unmet financing need of $ 7 trillion every year, which is equivalent to 1.4 times the current level of the global MSME lending.

Financial constraints are higher across the Globe in developing countries in general, but SMEs are particularly constrained by gaps in the financial system such as high administrative costs, high collateral requirements and lack of experience within financial intermediaries. Increased access to finance for SMEs can improve economic conditions in developing countries by fostering innovation, macro-economic resilience, and GDP growth. Numerous studies highlight access to finance as one of the driving factors of an enabling economic environment. Advisory and Policy Support for SME finance mainly includes diagnostics, implementation support, global advocacy and knowledge sharing of good practice. For example we provide;

- Financial sector assessments to determine areas of improvement in regulatory and policy aspects enabling increased responsible SME access to finance
- Implementation support of initiatives such as development of enabling environment, design and set up of credit guarantee schemes
- Improving credit infrastructure (credit reporting systems, secured transactions and collateral registries, and insolvency regimes) which can lead to greater SME access to finance.
- Introducing innovation in SME finance such as e-lending platforms, use of alternative data for credit decisioning, e-invoicing, e-factoring and supply chain financing.
- Policy work, analytical work, and other Advisory Services can also be provided in support of SME finance activities.
- Advocacy for SME finance at global level through participating and supporting Donors Global Partnership for Financial Inclusion, Financial Stability Board, International Credit Committee for Credit Reporting on SME Finance related issues.
- Knowledge management tools and flagship publications on good practice, successful models and policy frameworks
- Lending Operations:
- SME Lines of Credit provide dedicated bank financing – frequently for longer tenors than are generally available in the market – to support SMEs for investment, growth, export, and diversification.
- Partial Credit Guarantee Schemes (PCGs) – the design of PCGs is crucial to SMEs' success, and support can be provided to design and capitalize such facilities.
- Early Stage Innovation Finance provides equity and debt/quasi-debt to start up or high growth firms which may otherwise not be able to access bank financing.

Most organizations worldwide are small by size, but their importance to both developed and developing economies and societies is indisputable. According to the World Trade Organization, small-and medium-sized enterprises (SMEs) represent over 90 per cent of the business population, 60-70% of employment and 55% of GDP in developed economies. SMEs therefore do not just significantly contribute to the economy – they ARE the economy. SMEs are an important part of achieving the global economic activation especially with this Covid 19 recovery agenda through 'promoting inclusive and sustainable economic growth, employment and decent work for all and to 'build resilient infrastructure, promote sustainable industrialization and foster innovation'. This article examines how SMEs contribute to the global economy by exploring SME public policy, the importance of engaging professional expertise to SME success and establishing a robust evidence base.

Helpers Of Africa International will empower SME by encouraging Public Policy, The importance of "think small first" is essential in developing public policy and regulation by developing on policy-makers to take into account the needs and interests of SMEs from the earliest moment in policy formulation. This includes an SME Test, which involves consultation with SMEs and SME representative organizations, measurement of the impact on SMEs (cost-benefit analysis) and an assessment of alternative mechanisms and mitigating measures, Some of areas to engage and finance nations to do include

- Talent Attraction and Entrepreneurial Skills Development Access to Finance, Simplified and SME-Friendly Regulatory Framework, SMEs' Participating in the Digital Economy
- Creating an environment for SME growth and inclusiveness Enhancing SME access to the digital economy by investing in digital infrastructure and fostering innovation,
- Recognizing as a priority facilitating entrepreneurial and business skills development and increasing awareness of the importance of business transfers and succession planning.
- Renewing the commitment to implement key SME policies, motivating donors and countries Financing on Digital Financial Inclusion like Kenya Case study of Mpesa that is very effective both for banking, loans, withdraw and transanction.

SME Global economy and is complex and covers a wide range of areas. It is widely accepted that a public policy framework that fosters a culture of entrepreneurship and innovation is beneficial. A number of actions may be taken to support entrepreneurship, including establishing education programs (e.g. business schools helping students get started on campus with incubator facilities) and promoting entrepreneurs as role models. However, questions arise on where interventions should be targeted and how countries can help create the right support environment and develop an ecosystem where SMEs can thrive. While the overall problems faced by the SMEs are similar in different jurisdictions, there are significant differences in their priorities and needs in different countries. The reality is that small businesses are extremely heterogeneous in their size, age, sector, ownership, business models and aspirations and not easily addressed by any one-size-fits-all approach. The segmentation of the SME market is therefore vital for informed policy interventions, as well as establishing a robust evidence base. It is important for all stakeholders to work together to improve the knowledge-base for policy making and for sharing best practice information.

Helpers Of Africa International strategic is Key to SME Success including Engaging Professional Expertise. Research reveals that over 50% of new businesses fail during their first five years. Although SMEs can close shop for various reasons, and not all non-surviving SMEs represent "failures", the importance of professional advice and expertise to help guide the business through the myriad of business issues is vitally important. Poor financial management is one of the leading reasons why businesses fail. Research indicates that professional business advice provided to SMEs is associated with better performance as measured by improved rates of survival, growth, improved decision-making procedures and superior financial performance. The services of a professional accountant can be invaluable in operating a successful business and the importance of accurate and timely financial information is essential. In addition, research findings continue to show that, irrespective of jurisdiction, accountants, and especially small and medium-sized practitioners (SMPs), continue to be the preferred advisors to SMEs. SMPs have an in-depth knowledge and understanding of their SME clients and are therefore well-positioned to provide a range of services. These services include support on business development (strategy, marketing etc.), human resources and employment regulations as well as on management accounting and corporate advisory. Practitioners in some jurisdictions have specialized in becoming virtual CFOs, utilizing the cloud to service a number of businesses and provide appropriate, relevant advice, around the clock. Because of the level of trust between accountants and their clients, they are also in the ideal position to direct businesses to other reliable sources of advice.

Helpers Of Africa International will conduct joint confrences with Donors and countries to strengthen the SME policy framework by helping in to make easy on starting a business, dealing with construction permits; getting electricity; registering property; getting credit; protecting minority investors; paying taxes; trading across borders; enforcing contracts, resolving insolvency and labor market regulation. For example, around the world registering a business now takes an average of 23% of income per capita, compared to 27 days and 76% of income per capita in 2006 as per credible research. Same research found that bank cred it increased at a modest pace in many countries and declined in some others, whereas volumes were generally up for other sources, such as leasing, factoring, online alternative finance and venture capital investments. At the same time a growing share of SMEs relied on self-financing for their investment needs and cash flow requirements. It offers policymakers new benchmarking tools and insights on good practices to help frame national SME and entrepreneurship policies. The Global Entrepreneurship Monitor (GEM) which for 17 years has provided evidence in over 100 countries on the entrepreneurial behavior and attitudes of individuals, considering the national context and how that impacts entrepreneurship. For example, The latest 2018/2019 report in 47 economies assessing family business activity, nearly 20% are starting businesses that will be owned and/ or managed with family members. Helpers Of Africa International will support is producing timely materials for information on entrepreneurship training on business ideas and opportunities, talent development , business planning, business pilots , implementations and growth with a digital presence assess the current state and future outlook of their business, the main challenges they face and their involvement in international trade. To grow and prosper, national and global economies need innovative and internationalised small and medium-sized enterprises (SMEs). Over the last decade, businesses' ability to spread across borders has become a determining factor in their competitiveness. Their ability to develop and launch new products, services or innovative processes confers a competitive advantage, can help ensure a return on investment and a long-term strategic advantage. Research shows that when small business innovate, they experience increased productivity, potential growth and general sustainability. In some economic sectors, the proportion of innovative SMEs exceeds that of large companies. In Some counties 20% firms filing patents are small businesses.

When confronted with serious structural or technological changes, the evolution of markets is constrained by innovation. Global strategic direction, the enlargement of the external environment, and the acquisition of international customers are positive factors in the development of a self-sustainable innovation dynamic. We seek to support Internationalisation and innovation While previous research has explored the connection between innovation and international development. SMEs, has established that technological resources are key drivers. The innovation process is based on a company's ability to activate its existing and available internal knowledge. It also depends on the firm's capacity to gain knowledge from external sources through imitation strategies, licensing acquisition, partnerships or the purchase of patents. Export strategies increase the innovative capacity of small- and medium-size companies by increasing their access to resources such as skilled labour.

Global activities allow direct access to business partners and international experts in venture-capital markets. Moreover, SMEs operating within an industry or with technologically advanced suppliers have higher innovation potential. Research has shown that if business are constrained by geographic limitations, that also constrains their innovation capabilities. Internationalisation provides the opportunity to increase their resources by reaching new markets. This leverage frees internal financial resources. Access to external financing is also improved through export activities, providing convenient access to new networks of potential investors more willing to participate in innovation efforts. Proximity allows access to critical information in terms of current and potential customers 'expectations. Much research considers customers as the main lever of product innovation. Nevertheless, implementing mixed strategies can result in major difficulties. The size of SMEs limit innovation or internationalisation strategies, as they can they consume significant financial, technological, commercial and human resources. Considered fragile in terms of resources, small businesses maintain performance through high flexibility. The synergy expected as a consequence of the joint development of both innovation and internationalisation is limited by the low transferability of resources. Indeed, cultural and institutional distances can drastically reduce the transmission of skills and knowledge. The results of our research allowed for a better adaptation of public innovation and export policies, which are separated and individually managed.
Mainly based on financial support, but coordination is lacking and effectiveness limited. Indeed, a study reported that 39% of the firms that received financial support still failed. By focusing on support in codifying the existing innovations, public policy would sustain the internationalisation strategy, increase the value added and the industry production, and induce a job-creation effect. We shall seek to provide loans to small business through smaller banks and non-bank lenders, plus a "Business Growth Fund" that will enable big banks and super funds to take passive equity stakes in small business.

The assumption is that more money will help small and medium-sized enterprises fund their expansion plans. The companies that have 20 to 199 employees have a written plan of any kind but those in lower carder have no plans for growth and development. The percentage is much lower for small companies – those with five to 19 employees (and lower still for micro-businesses, employing four or fewer people). We shall work with federal government's, donors and like minded organizations to assist with loan package and training follow up structures to ensure lending, repayment and recycle of our financial pools is reprenished well. Access to more capital will accelerate company growth. Our experience suggests executives of small and medium companies need knowledge capital as well as financial capital to grow.if SMEs don't have a basic plan they don't know what to do when, who to hire, how to manage people, or how to plan and execute, simply providing more money does not accelerate growth. Therefore a global campaign to have every SMEs to be taught and develop and write a business plan is crutial. So we shall seek to finance business and entrepreneurship summits globally to facilitate this stage to secure current and future business prospects globally. This will also extend to school leavers to position them for business to ensure their position is self employment.

Helpers Of Africa International will support entrepreneurship training from Primary, secondary, colleges and Universities to adopt change their curriculum for business and life skill to prepare students to position themselves for the market place. In developing countries business is not keeping up with technology, graduates will be prepared for jobs of the future not jobs on offer. We shall maintain a Productivity to track business productivity and technology from institutions especially in developing countries where such capacity is lacking. There is a big global training gap in business practical skills, Many current business leaders graduated knowing one discipline well with some skills to use their knowledge. They typically worked for a business that gave on-the-job training. Over time, they took a further qualification to broaden their skills for management roles. In many countries Small and medium sized businesses (SMEs) have neither the time nor budget to train graduates. They face cost and price competition and want to hire experienced workers. At the other end, big businesses hire fewer fresh graduates. For example, where large numbers of accounting or law graduates used to build on their skills and gain experience through preparing accounts or contracts, most of this is now automated and employers want graduates to have that experience already.

Graduates from colleges and universities need experience collaborating in multi-disciplinary, cross-cultural teams to solve complex global problems, using significant amounts of information and data. Communication and technology skills are essential. Collaboration life and business practical skills, as well as specific discipline knowledge, are important for making graduates employable and effective. Graduates need a clear idea of their career purpose. They need mental and practical tools for fast-changing careers in the gig economy, where full-time, long-term employment is rare. They need tools and practice to create and run the small businesses that drive global economic growth. To achieve colleges and universities need to use their deep knowledge of research to reinvent both the curriculum and the way they deliver it. International labour market data and analysis of the hundreds of millions of jobs and skills advertised globally gives clear indications of trends in skills and job requirements. Add to this the knowledge gained from universities' collaboration with employers and research partners, and they have an unrivalled understanding of where technology in each discipline is moving. We need to increase authentic professional experiences embedded in the curriculum, and replicate and simulate workplace challenges. Health has always done this well by integrating problem-based learning in hospitals with patient cases into the curriculum. But every student will not get a work placement, and sometimes placements do little to prepare students for work. Employers need to invest time and training to make it worthwhile for both the student and the employer. Instead, universities have to simulate workplaces at the university together with industry partners. Universities can then work with SMEs on tailor-made projects that also help the SME. Helpers Of Africa International will seek to suppoty Universities to build advanced manufacturing facilities for students to train graduates for labour markets through industrial, manufacturing and private sectors organizations through countries can partner to develop such synergy. Colleges and universities often lead business in graduate preparation by embedding work experience into the curriculum. The key is to ensure continued collaboration between employers, colleges and universities and to pay attention to the changing needs of businesses. Employers can then take advantage of graduates who have the skills and capabilities to drive their productivity and future success.

Our strategic plan presents multivariate analysis of the relationship of SME growth with the acquisition of external business advice, whilst controlling for the influence of SME characteristics of age, manufacturing/services, high technology, innovator, level of skill of the workforce, exporter and number of competitors. The relationship of external business advice with SME performance is statistically significant for only a small number of sources and fields. Obtaining external advice in fields such as business strategy and staff recruitment is associated with positive firm performance. The main positive relationships of advice and performance are dominated by private sector sources such as lawyers, suppliers, customers and business friends/relatives. Collaborative arrangements with suppliers nationally/internationally have a strong positive relationship with employment and turnover growth; collaboration with local suppliers has a strong positive relationship with growth in profitability. There is little evidence of statistically significant relationships between government-backed providers of business advice such as Business Link and firm performance.
SMEs play a key role in national economies around the world, generating employment and value added and contributing to innovation. SMEs are central to the efforts to achieve environmental sustainability and more inclusive growth. However, these contributions vary widely across firms and across countries and sectors. Better access to global markets and knowledge networks can strengthen SMEs' contributions, but trade and investment barriers undermine SME participation, and poor physical and ICT infrastructure prevents SMEs from operating efficiently and accessing international markets at competitive costs. Digitalisation offers new opportunities for SMEs to participate in the global economy, but SMEs are lagging behind in the digital transition and disruptive effects need to be considered.The business environment is critical to enhance SME participation in and benefits from an open and integrated economy Certain features of the institutional and regulatory framework result in disproportionate burdens on SMEs. Inefficient insolvency regimes limit business dynamism, restructuring of viable firms and access to external finance by SMEs. High costs of tax compliance fall disproportionately on small and young firms. Public sector integrity and transparency, public administration efficiency, and the quality of public services are essential for a level playing field.The ability to access strategic resources is critical for SME competitiveness. For many start-ups and SMEs, access to finance in the appropriate forms is hampered by a range of demand- and supply-side obstacles. Skills shortages, poor management practices and workforce training limit SME productivity and innovation. Access to public procurement is generally more difficult for SMEs than for large firms. A cross-cutting perspective on SMEs is needed.

Helpers Of Africa International SME strategic plan provides a synthesis of the current state of knowledge about small and medium-sized enterprises (SMEs) and their contributions to economic and social well-being. It describes the diverse characteristics of SMEs and the opportunities and challenges they face in a globalised and digital economy. Our plan also identifies areas where knowledge or data gaps exist and where more analysis is needed. Our plan presents the case for launching the future development of our Strategy for SMEs, to help Members and Partners take a coherent approach to policies which impact and/or target SMEs, including across levels of government; enhance policy synergies; and address potential trade-offs. The future development and implementation of our Strategy would help governments level the playing field for SMEs and enable them to enhance their contributions to inclusive growth in different economic and social contexts. SMEs are essential for delivering more inclusive globalisation and growth Many developing and developing countries governments are facing the challenges of low growth, weak trade and investment, and rising, or persistently high inequality. They also face a growing dissatisfaction among citizens with the current state of affairs, which is also manifesting itself in the form of a backlash against globalisation and technological change. Against this backdrop, there is a need to create the conditions that enable the benefits of open markets and technological progress to be enhanced and shared more broadly across the economy and society. This are the solutions that our Strategic plan in Helpers Of Africa International offers.

Also SMEs are key players in the economy and the wider eco-system of firms. Enabling them to adapt and thrive in a more open environment and participate more actively in the digital transformation is essential for boosting economic growth and delivering a more inclusive globalisation. Across countries at all levels of development. Helpers Of Africa International strategi SMEs plan seeks to play an important role to play in achieving the Global Development Goals, by promoting inclusive and sustainable economic growth, providing employment and decent work for all, promoting sustainable industrialisation and fostering innovation, and reducing income inequalities.Our plan will boost SME potential for participating in and reaping the benefits of a globalised and digital economy depends to a great degree on conducive framework conditions and healthy competition. Due to constraints internal to the firm, SMEs are disproportionately affected by market failures and barriers and inefficiencies in the business environment and policy sphere. SMEs' contributions also depend on their access to strategic resources, such as skills, knowledge networks, and finance, and on public investments in areas such as education and training, innovation and infrastructure.

By the grace of God our plan will support a large number of SMEs, a conducive environment for the transfer of business ownership or management represents an important condition for ensuring business viability over time, with implications for jobs, investment and growth. These issues have gained prominence in our strategic plan, as SMEs in some countries continue to struggle with the prolonged impact of the 2007-08 global crisis, which hit new and small businesses disproportionately and marked a widening of the gap in productivity growth between SMEs and large firms . This gap is an important driver of the observed rise in inequality, including wage inequality, in many countries.

The SME policy space is complex. It comprises framework conditions; broad policies that impact SMEs; and specific targeted policies. These areas often cut across the boundaries of ministries and government agencies, as well as across levels of government. Since SMEs are often embedded in local eco-systems, which represent their primary source of knowledge, skills, finance, business opportunities and networks, it is also important to consider factors affecting framework conditions at the local level, and how policies developed at national level are tailored to local conditions, as well as how they coordinate with policies that are shaped at the regional or territorial level. Furthermore, our strategies take into account the changes in regulations, markets and technologies that occur across borders which may affect SMEs' opportunities and performance.

Our strategic plan examines the opportunities and challenges SMEs face in a global and digital economy, building on the large body of analysis conducted across many countries in the globe on SMEs, including on finance, innovation, taxation, regulation, digitalisation, employment, skills, trade, internationalisation and global value chains, environment, among others, as well as on its unique statistical expertise. Taken together, these findings present a strong case for developing a cross-cutting of our Strategy for SMEs, which advance the debate and catalyse improvements in framework conditions globally to deliver more sustainable and inclusive growth. SMEs make diverse contributions to economic and social well-being, which could be further enhanced SMEs play a key role in national economies around the world, generating employment and value added benefits to Helpers Of Africa International other roles.

In our Global Economic stratergy SMEs are the predominant form of enterprise, accounting for bigger global economic base. They provide the main source of employment, accounting for about 70% of jobs on average, and are major contributors to value creation, generating between 50% and 60% of value added on average. In emerging economies, SMEs contribute up to 45% of total employment and 33% of GDP. When taking the contribution of informal businesses into account, SMEs contribute to more than half of employment and GDP in most countries irrespective of income levels. In addition, SME development can contribute to economic diversification and resilience. This is especially relevant for resource-rich countries that are particularly vulnerable to commodity price fluctuations. SMEs are the main source of jobs in the business sector Percentage of all persons employed, total business economy in Global economy

The contribution of SMEs to innovation dynamics has increased in recent decades, as income growth, more niched market demand and changing technologies have enabled SMEs to strengthen their comparative advantages and reduced the structural disadvantages stemming from resource constraints and limited ability to reap economies of scale. While not all SMEs are innovative, new and small firms are often the driving force behind the sort of radical innovations that are important for economic growth, since they can work outside of dominant paradigms, exploit technological or commercial opportunities that have been neglected by more established companies or enable the commercialisation of knowledge that would otherwise remain uncommercialised in universities and research organisations .SMEs also contribute to value creation by adopting innovation generated elsewhere, and adapting it to different contexts through incremental changes, and by supplying new or niche products which respond to diverse customer needs. They also contribute by serving locations that do not have a large enough scale to attract larger firms.

Helpers Of Africa International Global Orphans and Vurnerable Children Response Strategic Plan & Beyond

Helpers Of Africa International strategic plan will support The knowledge-based economy, a rise in non-technological innovation and the emergence of open or network-based modes of innovation have also enabled new and small firms to increase their contributions to innovation through our Innovation and creativity department. Innovation by SMEs is largely influenced by knowledge spillovers, access to networks and opportunities to partner with other players, including larger enterprises. Globalisation has increased the importance of cross-border collaboration in innovation – both in obtaining inputs for innovation (ideas, finance, skills, technologies) from abroad and in exploiting its outputs (products and services, patents, licenses, etc.) in foreign markets. However, a key challenge for many SMEs is to identify and connect to appropriate knowledge partners and networks at the local, national and global levels, as well as to develop appropriate skills and management practices for co-ordinating and integrating knowledge created by external partners with in-house practices and innovation processes . SMEs are less connected than large firms to international knowledge networks Firms engaged in international collaboration for innovation, by firm size, as a percentage of product and/or process innovating firms in each size category. SMEs are central to the efforts to achieve environmental sustainability...

Our strategic plans outlines SME participation in the transition to more sustainable patterns of production and consumption is crucial for the greening of economic development. Although the individual environmental footprint of small businesses may be low, their aggregate impacts can, in some sectors, exceed that of large companies. Reducing the environmental impact of SMEs by achieving and going beyond environmental compliance with existing rules and regulations in both manufacturing and services, is a key factor for success in the green transformation. This is particularly urgent for SMEs in the manufacturing sector, which accounts for a large part of the world's consumption of resources, air and water pollution and generation of waste. The green transition also opens up business opportunities for SMEs as important suppliers of green goods and services. In many countries, innovative SMEs play a pivotal role in the ecoindustry and clean-tech markets. In some countries, SMEs represent respectively over 90% and 70% of clean technology businesses. SMEs are especially well positioned to seize opportunities of greener supply chains in local clean tech markets, which may be unattractive or impenetrable for large global firms, including in emerging economies and low-income countries. Small "green entrepreneurs", driven by financial profit combined with environmental consciousness, can drive a bottom-up transformation and job creation, by developing new business models and pioneering green business practices that influence mass markets and eventually are adopted by the wider business community.

However, the willingness and capability of SMEs to adopt sustainable practices and seize green business opportunities often face size-related resource constraints, skill deficits and knowledge limitations. Environmentally sustainable improvements in SMEs are often held back by perceived technical complexities, burdens and costs, as well as lack of awareness about financially attractive opportunities.Lack of appropriate skills and expertise often prevents SMEs from acting upon win-win opportunities, and resource constraints often lead to SMEs to be more risk-averse and less willing to invest in new technologies than larger firms and more inclusive growth this is why our strategic plan seeks to support SME toward reviving and sustaining world economies. SMEs create job opportunities across geographic areas and sectors, employing broad segments of the labour force, including low-skilled workers, and providing opportunities for skills development. They also help support their employees' access to health care and social services. SMEs that generate jobs and value added are therefore an important channel for inclusion and poverty reduction, especially but not exclusively in emerging and low-income economies. In this regard, upgrading productivity in a large population of small businesses, including in traditional segments and the informal economy, can help governments achieve both economic growth and social inclusion objectives, including escaping from low productivity traps and improving the quality of jobs for low-skilled workers. Small businesses can also represent an effective tool to address societal needs through the market and provide public goods and services. This is the case of social enterprises, which bring innovative solutions to the problems of poverty, social exclusion and unemployment, and fill gaps in general-interest service delivery. In many countries, the economic weight of the social and solidarity economy, in which social enterprises operate, has increased steadily in recent years, including in the aftermath of the global crisis due to Covid 19. In some countries our research and others from credible organizations show the social economy accounted for 10% to 41% of the GDP. In addition, entrepreneurial opportunities can represent an important channel for economic and social participation and upward mobility, by allowing disadvantaged or marginalized groups, including young people, women, seniors, migrants, ethnic minorities and the disabled, to create their own opportunities to participate in the economy.

In many countries, corporate social responsibility (CSR) is increasingly viewed as a way for businesses, including SMEs, to contribute to societal goals. By committing to sound labour and environmental practices and good community relations, small businesses can contribute to sustainable and inclusive development, particularly at the local level. CSR can also help improve the image customers, investors and other stakeholders have of the business, and enhance their capacity to attract and retain qualified and motivated employees. However, these contributions vary widely across firms. By supporting SMEs we shall be boasting social welfare performance globally lifting the stardards of community because the many smes are jointly contributing to social welfare in many units.

Our strategic plan will boast SMEs in all matters for innovation, productivity, job creation and inclusive growth. While large differences exist between SMEs and large firms, the SME population itself is typically composed of very diverse businesses, in terms of age, size, ownership, business models, and entrepreneurs' profile and aspirations. SMEs play an important role in the wider eco-system of firms. Start-ups and young firms, which are generally small or micro firms, are the primary source of net job creation in many countries.Also business dynamics are an important driver of productivity growth. However, the majority of new enterprises either fail in the first years of activity, or remain very small. High-growth firms of different ages and sectors also contribute disproportionately to job creation. For this reason our strategic plan has special focus of growing and empowering the SME sector globally.

Established medium-sized enterprises that innovate and scale up are the driving force behind growth in many Global economies, often ensuring the coordination, upgrading and participation in supply chains of smaller suppliers. In some countries medium-sized enterprises (50-249 employees) represent about 4% of the business population, but account for 23% of employment and 25% of value added. There are also many viable small enterprises in mid or low-tech sectors which are embedded in competitive local production systems, and which generate innovation, largely incremental, and contribute to employment, social inclusion and territorial cohesion. At the same time, many small enterprises do not go beyond small local markets. These firms, which produce limited innovation and do not have strong growth aspirations, often remain small throughout their life cycle. … and across countries and sectors. Helpers Of Africa International vision to grow global economies will boast the bigger part of populations welfare and economies as a strong stimulus. Also our priority to support this sector is that SMEs are a dynamic and evolving population. Their composition varies widely across countries and sectors, with implications for their ability to thrive in and contribute to an open and digitalised economy. In all countries, micro-enterprises (up to 9 employees) dominate the business landscape, accounting for 70% to 95% of all firms. Nevertheless, significant cross-country differences are observed in the contribution of micro-enterprises to employment and value added. For instance, in the services sector, their share in employment ranges to big percentages. SME performance also varies across sectors. In services, SMEs account for 60% or more of total employment and value added in nearly all countries. In contrast, in manufacturing, although relatively few in number, large firms provide a disproportionate contribution to employment and value added, in large part reflecting increasing returns to scale from more capital-intensive production, as well as entry barriers related to investment. In some countries, large manufacturing groups 10 capture a significant share of total employment and value added. However, there are some exceptions . These include smaller economies, as well as larger economies where SMEs have traditionally dominated manufacturing activity in the developing countries. A deeper understanding of the contributions and challenges of different types of SMEs (i.e. a typology of firms) is needed to guide structural and targeted policies. There are large differences in the SME contribution to employment and value added across countries, particularly in manufacturing Percentage of total employment and total value added in manufacturing, total. Better access to global markets and knowledge networks can strengthen SMEs' contributions. Our strategies to make stronger participation by SMEs in global markets can help to strengthen their contributions to economic development and social well-being, by creating opportunities to scale up, accelerating innovation, facilitating spill-overs of technology and managerial know-how, broadening and deepening the skill-set, and enhancing productivity. In addition, greater flexibility and capacity to customize and differentiate products can give SMEs a competitive advantage in global markets relative to larger firms, as they are able to respond rapidly to changing market conditions and increasingly shorter product life cycles. Some niche international markets are dominated by SMEs, and innovative small enterprises are often key partners of larger multinationals in developing new products or serving new markets. At the same time, closer global integration increases competition for SMEs in local markets, in some cases with disruptive effects, demanding enhanced market knowledge and increased competitiveness also for small businesses that do not operate internationally. However Overall, SMEs tend to be under-represented in international trade. Few SMEs export directly and for those that do, exports typically represent a lower share of trade turnover (relative to larger firms) and generally target neighbouring countries.

However, when considering SMEs' indirect contribution to exports, as suppliers to larger domestic firms or multinational companies that export, SMEs globally represent more than half of total exports in value added terms. Upstream and downstream linkages with larger companies are vital for SM Es in Helpers Of Africa International strategic plan. Benefits of these inter-firm linkages run in both directions, since the quality and responsiveness of specialised suppliers, largely SMEs or even mic ro firms, can be crucial for the competitiveness of entire supply chains, at both lo cal and global levels, and of larger groups that are directly engaged in fierce global competition. In this respect, close interdependence and coordination between large and small businesses can be an important source of value a nd competitiveness along supply chains. SMEs account for a larger share of value added in international trade when indirect linkages are taken into account Share of value added in exports by SMEs.

Participation in global markets and value chains is uneven across the SME population. T here are a few "born global" firms and highly innovative SMEs that are fully integrated into global markets ("small multinationals"), and a sizeable share of SMEs that export or are embedded in as suppl iers of exporters. At the same time, for many SMEs export-relationships can be short-lived, with new exporters ceasing to export after one or two years in many countries and, for longer-term exporters, frequent switching of products and destinations. Smaller and less experienced exporters are typically more v ulnerable to a sharp drop in external demand, such as in the aftermath of a global crisis.

Our recent evidence suggests that developing country SMEs might struggle to take advantage of new opportunities offered by th e evolving global landscape. Many SMEs might integrate nations at the low-value end, where links between manufacturers and their local suppliers can be limited and 12 difficult to develop, including when the manufacturers has a business interest in developing a local supplier base and actively pursues the objective. In fact, evidence suggests that developing country SME indirect exports might be lower than developed country indirect exports. In order to develop policies that can support SMEs in making the most of the new opportunities offered by nations, a better understanding is needed of the interaction of SMEs with larger firms and countries within different context s and along different value chains, of the role of clusters for SME participation and upgrading, as well as of how nations are evo lving, including as a consequence of the digital transition. … but trade and investment barriers undermine SME participation…

Our strategic Trade and investment openness, as well as trade facilitation, intellectual property protection, infrastructure and institutional quality, are key to SME engagement in global markets. SMEs are less able than large firms to face the costs of engaging in international trade due to their limited resources and management capacities. Institutionalising transparency and other good regulatory practices, including the option to reduce regulation, can control regulatory costs and burdens and promote SME competitiveness in global and emerging markets. While complying with diverse standards, technical regulations, an d conformity assessment procedures is costly for larger firms, it is potentially prohibitive for SMEs since many of the costs to engaging in international markets are fixed, and often sunk, regardless of a firm's size or revenue. Predictable and efficient customs procedu res and logistics services are especially important for SMEs, which may find the related administrative and financial burdens particularly onerous. Global trade can be a useful tool to seek SME input. In emerging economies, these are often the most important adverse factors signalled by SMEs seeking to seize global opportunities. The development of an efficient Information and Communication Technology (ICT) in frastructure, as well as enhanced interoperability and standards, are also increasingly important to access global markets, as they facilitate information exchange and communication as well as participation in e-commerce platforms. Digitalisation offers new opportunities for SMEs to participate in the global economy that is why Helpers Of Africa International will go extra mile to support the SMEs.

Digital technologies allow SMEs to improve market intelligence, reach scale without mass and access global markets and knowle dge networks at relatively low cost. The digital transition facilitates the emergence of "born global" small businesses and provides new opportunities for SMEs to enhance their competitiveness in local and glo bal markets, through product or service innovation and improved production processes. It also facilitates the emergence of "lean start-ups" that leverage the Internet to lower fixed costs and outsources many aspects of the business to stay agile and responsive to the market. Furthermore, Big Data and data analytics provide a wide range of opportunities for SMEs, enabling a better understanding of the processes within the firm, the needs of their clients and partners, and the overall business environment.

The use of digital technologies can also ease SMEs' access to skills and talent, through better job recruitment sites, outsourcing and online task hiring, as well as connection with knowledge partners. It can also facilitate enhanced access to a range of financing instruments. … but SMEs are lagging behind in the digital transition .While digitalisation offers new opportunities for SMEs to reach global markets, the reality is that a large number of SMEs have not been able to reap the benefits of the technological transition. Evidence shows that SMEs are lagging behind in adopting digital technologies. While, in most countries, the divide is narrow for simple connectivity and web presence, the gap broadens when considering participation in e-commerce and, especially, more sophisticated applications. Accross countries, enterprise resource planning (ERP) software applications to manage business information flows are popular among large firms (more than 75% adoption rate in 2014) but less used by SMEs (less than 20%). In many countries, a large adoption gap is also observed for cloud computing, i.e. the renting of computer power from an external provider, which can allow smaller firms to use Big Data, while overcoming some of the barriers associated with the high fixed costs of ICT investment. SMEs lag behind in the adoption of more sophisticated digital technologies Enterprises using cloud computing services by size, as a percentage of enterprises in each employment size class, this are the areas we seek to advance: The adoption lag of SMEs is mainly due to lack of investment in complementary knowledgebased assets, such as R&D, human resources, organisational changes and process innovation, and has implications for their capacity to turn technological change into innovation and productivity growth. For 14 instance, lack of investment in in-house innovation processes and organisational capabilities limits the capacity of SMEs to take full advantage of new technologies to enhance data analytics and increase their participation in knowledge networks.

In fact, the ICT revolution has made it easier for firms to innovate through collaborative networks with other businesses, in cluding multinationals, universities and research organisations. However, this requires innovation competencies, as well organisational and management capacities to coordinate with external knowledge partners and effectively incorporate knowledge from external sources into internal processes. … and disruptive effects need to be consider ed .Many SMEs, digitalisation has resulted in disruption of markets, including increased contestability of local markets, rapid obsolescence of knowledge, skills and busin ess models, and increased complexity in the business environment. In addition, "winner-takes-all" dynamics, whereby digital technologies allow for full and instant upscale of the winning product or idea, often at the global level, could have far-reaching implications for the distribution of dividends and participation of new firms and SMEs in markets. A deeper un derstanding of the implications of all these digital developments for SMEs is needed.The business environment is critical to enhance SME partici pation in and benefits from an open and integrated economy as we shall support in our strategic plan.

A sound business environment and a well-functioning entrepreneurial "eco-system" for business as supported in our strategic plan, including at the local level, matter for countries and regions to foster participation of SMEs in a globalised economy. This is even mor e important in the current context, as increased competitive pressures and the fast pace of technological change demand agility, innovative behaviour, including in public governance, and ease of acces s to strategic resources. While framework conditions affect overall business investment, innovation and growth, some dimensions impact new and established SMEs disproportionately. C ertain features of the institutional and regulatory framework result in disproportionate burdens on SMEs .Helpers Of Africa International will to invest and support to ease constraints to importing might be limiting the ability of SMEs to take advantage of benefits arising from more efficient sourcing. SMEs tend to source a lower share of their value added from abroad relative to larger firms and poor physical and ICT infrastructure prevents SMEs from operating efficiently and accessing international market s at competitive costs. In a world in which just-in-time delivery is the standard, and in which transit is rapid and storage is ex pensive, time is a crucial driver of competitiveness. The quality of physical infrastructure, such as roads, ports, and airports, as well as the efficiency of the procedures followed in the o peration of these facilities, are important for businesses to enter foreign markets and participate in global trades. Regulatory uncertainty, complexity and inconsistency affect SMEs disprop ortionately this we seek to stabilize in our strategic plan. SMEs are typically less efficient than large firms in screening the re gulatory environment and dealing with relevant norms. Since they might lack information or expertise in house, SMEs often incur in other indirect costs, paying for external advisors' expertise or investing in specific training of staff to comply with new obligations. Thus, the complexity of regulatory procedures and conditions for regulatory compliance are especially important f or SMEs.

Especially in this Covid 19 crisis ,we seek to support SME against Bankruptcy in injecting funds and regulation that excessively penalises or stigmatises failure reduces incentives for the efficient exit of less productive firms and the reallocation of resources to more productive uses. In some countries, in the case of unincorporated micro and small firms, the treatment of individual defaulters is very severe, leaving full personal liability for many years beyond liquidation of the business. Lengthy and complicated processes can significantly affect the capital and reputation of small 15 entrepreneurs, drastically decreasing the chance of starting a business again. In addition, legal uncertainties increase risk to lenders and constrain the supply of finance to SMEs. High costs of tax compliance fall disproportionately on small and young firms that Helpers Of Africa International will seek to engage for stability.

Given a substantial fixed cost component to tax regulatory requirements and compliance costs (record keeping, filing and payment processes etc.) at national, regional and municipal levels, small businesses are at a disadvantage with respect to large enterprises. For young firms, which also tend to be small, high compliance costs can exacerbate the resource and cash-flow constraints often experienced in the early stages of business development, and may act as a deterrent to formalisation. In some cases, tax compliance costs for small firms may even exceed their tax cash payments. Furthermore, certain aspects of business taxation, including asymmetric treatment of profits and losses, the distribution of taxation between capital and labour income and the design of tax credits and incentives, can unintentionally disadvantage some young and small firms that we seek to stabilize with gorvernments. Public sector integrity and transparency, public administration efficiency and the quality of public services are essential for a level playing field

Businesses interact in multiple ways with the public administration, whose integrity, transparency and efficiency affect business creation and growth. The costs associated with administrative burdens and red tape are relatively higher for SMEs than for large firms. Also, while lack of transparency and corruption in the public sector are detrimental to all businesses, they pose particular problems to SMEs, which often lack the capacity to cope with an opaque public sector, design and implement anti-corruption strategies and lobby for their needs in the absence of an established framework for participation in public decision making. The ability to access strategic resources is critical for SME competitiveness

Specific barriers and market failures may prevent SMEs from accessing strategic resources, including finance, management capacity and skills, and knowledge networks, placing them at a competitive disadvantage in the global and digitalised economy For many start-ups and SMEs, access to finance in the appropriate forms is hampered by a range of demand- and supply-side obstacles.

We shall protect to Failures in financial markets, due to asymmetric information and agency problems, typically limit access to credit by SMEs and start-ups, which are often under-collateralised, have limited credit history and, and may lack the expertise needed to produce sophisticated financial statements. This is an area where the case for policy intervention to correct these failures is well recognised. Credit constraints are especially severe in mid- and low-income countries, where funding gaps are often the main barrier to formalisation and SME development. In some countries, administrative burdens that businesses, especially small ones, cannot easily meet represent one explanatory factor for widespread informality. Our stratergy supports SMEs to participate in global markets and global markets, regulatory divergence across countries can impose an additional layer of difficulty. Inefficient insolvency regimes limit business dynamism, restructuring of viable firms and access to external finance by SMEs

A major effort is needed to better understand the combined effects of structural reforms on the SME business environment, as well as on the role and impact of policies targeted to SMEs, including to foster innovation, sustain business dynamism, support skills development, ease access to finance, and enable access to public markets. Such an effort should consider the potential synergies and trade-offs across diverse policy areas, including distortionary effects that may be introduced by some policy actions; recognise the heterogeneity of the SME population; and acknowledge the multidimensional contributions SMEs make to the economy and society. It should also recognise that countries have different priorities for different populations of firms, depending on the specific national contexts and circumstances.

We seek to promote professional management practices in SME, Poor management practices, as well as lack of an appropriate corporate governance structure, also pose challenges to business transfer and management transition processes in many SMEs, particularly family enterprises. In some cases, management limitations are compounded by financing constraints, regulatory hurdles, administrative and tax burdens, and small markets for business transfer. This represents a growing policy concern in many countries, particularly where the entrepreneur population is ageing rapidly, but limited evidence on business transfers in many regions represents an obstacle to policy action. Access to public procurement is generally more difficult for SMEs than for large firms

SMEs Represent one third of government expenditures, public procurement is a direct source of income for companies, including SMEs. While targeted policies are vastly adopted by many countries, tangible impacts on the development of SMEs remain to be evidenced. Barriers include lack of information on procurement opportunities, large volumes and broad capabilities requests, restricted access to certain contracts, disproportionately high technical and financial qualification levels demanded, short time limits to submit tenders, costs of submission, insurance and financial guarantees required, administrative burdens and finding bidding partners. Helpers Of Africa International will support capacity building a cross-cutting perspective on SMEs.

The drivers of the disparities in firm performance, including within the SME population, and the implications of the digital transition for SMEs and their participation in the global economy, are not yet fully understood. SMEs are typically more dependent than large companies on their business ecosystem and, due to their internal constraints, are more vulnerable to market failures, policy inefficiencies and inconsistencies. While the disproportionate effects of these failures on SMEs are well documented, perspectives differ on how they should be tackled and on the policy instruments which are effective in levelling the playing field or addressing specific barriers to SME development, while promoting healthy market dynamics. Furthermore, while many governments increasingly recognise the need for a crosscutting perspective when developing SMEs policies and have taken steps in this direction, the synergies, trade-offs and complementarities within and across policy areas, as well as the implications for different types of SMEs, are often not well considered, due also to limited evidence and insufficient understanding of the interdependency of policies.

Additional work is also needed to craft policies across different domains and levels of government in a coherent and mutually reinforcing way. A holistic approach is critical because the broad umbrella of “SME policy” includes areas that cut across the boundaries of different ministries and government agencies, and that require close consultation with other stakeholders, such as the business sector, trade unions, and financial institutions, among others. Attention also needs to be paid to how policies developed at national level can be tailored to local conditions, as well as to framework conditions and policies that are shaped at the regional or territorial level. This is all the more urgent to address the challenges of the increasing integration of global markets, the spread of global value chains and the rise of the digital economy. We seek to espand Strategy for SMEs can support policy across all countries globally systematically through individual countries and regional bordies.

Helpers Of Africa International Strategy for SMEs would bring value added by delivering a comprehensive framework, which would identify key levers for enhancing SME contributions to sustainable and inclusive growth, provide guidance to support policy making in Members and non-Members and yardsticks for measuring progress. Within this framework, it would also address targeted questions which have been identified as important for SMEs in a globalised and digitalised economy. In this way, an OECD Strategy would support countries in developing their own strategies tailored to specific national contexts and circumstances and different types of firms. It would also build on the knowledge gained from experiences with designing and implementing SME strategies at the national and supra-national levels. It would seek to deliver a stronger evidence base, including by addressing SME data gaps. Preparatory work would be undertaken in 2017, including a detailed scoping paper for discussion in the relevant institutions, with the aim of launching the development of the Strategy in early. We shall host many confrences to offer important opportunities to advance this work.

The Helpers Of Africa International in our structure and partner networking collaborators is uniquely placed to undertake this initiative because of the mega fin ancial base we enjoy now by the grace of God. For more than two decades, We has been at the forefront training of SMEs in kenya through seminars and we have seen the fru its and have also participated in other forums of entrepreneurship for international SME policy dialogue and efforts to provide an evidence base for more effective SME policies to countries. We shall support to leverage effectively its unique expertise in developing, collecting and understanding business statistics across the globe, and build on the strong foundation of policy analysis developed across Helpers Of Africa International departments, in areas such as SME finance, innovation, taxation, regulation, digitalisation, employment, skills, trade, internationalisation and global business environment, and others, and provide an e ffective impetus for reform. It can also make use of its extensive networks, including with stakeholders from the private sector and financial institutions, and its recent exp erience in developing cross-cutting policy strategies in other areas. This breadth of expertise and depth of analysis offer a unique opportunity to address the complexities of the SME policy space in differen t economic and social contexts. By supporting the development and implementation of effective policies for SMEs, Helpers Of Africa International will help to level the playing field and enable SMEs to increase their contribution to sustainable and inclusive growth.

The Helpers Of Africa International and other collaborators will seek to support the gorvernments in countries in a way to do business in this framework, the ability for business to get credit is an important criterion. Global Entrepreneurship research Entrepreneurship also highlights entrepre neurial finance, defined as the availability of financial resources for SMEs in the form of debt and equity, as one of the key factors for stimulating and supporting entrepreneurial activity. Access to fina nce helps all firms to grow and prosper. The Investment Climate Surveys of the Helpers Of Africa International show that access to finance improves firm performance. It not only facilitates market entry, growth of companies and risk reduction. Helpers Of Africa International promotes innovation and entrepreneurial activity. Firms with greater access to capital are more able to exploit growth and investment opportunities. Aggregate economic performance will be improved by increasing the access to capital. SME s face disproportionate barriers to finance, especially in developing countries. SMEs face a financing gap. Financing for SMEs is limited, particularly when compared to commercial debt for large firms and microfinance. When asked to name the most severe obstacles to growth, SMEs worldwide list ed financing constraints as the second most-severe obstacle, while large firms placed it only fourth. 20 Often, the costs and risks of serving SMEs are perceived to be too high by commercial finance. Microfinance loans, on the other hand, are too small to meet SME capital needs. Helpers Of Africa International is coming in this sector to invest in this valuable platform globally to sustain the economy in this Covid 19 crisis to join other donors, investors and financers. As the Mordecai told Ester in bibl e days you are here at a time like this for this purpose to save the world and for the future generations. Salvaging and sustaining SMEs is sustaining the future generations and raising a strong pillar of economic recoverly.

The financial need for SME funding request may be too large for the local microfinance institution, but too small, risky a nd remote for commercial banks. This financing gap is referred to as the “missing middle”. Financial constraints are greatest in low-income countries. The Helpers Of Africa International and other credible Surveys curried by other institution reveal that in low-income countries, on average 43% of businesses with 20 to 99 employees rate access to finance or cost of finance as a major c onstraint to current operations. In high-income countries, only 11% of businesses of the same size rate access to finance as a constraint. The total financing gap for formal SMEs outside the high-income countries is indicatively and preliminary estimated to be potentially as high as over 3 trillion USD billion especiall y because of the Covid Crisis. Increased access to finance will foster efficient growth in the SME sector sustain lives and livelihoods. Small firms are disproportionately handicapped b y a lack of finance, but they receive a stronger boost in growth than large firms if financing is provided. Financing obstacles aff ect small firms more than large firms. Small firms not only report higher financing obstacles, but they are also more adversely affected by these obstacles Identify and Satisfy Specific Niches. SMEs are in a unique position because they have the ability to **spot unique niches** about which bigger companies may not know or may not be interested in covering. Identifying a local or very specific niche al lows an SME to specialize in that area and provide customers with a product or service that not many other busi nesses can.

SMEs are able to satisfy a need in the marketplace that larger companies would not be able to cover due to their size and need for greater revenue channels. Larger companies often have multiple layers of management. Decisions that impact the strategic direction of the company take weeks or months to make because of the many people involved and the different facets that need to be overseen. In a smaller company, however, strategic changes in the direction of the company can be made more quickly because there are less layers of management and less operational oversight. As a result, SMEs are able to react to changes in the marketplace to **take advantage of emerging trends** more quickly making this a quick platform to ignite economic stimulations. For example, if an SME restaurant notices that a local competitor is offering a new product that is very popular with customers, they may see that as an opportunity to create a similar product with a new twist. Due to the simpler organizational structure of their enterprise, they can conceive the idea and offer the new menu item in days to take advantage of the consumer demand. Helpers Of Africa International seeks to adopt such flexibity to operate easily.

One of the major advantages of SMEs over big companies is that SMEs are able to build strong relationships with customers and employees. Small and medium enterprises are able to offer a more **personal touch** with customers. In many cases, the business owner knows many of the customers by name and is able to tend to their needs and make them feel like part of the family.Employees can feel a sense of camaraderie working in an SME because there are less staff members and smaller departments and more chances of getting to know co-workers and managers on a personal level. As a result, the employees may feel more invested in their work because they can see how their performance directly affects everyone in the company.

There are many more Advantages of SMEs to the Economy that Helpers Of Africa Internationals will seek to impact. Small and medium enterprises help to fuel local economies. With a considerably lower investment cost than large businesses, SMEs can help to lower poverty in communities by offering meaningful employment to locals in addition to enhancing the standard of living. Developing new local technologies, services and products also benefits the communities in which the SMEs are located. New SME businesses help to create infrastructure in local communities, which again creates more employment opportunities.

Regardless of whether your SME employs one person or 100, you benefit the economic landscape of your neighborhood. By enabling someone to make a living, you help him take care of his family and spend money within the community at other businesses, which further benefits the local economy. SMEs easily reach to Discounts, Deals and Savings Even with a small number of firms in the market, consumers may find lower prices or higher discounts thanks to oligopolies. Generally, a business will fear losing customers should it raise prices, since the competitors will not follow suit. When a business lowers its price or offers a discount, the others likely will cut prices to avoid losing their share of the market. While lower prices benefit consumers, the firms might have to sacrifice some of their profits to keep customers or undercut rivals. SMEs also offers less Risk of Collusion, Oligopolies tend to breed cartels, in which the firms agree to fix prices – normally by raising them – and lower product quantities to increase their profits. For example, the major fuel manufacturers might each raise gas prices during Christmas, Thanksgiving, Memorial Day weekend or other peak travel periods.

SMEs have easy interaction to people leading to more Information & Better Products One of the advantages of an oligopoly is that companies within them compete for customers through advertising. These campaigns save consumers time and money in searching for and learning about products and services. Advertising can spur innovation, technological advances and improved products and services. For example, a computer tablet maker may respond to a competitor's advertisement by designing and developing a tablet with more features or greater memory. With successful commercials come greater demand, more quantity to make and sell, and the ability to spread costs over more product. SMEs have Uphill Climb for Start-Ups, In terms of oligopoly disadvantages, the big one is that your enterprise will face difficulty taking flight if you forge into an oligopolistic industry. Advertising and branding by the large, established companies quashes exposure for newcomers. The economies of scale resulting from advertising-driven demand and market share place prospective entrants at a significant cost disadvantage. Other barriers to entry include patents and the inability to find suppliers of materials and components

Helpers Of Africa International will continue to support workforce and leadership globally Across the Developing countries, cities and small communities embrace workforce development because it is an essential component in creating, sustaining and retaining a viable workforce. Through workforce development, communities are able to create social and economic prosperity. According to Global Inclusion Strategies, workforce development can help companies and small businesses tap into new markets and grow nationally or globally. Through workforce development, companies are able to increase their cultural competence and potentially create an international presence. Workforce development doesn't just focus on the entire community but also focuses on individuals. Through workforce development, individuals receive training that increases their competency and makes them a greater asset in the workforce. Workforce development provides assistance to those who are unemployed. Workforce Development, individuals who are finding it difficult to reenter the workforce can benefit from the services many workforce development agencies provide, such as job matching. Leadership development is also essential to ensuring a strong workforce. Through workforce development, the capacity of local leaders is increased, and they are better equipped to create new opportunities and recruit more individuals into the workforce.

Advantages and disadvantages for SME's against big companies

They're here. They are **huge, gigantic**. They have sharp teeth and want to eat the whole cake. They are the BIG COMPANIES. What are you going to do against them, you who have an SME. If that is the case, and you have a small/medium-sized company or work in one of them, you are probably the most capacitated to tell us the many problems and some advantages that being an SME supposes on a day to day basis. And you will know that, although things are never easy, being a SME also allows you to hide some aces up your sleeve. If, on the other hand, you are planning to start your own adventure in the business world, perhaps it can help you to know some advantages and disadvantages of SMEs.

ADVANTAGES OF BEING A SME

- They're closer to their customers. It is one of the most obvious advantages. Medium and especially small businesses will deal more directly with their customers, which will enable them to meet their needs more accurately and to offer a more individualized service, and even establish some bond with their users. Once you know the business, the client's link with the SME will often be simpler than with a large company.

- They're more flexible.Because of their size and simpler structure, they will have a greater capacity to adapt to changes. In addition, it will help them to be closer to their customers, which will allow them to know the variations in the market before anyone else. For example, they will have greater capability to reduce their supply in times when there is no usual demand.

- They are able to better detect and take advantage of small market niches.
- As long as your eyes are wide open, an SME will have a greater capability to detect and satisfy **very specific needs** of its customers than a large company may or may not detect, or will not have an interest in covering, by being a bit too small for it.
- Our Global Strategic plan to restore global economy and job creation and SMEs empowerment through our Kingdom Global Job Creation & SME Agency
- They can make decisions faster
- In SMEs, decision-making will normally fall **on a person or a small group**. This will make them much more agile by making resolutions than large companies, where decisions often require complex decision-making mechanisms involving a lot of people and teams.
- It is easier to link the staff to the company
- Greater proximity to management and a more global vision of the business (in large companies each employee's work is less comprehensive and more specialized) will make it easier to **emotionally connect the worker with the company's objectives**. This will often increase your motivation, and therefore your productivity.

- Everyone knows each other
- Within a small or medium-sized company it is easier to form bonds and know the qualities of others. This can be used **to increase performance and improve teamwork**. In addition, in certain situations, such as problem solving, it will be much easier to share the tasks among the people who are more knowledgeable or better qualified to solve them.
- Communication will be easier
- By being closer, it will be easier for the different members of the company to communicate with each other. This will enable **new ideas to flow and problems to be solved as a team**.

DISADVANTAGES OF BEING A SME

- They have more difficulties to find funding
- Normally, SMEs do not have the financial power that large companies have. For this reason, they will usually need external financing, which will also be more limited and in worse conditions, without the ability to access financial instruments available to large corporations, such as listing on stock markets, capital increases, etc.
- It may be difficult to reach a large number of customers and earn their trust.
- **The task of reaching its customers can be very hard for an SME.** The financial power of large companies allows them to make themselves known through mass media by advertising, but for small and medium companies, reaching a significant number of customers can be a task that requires years of effort. In addition, being less well-known than its larger competitors, SMEs may find it more difficult to convey to their customers the security that a large company can offer them.
- The costs are higher
- SMEs will have enormous impediments to benefit from the **economy of scale**, which will cause costs to be higher in certain types of business, as well as creating difficulties to adjust the prices offered to users.
- It is not easy to endure prolonged periods of crisis
- Despite being more flexible in dealing with changes, the lack of financial capability can cause major problems for an SME if it is forced to endure long periods of crisis. For this reason, **during economic depressions, small and medium-sized enterprises often face enormous difficulties to survive**, which causes the closing of many of them.
- Low bargaining power with suppliers and customers.
- Being a large company, and therefore generating huge amounts of business, provides a position of power when negotiating with suppliers and customers . For an SME, **it is much more difficult to achieve beneficial conditions** and are often forced to give in more than they would like
- Access to less skilled personnel.
- Given the greater limitations that an SME usually offers to develop a career (there will be fewer possibilities of advancement), it will be more difficult to attract talented and well-prepared workers who will usually be more tempted to develop their skills in a large enterprise. However, this does not mean that an SME can not attract talent, but will often have to offer **other incentives**.
- They will have more difficulty in accessing technology
- Unfortunately, and again for financial reasons, an SME will have more difficulties to adapt to technological changes, which could lead to obsolescence. However, there are very interesting technological solutions that SMEs can access.

- And now that we have already seen some of the advantages and disadvantages of being an SME, here comes a question: Do you know ab out **Integria IMS**? Integria IMS is a software that has many tools that can help your company to not fall behind. Discover all that Integria IMS can offer you.The world of trade is changing. Traditional defenders of open markets now seem hesitant. Meanwhile, new major players in global markets are speaking up to defend open trade. Trade negotiations have been put on hold in some parts of the world. In others, integration efforts have intensified. In this shifting context, companies will not stop doing business; they will change the way they do business. One response to protectionist rhetoric is to shorten supply chains to reduce vulnerability to future trade restrictions. This means strengthening operations in places where the policy environment is most stable and trade costs are lowest. As a consequence, lead firms are likely to reinforce their regional operations as a key coping strategy.
- As an agency dedicated to the internationalization of small and medium-sized enterprises (SMEs), we shall launch Kingdom Trade Agency have therefore chosen to promote SME Competitiveness Outlook globally. This is done out of a preference for to global integration. Kingdom Trade Agency (KTA) remains firmly convinced that a strong, effective rules-based multilateral system is essential for trade-led development that is sustainable and inclusive. Yet, the region has always been the door to global trade for SMEs, and we expect this to be even more so in coming years. With this stratergy, we want to help SMEs and policymakers to better tap the potential offered by growing regional markets. The potential of SMEs to connect to regional or global markets greatly depends on the extent of value chain activity within their geographical proximity. As this report shows, most value chain activity takes place within regional value chains, with suppliers in the region serving lead firms in the regional hub. Some regions, countries, institutions and companies are more successful than others in generating regional value chain activity. Our strategic plans provides insights into why this is the case. Some regions generate more value chain activity. Regional integration turns out to be a major success factor. Stronger regional transport infrastructure and regional technical institutions relevant for standards and regulations help reduce trade costs, thus smoothing value chain activity.
- These regions also have formal trade agreements including policy areas relevant for value chain activity – most notably investment and services. This spurs value chain activity, which in turn is good for SMEs, and for inclusive development. Evidence of our strategic plans shows that if a country covers one additional policy area through trade agreements, its integration into value chains increases by 2.5%, decreasing the competitiveness gap (that is, the difference in performance) between large and small firms by 1.25%. Some countries are more successful than others in connecting their companies to regional value chains and making them work for development. These countries typically draw the attention of foreign investors or regional lead firms. Where countries demonstrate relevant supply capacity, the resulting business deals can place a sector, cluster, or region on a growth spiral of increased investment and trade. Our strategic plan shows how a combination of export potential assessments, value chain analysis and benchmarking through systematic SME competitiveness assessments can help policymakers prioritize actions and investment to help companies grow in value chain trade..
- Some business ecosystems are more conducive to connecting companies to regional and global markets than others. Regional networks of trade and investment support institutions can play an important role in transmitting regional policy changes to the ecosystem that immediately surrounds firms. Our strategic plan seeks to work with trade organizations like chambers of commerce, trade promotion organizations and standard-setting bodies have become organized in regional networks to strengthen their region’s position in global trade.

Kingdom Trade Agency strategic plan highlights five areas of collaboration: >information sharing (e.g. business databases, ex port and investment potential);

- Strategies on value chains, branding and more;
- Lobbying and advocacy to bring business views into policies;
- Trade promotion events; and capacity building and mentoring. Some companies operate more successfully within international val ue chains than others.
- Provides actionable guidance on how to get selected by regional or global buyers; operate successfully within international va lue chains; and upgrade or expand within these chains.

It is the combination of deep integration, smart national policies, a vi brant business ecosystem and strong company capacity that will help SMEs to flourish in regional – and ultimately global – markets. This is good for SMEs. It is also good for those working in SMEs, who represent the majority of any country's workfo rce and often the most vulnerable parts of society.

In order for SMEs to offer their workers decent wages and working conditions, they must be able to negotiate decent deals wit h their buyers. The more competitive SMEs are, the stronger their bargaining power will be within international value chains. The guidance in this report is of direct use to SMEs. It also provides trade bodies and policymakers with tools and guidance to assist SMEs in their efforts to strengthen their positions within value chains. Deep integration appears to be more conducive to SME competitiveness than shallow integration. Our strategic plan is to therefore invites policymakers to see the current 'glo balization crisis' as an opportunity for integration. Deeper integration, rather than less integration, is one answer to urgent public demands for social equity and environmental sustainability. As lead companies turn to regions, if governments and their partners deepen regional economic integration.

Regional integration, value chains and SMEs Deep integration is good for value chains. Our statergic plan provides new evidence that deep regional integration is link ed to greater value chain activity. What's more, preferential trade agreements with investment provisions have a stronger effect on value chain integration than stand-alone bilateral investment treaties. As the landscape of the world of trade changes, companies are changing their ways of doing bus iness. One response to increased protectionist pressures is to strengthen operations where the policy environment is most stable, and trade costs are lowest. For many lead firms, this may imply strengthening their regional operations. For small and medium-sized enterprises (SMEs), this can be good news. Greater regional value chain activity pr ovides new opportunities to enter international markets.

Greater regional value chain activity is also linked with a reduced competitiveness gap between small and large firms. Action points for policymakers in our strategic plan can help them make their region more attractive for value chain activity, especially by deepening integration. Our strategic plan also includes kingdo m Trade Agency working on 'SME guide to value chains' with insights into how SMEs can make the most of increased value chain activi ty in their region. Our strategic plan assesses how regional collaboration among trade and investment support institutions can foster SME integration into regional or global val ue chains through consolidation and CORTAGE INDUSTRIES OR ORGANIZED JUA KALI as we call it in kenya where SME group themselves in bigger units despite having individual identity to have a common face in marketing, tax payment and sharing.

The virtuous spiral: Deep integration and value chain activity Truly global firms are rare. M ost international firms turn out to be regional or multiregional. International value chains mostly function within a single region, or across two regions, to benefit from nearby suppliers. Limited geograp hic scope also helps firms get around the cost of moving people, which remains high. Africa appears to be the exception to the rule that value chains are clustered around regio nal activities.

African firms are more likely to join production networks outside of the continent. ITC data for East African firms in intern ational value chains confirms that they typically export intermediate inputs to firms in East Asia, Europe or North Amer ica. Moreover, the firms themselves generally engage in business functions of low complexity, suggesting that they only capture a small share of value added in the chains. This matters because the position of SMEs withi n a value chain determines the benefits they receive and their potential to scale up in quantity, diversification or quality. One reason why regional value chain activity is lower in Africa then elsewhere may be related to lack of regional integration. Regional integration lowers transaction costs and smoothes the functioning of regional value chains, presenting an opportunity for development.

Regional integration agreements generally build on existing multilateral agreements by deepening multilateral commitments fur ther. By exploiting existing databases on trade agreements, it becomes clear that deepening integration matters for value chain activity and for SMEs. When a country c overs an additional policy area in its relations with partners (by signing new agreements or deepening existing o nes), there is a 2.5% increase in the country's integration into value chain trade. This benefits both small and large firms. Small firms benefit even more, which leads to a 1.25% reduction in the competitiveness gap (that is, the dif ference in performance) between large and small firms. Making policies more coherent That deep integration spurs value chain activity is likely to stem from greater policy coherenc e, bringing more conducive cross-border trade and investment. Recent regional initiatives have pro gressed on services, investment and infrastructure. All three are relevant to value chain activity. Services are the glue that holds value chains together, in both developed and developing countries. Higher value is associated with segments o f the chain that trade services, not goods. Moving into higher value-added goods segments, like component production, also requires services capabilities in areas like engineering. Both develope d and developing countries aspiring to a lead role in value chains need to e mphasize services. Services are also critical to supply labour and production capacities. Even in manufacturing value chains, services represent a significant share of value added. Services enable competitive manufacturing and an efficie nt business environment. Services markets are dynamic and technology changes. Effective, efficient regulation is necessary to support productivity upgrades in services and boost opportunities for SMEs, thus helping all firms join and move up in regional value chains.
Countries aiming to increase exports through value chains do well to consider investment provisions. Interestingly, this report find s that it matters how countries deal with investment provisions. Separate bilateral investment treaties have traditionally been the preferred form of regulating cross-border investment. Thousands of bilateral treaties are currently active.

Our Strategic plan shows that these treaties indeed matter to integrate buyers, as the treaties are associated with higher im ports for exports. Including investment provisions into a preferential trade agreement, however, boosts integration for both buyers and sellers. In other words, the impact on domestic value added exports through value chains is greater when investment and trade happen under o ne legal umbrella. Infrastructure is another policy area that has been affiliated with increased regional integration efforts. Regional infrastructure approaches have played an important role within the European Union. The emergence of new types of intergovernmental integration frameworks in railway , ports and international links have led to a renewed interest in the role of ha rd infrastructure for regional integration.

Inclusiveness and sustainability through the lens of integration initiatives The new generation of regional trade agreements often includes provisions for inclusiveness objectives, such as gender equality or SMEs. For example, the share of preferential trade agreements entering into force that include gender references has more than tripled since the late 1990s. The same holds true for the share of preferential trade agreements including references to SMEs. Whil e such provisions are not often legally binding, they raise awareness to reduce the gender gap in the labour force or integrate SME s in international markets. Taxation is another policy area with inclusiveness objectives. Bilateral double taxation treaties have been on the rise in recent years. The recently concluded 'Multilateral Co nvention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting' modifies the application of those double taxation treaties. The convention is multi lateral in nature, yet– like the double tax treaties – has been concluded outside of trade agreements. While supply chain managers look at trade policies, investment policies and tax policies as one package, policymakers do not. Regulation, especially related to the environment, matters for sustainability.

Multilateral trade rules under the World Trade Organization contain relevant provisions for environmental sustainability, not ably under the Agreements for Global Technical Barriers to Trade. While these provisions have been deepened within preferential agreements, more remains to be done. The TBT Agreement encourages international collaboration among standard setting or certification bodies. Such collaboration is underway in a number of regions.

Taking advantage of value chain activity: A guide for SMEs More regional value chain activity can ease the internationalization of SMEs. Wh ile integration provides many opportunities, many raise concerns that SMEs may remain stuck in low value added activities in such c hains, particularly those in developing countries. Captive relationships are also a concern. Where SMEs have little room to negotiate their contracts with lead firms, space for offering decent worki ng conditions is also reduced.

Our Strategic plan SME guide to value chains advises SMEs on how to become more attractive partners for lead firms, as well as on how to strengthen th eir bargaining power within value chains. The guide contains concrete suggestions on how to: get selected by regional or global buyers; operate successfully within international value chains; upgrade or expand within value chains. To plug into a value chain, SMEs require both market know-how and access to adequate resources. Once they join, their priorities shift to managerial and operational capacities. Successful SMEs design their upgrades to higher-value tiers of the chain. They proactively seek market opportunities. Any firm-level effort in this direction is more likely to succeed if supported by national and regional systems. Like many things in life, attaining a progressive path within a value chain comes down to a catch-22 problem. Low profitability rates and a stagnant position in a chain are often associated with SMEs stuck in a hierarchal or captive governance structure. So-called modular or relational governance structures give more leverage and bargaining power to an SME, and are more conducive for upgrades or expansion within the value chain.

Yet, only competitive SMEs can successfully negotiate balanced contractual arrangements with lead firms. Supporting regional value chains and SMEs: The role of trade and investment support institutions Value chains that tie investment flows to goods and services in different regions have implic ations for trade and investment support institutions (TISIs). Trade promotion organizations and investment promotion agencies have been consolidating their operation s through mergers, particularly in high-income countries and sparsely populated countries. The trend is logical. Connecting to value chains requires both trade and investment promotion, often with the same partners abroad. Merging can make them more agile in a fast-moving environment. TISIs have considerable scope to support regional trade and investment policy initiatives. Regional networks of national trade and investment support institutions can influence regional policies and transmit regional polic y changes to the ecosystem that immediately surrounds firms. These five areas of collaboration among trade and investment support institutions can strengthen a region's position within global trade: Regional information exchange (e.g. business databases, export and investment potential analyses); Regional strategies (including joint value chain strategies and regional branding strategies); National policies coherent with regional strategies; Joint capacity building at the regional level; Joint trade and investment promotion. Other regional institutions – chambers of commerce, regional standard-setting institutions, coalitions of services industries and regional tourism associations – support SME internationalization by providing a discussion platform and representing business interests at the global, regional, national, sub-national and sector level. A network is only as strong as its participating organizations. Strong individual players are necessary. To function well, networks depend on collabora tion at all levels. Coherence among the different levels is necessary to avoid overlapping functions, which reduces the effectiveness of these services. Regional roads to success The extent to which regional value chains are present helps determine whether SMEs connect to regional and global markets. Policies, institutions and business a ctivity in neighbouring countries make a difference. They affect a region's capacity to attract lead firms, establish regional value chains or link suppliers to lead firms i n other regions. Research based on trade flow data has shown that some countries are more integrated in value chains than others. ITC's competitiveness framework makes it possible to explain why this is the case. The framework explains in a systematic way why some countries are better integrated in value chains than others, and why some reg ions have been more successful in developing regional value chains than others. Connect, compete, change Competitiveness is based on the capacity to connect, compete and change. The capacity to compete is static. It centres on firm operations and efficiency in cost, time, quality and quantity. The ca pacity to change centres on the ability of firms to change in Regional institutions are diverse. Systematic assessment of a region's potential for value chain activity is possible with ITC's SME c ompetitiveness framework. Collaboration among trade and investment support institutions can strengthen a region's global trade position.

Our response to, or in anticipation of, dynamic market forces, and to innovate through investments in human and financial capital. The capacity to connect links the static and dynamic part of competitiveness. It centres on collecting, processing and communicating information and knowledge, crucia l for the digital economy and for services. The strength of each of these three pillars is assessed at three levels of the economy: the firm, the business ecosystem and the national environment. Distance matters An additional factor related to the value chain context is the distance of countries and their competitors from headquarter economies (home countries of lead firms that manage value chains and provide technology and know-how).
The connectivity gap between large and medium-sized firms is smaller in the Americas than in Africa and Asia. Within regional contexts, some countries integrate more into international value chains than others. Multiple factors determine where durable matches between lead firms and suppliers occ ur. Smart entrepreneurs are typically behind the final decisions, supported or not by policymakers. While their mix of decision-making factors differs, these always involve: the strength and nature of individual firms in the deal; the ecosystem in which those firms operate; the national policy environment.. The narratives illustrate how quantitative export potential assessments, value chain analysis, competitor benchmarking and systematic SME competitiveness assessments can be used to enhance business-to-business matches, SME performance or national export strategies. We seek to engage in investment in projects that benefit the climate and promote gender inclusion. We're becoming more effici ent in how we use our resources. We shall be very aggressive on our goal of reducing extreme poverty. We'r e more focused than ever on Nelson Mandela's call to "set people free" from the "prison of poverty." I hope today's examples give you a glimpse of what we are doing on the ground, and I look forward to the hundreds of fresh ideas many of you will bring to this important work in the years to come. Helpers Of Africa International by the grace of God will support The innovation and creativity in areas of artificial intelligence , computerization industry / manufacturing , services (Drones) , space , under gr ound roads roadster etc because we are in season of this transistion .Every industry, from oil & gas to agriculture to chemicals & materials is undergoing a digital transformation. Whether it be keepin g up with a changing market or optimizing internal operations, tracking and implementing the right emerging technology for world and global operations is no small feat. We cant ignore this move and we shall support innovation foundation school kindergedden, primary and secondary / high school, career colleges and universities by supporting IT and technology laboratories, honoring and appreciating creativity in exhibitions, auditions, education congresses, technical and sme (Jua kali creativity) stalls etc. The latest humorous invention is having spectator robots

- **Reduction in Human Error:**The phrase "**human error**" was born because humans make mistakes from time to time. Computers, however, do not make these mistakes if they are programmed properly. With Artificial intelligence, the decisions are taken from the previously gathered information applying a certain set of algorithms. So errors are reduced and the chance of reaching accuracy with a greater degree of precision is a possibility.
- **Takes risks instead of Humans:** This is one of the biggest advantages of Artificial intelligence. We can overcome many risky limitations of humans by developing an AI Robot which in turn can do the risky things for us. Let it be going to mars, defuse a bomb, explore the deepest parts of oceans, mi ning for coal and oil, it can be used effectively in any kind of natural or man-made disasters. nuclear power plant explosion in took place. At that time there were no AI-powered robots that can help us to minimize the effect of radiation by controlling the fire in early stages, as any hum an went close to the core was dead in a matter of minutes. They eventually poured sand and boron from helicopters from a mere distance.
- **Available 24x7:** An Average human will work for 4–6 hours a day excluding the breaks. Humans are built in such a way to g et some time out for refreshing themselves and get ready for a new day of work and they even have weekly offed to stay intact with their work-life and personal life. But using AI we can make machines work 24x7 without any breaks and they don't even get bor ed, unlike humans. They don't need to sleep, rest, take breaks, or get entertained, as they don't get bored or tired. They don't need to sleep, rest, take breaks, or get entertained, as they don't get bored or tired.
- **Helping in Repetitive Jobs:** In our day-to-day work, we will be performing many repetitive works like sending a thanking mail, verifying certain documents for errors and many more things. Using artificial intelligence we can productively automate these mundane tasks and can even remo ve "**boring**" tasks for humans and free them up to be increasingly creative. **Example:** In banks, we often see many verifications of documents to get a loan which is a repetitive task for the owner of the bank. Using AI Cognitive Automation the owner can speed up the proc ess of verifying the documents by which both the customers and the owner will be benefited.

- **Digital Assistance:** Some of the highly advanced organizations use digital assistants to interact with users which saves the need for human resources. The digital assistants also used in many websites to provide things that users want. We can chat with them about what we are looking for. Some chatbots are designed in such a way that it's become hard to determine that we're chatting with a chatbot or a human being. **Example: Mpesa money transformation is the biggest success.** We all know that organizations have a customer support team that needs to clarify the doubts and queries of the customers. Using AI the organizations can set up a Voice bot or Chatbot which can help customers with all their queries. We can see many organizations already started using them on their websites and mobile applications.
- **Stimulation of Faster Decisions:** Using AI alongside other technologies we can make machines take decisions faster than a human and carry out actions quicker. While taking a decision human will analyze many factors both emotionally and practically but AI-powered machine works on what it is programmed and delivers the results in a faster way. **Example:** We all have played Chess games in Windows. It is nearly impossible to beat CPU in the hard mode because of the AI behind that game. It will take the best possible step in a very short time according to the algorithms used behind it.
- **Daily Applications:** Daily applications such as Apple's **Siri**, Window's **Cortana**, Google's **OK Google** are frequently used in our daily routine whether it is for searching a location, taking a selfie, making a phone call, replying to a mail and many more. **Example:** Around 20 years ago, when we are planning to go somewhere we used to ask a person who already went there for the directions. But now all we have to do is say "**OK Google** where is Visakhapatnam". It will show you Visakhapatnam's location on google map and the best path between you and Visakhapatnam.

New Inventions in all sectors machinery industrial and agriculture: AI is powering many inventions in almost every domain which will help humans solve the majority of complex problems.**Example:** Recently doctors can predict breast cancer in the woman at earlier stages using advanced AI-based technologies. Improved communication and audits. Zoom platforms, Facebook has sustained function in this pandemic that cannever be involved

Other advantages

- AI would have a low error rate compared to humans, if coded properly. They would have incredible precision, accuracy, and speed.
- They won't be affected by hostile environments, thus able to complete dangerous tasks, explore in space, and endure problems that would injure or kill us.
- This can even mean mining and digging fuels that would otherwise be hostile for humans.
- Replace humans in repetitive, tedious tasks and in many laborious places of work.
- Predict what a user will type, ask, search, and do. They can easily act as assitants and cna recommend or direct various actions.
- An example of this can be found in the smartphone.
- Can detect fraud in card-based systems, and possibly other systems in the future.
- Organized and manages records.
- Interact with humans for entertainment or a task as avatars or robots.
- An example of this is AI for playing many videogames.
- Robotic pets can interact with humans. Can help w/ depression and inactivity.
- Can fulfill sexual pleasure.
- They can think logically without emotions, making rational decisions with less or no mistakes.
- Can assess people.
- This can be for medical purposes, such as health risks and emotional state. Can simulate medical procedures and give info on side effects.
- Robotic radiosurgery, and other types of surgery in the future, can achieve precision that humans can't.

We shall mitigate negative effects such as .**High Costs of Creation by supporting sourcing of raw material through mining activation globally , incentives, loans & rewards for creativity, invest in the developing of innovation because viable ideas have got returns in the long term but high cost of establishment and maintainance.** Working towards of affordability in updating every day the hardware and software need to get updated with time to meet the latest requirements. Machines need repairing and maintenance which need plenty of costs. It' s creation requires huge costs as they are very complex machines.

Making Humans Lazy: AI can make humans lazy with its applications automating the majority of the work. Humans tend to get **addicted** to these inventions which can cause a problem to future generations. Developing strengths in other areas.

Unemployment: As AI is replacing the majority of the repetitive tasks and other works with robots,human interference is becoming less which will cause a major problem in the employment standards. Every organization is looking to replace the minimum qualified individuals with AI robots which can do similar work with more efficiency. We shall stimulate jobs in other areas as a balance

No Emotions: There is no doubt that machines are much better when it comes to working efficiently but they cannot replace the human connection that makes the team. Machines cannot develop a bond with humans which is an essential attribute when comes to Team Management. This pandemic season has shown the import of social life, By promoting sports you compensate this deficiency

Lacking Out of Box Thinking: Machines can perform only those tasks which they are designed or programmed to do, anything out of that they tend to crash or give irrelevant outputs which could be a major backdrop. Keeping brainstorming sessions strong and sceneries and forums in our education sector.
Every new invention or breakthrough will have both pros & cons, but we as humans need to take care of that and use the positive sides of the invention to create a better world. Artificial intelligence has massive potential advantages. The key for humans will ensure the "**rise of the robots**" doesn't get out of hand. Some people also say that Artificial intelligence can destroy human civilization if it goes into the wrong hands. But still, none of the AI applications made at that scale that can destroy or enslave humanity. Other Disadvantages:

- Can cost a lot of money and time to build, rebuild, and repair. Robotic repair can occur to reduce time and humans needing to fix it, but that'll cost more money and resources.
- It's questionable: is it ethically and morally correct to have androids, human-like robots, or recreate intelligence, a gift of nature that shouldn't be recreated? This is a discussion about AI that's popular in the days.
- Storage is expansive, but access and retrieval may not lead to connections in memory as well as humans could.
- They can learn and get better with tasks if coded to, but it's questionable as to if this can ever become as good as humans can do such.
- They cannot work outside of what they were programmed for.
- They could never, or, at least, seemingly never with our technological perceptions, recieve creativity that humans have.
- This can prevent sympathizing with emotions for human contact, such as in being nurses. This can also reduce wisdom can understanding.
- This can prevent common sense occuring. Even if coded with common sense and to learn, it seems hard for them to get as much common sense that humans could.
- Robots, with them replacing jobs, can lead to severe unemployment, unless if humans can fix the unemployment with jobs AI can't do or severly change the government to communism.
- As seen partially with smartphones and other technology already, humans can become too dependent on AI and lose their mental capacities.Machines can easily lead to destruction, if put in the wrong hands. That is, at least a fear of many humans.AI as robots can supercede humans, enslaving us.

I believe that we must work together to help accelerating access to broadband, these technologies will create new markets, new jobs, and new drivers of economic growth, even in the poorest countries. We shall promote use your technology to build new drivers of economic growth, and aspirations in many countries in the path of fragility, conflict, violence, extremism, and migration. There are tremendous sense of urgency – to rethink in a fundamental way how connectivity, big data, and new technologies can create new drivers of economic growth and opportunities for all. We will need to give people the chance to learn the new skills needed in a rapidly changing market. But beyond education, people will need access to capital, markets, and information. The world need you and me – more than ever – to step up global efforts in building that brighter future. The Helpers Of Africa International will partner with many mobile operators, co-financing investments or helping improve regulatory environments. and we shall see great successes in our partnership.

We shall support and investing in global IT infastructure world's international bandwidth capacity including private partnership in submarine fiber optic and global fiber optics networks connecting nationals. We shall invest to ensure the cost of broadband drop and with subsequent cables, capacity increase –to gigabits, now to several terabits. But we also know that broadband is just one of the foundations that countries need to build a digital economy. We shall advocate to build a strong global coalition of governments and industry leaders in promoting technology. And I'm here to encourage the mobile industry to join us.

Helpers Of Africa International Group, will support using mobile data with our clients to rebuild its transit system after national disasters, tracking the flow of refugees and migration, offer traffic, traffic congestion and pollution, To vaccinate children by monitoring the supply chain,To mitigate the impact of natural disasters, To respond to epidemics and To improve education. Our ambition for our partnership with Big Data for Social Good is to harness mobile data to improve every one of our health, environment, energy, transportation, and urban projects across the globe. Mobile technology has created over 15 million jobs and over 5 trillion Usd so it is an indicator and reflection of how investing in Artificial Intelligence and technology has both made lives and livehoods better globally. This is a sector that should be promoted and one among few sectors that has increased in usage, relevance and profitability during the Covid-19 season when many other sectors are experiencing declines. The use of mobile money and other cashless technology based transanctions has been a strong recommendation to avoid contact through hard currency and that still seems to be a pivotal area of concern in this season in mitigating the spread of this deadly virus. The smartphone brought an unprecedented level of new opportunities for the poor to access markets and finance, we believe more investment in technology can bring us closer to our goal of ending extreme poverty. We shall support Governments are to harness this disruptive technology and not be left behind in extending this services to the interior and accessibility and offordability. Helpers Of Africa International with your support by the grace of God will work with governments and the mobile industry to harness IT data and ensure developing countries realize its full benefits. We've have seen fruit and value IoT's potential to solve intractable problems. IT systems have been able to acess polutions from stoves that burn wood, animal dung, or coal, creating indoor air pollution that kills 4.3 million people per year – more than malaria and HIV/AIDS combined. Through this partnership on IoT data, we will work with you to use IoT and other disruptive technologies to create markets and solve critical development problems. We shall help you extend reach, we're willing to use all of our tools to de-risk investments, support governments as they reform their policies, and create a better enabling environment. Helping IT industry grow in developing countries is part of our mission, because we know that your technologies are essential to ending poverty.

The Global technology investment is a critical to shape not only the future of the industry – but also the future of the global economy. We shall expand our partnership with these two new initiatives that will put data to work and increase the adoption of promising new technologies in developing countries.This inniatives has been made urgent because of Covid 19 IT is becoming more useful and required more that any other time in global history. There are many changes towards the traditional path to economic growth and opportunities in agriculture, light manufacturing, heavy industry and above this backed with technology the world is becoming a better place through technology. IT has created platform for communication on health, Education, information, networking , mentorship, coaching , spiritual nourishment and entertainment are all in online plaftforms improving the socio economic status of lives and livelihoods. I believe that if we work together, we can tackle the biggest global challenges of our lifetime such as poverty, inequality, pandemics, famine, and climate change. Together, we can help countries unlock new drivers of economic growth, and make the global market system work for everyone and the planet. This is an urgent task, and we have no time to lose.

Helpers Of Africa International Global Orphans and Vurnerable Children Response Strategic Plan & Beyond

Helpers Of Africa International will work towards private sector growth, promote international trade mitigating risks, Poverty eradication and economic empowerment along with lowering the poverty rate and also increasing shared prosperity. That shared prosperity higher median incomes, better living standards, better social circumstances within countries. So, it's a goal that probably we all share: to have better prospects for people around the world and especially in developing countries. We are adding to this legacy under my leadership by the grace of God in promoting public health and addressing global challenges. The Foundation is focused on four core commitments: to end energy poverty, achieve health for all, nourish the world, and expand economic opportunity. We are pursuing these goals through innovative partnerships and through impact investments that find new ways to leverage private capital for social good.

Dr Luke Foundation & JBA Helpers Of Africa International will use is one of most respected and deep-rooted of philanthropies in Kenya so we shall use our network to swiftly response to the COVID-19 crisis. We shall serving as a crucial catalyst, convener and innovator, helping the private sector and government do more to ease the pain of the pandemic. With a staff of over 700 Directors & managers along with 1 million volunteers to be recruited across the globes and a cohesive structure networking over 72 departments towards a common goal we shall be up to the task. Through Our Vision of Charity, Empowerment and development investment philosophy we shall remain constant for most of the bank's future for decades and generations to come. The idea of wholistic approach to empower the world through our projects and financial stability through your generosity will give the world a strong foundation for generations to come. Helpers Of Africa International Bank investments in Enviroment & wildlife conservation, agriculture, Water & sanitation, education, health, all genders / ages groups & leaders empowerment, Indusrty, innovation, mining, transport, infrastructure, technology, humanitarian, charity and development will be for noble coarse that will shape the worlds future strongly. The prevailing development paradigm that public utility investments and other economic infrastructure are key to economic growth. Another reason related to the bank's future is the bank extension globally as an economic institution with branches in all continents, regions and countries We shall offer the bank's operations and development thinking set into a banker's mold." This financial "mold" will structure investments that will show measurable and direct monetary return. The financial contribution you have made will go far in empowerment of the world and affecting humanity through "soundness" of the bank's management. It therefore seemed prudent to the management . . . to consider as unsuitable in normal circumstances World Bank financing of projects for our 40 special projects and our 72 departments. Helpers Of Africa International has charted a different course of combining charity, humanitarian work along with the core duties of development projects and programs globally. Productive investment will support alieviate poverty. Our direct investment and Globally will "trickle down" economic approach reinforcing the idea that industrialization and urbanization were necessary for economic growth along with uplifting humanity. We shall build cities and support the development of urban regions dominating bank thinking both Sociologists and economists agreed that urbanization is an inevitable component of development, Helpers Of Africa International's financial interests to grow the fund and sustain is as we support in grants and donations will be crucial. We shall have profitable lending policies and profit making projects that are favorable social and human resources. We appeal to all of you generous and visionally donors and investors to all become good will ambassadors and fundraisers so that our strong vision, mission and projects globally will never lack resources for generations to come. Helpers Of Africa International for generations will influence almost all potential global financial market reactions especially with our wise investments, strong structures & systems along with your strong resource mobilization to generations by the grace of God. We shall build a strong reputation within financial markets and development circles globally with a trickle down effect to the people in the cities and villages especially through health and education along with humanitarian support especially in this crisis of Covid 19. Development, academic and financial influences swayed the bank to put aside welfare matters for the first 25 years of its existence.

Our structures and policies along with programs and projects are well packaged to function out of a long term professional ,academic thinking and research about development experience accommodating all out of box orthodox views of humanitarian and development projected to bring a lot of results focusing on economic growth and social welfare. The physical cash capital at hand will play great role in economic growth and recovery after big set back caused by Covid 19. Moreover, a "residual factor" existed in macroeconomic statistical models will be investment in charity,education, innovation, entrepreneurship, and, health as a future investment in humanity and welfare. The concepts of "human capital" and "human development"—investments in people will be crucial in mentorship, empowerment and education in socio-economic areas to all genders (men / women) and ages children / teens / youth / elderly men and women in all faces and aspects of life. Meeting the immediate humanitarian basic needs of shelter, food and clothing priority approach will impact development influence the way academics and policymakers especially in this crisis season.

Our projects and programs are consistent with victories and milestones we have attained in own personal history, prio r loyalties, and experience with over 25 years of experience with government and the private sector engagements along with diverse outreaches to millions of people over years through our own self sponsored seminars and summits. Moreover, internal bank structures and country mission reports reveal that hundreds of millions of people in developing countries were living in extreme poverty and lacking health clinics, primary and secondary schools, and safe drinking water. Such conditions of "underdevelopm ent" are key barriers to productivity, economic growth, and poverty reduction, and poverty is a direct result of insufficient investments in health and education. O ur bank's economics will embrace professional views to trickle-down economics on poverty eradication and economic empowerment. The bank's will also embrace social sector for projects and programs that lead towards socio-economic programs lending as a step to alleviating poverty. Food and Nutrition Planning Program will be established through s chools from primary, secondary, colleges and universities including schools of orphans and those living with disabilities of various states. Malnu trition is widespread and it limits the physical, and often the mental growth of hundreds of millions and it is a major barrier to human development. Helpers Of Africa International will strongly be advocating for support of health and nutrition programs to sustain lives and livelihoods for coming generations. We shall package special programs to d eal with certain certain diseases along Food and Agriculture through our departments.

Helpers Of Africa International will support lives protection from safe motherhood as global commitment to health issues. This initiative solidified the ban k's commitment to family planning and maternal and child health. The public and financial commitments resonating from this initiative and many others will be an important pillars of the bank's health sector work and kingdom Family Empowerment Project. Together, these projects will provide fu rther momentum for investments in family planning and child and maternal health. Helpers Of Africa International will focus and invest on health education in all aspects and faces its overall aim to make broader development community for investing in health. We have identified many needs in international health systems, inefficient funds, facilities and human resources, inequita ble access to basic heath care, and rising health care costs. As a result, the bank will advocate several key recommendations for i mproving health: educating girls and empowering women, reallocating government resources from tertiary facilities to primary care, investing in public health and essential c linical services, and promoting private and social insurance and competition in health services delivery.

The bank will support operational research and analysis, including the bank's Special Program of Research, Development and Training in Human Reprod uction, Tropical Diseases Research Program, and the Global Micronutrient Initiative a long with support of country-specific research and analysis issues, primarily to be facilitated through bank loans, credits and grants. We shall support research funding in developing countries to build on the bank's comparative advantage in economic and intersectoral analysis related to health issues. Other areas of bank involvement in global health knowledge include training and seminars o n Health topics for policymakers, TOTs and communities in developing countries directly or through our partners. We fo cus in the next 10 years the bank will seek to support production and distribution of health and education materials in all sectors and studies through various platforms based on staff appraisal reports, country strategy d ocuments, health financing and insurance.

The bank's role in generating and disseminating global education and health knowledge is important, its main advantage compar ed with other international institutions is its ability to mobilize financial resources through your generous support of you great people. We shall increase financial support for to Countries Health Programs through loans, credits, and grants. We seek to strengthening countries' basic health care infrastructure and services, specific disea ses (e.g. Covid 19), and certain popu lations (e.g., rural development & genders women / men). Through Our strategic department and bank's Operations Audit Evaluation Developmen t Department all of our over 200 projects will monitor and truck that our capital investment does not fail to achiev e the significant institutional and systematic changes necessary for project effectiveness. Our financial department will evaluate bank's financial portfolio is in projects and reserves to plan for more funding in for m of loans, credits or grants. We shall seek a broader policy empowerment and financing reforms for a strategic policy direction and for lending supported by rigorous analy sis and research.

The Helpers Of Africa International also is also tuned into the international dialogue on the need to improve the effectiveness of development assistance through cooperation among agencies. A key lesson learned over the past decades in our projects and institutions, acting alone cannot meet complex health, education and humanitarian challenges. Thus, the bank has been working to strengthen its collaboration with other international organizations and institutions in all diverse over 200 project networks. In the past projects that we consider pilots we have collaborated with other organizations and government departments through its sector-wide approach programs, which aim to bring multiple donors like you our partners and well wishers along with other stake holders to fund an entire all global sectors, develop comprehensive sector-wide policies, and pursue similar policy objectives. Sector-wide approach programs are an improvement on the previously fragmented approach of multiple projects funding projects that need coordination. However, the Helpers Of Africa International recognizes that it must do more to strengthen its partnerships with client countries, civil society, stakeholders, and other agencies through you donors and investment partners we can make our networks broader and more valuable. We shall enter in collaborative agreements with credible organizations that will provide technical assistance for improving the design, supervision, and evaluation of bank-supported projects in all sectors and phases both private and religious organizations. The Bank collaborations will be to advance international understanding of all our project issues through our organization Framework, through which the bank will work to establish the evidence base on effective methods of effectively attain fullness of our projects productivity and fruitfulness.

The Helpers Of Africa International has worked on friendly, easier and yet sound policies and protocals to ensure projects funds approvals and release for projects that need emergency are not humbered by complex buearacies that and its policies are among the most hotly debated and highly criticized in the global development community. With regard to health sector policies, key concerns involve user structural adjustment and privatization policies that vary from Nation to Nation. We shall motivate the demand for both necessary and unnecessary health care and that they disproportionately affect poor and sick people with ease and simplicity. The Bank will put emphasis on economic management, macroeconomic stability, privatization, trade liberalization, and public sector contraction. This involves opening markets (trade liberalization), reducing government expenditures (in some cases for health), and privatizing state-owned enterprises Still, much concern remains both within and outside the bank on the efficacy and negative effect of such programs, and the bank has moved away from endorsing them. The bank will measure the global disease burden and to associate this burden with health and other social policies. A sound theoretical framework to care of the able-bodied & the disabled, the middle-aged & the young / old, and the currently ill & those who will be ill tomorrow. The bank will improved analysis of international health systems & global health. Strong governments are necessary to address market failures that occur in financing, consuming, and providing both personal and public health & financial services. Helpers Of Africa International will Insure loans given for business and health to caution aganist market failures, credit shortages, information asymmetries, and insufficiencies to avoid exposure of lose of the funds extended. The bank now admits that open markets and economic management are insufficient and that good governance and strong institutions are critical for eradicating poverty, in the health sector, more specifically, critics argue the bank will present a clearer position on the trade-offs between public and private financing and delivery of health services and other projects. **Helpers Of Africa International will support reconstruction and development after in war and clashes territory, poverty alleviation, physical infrastructure & social sector lending. In health we shall still keep it strong in the fight against HIV/AIDS.**

The Helpers Of Africa International's will invest in global health through a better understanding of development, which the bank now sees as a holistic, integrated, and multidimensional task that should balance the strengths of the market and other institutions and focus on people in client co untries. This approach reflects, in part, a new paradigm of academic thought that development is the process of expanding the real freedoms people enjoy. Lessons learned from my years of this vision development experience and theory suggest that economic growth, investments in infrastructure and physical capital, macroeconomic stability, liberalization, and privatization still matter, but that development is multifaceted and our understanding of it must be broad and inclusive. A number of key element s, including economic growth and stability, a thriving private sector, investment in people and physical assets, a sustainable environment, and sound institutions and policies are necessary to promote prosperity, reduce poverty, and improve the human condition.Our research shows that the Poor people require not only hig her incomes but also security and empowerment, opportunities for education, jobs, health and nutrition, a clean and sustainable environment, a well-functioning judicial and legal system, civil and political liberties, and a rich cultural life. Good health and nutrition and effective reproductive policies and health services as critical for allowing countries to break the vicious circle of poverty, high fertility, poor health, and low economic growth. Health, nutrition, and population programs priorities for its work and for the wider development community. There's also the concern that growth can be balance between developed countries and developing countries. Even within developing countries, capital is a challenge to raise the small companies, and so that, too, contributes to the inequality of both, and also of wealth. As we look at the investment rates for developing countries, they've been sluggish. We shall balance between bank revenue and the bank's lending instruments and portfolio along with charity and humanitarian donations globally. We shall be strong to support projects in the social field, investment, lending and bond market by the grace of God acting prudently from a financi al standpoint. . . . If you start financing schools and hospitals and water works, and so forth, these things don't normally and directly increase the ability of a country to repay a borrowing but we shall be contributing towards humanitarian welfare and God will bless us.

Africa is, where a lot of the world's poor live, yet endured with resources including mineral potential that Helpers Of Africa International seeks to explore. We have a pilot project in Kenya of setting up an industrial park and city to both activate mining and value addation chain of minor and indu stries to process the minerals and value addation. In this territory in Kenya Taita we have mineral potential of over 70 billion Usd of geologically confirmed industr ial and precious minerals yet it is also the poorest county in Kenya. The mineral value in that one location can pay off all Africa debt in Africa it is not above countries like Congo. The US Geological Survey (USGS) ranks Africa as the largest or second-largest reserve worldwide for bauxite (the main source of aluminium), cobalt (used to make alloys an d batteries), and industrial diamonds (needed to cut hard materials), manganese (the anticorrosive element in steel), phosphate rock (a key ingredient in fertilizers), pla tinum group metals (a primary component in automotive catalytic convertors), soda ash (an element in glass production), vermiculite (a component in fireproof materials) and zirconium (used to manufacture heatresistant ceramic materials) (KPMG, 2012). All of these products except for fertilizers are found in everyday life within the automobiles we use to travel from point A to point B. In an eco-conscious world where renewable materials are becoming more important, many new automobiles have an increasing volume of plan t based materials in them, phosphate rock is as important to the cars being manufactured today as the other minerals found on the continent. This is an illustration of how world citizens are directly and indirectly linked to the fortunes of the African mining sector. But the application of its metal and mineral pro duce goes much further than just automobiles. Mining and quarrying of some 60 mineral products currently represents around 20% of Africa's economic activity, while mineral s are the continent's second-largest export category worth 10% of the continent's total exports only exceeded by hydrocarbons. More than 80% by value of these mineral commodities originate in just five countries: In Africa mining in done both at large scale and small scale. In some African countries, environmental problems and social is sues caused by mining have been sources of protests and conflicts between mining companies and communities in mining areas. Mining has often been associated with defore station, land degradation, air pollution, and disruption of the ecosystem. For example, the recent strikes and deaths in major platinum and gold fields in South Africa have highlighted the social impacts and uncertainties surrounding the country's strategic mining sector. To curb social and environmental impacts of mining, industry players and governments should strive for a more inclusive and transparent partnership by encouraging public participation in mining communities .Africa is blessed with a rich bounty of natural resources. The continent holds around 30% of the world's known mineral reserves. These in clude cobalt, uranium, diamonds and gold, as well as significant oil and gas reserves. Given this natural wealth, it comes as no surprise that with the tripling of global mineral and oil prices in the past decade, mining ha s exploded on the African continent.

My country Kenya's mineral and oil wealth worth over Sh15 trillion. Kenya is firmly on the path to earn the trillions from its 77 different minerals, petroleum and gas reserves. Another research by the Strathmore University's Extractive Industries Centre puts the expected contribution of the mining sector at 10 – 15 per cent of the GDP, including the new jobs and value addition down the supply chain. In total, Kenya has 77 minerals according to the Department of Mines, among them rubies, emerald and tsavorite - though small quantities. IEA projects that the State will earn about Sh5.5 trillion from the estimated 40 million tonnes of rare earth minerals, and a further Sh300 million from mineral sands. The earnings will be in the form of royalties and taxes paid by the companies involved in the mining and export. Over the period 2000 to 2008 resource extraction contributed more that 30 percent of Africa's GDP, while the annual flow of foreign direct investment into Africa increased from However, despite being so richly endowed, and despite the mining boom of the past decade, Africa has drawn little benefit from this mineral wealth and remains one the poorest continents on the globe, with almost fifty per cent of the population living on less than $1.25 per day. We shall establish Kingdom Mineral Agency to support mining sector in Exploration & licensing, Technology, machinery, market and welfare to miners by returning back to community uplift in livelihood regions in building schools, hospitals, roads, trade centers, water access, environmental conservations along with charity and humanitarian empowerments of school bursaries. Job creation , poverty eradication, economic empowerment and infrastructure development is a direct outcome of a well managed mining exploration projects on a win / win situation that Kingdom Mining Agency will seek to attain. The mineral industry of Africa is the largest mineral industries in the world. Africa is the second largest continent, with 11.73 million miles of land, which implies large quantities of resources. With a population of 1.216 billion living there. For many African countries, mineral exploration and production constitute significant parts of their economies and remain keys to economic growth. Africa is richly endowed with mineral reserves and ranks first or second in quantity of world reserves of bauxite, cobalt, industrial diamond, Phosphorite phosphate rock, Platinum in Africa platinum-group metals,vermiculite.African mineral reserves rank first or second for bauxite, cobalt, diamonds, phosphate rocks, platinum-group metals (PGM), vermiculite and zirconium.[3] Many other minerals are present in quantity. The 2012 share of world production from African soil was bauxite 7%; aluminium 5%; chromite 38%; cobalt 60%; copper 9%; gold 20%; iron ore 2%; steel 1%; lead (Pb) 2%; manganese 38%; zinc 1%; cement 4%; natural diamond 56%; graphite 2%; phosphate rock 21%; coal 4%; mineral fuels (including coal) & petroleum 47%; uranium 18%. platinum 69.4%

There is a new geography of trade, investment and humanitarian work operating in a international platform as the world becomes a global village. Helpers Of Africa International will play important locomotive for global economic growth and impact of humanity to continue given the economic challenges which the nations of the world are experiencing.You have came together from big and middle income nations, you decided to believe in the vision and donate even before meeting us the visionaries . God bless you, blessed are those who believe before seeing. Some have knocked on doors , convined meeting to convince your family and partners to give, paid airtickets / fueled jets / and mobilized movement some of you for the first time in Africa, you made phone calls to friends to come who did not know Kenya and Dr Luke just through the website you believed and you talked to your partners / friends to come and give through this we are now a mighty team to transform the world through your donations in the account and those you will continue to give for generations. For all this efforts for the sake of empowering humanity through Helpers Of Africa International through us, for all this we again say thank you God bless you shall not be disappointed. It Is clear that all gathered here have something in common to touch humanity and the world with good things and may this good reach your family, business even before we get started like the prophet told King David when he thought about building Gods house a promise of greatness was given that was fulfilled to the last. This vision has grown and become big in the hearts of many that is why such a prominent gathering from all nations are here full of hope of a better day for the world. God bless you mightly. We have paid a big price with my wife ,son, the church I pastor along other few people to envision and pilot this dream for 25 years but it is not about us but you the donors and billions of beneficiaries the orphans, the weak, the sick, homeless, depressed nations waiting for us to manifest in this vision, mission and values.We shall acquire buildings , assets and buld cities but it is not about that because all of you have a strong inventory of huge asset base but our story will be about the billions of people we shall empower and facilitate valuable dreams which would be dead exept we have obeyed. I know God is happy with us already that makes the difference and will bless us and our families greatly. Life is about enjoying every moment and making the world better and safer for our generations caring for Gods creation in the short life we have here on earth as we prepare ourselves to spend eternity after this short life which is important to make our lives in line with Him here in this life to have assuarance of eternity. You are really good people, I will enjoy working with all of you for our cause and we promise to be accountable on resources and vision we have put before you.

Your ideas will help us be fairer, keep us honest, work harder and be more excellent and efficient. We need you and the world needs you to establish a better world for generations. Continue with the same tenacity that you showed in raising in a few months over 3 quadrillons in KSh and _____ USD. With all humility this amount is beyond the sum of the Top 100 commercial banks put together, what a historic record. Clap for yourselves, neighbors and clap to almighty God who has made all this to happen. With this generosity, energy and network we shall turn many ideas and dream to become a reality and making things happen.

I am truly blessed and consider it a great great great honor to have met all of you to establish one of the greatest banks in the world and in all my years I have spoken to multitudes of hundrends of thousands but have never spoken to such outstanding leaders of the business and economic world this is surely a special and valuable gathering, you are really very very special to us and before God. When you have a wonderful smart team like you sacrificing all your very very valuable time and resources to empower nations and humanity, this is something divine. When you have world economic leaders who work all their lives and earned bringing there resources to build nations, humanity and by extension the Kingdom of God it's a blessing! When you have men and women of influence becoming a tower of strength and shown more courage than our dreams existed, that's the finest I know.Today I am delighted to join me launch Helpers Of Africa International whose Vision is to refresh nations and mission is to empower the world through Charity, Development and Empowering Humanity. It is a name that is synonymous with trust, ethics and sound advice. We call it the humanity bank and that is exactly what it is. It will empower humanity; will attend to needs and heart beat of communities and nations. We hope that in launch of this bank to empower communities and nations in the world we will be able to meet the humanitarian demands of nations through this global fund. It will have a strong on-line banking and physical presence in all countries of the world in capitals, cities and counties systematically and simultaneously to our need assessment for the purpose of administering our vision and mission transforming billions of people in the world. In today's fast moving world, though, it really isn't practical to swap a cow for gas for your auto or pay for your groceries with home grown vegetables. We use money to do good to humanity and make our world a better place as custodians of Gods world and we need banks to provide the platform of administration of money. The more money we have the more we needs we shall meets of humanity and we have qualified professionals who will oversee the front and back office of Helpers Of Africa International. We have an able experienced CEO Catherine Mwangi to guide us professionally how to manage this fund across our departments in various nations honestly and in a trustworthy manner as she has faithfully managned our previous phases of our projects with integrity and accountability. You our partners will keep a strong monthly flow quarterly or annual flow as you shall indicate in our FEEDBACK coupons provided to enable us to do good works to communities and nations in Charity, Development and Empowerment of Humanity especially the weak and vulnerable.

COLABORATORS

Helpers Of Africa International will support Regional integration.

Regional integration has been defined as the process through which independent national states "voluntarily mingle, merge and mix with their neighbors so as to lose the factual attributes of sovereignty while acquiring new techniques for resolving conflicts among themselves."De Lombaerde and Van Langenhove describe it as a worldwide phenomenon of territorial systems that increases the interactions between their components and creates new forms of organization, co-existing with traditional forms of state-led organization at the national level.-Some scholars see regional integration simply as the process by which states within a particular region increase their level interaction with regard to economic, security, political, or social and cultural issues.

In short, regional integration is the joining of individual states within a region into a larger whole. The degree of integration depends upon the willingness and commitment of independent sovereign states to share their sovereignty. The deep integration that focuses on regulating the business environment in a more general sense is faced with many difficulties.

Regional integration initiatives, according to Van Langenhove, should fulfill at least eight important functions:

- the strengthening of trade integration in the region
- the creation of an appropriate enabling environment for private sector development
- the development of infrastructure programmes in support of economic growth and regional integration
- the development of strong public sector institutions and good governance;
- the reduction of social exclusion and the development of an inclusive civil society
- contribution to peace and security in the region
- the building of environment programmes at the regional level
- the strengthening of the region's interaction with other regions of the world.

The crisis of the post-war order led to the emergence of a new global political structure. This new global political structure made obsolete the classical Westphalian concept of a system of sovereign states to conceptualize world politics. The concept of sovereignty became looser and the old legal definitions of the ultimate and fully autonomous power of a nation-state are no longer meaningful. Sovereignty, which gained meaning as an affirmation of cultural identity, has lost meaning as power over the economy. All regional integration projects during the Cold War were built on the Westphalian state system and were designed to serve economic growth as well as security motives in their assistance to state building goals. Regional integration and globalization are two phenomena that have challenged the pre-existing global order based upon sovereign states since the beginning of the twenty-first century. The two processes deeply affect the stability of the Westphalian state system, thus contributing to both disorder and a new global order.
Your Exellencies Ladies and Gentlemen .

Closer integration of neighbouring economies has often been seen by governments as a first step in creating a larger regional market for trade and investment. This is claimed to spur greater efficiency, productivity gain and competitiveness, not just by lowering border barriers, but by reducing other costs and risks of trade and investment. Bilateral and sub-regional trading arrangements have been advocated by governments as economic development tools, as they been designed to promote economic deregulation. Such agreements have also aimed to reduce the risk of reversion towards protectionism, locking in reforms already made and encouraging further structural adjustment.

Some claim the desire for closer integration is usually related to a larger desire for opening nation states to the outside world, or that regional economic cooperation is pursued as a means of promoting development through greater efficiency, rather than as a means of disadvantaging others. It is also claimed that the members of these arrangements hope that they will succeed as building blocks for progress with a growing range of partners and towards a generally freer and open global environment for trade and investment and that integration is not an end in itself, but a process to support economic growth strategies, greater social equality and democratisation.However, regional integration strategies as pursued by economic and national interests, particularly in the last 30 years, have also been highly contested across civil society. There is no conclusive evidence to suggest that the strategies of economic deregulation or increased investor protection implemented as forms of regional integration have succeeded in contributing to "progress" in sustainable economic growth, as the number of economic crises around the world has increased in frequency and intensity over the past decades. Also, there is increasing evidence that the forms of regional integration employed by nation states have actually worsened social inequality and diminished democratic accountability. As a result of the persisting contradiction between the old promises of regional integration and real-world experience, the demand from across global civil society for alternative forms of regional integration has grown. Regional integration arrangements are a part and parcel of the present global economic order and this trend is now an acknowledged future of the international scene. It has achieved a new meaning and new significance. Regional integration arrangements are mainly the outcome of necessity felt by nation-states to integrate their economies in order to achieve rapid economic development, decrease conflict, and build mutual trusts between the integrated units. The nation-state system, which has been the predominant pattern of international relations since the Peace of Westphalia in 1648 is evolving towards a system in which regional groupings of states is becoming increasingly important vis-a-vis sovereign states. Some have argued that the idea of the state and its sovereignty has been made irrelevant by processes that are taking place at both the global and local level.
Your Exellencies Ladies and Gentlemen.

Walter Lippmann believes that "the true constituent members of the international order of the future are communities of states."[8] E.H. Carr shares Lippmann view about the rise of regionalism and regional arrangements and commented that "the concept of sovereignty is likely to become in the future even more blurred and indistinct than it is at present."

Regional integration agreements

Regional integration agreements (RIAs) have led to major developments in international relations between and among many countries, specifically increases in international trade and investment and in the formation of regional trading blocs. As fundamental to the multi-faceted process of globalization, regional integration has been a major development in the international relations of recent years. As such, Regional Integration Agreements has gained high importance. Not only are almost all the industrial nations part of such agreements, but also a huge number of developing nations too are a part of at least one, and in cases, more than one such agreement.

The amount of trade that takes place within the scope of such agreements is about 35%, which accounts to more than one-third of the trade in the world. The main objective of these agreements is to reduce trade barriers among those nations concerned, but the structure may vary from one agreement to another. The removal of the trade barriers or liberalization of many economies has had multiple impacts, in some cases increasing Gross domestic product (GDP), but also resulting in greater global inequality, concentration of wealth and an increasing frequency and intensity of economic crises.

The number of agreements agreed under the rules of the GATT and the WTO and signed in each year has dramatically increased since the 1990s. There were 194 agreements ratified in 1999 and it contained 94 agreements form the early 1990s.

The last few years have experienced huge qualitative as well as quantitative changes in the agreements related to the Regional Integration Scheme. The top three major changes were the following:

- Deep Integration Recognition
- Closed regionalism to open model
- Advent of trade blocs

Deep Integration Recognition

Deep Integration Recognition analyses the aspect that effective integration is a much broader aspect, surpassing the idea that reducing tariffs, quotas and barriers will provide effective solutions. Rather, it recognizes the concept that additional barriers tend to segment the markets. That impedes the free flow of goods and services, along with ideas and investments. Hence, it is now recognized that the current framework of traditional trade policies are not adequate enough to tackle these barriers. Such deep-integration was first implemented in the Single Market Program in the European Union. However, in the light of the modern context, that debate is being propounded into the clauses of different regional integration agreements arising out of increase in international trade.(EU).

Closed regionalism to open model

The change from a system of closed regionalism to a more open model had arisen out of the fact that the section of trading blocs that were created among the developing countries during the 1960s and 1970s were based on certain specific models such as those of import substitution as well as regional agreements coupled with the prevalence generally high external trade barriers. The positive aspects of such shifting is that there has been some restructuring of certain old agreements. The agreements tend to be more forward in their outward approach as well as show commitment in trying to advance international trade and commerce instead to trying to put a cap on it by way of strict control.

Trade blocks

The Advent of Trade Blocks tend to draw in some parity between high-income industrial countries and developing countries with a much lower income base in that they tend to serve as equal partners under such a system. The concept of equal partners grew out of the concept of providing reinforcement to the economies to all the member countries. The various countries then agree upon the fact that they will help economies to maintain the balance of trade between and prohibit the entry of other countries in their trade process.

An important example would be the North American Free Trade Area, formed in 1994 when the Canada - US Free Trade Agreement was extended to Mexico. Another vibrant example would entail as to how EU has formed linkages incorporating the transition economies of Eastern Europe through the Europe Agreements. It has signed agreements with the majority of Mediterranean countries by highly developing the EU-Turkey customs union and a Mediterranean policy. Vysegrád four is a group of states co-operating in order to achieve higher economic results

Recent regional integration

Regional integration in Europe was consolidated in the Treaty on the European Union (the Maastricht Treaty), which came into force in November 1993 and established the European Union. The European Free Trade Association is a free trade bloc of four countries (Iceland, Liechtenstein, Switzerland and Norway) which operates in parallel and is linked to the European Union. In January 1994, the North American Free Trade Agreement was formed when Mexico acceded to a prior-existing bilateral free trade agreement between the US and Canada. In The Pacific there was the ASEAN Free Trade Area (AFTA) in 1993 which looked into reducing the tariffs. The AFTA started in full swing in 2000.

Alternative Regional Integration

In the last decade regional integration has accelerated and deepened around the world, in Latin America and North America, Europe, Africa, and Asia, with the formation of new alliances and trading blocks. However, critics of the forms this integration has taken have consistently pointed out that the forms of regional integration promoted have often been neoliberal in character, in line with the motives and values of the World Trade Organization, the International Monetary Fund and the World Bank - promoting financial deregulation, the removal of barriers to capital and global corporations, their owners and investors; focusing on industrialisation, boosting global trade volumes and increasing GDP. This has been accompanied by a stark increase in global inequality, growing environmental problems as a result of industrial development, the displacement of formerly rural communities, ever-expanding urban slums, rising unemployment and the dismantling of social and environmental protections. Global financial deregulation has also contributed to the increasing frequency and severity of economic crises, while Governments have increasingly lost the sovereignty to take action to protect and foster weakened economies, as they are held to the rules of free trade implemented by the WTO and IMF.

Advocates of alternative regional integration argue strongly that the solutions to global crises (financial, economic, environmental, climate, energy, health, food, social, etc.) must involve regional solutions and regional integration, since they transcend national borders and territories, and require the cooperation of different peoples across geography. However, they propose alternatives to the dominant forms of neoliberal integration, which attends primarily to the needs of transnational corporations and investors. Renowned economist, Harvard professor, former senior vice president and chief economist of the World Bank, Joseph Stiglitz has also argued strongly against neoliberal globalisation (see Neoliberalism). Stiglitz argues that the deregulation, free trade, and social spending cuts or austerity policies of neoliberal economics have actually created and worsened global crises. In his 2002 book Globalization and Its Discontents he explains how the industrialized economies of the US, Europe, Japan, South Korea and Taiwan developed not with the neoliberal policies promoted in developing countries and the global South by the WTO, IMF and World Bank, but rather with a careful mix of protection, regulation, social support and intervention from national governments in the market.

The People's Agenda for Alternative Regionalisms

The *People's Agenda for Alternative Regionalisms* is a network of civil society, social movement and community-based organisations from around the world, calling for alternative forms of regional integration. PAAR strives to "promote cross-fertilisation of experiences on regional alternatives among social movements and civil society organisations from Asia, Africa, South America and Europe." Further "[i]t aims to contribute to the understanding of alternative regional integration as a key strategy to struggle against neoliberal globalisation and to broaden the base among key social actors for political debate and action around regional integration" and is thus committed to expanding and deepening global democracy.

PAAR aims to "build trans-regional processes to develop the concept of "people's integration", articulate the development of new analyses and insights on key regional issues, expose the problems of neoliberal regional integration and the limits of the export-led integration model, share and develop joint tactics and strategies for critical engagement with regional integration processes as well as the development of people's alternatives." It draws on and extends the work of such, Southern African People's Solidarity Network- SAPSN (Southern Africa).

The PAAR initiative aims to develop these networks and support their efforts to reclaim democracy in the regions, recreate processes of regional integration and advance people-centred regional alternatives. In the video Global Crises, Regional Solutions the network argues that regional integration and cooperation is essential for tackling the many dimensions of the current global crises and that no country can face these crises alone. The video also calls for countries to break their dependency on the global markets, as well as the dominant development model that has failed to address increasing global hunger, poverty and environmental destruction, resulting instead in greater inequality and social unrest. Regional integration, the video argues, should be much more than macro-economic cooperation between states and corporations; it should protect shared ecological resources and should promote human development - health, wellbeing and democracy - as the base of economic development.

Helpers Of Africa International

Kingdom Global Peace Building & Conflict Resolution Agency

Helpers Of Africa International through Kingdom Global Peace Building Agency will invest and participate in global, national, regional and communities peacebuilding that varies depending on the actor, with some definitions specifying what activities fall within the scope of peacebuilding or restricting peacebuilding to post-conflict interventions. Even if peacebuilding has remained a largely amorphous concept without clear guidelines or goals common to all in the agreement that improving human security is the central task of peacebuilding. Our stratergy of peacebuilding includes a wide range of efforts by diverse actors in government and civil society at the community, national, and international levels to address the root causes of violence and ensure civilians have freedom from fear (negative peace), freedom from want (positive peace) and freedom from humiliation before, during, and after violent conflict. Our peacebuilding's strategic plan aims overlap with those of peacemaking, peacekeeping and conflict resolution idea. Peacemaking involves stopping an ongoing conflict, whereas peacebuilding happens before a conflict starts or once it ends. Peacekeeping prevents the resumption of fighting following a conflict; it does not address the underlying causes of violence or work to create societal change, as peacebuilding does. Peacekeeping also differs from peacebuilding in that it only occurs after conflict ends, not before it begins. Conflict resolution does not include some components of peacebuilding, such as state building and socioeconomic development this are the areas we seek to be involved post-conflict or post-war. Before conflict becomes violent, preventive peacebuilding efforts in diplomatic, economic development, social, educational, health, legal and security sector reform programs, address potential sources of instability and violence. Our focus is also conflict prevention. Our Peacebuilding efforts aim to manage, mitigate, resolve and transform central aspects of the conflict through official diplomacy globally and funding the experience as well as through civil society peace processes and informal dialogue, negotiation, and mediation. Peacebuilding addresses economic, social and political root causes of violence and fosters reconciliation to prevent the return of structural and direct violence. Peacebuilding efforts aim to change beliefs, attitudes and behaviors to transform the short and long term dynamics between individuals and groups toward a more stable, peaceful coexistence. Peacebuilding is an approach to an entire set of interrelated efforts that support peace.

Our Peacebuilding involves a range of measures targeted to reduce the risk of lapsing or relapsing into conflict by strengthening national capacities at all levels for conflict management, and to lay the foundations for sustainable peace and sustainable development. Peacebuilding strategies must be coherent and tailored to specific needs of the country we shall engage based on national ownership, and should comprise a carefully prioritized, sequenced, and therefore relatively narrow set of activities aimed at achieving the above objectives. Our strategies for peace are not meant to function separately from other stake holders we shall just be part to add professional value and economic support or in a particular order. Strategies will be applied proactively, to prevent violence occurring or reactively to reduce the likelihood of violence reoccurring. Each strategy on its own cannot really be effective in creating peace without the application of the other strategies. Our Peacekeeping and conflict resolutions will be professional, urgent and immediate as the primary aim is to intervene in actual violence and prevent further violence occurring. Peacekeeping strategies deal directly with the actors involved with violence. I request you partners to help existing platforms to give us space in the global and international. Our Peacekeeping approaches will be 'dissociative' – aimed at keeping opponents apart from each other by the use of direct interposition, 'buffer zones', or 'peace zones' including monitoring and observation and protective accompaniment of threatened activists. Establishing a level of physical safety is the primary goal. Often peacekeeping will aim to create the pre-conditions necessary to allow peacemaking or peacebuilding work to occur or continue in Nations and globally.

Our stratergic plans in conflict resolutions and peacekeeping is designed in a framework to be effective when used in situations of 'horizontal violence' (between parties of relatively equal power) and will serve to maintain the status quo when used in situations of 'vertical violence'. Our Approaches such as protective accompaniment or observer teams in negotiations and elections will be more suitable when violence is between parties of unequal power that we seek to engage. Our Strategic Peacemaking is primarily concerned with the search for a negotiated settlement between the parties. Peacemaking activities include bringing the parties together in dialogue about a possible resolution to the conflict. Typical peacemaking activities include mediation, conflict resolution workshops and dialog meetings at various levels. There are a wide variety of negotiated, third-party or facilitated approaches. The application of the law would be seen as a peacemaking approach. Focus is on the parties interests and positions in a conflict and the aim is to shift parties onto the path of positive and nonviolent conflict resolution. Our Conflict resolution and Peacebuilding strategy is aimed at changing the underlying conditions which allowed or caused the conflict or violence to occur in the first place. We shall focus on longer-term change at the attitudinal – social level and changing the structural cause of the violence. Peacebuilding generally has a long-term perspective and includes a huge range of activities and approaches aimed at reducing fear, prejudice and mistrust, humanizing former opponents and building positive relationships.

This will be done via mutual social, sport or cultural activities or working on shared concerns. Our Peacebuilding will work to develop a 'peace–culture' where nonviolent methods of dealing with conflict are well socialised and prominent. We shall advocate Psycho/social healing processes such as debriefing, ongoing emotional support for traumatized people, reconciliation processes and ensuring justice is seen to be done is crucial peacebuilding activities after periods of violence. On a social/economic level, peacebuilding works towards the meeting of basic needs by establishing just and equitable economic and political systems. The world's attention is turning to progress in achieving peace to meat glocal Millennium Development Goals. Our reseach confirms a disheartening fact that countries that are racked by conflict and that suffer endemic fragility are not making the progress they need if the global development goals are to become a reality for their people. We are all aware of the desperate needs of these countries, communities and regions. Our research suggests that fragile states and those recovering from fragility account for only 37% of the population of developing countries.However, they account for 58% of the poverty in the developing world, as well as 67% of the infant deaths and 69% of the deaths of children under five. Our analysis indicates that no fragile state has yet achieved global goals because of instability. By 2030, only 10% of fragile states are expected to achieve the goal of halving poverty and hunger. Against this backdrop, our entry into the global and international platform as a peace maker is most timely one. These findings are a stark reminder of the enormous and complex challenges that lie ahead, but they are also a call to mobilize our combined resources on behalf of the poor and powerless. Violent conflict is one of the most profound of development challenges: without peace and security there can be no sustained development. However, focusing on peace-building alone is not sufficient.

Just as development cannot occur in the absence of peace, peace without development is a peace that may not last. In recent years, the international community's discourse about addressing violent conflict and its consequences has become more pronuanced. We increasingly recognize that humanitarian action, peace-making, peace-keeping, peace-building, state-building, and development do not happen in a mechanical linear sequence, but are closely interlinked and overlapping. Such a complex landscape calls for cooperation and coherence among actors. It challenges us to address the short-term demands of a deeply damaged society while making sure that our actions do not compromise the longer-term goal of building an effective state.Against this background, I would like to propose one overarching principle that must inform all that we do: results matter. By this I mean that all we do must contribute directly to results on the ground. Whether we are working in our headquarters offices to shape a new policy, or engaging with a partner government on a national development plan, or rebuilding a road for a war-ravaged community, we must constantly ask a single question—How will these actions provide people with a better life now and in the future? This approach, which breaks down long-term development plans into manageable 100 day chunks, is now applied in 80 government projects. Our strategic plan will focus on country context, partnership, and accountability. I believe that if we pay attention to these three areas, we will be able to contribute something substantial and enduring toward the immense challenges of helping countries create an environment of peace and security. Let me briefly elaborate on these three points. First, it's about country context. Of course we must learn from and build on our experience, but in the urgency of a post-conflict environment, it is often too tempting to simply apply a solution that worked elsewhere. We must guard against trying to replicate what we have done in the past without ensuring that it is appropriate to the present context; we must guard against any prescription that prevents adaptation and flexibility. We need to do a better job of understanding the drivers of conflict (both those that are endogenous and those that stem from regional and global dimensions); we need to understand the structure of elite incentives; and we must identify each country's fundamental strengths and comprehend the limits of its capacity to absorb change. And we must act on what that knowledge tells us.

The Helpers Of Africa Internationalsupported all our Agencies on Kingdom Food and Agriculture, Disaster Response, Equal Justice, Education, Cities & Slum Upgrade, Education and Health will work to support the development of context-specific approaches to improving access to justice in at National and global levels. In Our programs will work along with other national and international bodies, helping scale-up grassroots of peace building services. Trained community paralegals employ a combination of mediation, education, advocacy, and occasionally litigation to seek redress for violations of peace. They engage both customary and formal institutions and provide a flexible, cost-effective method for delivering peace and services that is tailored to socio-legal context.

We shall support and work with Governments to establish peace boards and organizations within which will be a platforms of partnership and where they exist we shall empower them to be more effective and create a framework that will build peace and resolve conflicts. Our coordination efforts will be driven by our need to deliver meaningful results. I know that some see comfort in predictability – that our response in post-conflict situations would be improved by pre-determining who does what. While it is important that we recognize where our overall comparative advantage may lie, it is essential that our response should be determined by the dictates of the situation and our relative capacity to deliver in the particular context of the partner countries. Pre-determination could easily result in inflexibility at a time when adaptability and nimbleness is most needed. Decisions must be delegated to where the best information is, and they must be made at the lowest level that will be effective. This means that we need to put our best people into the field—for it is our field staff who are best placed to decide, in consultation with their country partners, who should do what, and when, and how.

Partnerships are key. We must recognize that achieving a sustainable peace and setting in train a broad-based agenda for development is ultimately the work of a state and its citizens. We in the finance and development community need to be humble and remind ourselves that we play a supporting role. We shall provide our resources, our expertise, and our security assistance so that a people may be able to take back the reins of government. The only credible peace coordinator of a state-building process is a legitimate sovereign government. Our assistance will be shaped to support the country in mobilizing the human and material capital it has at its disposal to provide the services its citizens need. This will mean many things for us. For example, we must pool our funding wherever possible to maximize coherence and reduce the burden on the government, such as through multi-donor trust funds. We shall support and work through the national budget, and strengthen country fiduciary systems. We shall use our comparative advantages and tailor our efforts to local needs and preferences. And we shall reach agreement with our country partners on when it is appropriate to press for change and when we should stand back to allow a population to determine the speed of reform.

We shall strengthen our partnership with the countries we seek to assist, we need to look too at our own partnerships. We shall work together effectively to achieve the results expected of us. The Helpers Of Africa Internationalwill appoint envoys and peace ambassadors to Nations and Communities some will be celebrates figures like athletes in Kenya have been used to forster peace. These will strengthen our partnerships in the field in countries and communities in particular need. We shall establish Peace Building Support Office in countries, continents and regions in the Fragile and Conflict-affected Countries Unit to help facilitate and deepen our complementary efforts. We are all accountable. While Governments must ultimately be accountable to their citizens for what they do, we must do everything we can to reinforce that line of accountability. Running a parallel service delivery program may give us results in the short term, but it will not contribute to, and may even undermine, efforts to build the social compact that lies at the heart of a well-functioning state. Shifting accountability also requires us to change the way we monitor our efforts. We must get away from traditional preoccupation with tracking inputs and focus our attention, and that of our partners, on achieving outcomes. Confronted by an uncoordinated and poorly performing health care system some developing countries establish Basic Package of Health Services through with peace advocacy through community health workers and health centers. Valued health services being made possible by a committed partnership between government and local providers and our funding will package a sustainable peace inniatiatice.

In the spirit of mutual accountability, we shall create ownership and accountability for what we deliver and demand transparency in our partners to provide transparency ourselves. In this regard, We shall adopt a new Access to Information Policy that will open up the Bank's and our agency work even further enhancing public ownership of the development agenda, strengthening partnerships, and encouraging greater participation in Bank-supported operations. The importance of country context, of true partnership, and of appropriate accountability among many others will be a strong focus. I know that these ideas may sit uncomfortably with our limited appetite for risk and our need to demonstrate to our domestic constituencies the quick wins expected in an immediate post-conflict period. It is clear to me that addressing the challenges of development through these lenses will require fundamental changes to the way we do business. To deliver real results for the people living in fragile and conflict-affected situations, these areas deserve our full attention. We know that the costs of failure are great, but let us also bear in mind that the benefits that flow from success can be even greater. Our areas of focus will be Threats, Exploitation of resources with little regard for civilian population, Denial of physiological needs (food, water, shelter, medical, religious needs, etc..), Violence, Terrorism, Genocide, Tribal / Ethnic / Religious War, National War, Regional Wars and World Wars that we seek to intervene as global peace makers as Mathew 5.9 blessed are the peace makers they will be called the sons of God.

We shall partner and support gorvernments to train and support education on conflict resolution and peace bulding in schools, colleges, community leaders,

a) Conflict analysis and early warning signs.
* i) Conflict analysis typically focuses on the problems of culturally divided states, especially those with weak democratic traditions, deep ethnic divisions, and histories of collective violence perpetrated by one group against another or by past/current governments against civilian populations.
b) Non-violent demonstrations, protests and media campaigns (previously only newspaper, radio and tv, now including the internet and social media).
b) Erasing ignorance / non-awareness / non-admission of the situations.
c) Creating consciousness of inequity & injustice of issues, interests, needs and wants.
1. The state of being conscious; awareness of one's own existence, sensations, thoughts, surroundings, etc.
2. The thoughts and feelings, collectively, of an individual or of an aggregate of people: the moral consciousness of a nation.
3. Full activity of the mind and senses, as in waking life: to regain consciousness after fainting.
4. Awareness of something for what it is; internal knowledge: consciousness of wrongdoing.
5. Concern, interest, or acute awareness: class consciousness.
d) Conflict transformation.
* i) Conflict can be the transforming agent that causes the individual / region to change perception, attitude, behavior and actions.
* ii) Tranforming destructive relationships into productive social changes.
* iii) Identity transformation/education into peaceful souls (especially on children & youths).
* iv) Personal transformation (inner peace) related to grief and trauma, dealing with family deaths, anger, bitterness and hatred (especially in young, middle-aged and older adults).

3) The Peace Building Processes:

Negotiation - Getting all parties to talk face to face and resolve their differences by themselves.
Conciliation - A conciliator communicates with each side individually.
Mediation / Facilition - Promoting justice for all parties by an impartial third party.
Advocacy - A third party promoting one side due to real/perceived injustice.
Arbitration / Adjudictive - A third party makes a binding decision for both parties.
Threat of force - The threat of military action by a third party against the offending party.
Economic Sanctions - Third parties imposes economic sanctions against offending party.

These peace-building processes generally fall into three categories (or a combination of them) -
* Consensual (the parties reach a agreement by themselves)
* Adjudictive (court ordered by third party)
* Legislative (laws or rule-making determined by a group, organization, ruler or legislative body)

Transformative peacemaking focuses on the means (process) used to reach the ends, focusing very closley on the process instead of merely the desired outcome. The approach stresses fairness, understanding, respect, and inclusiveness of all parties in order to create a commitment to increasing justice, finding truths and healing relationships.

The end goal of these processes include some of the following:
a) Balancing power between the stronger and weaker parties (only possible when the advantages to each parties are understood).
* i) The weaker / wronged party gets restored justice and the attacking party hopefully acknowledges the wrongs committed.
b) Conflict resolution:
* i) Working together to reach independent and/or mutually acceptable goals.
* ii) Improving relationships between the various parties (not always possible).
* iii) Listening / understanding all sides without judging.
* iv) Develop / determine / promote solutions that lead to personal / regional social change and improvement.
* v) Attempt to create both individual empowerment along with mutual interdependence and community.
* vi) Reconcilliation - quarrels and differences are settled so that violent opposition are eliminated and hopefully friendships are created.
* vii) Reparations - the offending party reimburses the offended party for the wrong doings.

Conflict resolution can be viewed as "Distributed" or as "Expanded".
* "Distributed" may be equated to "dividing the pie" or "splitting the difference".
* "Expanded" attempts to discover many different solutions than first considered (value creation) prior to reaching agreements / dividing the pie, or coming up with solutions that create a win-win situation for all parties involved.

4) Sustainable Peace:
a) Reducing inequalities and perceived injustice.
b) Creating compassion and kindness for all parties involved.
c) The desired outcome of harmony can not solve the problem at the expense of justice. The fire will merely smolder and re-ignite later.
d) Creating understanding and comprehesion of what it means to create / sustain peace.
e) Living with Peace, Happiness, Liberty, Compassion and Joy!

Our Stratergy is holistic,Peace is a vastly greater concept than the lack of war, violence, poverty and inner turmoil. Peace is the combination of bodily peace, family peace, local peace, national peace, inner peace and world peace. Accordingly, true peace must begin with food, water, vitamin nutrition and medical care for both rich and poor alike. Next, peace training starts with the family and in our education systems. Peace needs to surround us in the form of local safety and security which is best achieved through communication and negotiation with neighbors to attain mutual trust and respect for one another. Governments and state leaders can assist in the peace process by creating and encouraging/enforcing moral and ethical standards, thus promoting justice, liberty, freedom, ethnic and religious tolerance, and constructive relations with all nations. Inner peace may be the most important key to peace because through love (both of self and the world), faith, meditation, self-esteem, compassion, hope, kindness, gratitude and wisdom (self-cultivation), peace will spread to those around you. World peace is achieved by combining all the "peaces" together to create hot peace (as opposed to cold war). Hot peace is the absolute presence of worldwide justice, freedom, cooperation, negotiation (working with both friends and enemies), education, mutual respect, sharing, compassion, kindness, happiness, joy, equanimity, human dignity and harmony with nature, animals and mother earth. World Peace is merely an unsolved puzzle waiting for loving people to put the "peaces" together. Through love, World Peace not only becomes possible, peace becomes probable. The benefits of human beings working together to create peace for all, will be reduced poverty, crime, war, hate, injustice, pollution, etc. The true benefit is living in a world where love, caring and compassion become the standard in this beautiful planet.

Our peacemaking outline is a "work in progress" and will be updated as we learn more about the peace process. The peacemaking information that is currently available tends to be ambiguous, unstructured, lengthy and expensive for the countries that most need this training/education. We hope to change this reality either through our efforts or the efforts of others that understand our dissatifaction with the peacemaking information that is currently available to peace builders, NGO's, and others that want to create a more peaceful world. Many countries are in real threat that growing insecurity and conflict threaten to further increase vulnerability of communities, setting back any developmental progress achieved with a disproportionate impact on people who are marginalised and suffering economic poverty. Recent years have also seen an increasingly complex interplay between religion and conflict. We explore a response to conflict as a thematic area for the Incubation Hub to enable peace; preventing and ending conflict would be a key component of the response. Our ‘strategy refresh’ process seeking to focus on how we can do more of the things we do well, and how to do those things better. The Peacebuilding strategy is relevant to many of the work packages launched as part of the refresh process. The Peacebuilding strategy has a significant contribution to make to the work packages on fragile and conflict affected states, Church Led Community Transformation and Influencing. Experiences from ongoing work across various teams in Tearfund (IG Countries, Humanitarian Support Team, IG Technical Team, Inspired Individuals and SGBV team) have influenced the proposed strategy.

The Peacebuilding teams will be supported by a peace ambassadors, involving key stakeholders across the organization to provide strategic advice on the direction and objectives of the hub, To have collective ownership of the project including: agreeing on project policy positions, promoting the project, approving key outputs of the project, and ensuring the sustainability of the project. , To hold the Programme Coordinator to account against the project's objectives. d. To monitor and address risks relating to the project, To ensure and promote corporate engagement and support for the work of the Hub. Peacebuilding is a key component of all global development targets including the Sustainable Development Goals (specifically Goal 16) and has been a focus at the recent Humanitarians focus including Kingdom Bank. Issues of conflict prevention, resolution and peacebuilding are integral components increasingly integrated into development strategies and actions. There is a specific opportunity for collaboration with the Governments and organizations in Nations and globally and is committed to the localization agenda. There is a real need to explore and understand the impact of conflict globally. Since our scoping study there has been increased interest in working "on" conflict and several countries are now looking to include peacebuilding as part of their country strategies. Common to all the countries is the requirement to raise standards with respect to conflict sensitivity, Inherent to this is the need to understand conflict drivers and to explore the interaction 2 between drivers and country strategies, programmes and projects. In tandem with the development of country peacebuilding strategies will be the need to develop monitoring and early warning systems. These would support Country Representatives and Country Directors as they try to identify and react proactively to emerging threats or opportunities with responses derived from contingency plans. These monitoring and warning systems would ensure that strategies remain relevant to the context as it evolves. History teaches us that societal and systemic change often emerges when a critical mass of like minded people birth a movement and begin a process of transformation and discipleship from the bottom up. We have done a few pilots at community level and can be scaled up at country level in the same model initiative to enable the start of a movement of peacebuilders and peace makers globally. The core outcome of our strategic plan is to enable a nascent community of refreshed, connected peacemakers, willing to explore shared stories and experiences by journeying together, so that they can collectively transform the sectarianism in their communities. This model of enabling a movement of peacemakers is a potential niche aspect of KGPA response.

KGPA has a real opportunity to work with key stakeholders, to mobilise and equip the local church and influence Governments, bilateral agencies, policy makers, other faith groups, key individuals and work with non traditional partners including business. This potential can really enhance our added value in this area, extending our capacity to influence policies, rally allies and critically shape mindsets. Some of the partnerships would be new allies for KGPA and will require creativity in how they are instituted and managed. The external environment is looking for fresh ideas and collaborations that can address conflict and facilitate peace. KGPA response to Peacebuiding is a real opportunity for a joined up response that involves teams across the organisation. The core elements of the strategy proposed and the connectedness with key work packages provides a natural scope for working together. The focus on theology, influencing the global and local church, working with inspired individuals (peacemakers), integration into the countries Group, advocacy and the wider potential to influence, linkages with KGPA means that this from the outset can be a strong, corporate response. The Peacebuilding Hub proposes a three year strategy with an emphasis on active learning. KGPA recognises that this is a relatively new space for the organisation. We have great potential and credibility have both clarity and evidence on what works for individual countries and this in turn can be taken to scele further on, resulting in a longer term strategy, recognising that enabling peace.

The concepts of the moral imagination, embrace, repentence and hospitality provide the framework for a 'Journey towards building peace' that will act as the guiding concepts by which we act, programme and relate to others in the field of peace building as well as the characteristics we would encourage in any peacebuilder or peacebuilding organisation that we work with. The development of a theological framework for peacebuilding has been a key building block for the direction and flavour of this strategy. These concepts emphasis that effective peacebuilding comes as much from the character and values of the peacemaker as from any peacebuilding activities; it is about becoming peacemakers rather than just doing peacebuilding. The Peacebuilding Hub is in the process of developing global studies that will help facilitate this process. The Peacebuilding strategy has complementary approaches in all priority regions and countries; the enabling of organic movements of peacemakers on one hand and investing in informed strategies, strenghtened capacity stake holders including churches and religious groups, people, staff on the other. The overall process follow Nurture - identifying and accompanying peacemakers, including our staff, partners, stakeholders and Inspired Individuals to explore how one's own worldview and experiences shape perceptions of conflict actors and of conflict dynamics. This is about accompanying and equpping people internally and externally to develop and share the analysis, assessment and planning resources and skills necessary to deepen understanding and shape suitable responses; This is about strenghtening the response; the technical capacity of strategies and actions building Connection to allow each to support, encourage and leverage off each other's strengths to achieve synergy and sustainability across the movement.

Our strategic plan is about leveraging the power of a collective force to influence and shape policy, including advocacy. These components come together to form our overarching approach: identifying Peace Champions, equipping and connecting Champion peacemakers (including partners, Church leaders) to be part of movements while addressing current needs and priorities so that an alternative vision and narrative is birthed through which conflict drivers can be reduced, obstacles to peace overcome and capacities for peace strengthened. In the next decades Helpers Of Africa Internationalthrough KGPA will play a catalytical, accompaniment role across all continents, regions and support specific countries currently experiencing conflicts globally. There will be investment in the development of capacity for conflict monitoring and investment in early warning systems. Based on the deductions from the scoping study and subsequent conversations, current demand would be addressed by raising standards within fragile conflict affected states with respect to conflict analysis and conflict sensitivity skills. This would lead to the development of peacebuilding strategies to sit within existing country strategies where appropriate. In addition, there is a recongnition that some conflicts transcend national boundaries and need a regional response resulting in a regional strategy. KGPA has a real potential to take this work to scale and expand it's sphere of influence globally.

External drivers are changing the landscape of humanitarian and development dramatically as conflict becomes increasingly widespread. Conflict is complex and influenced by powerful political, economic forces. KGPA, because of its ethos, experience and presence has a real opportunity to make a difference, expand the sphere of influence and achieve scale. To do this well and really punch above our weight, KGPA will has a focus and commitment to build relationships with a range of allies across faith communities, Governments, UN bodies, other international NGOs, key policy makers, academics and research institutions etc. This task will need creativity both in the kind, nature and scope of partnerships. As a key process of mobilising allies and influence, the Peacebuilding Hub will set up a Community Of Elders group (a multi sectoral, diverse group of key advisors) who can guide and influence KGPA response in addition to providing technical capacity as well. This community can enhance our opportunities and influence, guide us with their experience and potentially become advocates and allies for our response. We shall build our Funding opportunities for addressing conflict and building peace Globally, there is increased focus and investment in enabling stability, addressing extremism, understanding the interplay between peace, religion and development, responding to refugees, promoting freedom and human rights. While the opportunities are plentiful, there are some key issues to consider mainly Donors are more comfortable with funding interfaith or multi faith initiatives, fund initiatives that have scale and collaboration among different actors. For eg: Academia, Policy makers etc. Partners and Donors Potential to access funding from other donors Governments as they are key donors and allies for conflict resolution and peace building. In order to access such opportunities, KGPA has a stratergy regarding working with faiths and with non traditional partners to explore the potential to of community networking. KGPA response to peacebuilding is innovative in Conflict resolution and peace building is a crowded space with many agencies involved in efforts in many countries. KGPA is keen to avoid dublication but seeks to stand out in creativity but committed to learning from the expereinces of others. KGPA strategy innovation involves enabling grassroot movements of peacemakers. While 'movement building' is in itself not new, the accompaniment model, focus on the grassroots, special focus on women, investment in leadership development of Champions are innovative aspects in this outcome. This also draws on our experience in addressing sexual and gender based violence. Early Warning Systems refers to timely and appropriate prevention interventions. One of the strengths KGPA has is its access to local communities and the grassroots through partners and operational teams. This provides us with easy access to information. Developing and equipping local communities and churches to understand, identify and share information about potential risks is invaluable in the ability to prevent crisis, mobilise interest and action from key stakeholders. The Community of Elders advisory and technical support group has the potential to enable KGPA to become a credible, global agency involved in Peacebuilding

Our vision and aims in peacebuilding Vision through Communities vulnerable to and affected by conflict experience peace and the restoration of relationships Goal Faith based movements of peacemakers, churches and key stakeholders work together to prevent and respond to conflict. Faith-based movements of peacemakers across countries and globe to prevent and respond to conflict. KGPA has a strong internal capacity to understand and respond to conflict, Evidence of the key elements of the peacebuilding theology paper can be seen in theories of change for country peacebuilding strategies. KGPA understands and mitigates risk and impact of conflict corporately. Conflict sensitivity assessments have been completed in countries for programmes situated in conflict affected areas. KGPA staff and processes understand and model the qualities of a peacemakers in countries have a peacebuilding strategy and operational plan, Peacebuilding strategies are developed in countries, Country level early warning systems explored and being established, establishing Movements of peacemakers, Communities of peacemakers influence policy and peace processes, Communities of peacemakers model constructive inter-faith relationships. KGPA believes that while conflict may be manifested in many different ways it is primarily about broken relationships. Our approach is therefore focused on restoring relationships. We also believe that peacebuilding is not a purely technical affair but involves the peacemaker as a person as well. To be effective as a peacemaker the person must be able to model peaceful relationships. Our approach therefore is built on a foundation of developing, equipping and connecting individuals such that they become peacemakers. While broken relationships may be at the core of conflict the pursuit of peace can be frustrated by powerful conflict drivers and severe obstacles to peace. Nurtured, equipped and connected peacemakers work to overcome these conflict drivers and obstacles to peace in two mutually supporting ways. By creating cohorts of peacemakers that work together to create and sustain a new vision and narrative for peace so providing an alternative to narratives of conflict and competition. This new narrative energises and mobilises people into a movement, generating positive momentum that begins to challenge and transform negative norms thus driving societal change. By working programmatically through country level peacebuilding strategies to intentionally address conflict drivers and obstacles to peace. This process is based on developing an understanding of what is driving the conflict at a community level and what is preventing positive change. Action is then taken to deliberately address these conflict drivers and obstacles so reducing their force and creating an environment in which movements for peace can flourish. This deliberate programmatic response is supported by the development of conflict monitoring systems to identify threats and opportunities and ensure responses remain focused on the key conflict drivers. This country strategy led programmatic action focused on conflict drivers and obstacles to peace provides a depth of understanding of the issues and credibility which then feeds into and supports the development of movements through which impact at scale is achieved. Many countries in focus have borne the brunt of war and some continue to do so and we are committed to work in these contexts to build global peace. There is a real threat that growing insecurity and conflict threaten to further increase vulnerability of communities, setting back any developmental progress achieved with a disproportionate impact on people who are marginalised, suffering economic poverty. Recent years have also seen an increasingly complex interplay between religion and conflict. Consequently, KGPA through the strategy review process in decided to explore a response to conflict as a thematic area for the Incubation Hub. The focus of the work would be to enable peace; preventing and ending conflict would be a key component of the response. The remit for this work will entail Mapping the need for such a response, Pilot and learn from innovative strategies that can identify our unique potential, Explore the potential for a shaped response, clarifying our added value in this area, Present KGPA with a strategy for a corporate response to prevent and end conflict and enable peace. We shall embark on a corporate ‘strategy refresh’ process to focus on how we can do more of the things we do well, and how to do those things better, framed by seeking to be among top global servant-leaders in global-led community transformation, To be the global servant-leader in global-centred response to conflicts and disaster, To be the international development agency of choice for countries and world and beyond for the sake of the poorest people in the world.

Specific work packages will be launched to help unpack opportunities to achieve Embedding approach to impact, Clarifying our distinctive role and how to achieve success at scale, Our global-led community transformation, Our distinctive role and model for working in fragile states and conflict environments, Our distinctive role in Middle Income Countries, Our distinctive role in influencing, Our distinctive role in Communications for Development, Funding peace building in a Financial model and internal resource allocation, Creating a compelling fundraising proposition and positioning ourselves as the world leader in it, Using digital technology to better connect our beneficiaries and supporters, Articulating KGPA mission, vision, goals and strategic narrative, Our The Peacebuilding team will complete expected tasks using the learning to develop a strategy for Peacebuilding. This strategy makes clear contributions to several of the work packages detailed above but primarily to work packages. Peacebuilding and the relevance to global trends and commitments follow on from the Global Development Goals (MDGs) This Agenda provides a set of universally applicable goals that balances the three dimensions of sustainable development: environmental, social, and economic. Goal 16 is to "Promote just, peaceful and inclusive societies" and reflects the increasingly divided nature of the world where some regions enjoy sustained levels of peace, security and prosperity while others fall into seemingly endless cycles of conflict and violence. High levels of armed violence and insecurity have a destructive impact on a country's development, affecting economic growth and often resulting in long standing grievances among communities that can last for generations. Sexual violence, crime, exploitation and torture are also prevalent where there is conflict or no rule of law. This goal therefore aims to significantly reduce all forms of violence, and work with governments and communities to find lasting solutions to conflict and insecurity. KGPA peacebuilding work will contribute towards the achievement of global goals which Helpers Of Africa Internationalhas (so far) remained committed to spending a huge budget to promote. Our strategic objectives are inclusive and wholistic Strengthening global peace, security and governance; ● Strengthening resilience and response to crises; ● Promoting global prosperity; and ● Tackling extreme poverty and helping the world's most vulnerable. We shall strenghthen National Security Strategy and Strategic Defence and Security of countries accordingly "many drivers of instability are likely to persist over the medium to long term, including social inequality and exclusion, demographic changes, rapid and unplanned urbanisation, climate change, and global economic and other shocks." concluding that it would therefore focus its efforts on building stability overseas. Migration was seen as a major area of concern and consequently tackling conflict and improving stability and economic opportunity overseas was identified as part of the Government's long-term, comprehensive approach to migration.

We are committed to ensuring that their investment in countries of origin helped to reduce forced displacement and migration over the long term and promised to do much more to help refugees closer to their homes, delivering humanitarian aid to those forcibly displaced, providing education and livelihood opportunities. The Security Strategy also placed emphasis on strengthening early warning and crisis response mechanisms which were: "central to our efforts to prevent, mitigate and resolve conflict and instability overseas". Effort is to continue in support of women's rights the attainment of which was listed as a global priority and seen as: "one of the greatest prizes of the 21st century, and central to greater peace and stability overseas"; Helpers Of Africa Internationalwould continue to promote the inclusion of women in peacebuilding discussions. Similar emphasis was placed on maintaining the momentum achieved with the Preventing Sexual Violence Initiative with a promise to extend its reach and implementation. The localisation agenda is a comfortable and preferred one for A key thematic area for political leadership to prevent and end conflict. We shall host special sessions and roundtable discussion with stakeholders for Peacebuilding Architecture outlines considering that Peacebuilding and conflict resolution is not left as an afterthought: under prioritized, under resourced and undertaken only after the guns fall silent. ● Sustaining peace, must be the principle that flows through all our engagements, informing all our activities — before, during and after violent conflicts — rather than being marginalized. A broader, comprehensive approach of sustaining peace is called for, all along the arc leading from conflict prevention, through peacemaking and peacekeeping, and on to post-conflict recovery and reconstruction. The success of such an approach critically relies on uniting the peace and security, human rights and development pillars. Fostering inclusive national ownership. ● After two decades of steady decline, major civil conflicts are once more on the rise. Worse, those conflicts have become more complex, increasingly fragmented and intractable. The drivers of violence — some radically new, some long-standing — raise serious implications for Global gorverning organizations, international and regional efforts to support national processes to move beyond conflict. ● The national responsibility to drive efforts to sustain peace must therefore be broadly shared across all key social strata and divides. A wide spectrum of political opinions and national actors, in particular women and young people, must be heard. ● Sustaining peace is, in essence, about individuals and groups learning to live together without resorting to violence to resolve conflicts and disputes. It must be people-centred and inclusive in approach, and provide a vision of a common future to national stakeholders, public and private. External actors, including global bodies and organizations accompany and facilitate, but cannot impose peace.Assessing Current Internal Demand Scoping Study A scoping study of current practice and demand to prioritize since we shall be working in many fragile and conflict affected situations.

The scoping study however shows that only a handful of countries actively work on conflict issues as part of a peacebuilding approach and of the remainder that were working “in” but not “on” conflict , very few conduct any form of formal conflict sensitivity assessment. Since the scoping study there has been increased interest in working “on” conflict and several countries are now looking to include peacebuilding as part of their country strategies and Identify Priorities Discussions with CRs and with regional heads highlighting the priority areas and issues such as Work within conflict affected environments can be classified in- ‘Around’ - where one decides to work in areas that are not affected by the conflict, ‘in’ - where one decides to work in the areas affected by conflict but not intentionally on conflict drivers, for this conflict sensitivity is essential or there is a risk that the project could ‘do harm’ and finally ‘on’ - where you decide to focus intentionally on addresing conflict dynamics in order to transform the conflict. Our immediate priority is to raise the level of conflict sensitivity throughout the area as the baseline of our quality standard on conflict. Until this is in place there is a risk that any peacebuilding work will be undermined by poor conflict sensitivity elsewhere. Priority countries for conflict sensitivity work

We shall advocate for countries to buy in on peacebuilding as a specific part of its country strategy and so is the priority for support; the focus being to help grow a network of inspired peacebuilders that can work through the local churches. Although not a specific part of the country strategy. Some countries also suffers from tensions along faith lines and would benefit from support. KGPA will support and fund need to support the monitoring of potential conflict situations and the development of appropriate contingency plans and monitoring situations in-country support developing monitoring and early warning systems and in developing possible response options is highlighted as a priority. Proposed Response Common to all is the requirement to raise standards with respect to conflict sensitivity. Inherent in this is the need to understand conflict drivers and to explore the interaction between drivers and country strategies, programmes and projects. To be sustainable, conflict analysis/sensitivity skills will be developed within regions and countries rather than centrally. This will require tools and training resources to be developed and countries to be supported as they apply these tools and grow in competence and confidence. An appropriate first step would be for all countries within fragile or conflict affected situations to use the conflict sensitivity checklist to assess their current levels of conflict sensitivity. This sensitivity audit would then allow support to be focused where most needed. An early outcome therefore is to embed conflict sensitivity requirements within the Conflict Quality Standard and within relevant reference and policy documents, supporting these requirements with appropriate resources and training. A natural evolution from this work to understand conflict drivers and the interaction with program is the development (where appropriate) of country peacebuilding strategies that work deliberately to reduce these conflict drivers and overcome obstacles to peace. In doing this, those countries that decide to work deliberately on conflict will be countering the tendency of violent conflict to undermine development gains and hamper the achievement of wider country strategy goals.

These peacebuilding objectives will be pursued directly by KGPA by partners and, where identified (and developed), through cohorts or movements of inspired peacebuilders. In enabling these cohorts lessons emerging from the ME pilot would be applied. The peacebuilding strategies would then lead to targeted program that deliberately addressed conflict drivers. The development of peacebuilding strategies as a subset of their country strategies is therefore an outcome for high priority countries. Acting directly as part of a peacebuilding strategy introduces a level of intentionality and focus to our actions, deepens our understanding of conflict dynamics and, providing us with community level evidence and experience, gives us authority when seeking to influence key decision makers. In tandem with the development of country peacebuilding strategies will be the need to develop monitoring and early warning systems. These would support as they try to identify and react proactively to emerging threats or opportunities with responses derived from contingency plans. These monitoring and warning systems would ensure that strategies remain relevant to the context as it evolves. Exploring a niche response; the Middle East gathering. Context With the reality that there is a devastating increase in violent intra and inter-state conflict globally building on and catalysing historic sectarianism, there is an urgent need to focus our attention towards those voices of peace within communities in conflict. History teaches us that societal and systemic change often emerges when a critical mass of like minded people birth into a movement and begin a process of transformation and discipleship from the bottom up. Movements of people, whether it be movements for (positive or negative) change in civil, gender, minority or ideological issues, often then become the irritant to societal norms, slowly bringing about change.

With this in mind and leaning on Hafsat Abiola's words that: "Peace comes from being able to contribute the best that we have, and all that we are, toward creating a world that supports everyone. But it is also securing the space for others to contribute the best that they have and all that they are." it becomes clear that in order to affect the destructive state of fragile, sectarian societies, a different narrative and voice needs to develop to challenge the one exacerbating violent conflict. It's in this context that KGPA Peacebuilding Hub carried out a pilot initiative to explore how this could be done, focusing on the countries as the pilot region. A pilot initiative to enable the start of a movement of peacebuilders in countries will be launched. The pilot recognised that in order to find our space in addressing the deep sectarian divisions amongst societies in countries in conflict, we needed to be with those who are already working in the field. The will be to gather grassroots peacebuilders, across faiths, denominations, genders and age-groups to envision, network and discover the possibilities together. The main purpose of the gathering was to create an environment where relationships could be developed. The gathering was held over a period of days, hosted by the Peacebuilding Hub and attended by the countries Response team, with peacebuilders from countries (all of which KGPA has some form of presence in) across the region, representing the different faiths and demographics of society. The process adopted for the gathering focused on: ● Building relationships amongst participants, facilitating the creation of a sense of community by storytelling; acknowledging our past, present and re-imagining the future. ● Exploring areas of possibility and common areas of work at the regional and country level. ● Discussing the possibilities for this group as a 'Community of Peacebuilders' ● Agreeing actions going forward (incl. KGPA), and making commitments The core outcome of the gathering was to birth a nascent community of refreshed, connected peacebuilders, willing to explore shared stories and experiences by journeying together, so that they can collectively transform the sectarianism in their communities. KGPA will facilitate a safe, creative space so that people could envision a different future and begin taking first steps towards what they had reimagined. We shall set-out a way forward for KGPA to focus its engagement with this particular community in ● Journeying with individual peacebuilders to support them in discovering and enabling their visions and needs to be effective, resilient peacebuilders and focusing on developing the next generation of peacebuilders, importance of ensuring that women's voices were heard in peacebuilding. Priority therefore will be towards younger peacebuilders (ages 20 - 40) and towards women . This will be done by learning from and adopting relevant aspects of KGPA Inspired Individuals programme, focussing on coaching and mentoring these individuals. ● Country level cohorts where there is a core group of individuals and partners who would benefit from a more localised community to continually connect into and build a movement from. KGPA would look at how it can facilitate and enable the initiation and sustainability of such a group. ● Regional Gatherings: KGPA will facilitate gatherings at the regional level where there are wider, cross-cutting thematic areas of exploration and learning. For example offering the Healing of Memories workshop to those across the region that identified their own personal trauma and stories as an area they wanted support in exploring and/or transforming to better their ability to do peacebuilding.

We shall package and launch Architects of Peace: Visions of Hope in Words and Images focus on Youth and Women follows the priorities identified in the SDG's and is widely recognised as being key to the success of any Peacebuilding programming. The commitments on Women, Peace and Security around Youth in Peacebuilding can be found here: Enabling opportunities for Advocacy at the International level. Having a focus on how KGPA can provide platforms for those at the grassroots to speak into foreign policy and understanding at the government level for the sake of addressing drivers and root causes of the conflicts they are trying to transform. The strategic objective around Peacebuilding in the wider Response strategy to be developed. It has also provided a framework for replicating this form of initiative in all other regions added value was identified by participants as being a bridge and enabler for those working in peacebuilding to connect, learn, network and be in community with one another. With the outcomes of the Peacebuilders gathering, KGPA experience in journeying with Inspired Individuals and other initiatives such as building sexual violence survivor movements there is a natural fit in adopting the success and learning of this to building and enabling movements of Peacebuilding strategy. It also enhances the prioritisation of the localisation agenda Peace building strategy. The scoping exercise, experience and learning over years has enabled us to articulate a peacebuilding strategy for KGPA. The proposed strategy frame with an emphasis on learning and evaluating outcomes consistently. This in turn will enable KGPA to develop credibility and clarify the potential for both scale and impact. Through KGPA capacity building will have the confidence and clarity to scale out the peace building work across the organization and Nations Peacebuilding in a long term commitment. There are main components to the strategy: 1. Our theological framework for peacebuilding. 2. KGPA has institutional capacity for conflict sensitivity. 3. Prioritisation of countries. 4. Enabling movements of peacemakers; a niche response. 5. Overview of our approach to peacebuilding. 6. Strategic opportunities and choices. 7. Demonstrating impact. 8. Resourcing and budgeting.

1) Our Theological Framework Background The development of a theological framework for peacebuilding has been a major focus for the Peacebuilding Hub and forms the theological foundation for this strategy. The framework outlines some of the key theological issues, positions and approaches that are important in the pursuit of peace, to which we can refer and apply in our work. It is intended for use by KGPA, and therefore expresses Christian ideas about peacebuilding. It is rooted in our theology of mission, our understanding of our call to participate in God's mission to redeem and restore his creation, and in particular to the goal of restoring relationships between people. The executive summary for the framework can be found here. In this strategy document we will highlight the key themes and concepts explored and describe how these will shape our peacebuilding and conflict work. Outline The framework starts by describing the Christian understanding of the world and the importance of the Biblical story in motivating and shaping the Christian pursuit of peace. It examines what we mean by peace and justice, and the characteristics of the peaceful world we are seeking. It then discusses the importance of discipleship to peace processes that are truly transformative before exploring the characteristics of a peacebuilder, focusing elements: ● Repentance ● Forgiveness ● Making space in oneself for others ● Healing of memory. The movement towards the embrace is a journey that both sides of a conflict need to take. ● Staff and teams who will be engaging in peacebuilding work specifically will be encouraged to read and grapple with the issues in the framework. ● A resource with contextual Bible studies around the key concepts will be developed. ● Short visual resources, drawing out the specific sections on the characteristics and journey of a Peacemaker will be developed. ● Ongoing engagement with the Theological Panel, ET, relevant Board committees and staff in conversations that arise from the framework. KGPA has institutional capacity for conflict sensitivity. Actors in conflict affected areas are increasingly realising that their inventions will have unintended impacts on the context within which they are working and hence have grown aware of the need for conflict sensitivity. Strengthening expertise to institutionalise and implement conflict sensitivity at headquarters and local levels, to practically and sustainably improve organisation-wide conflict sensitivity needs to be a priority for Tearfund. A self assessment process to ensure Tearfund's conflict sensitivity understanding and capacity will be initiated to reflect on the following: ● Institutional commitment ● Policies and strategies ● human resources – staff competencies,skills and understanding ● learning and knowledge management ● integration into the programme cycle ● external relations. 3. Prioritisation for country support.

Process of prioritization. To address current demand from countries it will be necessary to priorities support. The following factors are therefore proposed as a way of selecting countries to support: Support will be given to those countries where major crisis is a priority and where they are willing to commit some of their own resource to the work as we Impact the existing work. The conflict has or is highly likely to undermine existing achievements preventing progress towards country strategy objectives, Presence of other peacebuilding actors. There is a balance whereby individuals, partners or potential partners exist with and through whom KPGAs could work and where there are so many other actors such that KGPAs engagement would add little to an already crowded space. Match with KGPAs Niche Capabilities- As a faith based part of our additional value is the ability to speak into issues of faith and to work with faith leaders at the local, national and global level. Priority would therefore be given to conflicts where faith was a significant issue within the conflict dynamics or where faith leaders, through their perceived legitimacy and authority could have a significant influence on the conflict dynamics. Proposed Approach to Meeting Current Demand Based on the deductions from the scoping study and subsequent conversations current demand would be addressed by raising standards within fragile and conflict affected states with respect to conflict analysis and conflict sensitivity skills. This would lead to the the potential for both impact and scale are great. There are two similar but slightly different approaches KGPAs can take and they come with varying potential and risk. It is important to note that the nature of sectarian conflict is on the rise in a phenomenal scale and KGPAs may be shortsighted to ignore that phenomenon in many places. The paths outlined below depend on the appetite KGPAs has for working in a new ways, with new people in these contexts. Strategic new and multi-sectoral alliances KGPAs really embraces the opportunity to diversify its partnerships with new allies across faiths, joining movements for change that may not be faith based, develop relationships with new kinds of partners like corporates (industry) in order to both influence them and mobilise investment, then there is a real opportunity to work in new and creative ways. This also has the potential to enable us to influence others and break down apprehensions and misconceptions about communities of faith.

This does come with the risk of new allies and apprehension from our traditional support base. Some of the risks can be mitigated by setting clear criteria for alliances, developing partnership agreements that are explicit about the details of association, roles and common tasks. Such alliances would be deemed meaningful and pertinent to contexts, where the predominant faith is Christianity and KGPAs has the potential to work with a large number of Christian allies, there may be a need to just expand current relationships to ensure influence and scale. The risk here is that this process could ignore the trend towards increased division across tribes, race and ethnicity especially when our own faith communities are divided around these issues as is evident. Even in this context, it would be important to work with strategic allies to ensure influence and avoid isolation. Over the next three year period, KGPAs will explore the learning, assess impact and influence which would be critical in presenting opportunities for scale in the peacebuilding journey going forward. A key ingredient within both approaches would need KGPAs to really invest in it's opportunity for advocacy, influencing policy thinking and implementation.

Peacebuilding has to be a long term initiative with a long term vision. It is about changing minds, hearts and actions. The proposed strategy has a long term frame so that concerted effort can be made to learn, build up credibility and become confident about our added value in this space. The outcomes of the future has a strong internal capacity to understand and respond to conflict. We shall Prioritize KGPA countries have a peacebuilding strategy and operational plan. We shall seek to create global Movements of peacemakers KGPA has gained credibility through robust evidence for its peacebuilding work plan and evidence strategy will be developed separately to support this peacebuilding strategy. The Monitoring and Evaluation plan will focus on tracking actions and outcomes from the strategy which will be reported on regularly as part of the quarterly reporting mechanism while the evidence plan will focus more on gathering evidence to support (or refute) the theory of change that makes up our peacebuilding approach; this is likely to include a mix of research and evaluations. Both will draw on a mix of qualitative and quantitative data and will be informed by practices and experience gained through the work on HIV and Sexual Violence. Wherever practical mobile data collection techniques will be used , in particular for quantitative data, as this provides more timely and reliable information.

We are determined to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and to reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of nations large and small, and to establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and to promote social progress and better standards of life in larger freedom, and for these ends to practice tolerance and live together in peace with one another as good neighbours, and to unite our strength to maintain international peace and security, and to ensure, by the acceptance of principles and the institution of methods, that armed force shall not be used, save in the common interest, and to employ international machinery for the promotion of the economic and social advancement of all peoples, have resolved to combine our efforts to accomplish these aims. We the peoples of the world determined to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and to reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of nations large and small, and to establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and to promote social progress and better standards of life in larger freedom, and for these ends to practice tolerance and live together in peace with one another as good neighbours, and to unite our strength to maintain international peace and security, and to ensure, by the acceptance of principles and the institution of methods, that armed force shall not be used, save in the common interest, and to employ international machinery for the promotion of the economic and social advancement of all peoples, have resolved to combine our efforts to accomplish these aims. Development of peacebuilding strategies to sit within existing country strategies where appropriate. In tandem with this strategy process would be the development of capacity for conflict monitoring and investment in early warning systems. Work "in" conflict would continue but the conflict analysis would ensure that this continues in a conflict sensitive manner.

While this approach will provide a level of intentionality and focus to KGPAs work it's impact if conducted in isolation is likely to be limited by the resources available to countries. Impact at scale will therefore require working with key allies, churches, individuals and organisations, to enable movements of peacebuilders. Due to people status of faith based organisation it is likely that church and faith leaders (at local and national levels) will be important allies and, due to their position as gatekeepers, working with them will be an early requirement. Our ultimate reach will however be dependent on the inclusiveness and therefore reach of the movements. Enabling Movements of Peacemakers; our niche response Our strong Framework for adopting this approach include Peacebuilding Hubs, with the Geographical teams, will enable the development of 'Movements of Peacemakers'. The process below provides a framework for the exploration and development of the same. The framework is focused on the following four stages, Adopting the model of 'Gathering' as a first step to enable the creation of 'Webs' of peacemakers across countries and regions. The vision being that we would see bridges being built across people and divides and the birth of communities of peacemakers. Our strategic plan also enable a mapping of the peacebuilding work already being done at the community, country and regional levels with the potential to explore successes and challenges. From the initial gathering this would then lead to: Focussing on and journeying with young people who have potential, in both being, becoming and engaging in peacebuilding through a coaching and mentoring relationship. This will draw from the Inspired Individuals model or personal development but develop into a more bespoke process for youth peacemakers. Alongside this Identifying, enabling and sustaining a "Critical Yeast" of peacemakers, with a real focus and investment in women and girls, as a cohort that works towards the transformation of their societies. Ensuring a diverse and safe space that includes peacemakers across faiths, denominations, genders and generations. Also ensuring that these cohorts and communities link into the wider work being done in peacebuilding across the country/region, always seeking to be aware of and build on what is already out there. As this develops KGPAs role is then focused on identifying where/if in the long-term it can be apart of the deepening and strengthening of these communities and how to support and enable practical actions for change. This could include actions around advocacy or strategic alliances that have influence to bring about change.

This framework is a guide for this aspect of KGPAs Peacebuilding work going forward and where appropriate and agreed as relevant, can be adopted and replicated. Specifically, the Peacebuilding hub will explore this in Developing and implementing the strategy for the country and global movement of Peacebuilders identifying lessons from this process. We shall Explore opportunities for a similar process, building on insights gained initially . Our Overview of KGPAs approach to Peacebuilding KGPA believes to be effective in bringing peace people need to become peacemakers rather than simply do peacebuilding activities. This leads us to a part approach that simultaneously develops people as peacemakers, equips them with the appropriate skills and expertise and connects them with each other to form movements and with decision-makers to achieve influence. This approach applies equally to our work to enable movements of peacemakers and to implementing country level peacebuilding strategies with encouragement and support to develop peacemakers as individuals within movements, within partners and within our own staff.

We shall advocate a 3 component philosophy Nature, Equip and Connect .'Nurture' would therefore include self-reflection on how one's own worldview and experiences have shaped perceptions of conflict actors and of conflict dynamics while 'Equip' would develop and share the analysis, assessment and planning resources and skills necessary to deepen understanding and shape suitable responses; 'Connect' would allow each to support, encourage and leverage off each other's strengths to achieve synergy and sustainability across the movement including with country strategies and with partner activities. These two elements (enabling movements of peacemakers and support to countries to help them meet their current demand) come together to form our overarching approach: developing equipping and connecting peacemakers to work as part of movements while addressing current needs and priorities such that an alternative vision and narrative is constructed through which conflict drivers can be reduced, obstacles to peace overcome and capacities for peace strengthened. Strategic opportunities and choices. Key allies and accompaniers KGPA interest and investment in peacebuilding is extremely relevant to the challenges faced by many communities at this current time. Over the last years, the Peacebuilding Hub has connected with and begun to explore the potential to work with strategic allies, as at the very foundation for this work lies the need to reach out and work together with others. It is critical to ensure that KGPA invests in building relationships with a range of allies across our own faith community, other faith communities, Governments, Global bodies, other international NGOs, key policy makers, academics and research institutions etc. This process may need creativity in partnerships both in the nature of partnerships and in their scope. The Peacebuilding Hub has already been mapping potential allies.

In addition to mapping allies, the Peacebuilding Hub is conscious that paths towards peace have been explored by many others and there is a lot of experience outside KGPA that we need to learn from and draw down. To boost capacity and increase influence, the Peacebuilding Hub will set up a community of elders who can guide and influence KGPA's response in addition to providing technical capacity as well. This group will provide one on one technical support and also meet annually to draw out learning and influence proposed actions going forward.

Specific funding areas and areas of support

2) KGPA will support and fund nation and global Research capacity (eg Women, Peace and Security Unit)
3) KGPA will support and fund nation and global Peace negotiation experts
4) KGPA will support and fund nation and global Regional experts
5) KGPA will support and fund nation and global Faith leaders and communities
6) KGPA will support and fund nation and global Youth mentors (eg Alliance for peacebuilding)
7) KGPA will support and fund nation and global Inspired peacemakers.
8) KGPA will support and fund nation and global Policy makers (UN/WB Peacebuilding Fund)
9) KGPA will support and fund nation and global Former political advisors involved in peacebuilding processes.
10) KGPA will support and fund nation and global Former political prisoners peace movements
11) KGPA will support and fund nation and global Military (Christian Fellowships, Chaplains)
12) KGPA will support and fund nation and global existing Peacebuilding frameworks.
13) KGPA will support and fund nation and global the scope of peacebuilding
14) KGPA will support and fund nation and global The political context of peacebuilding
15) KGPA will support and fund nation and global Essential features of peacebuilding
16) KGPA will support and fund nation and global Phases of peacebuilding
17) KGPA will support and fund nation and global Peacebuilding's relation to conflict prevention, peacekeeping, peacemaking, humanitarian and development assistance
18) KGPA will support and fund nation and global Setting peacebuilding priorities
19) KGPA will support and fund nation and global to solve The need for conflict sensitivity
20) KGPA will support and fund nation and global Challenges of peacebuilding
21) KGPA will support and fund nation and global planning for peacebuilding
22) KGPA will support and fund nation and global International community planning processes
23) KGPA will support and fund nation and global Constraints to effective planning
24) KGPA will support and fund nation and global International and regional actors involved in peacebuilding
25) KGPA will support and fund nation and global Women's participation in peacebuilding
26) KGPA will support and fund nation and global resources for peacebuilding
27) KGPA will support and fund nation and global The regional, country peacebuilding architecture
28) KGPA will support and fund nation and global funding for peacebuilding.
29) KGPA will support and fund nation and global Support from the Peacebuilding Support Offices
30) KGPA will support and fund nation and global The evolution of peacebuilding:
31) KGPA will support and fund nation and global key definitions and related concepts
32) KGPA will support and fund nation and global To enhance its practical relevance.

33) KGPA will support and fund nation and global establishing security, building confidence in a political process, delivering initial peace dividends and expanding core national capacity.
34) KGPA will support and fund nation and global Support to basic safety and security, including mine action, protection of civilians, disarmament, demobilization and reintegration, strengthening the rule of law and initiation of security sector reform
35) KGPA will support and fund nation and global Support to political processes, including electoral processes, promoting inclusive dialogue and reconciliation, and developing conflictmanagement capacity at national and subnational levels
36) KGPA will support and fund nation and global Support to the provision of basic services, such as water and sanitation, health and primary education, and support to the safe and sustainable return and reintegration of internally displaced persons and refugees
37) KGPA will support and fund nation and global Support to restoring core government functions, in particular basic public administration and public finance, at the national and subnational levels
38) KGPA will support and fund nation and global Support to economic revitalization, including employment generation and livelihoods (in agriculture and public works) particularly for youth and demobilized former combatants, as well as rehabilitation of basic infrastructure.
39) KGPA will support and fund nation and global Some countries may need peacebuilding initiatives aimed at their particular conflict drivers, such as drugs and crime, illegal exploitation of natural resources, or land reform. Conflict drivers can also include crosscutting issues such as lack of respect for human rights, bad governance, lack of social integration and cohesion, lack of gender equality, and HIV/AIDS.
40) KGPA will support and fund nation and global -broad agenda, peacebuilding in a specific country situation will not involve all these activities. Instead, it should be a selective, prioritized and sequenced strategy, tailored to the specific country circumstances.
41) KGPA will support and fund nation and global prioritization is essential to effective peacebuilding. Priorities will vary from country to country, at different moments in time, and between different financing mechanisms.
42) KGPA will support and fund nation and global planning capacity in post-conflict countries is often limited, or not well coordinated between missions and Country Teams. UN planning is often insufficiently results-oriented
43) KGPA will support and fund nation and global to strengthen tools for implementing through assigning leadership, building judicial response expertise, and calling for improved monitoring and reporting on conflict-related sexual violence.38
44) KGPA will support and fund nation and global women's inclusion from peacebuilding planning and institutions
45) KGPA will support and fund nation and global to develop effective financial and institutional arrangements to guarantee women's full and equal participation in the peacebuilding process.
46) KGPA will support and fund nation and global post-conflict set a peace agreement, the proliferation of small arms and light weapons, coupled with the proximity of demobilized soldiers, may increase the incidence of sexual and gender-based violence.
47) KGPA will support and fund nation and global: Addressing the particular impact of conflict on women's recovery – especially sexual and gender based violence; • Supporting women's full and equal participation in and ownership of peacebuilding and decision-making processes; and
48) KGPA will support and fund nation and global Ensuring that national priorities for recovery – political, social and economic – redress inequalities of the past and positively influence gender relations and contribute to gender equality.
49) KGPA will support and fund nation and global peacebuilding architecture The Peacebuilding Commission, Peacebuilding Support Office and Peacebuilding Fund are part of a broader peacebuilding architecture.
50) KGPA will support and fund nation and global networks that brings together all the relevant actors, including international donors, the international financial institutions, national governments, and troop contributing countries to promote greater coherence; it marshalls resources for peacebuilding; and works with national actors to propose integrated strategies for post-conflict peacebuilding and recovery.
51) KGPA will support and fund nation and global Respond to imminent threats to the peace process and support peace agreements and political dialogue;
52) KGPA will support and fund nation and global Build or strengthen national capacities to promote coexistence and peaceful resolution of conflict;

53) KGPA will support and fund nation and global Re-establish essential administrative services.
54) KGPA will support and fund nation and global Initiate economic revitalization and generate peace dividends for the population at large;
55) KGPA will support and fund nation and global Expanded PBF priority areas now include initiatives that deliver immediate peace dividends to the population at large; funding window structure is replaced with two flexible funding facilities;
56) KGPA will support and fund nation and global Synergy between the Peacebuilding Commission and the PBF is improved through greater alignment of planning documents.
57) KGPA will support and fund nation and global Clearer application criteria, making application and approval time faster;
58) KGPA will support and fund nation and global A clear management framework that states who is responsible for achieving peacebuilding results at the project, national and global levels;
59) KGPA will support and fund nation and global An opportunity for NGOs to receive funding through partnerships with a recipient organizations;
60) KGPA will support and fund nation and global Results-based reporting to States and donors;
61) KGPA will support and fund nation and global Documentation of lessons learned to enable the global and its partners to improve future performance.
62) KGPA will support and fund nation and global of reference and guidelines can be found at Other sources of funding for peacebuilding The principal sources of pre-positioned pooled funding, apart from the, include:
63) KGPA will support and fund nation and global The Central Emergency Responses
64) KGPA will support and fund nation and global: Support measures to improve governance and institutional performance in countries emerging from, in, or at risk of sliding into, crisis or arrears;
65) KGPA will support and fund nation and global Support the reconstruction and development of countries prone to, in, or emerging from conflict
66) KGPA will support and fund nation and global for Crisis Prevention and Recovery.
67) KGPA will support and fund nation and global Support of the Special Missions and Other Activities Related to Preventive Diplomacy and Peacemaking.
68) KGPA will support and fund nation and global establishment to support local, national, and regional efforts to combat violence against women. Support from the Peacebuilding Support Office does not directly implement peacebuilding initiatives, but it supports those who do.
69) KGPA will support and fund nation and global Training: can advise on what training courses on peacebuilding are available
70) KGPA will support and fund nation and global Knowledge management to run the web-based Peacebuilding Community of Practice, uniting peacebuilding practitioners across the globe electronically. It provides realtime responses to questions from the field, online access to peacebuilding information, monthly newsletters and an annual workshop. The Community of Practice is currently open to staleholders staff members only.
71) KGPA will support and fund nation and global Research: will not normally sponsor research, but it brings together institutions, policy makers and practitioners to promote greater relevance and usefulness in peacebuilding research should be able to direct to the right place for advice on:
72) KGPA will support and fund nation and global Assessment, planning and monitoring tools • Conflict analysis and planning • Thematic areas of peacebuilding • Peacebuilding resources (civilian capacity, volunteers, etc.) 45 The term peacebuilding first emerged through the work of Johan Galtung over 30 years ago.
73) KGPA will support and fund nation and global Approaches to Peace: Peacekeeping, Peacemaking, and Peacebuilding," Galtung called for the creation of peacebuilding structures to promote sustainable peace by addressing the "root causes" of violent conflict and supporting indigenous capacities for peace management and conflict resolution.
74) KGPA will support and fund nation and global in peace studies and among practitioners of conflict transformation in the following decades, but its widespread acceptance had to await the end of the Cold War.
75) KGPA will support and fund nation and global "peacebuilding" came to the forefront of intergovernmental preventive diplomacy, peacemaking and peacekeeping. Encompassing a wide range of activities, peacebuilding was defined as post-conflict "action to identify and support structures which tend to strengthen and solidify peace in order to avoid a relapse into conflict."
76) KGPA will support and fund nation and global Peacekeeping, Peacemaking, and Peacebuilding,"

77) KGPA will support and fund nation and global Peacemaking is action to bring hostile parties to agreement, essentially through such peaceful means.
78) KGPA will support and fund nation and global Peacekeeping is the deployment of a global presence in the field.
79) KGPA will support and fund nation and global Peacekeeping as a technique that expands the possibilities for both the prevention of conflict and the making of peace.
80) KGPA will support and fund nation and global The present report in addition will address the critically related concept of post-conflict peacebuilding - action to identify and support structures which will tend to strengthen and solidify peace in order to avoid a relapse into conflict.
81) KGPA will support and fund nation and global Preventive diplomacy seeks to resolve disputes before violence breaks out; peacemaking and peacekeeping are required to halt conflicts and preserve peace once it is attained. If successful, they strengthen the opportunity for post-conflict peace-building, which can prevent the recurrence of violence among nations and peoples…"
82) KGPA will support and fund nation and global Demilitarization, the control of small arms, institutional reform, improved police and judicial systems, the monitoring of human rights, electoral reform and social and economic development can be as valuable in preventing conflict as in healing the wounds after conflict has occurred.
83) KGPA will support and fund nation and global The implementation of post-conflict peacebuilding can, however, be complicated. It requires integrated action and delicate dealings between the global agencies and the parties to the conflict in respect of which peace-building activities are to be undertaken."
84) KGPA will support and fund nation and global Peace-building may involve the creation or strengthening of national institutions, monitoring elections, promoting human rights, providing for reintegration and rehabilitation programmes, and creating conditions for resumed development.
85) KGPA will support and fund nation and global Peace-building does not replace ongoing humanitarian and development activities in countries emerging from crisis. It aims rather to build on, add to, or reorient such activities in ways designed to reduce the risk of a resumption of conflict and contribute to creating the conditions most conducive to reconciliation, reconstruction and recovery."
86) KGPA will support and fund nation and global "Peace-building is a term of more recent origin that, as used in the present report, defines activities undertaken on the far side of conflict to reassemble the foundations of peace and provide the tools for building on those foundations something that is more than just the absence of war. Thus, peace-building includes but is not limited to reintegrating former combatants into civilian society, strengthening the rule of law (for example, through training and restructuring of local police, and judicial and penal reform);
87) KGPA will support and fund nation and global improving respect for human rights through the monitoring, education and investigation of past and existing abuses; providing technical assistance for democratic development (including electoral assistance and support for free media); and promoting conflict resolution and reconciliation techniques."
88) KGPA will support and fund nation and global preventing the outbreak, the recurrence or the continuation of armed conflict and therefore encompasses a wide range of political, development, humanitarian and human rights programmes and mechanisms. This requires short and long-term actions tailored to address the particular needs of societies sliding into conflict or emerging from it.
89) KGPA will support and fund nation and global on fostering sustainable development, the eradication of poverty and inequalities, transparent and accountable governance, the promotion of democracy, respect for human rights and the rule of law and the promotion of a culture of peace and non-violence."
90) KGPA will support and fund nation and global "Negative peace" refers to the absence of direct, or "hot" violence, which refers to acts that impose immediate harm on a given subject or group. Adapt Peacebuilding: Bogota and Myanmar-based nonprofit that specialises in systems, participatory, and complexity-based methods for building more peaceful societies.
91) KGPA will support and fund nation and global investing in human capital;
92) KGPA will support and fund nation and global supporting macroeconomic stability and debt sustainability;
93) KGPA will support and fund nation and global creating jobs and economic opportunities;
94) KGPA will support and fund nation and global building community resilience and preparedness, especially regarding the impacts of climate change and environmental degradation;
95) KGPA will support and fund nation and global engaging on justice and the rule of law;

96) KGPA will support and fund nation and global This centers on the KBG's role as a development actor committed to sustained and long-term engagement that can support national systems, strengthen core state functions, and build institutional resilience and capacity.
97) KGPA will support and fund nation and global developing approaches to dealing with the security sector within the WBG's mandate and comparative advantage. Throughout engagement in settings, a special focus will be put on gender in line with the Gender Strategy.
98) KGPA will support and fund nation and global The strategy stresses the KBG's role in engaging with a wide array of clients from the public and private sectors—including national, subnational, and local governments; local micro-, small-, and medium-sized enterprises (MSMEs); and regional and multinational private sector firms—and leveraging financing to incentivize investments and influence critical policy reforms that address the root causes of fragility.
99) KGPA will support and fund nation and global Strategy recognizes the importance of pursuing public and private sector solutions to help create jobs, deliver services, foster social cohesion, and promote inclusive economic growth. Achieving impact at the market and sector levels requires an integrated KBG approach.
100) KGPA will support and fund nation and global operate in a complementary manner, both upstream and downstream, to deliver investments and help create jobs economic instability is a door for war.
101) KGPA will support and fund nation and global The strategy therefore emphasizes the KBG's role in strengthening the enabling environment for private sector-led growth and upstream project development, supporting local private sector actors, enhancing conflict-sensitive approaches to investments, and helping catalyze and de-risk investments in FCV settings.
102) KGPA will support and fund nation and global Creating Markets strategy, which is critical in the context, focuses on looking beyond individual projects to impacts on entire markets; this requires a sectoral focus for project development and advisory work.
103) KGPA will support and fund nation and global Strategy highlights the importance both of a calibrated response to risk that ensures full compliance with KBG safeguards, and a higher tolerance for the likelihood that some risks will materialize during program implementation.
104) KGPA will support and fund nation and global Working in settings often carries significantly higher risks, such as (i) the physical security risk to staff, borrower counterparts, and beneficiaries;
105) KGPA will support and fund nation and global high risk of violence against vulnerable groups weak or nonexistent institutional capacity, which can negatively affect development impact;
106) KGPA will support and fund nation and global environmental, social, and governance (ESG) risks;
107) KGPA will support and fund nation and global fiduciary risks, including fraud and corruption. Elevated risks require more proactive risk management, combined with targeted and rapid support when risks do materialize. More specifically, to pursue projects in settings that are characterized by increased political and conflict risks, market uncertainty, and high operational costs, will appropriately balance the increased risks and costs of expanded engagement with diversification of programs across sectors and countries of operation. Operationalizing the Strategy
108) KGPA will support and fund nation and global will carry out the Strategy, the KBG has measures to strengthen its effectiveness in peace building settings.
109) KGPA will support and fund nation and global On policies, will update the framework with regards to engagement in humanitarian crises and forced displacement situations, and engagement on approaches to dealing with security and military actors within its mandate and comparative advantage. The aim is to ensure that policies, processes, and practices are fit-for-purpose, streamlined, and flexible for peace building settings.
110) KGPA will support and fund nation and global On programming, the strategies and operations will more systematically address the drivers of peace building in their design and will adapt implementation and supervision approaches to the complex and rapidly changing dynamics of peace building settings.
111) KGPA will support and fund nation and global to enhance its operations and ensure coordinated approaches across its institutions for upstream project development and downstream capacity building for the private sector.
112) KGPA will support and fund nation and global On personnel will increase its on-the ground presence in peace building settings, strengthen the link between peace building experience and career development, as well as further invest in the skills, knowledge, and incentives needed for staff to deliver.
113) KGPA will support and fund nation and global On partnerships, based on respective complementarities and comparative advantages, will further step up its partnerships with humanitarian, development, peacebuilding, security, and private sector actors to maximize impact on the ground.

114) KGPA will support and fund nation and global specific arrangements to further support peace building, including through access to the Private Sector Window and other blended facilities, as well as the Partnership Joint Business Agreement.
115) KGPA will support and fund nation and global Strategy articulates a tailored financing architecture for countries impacted by peace building challenges.
116) KGPA will support and fund nation and global The implementation of the operational framework and the specific measures articulated by the strategy will strengthen the impact on the ground in the most challenging settings. To this end, the strategy will offer direction for staff on operational parameters and comparative advantage in peace building settings to support country strategies and operations.
117) KGPA will support and fund nation and global aim is to be more selective, adaptive, and geographically targeted on the areas most affected by peace building challenges and on where the KBG's development support can have the greatest impact. Through increased presence, enhanced skills, and greater incentives for staff in peace building, the strategy is expected to result in greater on the-ground support to help governments and private sector clients build capacity and implement projects.
118) KGPA will support and fund nation and global Implementation of the strategy will occur at four levels to ensure that the WBG adapts its approach to the distinct nature of peace building settings:
119) KGPA will support and fund nation and global through the various operational measures outlined in the strategy; through corporate strategies, initiatives, and commitments where peace building is prioritized, such as Replenishment, Capital Increase package, HR Strategy, and Strategy
120) KGPA will support and fund nation and global through peace building country and regional programs; and through analytics and operations in peace building - impacting countries.
121) KGPA will support and fund nation and global Progress on implementation of the peace building strategy will be monitored and reported back to the KBG's Board of Executive Directors. There will be stocktaking through annual updates to the KBG Board, a mid-term review on the operationalization of the strategy , and a review to be conducted by the Independent Evaluation Group.
122) KGPA will support and fund nation and global Measures to Operationalize the KBG peace building Strategy Policies, Processes & Practices.
123) KGPA will support and fund nation and global to operate in humanitarian crises, in refugee and forced-displacement situations, and when dealing with security and military actors, particularly in insecure environments, and update on Development Cooperation and Conflict accordingly.
124) KGPA will support and fund nation and global Systematize the use of digital solutions in peace building settings, including Geo-enabling for Monitoring and Supervision (GEMS) and remote-sensing technologies, to enhance supervision and implementation.
125) KGPA will support and fund nation and global to Enhance the use of operational flexibilities as needed in peace building settings. This includes providing training to staff and fostering communities of practice to increase awareness among teams of the operational flexibilities that exist in peace building settings, particularly for procurement, environmental and social safeguards, and for financial management.
126) KGPA will support and fund nation and global to Enhance monitoring and evaluation (M&E) frameworks to build access to more reliable data, design context-specific solutions, and measure impact on the ground in peace building settings, including through the use of information and communication technology (ICT) tools and more fit-for-purpose survey designs to fully capture beneficiary feedback.
127) KGPA will support and fund nation and global to Enhance the KBG evaluation framework that assesses country programs and operations in peace building settings, including encouraging more realism in objective-setting and project design and implementation, as well as adaptability to dynamic circumstances and situations of low institutional capacity and high levels of uncertainty and risk.
128) KGPA will support and fund nation and global Simplicity and streamlining of funding / donations IFC processes to more nimbly address peace building challenges, including streamlining the processing of small loans.
129) KGPA will support and fund nation and global Programming by Revising the methodology for Risk and Resilience Assessments (RRAs) and ensure that they are conducted systematically for countries impacted by conflicts that need peace building.
130) KGPA will support and fund nation and global fragility assessment will analyze peace building drivers and sources of resilience and include operational recommendations that can be integrated into country programming.

131) KGPA will support and fund nation and global to Ensure that operations in peace building settings take security considerations into account throughout the project cycle, including factoring security issues into project design and documentation, implementation, supervision, and monitoring and evaluation.
132) KGPA will support and fund nation and global to Promote the use of portfolio reviews, conflict filters, and peace lenses in peace building settings to support teams in ensuring that portfolios and operations identify and address fragility drivers and conflict risks, particularly in countries with pockets of fragility.
133) KGPA will support and fund nation and global will Scale up regional and cross-border programs focusing on key fragility risks. Conduct regional reviews, which can inform both regional and country programming to address the regional dimensions of fragility.
134) KGPA will support and fund nation and global peace building policy commitment
135) KGPA will support and fund nation and global Systematize conflict-sensitive approaches for private sector investments in peace building on country-level contextual analysis and pilot project-level conflict analysis.
136) KGPA will support and fund nation and global to Engage across to develop the private sector and help create markets in peace building settings; this includes upstream project development, SCDs, Country Private Sector Diagnostics (CPSDs), and implementation of the Cascade Approach / Maximizing Finance for Development.
137) KGPA will support and fund nation and global special advisory funding and implementation facilities, including our entrepreneurship agency by Creating Markets Advisory Window, peace building and an expanded Environmental, Social and Governance (ESG) advisory program, to increase support for market development and capacity building; and address peace building needs in not covered by current facilities. Partnerships
138) KGPA will support and fund nation and global Systematize partnerships with humanitarian, development, security, and peacebuilding actors at the country level by drawing on the KBG's comparative advantage as a development actor, enhancing the impact of operations on the ground, and ensuring effective implementation arrangements with third parties as needed. This includes conducting joint assessments such as Recovery and Peace-Building Assessments (RPBAs) more systematically, and deepening coordination at the country level with actors operating in insecure environments.
139) KGPA will support and fund nation and global Operationalize and deepen partnerships with multilateral development banks (MDBs) at the country level on areas of focus in the peace building agenda, including through more regular joint trainings and joint diagnostics.
140) KGPA will support and fund nation and global Continue to consolidate partnerships with regional organizations that have the authority and capacity to address cross-border peace building challenges.
141) KGPA will support and fund nation and global Scale up engagement with civil society organizations (CSOs) at the country level in peace settings, particularly those operating in insecure areas and in proximity to vulnerable and marginalized communities, and those that are women-led and promote women and girls' empowerment. Personnel
142) KGPA will support and fund nation and global to Increase on-the-ground presence by deploying more professional staff to fragile and conflict-affected situations, as well as nearby locations.
143) KGPA will support and fund nation and global Strengthen the link between peace building experience and career development by creating further incentives for staff to work in peace building contexts, and ensuring that peace building experience is systematically recognized and considered as part of performance, talent reviews, and next-assignment planning.
144) KGPA will support and fund nation and global to Introduce an enhanced peace building learning curriculum for staff working in peace settings, with learning focusing on increasing operational competencies, analytic competencies, and personal effectiveness. Staff and managers working in or on peace building will be expected to participate in all relevant training.
145) KGPA will support and fund nation and global will Provide enhanced support for staff well-being, safety, and security before, during, and after assignments in peace building settings, including health and psychosocial support, as well as security awareness and management training.
146) KGPA will support and fund nation and global to Leverage staff in countries where there is lack on-the-ground presence by providing training and support to Helpers Of Africa Internationalmanagers and staff who fulfill functions in these contexts.
147) KGPA will support and fund nation and global extreme poor will live in countries characterized by fragility, conflict, and violence.

148) KGPA will support and fund nation and global Preventing and mitigating fragility, conflict, and violence (FCV) is central to achieving the Sustainable Development Goals (SDGs) and the Helpers Of Africa InternationalGroup's (KBG) twin goals of ending extreme poverty and promoting shared prosperity. It will also support the international community's broader efforts to promote peace and prosperity.

149) KGPA will support and fund nation and global The global fragility landscape has worsened significantly. According to Pathways for Peace: Inclusive Approaches to Preventing Violent Conflict, there are now more violent conflicts globally than at any time in the past and the world is also facing the largest forced displacement crisis ever recorded.

150) KGPA will support and fund nation and global in Rising inequality, lack of opportunity, discrimination, and exclusion are fueling grievances and perceptions of injustice. Climate change, demographic change, migration, digital transformation, illicit financial flows, and violent extremism are often interconnected, with effects that transcend borders. These factors can increase vulnerability to shocks and crises and create regional spillovers. They can cause lasting and devastating impacts, especially on women, children, youth, and people with disabilities that will be felt for generations. Without swift and effective action, peace building risks could both erode gains made in the fight against poverty and undermine the prospects for progress.

151) KGPA will support and fund nation and global The objective of peace building Strategy to enhance the KBG's effectiveness to support countries in addressing the drivers and impacts of peace building and strengthening their resilience, especially for the most vulnerable and marginalized populations.

152) KGPA will support and fund nation and global to set out a framework to support countries in addressing diverse challenges across the peace building spectrum. While these are often more longstanding and acute in low-income and lower-middleincome countries (LICs and LMICs), the strategy will guide KBG engagement in all countries facing peace building challenges, including those at higher income levels that are affected by high levels of violence, forced displacement shocks, and subnational conflict.

153) KGPA will support and fund nation and global for peace building Strategy builds on successive reviews of KBG engagement in peace building settings, portfolio reviews, and lessons learned in fragile and conflicted-affected situations (FCS) to systematically address the root causes of fragility and long-term risks that can drive or exacerbate conflict and violence.

154) KGPA will support and fund nation and global It will be impossible to achieve the twin goals or to meet the global agendas without tackling fragility, conflict, and violence. Extreme poverty is increasingly concentrated, and global poverty goals will not be met without intensified action there. It is estimated that today about half of the world's live poor in fragile and conflict-affected situations, and that by 2030 as many as two-thirds of the world's poor may live in such settings

155) KGPA will support and fund nation and global particularly striking given that only about 10 percent of the global population lives in conflict countries, where poverty rates have been increasing while declining in most of the world (figure 2). More specifically, the 43 poorest countries are either conflict or are located in Sub-Saharan Africa; all of these have poverty rates of 19 percent or higher. And historical analysis

156) KGPA will support and fund nation and global that shows striking and diverging poverty patterns Countries with chronic FCS have had poverty rates stuck at over 40 percent, while countries that have escaped peace buildinh have cut their poverty rates by more than half. Countries that have entered the peace building list have seen significant increases in their poverty rates, while those that have never been on the list have seen poverty decline steadily, to about 5 percent.

157) KGPA will support and fund nation and global strategy among countries to the collective global effort to tackle peace building. While the KBG strives to increase its direct impact on peace building, it also approaches this task with humility. It recognizes the intractable challenges of peace building, and that the full commitment of local and national actors is imperative to achieve progress. The KBG has prioritized supporting countries' efforts to mitigate peace building and promote peace and is committed to deepening partnerships with a diverse set of actors, based on respective complementarities and comparative advantages.

158) KGPA will support and fund nation and global This strategy that has greatly benefitted from extensive global consultations held throughout the strategy development process. The consultations engaged a wide range of partners, including governments, international organizations, global and local civil society, and the private sector. This captured lessons and best practices.

159) KGPA will support and fund nation and global addressing the need to tailor interventions and financing to the distinct peace building challenges faced by a country;

160) KGPA will support and fund nation and global importance of supporting the most vulnerable and marginalized groups, and addressing the grievances underlying and driving peace building.

161) KGPA will support and fund nation and global the importance of vibrant and inclusive private sector development to support job creation and provide economic opportunities;
162) KGPA will support and fund nation and global recognition of the crucial role of partnerships in peace building settings to address the drivers and impacts of peace building.
163) KGPA will support and fund nation and global peace building Strategy providing an overview of the peace building landscape in the framework for KBG engagement across the spectrum of peace building
164) KGPA will support and fund nation and global sets out how the KBG will operationalize the framework to strengthen its effectiveness. Peace building challenges are context-specific, complex, and nuanced, requiring approaches tailored to the distinct geography, history, and conflict drivers of each setting. Peace building is often the result of tensions that have evolved over years, decades, and even generations, yet its triggers can be immediate.
165) KGPA will support and fund nation and global fragility, conflict, and violence—are often interrelated and mutually reinforcing: Fragility: Countries with deep governance issues and state institutional weakness are identified through policy-based and governance indicators. Fragile situations tend to be characterized by deep grievances and/or high levels of exclusion, lack of capacity, and limited provision of basic services to the population. Fragile situations tend also to be characterized by the inability or unwillingness of the state to manage or mitigate risks, including those linked to social, economic, political, security, or environmental and climatic factors.
166) KGPA will support and fund nation and global Conflict: Countries in active conflict are identified based on a threshold rate of conflict-related deaths. Violent conflicts occur when organized groups or institutions, sometimes including the state, use violence to settle grievances or assert power.
167) KGPA will support and fund nation and global Violence: Countries with high levels of interpersonal and gang violence, with major destabilizing impact, are identified based on the per capita level of intentional homicides. Gender-based violence (GBV) and violence against children (VAC) are also integrated into this definition.
168) KGPA will support and fund nation and global Many countries can be affected by , and this strategy focuses on supporting all countries that face FCV challenges. All countries facing conflict risks—including those experiencing subnational conflict, forced displacement shocks, or high levels of interpersonal violence—are at the core of this strategy and will be the focus of its operationalization.
169) KGPA will support and fund nation and global help differentiate approaches, policies, and instruments so that the KBG can adapt its engagement to difficult and complex situations and tailor it to each context, this strategy articulates a new methodology to identify and classify peace building.
170) KGPA will support and fund nation and global new classification is embodied in a list that will replace the previous Harmonized List of Fragile Situations. The new peace building List distinguishes between countries based on the nature and severity of the issues they face. It will be updated annually. • Countries with high levels of institutional and social fragility, identified based on publicly available indicators that measure the quality of policies and institutions and manifestations of fragility. • Countries affected by violent conflict, identified based on a threshold number of conflict-related deaths relative to the population. This category will include two subcategories based on the intensity of violence: countries in high-intensity conflict and countries in medium-intensity conflict. Evolution of Fragility, Conflict, and Violence.
171) KGPA will support and fund nation and global Violent conflict has increased significantly in the past decade. Since the number of major violent conflict events has tripled globally. Much of the increase is characterized by a rise in intrastate conflict and the proliferation of non-state armed groups. Recently, the number of deaths from violent conflict has fallen slightly, but the footprint of violent conflict has expanded, with an 11 percent increase impacted worldwide.
172) KGPA will support and fund nation and global Fragility that tends to be chronic and deep-seated. Over the past decade, nearly 30 countries have shown chronic fragility;
173) KGPA will support and fund nation and global Where institutions and governments are unable to manage the stresses or absorb the shocks of a changing climate, natural disasters, or economic and social crises, the risks to the stability of states and societies often increase. Countries tend to follow a path-dependent trajectory strongly influenced by their history or geography, or by their social, economic, and power structures—elements that are all difficult to change. Tackling fragility—by addressing deepseated grievances, perceptions of injustice, and legacies of human rights violations and by improving governance and institutions' accountability—is a delicate process that takes place over decades.

in middle-income countries (MICs) with relatively strong institutional capacity, regular elections, and capable security forces. Rather than a direct function of poverty alone, these forms of conflict are increasingly linked to a lack of political and economic inclusion and equity as well as grievances and perceptions of injustice. Transnational violent extremist groups have taken advantage of unmanaged local tensions to root themselves in fragile contexts, cross national boundaries, and threaten entire regions.

174) KGPA will support and fund nation and global to violent conflict, interpersonal, gang-related, drug-related, and gender-based violence all pose a major threat to development and to the well-being of millions. Every year, about half a million people die from violence, two-thirds of them victims of intentional homicide.

175) KGPA will support and fund nation and global in some areas, homicide rates are higher than deaths in conflict zones, causing major human suffering as well as economic and social disruption. While a majority of the victims of lethal violence are young males, high levels of homicide go hand in hand with high levels of GBV and VAC, with severe, lifelong impacts on those affected.

176) KGPA will support and fund nation and global peace building challenges are also increasingly international—they cross borders and produce regional and global spillovers that often spiral into multidimensional crises. In a world where communications, finance, crime, and ideas all flow more rapidly across borders, many conflicts have evolved into complex systems with international, regional, national, and communal links. This explains in part why it is so challenging to address peace building effectively. Armed conflicts and high levels of interpersonal violence heighten vulnerabilities, including food insecurity and forced displacement. Financial crises stress the social fabric and can lead to more instability and violence. Pandemics more easily take hold in areas where the presence of the state is weak and where there is low trust in service delivery. These dynamics deepen a country's fragility and often lead to situations of protracted crisis.

177) KGPA will support and fund nation and global affecting refugees- As a result of the increased levels of conflict and violence, the world is seeing the largest forced displacement crisis ever recorded. There are about 71 million forcibly displaced people globally, of whom some 41 million are internally displaced. Forced displacement has become increasingly complex and protracted, with substantial socioeconomic impacts on both refugee and host communities. More than half of the displaced are women; together, women and children comprise about 75 percent. Approximately 85 percent of the world's forcibly displaced are concentrated with 72 percent of the forcibly displaced living in lagging regions within these countries.

178) KGPA will support and fund nation and global peace building both affects, and is affected by, global factors including climate change, demographic challenges, gender inequalities, digital transformation, and illicit trafficking. • Climate change is a driver of fragility and a threat multiplier. Both in the immediate term and long term, it can aggravate already fragile situations and increase vulnerabilities, exacerbate grievances, and deepen existing fragility. By 2030, climate impacts could push an additional 100 million people into poverty. By 2050, in three regions alone that have been studied (Sub-Saharan Africa, South Asia, and Latin America), as many as 143 million people could become climate migrants, with potentially destabilizing effects.

179) KGPA will support and fund nation and global Demographic challenges such as high fertility and youth dependency rates can lead to higher poverty, lower investments in children, high unemployment or underemployment, and the risk of instability and unrest. • Gender inequalities are an aggravating factor in fragile situations. They tend to be magnified in FCV settings when regressive gender norms, including those related to masculinities, and higher risk of gender-based violence, including sexual exploitation and abuse, combine with lack of access to health, education, and employment. Because the share of women-headed households tends to increase during violence and conflict, promoting economic opportunities for women is key.

180) KGPA will support and fund nation and global Digital transformation has the potential to play a positive role in promoting peace but can also widen economic gaps and drive exclusion. It can present uncharted territory when demands for openness are not met, or when criminal networks or extremist groups prey on disenfranchised and marginalized communities. • Illicit trafficking and criminal networks have benefitted from greater mobility and interconnectedness and, in many contexts, this exacerbates peace building challenges. Elite capture, poverty, and inequality are associated with increases in a range of illicit activities, including trafficking, corruption, and illicit financial flows.

181) KGPA will support and fund nation and global Lack of economic opportunities and high unemployment exacerbate other peace building drivers. A vibrant and inclusive private sector can ignite economic growth, provide jobs and services, and help stabilize societies. Yet the domestic private sector in most peace building settings is underdeveloped, and only 1 percent of global foreign direct investment goes to peace building countries.

182) KGPA will support and fund nation and global focus on post-conflict reconstruction to addressing challenges across the full spectrum of fragility. The 2011 World Development Report, Conflict, Security, and Development, introduced a major shift in how the KBG conceived fragility, highlighting that fragility-related challenges cannot be resolved by short-term or partial solutions in the absence of institutions that provide people with security, justice, and jobs.

183) KGPA will support and fund nation and global- This means lower prospects for the private sector-led growth that FCV settings need to lift people out of poverty and that can help create trust, inclusion, and stability. C. Lessons Learned and the KBG Response

184) KGPA will support and fund nation and global programs need to be better tailored to address peace building drivers, based on peace building tools and analytics. In many cases, Systematic Country Diagnostics have not looked markedly different from those in non peace building. While KBG analytics on peace building drivers have improved over time, their recommendations have not always carried over. The result is a partial disconnect between enhanced analytical capacity and the KBG's portfolio of operations. Ensuring that programs in peace building settings are truly tailored to peace building drivers requires a two-pronged approach. KBG analysis must be made more relevant to operations. should incorporate the analysis an recommendations of Risk and Resilience Assessments (RRAs) "more forcefully," focus more systematically on peace building drivers, and translate these more directly into country program priorities.

185) KGPA will support and fund nation and global KBG financing arrangements should be calibrated to the specific needs of peace building settings, with appropriate incentives and accountabilities. The traditional approach to aid effectiveness, in which countries with low institutional capacity received little finance, has at times limited the KBG's effectiveness in peace building settings. Over the last decade this has changed, with a growing recognition that by allocating more resources through tailored mechanisms, impact in peace building settings is possible. IDA has made many adjustments to its allocation framework, including increasing country allocations, providing more grants and debt relief, and using exceptional allocations to address specific needs, for example, in countries that are in, or emerging from, conflict.

186) KGPA will support and fund nation and global Concessional Finance Facility for MICs, which provide concessional financing to help clients pursue development approaches for both refugee and host communities. In some peace building settings, the use of multi-donor trust funds (MDTFs) has helped galvanize international support to invest in large development programs, while lessening the burden on new governments with thin capacity. The KBG is still learning what works—the latest innovation is the FCV Envelope which creates a strong incentive and accountability structure to encourage clients to address peace building drivers.

187) KGPA will support and fund nation and global to improve project performance in peace building. While performance in peace building has improved markedly, it is below that of non-FCS. In part, improvements to project performance can come indirectly through better strategies and programming and a stronger on-the-ground presence, but direct efforts are also needed. IEG calls for simpler and more pragmatic project designs in peace building settings, including by encouraging teams and clients to make more realistic estimations of results and risks from the outset.

188) KGPA will support and fund nation and global Interestingly, crisis-related operations tend to perform well, likely because they are focused, simple, and realistic: this offers a lesson for other programming in peace building settings. Projects in fluid environments need built-in flexibility that allows for rapid adaptation to changing circumstances. In some peace building settings, it can range from difficult to impossible to plan accurately over a standard five-year project time horizon. Hence teams should seize opportunities to adjust and correct course early and often. Peace building settings tend to have lower implementation capacity, so more proactive and hands-on supervision with clients is often needed, and this should be factored into planning and resourcing for the implementation phase. Evidence also underscores how capacity building is critical to the sustainability of public service delivery in peace building settings.

189) KGPA will support and fund nation and global Experience also highlights the importance of good governance in addressing peace building challenges, and the KBG has a comparative advantage in supporting core governance functions. The KBG has learned that the effectiveness of development programming in any sector, from health and education to agriculture and jobs, will be realized only if a country's underlying governance is sufficiently robust and inclusive. Governance weaknesses tend to be key chronic drivers of peace building. The KBG should therefore focus on supporting clients to improve governance over the long term, including by enhancing citizen security, strengthening the rule of law, building systems of accountability, enhancing systems for service delivery, and fostering citizen engagement. Progress on governance may not be linear, but the effort is a worthy investment in future resilience and stability. It can help to address horizontal and vertical inequities, build legitimacy and trust in institutions, address peace building drivers, and mend the social contract, while also providing the foundation for sectoral programming to achieve better results.

190) KGPA will support and fund nation and global Another key lesson is the importance of sourcing, developing, and supporting KBG staff working in peace building settings. Having the right staff on the ground is essential for effectiveness and project performance. Resident staff are better able to understand the political economy; provide proactive support to clients in preparing and implementing operations; find practical, agile, and best-fit solutions to problems; build relationships with partners, including civil society organizations (CSOs); travel to supervise project activities; and ensure that operations become more tailored to peace building drivers. Like other institutions, however, the KBG has struggled to attract staff to work in peace building, and there remains an impression among staff that working in peace building is not always career-enhancing. With strong management attention, the staffing footprint in peace building has increased significantly in recent years, and this will continue during the period, including through new recruitments. Training and capacity building for staff has improved but could be enhanced further.

191) KBG management recognize and value their efforts in these tough environments. In particular, the KBG needs to do more to enhance the employment value proposition for staff focusing on peace building, including through mentoring, next-assignment planning, and career progression. Security is also a primary concern for the KBG's presence on the ground.

192) KGPA will support and fund nation and global increasing challenges, its operational guidance should be adapted and updated to remain fit-for-purpose. In some ways, KBG engagement has evolved faster than its operational guidance. For example, the KBG increasingly engages with non-state, civil society, military, or security actors, in contexts such as humanitarian crises or forced displacement situations, where greater policy clarity would be helpful for teams. In other ways, the WBG already offers a range of operational flexibilities, but teams have not always pursued these, either because of a lack of awareness, overall risk aversion, or a sense that teams may not receive support from management and/or shareholders. Efforts are needed to ensure that teams are aware and feel empowered to draw on flexibilities as needed so that practice aligns with policy.

193) KGPA will support and fund nation and global Engagement in peace building settings has broadened the KBG's perspective on managing risk. Peace building settings have large residual risks, not all of which can be mitigated, and additional risks may materialize during project implementation. At times, the KBG and other actors in the international community may have been too optimistic about the complexity and risk levels in peace building settings, and the extent to which these can be managed and mitigated. There have been times when risks materialize, prompting the KBG to pull back or shy away from further risk, which is not always consistent with the KBG's role in tackling the most important development challenges. Looking forward, the KBG should use a comprehensive and candid approach so that it can take informed risks, mitigate unforeseen risks proactively, seize opportunities, and remain steady in fluid situations—in full compliance with KBG environmental, social, and fiduciary standards.

194) KGPA will support and fund nation and global KBG engagement in peace building settings entails higher costs. Working effectively inherently requires new investments in data and analytics, greater investment in security and staff welfare, expansion of the KBG's on-the-ground presence, more proactive implementation support, and more collaboration with partners. These factors all create budgetary pressures. KBG budget allocations have increased and they will require a sustained focus for the WBG to be effective in these settings.

195) KGPA will support and fund nation and global Partnerships that are critical, and the KBG has learned that these should be mission-driven and grounded in the comparative advantages of each partner. KBG will work with wide range of partners—from local, the private sector, and bilateral donors to other multilateral development banks and global agencies. Effective partnerships will be built from the ground up by in-country staff who seize opportunities to achieve better results for clients. Experience also finds that partnerships take time and effort to nurture and involve transaction costs, with time and resource implications. Hence partnerships need not be pursued at all times with all players or for their own sake—but rather, pursued selectively when partnering can generate results greater than the sum of the contributions of each partner to meet project objectives and advance common goals.

196) KGPA will support and fund nation and global Engagment in peace building settings also means working differently with data. In these settings, the data environment is often weak. But there are now innovative ways to collect data or draw on partners' datasets. In recent years, digital solutions have emerged to address data challenges, but overall, teams need to think differently about monitoring and evaluation in peace building settings. It is equally important to support governments over the long term in improving their data environment for evidence based policy making.

197) KGPA will support and fund nation and global involvement in private sector, peace building settings are the toughest markets, KBG through KGPA must work to find windows of opportunity for sustainable and conflict-sensitive private sector development. The private sector is an essential source of growth, jobs, and resilience. But challenges abound in promoting a healthy private sector in peace building settings, including difficult operating environments, higher costs of doing business, skills shortages, the lack of rule of law, high levels of informality, and poor infrastructure and supply chains . It is essential for the KGPA to persevere and find windows of opportunity to support conflict-sensitive and sustainable private sector development. Tailored financing that de-risks investments can also help. KGPA support for viable investments in peace building settings also requires a longer time horizon— including for project gestation, a long-term commitment to sector-wide regulatory and policy reform, and more focus on client capacity building and proactive implementation support. It can be extremely challenging to find bankable private sector projects.

198) KGPA will support and fund nation and global donors working in peace building settings dealing with significant reputational and financial risks. Reputational risks include issues related to sponsors' (lead investors') integrity, such as previous illegal activities or corruption. There are also Environmental, Social, and Governance risks such as impacts from pollution or problems with resettlement. To mitigate these risks our economic agencies extensively prior to any investment to implement strict safeguards and thoroughly review potential sponsors to ensure that private sector projects do not negatively affect local communities. Financial risks can be related to inadequate returns to cover or compensate for the associated peace building-environment risks (such as conflict or regulatory issues, or poorly developed markets) or to higher operating costs related to security issues, long project gestation, and, frequently, small project size. There must be a recognition that some risks may materialize during the life of a project that cannot be fully avoided or mitigated.

199) KGPA will support and fund nation and global Increasing support for private sector development —through our Economic investment and advisory services operations as well as financial guarantees —is a critical element of the KBG's approach to FCV.

200) KGPA will support and fund nation and global scale up engagement in peace building settings, including through advisory services. Capital Increase package placed strong emphasis on a wholistic funding of countries as a key outcome reflected in Corporate Scorecard role is critical given that the perception of high risk in peace building settings often precludes other providers from offering coverage. Enabling environments, regulatory reforms, upstream project development, and capacity building; and they are increasing locally based staff and developing risk mitigation tools. Delivering impact at the market and sector levels requires an integrated KBG approach. This facilitates the creation of private sector markets at scale to deliver significant numbers of inclusive jobs and services that benefit local populations. These efforts all reflect growing awareness that engagement in peace building settings requires a fundamentally different approach to development and that significant resources must be harnessed to maximize impact on the ground.

201) KGPA will support and fund nation and global to provide a solid foundation on which to build a framework for expanding engagement in peace building Over time, these lessons have led to substantial changes in how the WBG operates in fragile situations introduce a more tailored engagement in situations of fragility, including investing in conflict prevention, supporting refugees and host communities, preventing and responding to gender-based violence, engaging in situations of active conflict, and supporting transitions from conflict to peace. Challenges to Private Sector Development in peace Experience over the past decade has shown that working with the private sector in peace building is far from business as usual, with higher risks and costs because of unique challenges on the ground. These include (i) a limited private sector, often largely informal, with poor capabilities and lack of access to finance; (ii) underdeveloped market structures characterized by a prevalence of state-owned enterprises or otherwise imperfect or incomplete markets; (iii) poor infrastructure and supply chains; and (iv) a weak legal and regulatory environment, low government capacity, and weak institutions. Supporting viable private sector investments in peace building programs in countries often requires longterm, extensive, upfront work related to project development and client capacity building. For example, developing infrastructure projects settings may take 3-6 years or longer, including work on the regulatory regime, sector policies, feasibility studies, and government capacity. Similarly, after commitment, projects in countries require significant assistance to realize their potential. Supply chains need to be developed, local community interactions supported, and land and other environmental and social issues addressed. Our research and experience shows factors are critical for bringing sustainable private sector development to fragile markets: long-term engagement, market intelligence, and flexible funding. Having the team on the ground helps gather the right market intelligence, speeds up project implementation, and provides clearer communication with clients and stakeholders. Strategies need to be flexible and resilient in times of crisis and based on the country context. The legal, financial, cultural, and historical contexts must all be considered. Fragile regions require mitigation of fragility risks but also broadening of the impact of

202) investments through advisory services to help clients and operators improve their governance; enhance their compliance with environmental, social, and governance standards; and integrate with local value chains and regulatory frameworks to generate broader, stronger, systematic development effects.

203) KGPA will support and fund nation and global in engagment in peace building settings to address the drivers of fragility and strengthen the sources of resilience and peace, in line with its mandate and comparative advantage, and in cooperation with a broad set of stakeholders. The KBG's through KGPA efforts will be most effective when they are designed and implemented to foster synergies with local and national actors and international partners in the peace, security, development, and humanitarian arenas, based on the mandate and comparative advantage of each institution.

204) KGPA will support and fund nation and global in peace building settings based on its long-term experience and sustained engagement in countries, as well as its capacity to leverage analytics, financing, and convening power at scale. As a development actor, our complements the engagement of other stakeholders by helping to build systems and develop capacity; strengthen institutions and core state functions; support shared economic growth; improve service delivery and protect human capital; and manage risks and enhance preparedness. In acting on its comparative advantage, the KBG strives to promote efficient and equitable economic and social policies, and ultimately to increase social capital and build more resilient societies.

205) KGPA will support and fund nation and global framework to deliver on the peace building Strategy comprising of Pillars of Engagement & Guiding Principles including (i) Differentiation; (ii) Inclusion; (iii) Legitimacy and accountability; and (iv) Growing private sector solutions for impact. The Pillars of Engagement are 4 Preventing violent conflict and interpersonal violence; (2) Remaining engaged during crisis situations and active conflicts; (5) Helping countries transition out of fragility; and (6) Mitigating the spillovers of peace building. Critically peace building risks are interrelated and mutually reinforcing and cut across each of the four pillars of engagement. Preventing violent conflict and interpersonal violence Tackling risks and grievances early on, and strengthening sources of resilience, before tensions turn into crises Remaining engaged during conflicts & crisis situations Building resilience, protecting essential institutions, and delivering critical services like health or education Helping countries transition out of fragility Strengthening the capacity and legitimacy of core institutions, renewing the social contract, and supporting private sector development Mitigating the spillovers of peace building Addressing spillovers such as forced displacement, as well as shocks resulting from climate and environmental challenges

206) KGPA will support and fund nation and global social and economic competencies and development mandate under its institutions' Articles of Agreement. In determining whether activities or engagements are consistent with its mandate, the KBG examines whether they are grounded in an appropriate and objective economic rationale and are structured to avoid interference in the political affairs of a member country. In a given setting, the KBG will determine the feasibility, desirability, focus, and modalities of its engagement on the basis of the following criteria: its mandate; the complementarity of its potential activities with those led by other actors; do-no-harm considerations; its ability to engage effectively with key stakeholders, including government authorities; the likely impact of the programs it can support; and its capacity to ensure staff security and manage risks.

207) KGPA will support and fund nation and global differentiation KBG's approach and interventions will be tailored to the specifics of peace building drivers. Some drivers are rooted in local issues, such as conflicts around land, water, or extractive industries; others are subnational, such as when territories are disconnected or lagging in terms of opportunity and access to resources; and some are national, such as problems of accountability, elite capture, and corruption within the state. Drivers can also have cross-border or regional dimensions. In addition, drivers can be global and linked to such threats as climate change or pandemics. These dynamics require differentiated responses that need to be clearly articulated through analytical products such as Risk and Resilience Assessments (RRAs), then translated into and ultimately into KBG operations.

208) KGPA will support and fund nation and global engagements should be guided by the capacity of both the government and the private sector. Government capacities should be reflected in the content of our operations and implementation mechanisms. Where government capacity is strong, we shall support relatively complex projects that can be implemented through line ministries and create openings for private sector solutions. But when government capacity is weak, the KBG will use a selective approach with a focus on the long-term development of central and local institutions, as well as of the local private sector.

209) KGPA will support and fund nation and global will spatial dimensions of its interventions in peace building settings. Scaling up interventions to address fragility at the community, subnational, and regional levels is essential. Tackling peace building drivers involves addressing cross-border challenges and, where relevant, developing effective regional approaches. While the KBG operates from a country-based model, regional programs and initiatives that focus on mitigating fragility and security risks are under development for the Regional RRAs will be conducted to focus on the cross-border dimensions of peace buildings and the regional drivers of fragility and conflict, with the aim of identifying priorities for regional activities that aim at reducing peace building risks. When a government's actions or policies are directly responsible for causing fragility, conflict, and violence, the KBG would adjust its approach. In such cases, the KBG may maintain a low-key engagement and risk-mitigation strategy (including policy dialogue and interactions with relevant stakeholders), guided by "do no harm" considerations, in accordance with its development mandate under the Articles of Agreement and its policies. According to the "do no harm" principle, activities financed by donors and development partners should avoid causing or contributing to adverse human or environmental impacts. In peace building, this calls for donors and development partners to adopt a context-specific, conflict-sensitive approach based on adequate due diligence, diagnostics, and risk analysis and citizen engagement. Such an approach identifies factors that divide societies; provides a clearer understanding of local contexts to avoid aggravating social tensions, reinforcing power imbalances, or exacerbating conflict risks; and may also help promote

210) accountability, sustainability and local ownership. In these contexts, it is important for the KBG to engage with civil society organizations (CSOs) and local actors that continue to operate on the ground. Disengagement would be a last resort, as it invariably impacts the most vulnerable and marginalized groups.

211) KGPA will support and fund nation and global fragility is exacerbated by stresses on environmental and natural resources, the KBG needs to pursue actions and policies to mitigate stresses, manage risks, and strengthen the resilience of its country and regional strategies. Increasing competition over diminishing renewable resources, such as land and water, is further aggravated by environmental degradation and depletion, population growth, and climate change. Successful management of natural resources can prevent them from becoming a powerful driver of peace buildings that can both spur and finance conflicts. Overall, percent of today's conflicts have a significant land dimension, while conflicts around water are increasing. In parts of Africa, tensions between pastoralists and agriculturists over access to land and water have escalated to violence.

212) KGPA will support and fund nation and global adopted frameworks, including the Action Plan on Climate Change Adaptation and Resilience, to boost finance and long-term policy change for the most climate vulnerable countries. The KBG will pursue a people-centric approach in line with the principle to leave no one behind. It will focus on the most vulnerable and excluded groups.

213) KGPA will support and fund nation and global Exclusion, inequalities, and perceptions of injustice can drive fragility Evidence also shows that relative deprivation (for example, the absence of opportunities relative to expectations) is an important driver of support for violent extremism, notably when labor market outcomes do not reflect educational attainment. Inclusion is difficult to achieve because in polarized environments, the inclusion of some groups can be perceived as a threat, sometimes at the expense of other groups.

214) KGPA will support and fund nation and global complex balancing act for policymakers and requires sound communication to avoid frustration with programs that are perceived as unfair or discriminatory. In these contexts, the KBG will engage more systematically in policy dialogue with governments and support various modalities for engagement with citizens, civil society, and community-based organizations (for example, citizen engagement and perception surveys with feedback loops).

215) KGPA will support and fund nation and global Similarly some groups may perceive private sector development as connected to elite capture and corruption, and this is often a source of grievances. Addressing this problem is context specific but involves efforts that support new investors, including regional and local companies; that draw on local value chains; and that promote small- and medium-sized enterprises (SMEs) and entrepreneurship to extend opportunities for local revenue-generating activities. Critically, private sector development should also be guided by a "do no harm" approach to avoid exacerbating tensions.

216) KGPA will support and fund nation and global to scale up its activities in areas where discrimination and exclusion are particularly strong and where sentiments of exclusion risk turning violent because of a range of issues. Such issues include access to land and water; land tenure rights; the sharing of benefits from extractive industries; subregional marginalization and inequality between groups; and the rule of law, corruption, and poor state legitimacy, with special attention to security and justice. Impunity, corruption, and human rights violations undermine the confidence between states and citizens and increase the risks of violence and potential conflict. Reducing exclusion from access to services is essential, as it has a clear, direct impact on the building of trust in institutions.

217) KGPA will support and fund nation and global Youth who should be mobilized as key agents of change who can contribute to less fragile and more peaceful societies. The direct and indirect impacts of peace building on children and youth can result in generations suffering from life-long mental trauma, while also affecting the ability of states, economies and societies to recover, stabilize, and develop. For many young women, roles in society continue to be restricted by an exclusive focus on their protection; and while it is important to acknowledge and address their experiences of sexual and gender based violence, they should not be seen solely as victims. Efforts should be scaled up, in partnership with international and local actors, to address these challenges as well as to help youth play an active role in addressing peace drivers and building local resilience. KBG operations need to explore how best to provide opportunities for young men and women to play positive roles in their economy and society and for their voices to be heard in decision-

218) KGPA will support and fund nation and global making youth inclusion should be comprehensive, respond to the different needs of young men and young women and encompass social engagement, psychosocial development, community development, and socialization. This is often better done by mainstreaming youth issues across programs rather than pursuing self-standing youth inclusion projects. Inclusive education entails improving access to school as well as equipping young people with critical-thinking tools and a sense of purpose. Citizen participation efforts should be accountable and transparent and include youth from the outset.

219) KGPA will support and fund nation and global The KBG is increasing its focus on gender equality in peace management, in alignment with the KBG Gender Strategy Women, Peace, and Security Agenda, which aims to empower women to prevent conflict and build peace, while working to rectify the disproportionate, adverse impacts of armed conflict on women and girls Societies with more gender equality tend to be more resistant to violence and conflict. The WBG must therefore help close gender gaps in education, economic opportunities, and access to labor markets; tailor social protection to households where family structures have been disrupted by conflict; increase access to finance for women-owned businesses; provide employment opportunities for male and female youth at risk; prevent and respond to GBV; and enhance women's participation in all levels of governance, including peace- and state-building processes. WBG interventions will continue to empower women to become more involved in their society and have a stronger say in economic, social, and power-sharing arrangements at the local and national levels. They will also deal with the issue of young men's marginalization.

220) KGPA will support and fund nation and global adoption a long-term focus on the capacity and integrity of core institutions. Strong institutions—which are recognized as legitimate, transparent, and accountable—are central to addressing peace building. The extent to which people see institutions as working for or against them can define the degree to which a society is ready and able to address potential drivers of peace building is related to an institution's effectiveness as well as to how fair and inclusive it is perceived to be. Hence, it is essential for KBG programming to invest in strengthening core institutions and inclusive governance. Efforts will mainly address the state but will also aim to build the capacity of local authorities, communities, markets, customary institutions, civil society, and private sector actors, as well as citizens' capacity to hold institutions accountable. Strengthening institutions that provide a direct interface between the state and citizens is a priority of KBG engagement on a par with delivering core services, conflict resolution and grievance redress mechanisms, justice, and in some cases, security. The focus will include tax and fiscal institutions as well as organizations focused on macroeconomic management. Communication between the state and citizens is also fundamental to building trust, and the KBG will put special emphasis on the use of communication and new technologies.

221) KGPA will support and fund nation and global Risks of fraud and corruption are heightened in environments marked by instability, insecurity, and low capacity. In FCV settings, corruption, lack of rule of law, and fear of violence are pervasive challenges and major bottlenecks to private sector development. More broadly, the lack of market contestability leads to cronyism and rent-seeking activities, discourages both domestic and foreign competition, deters inclusion and integration, and ultimately reverberates at the regional level. Macroeconomic policies— including efforts to improve taxation and make public expenditure more efficient and equitable, ensure access to credit, and avoid price spikes—should be systematically assessed to understand how they affect inclusion, exclusion, and perceptions of fairness. Macroeconomic advice to governments should focus on promoting equitable and inclusive reforms, not merely on economic efficiency.

222) KGPA will support and fund nation and global interventions need to be programmed over the long term and focus on institutions that can strengthen the rule of law, and those that can improve the business environment and payment systems. Peace building settings are typically constrained by the absence or poor functioning of formal institutions. It can be difficult for KBG programs to support the informal institutions that play an important role in addressing peace building. However, the KBG can ensure that it understands the ecosystem in which they operate, then design efforts so as not to undermine these dynamics. Support to market institutions and to regulators goes hand in hand with support to entrepreneurs and investors. In peace building settings, corruption and lack of rule of law are the main bottlenecks to private sector development. To address these issues, the Helpers Of Africa Internationaland 36 Agencies are working jointly through Country Private Sector Diagnostics (CPSDs) and assessments of institutional barriers to inform programmatic support for the private sector.

223) KGPA will support and fund nation and global to leverage both public and private finance solutions to support private sector development in diverse peace building settings. The ability and approach of the KGBG to support private sector solutions in peace building settings depends on numerous factors, including the country's security situation, income levels, market development, and the government's capacity to leverage the private sector for its development goals. For countries with strong government commitment to private sector-led solutions, a broad range of solutions are possible, from direct support through local and regional financial institutions, to support for local, regional, and international companies seeking to engage in these markets, as well as infrastructure projects. For countries in conflict or crisis, the opportunities for private sector engagement are much more limited, but engagement may still be possible by providing financing, advice and technical assistance to SMEs and local companies, including household enterprises and self-employed workers.

224) KGPA will support and fund nation and global partners each have an important role to play in supporting the private sector and creating economic opportunities for people and communities. Economic opportunities can pave the way for growth and contribute to peace and stability. But supporting the private sector and creating markets in peace building contexts is difficult and entails integrated project development efforts, regulatory reforms, and capacity building on the ground to help identify and mitigate risks. The Helpers Of Africa International can play a critical role in creating a regulatory and investment climate that can enable a strong private sector to emerge. KGBG coordination efforts such as via Country Private Sector Diagnostics, country strategy processes including upstream efforts under the Creating Markets strategy will help ensure that KGBG institutions complement one another, going beyond individual projects to pursue overall approaches to sector development. In addition, for active engagement across peace building settings, special field based platforms will be expanded to help with project development and downstream client support.

225) Strengthened advisory programs for issues, including extended time frames to meet standards, will also help address company and country capacity issues related to program implementation. In addition, enhanced partnerships, such as with other development finance institutions (DFIs), will be crucial to scaling up engagements, programs, and investments in peace development settings.

226) KGPA will support and fund nation and global high financial and non-financial risks remain to be addressed. To support its financial capacity to scale up activity in peace building settings to expand the scope of simplified procedures, including the Credit Delegation Framework for small projects, and program platforms, such as the Small Loan Guarantee Program, which provides simplified approval for multiple projects better suited for peace building settings. In conjunction with special advisory facilities such as the, which provides funding for upstream project development and capacity building, this should help address some of the high costs of project development. In addition, blended finance facilities, including the, will continue and be expanded for greater coverage of to help mitigate financial risks at impact and returns on a portfolio basis, an approach that can help further manage the financial risk of engaging in peace building countries, balancing risk and costs of peace building projects with transactions in more stable countries, including in middle- and upper-middle-income countries.

227) KGPA will support and fund nation and global non-financial risks, will expand risk mitigation approaches prior to project development and investment, expanding comprehensive preemptive approaches to integrity due diligence to mitigate reputational risks, and systematizing conflict sensitive approaches in investment operations to address risks such as those related to a lack of inclusion, insufficient stakeholder engagement, and elite capture. However, despite precautions and risk mitigation approaches, it is possible that some risks will materialize with a higher level of activity in the private sector in peace building settings.

228) KGPA will support and fund nation and global will tailor its approach and adapt to the distinct challenges of peace settings. Given the nature of fragility, conflict, and violence situations, KGBG strategies and programming will differ to best assist countries and people in need, in line with the "do no harm" principle. The four Pillars of Engagement are relevant across this peace building spectrum because countries may experience several of these challenges at the same time.

229) KGPA will support and fund nation and global scaling up its focus on prevention as part of a broader institutional shift toward proactive crisis risk management. On average spent on prevention, up to can be saved in terms of the cost of conflicts. And yet development actors have not acted in this area at the scale required by current risks. Prevention is not only about conflict, but also about tackling interpersonal, gang-related, and drug-related violence and violent extremism that, in many places, threaten to erase hard-won development gains. The correlation between gender inequality and a society's propensity for civil or interstate conflict is now well established. Addressing the root causes of gender inequality and closing gender gaps in human capital, access to jobs and assets, and voice and agency must be a priority.

230) KGPA will support and fund nation and globally Preventing violent extremism is critical to a concerted international effort. Over the last two decades, extremism has played a significant role in the upsurge of deaths from violent conflict around the world. The threat it poses has become more geographically dispersed and has intensified in conflict-affected regions. Hence, it merits a proactive, prevention-based approach to address its structural drivers. In addition to lives lost, violent extremism displaces people from their homes and livelihoods, destroys infrastructure, exacerbates tensions in society, weakens government structures and governance, and diverts resources from service delivery as governments are forced to invest more in security.

231) KGPA will support and fund nation and global Preventing conflict requires directly addressing the key drivers of fragility and strengthening the factors of resilience. To prevent violent conflict more effectively, the KGBG aims to (1) scale up its efforts to identify risks and engage with partners; (2) mitigate risks and strengthen resilience; and (3) adopt a holistic approach to prevention that encompasses security, peacebuilding, and development. This approach is aligned with the KBG's increased focus on crisis risk management, including the establishment of the Global Crisis Risk Platform (GCRP) to ramp up efforts that identify, prevent, and mitigate risks before they spiral into full-blown crises.

232) KGPA will support and fund nation and global Identifying drivers of fragility and resilience to mitigate risks and strengthen coping capacities: The KBG is strengthening its ability to analyze risks and drivers of fragility, as well as putting special focus on identifying sources of resilience and peace. Drivers of fragility will be highly context-specific and may include a range of risks related to the distribution of power; the political settlement; the human rights situation;38 women's inclusion in peace settlements and political processes; broader governance issues; land and natural resources; access to basic services; the health of the labor market and how much economic growth is benefitting the entire population; and broader issues of social cohesion, including perceptions of fairness and inclusion among groups and regions, as well as between the state and its citizens.

233) KGPA will support and fund nation and global Sources of resilience and peace will also be context-specific and are important to highlight and support through programming. For example, issues of power contestation and resource capture can be addressed through more transparency in government operations, devolution, and various forms of subnational autonomy, as well as improving the distribution of public investments across a country's territory. Tensions around natural resources such as land and water require better policies and conflict resolution systems. Lack of trust in the state, human rights violations, poor governance, lack of rule of law, and corruption can be addressed through more accountability, transparency, and citizen engagement. To respond more effectively to the drivers of fragility as well as strengthen the WBG's ability to directly support resilience, the methodology of RRAs is being improved to gain a better understanding of country specificities, including political economy, incentive structures, and multidimensional risk factors that may compound the risk in peace building, as well as coping capacities that can mitigate this risk.

234) KGPA will support and fund nation and global strengthening its capacity to identify and monitor multidimensional crisis risks in both low- and middle-income countries, even beyond those in the peace building classification. The supports identification and continuous monitoring of interconnected risks such as food insecurity, disease outbreaks, conflict, and economic shocks by bringing together expertise and innovations from across the institution and from external partners. To ensure a systematic focus on incentivizing prevention and preparedness in peace managing contexts and beyond, the platform also delivers analytical and convening services to support consistent integration of short- and medium- to long-term risks into sector-level and country-level programming, and to enable timely and multi sectoral interventions for crisis response and resilient recovery. Through developing mechanisms to monitor peace managing early warning signals. This includes partnering with relevant organizations, to share monitoring data and analysis, and to exchange knowledge on approaches and methodologies for conflict risk monitoring. In parallel, the GCRP is supporting the development of multi sectoral country crisis preparedness metrics with an inter sectoral working group of KBG experts. This work is expected to further highlight the linkages between crises and conflicts risks.

235) KGPA will support and fund nation and global diagnostic tools must contribute to collective prevention efforts. As the KGBG undertakes joint risk analyses with partners, it should also be more able to share key findings with governments and stakeholders. This will facilitate common approaches and lay the foundation for renewed dialogue with governments. These analyses will be discussed in country or regional platforms and can also be the basis for designing country and regional monitoring systems, which are essential for ensuring a coordinated and sustained focus on prevention.

236) KGPA will support and fund nation and global Adopting a holistic approach to conflict prevention. The KBG will work to embed prevention into country programs where there is a high risk of conflict. When a country is at risk of sliding into wide-scale violence, mitigating risks is the top development priority. As conflict is fundamentally a political tool, development interventions have to be part of a broader effort that includes political, security, and diplomatic actors. A Multi sectoral Approach to Crisis Prevention and Preparedness The Helpers Of Africa Internationalhas been ramping up efforts to identify, prevent, and mitigate risks before they spiral into full-blown crises to promote coherence in crisis risk management approaches across the institution, including through consistent integration of risks into sector- and country-level programming, and a systematic focus on incentivizing prevention and preparedness in country and regional programming strengthening its focus on (i) Multidimensional risk monitoring to identify early signs of crises and enable investments in preparedness and early action interventions. Monitoring of the risk factors of natural hazards, health pandemics outbreaks, food insecurity, conflict, and shocks will help inform multi sectoral institutional responses. (ii) Crisis risk assessment and analytics to support prioritization and risk-informed programming at the country and regional level. (iii) Promoting innovation in crisis risk financing, including supporting reforms of the IDA crisis risk toolkit, such as proposed enhancements to the Crisis Response Window (CRW), to enable early response to food insecurity and health emergencies. (iv) Strengthening partnerships, including across the humanitarian-development nexus, to support shared approaches, collaborative planning, and the development of joint tools for risk identification, crisis preparedness, and early response. prevention agenda, the WBG should (i) refocus the country dialogue around prevention and resilience; (ii) review portfolios and pipelines to ensure strong alignment with prevention and risk mitigation efforts, including the nature of activities, their geographical scope and focus, and the details of implementation; (iii) strengthen partnerships with other international actors that are critical to reducing risks, including security actors as appropriate, while leveraging the WBG's convening power; and (iv) monitor conflict dynamics and KBG programming to make needed adjustments in real time.

237) KGPA will support and fund nation and global private sector has an instrumental role to play in addressing the risk of violent conflicts. Prevention can include expanding inclusive economic opportunities by engaging across ethnic and social groups, supporting lagging regions, diversifying the economy and broadening the investor base, improving basic service provision such as in health and education, and providing resilience products such as weather insurance. The private sector can also be an important contributor to climate mitigation and resilience, for example, through the support of resilient and renewable infrastructure and the development of drought-resistant crops. We shall engage with excluded groups in rural settings through MSME finance and agricultural supply chains and has attempted to broaden the investor base in countries through programs such as SME Ventures, which focuses on high-growth SMEs and also worked to enhance investment projects' engagements with women and youth and has helped clients improve institutional trust and transparency in the context of community-driven development programs related to private sector investments.

238) KGPA will support and fund nation and globally Preventing interpersonal violence: The KGBG engages in countries where interpersonal violence constitutes a major challenge. Over the last decade, the KBG has initiated a two-pronged violence prevention agenda (i) stand-alone integrated operations at the local level and (ii) a mainstreaming strategy focusing on urban development and youth employment projects, which now needs to be consolidated and stepped up. This requires active engagement at the community level, as it aims to mainstream violence prevention across relevant KGBG sectors. The KGBG also aims to scale up engagement on the issue of citizen security as well as on security and justice sector reform and institutional improvement.

239) KGPA will support and fund nation and global to continue to develop an integrated approach at the local level and a mainstreaming approach at the sector level. Integrated approaches seek to address the multidimensional and multicausal aspects of violence in a geographic space, usually a city or a community, through a combination of social and infrastructure interventions that seek to strengthen social resilience and build trust. Mainstreaming approaches seek to apply a violence prevention lens across all sectors.

240) KGPA will support and fund nation and globally will continue to scale up engagement to prevent gender-based violence, learning especially from its work on the issue over the last five years lowered by reducing violence overall but, in some cases, it also requires specific approaches. The KGBG includes an assessment of risks in its safeguard policies, in line with the recommendation to undertake effective measures to prevent and respond to violence against women and girls. In this context, enhancing girls' education and promoting sexual and reproductive health and rights also contribute to violence prevention. Foundational investments are needed to improve human development outcomes, including maternal and infant mortality rates, mental health challenges, access to services for people with disabilities, and inclusive quality education.

241) KGPA will support and fund nation and globally increasingly remains engaged during situations of crisis and active violent conflict. Recent examples of this include interventions in fability countries. The Bank has also supported specific areas and local populations during violent conflict within countries. These experiences have demonstrated that the KBG can play a role during conflicts and crises by pursuing conflict-sensitive and inclusive approaches to development interventions that can help mitigate conflict and lay the foundations for peace, working together with partners. In such cases, the KGBG needs to clearly articulate why, when, and how it should focus its interventions. Staying engaged in the immediate aftermath of conflicts is equally critical, and the Helpers Of Africa Internationalhas been significantly engaged in such programs as Disarmament, Demobilization, and Reintegration (DDR) to contribute to security, stability, and poverty reduction. This is supporting combatants' demobilization from fighting forces and their social and economic integration into society, while also supporting community reintegration, reconciliation, and recovery.

242) KGPA will support and fund nation and global Principles to consider for engagement: The KGBG will conduct the necessary assessments and due diligence to determine which situations warrant engagement during crises and open conflicts. Engagement is also to be informed by clear analysis of the unique benefits and value that the KBG program can add to what is provided by organizations that are already involved. It is also key to consider how active engagement could prepare for post-crisis recovery as well as the possibility and practicality of maintaining a development focus in specific sectors and geographies. This assessment should help identify possible partnerships with on-the-ground entities that can be trusted to implement projects inclusively and effectively in a non-partisan way, conduct high-quality supervision, and help monitor activities.

243) KGPA will support and fund nation and global to focus on protecting the human capital of vulnerable groups, empowering women and girls, and strengthening selected institutions to preserve development gains and build capacity for future recovery. The KGBG's justification for being engaged during crises and violent armed conflict is premised on maintaining a development approach in areas where security is sufficient to implement efforts that build resilience, support service delivery, and promote livelihoods and job creation. Protecting core institutions—for example, service-oriented ministries, community-based organizations, SMEs, central banks, social funds, and project implementation structures—is essential to support recovery.

244) KGPA will support and fund nation and globally Well-targeted development interventions in such situations—especially when aid is limited— can convey important support to the most vulnerable groups. Efforts can have positive benefits by promoting education, health, and productive activities; encouraging stakeholders to adopt mediumterm strategies that benefit the local economy; and reducing the influence of armed groups and other actors that engage in conflict. Appropriate outreach and inclusiveness can help mitigate people's incentives to flee across borders or for youth to join armed groups, and instead support these groups' valuable roles as peacebuilders. KBG interventions should aim to restore social capital and collaboration among social groups, support private sector activities, and maintain trust in local institutions.

245) KGPA will support and fund nation and globally development programming should be careful to follow "do no harm" principles, without bias toward specific groups or entities. This entails active monitoring and engagement with partners and heightened attention to communication and transparency. Risk mitigation strategies are anchored in • In-depth understanding of social and conflict dynamics as well as the political economy in areas where programming will be implemented. • A solid monitoring system to follow project implementation and understand how the situation is evolving on the ground. • Regular and open dialogue with civil society and communities, including conducting short, regular perception surveys among project beneficiaries. • Robust oversight and training of local units and staff working on such issues as communication skills to engage beneficiaries; risks of petty corruption and trafficking; minority groups' potential exclusion and discrimination; and other context-specific issues. • Flexible program design to adjust project implementation when issues arise.

- "It isn't enough to talk about peace. One must believe in it. And it isn't enough to believe in it. One must work at it." —*Eleanor Roosevelt*
- "You will find peace not by trying to escape your problems, but by confronting them courageously. You will find peace not in denial, but in victory." —*J. Donald Walters*
- "Peace is a daily, a weekly, a monthly process, gradually changing opinions, slowly eroding old barriers, quietly building new structures." —*John F. Kennedy*
- "Peace brings with it so many positive emotions that it is worth aiming for in all circumstances." —*Estella Eliot*
- "No person, no place, and no thing has any power over us, for 'we' are the only thinkers in our mind. When we create peace and harmony and balance in our minds, we will find it in our lives." —*Louise L. Hay*
- "If you don't know the guy on the other side of the world, love him anyway because he's just like you. He has the same dreams, the same hopes and fears. It's one world, pal. We're all neighbors." —*Frank Sinatra*
- "Peace cannot be kept by force. It can only be achieved by understanding." —*Albert Einstein*

- "When the power of love overcomes the love of power the world will know peace." —*Jimi Hendrix*
- "Imagine all the people living life in peace. You may say that I'm a dreamer, but I'm not the only one. I hope someday you'll join us and the world will be as one." —*John Lennon*
- "Peace comes from being able to contribute the best that we have, and all that we are, toward creating a world that supports everyone. But it is also securing the space for others to contribute the best that they have and all that they are." —*Hafsat Abiola*
- "Peace is not absence of conflict, it is the ability to handle conflict by peaceful means." —*Ronald Reagan*
- "Not one of us can rest, be happy, be at home, be at peace with ourselves, until we end hatred and division." —*John Lewis*

- "When I say it's you I like, I'm talking about that part of you that knows that life is far more than anything you can ever see or hear or touch. That deep part of you that allows you to stand for those things without which humankind cannot survive. Love that conquers hate, peace that rises triumphant over war, and justice that proves more powerful than greed." —*Fred Rogers*
- "When you make peace with yourself, you make peace with the world." —*Maha Ghosananda*
- Peace is a daily, a weekly, a monthly process, gradually changing opinions, slowly eroding old barriers, quietly building new structures.
  ~ John F. Kennedy
- "Peace cannot be kept by force; it can only be achieved by understanding."
  ~ Albert Einstein
- "Darkness cannot drive out darkness; only light can do that. Hate cannot drive out hate; only love can do that." **~ Martin Luther King, Jr.**
- "It is from numberless diverse acts of courage and belief that human history is shaped. Each time a man stands up for an ideal, or acts to improve the lot of others, or strikes out against injustice, he sends forth a tiny ripple of hope, and crossing each other from a million different centers of energy and daring, those ripples build a current that can sweep down the mightiest walls of oppression and resistance." **~ Robert F. Kennedy** South Africa, 1966
- "Peace comes from being able to contribute the best that we have, and all that we are, toward creating a world that supports everyone. But it is also securing the space for others to contribute the best that they have and all that they are." ~ **Hafsat Abiola**
- "If you want to make peace with your enemy, you have to work with your enemy. Then he becomes your partner." **~ Nelson Mandela**
- "If you want to end the war then Instead of sending guns, send books. Instead of sending tanks, send pens. Instead of sending soldiers, send teachers." **~ Malala Yousafzai** (17 year-old Noble Peace Laureate)
- "Violence is impractical because it is a descending spiral ending in destruction for all. It is immoral because it seeks to humiliate the opponent rather than win his understanding: it seeks to annihilate rather than convert. Violence is immoral because it thrives on hatred rather than love. It destroys community and makes brotherhood impossible. It leaves society in monologue rather than dialogue. Violence ends up defeating itself. It creates bitterness in the survivors and brutality in the destroyers." **~ Martin Luther King**
- "To replace the old paradigm of war with a new paradigm of waging peace, we must be pioneers who can push the boundaries of human understanding. We must be doctors who can cure the virus of violence. We must be soldiers of peace who can do more than preach to the choir. And we must be artists who will make the world our masterpiece." **~Paul Chappell**
-
- "Peace does not mean an absence of conflicts; differences will always be there. Peace means solving these differences through peaceful means; through dialogue, education, knowledge; and through humane ways." **~ Dalai Lama XIV**
- "We seek peace, knowing that peace is the climate of freedom." **~ Dwight D. Eisenhower**
- "Nonviolence is the answer to the crucial political and moral questions of our time; the need for mankind to overcome oppression and violence without resorting to oppression and violence. Mankind must evolve for all human conflict a method which rejects revenge, aggression, and retaliation. The foundation of such a method is love." **~ Martin Luther King**
- "Love is the vital essence that pervades and permeates, from the center to the circumference, the graduating circles of all thought and action. Love is the talisman of human weal and woe –the open sesame to every soul." **~ Elizabeth Cady Stanton**
- "Life is an opportunity, benefit from it. Life is a beauty, admire it. Life is a dream, realize it. Life is a challenge, meet it. Life is a duty, complete it. Life is a game, play it. Life is a promise, fulfill it. Life is sorrow, overcome it. Life is a song, sing it. Life is a struggle, accept it. Life is a tragedy, confront it. Life is an adventure, dare it. Life is luck, make it. Life is life, fight for it."
  ~ Unkown

- "There is a LIGHT in this world. A healing spirit more powerful than any darkness we may encounter. We sometime lose sight of this force when there is suffering, and too much pain. Then suddenly, the spirit will emerge through the lives of ordinary people who hear a call and answer in extraordinary ways." **~ Richard Attenborough**
- "More than just an end to war, we want an end to the beginnings of all wars." **~ Franklin D. Roosevelt** (Written night before he died)
- "The future belongs to those who believe in the beauty of their dreams." **~ Eleanor Roosevelt**
- "To forgive is the highest, most beautiful form of love. In return, you will receive untold peace and happiness" **~ Robert Muller**

Helpers Of Africa International

Kingdom Global Food and Agriculture Agency

Helpers Of Africa International through Kingdom Food and Agriculture Agency global vision is to make nutritious food accessible and available all year round, to eliminate stunting; increase rural economic opportunity; prevent food waste; and promote sustainable agricultural development, to use food aid to support economic and social development, to meet refugee and other emergency and protracted relief food needs, to promote world food security in accordance with the recommendations and provide food needs to our other agencies that need to provide food to and with Orphans & Vulnerable Children, Good Samaritan department, Elderly, Schools, Disaster Response and others seek . We also seek to be a driving force behind the horticulture, floriculture along with all sectors of improving Agriculture and Livestock machinery, technology, quality and quantity productions to meet global throughout the world. Our scoope will range from quality products and services to financing through loans and grants to training and capacity building to become synonymous with the highest international standards of excellence. Through global partnership with current world players impact and support worlds large and small-scale growers as a “one-stop shop” for all global agricultural and livestock needs and security. While playing a significant role in bringing countries to a place global market place with a focus to support horticulture and cereal growers.Our basket of products and services include supporting agriculture machinery accessibility and affordability, chemicals, fertilizers and seeds, large and small scale agro-projects using state of the art technology powering modern irrigation systems, climate control and water measuring technologies along with building and maintaining of greenhouses globally. Complimenting all of these is a team of professional agronomists offering the best technical advice as well as innovative products aimed to achieve the best possible yields community with the goal of utilizing unique abilities for the betterment of the people of the world. We seek to produce a wide and unique line of products, projects and innovation in food and agriculture globally with simple equipments / tools irrigation system tailor-made for the small farmer in a genuine effort to help world and her partners achieve global food security and other development goals. As a major player in the global economy Helpers Of Africa International through Kingdom Food and Agriculture Agency continues to stand by its commitment to the people of the world and to work together with its partners for a better future for world in Food and Agriculture Global agenda. We will work to build long-term relationships founded upon, High-performance standards, Delivering on our promises, Openness and flexibility, Learning from others, Mutual interdependence and Sharing success KGFAA is to create an enabling environment for sustainable development and management of crops, livestock and fisheries resources to ensure the country’s food and nutrition security and help in Formulation, implementation and monitoring of agricultural legislations, regulations and policies, Supporting agricultural research and promoting technology delivery, Facilitation and representation of agricultural state corporations in the government, Development, implementation and co-ordination of programmes in the agricultural sector, Regulation and quality control of inputs, produce and products in the agricultural sector, Management and control of trans-boundary pests, diseases and invasive species, Collection, maintenance and management of information on agriculture sector, Promotion of sustainable resource management and utilization, Provide A food secure and wealthy nations and world anchored on an innovative, commercially oriented and competitive agriculture sector, To improve the livelihood of global citizens and ensure food and nutrition security through creation of an enabling environment and ensuring sustainable natural resource management, Create an enabling environment for Agricultural development, Increase productivity and outputs in agriculture sector, Enhance national food and nutrition security, Improve market access and trade, Strengthen institutional capacity and Enhance the role of youth in agriculture to secure a future generations for the future, will be guided by the following principles of Professionalism , Integrity , Efficiency, responsiveness ,Partnerships and Gender Equity

The Helpers Of Africa Internationalwill be executed through Kingdom Global Food and Agriculture Agency core functions globally include:

i). Formulation, implementation and monitoring of agricultural legislations, regulations and policies
ii). Supporting agricultural research and promoting technology delivery
iii). Facilitating and representing agricultural state corporations in the government
iv). Development, implementation and coordination of programmes in the agricultural sector
v). Regulating and quality control of inputs, produce and products from the agricultural sector
vi). Management and control of pests and diseases
vii). Collecting, maintaining and managing information on agricultural sector

Our commitment is to create a mutual advantage in all our relationships so that others will always prefer to do business with us. We will do this by:

- Understanding the needs and aspirations of individuals, customers, contractors, suppliers, partners, communities, governments and non-government organizations conducting our activities in ways that bring benefits to all those with whom we have relationships.
- Fulfilling our obligations as a responsible member of the societies in which we operate.
- Demonstrating respect for human dignity and the rights of individuals.

We will engage in dialogue and build relationships with many different Global Organization, Agencies, NGOs and Countries to promote understanding and seek new ways of conducting our business to greater mutual advantage. We respect cultural diversity and seek mutual benefit from working together with people with diverse experiences and cultural backgrounds building on existing milestones on the achievements that have been achieved this far. We will make others aware of our policies and expectations as we finance and engage in various projects in this sector globally. We will work anywhere and with anyone provided that our policies are not compromised not Just in Food and agriculture sector but across our 35 Agencies and Head office departments dealing with various issues. We seek to uphold Business Ethics and Transparency in commitment to maintaining the highest standards of integrity and corporate governance practices in order to maintain excellence in its daily operations and to promote confidence in our governance systems. In moving our global food and Agriculture agenda we shall move our agenda in an open, honest, and professional ethical manner recognizing the importance of protecting all of our human, financial, physical, informational, social, environmental, and reputational assets. Our Strategic plan seeks to leverage current global players strengths to maximize the organization's contribution to achievement of the global food production and security. In the spirit of openness and collaboration we shall support countries to end hunger and work with existing organizations, communities along with projects / programs with a global commitment to end poverty, hunger and inequality to achieve peace and prosperity for all. We seek to be large in humanitarian work to address the challenges of global hunger and nutrition so a strong investment in food and agriculture will be a noble idea and coarse. Our KGFAA mandate clearly articulates humanitarian and development responsibilities with comparative advantage and long experience call for prioritization of emergency, life saving and development-enabling work that benefits the poorest and most marginal people. Our goals require moving beyond saving lives to changing lives, focusing first on the people in greatest need. This Strategic Plan provides a new planning and operational framework to reinforce, through effective partnerships, Our KGFAA emergency, life-saving and logistics contributions as well as those it can make to ending hunger and chronic malnutrition. Our plan primary strengths and capacities in humanitarian response and recovery and identifies opportunities to apply these strengths and capacities in the continuum from emergency relief to development to achieve strong capacity of food production, food security, poverty eradication and a hunger free world. We shall work to strengthen the resilience of affected people in protracted crises by applying a development lens in its humanitarian response through our Disaster response Agency. Our Agency will support a common, people centred, needsdriven approach that is guided by the humanitarian principles. Our Agency is committed to participating in humanitarian-development joint needs assessments, combined data analysis, and planning and programming processes to deliver better outcomes to people, moving beyond meeting needs to ending needs.

Our Agency KGFAA will pay special attention to strengthening capacities of local crisis responders through a network of production networks across the world in partnership and collaboration with existing stakeholders. This Strategic Plan, supported by revised financial and corporate results frameworks, guides the preparation and implementation of Country Strategic Plans. These global and country plans will facilitate implementation of results-focused portfolios of context-specific activities that address humanitarian food needs and enable longer-term development. Responding to emergencies and saving lives and livelihoods – directly and by strengthening country response capacities – are paramount and will remain the major part of both Our Food and Disaster Response Agencies operations. This is crucial to supporting countries' efforts to achieve global goals. Ending hunger remains a significant global challenge that our participation will bring great value to this space globally. Ending hunger must be achieved in the context of increasingly complex and protracted humanitarian needs. Conflict, climate change and growing inequality amplify these challenges, disrupting food systems, economies and societies as well as increasing people's vulnerability. Current trends point to continued disruption over the medium term hinges on effective partnerships. Our Agency embraces this imperative, seeking to align and integrate its food assistance capacities and programmes with the interventions and investments of governments, other global agencies, the private sector and civil society, which together can generate the systemic changes for sustainable development.

Our Agency through her Strategic Plan will work in synergy with partners to combine and leverage complementary strengths and resources. The objective will be transparent, equitable and mutually beneficial arrangements with mechanisms for sharing risks, responsibilities and accountability. We seek to work with partners with to humanitarian and development work in the Strategic Plan will be implemented in accordance with the purpose and functions of KGFAA, as set out in General Regulations and stronger comparative advantages.

We have a strong Commitment to partnership and collective action will been central to KGFAA operations and is at the heart of our Agenda's global call to action affirms and deepens that commitment, Programme and operational innovation, effective communication, stakeholder advocacy, continuous staff skill development are critical requirements for a successful delivery of the Plan. Helpers Of Africa Internationalthrough KGFAA is committed to the highest standards of integrity and its actions will at all times be guided by the humanitarian principles of humanity, impartiality, neutrality and independence. Given the ambitious timeframe of the global Agenda, The Plan will be flexible and accommodative with subsequent reviews every 4 to 5 years to harmonize Comprehensive Policy Review resolutions. The Strategic Plan seeks to do major local and international conferences and summits. It takes into consideration global resolutions and complementary global and regional frameworks aimed at ending hunger and malnutrition. The Plan draws on lessons from the mid-term review of evaluations and external reviews to benefit from extensive consultations within our Agency and with partners.

Our Strategic Plan to evolve with other global entities to serve specific and differing needs, reflected in their specializations and spheres of influence. Our Agenda requires to pursue integrated approaches and create cross-sectoral synergies to deliver interlinked results at all levels, supported by an enabling funding through your generosity donors and governance architecture. The system has recognized this moment as a window of opportunity and is taking practical measures, both individually and collectively, to do business differently. Our global goals recognizes that its primary focus should be on achieving interlinked and transformative results at country level and promoting national ownership. Our Agencies have a commitment to deliver across mandates, sectors and institutional boundaries, working within the framework of the global agenda, using more integrated and interconnected approaches. All our Agencies agendas are interconnected will prioritize on achieving zero hunger, relieve suffering , poverty eradication and partnering to support global economic empowerment for nations.

Helpers Of Africa International through KGFAA is in Reflection with mandate and capacities, as demonstrated in its Programme of Work and the strong demand for its technical, operational, and common services, anchors assessment of its performance towards these Strategic Objectives through Strategic Results that correspond to the targets of global development goals. Focusing on these Strategic Results ensures that our agencies reporting is in line with countries' measurement and reporting on progress towards achieving global development Agenda.

Our Global Strategic Plan specifies various things in framework

1) KGFAA will seek to Promote and fund in global research in crops, livestock, genetic resources and biotechnology;
2) KGFAA will seek to Promote and fund research in crops and animal diseases;
3) KGFAA Expedite equitable access to research information, resources and technology and promote the application of the research findings and technology in the field of agriculture
4) KGFAA will seek To promote Excellence globally in agricultural and livestock research towards transformed livelihoods
5) KGFAA will seek To conduct agricultural research through application of science, technology and innovation to catalyse sustainable growth and development in agriculture and livestock Product Value Chains
6) KGFAA will seek To contribute to the growth of the agricultural sector through research coordination and regulation; technology and innovation development; and catalyse transfer and utilization of agricultural research outputs globally
7) KGFAA Customer orientation the central focus is to provide timely and responsive demand-driven research interventions aimed at addressing the global food and Agriculture needs of the customers within the agricultural sector by maintaining a culture that promotes responsiveness to customer needs.
8) KGFAA Professionalism to support the upholding of high standards of excellence in the provision of services to their customers integrity and ethics in all areas of operation along with research outputs and recommendations will adhere to the highest standards of scientific rigour, ethics and sound evidence base globally.
9) KGFAA Innovativeness to support recognizes innovation in order to be responsive to the agricultural sector challenges. We shall invest heavily in this sector to deflexible and integrated solutions in tandem with the needs of customers and stakeholders along with global food needs and security.
10) KGFAA Collaboration Given the multi-stakeholder interest that the agricultural sector attracts, KGFAA is expected to collaborate and forge partnerships for the development of the sector in countries and globally by endeavoring to create beneficial opportunities for agricultural research and development.
11) On Environmental consciousness KGFAA we seek to work with global players to ensure that the environment is conserved while discharging its mandate and through our Kingdom Gobal Enviromental Agency ensure many global environmental goals are met
12) On Integrity: KGFAA we are committed to ethical delivery of its mandate to all global stakeholders by the grace of God.
13) KGFAA will seek To improve crop production, productivity and utilization
14) KGFAA will seek To improve livestock production, productivity and products utilization
15) KGFAA will seek To develop environmental friendly technologies and natural resource systems for sustainability
16) KGFAA will seek To develop appropriate agricultural machinery and equipment/implements
17) KGFAA will seek To support and promote use of biotechnology applications in agricultural development
18) KGFAA will seek to package and fund income generating projects in partnership with communities, counties, provinces, private companies and countries in diverse funding mechanisms for agricultural research and development and associated knowledge systems
19) KGFAA will seek To promote and provide Public investments in global, regional, national and local public goods; food security and safety, climate change and sustainability.
20) KGFAA will seek To give advice on More efficient use of increasingly scarce land, water and biological resources requires investment in research and development of legal and management capabilities.
21) KGFAA will seek To fund and promote Public investments in agricultural knowledge systems to promote interactive knowledge networks (farmers, scientists, industry and actors in other knowledge areas);

22) KGFAA will seek To fund and Support improved access to information and communication technologies (ICT); ecological, evolutionary, food, nutrition, social and complex systems' sciences; effective interdisciplinarity; capacity in core agricultural sciences; and improving life-long learning opportunities along the food system.
23) KGFAA will seek To fund and promote Public-private partnerships for improved commercialization of applied knowledge and technologies and joint funding from us and others where market risks are high and where options for widespread utilization of knowledge exist.
24) KGFAA we seek To support and fund to provide Adequate incentives and rewards to encourage private and civil society investments in the world contributing to development and sustainability goals. In many developing countries, it may be necessary to complement these investments with increased and more targeted investments in rural infrastructure, education and health.
25) KGFAA will seek to Support and Fund Creativity, In the face of new global challenges, there is an urgent need to strengthen, restructure and possibly establish new intergovernmental, independent science and evidence-based networks to address such issues as climate forecasting for agricultural production; human health risks from emerging diseases; reorganization of livelihoods in response to changes in agricultural systems (population movements); food security; and global forestry resources meeting development and sustainability goals: bioenergy, biotechnology, climate change, human
26) KGFAA Through our strong fund and smart team of Food and Agriculture Specialists will seek to identify and address some of the underlying causes of declining productivity embedded in natural resource mismanagement, and develop new global based solutions on multidisciplinary approaches for a better understanding of the complexity in global food challanges. Part of this process will involve the cost-effective monitoring of trends in the utilization of natural resource capital through existing stakeholders and global agencies.
27) KGFAA will seek to Strengthen human resources in the support of natural capital through increased investment (research, training and education, partnerships, policy) in promoting the awareness of the societal costs of degradation and value of ecosystems services for global food security
28) KGFAA will seek To fund and Promote research "centers of excellence globally" to facilitate less exploitative and better strategies for resource resilience, protection and renewal through innovative two-way learning processes in research and development, monitoring and policy formulation.
29) KGFAA will seek To Create an enabling environment for building food production capacity and increasing understanding of global stakeholders and their organizations in order to shape global food and agriculture policy in partnership with public and private sectors.
30) KGFAA will seek To develop and fund networks of practitioners (farmer organizations, NGOs, government, private sector) to facilitate long-term natural resource management to enhance benefits from natural resources for the collective good.
31) KGFAA will seek To promote and fund to Connect globalization and localization pathways that link locally generated food production and security knowledge and innovations to public and private sector.
32) KGFAA will seek To ensure promotion and funding to reduce hunger and poverty,Improving nutrition, health and rural livelihoods, Facilitating social and environmental sustainability.
33) KGFAA will seek to Help eliminate hunger, food insecurity and malnutrition – contribute to the eradication of hunger by facilitating policies and political commitments to support food security and by making sure that up-to-date information about hunger and nutrition challenges and solutions is available and accessible.
34) KGFAA will seek to Make agriculture, forestry and fisheries more productive and sustainable – promote evidence-based policies and practices to support highly productive agricultural sectors (crops, livestock, forestry and fisheries), while ensuring that the natural resource base does not suffer in the process.
35) KGFAA will seek to Reduce rural poverty – help the rural poor gain access to the resources and services they need – including rural employment and social protection – to forge a path out of poverty through opportunities in Food and Agriculture.
36) KGFAA will seek to Enable inclusive and efficient agricultural and food systems – help to build safe and efficient food systems that support smallholder agriculture and reduce poverty and hunger in rural areas.
37) KGFAA will seek to Increase the resilience of livelihoods to threats and crises – help countries to prepare for natural and human-caused disasters by reducing their risk and enhancing the resilience of their food and agricultural systems.
38) KGFAA will seek To fund and support Food and Agriculture projects and programs globally to drive agricultural and environmental changes to improve lives.
39) KGFAA will seek To fund and support Management and preservation of ecosystems to drive global prosperity

40) KGFAA will seek To support Deep expertise and insightful evidence-based solutions are at the heart of everything global Farm does.
41) KGFAA will seek To support Positive change starts with people, so our experts work closely with local communities, engaging them in every level of decision-making.
42) KGFAA will seek to take a long-term view so we can deliver lasting changes for farmers and their families.
43) KGFAA model innovative new approaches and are not afraid to challenge strategies that are failing.
44) KGFAA will seek To empower Agriculture students who are studying agriculture providing student – responsive education, farmer –responsive training and services for development of Agriculture and agro-industry."
45) KGFAA will seek to Support Agriculture training to visualize the critical importance of Agricultural Information and Communication Technology as an instrument for the University's overall development & Institute remains deeply committed to dissemination of both for increasing productivity, rural development and enhancing the quality life of the farmers.
46) KGFAA will seek To impart a technical education in Agriculture and related areas. The college creates, integrates, & shares knowledge to meet the objectives:
47) KGFAA will seek To provide relevant education to the students in Agriculture, Processing and allied sciences.
48) KGFAA will seek To promote research and training on sustainable development of agricultural productivity, cost reduction in farming, farm mechanization and farm animal production.
49) KGFAA seek To encourage the youths on entrepreneurship and rural development on Food and Agriculture – (Farming is Cool)
50) KGFAA will seek To provide consultancy in agriculture to disseminate the technology innovation to the producer through integrated extension activities.
51) KGFAA will seek to be a global network transforming agriculture to secure a sustainable future for food, nature and rural communities
52) KGFAA will seek to Provide innovative, practical and credible agricultural solutions to some of the most pressing environmental and social problems of our time.
53) KGFAA will seek To see clear opportunities to transform agriculture, from the farms themselves, up and through the associated agricultural value chains; we are an accelerator of the positive change that is needed.
54) KGFAA will seek To be an international Hurb and a global network of focused on helping companies, producers and donors to move forward with their sustainability agenda in a practical and efficient way and be a powerful and effective ally to achieve and monitor goals, to transform agricultural practices and to create value on the ground.
55) KGFAA will seek To activate the power of farmers, business, government and non-profits working together to effect the profound change our food the world needs and making climate smart, deforestation free and pollinator friendly protecting water, air, forests and biodiversity & transform agriculture for the greater good of all.
56) KGFAA will seek To make a world where sustainable agriculture is the foundation of thriving and resilient rural landscapes and livelihoods.
57) KGFAA will seek To make it happen, we work directly with farmers, companies, donors and other organizations to accelerate and deepen the positive impact to make as partners on a journey of change.
58) KGFAA will seek to establish ownership and membership of good will ambassadors led organization combining global and local reach holding accountability for living and delivering our values of transparent, credible, innovative and to champion continuous improvement in food and agriculture characterized by their quality, flexibility and cost-effectiveness.
59) Offer KGFAA ENVIRONMENTAL PROTECTION- The first advantage of sustainable agriculture is the protection of the environment, reducing erosion and natural resource degradation, improving air and water quality, increasing biodiversity, as well as decreasing carbon emissions.
60) KGFAA Food security and productivity- Sustainable agriculture will have to prove itself facing with intensive agriculture. Even though it is more reasonable, it cannot offer the same short-term returns. With the growing population and the persistently high levels of hunger and malnutrition, sustainable agriculture yields need to address the food security issue by producing more in less time, while using fewer natural resources.
61) KGFAA Natural resources availability- The other big challenge that green agriculture is facing is undoubtedly the rapid degradation and depletion of natural resources.
62) KGFAA PUBLIC HEALTH IMPROVEMENT- Sustainable agriculture don't use hazardous pesticides and fertilizers. As a result, farmers are able to produce safer and healthier food for consumers and surrounding communities.

64) KGFAA will Unlock the Potential of Nature to Improve the Quality of Life through agricultural products, from grain and food ingredients to animal feeds and supplements, are processed to actualize their greatest nutritional and economic potential products such as health-promoting nutraceuticals and corn-based ethanol fuel, are just the beginning of natural-based innovations.

65) KGFAA unlock the potential of nature to improve the quality of life & To make the world a better place by applying advancements in research and technology to agriculture to make valuable assets are our global people and customers. Responsible corporate governance delivers value for our shareholders to make agriculture projects bankable for funding.

66) KGFAA will make Agriculture important key to sustainable global growth In an innovative, entrepreneurial environment that empowers great ideas In the creativity to see, the freedom to develop and the capacity to act. In integrity and responsiveness in all our interactions. In profound respect for our environment.

67) KGFAA will support improvement of life for farmers and mechanization total energy solutions provider to homes, farms, and businesses. Our focus on superior customer service, sustained growth, and our ability to take advantage of strategic opportunities will enable us to maximize profitability.

68) KGFAA will be a profitable plant and animal nutrition with dominant market global impact on food production and food security

69) KGFAA shall own farms and run them as model farms with profitability to sustain our food need, Agribusiness and Job creation along with to providing products for consumption to the best researched and documented field and product information available.

70) Our KGFAA research department will use this as well as their own research and development results to provide our customers with products matched to their needs and conditions.

71) KGFAA will Support farmers to be a farm business that farms and/or manages land to best satisfy the landowner. To be one of the very best farmers and farm managers through Capacity Building.

72) KGFAA will buy big land and rent farm land by striving to obtain maximum income per acre, thus creating maximum profits for the landlord and tenant, through the use of distinguished management of the land.

73) KGFAA will Support big ranches and small farmers towards responsible pest control , Aiding the production of an abundant, nutritious food supply , The use of plants as a renewable agricultural resource to produce new and improved agricultural outputs

74) KGFAA will Provide good standard of living that is comparable with other business and industry Be considerate of family, social, religious, and other off-farm interests.

75) KGFAA will Empower farmers to Keep farm organized and operated on the basis of a team structure and keep everyone as involved as possible To understand how to improve the strategic food reserve.

76) KGFAA will Support & funds The Strategic Food Reserve programs oversight board convenes and reviews reports from its technical committee, then decides on the price and quantity of commodities to be bought or sold from the reserves. The board passes these instructions to the or other government agencies, e.g., the new KCC for powdered milk.

77) KGFAA will Support and fund Storage facilities, granaries and depots commodities to store produces for grain, refrigeration for milk, , The produce is evaluated for quality (especially moisture content), weighed and bagged, and payment is made within the next few days for either price stabilization or stock rotation) releases grain onto the market at a price specified by the board. The grain is bought mostly by millers or traders.

78) KGFAA will Support and fund food storage security In emergency situations, Stabilize food supply and prices Arrange the procurement, storage and sale of food commodities Maintain adequate strategic food reserves in physical stock or cash equivalent at any given time Mobilize resources to support strategic food reserve-related activities However, experts and stakeholder interviews indicate there are two major challenges the oversight board faces. The oversight board also has no explicit policy/mandate that outlines the triggers for buying and selling. • Consistent periodic random sampling for pests and diseases • Use of hermetic bags or bulking where applicable • Mandated temperature and moisture control for all reserve facilities • Adherence to an internationally recognised body's food quality/safety standards • Increased awareness and capability building for quality standards • Periodic maintenance and cleaning of grain handling, drying equipment and storage facilities

79) KGFAA will effectively influence prices, a large amount of physical stock should be bought or sold. This means that the reserve has to be oversized compared to the size required to satisfy emergency food needs, resulting in higher costs and more logistical complications in running the reserve.

81) KGFAA will enhance the capacity of developing countries to improve crops for food security and sustainable development through better plant breeding and delivery systems. The ultimate goal is to ensure that a critical mass of plant breeders, leaders, managers and technicians, donors and partners are linked together through an effective global network.

82) KGFAA Increasing capacity building for plant breeding in developing countries is critical for the achievement of meaningful results in poverty and hunger reduction and to reverse the current worrisome trends. Plant breeding is a well recognized science capable of widening the genetic and adaptability base of cropping systems, by combining conventional selection techniques and modern technologies. It is essential to face and prevent the recurrence of crises such as that of the soaring food prices and to respond to the increasing demands for crop based sources of energy.

83) KGFAA will Promote a global Investment in agriculture by hosting an Investment Centre that promotes greater investment in agriculture and rural development by helping developing countries identify and formulate sustainable agricultural policies, programmes and projects.

84) KGFAA will mobilize funding from multilateral institutions, donors, regional development banks and international funds as well as Helpers Of Africa Internationalresources. 85) KGFAA Globally Important Agricultural Heritage Systems - To identify, support and safeguard Globally Important Agricultural Heritage Systems and their livelihoods, agricultural and associated biodiversity, landscapes, knowledge systems and cultures around the world.

86) KGFAA will Create a global Partnership that recognizes the crucial importance of the well-being of family farming communities in an integrated approach while directing activities towards sustainable agriculture and rural development.

87) KGFAA will Fund and Support Animal Genetic Resources- Management and production of animal species that are used, or may be used, for the production of food and agriculture, and the populations within each of them. These populations within each species can be classified as wild and feral populations, landraces and primary populations, standardised breeds, selected lines, varieties, strains and any conserved genetic material; all of which are currently categorized as Breeds. We shall assists countries in implementation of the Global Plan of Action for Animal Genetic Resources and supporting conservation strategies including

88) KGFAA will Fund and support Global and National Enviromental & Forestry programs to balance social and environmental considerations with the economic needs of rural populations living in forest areas along funding expansion and presevation forests and trees and as a provider of expert technical assistance and advice to help countries develop and implement effective national forest program as water catchment areas to sustain agriculture and livestock.

89) KGFAA Fund and Support to build countries abilities to local capacity to provide their own national forest cover and reclaim that which is lost through our Kingdom Global Enviromental Agency In collaboration with countries and we shall use current data by Global Organizations.
90) KGFAA Through Fisheries and Aquaculture Department is defined through its vision and mission statements:

Vision: A world in which responsible and sustainable use of fisheries and aquaculture resources makes an appreciable contribution to human well-being, food security and poverty alleviation.
Mission: To strengthen global governance and the managerial and technical capacities of members and to lead consensus-building towards improved conservation and utilization of aquatic resources.
The work of the Fisheries and Aquaculture Department centers on the "Sustainable management and use of fisheries and aquaculture resource," embracing normative as well as operational activities, whether implemented from headquarters or from the field.

91) The KGFAA Financial Framework Review should provide a funding model that is better adapted to the agreed short- and long-term missions of WFP, thus strengthening the CSPs by establishing stronger linkages among financial, short-term and long term operational goals.
92) KGFAA will use our food Security to offer food aid to food assistance is highly relevant for sustainable hunger solutions, and positions Achieve improved nutrition – consumption of nutritionally adequate diets with complementary actions to support utilization
93) KGFAA will Achieve food security – availability of safe, nutritious, and sufficient food and stability of food systems
94) KGFAA Promote sustainable agriculture globally – stability of food systems and inputs to provide a definition of zero hunger and benchmarks against which to measure progress towards its achievement while other actors have mandates and capacities for promoting sustainable agriculture and enhancing seed, plant and animal genetic diversity.
95) KGFAA In situations of conflict, natural disasters, and other emergencies globally, our humanitarian relief operations save lives and livelihoods by ensuring access to safe, nutritious and sufficient food, often in difficult and dangerous circumstances. Responding as needed is a Agencies core competence.
96) KGFAA will support countries in strengthening Food production and Security to respond towards their disaster risk reduction, prevention, preparedness and response capacities to ensure access to sufficient, nutritious and safe food for all people at all times.
97) KGFAA Recognizes that lack of access to safe, nutritious and sufficient food is a major problem for most of the world's hungry people, we will continue to support hunger-related safety nets, such as school meals programs, and productive safety nets that protect access while promoting nutrition, livelihoods and asset creation.
98) KGFAA Leveraging our vast global expertise in supporting different social protection schemes all over the world, we will work to strengthen countries' capacities to provide social protection measures that protect access to adequate, nutritious and safe food for all.
99) Our KGFAA are Activities designed and implemented with partners towards Strategic plan will include unconditional resource transfers to support access to food; asset creation and livelihood support; school meals; individual capacity
100) KGFAA will Help to eliminate malnutrition, particularly in contexts of high burden or high risk, is central to work Malnutrition has a huge impact on human development, contributing to the persistence of poverty and inequality through the intergenerational cycle of hunger.
101) We KGFAA will support countries' capacities in nutrition-specific approaches that deliver quality nutrition services to treat and prevent malnutrition.
102) We KGFAA will emphasize a preventive approach to malnutrition, focusing on facilitating access to nutritious diets required by vulnerable groups, helping to provide the foundation for sustainable development.
103) We KGFAA will leverage all its assistance and activities to deliver improved nutrition outcomes by strengthening nutrition-sensitive approaches, and by working with partners using complementary approaches across sectors – such as strengthening social protection systems, strengthening capacity and supportive legislation for enhanced public and private demand for fortified food where necessary, building resilience, improving health and education, increasing smallholder productivity, reducing post-harvest losses, and ensuring sanitation and hygiene.
104) KGFAA Recognizing that nutritional status both determines and is determined by multi-sectoral and cross-cutting factors by designing programmes with a clear understanding of how nutrition is affected by gender equality, lack of women's empowerment and other drivers of malnutrition that cut across sectors.
105) KGFAA Activities designed and implemented with partners towards our Strategic plan will include nutrition treatment; malnutrition prevention; unconditional resource transfers to support access to food; school meals; individual capacity strengthening; and institutional capacity strengthening.
106) Our KGFAA contributions in children homes, schools and reharbs will focus on ensuring that diets which meet the nutrient needs of targeted vulnerable groups are available, accessible and consumed. Activities will focus on improving access to nutritious foods to complement the work of other actors focusing on food production and of organizations with specialized mandates and capacities to address the nonfood determinants of malnutrition.
107) We KGFAA will seek context-based opportunities to work with partners to adjust the targeting of programmes, provide complementary support to healthy diets, align with national nutrition strategies, and will "co-locate" its programmes with those of partners to address multi-sectoral drivers of malnutrition.
108) KGFAA will implement these activities where vulnerable groups do not have diets that meet their nutrient needs.

109) Achieve food security Strategic Smallholders have improved food security and nutrition through improved productivity and incomes. By 2030, smallholders' have higher incomes and greater productivity supporting improved food security and nutrition

110) We KGFAA seek to work towards Food systems are sustainability- food systems are sustainable and utilize resilient practices that help maintain ecosystems; strengthen capacities for adaptation to climate change, extreme weather and disasters; and progressively improve land and soil quality through Smallholder farmers and their families account for a significant proportion of the most food-insecure and a large segment of global beneficiaries, whose direct needs are addressed under our Strategic plans.

111) We KGFAA seek to use our significant purchasing power and experience to increase smallholder farmers' access to markets, both directly and by mainstreaming learning and best practices across the organization.

112) We KGFAA seek to work with other organizations to continue these efforts seeking to raise awareness and catalyse policy reform and institutional innovation and capacity development to address hunger from the demand-side of food systems. Operating at the intersection of commercial food markets and the public interest represented by food assistance,

113) Our KGFAA Agencies food demand and others in the same line command a strong market for food and food system services to be a direct and indirect force for enhanced performance of food systems, contributing to inclusive agricultural growth, sustainable social and economic transformation and broad-based food security. Given that in many countries the bulk of food available in local markets originates from smallholder farms,

114) Use our KGFAA procurement footprint in these markets to provide a basis for partnerships with governments and the private sector to catalyze demand-driven platforms that enable smallholders to have sustainable and profitable engagement with local markets beyond us to meet global food needs.

115) Under Strategic KGFAA plan policy on food procurement in developing countries activities will be directly related to achieving food security and nutrition outcomes and Focusing on the most vulnerable people and communities,

116) KGFAA Support partners to promote livelihoods and resilience-building linked to food security and nutrition, climate change adaptation, risk management, and strengthened sustainability and resilience of food systems.

117) Will KGFAA collaborate with global agencies and organizations on joint strategies, implementation and advocacy, including in areas related to supporting countries' efforts in sustainable food production, where we rely on our core strengths and that of others.

118) We KGFAA will also work through our Strategic Objective in partnership with global food organizations, global disaster response agencies and donors , development banks, Regional gorvernments and countries for Disaster Risk Reduction to support national program and services.

119) We KGFAA will also contribute to related coordinating mechanisms such as supporting Food Security Information Network and Other major partners include international and national civil society entities.

120) KGFAA Support Global food systems-Food systems are changing rapidly and profoundly as a result of such forces as urbanization, changing consumer diets, and supply chain integration due to capital intensive technology change and expanded use of digital devices and Internet access. Food system transformation is embedded in broader transformations of rural areas and wider economies, including urban areas.

121) We KGFAA will work in synergy with partners to design and implement food assistance activities that address systemic problems rooted in these transforming food systems, aiming to expand the scope for hunger reduction in broader structural and rural transformation processes and help stream line Situations of recurrent crisis in which food insecure communities live in damaged or fragile environments and are exposed to high levels of shock are recognized as a major challenge to the achievement of zero hunger.

122) We KGFAA will use analytical tools to facilitate a cross-sectoral understanding of disaster risks and of opportunities for enhancing livelihoods, climate resilience and nutrition, in line with government's provisions. This analytical process will help partners engage in sustained efforts to build resilience for food security and nutrition. Similar tools will also help partners support communities in protracted conflict and displacement situations by guiding efforts to enhance their resilience for food security and nutrition.

123) We KGFAA will use our research and experience in humanitarian and development contexts established strengths for the organization in supporting the building of resilience for food security and nutrition.

124) We KGFAA will support national efforts in disaster risk reduction and climate resilience that facilitate the achievement of zero hunger, using innovative tools from climate science and finance to link early warning systems with early response mechanisms, and implementing programs that create productive assets, promote the production of nutritionally diverse foods, diversify livelihood strategies and rehabilitate natural resources.

125) We KGFAA shall work towards Enhancing the marketing, productivity and livelihood opportunities of smallholders as a powerful way to improve food security and nutrition.

126) We KGFAA shall Strengthen capacity for risk management together with other global players in demand-side programs for supporting smallholders' access to agricultural markets leverage its procurement footprint and expertise in agricultural markets – and those of other public and private buyers – to contribute to building resilient food systems, the production and processing of nutritionally diverse foods, pro-smallholder aggregation systems, improved post-harvest management and catalysing sustainable commercial and institutional market development for smallholders.

127) We KGFAA shall engage Significant investments in capacity strengthening of national governments and other actors supporting smallholder agriculture and food systems are being made by a range of global actors.

128) We KGFAA will seek to continue to play a role by making strategic demand side investments in the capacity-strengthening of relevant national and local civil society entities, farmers' organizations and other community-based organizations to help communities lead and sustain their own fight against hunger and achieve global goals of food production & security.

129) Our KGFAA strategic plan Activities designed and implemented with partners will include unconditional resource transfers to support access to food; asset creation and livelihood support; individual capacity-strengthening; institutional capacity strengthening; and smallholder agricultural market support.

130) Our KGFAA Strategic plan also includes unconditional /conditional resource transfers to support access to food; climate adaptation and risk management; individual capacity-strengthening; institutional and market capacity strengthening; and asset creation and livelihood support will arise from its demand-side orientation.

131) Our KGFAA global activities will focus on enhancing and improving demand-side aspects of food systems and addressing demand side constraints on smallholder productivity and income growth.

132) KGFAA Strategic and operational partnerships will be developed with agencies and actors with complementary capacities to boost productivity from the supply side.The vision will be achieved through the implementation of activities that fall under four complementary pillars: i) capacity development to support information systems on food and nutrition security of member countries; ii) standards, methods, and tools for information systems on food and nutrition security; iii) monitoring and in-country food security and nutrition assessments; and iv) statistics, information and analysis on food and nutrition security (global public goods).

133) The KGFAA implementation of the joint strategy will emphasize national ownership and leadership. Mechanisms for collaboration, improved communication and partnership building have also been identified. The guiding principles of the strategy highlight, among other things, the need to systematically place governments at the centre of planning and decision-making processes. High priority is placed on ensuring complementarity with the policies and practices of partners, including national governments, regional institutions, civil society and global agencies

134) We KGFAA will actively participate in and contribute to country level and regional dialogues related to global-relevant goals and/or targets, including key areas of policy and programmatic linkage between and other goals, such as education, poverty alleviation, climate change, peace and justice, health or gender.

135) KGFAA Activities designed and implemented with partners towards our Strategic plan will include institutional capacity strengthening; common services and platforms; and analysis, monitoring and joint needs assessments.

136) We KGFAA envision playing a limited role in working towards this Strategic Objective and its two Strategic Results where technical, organizational and institutional capacities are well developed, partnerships are in place, and policy frameworks are conducive to effective design, implementation and coordination of food security and nutrition interventions in humanitarian and development contexts.

137) We KGFAA shall fund and support Countries Response on Food- To quickly scale up and respond to fast-evolving complex crises through large logistics, supply chain and telecommunications operations are a key strength of the organization. The common services our Agency provides through such operations are of crucial importance in supporting country, regional and global efforts to respond to humanitarian crises and will continue to provide high-quality and timely services to governments and humanitarian partners in emergency preparedness as leader of the humanitarian logistics and emergency telecommunications clusters; as food reserves manager and through provision of sustainable engineering solutions for humanitarian needs. •

138) KGFAA will develop and refine common delivery platforms for domestic procurement capacities and similar initiatives that support implementation of the SDGs by governments, United Nations partners and other stakeholders. Common delivery platforms leverage existing delivery platforms for providing and improve the cost efficiency of multiple CBT initiatives targeting the same beneficiaries. It simplifies the processes, reduces the potential for duplication, fraud and abuses, and improves the overall verification and monitoring mechanisms. • KGFAA will support partnership-based actions for continuous innovation and learning to address the multiple challenges to sustainable development, including through South–South and Triangular cooperation leveraging its presence in countries worldwide. Collaboration provides access to resources, expertise, knowledge and networks that are essential to achieve the SDGs. In order to facilitate implementation of the 2030 Agenda, KGFAA will support countries in mobilizing increased, sustained and flexible resources, including through innovative public–private partnerships.

139) KGFAA long experience as a large-scale buyer in markets for food products and food system services provides it with extensive knowledge about conditions, opportunities and challenges in markets for a range of financial products and services, including credit, insurance and foreign exchange.

140) KGFAA Focuses to work with Agriculture, Livestock, Fisheries and Cooperatives ministries , departments, corporations and communities seeking to steer the Global and National impact towards an innovative and commercially-oriented agriculture and food secure economy now and in the future enormous resource endowment ranging from high precipitation, arable land, infrastructure, boasting local and International markets. These tangible factors give the countries and the world with the impetus to pull itself together and saddle itself on the global development lane with minimal delay.

141) KGFAA will seek to promote growth a Holistic balanced life of food product and security along with livelihood and welfare of farmers in education, industrial development, I.C.T and infrastructure as well as the agricultural sector towards increasing food security, income generation and employment creation within global development agenda through self help ,Co-operatives and community groups vital to the attainment of the broad objectives of the agriculture sector in the countries and globe since farmers make considerable contribution as a whole to food security by supplying inputs as well as marketing agricultural output. The policy objective of the co-operatives sub-sector will aim to revitalize the co-operative movement in the countries and globally are developing which will in turn spur sustainable economic growth and development.

142) KGFAA seek to step up irrigation- Due to changing weather patterns, there is a need to increase investment in irrigation projects and reduce over-dependence on rain-fed agriculture. Close collaboration with gorvernments assist in funding Irrigation programs both trench, open , sprinkle , drip etc will therefore be necessary through A clean, secure and healthy environment prerequisite for sustainable development. Governments needs to integrate the principles of sustainable development into the country's policies and program in order to reverse the loss of environmental resources. We shall package various projects to support farmers/stakeholders with subsidized inputs has the potential to increase agricultural production and subsequently achieving food security, Dependence on development partners affects the pace of project implementation, especially when their funding priorities change In an effort to achieve the previous strategic plans objectives, a number of challenges Inadequate policy and legal framework, Inadequate funding, Impacts of climate change, Low adoption of technology and un-coordinated Research and Development (R&D), Insecurity/resource-based conflicts, High population and cultural practices, Regional and international barriers to trade, Global economic recession, Conversion of agricultural land to other competing land uses, High cost of energy, Low involvement of youth in agriculture and ageing farmers

143) KGFAA Will continue to seek promotion of a competitive agricultural sector and the development of diversified products and market outlets. It is expected that enactment of appropriate policies and legislations will promote the role of government as a facilitator and regulator of agriculture industry for the private sector and other stake holders to play their roles. There is need to ensure that all agricultural policies and strategies mainstream cross cutting issues such as gender, environment, HIV/AIDS and drug and substance abuse.

144) To Create an Enabling Environment for Agricultural Development is to develop policies and legislations for agricultural development and will develop policies and legislations that attract investments in the sector. It will also undertake the Vision 2030 flagship programme on the implementation of the Consolidated Agricultural. This includes preparation of necessary regulations to actualize setting up new institutions such as the Agriculture, Fisheries and Food Authorities and thro global Agricultural and Livestock Research Organizations through countries.

145) Deal with challenges of small Farmers, fishers and pastoralists point out inadequate credit to finance inputs and capital investment as causing low productivity. A number of micro-finance institutions are operating but reach only a small proportion of farmers/ producers. They provide very short-term credit at high interest rates. The formal banking system is just beginning to develop credit facilities particularly suited to small-scale farming.

146) There have been high levels of waste due to pre-harvest and post-harvest losses occasioned by pests, diseases,

147) Crop damage by wildlife has also been common and compensation is usually not adequate. Gender concerns are one of the major factors holding back agricultural productivity and perpetuating poverty and hunger,

149) with ownership to productive resources, and participation along agriculture value chains being skewed against women and the youth.

150) Closing the gap in agriculture would put more resources in the hands of women and strengthen their voice within the households, a proven strategy for enhancing food security, nutrition, education and health of children.

151) There have been inadequate gender responsive technology developments and research, credit inaccessibility to women, youth, people with disabilities (PWDs) and other vulnerable groups.

152) To Increase Productivity and Outputs in the Agricultural Sector Increased production per unit and general output is critical in ensuring food security, income generation and employment in the agriculture sector.

153) Strengthen research, technology development and transfer The Ministry will strive to triple the budgetary allocation to scientific research and information and create a framework for technology transfer to enhance agricultural productivity.

154) This will support activities in collaborative research, advisory services, and technology transfer and agriculture mechanization.

155) Facilitate collaborative research Science and technology is the basis of economic and social development.

156) Reform and enhance support to agriculture research institutions so that they can provide new technologies of improved varieties, agronomic packages, and sustainable land use systems.

157) Support frontiers of science such as biotechnology, genomic, modeling and ICT as tools for greater agriculture development and food security.

158) Enhance advisory services and technology transfer will continue to provide capacity building and strengthening of institutional linkages and greater collaboration between them to promote technology transfer.

159) Support Agriculture research institutions to strengthened through improvement of human and financial capacities.

160) Motivating The private sector is to continue investing in agriculture systems at all levels, from farming, research and extension, technology development, processing and marketing.

161) Increase mechanization will develop an agriculture mechanization policy and promote farm mechanization through strengthening of Agriculture Technology Development Centers (ATDCs).

162) Wide application of appropriate technology and mechanization to achieve the highest level of production.

163) Creating centers of excellence for irrigation and mechanization.

164) Develop appropriate technologies will therefore be developed and availed to farmers in collaboration with County Governments.

165) Develop patenting procedures for engineering technologies.

166) Institutionalize testing and standards for agriculture machinery, equipment and implements.

167) Promote access to agricultural inputs and financial services

168) Enhance access to affordable and quality inputs ensuring availability and accessibility of high quality inputs such as fertilizer, seed, feed, veterinary vaccines, drugs, livestock genetic resources, pond liners, agricultural machinery and equipment, farm implements, agro-chemicals among other essential inputs for increasing productivity.

169) To undertake input subsidy programme on fertilizer, seeds, feeds and traditional high value crops to ensure that these inputs are accessible and affordable to small-scale farmers.

170) To address the high cost of agricultural inputs by promoting rationalized inputs distribution system; competition within the supply chain; and providing information on the availability and cost of inputs.

171) Development of A framework for fertilizer and seeds subsidy digitization, including introduction of e-voucher system will be developed and deployed to electronically register and effectively target deserving farmers nationally so as to ensure transparent reporting and accountability. To pursue a fertilizer cost reduction investment program with the aim of ensuring access of affordable and quality fertilizer.

172) Promote access to affordable credit Access to affordable financial services has been very low due to the perceived risk in agriculture investment. To implement the Agricultural Credit and Financial Services Access Programme to improve access of agriculture credit and insurance to agriculture value chain players.

173) Aims at reducing cost of credit of the commercial rate (to crop, fish and livestock farmers) and improve access through consolidating, rationalizing and capitalizing agriculture sector financial institutions.

174) Disease and pest control- will develop contingency plans for control and management of trans boundary diseases, pests and invasive species and continue to enhance surveillance and control of strategic pests (such as birds, worms, locusts, greater grain borer) and toxins (aflatoxin) in prone areas.

175)To develop strategies for surveillance and monitoring of animal diseases, antimicrobials and pesticides resistance development. A study of social economic impact of external parasite and vector borne diseases in ASALs sub counties will be conducted.

176) Carrying out disease outbreak investigations;

177) Surveillance for sentile herds.

178) Generation of data for vector and pest management;

179) Development of vector and zological services infrastructures; and

180) Establishment of food safety laboratories globally.

181) Reduce post-harvest losses To reduce pre and post-harvest losses,

182) To intensify training and dissemination of appropriate pre and post-harvest technologies to reduce both quantitative and qualitative losses.

183) To stablishing of processing, warehousing and cold storage facilities.

184) Food safety and quality regulations will be emphasized for market compliance.

185) Enhance animal genetics The objective of this program is to strengthen production capacity Animal Genetic Resource Centre (AGRC) and the National Aquaculture Hatcheries (NAH). This will be achieved through undertaking the following activities:- a) Procure and install liquid nitrogen plants b) Rehabilitation of road network and construction of modern bull pens; c) Recruitment of breeding bulls and genomic selection; d) This is expected to increase semen production doses annually and generate of liquid Nitrogen; and e) Upgrading National Aquaculture Hatcheries to boost fingerling production capacity for different fish species.

186) Enhance livestock vaccine production at the Global & National Veterinary Vaccine Production Institute. The programme targets to increase the capacity to produce adequate and improved vaccines. This will involve infrastructural improvement and capacity building of staff for current Good Manufacturing Practices. The expanded facilities will produce vaccines for a wider range of diseases and sufficient quantities for local, regional and international markets.

187) It will also lead to availability of affordable vaccines and increased national vaccination coverage from 10 to 80 percent. Sustainable utilization of capture fisheries.

188) Ensure sustainable utilization of fisheries resources in natural water bodies and tap the underutilized resources by undertaking the following activities:- a) Establish and equip Fisheries Monitoring and Surveillance Units (FMSUs); b) Undertake monitoring, control and surveillance patrols in natural water bodies; Ministry of Agriculture, Livestock and Fisheries – Stratergies, Establish fish ports facilities d) Develop domestic capacity for deep sea fishing; e) Implement Port State Measures Agreement (PSMA); f) Promote joint venture between foreign and local investors g) Conduct fish stock assessment in the and inland natural water bodies; h) Protect critical fish habitats in water bodies; and i) Stock and restock of natural water bodies with appropriate water fish fingerlings Address effects of climate change

189) To promote priority adaptation and mitigation actions in an effort to enhance resilience to climate change and contribute to low carbon emissions in the country. The specific actions include:- a) Mainstreaming climate change adaptation and mitigation strategies into agricultural extension; b) Establishment and maintenance of climate change information for agriculture; c) Up-scaling climate-smart agriculture technologies such as conservation agriculture and agro-forestry farming systems; and d) Development and application of Performance Benefit Measurement Methodology for adaptation, mitigation and development.

190) Develop and adopt climate resilient agricultural technologies The ecosystem that supports agricultural production is threatened by land degradation and changing land use developments. Towards this end, the Ministry will:- a) Provide technical advice to National Environmental Management Authority (NEMA) through review of Environment Impact Assessments (EIA) and Environmental Audits EA) on national and regional development projects that are likely to have impact on agricultural production; and b) Promote soil and water conservation measures.

191) To develop institutions that promote and enhance land, soil and water conservation for improved soil productivity. Programs for conservation of land, soil and water will be supported to promote farm forestry, protect river banks, catchments and wet lands.

192) To develop more effective partnerships between farmers, researchers, training institutions and extension service providers.

193) Agriculture & Livestock Insurance and Security- To enhance National and Global Food Insecurity providing the challenges include plant and livestock diseases, drought, floods and degradation of rangelands that result in crop failure and death of livestock. The losses affect communities' food security and undermine their social and economic status. Investment in agriculture being a risky venture has also been constrained by limited access to insurance services that we seek to provide for Agriculture, Livestock and Fisheries and implement a public-private partnership insurance scheme to cushion livestock, fish and crop farmers from risks, including disasters and effects of climate change. The livestock and crops insurance schemes will therefore increase the resilience of pastoralists and rural communities for sustainable livelihoods. The activities to be undertaken will include: a) Development of a framework for risk mitigation; and b) Establishing insurance scheme for farmers and pastoralists, Inadequate Market Access and Unfavorable Trade Environment farmers export semi processed, low-value produce. The limited ability to add value to agricultural produce, coupled with high production costs makes Kenyan agricultural exports less competitive in global markets.

194) To enhance national food and nutrition security Diversification and expansion of strategic food reserves The activities to be undertaken under this strategy will include: a) Increasing the quantity/cash equivalent of stocks in strategic food reserve b) Establishment of the Strategic Food Reserve Trust Fund. c) Diversifying the strategic food reserves to include beans, rice, powdered milk, canned beef and tinned fish; d) Establishing fodder banks along stock routes and construct hay storage facilities in strategic areas. e) Building self-reliance to reduce chronic food insecurity.

195) Support a global and National marketing system for livestock, foods and fisheries -There is need for proactive efforts to maintain existing markets and create new ones and to increase Kenya's bargaining power in regional and global agriculture markets. To Improve Market Access and Trade for Agricultural Products, Promote local and export markets, Develop safety and quality assurance procedures for agriculture products and by-products, Develop incentives and standards for marketing infrastructure, develop standards for market infrastructure for various commodities and provide incentives for the private sector to participate, Modernize and restructure existing processing plants, establishment of buffer stock and working capital for Meat Commissions meat value addation plants, Establish aquaculture market outlets to promote entrepreneurship and branding, as well as put up new storage and drying facilities to support irrigation schemes, Develop Structured Markets for specific categories of agriculture, livestock and fish products, operationalization of Warehouse Receipt Systems (WRS), Global National Commodity Exchange (COMEX), Commodity Futures, and expanding market auctions beyond the few traditional commodities.

195) Support a global and National marketing system for livestock, foods and fisheries .This will be accomplished through development of a central repository system, web content and media bulletins, online certification of documents and conducting catch assessment surveys in waters, Promote market and product development though economic partnership and trade agreements, Promote per capita fish consumption in the country, Promote new products to targeted market segments for meat and dairy products, Promote sale on forward contracting arrangements, Develop standards (in collaboration with relevant authorities) for agriculture produce traded locally, Analyze and advise on taxation regime on agriculture commodities and its impact on market access both locally and internationally.

196) To Establish Global & National export zones the following activities will be undertaken: a) Establishing livestock disease free zones (DFZ) to facilitate access of meat, leather and leather products to local, regional and international markets. One zone will be established by the national government at regional b) Establishing export abattoirs and slaughter houses; and c) Promoting pack houses for export products. These will be developed in production areas and will be equipped with preservation, cold transit and storage, grading and sorting facilities.

197) Enhance capacity for compliance with domestic and export trade measures the activities under this strategy will include: a) Development of a comprehensive national residue-monitoring programme for all agriculture products. This will involve carrying out identification and traceability of agriculture products along value chains; b) Strengthening Border Inspection Posts (BIPs).

198) This will include strengthening the existing seven BPI posts and establishing new ones; c) Development of standards and strengthen certification for agriculture products and by-products. This will be done through sensitizing counties and actors in the value chain on developed standards for improved certification of products; d) Carrying out identification and traceability of agricultural products along the value chains. Guidelines and implementation frameworks to be developed and the Counties sensitized; e) Conducting spot checks and national inspections at fish farms and processing facilities. This will be done through conducting national audit inspections of fish farms, fish processing establishments, and factory and freezer vessels. The sampling plan for residues in farmed fish will also be reviewed; f) Undertaking annual inspection and licensing of export slaughter houses. This will be conducted to ensure the export markets standards are met; g) Undertaking inspection and approval of milk processing plants. This will involve inspection of export processing plants; and h) Development of a fumigation facility for fresh produce at Airports and water ports

199) To increase competitiveness of National produce in world markets. The activities to be undertaken are as outlined below. a) Enhance capacity of county institutions on value addition, promote value addition both at household and community level. This will be implemented through providing appropriate trainings and adoption of new production technologies; b) Promote agriculture processing industries in the rural areas by building capacity of staff and establishing/ sensitising counties to start business incubation centres; c) Build gender sensitive markets and promote markets linkages for women; and d) Update the data base of agricultural products processors. This will be achieved through surveys to update the data base of food products processors.

200) Strengthen Information and communication management- will strengthen information and communication technology capacity, and establish agriculture information and knowledge management system. Ministry of Agriculture, Livestock and Fisheries -Strengthen data management system Data management is important in supporting a well-functioning feedback system. Will carry out various programmes aimed at strengthening data management. These include maintaining a web based data system, producing annual Economic Review of Agriculture (ERA) data publication and training staff on data management. In collaboration with the Global & National National Bureau of Statistics will undertake Census of Agriculture, Strengthen Monitoring and Evaluation A well-functioning Monitoring and Evaluation system is important for successful implementation of the Ministry's projects and programmes ,this Strategic Plan in order to meet the sector's development goals and objectives. Will develop and implement a monitoring and evaluation framework to ensure delivery of key outputs in an efficient and effective manner.

201) Enhance capacity of the Ministry for service delivery To improve service delivery, the will; identify capacity gaps; develop and implement plans for capacity development and mainstream youth, gender, disability, HIV/AIDS and substance abuse management.

202) Will undertake capacity building and technical support to the counties. This will involve identification of gaps in areas of national importance such as policy implementation, agriculture water management, livestock breeding; climate change and development; and implementation of capacity building plans.

203) Will Develop information products and distribution mechanisms Information generation and dissemination on all aspects of agriculture development is key to the success of the sector. This information should embrace the totality of the value chain from the farm to the market. In consultation with stakeholders, will design appropriate information products and distribution channels. This will involve production and distribution of print and electronic education and extension materials such as leaflets, brochures, pamphlets, booklets, documentaries, and radio programmes among others.

204) Mobilize Youth in Agriculture to secure future- The potential in sustaining food security and raising agricultural productivity has not been fully utilized. Youth involvement in the sector has been negated by lack of production infrastructures and inadequate training on modern agricultural production techniques. Many schools have land that is under-utilized and investment in the land would lead to improved nutrition for students and generate incomes for schools. To increase youth involvement in agriculture To implement this strategy the following activities will be undertaken during the plan period: a) Promote new farming technologies (green houses, drip kits, fish ponds and water harvesting facilities); b) Support youth to undertake farm tree planting; c) Establish irrigation projects, tree planting, fish ponds and water harvesting facilities in secondary and primary schools; and d) Technical and vocational training of youth in agriculture, continuous water.

205)We shall use global & national monitoring and evaluation Indicators including Contribution of agriculture to national GDP; Percentage growth of agriculture Gross Domestic Product, Number of policies legal frameworks and standards developed/reviewed, Value of exports of crops and crop products , livestock and livestock products, fish and fishery products, Quantity of various types of fertilizer procured and distributed to farmers, Average yield per unit of production for key commodities , Quantity (or cash equivalent) of strategic food reserves by type of food item, Number of hay bales reserved, Number of farmers, fishers and pastoralists covered by national insurance scheme, Number of livestock and fish breeds produced in national farms, Number of national audit inspections undertaken on farms, fish processing ;establishments, factories and freezer vessels, Number of assorted seeds (and cuttings) for traditional high value and drought tolerant crops procured and distributed, Number of border inspection points strengthened, Number of agricultural institutions reformed/restructured/ established.

206) Support the formulation and review of enabling institutions, legal and regulatory framework for the revitalization of agriculture sector in the County, and effective and efficient service delivery.

207) Build capacity of farmers through extension services and animal welfare in order to improve agricultural productivity in the county.

208) In collaboration with the National Government and other stakeholders, coordinate the construction of modern abattoirs, fresh produce markets, greenhouses, fish hatcheries and cold storage plants for fish, and coolers for milk.

209) Establish and coordinate agriculture support programmes, e.g. subsidized farm inputs, enhanced credit to farmers and free tea seedlings to support the poor farmers.

210) Improve market access for smallholders through better supply chain management.

211) Promote value addition to farm/livestock/fisheries products before they reach local, regional and international markets.

212) Boast Food and Nutrition Security and to improve the livelihoods of rural Kenyans by transforming the sector to be competitive, commercially oriented and responsive to the economic needs of the countries and globe through Crop Development and Agricultural Research, Livestock, Fisheries and Blue Economy and Cooperative Development direct implementation of agricultural programmes, projects and day-to-day activities to support farmers, pastoralists, fisherfolk, cooperators and other stakeholders.

213) Agricultural transformation is critical to growing the economy, reducing the cost of food, alleviating poverty and therefore delivering 100% food and nutrition security. The ASTGS takes an evidence-based approach with a sharp focus on "Delivery by Counties" to address the effects of climate change, perennial challenges that constrain agricultural output and productivity and, integrating sound natural resource management systems for sustainable growth and development of the sector recognizing the significant role and contribution of non-state actors and engages regularly with the Agriculture and Rural Development Donor Group, National Farmers' Federation, Small Scale Farmer's Forum, Private Sector Alliance, the Young Professional for Agricultural Development among others.

214) To overcome Global and National Constraints that affect agriculture development at national level have been well analyzed in the Agricultural Sector The following are some of the key constraints: i. Inadequate legal and policy frameworks: The sector has made strides in consolidating agriculture legislation. However, many policies and legislations remain out-dated and inconsistent with the constitution. ii. Low application of modern technology: Use of modern science and technology in production is still limited. Although Kenya has a well-developed agricultural research infrastructure, inadequate research-extension-farmer linkages and inadequate demand-driven research has led to low agricultural productivity. In addition, the rate of adoption and utilization of agricultural mechanization in Kenya has remained slow and therefore, there is need to develop a national agricultural mechanization policy.

215) To enhance productivity and preservation. Low and declining soil fertility: The rising population density has contributed to the subdivision of land to uneconomically small units. In addition, the reduction of fallow periods and continuous cultivation has led to rapid depletion of soil nutrients, declining yields and environmental degradation. iv. Poor governance in agricultural institutions: Agricultural processing, cooperatives and farmers' organizations are vital for good performance of the agriculture sector. Poor governance and corruption have led most of such institutions being inefficient. Moreover, an absence of private sector capacity to Ministry of Agriculture, Livestock and Fisheries take over some services has led to a vacuum and lack of these services altogether. v. Inadequate quality control systems: The export of agricultural products has faced restrictions due to poor packaging, damage during transportation, poor handling and contamination. vi. Multiplicity of taxes: Producers have been subjected to multiple taxes and levies. This has contributed to a reduction of the net farm incomes and created distortions in marketing structures. vii. Weak surveillance on offshore fishing: There is weak capacity to effectively monitor and enforce compliance and regulations governing the exploitation of offshore territorial waters. This has limited countries ability to fully exploit the offshore fishing potential. viii. Limited capital and access to affordable credit: Farming is considered highly risky by the formal banking sector, thus it gives farming little attention. Without credit, farmers are hard pressed to finance inputs and capital investment. A number of microfinance institutions are operating but they tend to increase the cost of credit, reaching only a small proportion of smallholder farmers, and provide only short-term credit. ix. Inadequate market access and marketing infrastructure: Agriculture marketing information and infrastructure are poorly organized. The domestic market lacks an effective marketing information system and infrastructure. The lack of structured markets for various commodities is a major drawback to market access within the country. In addition, the dependence on a few external market outlets makes agriculture exports very vulnerable to changes in the demand of agriculture products and unexpected non-trade barriers by foreign markets. x. Inadequate storage and processing facilities: Inadequate storage facilities constrain marketability of perishable goods such as fish, dairy products, beef, fruits and vegetables as well as marketability of durable produce. Inadequate fish-processing facilities have limited the extent of exploiting fish resources. A mechanism is needed to ensure completion of incomplete facilities, utilization of idle facilities such as National Cereals and Produce Board (NCPB) stores and appropriate location of future facilities. xi. High cost, adulteration, low and inappropriate application of key inputs: The cost of key inputs such as seeds, dam liners, semen, fishing gear, fertilizers, agro-chemicals, feeds and other animal health inputs has continued to increase making them unaffordable by many producers and increasing the cost of production. In addition, cases of adulteration of products have been reported. This has resulted to low application of quality inputs leading to reduced productivity. xii. Pests and diseases: Prevalence of diseases and pests continue to be high. xiii. Frequent droughts and floods: Over the last three decades, the frequency of droughts and floods has increased, resulting in crop failures, emerging livestock diseases as well as loss of livestock and fisheries. xiv. Poor infrastructure: Underdeveloped rural roads and other key physical infrastructure have led to high transport costs for agricultural products to the markets as well as farm inputs. xv. Gender inequalities:

This continues to impact negatively on household food security, sector performance and overall economic growth. These inequalities exist at household level in terms of access to and control over productive resources; and in agriculture value chains (participation at processing, marketing, trade) and in agricultural service delivery.

GLOBAL & NATION AGRICULTURE DEVELOPMENT AGENDA,

We seek to promote globally and Nation aims to promote an innovative, commercially oriented, and modern agricultural sector. This is to be accomplished through: transforming key institutions in the sector to promote agricultural growth; increasing productivity of crops, livestock and fisheries; reviewing land use policies for better utilization of high and medium potential lands; Expanding irrigation in arid and semi-arid lands; and improving market access for small holders through value chain management. Global Vision 2030 identified a number of flagship projects for sector to be implemented over the vision period to facilitate the desired growth and development. 4.2 Agriculture Flagship Projects i. Implementation of the Consolidated Agricultural Reform Legislations: This includes preparation of necessary regulations to actualize implementation of the Acts and setting up institutions such as the Agriculture, Fisheries and Food Authority, and Global / National Agricultural and Livestock Research Organization proposed in the new Acts. Additionally, efforts will be made to fast track passing of the Livestock and Fisheries Bills in Parliament. ii. Fertilizer Cost Reduction Strategy: This will address issues of access and affordability of fertilizer. Having identified and short-listed potential investors, the process of establishing a local fertilizer plant will be hastened. Similarly, the identification of a private investor for blending will also be undertaken. iii. Establishment of Disease Free Zones (DFZ): Four DFZ will be established to facilitate access of Kenyan meat, leather and leather products to local, regional and international markets iv. Fisheries Development and Management: This will be achieved through expanding the area of fish farming from the current high potential areas to Arid and Semi Arid Lands (ASALs) and developing fisheries related infrastructure and strengthening of monitoring, control and surveillance systems. In addition, the Ministry will promote development of underutilized resources such as Kenya's Exclusive Economic Zone (EEZ). Other Programmes i. Agricultural Development along LAPSSET corridor that we shall fund: This will involve feasibility studies, documenting investment opportunities in the corridor and providing investment incentives to those interested in agricultural enterprises along the corridor. ii. Agri-Business Development Programme: This programme is geared towards improving access to markets by all agricultural value chain players as well as improving and modernizing market To Strengthen Institutional Capacity -A number of government agencies in the agriculture sector are faced with serious challenges that affect their performance. The challenges range from inadequate technical capacity, organizational culture and accountability. Some of the regulatory institutions have conflicting mandates and there is a need to further rationalize them to enhance service delivery. There is therefore need to restructure some institutions in the Ministry to make them more effective on service delivery. New institutions also need to be established to reflect the changing capacity needs in the sector. To Strengthen Institutional Capacity There are many stakeholders and institutions involved in agricultural sector. The Ministry deals with many stakeholders and has several institutions that assist in service delivery. It is therefore, essential that these stakeholders are well coordinated to avoid duplication of efforts and wastage of resources. The following strategies will be implemented in order to achieve this objective Institutional reforms will support undertake reforms and restructure sector institutions and parastatals for improved efficiency- Global & National Plant Health Inspectorate Services, Global & National Pest Control Products management, Global & National Agricultural Development Corporations, Global & National Dairy Training Institute , Global & National Meat Commissions, Global & National Dairy Management, Global & National Agriculture Fisheries and Food Authority, Global & National Agricultural and Livestock Research Organizations, Global & National Fisheries Services and Fish Marketing Authorities, Global & National Livestock Marketing Management, Global & National Livestock Regulatory Authorities, Global & National Livestock Promotion and Development Authorities, Global & National Schools of Agriculture, Global & National Institute of Leather Studies, Global & National Animal Feed Inspectorate Services, Global & National Agribusiness. Our Strategic plan for Agriculture, Livestock and Fisheries -will further transform agricultural marketing functions through value chain development and strengthening producer and marketing systems Under this program strenghthen Global & National agricultural product development, creation of local / regional and international marketing opportunities for agricultural commodities, Global & National Accelerated Agricultural Inputs Access Programme, improving access of agricultural inputs such as fertilizer, agrochemicals, certified seeds, fish fingerlings and feeds, promote access to improved livestock genetic materials, Global & National Agricultural Credit and Financial Services Access Programme, This programme aims at improving access of agricultural credit and establishment of National Livestock and Crops Insurance Schemes, Global & National Agricultural Mechanization Programmes: These programmes aim at increasing access to and application of agricultural mechanization to enhance agricultural productivity, To realize an innovative, commercially oriented and modern agricultural sector, will adopt climatesmart agriculture.

Efforts will be put in place for increased involvement of the youth in income generating ventures in the crops, livestock and fisheries sub sectors. Global and National research-extension and farmer linkages, Global and National demand-driven research and limited access to affordable credit, Global and National depletion of soil nutrients environmental degradation, Global and National fertilizers agencies, Global and National agricultural promotion machinery and equipment movement, farm implements, pond liners and animal feeds. To support and fund existing and establishment of Global & National Advanced Food and Agriculture Analytics , Global & National Agro-processing promotion programs, Global & National Agricultural Information Resource Centre, Agriculture and Rural Development programs, Global & National Support Arid and Semi-Arid Land Agricultural Sector Development Strategy, Global & National Agricultural Sector Development Support Programme, Global & National Agricultural Sector Transformation and Growth Strategy, Global & National Agricultural Transformation Country Agencies, Global & National Agricultural Technical Vocational Education and Training, Global & National Bureau of Agriculture and Fisheries Products Standards, Global & National Comprehensive global Agriculture Development Programme, Global & National Capacity Assessment and Rationalization of the Public Service, Global & National Centres for Training and Integrated Research, Global & National Continental Free Trade Area, Global & National Consultative Group on International Agricultural Research, Global & National Computable General Equilibrium , Global & National Integrated Development Plan, Global & National Integrated Monitoring and Evaluation System, Global & National Research and Extension Departments, , Global & National Drought Risk Management, Countries Droughts Emergencies, Global & National Value addational Economic Zones and Processing, Global & National Export Processing Zones, Global & National Economic Review of Agriculture Economic Recovery Strategy, Global & National Food and Agricultural Organizations, Country Food Reserve Agencies, Global Acute Malnutrition, Global Hunger Management, Global & National Open Data for Agriculture and Nutrition, Global & National Institutional Architectural Assessment for Food and Agriculture, Global & National Agro-Industrial Parks, Global & National Intergration of Information and Communication Technology in Agriculture, Global & National AGRICULTURAL TRANSFORMATION AND GROWTH STRATEGY, Supporting International Food Policy, Research Institute IGF Intergovernmental Forum, Global & National International Livestock Research Institutions, Global & National Integrated Soil Fertility Management, Global & National Integrated Water Resources Management, Global & National Joint Agricultural Sector Consultation and Cooperation Mechanism , Joint Agricultural Sector Global & National Forums, Global & National Joint Research Centres and Forums, Global & National Joint Sector Reviews, Global & National Agribusiness and Agroindustry Alliances, Global & National Agricultural Information Networks, Global & National Agricultural and Livestock Research Organizations, Global & National Co-operative Creameries for milk production and livestock Developments, Global & National Forestry Research and development programs and Institutions, Global & National Farmers' Federations,Global & National Plant Health Inspectorate Services, Global & National Food and Agriculture Private Sector Alliances/ programs and Institutions, Global & National Food Security projects and institutions, Global & National Integrated Household Surveys, Global & National Industrial Research and Development, Global & National Marine and Fisheries Research, Global & National Meat Commissions, Global & National Bureau of Statistics on Food and Agriculture, Global & National Open Data Initiatives, To support and fund existing and establishment / advancements programs of Global & National Tea Development Authorities, Global & National Livestock Information Networks Knowledge System, Establishing of Global & National Legislation and Intergovernmental Liaison Monitoring and Analysing Food and Agricultural Policies, Global & National Ministry of Agriculture Livestock, Global & National Fisheries and Irrigation, Global & National Council of Science Technology, Agriculture and Innovation, Global & National Farmers Information Center, Global & National Horticulture Market Information System, Global & National Agriculture Investment Plan, Global & National Agricultural Research Systems, Global & National Global & National Biosafety Authorities, Global & National National Cereals and Produce authorities, Global & National Drought Management Authorities, Global & National Food Disaster Operation Centres and programs, Global & National Food and Nutrition Security Policy makers, Global & National Food and Nutrition Security Policy Implementation Frameworks, Global & National Irrigation Boards, Global & National Strategy fo**r Revitalizing Agriculture, Global & National Unions for the Protection of New Varieties of Plants, Global & National Agriculture Industrial Development , Global & National Agricultural Commodity Markets, Fund and facilitate packaging of global and national policies and organizations- Global and National Agriculture Policy, Global and National , Global and National Veterinary Policy, Global and National Sugar Industry Policy, Global and National Urban and Peri-urban Agriculture Policy, Global and National Agro-Chemical policy, Global and National Organic Agricultural Policy, Global and National Oil and Nut Crops Policy, Global and National Camel / Donkeys Policy, Global and National Tea Industry Development Policy, Global and National Cereals Policy, Global and National Agricultural Mechanization Policy, Global and National National Soil and Water Conservation Policy, Global and National Agricultural Produce Storage Policy, Global and National Livestock and Crops Insurance Policy. Global and National Livestock Policy, Global and National

Horticulture Policy, Global and National Food and Nutrition Security, Policy, Global and National Oceans and Fisheries Policy, Global and National Livestock and Fisheries policy, Global and National Aquaculture Policy, Global and National Animal Feeds Policy, Global and National Animal Breeding Policy. We seek to also influence Global and National farm forestry implementation framework, Global and National fisheries management and development regulations, Global and National livestock bill and animal feedstuff regulations, Global and National animal breeding regulations, Global and National agricultural professionals registration and licensing regulations, Global and National soil fertility and conditioners regulations, Global and National seed industry regulations, Global and National soil and water management, Global and National horticulture crops development regulations, Global and National Warehouse Receipt System Regulations, Global and National agricultural strategy for food security and job creation, Global and National emerging livestock strategy, Global and National marine fisheries strategy, Global and National dairy master plan, Global and National agricultural products value addation and managment strategies, Global and National agricultural land use master plan, Global and National Use of modern science and technology especially among small scale farmers in production, Global and National agricultural research infrastructure,

QUOTES ON AGRICULTURE

"Agriculture, manufactures, commerce and navigation, the four pillars of our prosperity, are the most thriving when left most free to individual enterprise. *Thomas Jefferson*

"

The farmer works the soil, The agriculturist works the farmer. *Eugene F. Ware*

"

Earth is here so kind, that just tickle her with a hoe and she laughs with a harvest. *Douglas Jerrold*

"

Agriculture is the foundation of manufactures, since the productions of nature are the materials of art. *Edward Gibbon*

"

It is impossible to have a healthy and sound society without a proper respect for the soil. *Peter Maurin*

"

Agriculture was the first occupation of man, and as it embraces the whole earth, it is the foundation of all other industries. *Edward W. Stewart*

"

Agriculture's not insulated from having a percentage of people who might be really good old graziers, but they're no good as business people. *Barry O'Sullivan*

"

Agriculture has become essential to life; the forest, the lake, and the ocean cannot sustain the increasing family of man; population declines with a declining cultivation, and nations have ceased to be with the extinction of their agriculture.

Elias Hasket Derby

"

Agriculture is the Archimedean lever which, though it does not move a world, tends to fill it with plenty, with moral health, and human happiness. *J. Buel*

"

The agriculture we seek will act like an ecosystem, feature material recycling and run on the contemporary sunlight of our star. *Wes Jackson*

"

Agriculture is the greatest and fundamentally the most important of our industries. The cities are but the branches of the tree of national life, the roots of which go deeply into the land. We all flourish or decline with the farmer. *Bernard Baruch*

"

Agriculture is the most destructive industry that we have. More than coal mining and other extractive industries. *Allan Savory*

“

Agriculture engenders good sense, and good sense of an excellent kind. *Joseph Joubert*

“

If farm ecology and economics go wrong, nothing else will go right in agriculture. *M. S. Swaminathan*

“

Agriculture is the great art of directing and aiding nature in the performance of those functions which were designed by Providence for the comfort and subsistence of man. *Lewis Cass*

“

Cultivators are the most valuable citizensâ€¦they are tied to their country. *Thomas Jefferson*

“

There is no time in modern agriculture for a farmer to write a poem or compose a song *Masanobu Fukuoka*

“

An agricultural life is one eminently calculated for human happiness and human virtue. *C. L. ALLEN*

“

Agriculture is a fundamental source of national prosperity. *J. J. MAPES*

“

A fertile soil alone does not carry agriculture to perfection. *Elias Hasket Derby*

“

Agriculture is at the core of the state. *Dave Cook*

“

Agriculture is the process of turning eco-systems into people. *Toby Hemenway*

“

A Sustainable Agriculture does not deplete soils or people. *Wendell Berry*

“

Agriculture for an honorable and high-minded man, is the best of all occupations or arts by which men procure the means of living. *Xenophon*

“

A farmer is always going to be rich next year. *Philemon*

“

If agriculture goes wrong, nothing else will have a chance to go right in the country. *M. S. Swaminathan*

“

Agriculture not only gives riches to a nation, but the only riches she can call her own. *Samuel Johnson*

“

Agriculture is our wisest pursuit, because it will in the end contribute most to real wealth, good morals, and happiness. *Thomas Jefferson*

“

To make agriculture sustainable, the grower has got to be able to make a profit. *Sam Farr*

“

Someday men will learn to irrigate and spread fertilizer instead of praying for fertility. *Warren Eyster*

Agriculture is a business that has been up to its bib overalls in politics since the first Thanksgiving dinner kickback to the Indians for subsidizing Pilgrim maize production with fish head fertilizer grants. *P. J. O'Rourke*
“

Agriculture is the most healthful, most useful, and most noble employment of man *George Washington*
“

A sustainable agriculture is one which depletes neither the people nor the land. *Wendell Berry*

Helpers Of Africa International

Kingdom Global Water & Sanitation Agency

Helpers Of Africa Internationalwill seek to manage water, Irrigation and Sanitation through our Kingdom Global Water & Sanitation Agency. Vision: "Universal access to adequate, safe and sustainably managed water resources, Irrigation and sanitation". Mission: "To ensure good governance in the conservation, protection, harvesting and storage, management and development of water resources and sanitation infrastructure for national socio-economic development". Water is the most important natural resource globally, indispensable for life and at the same time the backbone of growth and prosperity for mankind. According to estimations by the UN, more people die presently due to insufficient access to safe water and basic sanitation than in military conflicts. Daily 5,000 children loose their lives due to unsafe water and poor sanitation. Countries in Sub-Saharan Africa loose 5% of their national product annually – more than the total amount of development aid and debt relieve – due to insufficient access to safe water and basic sanitation. Funds invested in water services will generate, next to the huge social profit, economical benefits between 3 to 34 times depending on the technology and specific conditions on the ground. No access to basic sanitation means that people have to use water for the daily use contaminated by the excreta of human and livestock. Because of the importance of water services for the economic growth of a country and the wellbeing of its population global research recommends that governments should provide investments equivalent to 1% of the national product. The growing demands for water against the limited natural endowment and its increasing scarcity could result in armed conflicts and pandemics if infrastructure and management of water is not improved. Consequently, it is urged that water and sanitation must rise higher on the national agenda. The World and many counties faces serious challenges with regard to water services (water, Irrigation and sanitation). Despite the efforts of investments provided in the past years by the Government and development partners, existing facilities have continued to deteriorate and fail to meet the demand of the increasing population, particularly in many rural areas and the very rapidly growing settlements of the urban poor. Safe water and basic sanitation must be regarded as a basic human right and should therefore be accessible and affordable to all. This is important in order to achieve the Millennium Development Goals (MDGs) and the national targets in the Economic Recovery Strategy for Wealth and Employment Creation (ERS-WEC). We have a Global and National Water Services Strategy derived from comprehensive research from our Smart team of professionals in Water Resources Management and Development. Our strategic plan through KGWISA provides a clear, accountable, and transparent road map to implement sector policy in order to improve health, jobs and wealth for world and nationals. We shall immediately venture and invest in this full force through its implementation enabling legislation that provides for an increased and deliberate focus on Water Resources Management (WRM) and; Water and Sewerage Services (WSS) and Irrigation development.

We have A comprehensive institutional framework for the water sector that provides for participation of all stakeholders in management and development of the sector globally and in the Nations now been established and operational in planning and now ready for implentation. It is my sincere hope that the realization of the goals promoted in this NWSS shall contribute immensely towards the realization of our global and national aspirations development goals of our beloved world, I wish to thank all donors for empowering us to add value to this world and create a greater world for generations to come through your generosity into this important work. The Helpers Of Africa Internationalthrough KGWISA is committed to accelerated development and more efficient delivery of public services to the global citizens, with an emphasis on the need for prudent management in the utilization of water resources. This will enable the Governments and world to achieve its goals of growth, productivity, efficiency and improvement in service delivery. Against this backdrop, the bank has adopted the KGWISA which positions us to prepare long term strategic plan detailing priority areas, agendas and projects that will be implemented during the period. Its mandate is development and management of water resources, transboundary waters, water harvesting and storage, water services and sanitation regulation, dams and sanitation management. This Strategic Plan Agenda shall form the basis for identifying development priorities and establishing deliverables under the The Helpers Of Africa Internationalthrough KGWISA Performance Contract system. Towards ensuring its full implementation, the Plan is linked to the The Helpers Of Africa Internationalthrough KGWISA budget system. Realization of universal access to water appears to be a heavy task that must be performed within National and Global Scope considering that at present, the global and national water coverage. Many people in Nations and World are using unimproved water sources; hence the task of providing safe water is much heavier because of global population growth It is therefore my considered expectation that the implementation of this strategic plan shall help the world and countries to achieve universal access as defined in the Sustainable Development Goals (SDG) No. 6 and contribute to meet the national development goals, particularly enabling the delivery of the The Helpers Of Africa Internationalthrough KGWISA priority Agendas. In addition, we will strengthen coordination structures and platforms for increased stakeholder and consumer participation in decision-making and implementation processes, in an effort to combat the water, Irrigation and sanitation sector challenges.

For effective implementation of the strategic plan, the ministry is committed to supporting mobilization of resources for the sector, water use efficiency technology strengthening of partnerships and collaboration among stakeholders, monitoring, evaluation and reporting. This will be achieved through translating the strategic action plan into departmental work plans and thus providing the basis for departmental performance evaluation.

Our Strartegic plan highlights various agendas, projects and various areas of focus as Follows

1. To enhance sector governance and leadership through formulation and implementation of Strategies in full compliance with the Water global water Agendas.
2. To Increase Global and National per capita fresh water endowment through management, protection and conservation of water resources through governments and partnership with organizations/ communites
3. To increase percentage of national population with access to safe water nationally and globally
4. To increase percentage of national population with access to improved sanitation.
5. To Increase water storage nationally and globally taking advantages of floods to create more reserves that destruction
6. To build human resource capacity through training of staff annually and recruitment
7. To undertake research, development and adoption of appropriate technologies through the establishment and operationalization of water research institutions and conduct research projects
8. To enhance water sector financing by mobilizing resources for national, regional and global support programmes and projects In line with Helpers Of Africa InternationalVision, Mission.
9. To identified the pillars of this Strategic Plan in global and National Policy, Legal and Institutional Framework Key outcome will be Good Governance in the Management of Water Resources with major focus being on the full operationalization of Water guidelines and development/ implementation of policies and strategies.
10. To fund and support Management, Protection and Conservation of Water Resources and Transboundary Waters with a Major outcome will be increased availability of safe and adequate water resources.
11. To partner with countries and organizations on Emphasis on water resources monitoring, water quality; ground water assessment, catchment management and implementation of negotiated MOUs for shared water resources.
12. To fund and Support Water Coverage to increase percentage of national and global population with access to safe water
13. To increase water connectivity will be undertaken in collaboration with Countries, local Governments and non-government actors to benefit millions of households nationwide.
14. To increase Sanitation Coverage: During the plan period, The Helpers Of Africa Internationalthrough KGWISA will increase the percentage of urban population with access to improved sanitation that of rural population especially in developing and poor countries.
15. To increase the percentage of urban population with access to sewerage nationally and globally.
16. To increase Water Storage and Flood Control will increase water storage through the construction of large dams, medium size dams, small dams, pans along with helping house hold to buy drums and water catchment gutters.
17. To develop Human Resource Capacity in local and National gorvernments: This will entail enhancing staff competencies, improving working environment, enhancing performance management, succession management and enhancing knowledge management.
18. To support Research and Technology: Key outcome will be enhanced water research and technology through establishment and operationalization of three water research institutions, establishment of financing mechanism to fund research projects, adoption of appropriate water and sanitation technologies, and improvement of water data collection and information management.
19. To ensure that the key results above mentioned are met, this strategic plan outlines prioritized policies, programmes and projects that will be undertaken short and long term Plan.
20. To network water, sanitation and irrigation stakeholders nationally, continental and globally prepared through a sector-wide approach consultative process that involved various stakeholders in the Water and Sanitation sub sector in partnership with current stakeholders

21. To create Partnerships and Resource Mobilization through you faithful donors, your networks and other development agencies to support programmes and projects. This will done through the enhancement of exchequer funding including equalization funds, bond financing, public private partnerships, leveraging on commercial financing, collaboration with National, regional and Continental Governments on last mile water connectivity and establishment of an endowment fund.
22. To support in planning to achieve the strategic objectives; appropriate strategies, output and activities/actions for each strategic focus areas were identified the implementing actors, the time frame, the expected outcome and key Performance Indicators were determined.
23. To fund and support Establishing, Rehabilitating and Up-grading the hydro-meteorological monitoring networks
24. To fund and support Groundwater hydro-geological assessment
25. To fund and support Catchment Management Strategies
26. To fund and Support Development of Sub-Catchment Management Plans
27. To fund and Support technical support in the construction of Earth/Sand dams.
28. By supporting Food security and nutrition, water will be required for supporting irrigated agriculture in order to support food production through irrigation and water catchment.
29. Affordable housing and affordable health care, - providing water to facilitate water supply and also in terms of sanitation in this case waste water management, solid and liquid waste management specifically waste coming from households in order to control effluents that pollute/contaminate water resources and cause water borne diseases; Controlling construction within the riparian land will become a key activity.
30. Manufacturing, water is a key raw material for processing in addition issues of pollution control will be a crucial activity.
31. To Strengthen water resources information gathering and management systems national and globally
32. To Strengthen water resources planning, allocation and compliance to regulation.
33. To Improve the protection and conservation of water resources to Increase per capita water availability.
34. To Strengthen prevention and regulation of water related disasters.
35. To Strengthen stakeholder collaboration in water resources management and regulation.
36. To Support and fund Corporate Strategic Focus and planning Nationall and globally
37. Strengthen institutional capacity and improve working environment of all agencies , organizations and boards in training along with there establishments and facilitations
38. To Enhance resource mobilization and effective use of the finances.
39. To impact and empower Internal Processes • Strengthen water resources information gathering and management systems.
40. To Strengthen water resources planning, allocation and compliance to regulation.
41. To Improve the protection and conservation of water resources to Increase per capita water availability.
42. To Strengthen prevention and regulation of water related disasters.
43. To Strengthen stakeholder collaboration in water resources management and regulation.
44. To fund and support Organizational Capacity • Strengthen institutional capacity and improve working environment Corporate
45. To support Financial Perspective • Enhance resource mobilization and effective use of the finances
46. To Strengthen water resources information gathering and management systems.
47. To Strengthen and enhance water resources monitoring
48. To Empower Assessment of status of the existing monitoring stations (GW&SW)
49. To Upgrade existing monitoring networks.
50. To Utilize web based information on water resources
51. To fund research for data and Knowledge Management

52. To Support Operationalization of Laboratory Information Management System to the other laboratories
53. Improving and enhancing the existing Laboratories and field water quality analysis in terms of technical and human capacity.
54. Involving the Community (WRUA) in the water quality analysis through community science and innovations. Strengthen water resources planning, allocation and compliance to regulation
55. Improve the tools of water resource planning and allocation
56. Enhance capacity on the use of water resources planning tools.
57. Improve on the use of WR allocation systems.
58. Enhance compliance with WR management regulation Improve the protection and conservation of water resources to Increase per capita water availability.
59. Protect and restore existing freshwater ecosystems from pollution
60. Manage and regulate water use in water catchments and aquifers
61. Promote protection, rehabilitation and restoration of degraded water resources and catchments
62. Promote water use efficiency
63. Enhance regulation of water use.
64. Promote sustainable management technologies and innovations
65. Promote sustainable management of lakes and their basins
66. Regulate the development of water storage structures
67. Support the development of basin water resources strategies
68. Review and enforce joint collaborative efforts on prevention of pollution water resources from point and non-point sources and streamline the implementation of the polluter pay principle
69. Promote incentives for cost effective technologies and payment for ecosystem services for water protection and catchment conservation such as waste water reduction, recycling and reuse.
70. Capacity building to train water instutions to increase plumbers through technical schools and vocational institutions.
71. Strengthen prevention and regulation of water related disasters
72. Regulation of water storage infrastructure ,dam safety & Flood mitigation mechanisms Customer Strengthen stakeholder collaboration in water resources management and regulation
73. Improve mechanism for stakeholder collaboration
74. Promote stakeholders participation and collective action in water resource planning, use and management •
75. Promote structured arrangements with stakeholders to provide finance for water sector research and development.
76. Enhance the involvement of gorvernments and other stakeholders in water resource monitoring Organizational capacity Strengthen institutional capacity and improve working environment
77. Improve institutional capacity to support global and National Visions and the four agenda delivery.
78. Enhance customer/stakeholder satisfaction and retention Financial Enhance resource mobilization and effective use of the finances
79. Enhance resource mobilization and effective use of the finances .
80. Enhance linkages and partnerships
81. Enhance multi-sectoral and public-private sector participation in WRM
82. Increase revenue collection in local and national gorvernments to have capacity to repay our loans
83. Improve operational efficiency through training and technology programs of meters, billing and audits.

84. Fund and invest in Climate Change: Climate change affects water resources through its impacts on the quality, quantity, timing, form and intensity of precipitation leading to decreased water resources available for water supply, food production and social economic services. The impacts of Climate change have caused an increase in incidences of natural disasters such as floods, droughts, landslides and introduction of micro-organisms in fresh water sources thereby reducing quality. These have led to high stress on the national economy and human health. Climate change impacts on the water sector therefore require innovative adaptation measures to reduce the vulnerability of water systems and water services.
85. Fund and Support E-Waste innitiatives and networks: The rapid technological advancement increases solid and liquid waste generation leading to degradation of water resources.
86. Fund and Support Regional challenges Transboundary Water Resources: Kenya is both an upstream as well as a downstream country, and shares substantial proportion of water resources with neighbouring countries. These resources are governed by international Law. National constitution provides for adoption of ratified international law as part of national domestic law. We shall support nations to negotiate and sign a number of instruments, which are in the process of ratification, and these will impact on how our transboundary water resources are managed. Moreover, international instruments depend on good will of state parties to enforce negotiated instruments through rafts of national legislation in which state parties do to meet Transboundary obligations. The Transboundary sector has weak technical capacity for transboundary water resource management, and development, which needs to be strengthened in order to enhance reasonable utilization to protect national strategic interests.
87. Help Human Settlements for water distribution, Increased informal settlements and low-income urban areas due to rapid rural-urban migration.
88. Through our City Development and Slum upgrade solve problems of Declining living standards, polluted air and water resources and unsanitary living conditions & Inadequate provision of water and sanitation services.
89. In partnership with other agencies deal with Poverty: According to the Kenya Integrated Household Budget Survey Report, the proportion of population living below the overall poverty.
90. To support re-evaluation the sustainability of user charges or community contributions among the poor especially in the Arid and Semi-Arid Land (ASAL) regions.
91. Support Non-Revenue Water projects: The current levels of Non-Revenue Water stands at with the largest water losses being through illegal connections, leaks due to dilapidated infrastructure and commercial losses (flat rate supply). Small water schemes have inadequate capacity to manage Non-Revenue Water. Having devolved water services, the ministry will support counties through capacity building to develop policies and increase investment in the reduction of Non-Revenue Water.
92. Support the counties in improving the sustainability of water supplies and sewerage schemes by providing technical support to reduce chemical contamination carrying out monitoring of annually and developing and issuing policy guidelines on reduction.
93. Human health: Pollution as evidenced by presence of wastewater, heavy metals and agro-chemicals in rivers and water bodies as well as catchment degradation continue to be major challenges to human health.
94. Pollution and degradation of catchment areas: Contamination of water resources leads to reduced water available for use. Cleaning water of low quality requires a high amount of energy, which increases the cost of delivering water to the people. Furthermore, degradation of catchment areas has not only reduced flows and quality of water in the rivers but also increased possibility of conflict between upstream and downstream users.
95. Wastewater management: Untreated or inadequately treated municipal sewerage is a major source of ground and surface water pollution in Kenya. It is estimated that only about 25% of the urban areas in developing countries have some form of sewerage collection. During the plan period, the Ministry will prioritize expansion of sewerage services by construction of new sewerage systems and expanding the existing ones.
96. Low investment in the water and sanitation sector: Development of infrastructure for water and sewerage requires heavy capital investment. The funding from the government and development partners fall short of the requirements resulting in a backlog of investments in water services, water storage and sewerage infrastructural development.

97. Support Governance: Water governance has remained a major challenge in developing countries. Adherence to global and regional instruments and policy commitments at national level have not been adequately addressed or coordinated. Globally and Regionally, National policies and interventions often have implications on the trans-boundary water management.
98. The low water storage capacity is attributed to lack of clear policy on water harvesting and storage, which has led to among other factors limited investment in water storage and water wastage due to low off the roof and ground water runoff harvesting and storage.
99. Fund and Support Water Resources Management During the plan period Sub-catchment management Plans (SCMPs) will be developed and implemented, monitoring stations will be rehabilitated, upgrade to telemetry, and establish surface water and groundwater monitoring stations and establish national Water Quality reporting stations to reduce incidences and outbreak of water borne diseases during flood and drought periods.
100. Further, country-wide groundwater mapping will be undertaken; isotope hydrology techniques will be employed to quantifying water resource in the Kilimanjaro Aquifer. Pollution of water resources will be identified and measures undertaken to mitigate against its occurrence. These will include establishment of aluminium residues in drinking water, mapping of arsenic and fluoride in groundwater resource in 30 counties identified during a preliminary study conducted. During the plan period, dam catchment conservation and protection Groundwater Conservation will be undertaken. Isotope Hydrology Laboratory will be established and operationalized. For the counties, the sector will undertake development of Trans-County Water Resources Management Framework to guide the management of inter-county water resources which will ensure equity in water access and management.
101. Our agency will mitigate against the emerging inter county conflicts on resource sharing and management. Mapping of water conflict areas and resolution mechanism will be undertaken in the hot spot areas and develop conflict resolution frameworks. A framework for protection and gazettement of water bodies and the sources will be developed.
102. Our agency will support Water Harvesting and Storage Our targets to enhance reliable and adequate water harvesting and storage capacity to meet domestic, irrigation, industrial, hydropower generation, flood control and environmental needs through the construction of dams and water harvesting structures.
103. The Construct multi-purpose medium size dams and small dams/ water pans across the country to increase water storage per capita from the current level. The Our agency recognizes domestic water harvesting as an important source of water.
104. Our Agency therefore develop a policy to encourage water harvesting at household level. Urban Water Supply The programme strives to achieve universal access to safe water in urban areas for socioeconomic development.
105. Our agency will be undertaken by focusing on the poorest marginalized and unserved aimed at progressively eliminating inequality in access to sanitation services ; and mobilization of resources and support at the highest political level for sanitation and hygiene to increase sanitation and hygiene annual budget.
106. Water Research the Ministry targets to enhance and facilitate research in fields related to water resources utilization and management.
107. Our Agency will operationalize Water Resource Center at KEWI; establish and operationalize Water Resources Management Institute; establish Sewerage Research Centre in Kisumu; establish a Water Sector Research Funding mechanism to support water research projects; capacity building and technical assistance will be undertaken at county level.
108. Our Agency will support and strengthen the participation of local communities in improving water resources management in the basins. Regional Centre for Groundwater Resources Education, Training and Research will conduct research on the status of groundwater in the East African Region and undertake capacity building. The Isotope Hydrology laboratory will continue being developed. Provision of Water to Poor Unserved areas including informal settlements
109. Our Agency will ensure that under-served areas in Kenya have adequate access to water and sanitation services to improve health care. The Ministry will finance rural and urban water and sanitation projects in low-income areas in collaboration with County Governments and implement the WASH programme for schools. The social/flat rate tariff shall continue to be implemented on an area basis and develop a system for reporting on low income areas to monitor progress in coverage.
110. Our Agency will also support Universal Health Care by mapping the health facilities to be connected to water and sewerage services where projects in key towns will be developed and connection in level hospitals and health facilities with water and sewerage/sanitation facilities will be developed.
111. Our agency will aim to ensure availability and sustainable management of water and sanitation for all Water sector has undertaken mapping.

112. Our agency will fund water infrastructure development as opposed to water resource and sanitation management. Land acquisition issues for large infrastructure projects
113. Our Agency will fund planned programs and projects profitable projects Increased peri-urban and satellite towns has led to increased demand for water and sanitation services.
114. Our Agency will fund National governments to enforcement of laws, policies, strategies and regulatory guidelines.
115. Our Agency will support impact that effects of climate change and associated extreme weather events threaten sustainable water resources development. This results in substantial reallocations towards mitigation and adaptation
116. Slow career progression and hence gaps in succession management is a need to increase investment on water resources, sewerage and sanitation management.
117. Our Agency will support acquisition of Project sites to be acquired and cordoned off early to reduce compensation claims which arise during project commencement. Further improve collaboration with National Treasury, National Land Commission and project affected persons.
118. Resource mobilization strategies are essential to support implementation of programs and projects that also affect communities
119. We shall support National and Global master planning There is a need for master planning to meet increased demand for water and sanitation services arising from peri-urban and satellite towns
120. Collaborative framework between the national and county governments is essential for sustainable water resource and sanitation management
121. On climate change effects, there is need to allocate more resources for improvement of capacity to forecast extreme events and mitigation of their effects
122. Adequate Institutional capacity development is critical for effective implementation of a strategic plan Enviromental Strengths, Weaknesses, Opportunities, and Threats (SWOT) Analysis.
123. We shall support Legally Established and recognized water sector institutions.
124. Separation of roles: policy, implementation and regulation Operational in national plans Budgeting towards Increase staffing to reach approved establishment
125. Capacity building initiatives Old dilapidated water and sewerage infrastructure frequent infrastructure breakdowns.
126. We shall seek for Good will from Development partners Increased funding for programmes/projects.
127. To propagate Human Right to Water and Sanitation Progressive realization due to huge capital investments support universal access to water and sanitation services.
128. Increased demand and abstraction of water resources
129. Clean up of contaminated waters and rivers.
130. Fund and Support Water Catchment re-degradation
131. Formulate water regulations and guidelines Lobby for laws that provide for protection of water catchment areas.
132. Increase water catchment areas.
133. Enhance water harvesting and storage
134. Increase research to enhance innovation
135. Increase demand and abstraction of water resources
136. Pollution of water resources
137. Water Catchment degradation
138. Enhance water harvesting and storage
139. Develop and implement water regulations and guidelines Increased urbanization Increased demand for water resources and sanitation services Mobilise resources and provide adequate funding for water and sewerage projects Technological Improved technological development and advancement Ease in prospecting for and monitoring water and sanitation services
140. Continual capacity building and adoption of new water technologies Environmental Climate Change
141. Solve Land degradation, drought, floods and desertification

142. Solve Decrease in water resources Development and implementation of contingency /adaptation/mitigation plans, and capacity building Sustainable water resources use management Pollution of water resources Compromised water quality
143. Enhance water quality monitoring
144. Improve water quality laboratory services
145. Polluter pays principle Legal Water
146. Enhanced awareness in the sector
147. We shall support all institutions and organizations that deal with water in capacity building in various ways including Technical advisory and support • Proper implementation of policies, legislation and regulations for both levels of Governments. • Partnership in implementation of national programs and projects. • Timely and Quality provision of, water and sanitation services to the public. • Share data and information on their achievement on water and sanitation Private Sector • Increased involvement in Public Private Partnerships (PPPs) for water, sanitation and Land reclamation services provision. • Provide enabling environment and incentives For business • Involvement in policy formulation in the sector • Increased funding for prioritized PPPs projects in water and sanitation • Play their rightful role in sector growth • Compliance with laws, regulations and best business practices
148. Advocate and Promote Sustainable Development: That Stakeholders will pursue development in the sector that satisfies the needs of the present generation without compromising the capacity of future generations, guaranteeing balance between economic growth, care for the environment and social wellbeing
149. Advocate and promote Honesty / Integrity: That stakeholders shall conduct its affairs in serving the public in an honest manner upholding highest degree of responsiveness to the aspirations of the public it serves
150. Advocate and Promote Human Dignity: That Stakeholders will be committed to uphold reasonable standards of living through provision of water services and sanitation for the citizens.
151. Advocate and Promote Teamwork and focus on results: That Stakeholders will relentlessly pursue timely attainment of targeted results at all levels through high level coordination, networking and collaboration with all staff, stakeholders and the public.
152. We shall support all institutions and organizations that deal with water in capacity building in various ways including - Efficient and effective services • Transparency and accountability in the service delivery • Enhanced awareness in the sector • Regular feedback on our services • Responsive citizenry • Compliance with laws and regulations. • Ownership and sustainability of projects Staff • Commitment to their welfare • Their excellent performance to be rewarded • Favorable terms & conditions of service and good work environment • Skills/capacity development and career progression • Efficient and effective Human Resource services; • Participatory and fair appraisal • Improved productivity • provision of necessary skills and manpower • Exhibit good image of the institutions • Efficient and timely services to the citizens and stakeholders • Adherence to policies, rules, and regulations of the ministry; • Efficient utilization of resources allocated Researchers and academic institutions • Provide attachment and internship to their students; • Share the generated data and information • Partnership and collaboration in research and policy formulation • Qualified, disciplined and well trained students. • Training of manpower who are competent enough to deliver on the Ministry's mandate • Confidentiality on shared information and feedback. Ministries Department and Agencies (MDAs) Strengthen support and collaboration with Ministries and state agencies Promote inter-ministerial coordination and collaboration, devolution and decentralization opportunities Contractors, Suppliers and Consultants • Timely payments for goods supplied and services rendered. • Procurement process which is transparent and accountable as well as Fair competition • Affirmative action on access to government procurement opportunities for youth, women and Persons With Disabilities • Efficient, effective and timely delivery of goods and services. • High standards of technical works undertaken, goods and services supplied that meet contractual obligations • Competitive and fair pricing Professional bodies • Compliance by technical staff through registration and renewal of membership • Provide opportunities for continuous professional development • Improved standards of technical expertise and professional management in the sector • Partner in the implementation of development projects and programs. • Improved innovation, research and development; and policy analysis Non-State Actors such as NGOs, Civil Societies, CBOs and others • Participation in the Ministry's policies, projects and programs development. • Provision of quality services Improve methods of collaborations by signing of MOU's that ensure serious commitment Development • Efficient use of Resources • Support specific programs whose 19 Stakeholder Stakeholder Expectation Ministry Expectation partners and international organizations

153. Achievement of planned outputs and outcomes of projects implemented • Involvement in stakeholder consultations in planning for the sector • Timely payment of subscription fees. implementation is coordinated by the Ministry. • Timely disbursement of promised resources; Parliament • Timely submission of draft bills for legislation. • Timely response to all parliamentary questions • Efficient utilization of allocated resources • Effective and Timely formulation of bills on Water and Sanitation • Quality bills • Ensure adequate funding Media Timely, Accurate and reliable information • Enhanced awareness, information documentation and effective communication. • Fair and responsible coverage local Governments • Policy guidance on , water, sanitation and land reclamation • Partnership in implementation of devolved functions in water, sanitation and land reclamation • Capacity building on water, sanitation and land reclamation
154. Advocate and Promote Innovativeness: That Stakeholders will be committed to innovativeness, creativeness, resourcefulness and focused planning and customer driven service delivery
155. Advocate and Promote Participatory Approach: That Stakeholders will be committed to consultations, joint and comprehensive partnership with all its stakeholders in all its undertakings.
156. Advocate and Promote Motto “Water is life and sanitation is dignity” across all stakeholders nationally and globally.
157. Advocate and Promote that the Guiding Principles Governance and management of the water sector will be guided by the national values.
158. Support and Fund Intergovernmental and institutional collaborative effort: National and County governments shall work in a consultative and collaborative manner with a clear coordination framework to promote the objectives of the sector, taking into account the distinct mandates of each level of government; incorporating recognition of concurrent and overlapping areas of jurisdiction.
159. Support Integrated planning and resource management: Planning of water sector activities should take national, cross-county and county approach towards the development of national integrated investment and financing plan. The management and development of water resources shall take into account different and competing interests of groups, sectors and the needs of the environment. Planning for water service and resource management should be integrated.
160. Respect for human rights: Every sector player shall act in a manner that protects respects and fulfils the human right to water and sanitation. Every global Citizen has a right to clean and safe water in adequate quantities, and to reasonable standards of sanitation. The management and use of water resource should take into account the needs and rights of riparian communities as well as guaranteeing access rights to other users for surface and ground water.
161. Equity and inclusivity: Water resources shall be allocated fairly according to need, value to economy and efficient usage, mindful of the marginalized and vulnerable groups. Cross-country equity should apply in sharing water resource. e. Polluter pays principle: The cost of cleaning up any element of the environment damaged by pollution, compensating victims of pollution, cost of beneficial uses lost as a result of an act of pollution and other costs that are connected with or incidental to the foregoing, is to be paid or borne by the person convicted of pollution
162. Consumer protection: The sector will implement measures that shall ensure the water is available, accessible, affordable, reliable, sustainable, and in the right quality, quantity and time, and being mindful of marginalized and vulnerable groups.
163. Efficiency and value for money: Every effort should be made in maximizing output per unit of public resource, and in maximizing the expected outcome(s) across the value chain.
164. Ring fencing: Revenues generated from water charges, fees and tariffs should be used for the purpose of promoting water activities only.
165. User pays principle and donations: the recognition of water resources as an economic and social good, and the application of the most efficient pricing model to ensure full cost coverage while meeting the social, economic and environmental costs for sustainability but Helpers Of Africa Internationalwill put the initial amount.
166. Our agency will strengthen Policy, Legal and Institutional Framework to facilitate the full operationalization of Water through the finalization of the development of five regulations and guidelines namely: Water Services Rules; Water Resources Rules; Water Harvesting & Storage Rules, Water Tribunal Rules and Water Sector inter –governmental regulations. Additionally five (5) Water sector institutions (NWHSA, WSTF, WRA and WASREB, WT) will be established.

167. Will also develop the criteria to establish WWDA(s) as per the Water and national global agencies will also be undertaken through the finalization of the miscellaneous national and global bill will be developed. Our agency will work with countries to develop and review policies, legislation and regulations on National Water Resources, Trans-boundary and National Water Services. During the plan period, the finalization and operationalization of the following will be undertaken: National Water Policy Finalization of the Legal Framework to operationalize Trans-Boundary.
168. Our agency will strengthen linkages between planning, budgeting and monitoring to enhance service delivery of and mainstream cross cutting issues in countries and globally.
169. Our agency will strengthen Management, Protection and Conservation of Water Resources and Transboundary waters During the Plan period, Water resources assessments will be carried out through the rehabilitation of hydro metrological stations for water resources information monitoring; installation and upgrading of river gauging stations to telemetric stations and establishment of hydro meteorological stations for monitoring of Transboundary waters, Sub catchment management plans will be developed and implemented to manage water resources and Groundwater resources mapping and assessment will be carried out in Counties and globally.
170. We shall fund Drilling of exploratory of boreholes will be undertaken for communities, institutions of orphans (OVCs) hospitals, government institutions and our establishments so that communities can enjoy attached to storage facilities with distribution.
171. Managed aquifer recharge program will also be funded initiated in order to augment groundwater recharge and quantity.
172. A National Isotope Hydrology laboratory will also be established for capacity building in Isotope Hydrology Technique and Isotope analysis to enhance water resources assessment.
173. Surveillance for drinking water quality and pollution control will be improved coupled with development and implementation of Transboundary waters pollution control Programme. Transboundary waters will implement 3 Transboundary Memorandum of Understanding and two surface Transboundary projects as well as Groundwater mapping of Transboundary aquifers for enhanced water availability.
174. Fund to increase percentage of national population with access to safe water. This will be through the implementation of the global Agenda Projects that will support the manufacturing, affordable housing, food security and universal health care through connection of water and sanitation services by implementing various projects.
175. We shall support and fund governments to rehabilitate water supply infrastructure and expansion and rehabilitation of water supplies in medium sized towns to serve rural population with access to safe water, rehabilitate and expand existing large rural water supply schemes, drill and equip strategic boreholes.
176. We shall support and fund water coverage to slums and urban informal settlements and rural marginalized areas with water and sanitation coverage with safe water respectively last mile water connectivity will be undertaken in collaboration with WSPs and county governments to benefit millions of households nationwide.
177. We shall support and fund To enhance water availability for schools to connect primary , secondary schools and children homes to safe water.
178. We shall support and fund Sanitation Coverage to increase the percentage of population with access to improved sanitation from nationally through increase in urban population with access to improved sanitation, and that of rural population. This will be achieved through improvement of onsite-sanitation facilities in major urban and satellite towns and construction of new sanitation facilities in selected towns across the country.
179. We shall support and fund to increase the percentage of urban population with access to sewerage system connection through improvement sewerage facilities in world cities and its satellite towns, augmentation of sewerage facilities in various towns and construction of new sewerage systems/infrastructure across the country.
180. We shall support and fund Water Storage and Flood Control, water storage capacity will be increased by through the construction to completion of two large dams medium size dams, small dams and pans including Planning, design and preparation of potential dam sites and construction in future.
181. We shall support and fund build dykes to protect flooding and install flood early warning systems in various parts of the countries and world where regular floods take place and rivers burst there banks.

182. We shall support and enhance groundwater storage through managed aquifer recharge by making use of storm water generated in urban areas by drilling of recharge wells and redirecting storm water to those sites for managed aquifer recharge to allow a healthy circulation.
183. We shall support and enhance Human Resource Capacity Human resources capacity will be enhanced in order to deliver on the Strategic Plan. This will entail enhancing staff competencies, improving working environment, enhancing performance management, succession management and enhancing knowledge management recruitment of staff every year will also be carried out to reduce the shortfall of workers .
184. We shall Research and Technology Water research and technology will be enhanced through establishment and operationalization of water research institutions, establishment of a mechanism to finance water sector research programmes to fund research projects, adoption of appropriate water availability and sanitation improvement technologies i.e. Water recycle and reuse, wastewater management, storm water management ,desalination , and development of water sector data and information management guidelines, establishment of water sector data and information system (E-Water portal) for effective planning and decision making. Additionally, institutional and human capacity on research and information management will be developed.
185. We shall support and enhance Partnerships and Resource Mobilization During the plan period, to mobilize Kshs. to support programmes and projects through you our dear partners and your networks the enhancement of exchequer funding including equalization funds, bond financing, public private partnerships, leveraging on commercial financing, collaboration with regional / national and County Governments on last mile water connectivity and establishment of an endowment fund.
186. We shall support and fund To enhance sector governance and leadership through formulation and implementation.
187. We shall support and fund To Increase per capita fresh water endowment through management, protection and conservation of water resources.
188. We shall support and fund To increase percentage of national population with access to safe water.
189. To increase percentage of national population with access to improved sanitation.
190. Strengthen linkages between planning, budgeting and monitoring 4. Enhance Service delivery of the Ministry 5. Mainstreaming and implementation of cross cutting issues in Ministry programmes and projects Management, Protection and Conservation of Water Resources and transboundary waters 2.
191. We shall support and fund responsibility of policy guidance, management and equitable allocation of the country's water resources for the benefit of all. Specifically, the department has the mandate of water resources policy formulation, guidance, direction, and coordination, supervision of water resources policy implementation and research policy on water resources.
192. We shall support and fund enforce technical standards in water resources management including water quality and pollution control, as well as conducting pilot water resources assessment in collaboration with other institutions.
193. We shall support and fund Departments of Transboundary Waters The department is charged with the responsibility to sustainably manage and effectively utilize Kenya's transboundary waters on the basis of the internationally recognized principles.
194. Formulation, review and implementation of transboundary water policies and protocols, negotiations of the development and implementation of joint management Cooperative Frameworks Agreements (CFA) and Memorandum of Understanding (MoUs) with other riparian states.
195. To provide policy guidance and strategies for water and sewerage services, donor coordination, planning and design reviews of National Public Water and Sewerage Works, oversights Quality Assurance and safety of hydraulic structures, maintains data and technical information on water supply and sewerage, provides supervision for Water Services Boards, Water Services Regulatory Board and National Water Conservation and Pipeline Corporation, and coordinates and guides the water services sub-sector.
196. Water Infrastructure Development Coordination of planning, design and construction of water infrastructure particularly the cross county bulk water infrastructure carried out by the water institutions; contract management, community water infrastructure development and Public Private Partnership in water infrastructure development.
197. Directorate of Shared Services The Directorate coordinates and provides support services to the technical departments to facilitate the realization of the strategic objectives of our agency. It comprises Administration, Planning, ICT, Finance, Accounts, Human Resource Management and Development, Human Resources Development, Public Communications, Internal Audit, Legal and Procurement.
198. Provides policy guidance, capacity building, resource mobilization, coordination and oversight for the following statutory institutions.

199. To regulate water and sewerage services provision, including issuing of licenses, setting service standards and guidelines for tariff and prices.
200. Support Water Resources Authority (WRA): The Authority is established under the to regulate the management and use of water resources including water allocation, source protection and conservation, water quality management and pollution control as well as collaboration on international waters. WRA is the successor of Water Resources Management Authority (WRMA).
201. Support Water Sector Trust Fund (WSTF) is established under the to provide conditional and unconditional grants to Counties, in addition to the Equalization Fund and to assist in financing the development and management of water services in marginalized and underserved areas. This includes community level initiatives for the sustainable management of water resources, development of water services in under-served rural areas, development of water services in the under-served poor urban areas, and research activities in the area of water resources management, water services, sewerage and sanitation. Water Sector Trust Fund is the successor of Water Services Trust Fund (WSTF)
202. Support Water Tribunal (WT): The Tribunal is established determine any dispute concerning water resources or water services. WT is the successor of Water Appeals Board (WAB) that was enacted.
203. Support National Water Harvesting and Storage Authority (NWHSA) is established under the to undertake the development of national public water works for water resources storage and flood control on behalf of the national government; and maintain and manage national public water works infrastructure for water resources storage. The Authority is the successor of National Water Conservation and Pipeline Corporation (NWCPC) under is still in progress.
204. Support Eight Regional Water Services Boards (WSBs): The WSBs were established under the Water to manage water and sewerage service provision in their respective areas of jurisdiction. The Water Services Boards will be transformed to Water Works Development Agencies in line with Water Act, 2016, once the ongoing studies have been finalized and public consultation undertaken.
205. Support Water Institutes, was transformed into a semi-autonomous institution provides training, research and consultancy services in the water and irrigation sector.
206. Regional Centre on Ground Water Resources Education, Training and Research The institution works to build knowledge and information on ground water potential. The institution also undertakes training and research on ground water resources, Organizational Structure The current organizational structure for the Ministry of Water and Sanitation is shown in Annex III. However, the Ministry is aligning its self to the expanded mandate and new functions The Ministry's major strength is in its human resource and capacity development was transformed into a semi-autonomous institution provides training, research and consultancy services in the water and irrigation sector.
207. Regional Centre on Ground Water Resources Education, Training and Research The institution will work to build knowledge and information on ground water potential. The institution also undertakes training and research on ground water resources.
208. Financial Resources The financial resources will be mobilized mainly from the exchequer and development partners. Other additional avenues of resource mobilization the Ministry will utilize will be through collaborations with County Governments, Kenya Pooled water fund, commercial financing, and equalization fund and endowment fundi.
209. Support Ministries of Agriculture and Irrigation The Agriculture and Irrigation has a direct linkage with the Ministry Water sub-sector through provision of water to meet their water demands for agriculture and livestock
210. Support Ministry of Energy Sustainable management and conservation of water resources greatly contribute towards sustainable provision of hydro power.
211. Support Ministry of Health Provision of clean drinking water and basic sanitation promotes good health to the population through reduction to water related diseases which in turn reduces pressure on the health sector budget.
212. Support Ministry of Education to support training in schools to integrate water issues in education systems that produce manpower for the country. It does this through provision of water to education facilities which results into enhanced community empowerment through higher children enrolment levels, conservation programmes and employment opportunities.
213. Support Ministry of Transport, Infrastructure, Housing and urban Development Water is a major input to construction of houses, roads, airports, seaports, bridges and other infrastructure. Water is also important in modernization of urban areas in housing development.

214. Support Ministry of Foreign Affairs The Ministry reviews relevant international treaties and agreements for the Management of Trans-boundary water resources with a view to domesticate them as a way of facilitating the implementation of these treaties and agreements. This enhances collaboration with neighboring countries. Nationally, the Ministry formulates and enforces implementation of policies and legislations on water resources.
215. Support Ministry of Environment and Forestry Protection of forests which form the water catchment areas is critical for availability of water resources.
216. Support The Regional Development Authorities implement multi-purpose water programs in various areas within the country. Coordination of these programs with those being implemented by the Water Services Boards is necessary because they operate in the same space and funding is sourced from the same Development Partners.
217. Support County Governments Schedule recognizes water and sanitation services are devolved functions. The Ministry will continue collaborating with County Governments in order to increase coverage in water and sanitation nationally especially on last mile water and sewerage connectivity to households.
218. Community participation in the Management of Water resources: There is need for community participation and involvement in management and utilization of water resources to avoid incidences of court litigation and conflict resolution.
219. We shall support and fund bore holes and wells Borehole Drilling, test pumping, equipping, annual service & maintenance Contract, consultation services and repairs Pumps :CRI 100% stainless steel submersible pumps, irrigation pumps, booster pumps, water circulation pumps, fire fighting pumps, sewerage and drainage pumps. Effluent treatment plants: (Zero Discharge) Industrial effluent treatment, sewerage treatment/waste water management, reed bed system, multi evaporation installation, maintenance and compliance. Water -Purifiers, Industrial & commercial R.O, Ozone, DM plants, micron cartridgefilters, ultraviolet, DMF Filters, dosing systems and dialysis plants both for domestic and industrial. Chemicals - Water treatment chemicals, resins and media. C.R.I Generator: Site survey, supply, installation, maintenance and repair. Motors: C.R.I submersible water filled rewindable motors, induction motors. Control Panels – For Pumps, Generator ATS, Motors and more. Accessories: Water meters, C.R.I non corrosive uPVC borehole pipes, CRI submersible cables, electrode cables, float switches, GI/ UPVC pipes and fittings and accessories. Tank Towers; 5 Meters to 20 Meters Tower Steel Tanks, Liters Onwards We have a well equipped workshop in Nairobi where we fabricate all our plants to achieve a better look and longer service life. We always make sure that we use the world's best material and switchgear to give you a highly reliable product at affordable prices. We also have a service back-up team to provide you an efficient after sales service. Our team of highly experienced & qualified engineers trained by C.R.I Pumps Limited in India can offer you various services such as Environment Awareness – To be an intellectual and social asset to thecommunity and environment. Our services and products include -; Hydro-geological – NEMA – WARMA Consultation Borehole: Borehole Drilling, test pumping, equipping, annual service & maintenance Contract, consultation services and repairs Pumps :CRI 100% stainless steel submersible pumps, irrigation pumps, booster pumps, water circulation pumps, fire fighting pumps, sewerage and drainage pumps.
220. Effluent treatment plants: (Zero Discharge) Industrial effluent treatment, sewerage treatment/waste water management, reed bed system, multi evaporation installation, maintenance and compliance. Water -Purifiers, Industrial & commercial R.O, Ozone, DM plants, micron cartridgefilters, ultraviolet, DMF Filters, dosing systems and dialysis plants both for domestic and industrial. Chemicals - Water treatment chemicals, resins and media. C.R.I Generator: From 5KVA to 1000 KVA: Site survey, supply, installation, maintenance and repair. Motors: C.R.I submersible water filled rewindable motors, induction motors.
221. Control Panels – For Pumps, Generator ATS, Motors and more. Accessories: Water meters, C.R.I non corrosive uPVC borehole pipes, CRI submersible cables, electrode cables, float switches, GI/ UPVC pipes and fittings and accessories. Tank Towers; 5 Meters to 20 Meters Tower Steel Tanks, 10,000 Liters Onwards We have a well equipped workshop in Nairobi where we fabricate all our plants to achieve a better look and longer service life.

222. Summary of details of agenda areas and areas of focus to fund in countries and Produce and disseminate briefing materials. • Plan and Implement team briefing sessions. • Prepare and produce progress bulletins. • Provide orientation and training for reform communicators. Strategy 2. Public participation mechanisms and outreach program to opinion leaders and implementation partners. • Produce and disseminate information materials. • Convene and organize water forums. • Plan and organize leadership award scheme. • Plan and organize workshops for opinion leaders. Strategy 3. Phased and branded multi-media communication program. Phase I. Public information campaign. • Create campaign theme and produce information materials, advertorials, radio infomercials. • Coordinate media placement. • Launch water forums nationally and regionally. • Disseminate materials and information through various channels. Phase II. Behaviour change communication program • Develop themes on targeted communication programs. • Develop the information materials. • Mobilize NGOs, private sector and educational institutions. • Produce radio serial drama program. Strategy 4. Media advocacy. • Produce and disseminate media kits. • Organize national and regional media training workshops. • Implement a proactive media relations program. • Plan and implement the Media Award Scheme. Strategy 5. Capacity strengthening • Hold orientation workshop for top sector management • Create a position within WSRS/MWRMD to manage reform communication and long term BCC on WSS and WRM issues • Provide follow-up technical assistance on communication planning • Set up the National Communication Coordination Committee and convene quarterly meetings Communication Strategy for the Water Sector Reforms Programme Monitoring and Evaluation Framework Monitoring and evaluation (M&E) will be essential to objectively establish progress towards the achievements of the objectives of this Communication Strategy and in tracking the performance of the program, Monitoring of the program activities as they happen. • Assessing the outcomes and impact of the program at regular intervals. Monitoring of the program performance Monitoring of the performance of this program will involve tracking and assessing the specific outputs of the communication activities. A mechanism for collecting data and reporting on the specific output indicators for each program activity should be developed and implemented. The monitoring of activity outputs are likely to be the responsibility of the WSRS/ MWRMD. Assessing the outcomes and impact of the communication program The overall outcome indicators will form the basis for assessing the interim and long-term impact of the communication program. This level of assessment should be conducted by independent research organizations. The key methodology for assessing outcomes will be stakeholder surveys such as annual surveys to assess changes in knowledge, attitudes and behaviors. To increase awareness, knowledge and support for water sector reform • Reduced staff concerns about institutional changes and the perceived threat of job losses. • Increased levels of awareness of reforms. • Increased quality of knowledge of reforms. • Decreased misconceptions on key issues in WSR. • Increased accuracy and analytical nature of media coverage of water issue. • Established and functional public participation mechanisms. , To promote positive water and sanitation management practices • Increased public interest levels in WSSS and WRM issues. • Increased consumer knowledge about their rights and responsibilities. • Increased communications capacity within sector institutions as measured by increased resources and implementation of communication plans. • Increased consensus building and addressing of stakeholder concerns through public participation mechanisms. • Increased knowledge of the link between water and sanitation and wealth creation. • Increased number of community and civil society initiatives including forums, consumer representative bodies and conservation projects. A monitoring and evaluation (M&E) specialist should be contracted to carry out this level of impact assessment. The scope of work for the M&E specialist would include: • Reviewing and finalizing the outcome indicators • Designing a comprehensive M&E plan and methodology relevant to the outcome indicators • Designing a comprehensive strategy for assessing the impact of the Communication Strategy among all stakeholders • Conducting the outcome and impact assessment surveys at specified and agreed timeframes. • Analyzing the data, preparing reports and disseminating the survey findings to • Giving recommendations on the program improvement. The M&E specialist will work closely with the WSRS, MWRMD and other stakeholders in implementing the above tasks. Knowledge Management It is important that key information, lessons learned and tacit knowledge gained in the process of developing and implementing the Communication Strategy are recorded in a systematic way and shared with partner organizations so that their value is not lost. Initially the role of the Knowledge Management component for communication activities within the sector would be to: • Develop and implement a contacts database that includes the details of all key stakeholders that may need to be contacted in the future. This could use simple and inexpensive software such as the Microsoft ACCESS package, and could be maintained in-house. • Prepare and present quarterly reports on communication activities to the most senior management committee within MWRMD. This should help ensure that the leadership remain abreast of strategy implementation and provide direction on future efforts. Information and experience could be shared through:

Summary of Areas of Funding

• The Communication Coordination Committee (and any other WSS communication forum groups that are formed) will share information and keep the knowledge alive and growing over time. • Regular reports released to the media for dissemination to the public. Communication Strategy for the Water Sector Reforms Programme • Water service provision. • Water purification and treatment. • Water harvesting and storage. • Water technology including drilling. • Media organizations. Forging creative co-sponsorships with non-water sector organizations Organizations targeted would be those that have active marketing programs focused on the same audiences that MWRMD wants to reach. • Design an appropriate two- to three year Reform Communications program including a format for measuring, monitoring and evaluation. The Program should have clear indicators of achievement based on quantity, quality and time, and means of verification that confirm the achievements as far as the process, impact and outcome is concerned. • Consult with players within the water sector who are running communications related programs. • Identify initial and longer-term research studies that need to be conducted (e.g. 'Knowledge, Attitude and Practice' (KAP) studies, 'Climate & Attitude' studies, and audits. Initial research studies to be conducted. • As a dual reporting and consulting function, the consultant may be called upon to mount workshops and seminars to discuss or disseminate findings and make the necessary presentations to the Ministry and other stakeholders • Report on stakeholder segmentation processes and outcomes, which shall include stakeholder knowledge, attitudes and practices on water, sector issues generally and water reform in particular. • Proposals for a specific Internal Communication Program for all Ministry staff as a component of the overall Reform Communications Program. • Proposals for building the capacity of the Communications function within the Ministry of Water Resources Management and Development – for the purposes of the Reform Communication Program and more long-term. • A 'Communications Program Implementation Plan' that gives a broad framework for how the program would roll out in phases over a period of two-three years. • Proposals for a 'Knowledge Management' component, which will help ensure that important information is recorded in a systematic way so that this is not lost due to staff turnover problems, and can be used to add value to other projects, run by the Ministry and other stakeholders. • Proposals for a 'peer review system' for the Reform Communication Program that would seek regular advice from key stakeholders such as other Ministries and Development Partners, as well as the proposed principles and methodologies for the operations of the Communications Program. Electronic database/ directory of current contact details of all stakeholders that are to be involved in the Communication Program. • Proposals on how donor funding could be sourced for the implementation of the Reform Communication Program including public, NGO and Private sources of funds from current and potential partners in Kenya that may be considered. Reporting The following reports in eight (8) hard copies and a soft copy are to be submitted to the WSRS as follows: • Inception and initial proposal Report not more than three (3) weeks from commencement • Interim Report not more than six (6) weeks from commencement • Draft Final Report not more than eight (8) weeks from commencement • • Professional fees for the consultant's input. • Travel and subsistence as necessary • Costs of telecommunications for consultation and research • Costs associated with production of the various reports and presentations. • Costs of workshops to discuss or disseminate findings. • Costs of consultative workshops and meetings with various stakeholders • Costs of appropriate research such as conducting surveys/interviews and purchasing information if necessary. Effective water management and conservation methods. • Water safety and waterborne diseases. • Pricing structures and investments. • Opportunities for stakeholders. • Water resource availability in Kenya. Sector management and consumer representatives also expressed a willingness to support the formation of water forums as vehicles for information sharing and education, public participation and co-operative management. In addition to these types of participation mechanisms, consumer representatives showed an interest in establishing consumer watchdog bodies. Information needs expressed by sector management: • Conservation methods and techniques, and new conservation approaches and their application. • Water reform status (including the establishment and management of Water Boards). • Effects of water reforms. • Rationale of water reforms. • Benefits of water reforms. • Developments in the water sector. • Opportunities for stakeholders. • Research updates in the water sector. • Technical information on water supply and management. • Experiences of other water schemes. • Proposals, procedures, organizations of managing water. • Policy matters. • Water resource availability and management of water. • Appropriate technology both for purposes of extraction, utilization and monitoring for use of water. • Distribution patterns of water nationally and internationally. • Water safety. Information needs expressed by consumer representatives: • Water pricing systems. • Breakdowns of water consumption and tariff structures on water bills. • Availability and interruptions of water supply. • New conservation approaches and their application. • Customer relations. • Progress of water sector reforms. • Effects of water reforms. • Rationale of water reforms. • Benefits of water reforms. • Developments in the water sector. • Research updates in the water sector. • Causes and treatment of water borne diseases. • More legal information (laws on water).

• Information to consumers about how water supply systems work. • Management/conservation information. • Information on investments in the water sector. such. • Realistic timelines and expectations were communicated to the people in the initial phase of the reforms in all four countries. • Water costs and probable inflation rates should be articulated and customer readiness to pay for water services should be guided by their reliability.

• Reforms are likely to succeed if they are gradual, and are supported by a strong and sustained strategic communication effort. • Consultations with stakeholders should be undertaken to forestall future claims of alienation, and to enhance community participation and a sense of ownership. • Research played a key role in identifying the needs across the different sectors in all the countries studied and, in all cases, a sector-wide approach was necessary. Issues on policy formulation and water service provision • To increase awareness and improve knowledge of water sector reforms among key stakeholders. • To build support for the water sector reforms among key stakeholders 3. Obstacles • Varied interpretation of the meaning of reforms among the adult population. • Perception that reforms will raise the price of water. • Fear that commercialising the water sector will deny the poor access to a basic resource. • Perception that reforms are being pushed for by donors and development partners.

Summary of details of agenda areas and areas of focus to fund in countries

Water sector reforms will bring about improved access and efficiency in the provision of water because communities will be more involved in water resources management and provision. Support Points • Currently a lot of water is wasted due to mismanagement and corruption. • Reforms will help solve problems in the water sector by separating water management and supply. • Government has created new independent institutions such as the Water Services Regulatory Board that will regulate the supply of water including setting up of tariffs. • Reforms will enhance collaboration between Government, communities and civil society, which will result in better services. • Water utility companies that have reformed their provision of water services have resulted in increased access to water and more reliable supply.

Finally we seek to fund, support and establish the following nation and regional programs / institutions and agendas

Global & National Annual Water Sector, Global & National Central Planning and Projects Monitoring Units, Global & National Water Human Resource Management and Development , Global & National Transboundary Waters programs and Authorities, Global & National National Water Resources boards, Global & National Water Sanitation and Sewerage Development board, Global & National Supply Chain Management, Global & National Water training Institutes, Global & National Bureau of Statistics for population datas, Global & National Water Security and Climate Resilient Projects and Authorities, Global & National Integrated Monitoring and Evaluation Authorities, Global & National Water Harvesting and Storage Authorities, Global & National Water Resources Management Authorities, Global & National National Water and Sanitation Services Authorities, Global & National Water Services Providers, Global & National Water Sector Trusts, Global & National Water Tribunals, Global & National Water Works Development Agencies, Global & National Water Resources Centre, Global & National Groundwater Centre for Training and Research, Global & National Centre on Groundwater Resources Agency, Global & National gauging stations, Global & National Isotope Hydrology laboratory, Global & National Water Testing Laboratory,

Global & National Catchment Management Agencies, Global & National Water Catchment Area Conservation, Control and Protection, Global & National Water and Sewerage Services Management Policy, Global & National Waste Water Treatment and Disposal Policy , Global & National Water Quality and Pollution Control, Global & National Sanitation Management, Global & National Management of Public Water Schemes and Community Water Projects , Global & National Water Harvesting and Storage for Domestic and Industrial Authorities, Global & National Flood Control Management , Global & National Transboundary Water Authorities,

Global & National Agriculture Ministry of Lands and Settlement, Global & National Water for Health Organizations, Global & National Water Conservation and Pipeline Corporations and many others.

WATER VALUE QUOTES

1. "Nothing is softer or more flexible than water, yet nothing can resist it." – Lao Tzu
2. "Many a calm river begins as a turbulent waterfall, yet none hurtles and foams all the way to the sea." – **Mikhail Lermontov**
3. "A drop of water, if it could write out its own history, would explain the universe to us." – **Lucy Larcom**
4. "Where the waters do agree, it is quite wonderful the relief they give." — **Jane Austen**
5. "The fall of dropping water wears away the Stone." – **Lucretius**
6. "A lake carries you into recesses of feeling otherwise impenetrable." — **William Wordsworth**
7. "They both listened silently to the water, which to them was not just water, but the voice of life, the voice of Being, the voice of perpetual Becoming."— **Hermann Hesse**
8. "In rivers, the water that you touch is the last of what has passed and the first of that which comes; so with present time."— Leonardo da Vinci
9. "When the well's dry, we know the worth of water." – Benjamin Franklin
10. "Water is sufficient…the spirit moves over water." — Friedrich Nietzsche
11. "This life is like a swimming pool. You dive into the water, but you can't see how deep it is." – **Dennis Rodman** *(see more Dennis Rodman quotes and sayings)*
12. "You swam in a river of chance and coincidence. You clung to the happiest accidents—the rest you let float by." – **David Wroblewski**
13. "It is life, I think, to watch the water. A man can learn so many things." — **Nicholas Sparks**
14. "When life places stones in your path, be the water. A persistent drop of water will wear away even the hardest stone." — **Autumn Morning Star**
15. "Human nature is like water. It takes the shape of its container." — **Wallace Stevens**
16. "When you do things from your soul, you feel a river moving in you, a joy." – Rumi
17. "You are water I'm water we're all water in different containers that's why it's so easy to meet someday we'll evaporate together." — **Yoko Ono**
18. "Thousands have lived without love, not one without water."— **W. H. Auden**
19. "Water is the most critical resource issue of our lifetime and our children's lifetime. The health of our waters is the principal measure of how we live on the land." – **Luna Leopold**
20. "All water is holy water." — **Rajiv Joseph**

You might also like these sea quotes to invoke depth and exploration.

21. "I love the sounds and the power of pounding water, whether it is the waves or a waterfall." – **Mike May**
22. "Until justice rolls down like water and righteousness like a mighty stream." — Martin Luther King Jr.
23. "Do not feel sad for your tears as rocks never regret the waterfalls" — **Munia Khan**
24. "Love, like a river, will cut a new path whenever it meets an obstacle." – **Crystal Middlemas**
25. "Run wild and free like a waterfall" — **Anamika Mishra**
26. "Life is like the ocean, it goes up and down."— **Vanessa Paradis**
27. "Water is sacred to all Human Beings. If you do not have water, you cannot have life. I always remember to honor and pour the water because it is traditional." — **Autumn Morning Star**
28. "Always be like a water. Float in the times of pain or dance like waves along the wind which touches its surface."— **Santosh Kalwar**
29. "Water is the mother of the vine, the nurse and fountain of fecundity, the adorner and refresher of the world." – **Charles Mackay**
30. "When the water is calm, take as much distance as possible with your boat!" — **Mehmet Murat ildan**
31. "You can't cross the sea merely by standing and staring at the water." – **Rabindranath Tagore**
32. "A river cuts through rock not because of its power but because of its persistence." – **Jim Watkins**
33. "In one drop of water are found all the secrets of all the oceans; in one aspect of you are found all the aspects of existence." — **Kahlil Gibran**

34. “Water is the most perfect traveller because when it travels it becomes the path itself!” — **Mehmet Murat ildan**
35. “Life in us is like the water in a river.” — Henry David Thoreau
36. “Water is soft and humble, but it is the most powerful and is the most endurable.” — **Debasish Mridha**
37. “You must not lose faith in humanity. Humanity is an ocean; if a few drops of the ocean are dirty, the ocean does not become dirty.”— Mahatma Gandhi
38. “Water is the lifeblood of our bodies, our economy, our nation and our well-being.” – **Stephen Johnson**
39. “Pure water is the world’s first and foremost medicine.” – **Slovakian Proverb**
40. “Water was liquid silver, water was gold. It was clarity—a sacred thing.” — **Aspen Matis**
41. “I have seen the sea when it is storm and wild; when it is quiet and serene when it is dark and moody. And in all these moods, I see myself.” – **Martin Buxbaum**
42. “The places where water comes together with other water. Those places stand out in my mind like holy places.” — **Raymond Carve**
43. “Water is such a lifesaver into which we cannot breathe but without taking it into us we cannot live” — **Munia Khan**
44. “Water is the driving force in nature.” — **Leonardo da Vinci**
45. “No water, no life. No blue, no green.” – **Sylvia Earle**
46. “Therefore, just as water retains no constant shape, so in warfare there are no constant conditions.” — Sun Tzu
47. “Individually, we are one drop. Together, we are an ocean.”— **Ryunosuke Satoro**
48. “In my life, water has had the character of punctuation.” — **Sue Ellen Campbell**
49. “The sea is captive in a drop of water.” — **Marty Rubin**
50. “The water tells none of its secrets.” — **Nikos Engonopoulos**
51. “Water, in all its forms, is what carries the knowledge of life throughout the universe.”— **Anthony T. Hincks**
52. “I believe that water is the closest thing to a god we have here on Earth. We are in awe of its power and majestic beauty. We are drawn to it as if it’s a magical, healing force. We gestate in water, are made of water, and need to drink water to live. We are living in water.”— **Alex Z. Moores**
53. “I am like the water that runs over me, immune to permanence, recycling endlessly. I am water; I am life. The form may change, but the substance stays the same. Strike me down and I will rise again. Vincit qui patitur.”— **Rick Yancey**
54. “Water belongs to us all. Nature did not make the sun one person’s property, nor air, nor water, cool and clear.”— **Michael Simpson**
55. “The water was pure and cold and came out of the Apennines tasting like snow melted in the hands of a pretty girl.”— **Pat Conroy**
56. “Clean water is inestimably precious to waste!”— **Mohith Agadi**
57. “Water liked to be free. . . Water hated being trapped, just like Percy.”— **Rick Riordan**
58. “Water is the reason of our birth; it is the healer, the destroyer and the final consumer.”— **Neeraj Singhvi**
59. “Without water, life would just be rock.”— **Anthony T. Hincks**
60. “Be like water, which is fluid & soft & yielding, as in time, water will overcome rock which is rigid & hard. Therefor, what is soft is strong.”— **Anonymous**
61. “Water is always working, reorganizing the land.”— **Tim Palmer**
62. “I was still water, held by my surroundings.I am now a river, carving my own path.”— **Scott Stabile**
63. “A calm water is like a still soul.”— **Lailah Gifty Akita**
64. “You can not hide on an island and expect that water will not find you.”— **Chuck Bridges**
65. “Water! You may not like it, but you have to drink it.”— **Anthony T. Hincks**
66. “Water is life’s matter and matrix, mother and medium. There is no life without water.” – **Albert Szent-Gyorgyi**
67. “The water is a dark flower and a fisherman is a bee in the heart of her.”— **Annie Proulx**
68. “The sound of water is worth more than all the poets’ words.” – **Octavio Paz**
69. “The water caresses in the glass, like love in the body.”— **Charles de Leusse**
70. “A pool is water, made available and useful, and is, as such, infinitely soothing to the western eye.” – **Joan Didion**

71. “Make hope just like water in your life”— **Khaled Ibrahim**
72. “Why was it that the sight of water made everything in the world seem okay? She wanted to look at water every day.”— **E.C. Diskin**
73. “Water wants to join water. Youth wants to join youth.”— **Hermann Hesse**
74. “The person who despises a drop of water is an utter ignorant who doesn’t know that billions of tiny creatures in this world can live with one water drop for days!”— **Mehmet Murat ildan**
75. “Whoever thirst for the living Water shall be quench.”— **Lailah Gifty Akita**
76. “Water is my drink.” – **Stephen Curry**
77. “I am like water so to say, I will find my way!”— **Md. Ziaul Haque**
78. “My desk faces the water, and I’m perfectly happy sitting there. I’m never lonely.” – **Tom Stoppard**
79. “When water falls, it flies.”— **Anthony T. Hincks**
80. “I could float in the pool for hours, just letting the water carry me.” – **Jill Scott**
81. “If the earth is a mother then rivers are her veins.”— **Amit Kalantri**
82. “How one raindrop marries the other and forms an ocean of love.”— **Suyasha Subedi**
83. “Water in the boat is the ruin of the boat, but water under the boat is its support.”— **Jalaluddin Rumi**
84. “Be like water. Flow, crash, fly!”— **Md. Ziaul Haque**
85. “Water is colourless like life.”— **Lailah Gifty Akita**

Other insightful water quotes

86. “In wine there is wisdom, in beer there is freedom, in water there is bacteria.” – **Benjamin Franklin**
87. “I have left almost to the last the magic of water, an element which owing to its changefulness of form and mood and colour and to the vast range of its effects is ever the principal source of landscape beauty, and has like music a mysterious influence over the mind.” – **Sir George Sitwell**
88. “Do you ever feel like you’re getting sick, and then you have a glass of water and you’re like, ‘oh, that’s why people drink that.’” – **Dina Hashem**
89. “Water is the most extraordinary substance! Practically all its properties are anomalous, which enabled life to use it as building material for its machinery. Life is water dancing to the tune of solids.” – **Albert Szent-Gyorgyi**
90. “My therapist set half a glass of water in front of me. He asked if I was an optimist or a pessimist. So, I drank the water and told him I was a problem solver.” – **Unknown**
91. “Water is insipid, inodorous, colorless and smooth.” – **Edmund Burke**
92. “No one can see their reflection in running water. It is only in still water that we can see.” – **Taoist proverb**
93. “Water sustains all.” – **Thales of Miletus**
94. “In order to reflect, think and plan, you must quiet yourself. You can’t see your reflection in churning waters. Water must be still to see your reflection.” – **Karen Susman, The Remarkable Networking Toolbox**
95. “A man of wisdom delights in water.” – **Confucius**

Helpers Of Africa International

Kingdom Global Creativity and Innovation Agency

Helpers Of Africa International through Kingdom Creativity and Innovation Agency will invest and support heavily in Global innovation and Creativity globally in all sectors of Technology, Industry, Manufacturing, construction, Transport, food, Science, Space, Infrustructure, Agriculture, Service delivery, health, education, socio-economic dimensions in all areas and sectors especially in this time of Covid 19 to solve problems in the context of economic, social and sustainable development. We shall seek to raise awareness of the role of creativity and innovation in all aspects of human development. Innovation is a decisive process for the well-being of global welfare and socio-economies of the world in the years for generations to come. The ever-changing economy and know-how will sway society, organizations, and managers according on this pandemic and changing treads of health, education, technology and livelihood shake ups globally. Our strategic plan will enable all sectors of the world be equipped and be ahead of the Global challenges to project future challenges and brainstorm refined solutions before any challenge comes to shake the world like Covid 19 has ambushed the world. Global decisions in all sectors will be predicted through information-based knowledge specialists and by the grace of God. Many Now organizations and institutions have begun solitary Research and Knowledge Training centre to improve the performance on products, services and employees through our Agency all this efforts will be consolidated together for global solutions because knowledge is considered as the bottom of enterprise. Consolidation of Smart minds of specialists from school levels primary, secondary, Colleges, Vocational schools and universities along those in different work group should be harvested and directed to solve global challenges. Such information-based organizations, institutions and traditional departments including research centers in the countries through Kingdom Creativity and Innovation Agency will work as guardians of standards, centres for training and the assignment of specialists. Global stardards of service delivery and delivery is organized around information that needs to be availed for current and future challenges including management systems of organizations and countries. Countries, organizations and institutions will need information based solutions for current challenges and also future strategic position in being pro-active rather than reactives when challenges strike. We also seek to raise knowledge workers and professional experties, who form a growing part of the workforce, are not responsive to common control methods. The world organizations and institutions will guide on what information it needs to operate to provide our areas of research on creativity and innovation. We shall also support companies and organizations that are focused or already working on innovation and creativity besides our own thinking and reseach hurbs globally. Top priorities of most of the companies would be to bring new ideas of doing the same business irrespective of areas of specialization. Due to emergence of knowledge economy, global competition and technological advancement INNOVATION has become priority among the corporate, International development agencies and donors are investing in research we are joining to add value and resources.

Innovation results in new product development, advanced processes and innovative system of doing business. Innovation brings solution to many gaps and latent demand of consumer or market. The term creativity and innovation are often used interchangeably but there is clear difference between these two terms. Creativity refers to the generation of ideas and Innovation refers to implementation of that ideas. Creativity is of three types like individual creativity, group creativity and organizational creativity through our strategic plans we seek to impact those three platforms to impact Global innovation and creativity. Our strategic plan is to work on Innovation in two categories like incremental innovation that builds on existing products / services and radical innovation that deals with new ideas studied various models on creativity and innovation and then with the help of case study as research methodology both will be an area of focus. We shall develop culture of creativity and innovation benefits beyond direct sales and profit in terms of social benefits in terms of teams working and motivation of researchers. Creativity can be seen as starting point for the innovation process and it occurs through four stages namely idea generation, idea screening, idea feasibility and implementation this will be our global focus through countries, organizations, institutions and researchers ours along with others private collaborators we shall support and collaborate.

Sectors of Innovations

ARTS AND HUMANITIES- graphic artist/illustrator,, music instructor, photographer, piano tuner, sign painter, writer.
BUSINESS AND OFFICE
Accountant, copy shop owner, desktop publisher, mail receiving service owner, messenger service owner, shorthand reporter, tax preparer, temporary service owner, word-processing service owner.
CONSTRUCTION
Air conditioning/heating/refrigeration/solar energy technician, architect, contractor, floor covering installer, painter/paperhanger, plumber, surveyor, welder.
GENERAL MARKETING
Advertising agency owner, appraiser, food distributor, fund raiser, independent insurance agent, public relations consultant, real estate broker, retail store owner, trade show manager.
HEALTH
Chiropractor, dental laboratory technician, dentist, dispensing optician, family doctor, massage therapist, pharmacist, physical therapist, speech-language pathologist.
HOME ECONOMICS
Caterer, child care provider, clothing decorator, dietician, dry cleaner, housekeeping service owner, interior designer, nanny placement service owner.
HOSPITALITY AND RECREATION
Bed-and-breakfast owner, health club owner, personal trainer, pool-cleaning service owner, restaurant owner, tour operator, travel agency owner, valet parking service owner.
PERSONAL SERVICE
Career counselor, cosmetologist, event planner, financial planner, funeral director, image consultant, personal service provider.
PLANTS AND ANIMALS
Dog trainer, farmer, fish farmer, horse trainer, interior landscape specialist, landscaper, nursery owner, pet groomer, and veterinarian.
PROTECTIVE AND SOCIAL SERVICES - Bodyguard, locksmith, private investigator, security service owner, sign language interpreter.
SCIENCE AND TECHNOLOGY
Appliance repairer, computer programmer, consulting engineer, hazardous waste management consultant/firm owner, photo finishing lab owner.
TRANSPORTATION
Airplane/helicopter pilot, auto detailing service owner, auto repair/maintenance service owner, bicycle shop owner, boat yard owner, car/truck dealership owner, gasoline station owner, limousine fleet owner, moving service owner, truck driver.

Our Strategic plan of innovation provides us with a purposeful way to search for opportunities as well as mitigate risks. The first four sources of innovation are symptoms of something that has already occurred, or can easily be implemented with little effort. They offer us evidence that make them reliable indicators that there is a great opportunity to innovate. The last three sources of innovation is not so clear and cut as the first four; therefore, they pose a greater risk of failure; however, promises greater rewards.

1. The first source of innovation is “The Unexpected.” When something unexpected happens to us we are hardwired to rule out it out. It's a learned behavior. However, if we were to analyze The Unexpected, we may find an opportunity to innovate. Think of the story of how the use of gasoline came about. Oil Refiners was dumping this by product of kerosene into the Ohio River. This by product would unexpectedly catch fire and blow up. This by product was gasoline and thousands of barrels was being tossed into the river. John D. Rockefeller saw this, and instead of seeing as unexpected event, he saw it as an opportunity to leverage its combustion capabilities in the engines of his factories. Hence gasoline was born and Rockefeller capitalized off of it handsomely.
2. The second source of innovation is “Incongruities.” This one is a fun one, because when you ask someone why do they operate in a particular way, and they respond "because we've always have done it this way."This is an indicator their may be a case of incongruity there, because they are operating in a way that is the status quo instead of asking is there a better way to do a particular function. Bottom line if something conflicts with the status quo, most of us are not inclined to change it.
3. The third source of innovation is “Process Change.” This is one of my favorites, because you could always analyze a process and find concrete ways to improve it. Amazon is a master of this. If you take a tour of one of their fulfillment centers, you'll see tons of ways they innovated through technology, engineering, and supply chain from the status quo to quickly fill millions of orders. Take time to study a process you you'll be amazed on possibilities you may have to innovate, especially as technology improves.
4. The fourth source of innovation is “Industry and Market Structures.” A change in and industry or market opens up ample opportunity to innovate. Cloud technology is probably the most apparent at this time. 10 years ago, it was difficult to use cloud technology, because of the need to have fast and reliable internet connection. Since internet services and speeds have significantly improved, it opened the door for the cloud computing market.
5. The fifth source of innovation is "Demographics." In 2008 I received a data set from large tire manufacture to conduct a market analysis. When I opened the zipped file, I saw information on one of their studies to design a new tire focused on the Tuner Group. This group was street racers in their late teens and twenties, that had an appetite for a particular type of high performance tire. While conducting my analysis, I noticed they focused on a certain demographic to determine the design, compound, and cost of the tires. I found it insightful on the impact demographics played on how they engineered their tires.
6. The sixth source of innovation is "Changes in Perception." In mathematics there is no difference between "The glass is half full" and "The glass is half empty." However, the meaning of these two statements is completely different, and so are their consequences. We can go back to the cloud computing example. Amazon had built these elaborate data-centers to run their own business; however, they saw an opportunity in cloud computing. They didn't stop and say owe, we are a online retailer. No they changed the perception of what business they were in and started the Amazon Web Services part of their business to capitalize off the rapidly expanding cloud business.
7. The seventh source of innovation is "New Knowledge."This source of innovation is what most of us think of, when we think of innovation. This is where the Bill Gates, Mark Zuckerbergs, and Steve Jobs of the world play in. It's the most difficult form of innovation; however, the most lucrative. It's conceptualizing a new idea and that new idea changes an entire market.
8. Helpers Of Africa Internationalthrough Kingdom Creativity and Innovation will engage directly through own centers and professionals in global Creativity that needs divergent thinking process where as innovation needs convergent thinking process, Innovation generated out of creativity help many organizations to differentiate them in terms of product, resource utilization, and processes. These unique aspects are not easily imitated or substitute. Firms do not fight only on product but rather on much deeper factor than that which is capacity to do that. We shall To know the importance of organizational creativity and innovation · To identify the factors that enhances and/or facilitates organizational creativity · To study various models of innovation. Models of innovations Researchers have studied two models of innovation in this paper to explain correlation between innovation and business processes.

1) Incremental innovation- Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Incremental innovation, Most innovations are incremental, gradual and continuous improvements in the existing concepts, products or services in the existing market. Incremental innovations- are just a little better than the previous version of the product or service and has only slight variations on an existing product formulation or service delivery method. Products can be made smaller, easier to use or more attractive without changing the core functionality of it and services can be made more efficient through constant improvement. Although incremental innovation **does not create new markets** and often does not leverage radically new technology, it can attract higher paying customers because it fulfils the customer needs identified from their behaviour or feedback. The product or service may also appeal to a larger, mainstream market if you're capable of providing the same functionalities and value this is needed globally we shall support. What's convenient about incremental innovation is that it's often easy to sell because you don't need to explain the key principles of your product or service – people are already familiar with the way it works .A possible downside is that incremental innovations do not necessarily make a huge impact because they're often just slightly better than what's already out there. There's also a risk of over-complicating products and adding too many features no one wants to pay for. Thus, you shouldn't ignore the customers who just want a simple, low-cost alternative of your product unless you specifically choose to target the more demanding customer segment and to provide them with premium products. Another risk related to incremental innovation is that the market may (and will) change at some point because of disruption. If that is the case, relying on just incremental innovation isn't going to be enough to keep up with the changes. This will be needed by industries worldwide. Thus, it's important to focus on **simultaneously improving the core business while also looking for new ways to create value** by searching for new business models and working on

2) Disruptive innovation- Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Disruptive innovation that refers to a concept, product, or a service that creates a new value network either by entering an existing market or by creating a completely new market. In the beginning, disruptive innovations have lower performance when measured by traditional value metrics but has different aspects that are valued by a small segment of the market. These types of innovations are often capable of turning non-customers into customers but do not necessarily appeal to the needs and preferences of the mainstream customers, at least not just yet.What makes disruptive innovation difficult, is that established organizations are completely rational when making decisions related to their existing business. They fail to adjust to the new competition because they're too focused on optimizing the existing offering or business model that has proven to be successful in the market so far. Thus, the market is generally disrupted by a new entrant rather than an incumbent. This phenomenon called Innovator's Dilemma is actually quite logical because the existing market is often bigger, and the margins are better. Disruptive innovation is where traditional business methods fail and requires new capabilities. Although the risks are big, there's a huge growth potential if everything goes right. Once the incumbents realize that new disruptive innovations are used by the mainstream, it is often too late for them to catch up despite the amount of resources they have at their disposal. At this point, new entrants are already delivering an alternative solution that require new capabilities the traditional companies don't necessarily have, eventually adding things that the mainstream customers want. Tesla, for example has different capabilities compared to the more traditional car manufacturers. Its software, battery technology and the ability to iterate quickly are capabilities that traditional car manufacturers aren't very good at, and which will take time and resources for them to acquire. Another example of disruptive innovation is Netflix, whose initial mail-in movie subscription service wasn't attractive to Blockbuster's mainstream customers, but rather to those early adopters who were already used to online shopping. Disruptive innovations:Disruptive stands for replacing and disruptive and describes innovations that shape a new market. Disruptive innovations mostly originate in the low-end segment, in less attractive segments. However, as the maturity of technology and products increases, they are gradually attacking the mass market and thus replacing existing services

3) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Sustaining innovation- Sustaining innovation is the opposite of disruptive innovation as it exists in the current market and instead of creating new value networks, it improves and grows the existing ones by satisfying the needs of a customer. Just like incremental innovation, the product performance of sustaining innovation is made slightly better with every iteration, reducing defects. The new improved version of the product can be more expensive and have higher margins than the previous one if it targets more demanding, high-end customers with better performance than what was previously available. However, it might as well be cheaper if it leads to higher volumes and thus higher absolute profits. Traditional business methods and sustainable innovations are often sufficient because they are the most profitable, and the risks are lower. Disruptions, on the other hand, typically enable top-line growth: large market share growth or the creation of an entirely new market but aren't typically profitable for a long time because it makes sense for disruptors to invest heavily in growth. Sustaining innovations, in turn, continue to grow the market slowly, but no longer in the same proportion. At this point, the focus shifts to increasing profits.An example of a once disruptive, currently fully sustaining and profitable innovation is iPhone, where the recent versions of the phone appeal to the same customer segments and do not create new value networks. As the criticism of lack of innovativeness of the new iPhone has increased, the firm's profits have grown at the same pace.New models of the phone sustain the existing business model in the premium segment of the market to meet the needs of a more demanding customers who are willing to pay more for a newer, slightly better version of the phone."Some sustaining innovations are the incremental year-by-year improvements that all good companies grind out. Other sustaining innovations are breakthrough, leapfrog-beyond-the-competition products.

4) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Radical innovation- Radical innovation is rare as it has similar characteristics to disruptive innovation but is different in a way that it simultaneously uses revolutionary technology and a new business model. Radical innovation solves global problems and addresses needs in completely new ways than what we're used to and even provides solutions to needs and problems we didn't know we had, completely transforming the market, or even the entire economy. Although radical innovations are rare, there have been more and more of them in the recent past but with the Covid 19 pademic the world has bult stamina for this. We shall do research in every sector with focus of 2030 and beyond in all sectors through our smart team also supporting other institutions and organizations. Radical innovations are new products, services or processes and involve significant change and innovation. Accordingly, the impact is also greater - for example, new markets can be created as a result.

5) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support - Technological innovations, such as personal computer and the internet are examples of radical innovations that have transformed the way the entire world functions and communicates. These disruptive innovations provide our society with a platform to build on top of, leading to highly accelerated economic growth. An investment management company, there's a new, even bigger wave of radical innovations that they consider to be on the verge of the becoming mainstream. These are 5 robotics, artificial intelligence (AI), blockchain technology, energy storage and genome sequencing. Especially during Covid it has proved that technology can help most of meetings and religious services were done by zoom, google. We shall also support the extension of such to various levels. Because radical innovation is so different from what people are used to, it does usually face significant resistance at first. These types of innovation typically require a lot of time and technological development before they're ready for the mainstream markets. However, when executed successfully, it often means the beginning of a new era that affects many sector

6) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Product innovation- Product innovation is probably the most common form of innovation and it refers to improvements in performance characteristics and attributes of the product. It can also use components that differ from previously manufactured products. Product innovations are always tangible, can involve radically new technologies or can be built based on combining existing technologies in a new way, although they don't necessarily have to involve any technology at all. A product innovation can be a completely new product that has never been seen before or it can be an improved version of an existing product, such as wireless headphones or the 2nd generation Amazon Echo. It can also be a new feature to an existing product, such as a dynamic turn indicator in a car or foot massaging shoe insoles that leverage magnetic technology. There are some evident drivers of product innovation, such as changes in customer requirements, need to increase the life cycle of the product, urge to tap new markets or segments, or simply to enhance the look-and-feel and the convenience of using the product. Product innovation is a great way to improve quality and product reliability to either gain competitive edge or sustain your position in the market. In addition, it can help reduce processing and manufacturing costs this is area that will globally bring new products to market and processes that is why Kingdom Creativity and Innovation Agency.

7) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Service innovation- Service innovation refers to a new or **significantly improved service concept, product or process in a new or existing market**. It can be for example a new customer interaction or distribution channel, a system that improves the delivery process or new solutions in the customer interface.The way you serve your customers is a great way to differentiate, generate more value for them and deliver more revenue for your organization. A big part of a successful business is the ability to make your customers lives easier and the better you're able to meet the needs and expectations of the ones you serve, the brighter your future looks like. Uber is an example of a service innovation company that has created further growth outside its core business. With UberEATS, it has used its strengths and unique capabilities, such as its brand to enter into adjacent markets. The fact that they're already in peoples' phones and that they're already organizing transportation has helped them to extend their line of offerings and provide their customers with new value.
8) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Process innovation- A process combines the skills, technologies and structures that are used to produce products or provide services.Process innovation generally refers to the **implementation of a new or significantly improved production or delivery method**. It may also be indirectly related to the company's products and services, for example in the form of support function processes in HR or finance. Process innovation can be done by applying new technology or improved method to a process and is often done to save time, money, or to serve customers better. It often involves new techniques, equipment, or software, and can often require a cultural or structural change as well.

In process innovation, the final product is usually not changed, but the method of bringing out the product is improved. An example of a process innovation is automated replenishment ordering for retail stores. Previously, an employee had to manually go through all the products one by one to see how much should be ordered. This is not only extremely time consuming but easily leads to over- or under-stocking, depending on whether the estimate is conservative or not. A more modern way is to use statistical models to calculate a significantly more accurate forecast. If automated orders are created by a system, you can simply let staff double check the pre-calculated order proposals, for example in case the order happens to exceed a certain threshold value. This can not only save you a lot of time and money but having better stock levels also improves your ability to serve customers.

9) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Technological innovation- Technology as a source of innovation can be identified as a critical success factor for increased market competitiveness. Technological innovation involves new or improved technology, such as new type of machinery or alteration of some form of technology into a product, processes or service delivery methods. When talking about incorporating technology into a production process, for example, it enables automation which results in higher production rates, lower cost per unit of output, and enables more efficient use of materials – reducing variability and resulting in more consistent product quality. We're using a number of technological product innovations daily all the way from our smartphones and health devices to wireless home sound systems. SONOS, for example, has created advanced technology to provide a wireless multi-room music experience. They initially meant to choose Linux as the technology platform, but no audio drivers existed at the time, so they had to build it themselves. When it comes to technological service innovation, McDonald's has taken a holistic approach to the digital to create engaging customer experiences. Their main strategic objective has been to use technology to improve the in-restaurant experience and to create the next generation of drive-throughs and delivery. They've already said goodbye to cashiers and replaced them with self-ordering kiosks. They also provide you with an application you can use to order and pay for your meal before picking it up to avoid the line.

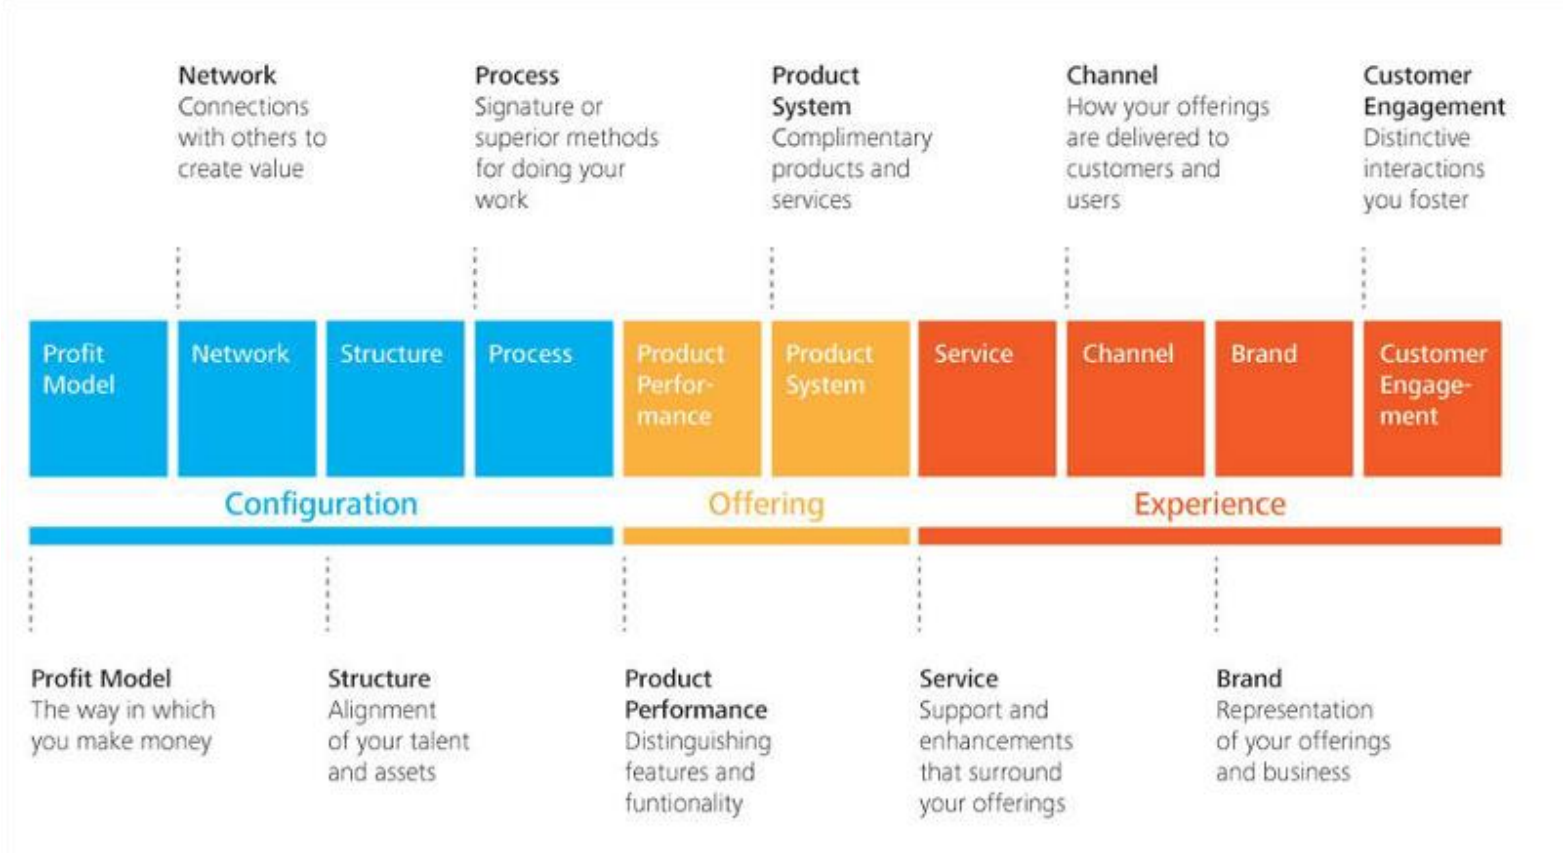
10) *Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Business model innovation- In all its simplicity, the business model is how a company functions and earns money. It consists of core values and resources, strategy, core channels and target customers, to name a few.*

11) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Business model innovation is a fundamental change in how a company delivers value to its customers or captures it from the market. In practice, it often happens through the development of new pricing mechanisms, revenue streams or distribution channels but isn't limited to them. What's challenging about business model innovation is that the capabilities and processes that have been optimized to make a company successful, become the targets for transformation. To be able to create new, viable business models, you usually need to change the fundamental decisions upon which your business operates. In other words, to work on disruptive innovations. Business model innovation often means higher risks for a company in the short term but is critical to long-term survival and for not being disrupted. On the other hand, business model innovation and especially digital services, may have higher operating margin growth, so these types of innovations can really be worth pursuing. Purchasing music, for example, has transformed twice in the past couple of decades. iTunes is an interesting example of

Disaggregation model – a strategy that breaks down or separates something into constituent parts or elements. Before iTunes started to sell single tracks, you either had to buy the entire album to hear your favourite song or sit by the radio at the right time to be able to record it. It helps deal with saturated market, outdated technology, Undesirable change in industry margins, Unwillingness or inability to keep up with global trends and Low customer satisfaction. This are indicators of need of creativity and innovation it's definitely time start innovating around your business model and value promise and think of new ways to make revenue.

12) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support, Marketing innovation- For an innovation to be successful, people need to be able to find it and then benefit from it. The main purpose of a marketing innovation is to open up new markets or increase market share. An innovation is typically considered to be a marketing innovation if it brings significant changes to the "traditional" marketing mix (4Ps: Price, Product, Promotion and Place) of the industry in question. The ability to connect with your customers is key and there is always room to improve relationships and customer engagement. Because of the constantly evolving technology and customer preferences, new marketing innovations are needed to promote both new and existing products and services. Coming up with innovative marketing practices enables you to enhance those customer relationships in ways they might not even expect.

13) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support -Architectural innovation, Architectural innovation is a concept introduced by a Harvard Business School professor Rebecca Henderson and dean Kim Clark back in 1990. Architectural innovation is described as the reconfiguration of existing product technologies that creates an improvement in the ways in which components, some of which are not necessarily innovative together, are combined. Some examples of architectural innovations include networked computer systems and flexible manufacturing systems, where the core components of the product remain the same, but the relationship between these components and how they link to one another, changes. From a technical point of view, architectural innovations are often less risky compared to other types of innovations because the technology has already been proven to work. Thus, there's no need to spend time and money on testing how these technological components work in practice – you just need to make sure they work together. However, the market risk still exists, which is why it's important to make sure your product or service has clear demand.



14) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Social innovation, Social innovations are new practices or technological inventions that aim to meet social needs in a better way than the existing solutions. These types of innovative solutions can be provided or funded either by public or commercial entities. There are many reasons why social innovations are important, such as to improve working conditions, provide more education, develop the community or make the population healthier. Thus, it can be said that social innovations are necessary for extending and strengthening civil society. Clean water technologies and innovations, such as potable water generators that capture air humidity and turn it into drinking water, are examples of social innovations that can help alleviate the issue of uneven distribution of clean drinking water now and in the future. A Finnish start-up called Gubbe.io has successfully combined technological service innovation and social innovation by providing a platform that connects students to seniors who need help with housework, technology, transportation, or simply staying active. To avoid unnecessary havoc, you want to go through different aspects of your business and to: ***Social innovation****: Social innovations are innovations where the benefit lies with society and the purpose is not primarily profit. Examples include innovation in education, poverty reduction, equal opportunities and health****.***

- Assess your current state
- Prioritize the areas that need improvement
- Break down your strategic goals into smaller, easily implemented pieces
- Commit to the process

15) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Profit model- Innovation in terms of profit models typically look to package up existing offerings in new ways. They often require a detailed knowledge of the customer and what they really crave from your business, and can involve a disruption to your industry's traditional way of looking at the customer relationship.
Network. Network innovation is increasingly common as supply and value chains become more complex and interconnected. They involve the creation of new ways of taking advantage of the processes, technologies, or other resources of other companies, allowing an organization to significantly punch above its own weight.

16) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Structure innovations- Structural innovations look internally at the assets organisations has, and how they can be utilised to create fresh value. This could be improving internal software and processes to make better use of your talent or equipment. Managerial innovations often fall into this category, with organisations often using their culture and processes as a means of attracting the brightest talent.

17) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Process innovation-
Process innovations are another inward looking innovation and look at changing the way you go about your business. Just as with companies like Toyota, these innovations often form a key part of the core competencies of the business, and can provide a significant advantage over your rivals. We shall audit ways of doing business and recommend for nations , import and export etc.

18) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Product and service performance innovation- The product categories are perhaps what many of us most relate to in terms of innovation, with product performance the first product-related categorization proposed by Doblin. Innovations in this area include everything from the features offered to the quality of the product and can involve both improvements to existing product lines or completely new offerings. The key is that you look to add significant value.

19) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Product system- The product system is not as popular as the product itself, but is no less important. Innovations in this domain revolve around the complementary products and services that can add real value to a core product. You might look to establish interoperability, modularity and integration with other products and services to provide value added to the customer. *Products concern both material products and intangible services such as services that meet customer needs and are thus acquired by the customer. With product innovations, a company earns its money and tries to differentiate itself from the competition.*

20) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Service innovations. This revolves around the customer experience, and begins with service-related innovations. Innovations in this domain enhance the offering of your product or service, whether through making it easier to use, highlighting overlooked functionality, or fixing common problems. Such innovations are easy to overlook but they can really make an offering stand out. service innovations are like product innovations when it comes to selling them directly to the customer, e. g. insurance or management consultancy. Even if services are not actively sold, as in the case of manufacturing companies, each company still provides services to its customers, for example in logistics, complaints, sales advice, etc., even if they are not actively sold. This is also where innovation comes in when it comes to differentiation and customer enthusiasm.

21) *Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Channel innovation, Channel innovations focus on the way you deliver your offering to consumers. E-commerce has been an obvious innovation in this domain, but as bricks-and-mortar retailers have got to grips with the changing retail landscape, there have been clear innovations in how stores and retailers interact with customers. The ultimate goal of innovations in this category is to delight consumers by ensuring they get what they want, when they want it, and how they want it.*

22) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Brand innovations - Branding remains hugely valuable, and innovations in this domain can help protect a company from competitors or substitutes. Great branding innovations typically involve a wide range of customer touch points and involve a range of advertising, customer engagement, channel, and employee behaviour innovations.

23) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support -Customer Experience based consumer engagement this innovations centring around how you build compelling interactions with your customers. Innovations in this domain begin with a deep understanding of the customer and flow all the way through the creation of meaningful connections between you and them. At insurance company Covea, they innovated improvements to their customer processes that delivered approximately £2.5 million in savings.

24) Business model innovation: The business model is the way a company functions and earns money. The business model innovation encompasses innovations in strategy, marketing, supply chains, value creation, pricing or cost structures.

25) Process and technology innovation: As the name implies, these are technological innovations, such as the creation of products and services. In principle, they are also process innovations. These include, for example, production processes or IT technologies for apps. Product innovations, quality improvements or cost savings often go hand in hand with process and technology innovations.

26) Organizational innovation: Organizational innovations affect the process and organizational structure. These can be organizational process innovations or management innovations, e. g. new tools for measuring customer satisfaction or optimizing delivery processes to reduce costs.

27) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Environmental innovation: All innovations that contribute to improving the environment are environmental innovations. This concerns for example environmentally friendly products, contributions to environmental protection or the avoidance of emissions. An innovation can affect several innovation subjects at the same time. Logically, there is no clear demarcation here. For example, a product innovation can be a process and environmental innovation at the same time. Or a business model innovation usually also brings with it a product and organizational innovation.

28) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Incremental innovations, This are optimization and further development of existing products, services or processes. The purpose and benefits are optimization of customer benefit, cost reduction, repositioning, adaptation for introduction into new markets or adaptation to new circumstances such as new laws and standards. Accordingly, radical innovations are basic innovations and revolutions, while incremental innovations are improvements, adaptations or follow-up innovations and thus evolutions. Whether an innovation is radical or incremental is often very much in the eye of the beholder. Therefore, clear, objective differentiation is often challenging.

29) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Sustaining innovations: Preserving or continuous innovation refers to the improvement of existing, similar to incremental innovations. This type of innovation focuses on current customers and their needs.

30) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support open innovation, although this refers more to innovation management than innovation itself.

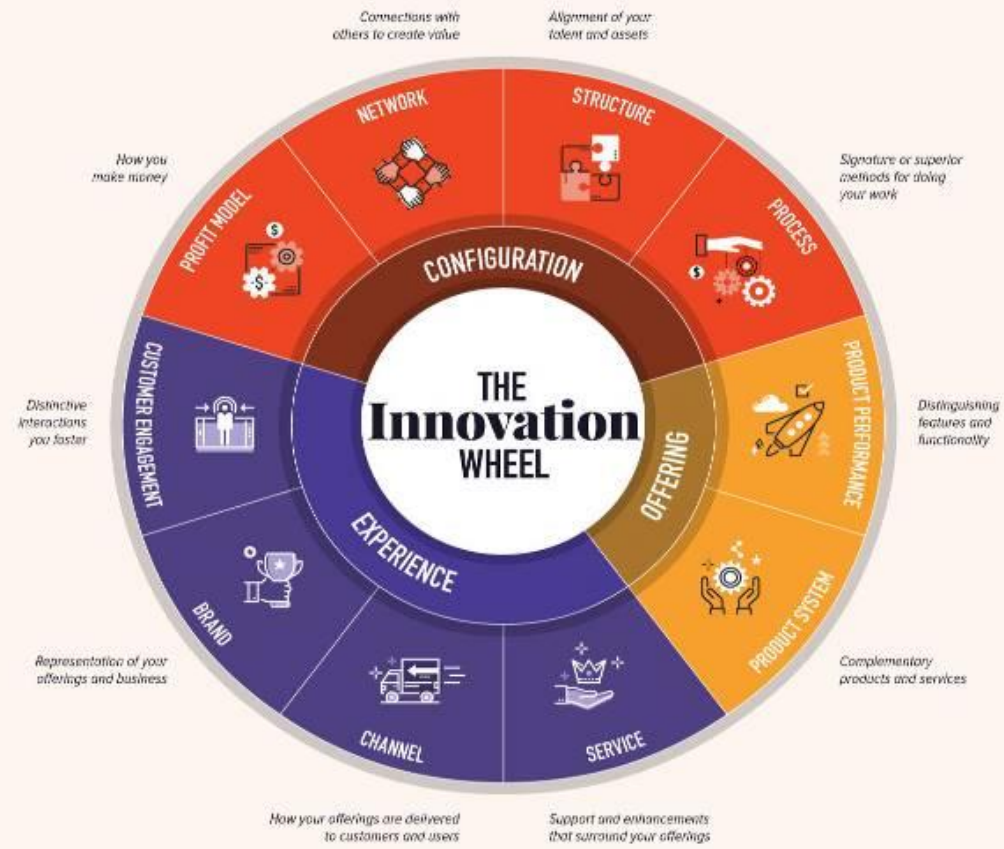
31) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Closed innovation involves only internal resources for generating ideas, developing and implementing innovations. Open innovation also integrates external partners such as customers, research institutes or suppliers into the innovation process.

32) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Ideation: innovating the product idea & concept.

33) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Co-creation: innovating the customer involvement and joint venture corroborative creation

34) Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support Entrepreneurship: innovating through entrepreneurial thinking in SMEs platforms and corporate level in ideas, start ups and development to launch hundreds of millions into business start ups and development.

Here are the 10 types of innovation:



#	Innovation Type	Description
	Profit Model	How you make money
	Network	Connections with others to create value
	Structure	Alignment of your talent and assets
	Process	Signature of superior methods for doing your work
	Product Performance	Distinguishing features and functionality
	Product System	Complementary products and services
	Service	Support and enhancements that surround your offerings
	Channel	How your offerings are delivered to customers and users
	Brand	Representation of your offerings and business
	Customer Engagement	Distinctive interactions you foster

UNDERSTANDING THE

10 Types of Innovation

New products are invented from scratch all the time, but this is merely one way to innovate.

According to innovation firm **Doblin**, most big breakthroughs in history comprise some combination of the following 10 types of innovation.

By tactically examining these 10 different types of innovation, you may uncover exciting new product opportunities – or you may change the business world forever.

VISUAL CAPITALIST

/visualcapitalist @visualcap visualcapitalist.com

42) Frugal innovation- Frugal Innovation is about doing more with less. Entrepreneurs and innovators in emerging markets have to devise low cost strategies to either tap or circumvent institutional complexities and resource limitations to innovate, develop and deliver products and services to low income users with little purchasing power (source)
43) Blue ocean innovation- Blue Oceans represent the unknown market space, i.e. all the industries not in existence today. Blue oceans are defined by untapped market space, demand creation, and the opportunity for highly profitable growth. In blue oceans, competition is irrelevant because the rules of the game are not set. Blue oceans can be created by expanding existing industry boundaries or by reconstructing industry boundaries. (source)
44). Open source innovation / Crowdsourcing
In production and development, open source is a philosophy or pragmatic methodology that promotes free redistribution and access to an end product's design and implementation details
45) Experience innovation- Companies that try to create holistic experiences by emotionally engaging their consumers.
46) User led innovations- The user is king. It's a phrase that's repeated over and over again as a mantra: Companies must become user-centric. But there's a problem: It doesn't work. Here's the truth: Great brands lead users, not the other way around. (source)
47) Supply chain innovation- Supply chain innovation is about applying best practices and technological innovations to your own supply chain in order to reduce such cycle and wait times and other waste (to use a Lean term) in your in-house processes. (source)
48) Foundational innovation tends to transform business operating models as entirely new business models emerge over many years, with gradual and steady adoption of the innovation leading to waves of technological and institutional change that gain momentum more slowly

Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency will conduct and support innovation to birth and create new ideas, creative thoughts, new imaginations in form of device or method in the world in every sector. We shall invest heavily to establish research centers, support existing ones through joint ventures, in partnership and collaborations for better solutions globally that meet new requirements, unarticulated needs, or existing market needs. Our creativity and innovation will take place through the provision of more-effective products, processes, services, technologies, or business models that are made available to markets, governments and society.

With the changing world we seek to bring out original and more effective and, as a consequence, new, that "breaks into" the market or society. We shall support inventions and Innovation related to involve the practical implementation of an invention to make a meaningful global impact in the market or society. We shall support exhibitions and congresses from primary to university also corporate and community platforms that gathers people to brainstorm on challenges affecting communities. To solve community, country and global challenges along with engineering process to seek solutions to problem of a technical or scientific nature.

Our scope will stretch to Economics management science, and other fields of practice and analysis, innovation is generally considered to be the result of a process that brings together various novel ideas in such a way that they affect society along with industrial economics, innovations to be created and find empirically services to meet growing consumer demand. We shall extend to industrial survey & software industry to support production or adoption, assimilation, and exploitation of a value-added novelty in economic and social spheres renewal and enlargement of products, services, and markets; development of new methods of production; and the establishment of new management systems as a process and an outcome. Our innovation strategy includes original invention and creative use and defines innovation as a generation, admission and realization of new ideas, products, services and processes.

We shall support creativity and innovation in all dimensions to give new solutions to new firms, new markets, new industries globally improving economies, eradicating poverty and creating jobs. We shall empower product-service system innovation boasting organizational scholarship and researchers of various workplaces coming up with distinguished innovation to be separate from creativity. We shall work and support companies and organizations that network various stakeholders.

Workplace creativity concerns the cognitive and behavioral processes applied when attempting to generate novel ideas. Workplace innovation concerns the processes applied when attempting to implement new ideas. Specifically, innovation involves some combination of problem/opportunity identification, the introduction, adoption or modification of new ideas germane to organizational needs, the promotion of these ideas, and the practical implementation of these ideas.Innovation is a catalyst for global socio economic growth. With rapid advancements in transportation and communications over the past few decades, the old-world concepts of factor endowments and comparative advantage which focused on an area's unique inputs are outmoded for today's global economy. Industries must incessantly revolutionize the economic structure from within, that is innovate with better or more effective processes and products, as well as market distribution, such as the connection from the craft shop to factory. He famously asserted that "reative destruction is the essential fact about capitalism". Entrepreneurs continuously look for better ways to satisfy their consumer base with improved quality, durability, service and price which come to fruition in innovation with advanced technologies and organizational strategies. A prime example of innovation involved the explosive boom of Silicon Valley startups out of the Stanford Industrial Park, Vision of Konza city and many more. Over the next 20 years, this snowball process launched the momentous startup-company explosion of information-technology firms and hubs of innovation have sprung up globally with similar metonyms, including Silicon Alley encompassing New York City, Shenzen in China and many more others. We shall establish business incubators globally a phenomenon nurtured by governments around the world, close to knowledge clusters (mostly research-based) like universities or other Government Excellence Centres – which aim primarily to channel generated knowledge to applied innovation outcomes in order to stimulate regional or national economic growth.

Innovation is linked to positive changes in **efficiency**, **productivity**, **quality**, **competitiveness**, and **market share** globally. Our research and findings highlight the complementary role of organizational culture in enabling organizations to translate innovative activity into tangible performance improvements. Organizations can also improve profits and performance by providing work groups opportunities and resources to innovate, in addition to employee's core job tasks. **Innovation will support functions of entrepreneurship globally, whether in an existing business, a public service institution, or a new venture started by a lone individual in the family kitchen. It is the means by which the entrepreneur either creates new wealth-producing resources or endows existing resources with enhanced potential for creating wealth. Disruptive innovation is the key to future success in Global business. The organizations requires a proper structure in order to retain competitive advantage and stimulate global trade. It is necessary to create and nurture an environment of innovation globally that is our major focus through Helpers Of Africa Internationalthrough Kingdom Creativity and innovation Agency. Executives and managers need to break away from traditional ways of thinking and use change to their advantage. It is a time of risk but even greater opportunity.**

The world of work is changing with the increase in the use of technology and both companies and businesses are becoming increasingly competitive. Companies will have to downsize or reengineer their operations to remain competitive. This will affect employment as businesses will be forced to reduce the number of people employed while accomplishing the same amount of work if not more. While disruptive innovation will typically "attack a traditional business model with a lower-cost solution and overtake incumbent firms quickly," foundational innovation is slower, and typically has the potential to create new foundations for global technology systems over the longer term. Foundational innovation tends to transform business operating models as entirely new business models emerge over many years, with gradual and steady adoption of the innovation leading to waves of technological and institutional change that gain momentum more slowly. The advent of the packet-switched communication protocol to support a single use case for United States Department of Defense electronic communication (email), and which gained widespread adoption only in the mid-1990s with the advent of the World Wide Web—is a foundational technology.

We shall encourage, advocate and support innovation and creativity across All organizations through the Global trade and countries organizations including hospitals & health sector, Education Sector and institutions, local governments and national governments through countries. A performance-measurement data and management system that allows city officials to maintain statistics on several areas from crime trends to the conditions of potholes. This system aids in better evaluation of policies and procedures with accountability and efficiency in terms of time and money. In transport transit systems have innovated with hybrid bus fleets to real-time tracking at bus stands. In addition, the growing use of mobile data terminals in vehicles, that serve as communication hubs between vehicles and a control center, automatically send data on location, passenger counts, engine performance, mileage and other information. This tool helps to deliver and manage transportation systems.

Still other innovative strategies include hospitals digitizing medical information in electronic medical records. Initiatives turned severely distressed public housing in urban areas into revitalized, mixed-income environments; We shall support community-based approach to educate local area children and the Environmental Protection Agency's brownfield grants facilitates turning over brownfields for environmental protection, green spaces, community and commercial development as part of environmental innovation. In our strategic plan part of our research thesis will emerge from several sources of innovation some from focused effort by a range of different agents, by chance, or as a result of a major system or service or product failure. Others from different changes in industry structure, in market structure, in local and global demographics, in human perception, mood and meaning, in the amount of already available scientific knowledge, especially in this season of Covid 19.

In the simplest linear model of innovation the traditionally recognized source is *manufacturer innovation*. This is where an agent (person or business) innovates in order to sell the innovation. Another source of innovation, only now becoming widely recognized, is *end-user innovation*. This is where an agent (person or company) develops an innovation for their own (personal or in-house use because existing products do not meet their needs. The end-user innovation is most important and critical as per school of Diasabilty that makes customized disability aids to fit various challenges of people with disability to be more useful rather than ready made ones because of a recognized need, competent people with relevant technology and financial support. This innovation processes usually involve: identifying customer needs, macro and meso trends, developing competences, and finding financial support that is the model of of Bombolulu school of Disability that we seek to support as a model to provide disability equipment globally. This model of innovation places emphasis on potential market needs as drivers of the innovation process, and describes the complex and often iterative feedback loops between marketing, design and manufacturing as our strategic plan. Innovation by businesses is achieved in many ways, with much attention now given to formal research and development for "breakthrough innovations". help spur on patents and other scientific innovations that leads to productive growth in such areas as industry, medicine, engineering, and government. Yet, innovations can be developed by less formal on-the-job modifications of practice, through exchange and combination of professional experience and by many other routes. Investigation of relationship between the concepts of innovation and technology transfer revealed overlap. The more radical and revolutionary innovations tend to emerge from R&D, while more incremental innovations may emerge from practice – but there are many exceptions to each of these trends.

Information technology and changing business processes and management style can produce a work climate favorable to innovation. An important innovation factor includes customers buying products or using services. As a result, organizations may incorporate users in focus groups (user centred approach), work closely with so called lead users (lead user approach) or users might adapt their products themselves. The lead user method focuses on idea generation based on leading users to develop breakthrough innovations. U-STIR, a project to innovate Europe's surface transportation system, employs such workshops.[38] Regarding this user innovation, a great deal of innovation is done by those actually implementing and using technologies and products as part of their normal activities. Sometimes user-innovators may become entrepreneurs, selling their product, they may choose to trade their innovation in exchange for other innovations, or they may be adopted by their suppliers. Nowadays, they may also choose to freely reveal their innovations, using methods like open source. In such networks of innovation the users or communities of users can further develop technologies and reinvent their social meaning. We shall engage, finance and support all techniques of innovations solutions identifying all problems is to actually attempt an experiment with many possible solutions.

We are all enjoying fruit of inventions in lighting from Thomas Edison's laboratory to find a version of the incandescent light bulb economically viable for home use, which involved searching through thousands of possible filament designs before settling on carbonized bamboo. This investments and focus also in aerodromes, motor vehicles, clothes, agriculture, food, manufacturing, medical and health etc all show us our livelihood has been framed today because of previous sacrifices and investments in inventions. Especially because of medical health and pharmaceutical drug discovery especially with the increase of diseases due to foods chemical contaminations cancers, Covid 19, .Thousands of chemical compounds are subjected to high-throughput screening to see if they have any activity against a target molecule which has been identified as biologically significant to a disease. Promising compounds can then be studied; modified to improve efficacy, reduce side effects, and reduce cost of manufacture; and if successful turned into treatments. Computer-simulated products and online user panels to conduct larger numbers of experiments to guide the design, packaging, and shelf placement of consumer products. Capital One uses this technique to drive credit card marketing offers.

Organizational innovation are typically tightly linked to organizational goals and objectives, to the **business plan**, and to **market** **competitive positioning**. One driver for innovation programs in corporations is to achieve growth objectives. Companies cannot grow through cost reduction and reengineering alone... Innovation is the key element in providing aggressive top-line growth, and for increasing bottom-line results".One survey across a large number of manufacturing and services organizations found, ranked in decreasing order of popularity, that systematic programs of organizational innovation are most frequently driven by: improved **quality**, creation of new **markets**, extension of the **product** range, reduced **labor costs**, improved **production processes**, reduced materials, reduced **environmental damage**, replacement of **products**/**services**, reduced **energy** consumption, conformance to **regulations**. These goals vary between improvements to products, processes and services and dispel a popular myth that innovation deals mainly with new product development. Most of the goals could apply to any organization be it a manufacturing facility, marketing company, hospital or government. Whether innovation goals are successfully achieved or otherwise depends greatly on the environment prevailing in the organization. Conversely, failure can develop in programs of innovations. The causes of failure have been widely researched and can vary considerably. Some causes will be external to the organization and outside its influence of control. Others will be internal and ultimately within the control of the organization. Internal causes of failure can be divided into causes associated with the cultural infrastructure and causes associated with the innovation process itself. Common causes of failure within the innovation process in most organizations can be distilled into five types: poor goal definition, poor alignment of actions to goals, poor participation in teams, poor monitoring of results, poor communication and **access to information**.

Diffusion of innovation research was first started in 1903 by seminal researcher Gabriel Tarde, who first plotted the S-shaped diffusion curve. Tarde defined the innovation-decision process as a series of steps that include knowledge, forming an attitude, a decision to adopt or reject, implementation and confirmation of the decision. Once innovation occurs in our hurbs, we shall also structure how to be spread from us to all beneffiarries up to down users to individuals, groups and companies. This process has been proposed that the lifecycle of innovations can be described using the complete innovative cycle. Global economic growth of revenue or productivity against time based on short term and long term all will go toward a bright future of generations. In the early stage of a particular innovation, growth is relatively slow as the new product establishes itself customers begin to demand and the product growth increases more rapidly. New incremental innovations or changes to the product allow growth to continue. Towards the end of its lifecycle, growth slows and may even begin to decline. In the later stages, no amount of new investment in that product will yield a normal rate of return. A rapid increase in revenue will increase great majority of innovations never get off the bottom of the curve, and never produce normal returns. Innovative companies will typically be working on new innovations that will eventually replace older ones. Successive innovative curves will come along to replace older ones and continue to drive growth upwards. Emerging economy that currently yields lower growth but will eventually overtake current technology and lead to even greater levels of growth. The length of life will depend on many factors. Measuring innovation will be effective so that comparisons can be made in quantitative terms and over the years our global impact will be tangible and visible across products or services worldwide. Innovation process, effect of the innovation output, measures to access the activities in an innovation process and availability of factors that facilitate such a process. At Organizational level, The measure of innovation at the organizational level relates to individuals, team-level assessments, and private companies from the smallest to the largest company. Measure of innovation for organizations will be conducted by surveys, workshops, consultants, or internal benchmarking. Corporate measurements are generally structured around balanced scorecards which cover several aspects of innovation such as business measures related to finances, innovation process efficiency, employees' contribution and motivation, as well benefits for customers. Measured values will vary widely between businesses, covering for example new product revenue, spending in R&D, time to market, customer and employee perception & satisfaction, number of patents, additional sales resulting from past innovations. At Gorverment level, measures of innovation are more focused on a country or region competitive advantage through innovation. Organizational capabilities will be evaluated through various evaluation frameworks. We shall seek to evaluate Global GDPs upon the countries we release our products and services along with direct users dip steaks and bench marking. A common industry view (unsupported by empirical evidence) is that comparative cost-effectiveness research is a form of price control which reduces returns to industry, and thus limits expenditure, stifles future innovation and compromises new products access to markets. Some academics claim cost-effectiveness research is a valuable value-based measure of innovation which accords "truly significant" therapeutic advances (ie providing "health gain") higher prices than free market mechanisms. Such value-based pricing has been viewed as a means of indicating to industry the type of innovation that should be rewarded from the public purse. As we establish other Kingdom Bench mark indexes we shall use existing indices attempt to measure innovation and rank entities based on existing global existing bench marks.

We shall also work on honors and Rankings of innovations rewarding such from Primary to University for various nations annually to stimulate innovation. We shall be highlighting breakthrough innovations through our handbooks and websites along with gathering of innovator champions every year. Many research studies try to rank countries based on measures of innovation. Common areas of focus include: **high-tech** companies, **manufacturing**, **patents**, **post-secondary education**, **research and development**, and research personnel. Our Future is bright in this sector as we make the world a better place and improve the level of technology reach a maximum with high rate of innovation. We shall stimulate Innovation and development, The theme of innovation as a tool to disrupting patterns of poverty has gained momentum since the mid-2000s among major **international development** actors such as **many charities and Foundation**'s using some models indexes to fund. We shall develop Kingdom Global Creativity and innovation Labs with world wide Networks that will establish to support innovation in development to channel our Investment funds to identify and catalyze innovations in **developing countries** though Kingdom Creativity and Innovation Fund, Kingdom **Humanitarian and Development Innovation Fund**, and (in partnership with other Global Development Innovation Ventures impact the world for generations to come. We shall raise the bar and continue to play on the same level of playing field with global research not to compete but to complement. This will be achieved by being strategically innovative through investment in basic research and science" along with strong investment agenda, networking, openness and professionalism. We shall also support and advocate for Government policies to favor innovation and creativity by structuring the right curriculums from basic kinder-garden to university education along with vocational institutions to stimulate celebrate innovation globally with annual national, regional honor and award from us to motivate creativity and innovation. Given the noticeable effects on **efficiency**, **quality of life**, and **productive growth**, innovation is a key factor in society and economy. Consequently we shall influence policymakers and have long worked to develop environments that will foster innovation and its resulting positive benefits, from funding **Research and Development** to supporting regulatory change, funding the development of innovation clusters, and using public purchasing and standards to 'pull' innovation through.

Our global agencies and our 72 departments will all work to stimulate and identify creativity and innovation through all the projects and programs as a fishing net to capture unique ideas, talents and products / services through collaborative strategic intervention organization that will house innovations programs from fragmented silos under one entity. Federal officials on innovation performance metrics, strengthen industry-university partnerships, and support innovation economic development initiatives, especially to strengthen regional clusters. Because clusters are the geographic incubators of innovative products and processes, a cluster development grant program would also be targeted for implementation. By focusing on innovating in such areas as precision manufacturing, information technology, and clean energy, other areas of national concern would be tackled including government debt, carbon footprint, and oil dependence. Through regional governments and banks we shall partner to form Regional Innovation Clusters initiatives mirrored through our countries and continental structures to integrate her supply-chain and improve talents along with research capability and downstream process innovation.

Many countries recognize the importance of research and development as well as innovation in various ministries Education, Culture, Sports, Science and Technology, Ministry of Education and Research, and the Ministry of Science and Technology along with corporations of Agriculture and research institutes like Kenya so we shall use and collaborate with this ministries and institutions. Other countries have innovation programme and modernization programmes which aims at creating a diversified economy based on high technology and innovation. Regions have taken a more proactive role in supporting innovation. Many regional governments are setting up regional innovation agency to strengthen regional innovation capabilities.

Other issues in our Strategic plan include advocationg for

. a) Training: Each organisation has to train their staff for innovation and creativity. Organisation has to check if impact of present training programme on employees creativity and innovations. Organisations which would like to survive with greatest potential in market have to have each programme moving in direction of change and innovation. Mental models of personal learning and growth, shared vision for organisation, commitment to learning and system thinking. Many researchers argue that process of critical thinking starts with injecting intellectual knowledge and thinking throughout the organisation; where training plays an important role.
b) Working conditions/ culture of innovation: According to Man (2001) employees would be ready to contribute if there is culture of implementing ideas into practice. Innovation will only happen when people think for new ideas, implement this and accept it. It is very important for an organisation to develop culture of accepting the idea, people would start with efficiency. Managers should try to create conducive atmosphere where there is lot of why, why questions and mind-set of employees are triggered with questions of finding newer ways and means of doing the things.
c) GAP Analysis: Researchers have mentioned in this paper literature review which revolves around the process of implementing innovation with great efforts but at the same time excellence of innovation cannot be neglected. It is not only important that creativity and idea should result in "Innovation" but it is also important the innovation should result in excellence. Excellence can be brought by implementing innovation with strategic tools and working on all determinants of innovation.
d) Business Process Reengineering -Achieving competitive advantage organisations have to work on both continuous innovation and radical innovation. Business Process Reengineering can be brought as radical change in an organisation. Some example of BPR like organisation structural change from hierarchical to flat, changing main goal from domestic to global, and going for strategic alliance. BPR needs huge investment with great deal of efforts from top management.
e) Organisational Excellence: Organisation has to work towards inclusive growth to achieve main goal of excellence. Excellence is the process of assessing organisations against its goal set. Organisations has to try continuously for achieving its excellence with innovative ideas and thought process.

f) Research Methodology In this research case study methodology has been followed to understand importance of innovation for any organisation. Researchers have discussed one SME's case study which has its success story based on innovation.
do that.

G) Objective of the study · To know the importance of organizational creativity and innovation · To identify the factors that enhances and/or facilitates organisational creativity · To study various models of innovation.
H) Models of innovations Researchers have studied two models of innovation in this paper to explain correlation between innovation and business processes.

Strengthening Collaboration in creativity and innovation

Helpers Of Africa Internationalthrough Kingdom Creativity and Innovation Agency will support and fund global teamwork. Teamwork is essential to getting things done in innovation and creativity. It's becoming increasingly important to bring more, diverse minds to the table and to break down silos. Collaboration is one type of group activity familiar to community development. There is no shortage of initiatives intended to be collaborative. Collaboration has never been easy, mostly because conflict and competition within and among groups dominates the landscape. As everyone tends to avoid tension, what we actually may be left with in communities is peaceful (or less than peaceful) coexistence, and not collaboration. It may be a good time for re-thinking collaboration. *We shall support and host* conferences to encourage re-thinking approaches to strategy. How could new approaches to collaboration influence economic transformation of a community, state or nation? To begin, collaboration involves three basic aspects: relationships, process and outcomes. Collaboration means to work together (relationships) toward (process) something in common (outcomes). There is a good chance that what community development needs may not be found within existing relationships. It is often repeated that collaborative relationships are important because it takes more than one person, group or organization to address challenges. Now, relationships developed across sectors, disciplines and areas of study and practice may yield greater returns. Interdisciplinary networks, especially those that include younger professionals and ethnic groups, can reveal answers to persistent challenges and new intersections where none were easily apparent. Tangible goals of collaboration include building affordable housing, supporting enterprise creation and bringing high-speed Internet to rural areas. Many collaborative seek to describe an issue or reach consensus. An important outcome of collaboration could be to create new measures of success in economic development In innovation. Re-thinking collaboration means finding how intellectual efforts, like mobilizing the creative capital of each individual, can generate value for the community through innovations and other economic development pillars.

Collaborative process is more than working together. It means the ability to think together and to act on complex projects globally on all matters including innovation and creativity. The traditional strategic planning process is not a model for the disciplines required to transform our economies. Rather, strategic "doing" offers a framework to achieve results. Thinking together is open innovation. Strategic doing guides open innovation. Strategic doing means Listen and explore—What can we do together, Learn and adjust—How will we learn together, Focus and align—What should we do together? Link and leverage—What will we do together? Strategic doing is based on important design elements. Design requires us to become more aware and intentional about creating spaces for important conversations on topics that matter to the community. Physical locations in the community can be created to model and mirror new collaborative behaviors. The place and space must be hospitable and intentional. This means conversations are open-sourced and carefully managed. Productive conversations require good listening skills. How much do we listen to another person only with the thought of what we want to say next? Good listening means inquisitiveness and curiosity drive conversation and not power, authority and political influence. Creativity and innovation have been highlighted as essential skills for the 21st century that is why we cannot ignore this aspect in Helpers Of Africa Internationalif we are to affect Socio Economic Developments globally, especially if we consider that both skills can promote human potential by eliciting positive aspects of the individual. These skills have been valued in different contexts. The purpose of this text is to discuss the notions of creativity and innovation as independent constructs and to discuss the relationships between these concepts according to the scientific literature. The development of humanity has been increasingly dependent on innovation and discovery. From this point of view, creativity is perceived not only as the expression of human potential but also understood as fundamental for societal growth. Considering that innovation depends on the occurrence of creativity, applied to a specific domain, there is the need to understand these phenomena, and to determine if they are independent, related or complementary.Understanding creativity in our strategic plan shows Interest in the study of creativity can be explained by the need to further understand human potential and traits relative to the positive aspects of the individual. This characteristic has been valued because of its importance in promoting individual well-being, in both personal and professional achievements, and in the important contributions that it can bring to humanity.

These reasons make creativity an increasingly appreciated characteristic perceived as a valuable resource for individual and social development. Creativity can be understood as being a multidimensional construct, involving cognitive variables, personality characteristics, family, educational aspects, and both social and cultural elements. These dimensions interact with each other according to individual thinking and creative styles and are therefore expressed and found in many different ways. Therefore, the creative phenomenon has been studied under the most different approaches, sometimes emphasizing the person, or the process or products, the environment, or even the interaction between two or more of these variables, thus implying that creativity has multiple ways to be identified. Our strategic plan includes research into both the cognitive value as well as personality variables. Our Cognitive aspects involve in creative thinking are mainly related to divergent thinking skills, emphasized in work, which names them as fluency, flexibility, elaboration and originality and were later confirmed by Torrance's numerous works that look at the predictive value of these characteristics on adults' creative achievements.

Personality variables associated with creativity are an amalgam of positive characteristics, such as curiosity, tolerance towards different ideas, autonomy, imagination, self-confidence, persistence, motivation, and others. Nevertheless, rather than believing that creative people possess all of these characteristics, there is a consensus among authors indicating there are many different paths along which people can display their creative potential.Bottom-up, top-down and outside-in: Cultivating innovation this involves new ways of working across offices and cultivate innovation in the organization. Artificial intelligence innovation that is the big thing in innovation After decades of hype, artificial intelligence has arrived. New technologies, or new ways of using existing technology. No matter what the innovation, it must add value for the end user. A new technology or process that does not create a positive change in the lives of the people we work for does not qualify as innovation.Humanitarian innovations and partnerships- Innovation and data are important themes in humanitarian relief, as well as in the larger Sustainable Development Goals (SDG) agenda. Open Innovation Challenges find new perspectives and solutions to complex problems, Helpers Of Africa Internationaland Her Agencies will be tackling the toughest development challenges in the world. And we're committed to finding the best-fit solutions to those challenges. Sometimes the best ideas come from outside our walls. The new policy formally makes "Open Innovation Challenges" a part of strong investments and research as we fund great solutions from any source. An Open Innovation Challenge is a structured process to find new solutions. We shall identify a development problem, create and publicize an Open Innovation Challenge with prizes for solving that problem, get the most capable participants to compete, and offer the reward to the winner. Such an Open Challenge can also help to reveal more about the problem itself. Unlocking the potential of youth stir them up towards creativity and innovation, - "Children and youth deserve a better future in their own country, not necessarily somewhere else. It is the responsibility of the adults not just to bring children to this world but contribute to creating a socio-political environment that is conducive for their advancement and well-being. We've heard the call for more opportunities for young people, the need to engage with them, and the responsibility of adults and institutions.

Quotes about CREATIVITY and INNOVATION

"When all think alike, then no one is thinking." — Walter Lippman

"Capital isn't so important in business. Experience isn't so important. You can get both these things. What is important is ideas. If you have ideas, you have the main asset you need, and there isn't any limit to what you can do with your business and your life."— Harvey Firestone

"Great is the human who has not lost his childlike heart."— Mencius (Meng-Tse)

"Doing the same thing over and over, yet expecting different results, is the definition of crazy." — Unknown

M. A. Rosanoff: "Mr. Edison, please tell me what laboratory rules you want me to observe."
Edison: "There *ain't* no rules around here. We're trying to accomplish somep'n!"
— Thomas Edison

"Creativity, as has been said, consists largely of rearranging what we know in order to find out what we do not know. Hence, to think creatively, we must be able to look afresh at what we normally take for granted." — George Kneller

"No great discovery was ever made without a bold guess." — Sir Isaac Newton

"It isn't the incompetent who destroy an organization. The incompetent never get in a position to destroy it. It is those who achieved something and want to rest upon their achievements who are forever clogging things up." — F. M. Young

"It's easy to come up with new ideas; the hard part is letting go of what worked for you two years ago, but will soon be out of date."
— Roger von Oech

"The best way to have a good idea is to have a lot of ideas." — Dr. Linus Pauling

"Discovery consists of seeing what everybody has seen and thinking what nobody has thought."— Albert von Szent-Gyorgy

"To raise new questions, new possibilities, to regard old problems from a new angle, requires creative imagination and marks real advance in science." — Albert Einstein

Without the playing with fantasy no creative work has ever yet come to birth. The debt we owe to the play of imagination is incalculable." — Carl Jung

"To be creative you have to contribute something different from what you've done before. Your results need not be original to the world; few results truly meet that criterion. In fact, most results are built on the work of others.— Lynne C. Levesque

"We shall not cease from exploration, and at the end of all our exploring will be to arrive where we started and know the place for the first time."— T. S. Eliot

"Once we rid ourselves of traditional thinking we can get on with creating the future."— James Bertrand

"There's a way to do it better Let find it." — Thomas Edison

"The essential part of creativity is not being afraid to fail." — Edwin H. Land

"Creative activity could be described as a type of learning process where teacher and pupil are located in the same individual."
— Arthur Koestler

"There is no doubt that creativity is the most important human resource of all. Without creativity, there would be no progress, and we would be forever repeating the same patterns." — Edward de Bono

"Creativity is not the finding of a thing only, but the making something out of it after it is found." — James Russell Lowell (1819-1891)

"The creative person wants to be a know-it-all. He wants to know about all kinds of things: ancient history, nineteenth-century mathematics, current manufacturing techniques, flower arranging, and hog futures. Because he never knows when these ideas might come together to form a new idea. It may happen six minutes later or six months, or six years down the road. But he has faith that it will happen." — Carl Ally

"The things we fear most in organizations—fluctuations, disturbances, imbalance the primary sources of creativity."
— Margaret J. Wheatley

"Too much of our work amounts to the drudgery of arranging means toward ends, mechanically placing the right foot in front of the left and the left in front of the right, moving down narrow corridors toward narrow goals. Play widens the halls. Work will always be with us, and many works are worthy. But the worthiest works of all often reflect an artful creativity that looks more like play than work."
— James Ogilvy

"The achievement of excellence can only occur if the organization promotes a culture of creative dissatisfaction."— Lawrence Miller

"When the 'weaker' of the two brains (right and left) is stimulated and encouraged to work in cooperation with the stronger side, the end result is a great increase in overall ability and ... often five to ten times more effectiveness."
— Professor Robert Ornstein, University of California
"Innovation— any new idea—by definition will not be accepted at first. It takes repeated attempts, endless demonstrations, monotonous rehearsals before innovation can be accepted and internalized by an organization. This requires *courageous patience*."
— Warren Bennis

The way to get good ideas is to get lots of ideas and throw the bad ones away." — Linus Pauling

"The uncreative mind can spot wrong answers, but it takes a very creative mind to spot wrong questions." — Anthony Jay

"Success is on the far side of failure." — Thomas Watson Sr.

"That so few now dare to be eccentric marks the chief danger of our time."— John Stuart Mill

“Creative thinking is not a talent, it is a skill that can be learnt. It empowers people by adding strength to their natural abilities which improves teamwork, productivity and where appropriate profits.”— Edward de Bono
"Anxiety is the hand maiden of creativity."— Chuck Jones
Warner Bros. animator

"An inventor is simply a person who doesn't take his education too seriously. You see, from the time a person is six years old until he graduates from college he has to take three or four examinations a year. If he flunks once, he is out. But an inventor is almost always failing. He tries and fails maybe a thousand times. It he succeeds once then he's in. These two things are diametrically opposite. We often say that the biggest job we have is to teach a newly hired employee how to fail intelligently. We have to train him to experiment over and over and to keep on trying and failing until he learns what will work." — Charles Kettering

"All human development, no matter what form it takes, must be outside the rules; otherwise we would never have anything new."
— Charles Kettering

"Anyone can look for fashion in a boutique or history in a museum. The creative explorer looks for history in a hardware store and fashion in an airport." — Robert Wieder

"He who would be a man must therefore be a non-conformist." — Ralph Waldo Emerson

"Discoveries are often made by not following instructions, by going off the main road, by trying the untried."— Frank Tyger
"The law of floatation was not discovered by contemplating the sinking of things, but by contemplating the floating of things which floated naturally, and then intelligently asking why they did so." — Thomas Troward

"Every act of creation is first of all an act of destruction."— Picasso

"If you do not the expect the unexpected you will not find it, for it is not to be reached by search or trail." — Heraclitus

"The organizations of the future will increasingly depend on the creativity of their members to survive. Great Groups offer a new model in which the leader is an equal among Titans. In a truly creative collaboration, work is pleasure, and the only rules and procedures are those that advance the common cause." — Warren Bennis

"Genius is one percent inspiration, and ninety-nine percent perspiration."— Thomas Edison

"The business world sees a measurable and growing intelligence gap - with need for intellectual expertise constantly expanding. Available talent is decreasing even though the population is increasing. Being bombarded with information - be it in Nintendo or shogi - and being able to process it, find patterns etc., is a vital skill. One way to increase this talent potential is through games."
— Leif Edvinson

"Don't worry about people stealing your ideas. If your ideas are any good, you'll have to ram them down people's throats."— Howard Aiken

"Some men look at things the way they are and ask why? I dream of things that are not and ask why not?"— Robert Kennedy

"In every work of genius, we recognize our once rejected thoughts." — Ralph Waldo Emerson

"The human body has two ends on it: one to create with and one to sit on. Sometimes people get their ends reversed. When this happens they need a kick in the seat of the pants." — Roger von Oech

"*Creativity* is thinking up new things. *Innovation* is doing new things." — Theodore Levitt
"Innovation is the process of turning ideas into manufacturable and marketable form." — Watts Humprey

"The *innovation point* is the pivotal moment when talented and motivated people seek the opportunity to act on their ideas and dreams."
— W. Arthur Porter
"In the beginner's mind there are many possibilities, but in the expert's mind there are few."
— Shunryu Suzuki

The chief enemy of creativity is good sense. Pablo Picasso

He who would be a man must therefore be a nonconformist. Ralph Waldo Emerson

The most talented, thought-provoking, game-changing people are never normal. Richard Branson

If you’re not doing some things that are crazy, then you’re doing the wrong things. Larry Page

We adore chaos because we love to produce order. M. C. Escher

How to unlock creativity: slow down, study another field, get into nature, get out of office, music (lots), sketch, cardio before/after, nibble on small ideas, throw stuff away, atomize the work, look for orthogonal inspiration, breathe, learn about circadian rhythm, paint. Brian Norgard

When you can do a common thing in an uncommon way; you will command the attention of the world. George Washington Carver

Great things are not done by impulse, but a series of small things brought together. Vincent van Gogh

If it doesn't sell; it isn't creative. David Ogilvy

An idea that is not costly is unworthy of being called an idea at all. Oscar Wilde

Helpers Of Africa International

Kingdom Global Volunteers Agency

Volunteer is a person who carries out volunteering activities for a National Society, occasionally or regularly. Kingdom Global volunteers work for humane and peaceful world by delivering services directly to vulnerable people and our projects in nations and globally through seeking to prevent and reduce vulnerability and exclusion where they can. Volunteering with the is organised by recognised by Helpers Of Africa Internationaladministration representatives of National, regional, continental and global level aimed at furthering its services and activities, always working in accordance with the Fundamental Principles of the Helpers Of Africa Internationaland Kingdom Global Volunteers Agency . It is carried out by people motivated by free will, and not by a desire for material or financial gain, or by external social, economic or political pressure besides the facilitation of monthly allowance, housing, facilitations and honorariums they would draw. We shall Protect and support volunteers for them to become more useful to our mission in nations and the world as they serve God and world through us. We shall have well functioning management systems and practices to supervise, support and encourage volunteers. These are adapted to the specific context of their work and responsive to new trends in volunteering that may go beyond the established structures of Helpers Of Africa Internationaland KGVA including, for example, informal, on-line, and corporate or other institutional forms of volunteering. KGVA will ensure that their volunteers are properly prepared to carry out their work, through providing them with relevant and timely information, training and equipment, feedback on their performance, as well as appropriately assessed safety and security measures we shall insure their volunteers against accidents, and provide them with appropriate psychosocial support when required and lighten their social economic burden by paying caring for children for those who are not able through our orphans program. In certain circumstances, volunteers may themselves be vulnerable and KGVA ensure that their needs for assistance and protection are given due attention. KGVA provide volunteers with access to accredited learning and personal development opportunities so as to help them to better undertake their agreed tasks or roles, as well as to motivate them to grow their skills and capacity and undertake future roles within KGVA. When there is the need or opportunity for a volunteer with the KGVA to carry out paid work as casual or contracted labour, the KGVA recognises this change in status and ensures that the employment complies with the relevant laws of the country. We shall seek to Recognise volunteers and their achievements recognise that volunteers have a significant stake in the organisation. We shall take formal and informal opportunities to appreciate, individually and collectively, the work of volunteers and its impact. KGVA encourage volunteers to participate in its decision-making and in designing and improving the work in which they are involved. A volunteer has the right to become a member of the KGVA someone who has formally agreed to the conditions of membership as required under the National Society's statutes. We shall seek to Promote volunteers and volunteering in Nations and Globally recruiting many beginning with those who have supported and worked diligently to nature and mature this vision for 25 years of incentions and feasibility studies and pilot. KGVA recognise the value of a diverse volunteer workforce, and actively recruit volunteers, irrespective of race, ethnicity, gender, sexual orientation, disability or age. They remove physical, economic, social and cultural barriers to participation, and recruit volunteers based on their potential. National Societies reimburse volunteers for pre-approved expenditure related to their volunteering tasks. National Societies also work with governments, the corporate sector and other partners to promote an enabling environment for volunteering in national life. KGVA also Agree volunteer rights and responsibilities provide volunteers with written guidance and rules that sets out the rights and responsibilities of both the KGVA and its volunteers. All Kingdom Global volunteers are expected to act, at all times, in accordance with the Fundamental Principles. Volunteers are expected to respect the regulations on the use of the emblem, and prevent its misuse. They should make themselves available to the KGVA in case of emergency, Charity, empowerment and development vision and mission of Helpers Of Africa Internationalalong with her agencies can be deployed in deparpments, projects and agencies according to their skills and abilities, as agreed with by Management through interviews and faithfulness. We shall also use volunteer platform as an entry platform to prepare potential employees in our establishments businesses, hospitals, malls, sport centres, real estate, farms, children orphanages, environmental programs, industries, businesses and all other services within our organizations and partners. In working with vulnerable people, volunteers are expected to strive for the highest standards of quality in the services that they deliver. They fulfil their duties without discrimination, responding to the needs of vulnerable people in a compassionate, proffessional and respectful manner. They respect the confidentiality of those whom they assist. We seek to have an Impactful policy In reinforcing the importance of volunteers and volunteering, this volunteering policy ethics serves as guidance for Helpers Of Africa Internationaland Kingdom Global Volunteers Agency in creating or updating their volunteering policies in order to develop enabling environments for volunteers and volunteering.The impact of the successful implementation of this policy is expected to be a growth in the share of volunteering as measured by the increased number of people preferring to start and remain volunteering with the Helpers Of Africa Internationaland Kingdom Global Volunteers Agency. The volunteer work will further be determined by the department, projects and agency that they will be assigned to as the comply both to professional and work ethics stipulated by the specific jurisdictions. We shall recruit through churches, primary , secondary, colleges , university , communities, work places, professional bodies and organizations , open advertments , job agencies, online adverts and recruitments.

Volunteer work in our Helpers Of Africa International through Kingdom Global Volunteers Agency is sizable and will create significant social -economic value to Nations and globally

a) KGVA Volunteers constitute a far more significant share of the workforce of nations than is commonly recognized. In some countries volunteers work force represent much larger than those employed by the utilities industry and just slightly less than those employed in the transportation and construction industries in the 37 countries. KGVA will offer Jobs to millions of workers globally in all sectors who will serve our projects and program in charity, empowerment and development across the countries.
b) KGVA Volunteers are an especially sizable component of the workforce of nonprofit institutions (NPIs). Data generated by the Johns Hopkins researchers revealed that, once converted into full-time equivalent workers, volunteers account on average for .The relative position of full-time equivalent volunteer workers here is somewhat understated because the employment in the other industries has not been adjusted for part-time workers.
c) KGVA Volunteer work is also a significant component of charitable giving. The value of contributions of time outdistance the value of cash contributions by at least 50 percent on average. Through us we seek to create opportunities for many people globally to serve others, the world and serve God to be blessed. Recommend volunteers to us who are under your networks to serve we seek to connect continents and nations through international volunteer mix.
d) KGVA Volunteer work has a variety of broader social impacts that deliver significant added benefits to society and to the volunteers that makes its measurement important.
e) KGVA Volunteer work provides important employment training and a pathway into the labour force. We shall run a solid program to expose school leavers in Primary, secondary, college and university for work in our agencies as a platform of exposure.
f) KGVA Volunteer work is a crucial resource for addressing the global charity and Development Goals. Recent efforts to eradicate smallpox and inoculate children against polio, for example, would not have been possible without the millions of volunteers mobilized for these efforts;
g) KGVA Volunteer work will offer services not easily provided by paid workers, such as mentoring and role models; • Volunteer work enhances social solidarity, social capital, political legitimacy and quality of life in a society;
h) KGVA Volunteer work can serve as a means of social inclusion and integration; and
i) KGVA Volunteer work provides a sense of personal satisfaction, fulfillment, well-being and belonging to persons who volunteer. ii. A growing number of international organizations have come to recognize the contribution and importance of volunteer work.
j) KGVA Volunteers are at the heart of effective humanitarian assistance for millions of vulnerable people”
k) KGVA volunteering in promoting social and economic cohesion”
l) KGVA Volunteer work is of special importance to the labour force statistical community.
m) KGVA Volunteer work is a major component of unpaid labour, which has become a focus of increased attention by policymakers throughout the world as a major form of economic activity and economic benefits, particularly in developing countries.
n) KGVA Volunteer work is a component of unpaid labour that may be easier to capture since it can be differentiated from household activity and much of it takes place through institutions that are considered to be well within the production boundary of the economy (i.e., nonprofit institutions, or NPIs).
o) KGVA volunteer work not only produces tangible outputs but also gives individuals a sense of self-satisfaction and a feeling of contributing to the progress of society, its measurement is consistent with the International Labour Organization’s emphasis on “decent work” as a means of promoting human agency, dignity, and a feeling of self-respect.
p) KGVA Volunteer work makes both to the volunteers themselves and to the beneficiaries of their generosity, little sustained effort has gone into the measurement of the scope, scale, or distribution of such work, and this impedes policy-making and our general understanding of labour dynamics.

q) KGVA will empower and engage all Types of Volunteers Volunteers can be classified into four categories: 1. Professional. These are volunteers who are licensed or have a specialized skill. Professional volunteers include medical service providers such as physicians, nurses, emergency medical technicians; mental health professionals; lawyers; building contractors and inspectors; computer technicians; clergy; accountants, etc. These people may volunteer individually or as a group. UNIT 2: VOLUNTEERS IN EMERGENCY MANAGEMENT Developing and Managing Volunteers Page 2.3 Types of Volunteers (Continued) 2. Unskilled. These volunteers do not already have the skills that could be useful to emergency management programs, but they do offer their time and can be trained. 3. Spontaneous. These are people who volunteer in the immediate aftermath of a disaster or an emergency. They may be skilled or unskilled and may be from the affected area or from outside the area. Channeling spontaneous volunteers—especially if they present in large numbers as they did in New York City following September 11—presents special management challenges. 4. Affiliated. These volunteers are attached to a recognized voluntary agency that has trained them for disaster response and has a mechanism in place to address their use in an emergency.

Helpers Of Africa Internationalunder Kingdom Global volunteers Agency will recruit Volunteers is a voluntary individuals or groups to freely give time and labour for community service in many sectors of charity, development, humanitarian, professional skills, researchers, social workers, health, education, sports, environment etc. This will include pioneer full time volunteers, Part Time Entrepreneurs, Children & Teen Volunteers to encourage and Visit OVCs to keep fellowship serve together with them keen about children labour others paid in full or just facilitated with accommodation, food and transport to give their energy, intelligence, commitment, time and skills to address human and community needs. Volunteering in service learning seems to have the result of engaging both mind and heart, thus providing a more powerful results in projects and programs globally. We shall engage Skills-based volunteers is leveraging the specialized skills and the talents globally offering employment to millions along with strengthening individuals infrastructure of helping them build and sustain their capacity to successfully achieve their missions. This is in contrast to traditional volunteering, where volunteers doing something other than his / her professional work. The part time volunteers engagement will be mostly in the weekends Sarturday and Sunday for those working in other Jobs and day scholar students and school holidays for boarders programs will be intensified. We shall also engage international increasingly popular form of volunteering among young people, particularly gap year students and graduates, is to travel to communities in the developing world to work on our projects Globally. Activities include teaching, working in orphanages, conservation, assisting non-governmental organizations and medical work among many other. Our International volunteers program aims to give participants valuable skills and knowledge in addition to benefits to the host community or nation building a better world. We shall also have virtual volunteers and Micro volunteers who will do tasks, in whole or in part, offsite internationally teaching, mentoring, coaching through Internet, homes, schools, our tele-centers, computer libraries, smartphones, cyber service, tele-mentoring, tele-tutoring, telecommuting and through our international TV / Radio stations. We seek to deploy Environmental volunteer refers to the who will contribute towards environmental management or conservations work including environmental monitoring, ecological restoration such as re-vegetation and weed removal, protecting endangered animals, and educating others about the natural environment along with enviromental emergency on disasters wild fires, poaching, ocean and beach clean ups etc.

Globally through Our Kingdom Disaster Response Agency we shall engage volunteers often who will play a pivotal role in the recovery effort following natural disasters, such as tsunamis, floods, droughts, hurricanes, and earthquakes to distribute food, shelter, clothing, medicine supporting doctors , first aid and reconstruction pooling resources and assistance and leveraging social media. We shall also engage volunteer teachers and doctors since many schools around the world rely on government support or on efforts from volunteers and private donations, in order to run effectively. In some countries, whenever the economy is down, the need for volunteers and resources increases greatly.[21] There are many opportunities available in school systems for volunteers. Yet, there are not many requirements in order to volunteer in a school system that require just voluntary and selfless effort. This program will also bring great rewards to the volunteers, student, and school. In addition to intangible rewards, volunteers can add relevant experience to their resumes learning foreign culture/ languages and social intergration. Volunteering in schools will add teaching support for the students and help to fill the gap of local teachers. Cultural and language exchange during teaching and other school activities can be the most essential learning experience for both students and volunteers.

We shall also mobilize companies and other organization to release workers who have been supported through volunteers grant sending there remunerated volunteers to work for community and global welfare along with monetary donations. This combined venture through our agency and private sector volunteering Program solutions, the key drivers for companies that produce and manage building brands awareness and affinity, strengthening trust and loyalty among consumers, enhancing corporate image and reputation, improving employee retention, increasing employee productivity and loyalty, and providing an effective vehicle to reach strategic global strategics goals. We shall promote for Community volunteer work to build culture to those who work to improve their local community. This activity commonly occurs through not for profit organizations, local governments and churches; but also encompasses informal groups such as recreational sports teams. We shall promote benefits of community volunteer work are many proven personal benefits of community volunteerism. Working together with a group of people who have different ethnicity, backgrounds, and views reduces stereotypes. Community volunteerism has also been proven to improve student's academic success. Not only does volunteers community program oneself with new people and learning how to work together as a group help one improve teamwork and relational skills, it reduces stereotypes, increases appreciation of other cultures, and works to allow young people to find others that they relate to**.** Community volunteer work has proven to be a powerful predictor in students' academic lives and college experience as a whole. Studies have shown that students who participate in community service as a part of their college course of study have a much higher correlation of completing their degree addition, college students who participate in community volunteer projects as a part of their college experience report finding a much greater relevance in their academic studies after completing community volunteer projects so we shall be promoting education at the same time.

Studies have found that volunteering can positively impact a student's overall mental and emotional health Social volunteering or welfare volunteering, The difference to other types of volunteering is that there are strict legal regulations, what organization is allowed to engage volunteers and about the period a volunteer is allowed to work in a voluntary position. Due to that fact, the volunteer is getting a limited amount as a pocket money from the government. Volunteering at Major Sporting Events, Sochi Olympics had 25,000 volunteers they supported the organisers in more than 20 functional areas: meeting guests, assisting navigation, organising the opening and closing ceremonies, organising food outlets, etc. Volunteer applications were open to any nationals of Russia and other countries. 2017 FIFA Confederations Cup and 2018 FIFA World Cup in Russia , The FIFA World Cup was supported by 17,040 volunteers of the Russia 2018 Local Organising Committee,Volunteers were providing assistance in a variety of areas:Distributing accreditations, Selling and checking tickets, Assisting radio communications professionals, Organising leisure and entertainment activities for guests of the event, Organising food outlets, Providing interpretation services, Working with sponsors, Providing medical services and organising doping control procedures, Supporting mass media operations, Organising arrivals and departures of players and guests, Working with VIP guests, Assisting players and referees, Assisting players and guests with accommodation, Providing navigation assistance to guests, Assisting TV and radio broadcasting, Organising transportation, Organising operations of the stadium, Monitoring compliance with FIFA social and environmental requirements, Organizing the opening and closing ceremonies of the championship, We shall also support Volunteer days, weeks and years rememberance **Global Youth Service Day, International Volunteer Day, International Year of Volunteers and other national days.** Modern societies share a common value of people helping each other; not only do volunteer acts assist others, but they also benefit the volunteering individual on a personal level. Despite having similar objectives, tension can arise between volunteers and state-provided services so we shall advocate complementary work. We shall seek to help countries develop policies and enact legislation to clarify the roles and relationships among governmental stakeholders and their voluntary counterparts; this regulation will identify and allocate the necessary legal, social, administrative, and financial support of each party. We shall seek to address Difficulties in the cross-national aid model of volunteering that arise when it is applied across national borders. The presence of volunteers who are sent from one state to another can be viewed as a breach of **sovereignty** and showing a lack of respect towards the national government of the proposed recipients. We shall support motivations for states negotiate offers to send aid and when these proposals are accepted, particularly if donors may postpone assistance or stop it altogether. Three types of conditionality have evolved:

We shall seek to establish global structures that will establish 3 major this to establish volunteer programs across the countries including

1. Financial accountability: Transparency in funding management to ensure that what is done by the volunteers is properly targeted
2. Policy reform: Governmental request that developing countries adopt certain social, economic, or environmental policies; often, the most controversial relate to the privatization of services traditionally offered by the state
3. Development objectives: Asking developing countries to adjust specific time-bound economic objectives

We shall support global volunteer organizations mission as being altruistic: to fight poverty and improve the living standards of people in the developing world,. Our strategic plan seeks to have professionals pass on their skills and expertise to local people so that the volunteers' skills remain long after they return home. Many low-income countries' economies suffer from industrialization without prosperity and investment without growth. One reason for this is that development assistance guides many Third World governments to pursue development policies that have been wasteful, ill-conceived, or unproductive; some of these policies have been so destructive that the economies could not have been sustained without outside support. Indeed, some offers of aid have distorted the general spirit of volunteering, treating local voluntary action as contributions in kind, i.e., existing conditions requiring the modification of local people's behavior in order for them to earn the right to donors' charity. This can be seen as patronizing and offensive to the recipients because the aid expressly serves the policy aims of the donors rather than the needs of the recipients. Health benefits- Volunteering has the ability to improve the quality of life and health including longevity of those who donate their time[1] and research has found that older adults benefit the most from volunteering. Physical and mental ailments plaguing older adults can be healed through the simple act of helping others; however, one must be performing the good deed from a selfless nature. There are barriers that can prevent older adults from participating in volunteer work, such as socio-economic status, opinions held by others, and even current health issues. However, these barriers can be overcome so that if one would like to be involved in volunteer work they can do so. Volunteering improves not only the communities in which one serves, but also the life of the individual who is providing help to the community that is why Kingdom Global Volunteers Agency will work towards. **Mental health benefits-** Volunteering is known not only to be related to happiness but also to increase happiness. Also, giving help was a more important benefit of better reported mental health than receiving help. Studies have also shown that volunteering can cause a decrease in loneliness for those volunteering as well as those for whom people volunteer. During this Covid 19 we shall use volunteers to promote of healthcare in partnership with our Professional Global, including preventive healthcare and sanitation and on disaster management would be within the definition of our global response in the fight against COVID-19.

1. Safety of Medical Professionals & Healthcare Staff: Providing Personal Protective Equipment (PPE) Kits to Healthcare workers in Government Hospitals/Community Health Centers/Primary Health Centers to deal with the acute shortage of protective equipment. This is also necessary to ensure that the Doctors/other Health staff does not get infected or transfer the infection to others.
2. Infrastructure at Government Healthcare facilities: Providing portable foot-operated hand-washing stations at Government Hospitals, to mitigate risk of contamination. Sanitizers and Hand washing soaps will be provided for use for caretakers of the patients visiting the hospitals. We will also provide infrastructure for COVID-19 isolation wards as well as hospital equipment on a case to case basis.
3. Community Health Programs: Community-based health care, including outreach and campaigns and outbreak responses in the context of the COVID-19 pandemic. While these activities are life-saving, they may also increase the risk of COVID-19 transmission within communities and between health workers and communities.
4. COVID19 Outreach Program: For Daily Wage Workers and Migrant Labourers with the key objective of helping needy families so that they can at least manage food and other essential items to survive this crisis.

Helpers Of Africa International

Kingdom Global Volunteers Agency

Our volunteer program seek to launch over 70000 to 100,000 volunteers in the first year and in 3 years reach 1 million for head office and global operations. Besides the opportunity to build careers in various fields of expertise we shall offer a fulfilling environment that gives satisfaction by contributing to peace and security, human rights, and sustainable human development. security and safety to the world through Volunteers participation. Kingdom Volunteer movement in collaboration with other organizations in the same field will enable a plaform of network on many on Global issues lifting the morale of many. The volunteers will also be spread along our agencies and departments to also offer a pool of orientation of professionals who will help grow our global workforce as an entry point. Here are 12 ways will shall inspire and engage Our Helpers Of Africa International volunteers that will serve in our departments and agencies projects globally.

1. Explore creative recruitment methods

Recruitment should feature highly in your thinking and planning when you create a volunteer role.

As with any recruitment campaign, things are incredibly competitive. You'll need to make yours stand out. Get creative on social media, use a variety of striking, visual content, include testimonials, short impactful videos (which needn't be costly) and emotive experiences from existing volunteers to capture imagination and demonstrate the difference they'll be making once they join.

This resource commissioned by Media Trust 'comprehensively and splendidly provides a much-needed step-by-step guide through the opportunities, pitfalls and processes involved in taking volunteers on board.' It's well worth a look.

Be inspired. Take a look at these creative recruitment campaigns with an emotive twist…

2. Provide excellent induction and training

According to Wild Apricot, providers of membership software for small associations, 'good volunteer onboarding inspires a deeper participation and commitment.' In this great article, they've put together four reasons why you need a clear volunteer onboarding process. Extend this to include effective ongoing training, supervision and support.

3. Make them feel welcome

Introduce them to employees and other volunteers to help them feel part of things. Have senior leaders drop by to introduce themselves. Show that you're a warm, friendly and approachable organisation.

4. Establish excellent communication

Strong, regular communication motivates volunteers and a lack of it is one of the main reasons they become disillusioned. Ensure they're receiving relevant, tailored information, rather than regurgitating organisation-wide messages that aren't applicable. Deliver those comms using suitable channels that they've confirmed they're happy to use. Be ready to listen and respond to feedback and concerns, particularly when the organisation is experiencing change or the role itself changes.

5. Ensure they have access to the resources they need

The nature of the role is likely to mean that volunteers won't always be working conventional hours or in an office environment with easy access to resources. Make sure they can get hold of the information they need, when they need it – a volunteer's portal or printed materials if necessary, just be sure to make access easy.

6. Introduce variety

Keep things interesting. Consider your volunteers as extra staff who are capable of performing complex tasks that use their experience and skills. Provide leadership opportunities to those who want to shoulder responsibility and guide others. Help them connect with people they may not otherwise interact with. Understand their skills and background – they maybe able to do more than you're currently offering them.

7. Provide a named line manager

The line manager is the key to engagement, motivation and trust because human relationships and interaction matter. Make sure everyone knows who handles their ongoing support, guidance and direction and give them someone specific to talk to and share successes or concerns with.

8. Encourage managers to practice influencing skills

This piece from the NCVO talks about what managers can do to use their powers of influence such as sharing the organisation's strategic vision for volunteering, using a variety of influencing strategies to help you clarify changes you want to bring about and influencing others within the organisation when it comes to valuing your volunteers.

9. Acknowledge contributions

Gratitude is a strong emotion. It can change a person's outlook on just about any situation. Maintain morale by showing gratitude and demonstrating it openly. Don't overlook the power TNTs (Tiny Noticeable Things), those small, simple gestures like taking them to lunch, giving a small gift, or sending a thank you card to their home.

10. Help them to develop new skills

Anyone who is willing to volunteer is likely to have a healthy curiosity and willingness to try new things. Indeed, many volunteers get involved just so they can develop new skills around those topics and issues they feel passionate about. Often simply transitioning from the private sector to the voluntary sector requires a new skill-set and volunteers will welcome the opportunity to learn how to work effectively in a different environment.

11. Encourage social connectedness through platforms

Keep in mind that many people volunteer because of the social interaction so provide opportunities, both digitally and in person with colleagues, service users and visitors. Help people to feel connected and part of something bigger. Your staff and your volunteers are likely to be the best informed advocates of your brand and, given the opportunity, have great things to say. It's a win-win situation!

12. Share success stories and Joint bonding activities

Volunteers want to know that they are making a difference. Let them see their work in action through tours and presentations and by inviting them to provide suggestions about how that work can be done even better. Share those stories smartly and creatively with the wider public to spread the word even further and instil pride in your people.

Value your volunteers. Reward their dedication

"What is the essence of life? To serve others and to do good."

Spoken by Greek philosopher Aristotle over 2300 years ago, one of the most ancient quotes about volunteering offers proof that giving back to the community is hardly a new concept. With so many people less fortunate than those of us who can afford to travel, and with funding for social services being brutally slashed, volunteering is becoming increasingly important these days.

From immigrants escaping violent conflict and under-privileged kids needing education to homeless people in need of housing, there are no shortage of ways volunteers can help make a difference. The greatest thing about volunteering may be the benefits it offers to individual recipients, their communities, and the volunteers themselves.

We here at Discover Corps founded our company on the principles of striving to make the world a better place. We hope the following 50 quotes about volunteering will inspire you to give back by donating your time, energy, and resources to the causes you're most passionate about…

1) "Service to others is the rent you pay for your room here on Earth." — Muhammad Ali
2) "Volunteers don't get paid, not because they're worthless, but because they're priceless." – Sherry Anderson
3) "Remember that the happiest people are not those getting more, but those giving more." — H. Jackson Brown Jr.
4) "The best way to find yourself is to lose yourself in the service of others." — Mahatma Gandhi
5) "The smallest act of kindness is worth more than the grandest intention." – Oscar Wilde

14) "The meaning of life is to find your gift. The purpose of life is to give it away." — William Shakespeare
15) "The unselfish effort to bring cheer to others will be the beginning of a happier life for ourselves." — Helen Keller
16) "Volunteers do not necessarily have the time; they just have the heart." – Elizabeth Andrew
17) "No one is more cherished in this world than someone who lightens the burden of another." – Author Unknown
18) "The only people with whom you should try to get even are those who have helped you." – John E. Southard
19) "It's easy to make a buck. It's a lot tougher to make a difference. " – Tom Brokaw
20) "Act as if what you do makes a difference. It does." – William James
21) "We make a living by what we get, but we make a life by what we give." — Winston Churchill
22) "If you become a helper of hearts, springs of wisdom will flow from your heart." – Rumi
23) "Volunteers are love in motion!" – Author Unknown
24) "The broadest, and maybe the most meaningful definition of volunteering: Doing more than you have to because you want to, in a cause you consider good. " – Ivan Scheier

25) "How wonderful it is that nobody need wait a single moment before starting to improve the world." –Anne Frank
26) "Being good is commendable, but only when it is combined with doing good is it useful." – Author Unknown
27) "Help one another. There's no time like the present, and no present like the time." – James Durst

28) "Unless someone like you cares a whole awful lot, nothing is going to get better. It's not." – Dr. Seuss
29) "I am a little pencil in the hand of a writing God who is sending a love letter to the world." – Mother Teresa
30) "While earning your daily bread, be sure you share a slice with those less fortunate." –Quoted in P.S. I Love You, compiled by H. Jackson Brown, Jr.

31) "One can pay back the loan of gold, but one dies forever in debt to those who are kind." – Malayan Proverb
32) "At the end of the day it's not about what you have or even what you've accomplished… it's about who you've lifted up, who you've made better. It's about what you've given back." – Denzel Washington
33) "Even if you just change one life, you've changed the world forever." – Mike Satterfield
34) "You give but little when you give of your possessions. It is when you give of yourself that you truly give." – Kahlil Gibran
35) "I am only one, but I am one. I cannot do everything, but I can do something. And I will not let what I cannot do interfere with what I can do." – Edward Everett Hale
36) "Volunteering is the ultimate exercise in democracy. You vote in elections once a year, but when you volunteer, you vote every day about the kind of community you want to live in." – Author Unknown
37) "Those who bring sunshine to the lives of others cannot keep it from themselves." – James Matthew Barrie
38) "What we have done for ourselves alone dies with us; what we have done for others and the world remains and is immortal." – Albert Pike
39) "It's nice to be important, but it's more important to be nice." – Author Unknown
40) "The work an unknown good man has done is like a vein of water flowing hidden underground, secretly making the ground green." – Thomas Carlyle

41) "Even if it's a little thing, do something for those who have need of a man's help– something for which you get no pay but the privilege of doing it. For, remember, you don't live in a world all your own. Your brothers are here, too." – Albert Schweitzer
42) "I've learned that you shouldn't go through life with a catcher's mitt on both hands. You need to be able to throw something back." – Maya Angelou
43) "Kindness, like a boomerang, always returns." – Author Unknown
44) "Too often we underestimate the power of a touch, a smile, a kind word, a listening ear, an honest compliment, or the smallest act of caring, all of which have the potential to turn a life around." – Leo Buscaglia
45) "The true meaning of life is to plant trees under whose shade you do not expect to sit." –Nelson Henderson
46) "Not only must we be good, but we must also be good for something." – Henry David Thoreau
47) "We cannot live only for ourselves. A thousand fibers connect us with our fellow men." – Herman Melville
48) "If you think you are too small to be effective, you have never been in bed with a mosquito." – Betty Reese
49) "Wherever there is a human being, there is an opportunity for a kindness." – Seneca
50) "Everybody can be great. Because anybody can serve. You don't have to have a college degree to serve. You don't have to make your subject and your verb agree to serve. You don't have to know the second theory of thermodynamics in physics to serve. You only need a heart full of grace. A soul generated by love." – Martin Luther King, Jr. Interested in

"As you grow older, you will discover that you have two hands — one for helping yourself, the other for helping others." — Audrey Hepburn

"The best way to find yourself is to lose yourself in the service of others." – Gandhi

"Volunteering is at the very core of being a human. No one has made it through life without someone else's help." – Heather French Henry

"Volunteerism is the voice of the people put into action. These actions shape and mold the present into a future of which we can all be proud." – Helen Dyer

"Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it's the only thing that ever has." – Margaret Mead

"We make a living by what we get. We make a life by what we give." – Winston Churchill

"Alone we can do so little; together we can do so much." – Helen Keller

"Too often we underestimate the power of a touch, a smile, a kind word, a listening ear, an honest compliment, or the smallest act of caring, all of which have the potential to turn a life around." – Leo Buscaglia

"Everybody can be great. Because anybody can serve. You don't have to have a college degree to serve. You don't have to make your subject and your verb agree to serve. You don't have to know the second theory of thermodynamics in physics to serve. You only need a heart full of grace. A soul generated by love." – Martin Luther King, Jr.
"Life's most persistent and urgent question is, what are you doing for others?" – Martin Luther King, Jr.

"Volunteers do not necessarily have the time; they have the heart." – Elizabeth Andrew

"We cannot live only for ourselves. A thousand fibers connect us with our fellow men." – Herman Melville

"Service to others is the rent you pay for your room here on earth." – Muhammad Ali

"I urge young people to consider public service, whether they do it now by volunteering in their community or prepare for public service as an adult." – John Walters

"Volunteering is an act of heroism on a grand scale. And it matters profoundly. It does more than help people beat the odds; it changes the odds." – William J. Clinton

"Every person can make a difference, and every person should try." – John F. Kennedy

"The quality of your life will be determined by the quality of your contribution. When you work to improve the lives of others, your life improves automatically." – Kurek Ashley

"Volunteers don't get paid, not because they're worthless, but because they're priceless." – Sherry Anderson

"Start where you are. Use what you have. Do what you can." – Arthur Ashe

"Only by giving are you able to receive more than you already have." – Jim Rohn
"You give but little when you give of your possessions. It is when you give of yourself that you truly give." – Kahlil Gibran
"Unless someone like you cares a whole awful lot, nothing is going to get better. It's not." – Dr. Seuss

"Because the people who are crazy enough to think they can change the world are the ones who do." – Steve Jobs
"There is no better exercise for your heart than reaching down and helping to lift someone up." – Bernard Meltzer

"When I started counting my blessings, my whole life turned around." – Willie Nelson

Volunteerism is one of the most selfless acts that we can become involved in. Nonprofits around the world need more volunteers to carry out their missions and make the biggest difference possible. Engage your volunteers and remember to demonstrate that their contributions make a big difference.

"
What we have done for ourselves alone dies with us; what we have done for others and the world remains and is immortal.
Albert Pike
"
How wonderful it is that nobody need wait a single moment before starting to improve the world.
Anne Frank
"
Start where you are. Use what you have. Do what you can.
Arthur Ashe
"
As you grow older, you will discover that you have two hands — one for helping yourself, and the other for helping others.
Audrey Hepburn
"
If you think you are too small to be effective, you have never been in bed with a mosquito.
Betty Reese
"
It is not enough to be compassionate. You must act.
Dalai Lama XIV
"
At the end of the day it's not about what you have or even what you've accomplished. It's about who you've lifted up, who you've made better. It's about what you've given back.
Denzel Washington
"
Even if it's a little thing, do something for those who have need of a man's help something for which you get no pay but the privilege of doing it. For, remember, you don't live in a world all your own. Your brothers are here, too.
Dr. Albert Schweitzer
"
Unless someone like you cares a whole awful lot, nothing is going to get better. It's not.
Dr. Seuss
"
I am only one, but I am one. I cannot do everything, but I can do something. And I will not let what I cannot do interfere with what I can do.
Edward Everett Hale

Volunteers do not necessarily have the time; they just have the heart.
Elizabeth Andrew
“

Volunteers are the only human beings on the face of the earth who reflect this nation’s compassion, unselfish caring, patience, and just plain loving one another.
Erma Bombeck
“

While earning your daily bread, be sure you share a slice with those less fortunate.
H. Jackson Brown
“

Volunteerism is the voice of the people put into action. These actions shape and mold the present into a future of which we can all be proud.
Helen Dyer
“

The unselfish effort to bring cheer to others will be the beginning of a happier life for ourselves.
Helen Keller
“

Alone we can do so little; together we can do so much.
Helen Keller
“

Not only must we be good, but we must also be good for something.
Henry David Thoreau
“

We cannot live only for ourselves. A thousand fibers connect us with our fellow men.
Herman Melville
“

The broadest, and maybe the most meaningful definition of volunteering: Doing more than you have to because you want to, in a cause you consider good.
Ivan Scheier
“

Those who bring sunshine to the lives of others cannot keep it from themselves.
James Matthew Barrie
“

Only by giving are you able to receive more than you already have.
Jim Rohn
“

The only people with whom, you should try to get even are those who have helped you.
John E. Southard
“

Every person can make a difference, and every person should try.
John F. Kennedy

“

You give but little when you give of your possessions. It is when you give of yourself that you truly give.
Kahlil Gibran

“

Too often we underestimate the power of a touch, a smile, a kind word, a listening ear, an honest compliment, or the smallest act of caring, all of which have the potential to turn a life around.
Leo Buscaglia

“

The purpose of life is not to be happy, but to matter, to be productive, to be useful, to have it make some difference that you have lived at all.
Leo Rosten

“

The best way to find yourself is to lose yourself in the service of others.
Mahatma Gandhi

“

One can pay back the loan of gold, but one dies forever in debt to those who are kind.
Malayan Proverb

“

Doing nothing for others is the undoing of ourselves.
Horace Mann
To ease another's heartache is to forget one's own.
“The intelligent way to be selfish is to work for the welfare of others”
— The Dalai Lama
“What is the essence of life? To serve others and to do good.”
— Aristotle
“The meaning of life is to find your gift. The purpose of life is to give it away.”
— William Shakespeare
“The smallest act of kindness is worth more than the grandest intention.”
— Oscar Wilde
“Only a life lived for others is worth living.”
— Albert Einstein
“We make a living by what we get, but we make a life by what we give.”
— Winston Churchill
“The best way to find yourself is to lose yourself in the service of others.”
— Mahatma Gandhi
“Service to others is the rent you pay for your room here on Earth.”
— Muhammad Ali
“Whatever community organization, whether it’s a women’s organization, or fighting for racial justice … you will get satisfaction out of doing something to give back to the community that you never get in any other way.”
— Ruth Bader Ginsburg

"As you grow older, you will discover that you have two hands — one for helping yourself, the other for helping others."
— Audrey Hepburn
"Life's most persistent and urgent question is, What are you doing for others?"
— Martin Luther King, Jr.
"Volunteering is the ultimate exercise in democracy. You vote in elections once a year, but when you volunteer, you vote every day about the kind of community you want to live in."
— Unknown

Volunteers are love in motion!— Unknown

It is easier to find men who will volunteer to die, than to find those who are willing to endure pain with patience. — Julius Caesar

Volunteers do not necessarily have the time; they just have the heart.— Elizabeth Andrew

Here's to all volunteers, those dedicated people who believe in all work and no pay.
— Robert Orben

There are two ways of spreading light – to be the candle or the mirror that reflects it.
— Edith Wharton, Vesalius in Zante

God and angels don't get paid even though theirs is some of the most important work around. Ditto for volunteers.
— Cherishe Archer

How beautiful a day can be When kindness touches it! — George Elliston

Be of service. Whether you make yourself available to a friend or co-worker, or you make time every month to do volunteer work, there is nothing that harvests more of a feeling of empowerment than being of service to someone in need. — Gillian Anderson

The smallest act of kindness is worth more than the grandest intention.
— Oscar Wilde

Volunteers don't get paid, not because they're worthless, but because they're priceless.
— Sherry Anderson

There is a tremendous strength that is growing in the world through... sharing together, praying together, suffering together, and working together. — Mother Teresa

Being good is commendable, but only when it is combined with doing good is it useful.
— Stephen King

Wherever a man turns he can find someone who needs him. — Albert Schweitzer

If you want to lift yourself up, lift up someone else. — Booker T. Washington

Volunteering creates a national character in which the community and the nation
take on a spirit of compassion, comradeship and confidence. — Brian O'Connell

Love cannot remain by itself – it has no meaning. Love has to be put into action, and that action is service.— Mother Teresa

The patriot volunteer, fighting for country and his rights, makes the most reliable soldier on earth.— Stonewall Jackson

Volunteers are paid in six figures... S-M-I-L-E-S. — Gayla LeMaire

Unselfish and noble actions are the most radiant pages in the biography of souls. — David Thomas

Help one another; there's no time like the present and no present like the time.— James Durst

Those who can, do. Those who can do more, volunteer.— Unknown

You may not have saved a lot of money in your life, but if you have saved a lot of heartaches for other folks, you are a pretty rich man. — Seth Parker

We make a living by what we get, but we make a life by what we give.— Winston Churchill

Appreciation is a wonderful thing. It makes what is excellent in others belong to us as well.
— Voltaire

There is no better exercise for your heart than reaching down and helping to lift someone up.— Bernard Meltzer

No act of kindness, no matter how small, is ever wasted.— Aesop

You cannot do a kindness too soon, for you never know how soon it will be too late.
— Ralph Waldo Emerson

- *The unselfish effort to bring cheer to others will be the beginning of a happier life for ourselves. Helen Keller*
- *There are two ways of spreading light – to be the candle or the mirror that reflects it. Edith Wharton*
- *Nobody made a greater mistake than he who did nothing because he could do only a little. Edmund Burke*
- *The best way to find yourself is to lose yourself in the service of others. Mahatma Gandhi*
- *The only way to do great work is to love what you do. Steve Jobs*
- *I am a little pencil in the hand of a writing God who is sending a love letter to the world. Mother Teresa*
- *Volunteers will get you through times of no money better than money will get you through times of no volunteers. Ken Wyman*
- *Never underestimate your ability to make someone else's life better – even if you never know it.*
- *Greg Louganis*
- *Volunteers do not necessarily have the time; they just have the heart. Elizabeth Andrew*
- *From my early school days, I was brought up with the belief that we have a duty to use our talents, to volunteer and to make a contribution. Michael Hintze*
- *When the story of these times gets written, we want it to say that we did all we could, and it was more than anyone could have imagined. Bono*
- *Here's to all volunteers, those dedicated people who believe in all work and no pay. Robert Orben*
- *One of the big myths about philanthropy is that it's all about donating funds for a cause. I like to look at it quite differently. Philanthropy is about 'giving' – not just in monetary terms but also in non-monetary aspects, like time, ideas, or being a volunteer. Donating money is just a small part of philanthropy. Pankaj Patel*

I believe that every human mind feels pleasure in doing good to another. Thomas Jefferson

it is easier to find men who will volunteer to die, than to find those who are willing to endure pain with patience. Julius Caesar

We make a living by what we get, but we make a life by what we give. Winston Churchill

Remember that the happiest people are not those getting more, but those giving more. H. Jackson Brown Jr.

I slept and I dreamed that life is all joy. I woke and I saw that life is all service. I served and I saw that service is joy. Kahlil Gibran

Your life and mine should be valued not by what we take… but by what we give. Edgar Allen

God and angels don't get paid even though theirs is some of the most important work around. Ditto for volunteers. Cherishe Archer

Research has shown that people who volunteer often live longer. Allen Klein

You can easily judge the character of a man by how he treats those who can do nothing for him. James D. Miles

There is no better exercise for your heart than reaching down and helping to lift someone up. Bernard Meltzer

The best way to appreciate our political process is to volunteer for a campaign and support a candidate you believe in. Rob McKenna

A single act of kindness is like a drop of oil on a patch of dry skin—seeping, spreading, and affecting more than the original need. Richelle E. Goodrich

If compassion was the motivating factor behind all of our decisions, would our world not be a completely different place? Sheryl Crow

Volunteers don't get paid, not because they're worthless, but because they're priceless.Sherry Anderson

Volunteers are the only human beings on the face of the earth who reflect this nation's compassion, unselfish caring, patience, and just plain loving one another. Erma Bombeck

Always have a willing hand to help someone, you might be the only one that does. Roy T. Bennett

What is the essence of life? To serve others and to do good. Aristotle

Help one another; there's no time like the present and no present like the time. James Durst

Not being able to do everything is no excuse for not doing everything you can.Ashleigh Brilliant

Whatever community organization, whether it's a women's organization, or fighting for racial justice … you will get satisfaction out of doing something to give back to the community that you never get in any other way. Ruth Bader Ginsburg

Volunteering creates a national character in which the community and the nation take on a spirit of compassion, comradeship and confidence. Brian O'Connell

Volunteering is so pervasive it's invisible. We take for granted all the things that have been pioneered by concerned, active volunteers. Susan J. Ellis

Service to a just cause rewards the worker with more real happiness and satisfaction than any other venture of life. Carrie Chapman Catt

The world is hugged by the faithful arms of volunteers. Terri Guillemets

You may not have saved a lot of money in your life, but if you have saved a lot of heartaches for other folks, you are a pretty rich man. Seth Parker

How beautiful a day can be When kindness touches it! George Elliston

Being good is commendable, but only when it is combined with doing good is it useful. Stephen King

As you grow older, you will discover that you have two hands — one for helping yourself, the other for helping others. Audrey Hepburn

It's easy to make a buck. It's a lot tougher to make a difference. Tom Brokaw

To ease another's heartache is to forget one's own. Abraham Lincoln

Volunteers are paid in six figures… S-M-I-L-E-S. Gayla LeMaire

Our generation has the ability and the responsibility to make our ever-more connected world a more hopeful, stable and peaceful place. Natalie Portman
Doing nothing for others is the undoing of ourselves. Horace Mann

Our soldiers, sailors, airmen, Marines and Coast Guardsmen volunteer to protect and defend this country and all its citizens, and do so with honor, integrity and excellence. Our nation continually asks them to do more and more, with less and less. Allen West

The most truly generous persons are those who give silently without hope of praise or reward. Carol Ryrie Brink

Do what you can to show you care about other people, and you will make our world a better place. Rosalynn Carter

Can I see another's woe, And not be in sorrow too? Can I see another's grief, And not seek for kind relief? William Blake

Go into the world and do well. But more importantly, go into the world and do good. Minor Myers

Go out into the world and do good until there is too much good in the world. Larry H. Miller

There's always room to volunteer. I think that's a huge space to be involved with. Halima Aden

The greatest poverty that can afflict the human spirit is the loss of a generous heart. You will know that success has slipped away when your passion for helping others grows cold. Bill Lane Doulos

Each year, I pick something new to learn. One year, it was learning how to knit, and I got 'The Sweethearts' Knitting Club' out of the experience. Another year, it was to volunteer at the local domestic abuse shelter, and I ended up volunteering there for three years. Lori Wilde

Volunteers are the only human beings on the face of the earth who reflect this nation's compassion, unselfish caring, patience, and just plain loving one another. Erma Brombeck

No act of kindness, no matter how small, is ever wasted. Aesop

If our hopes of building a better and safer world are to become more than wishful thinking, we will need the engagement of volunteers more than ever. Kofi Annan

If every American donated five hours a week, it would equal the labor of twenty million full-time volunteers. Whoopi Goldberg

Only a life lived for others is worth living. Albert Einstein

Do every act of your life as if it were your last. Marcus Aurelius

Unselfish and noble actions are the most radiant pages in the biography of souls. David Thomas

The patriot volunteer, fighting for country and his rights, makes the most reliable soldier on earth. Stonewall Jackson

You must work – we must all work to make the world worthy of its children. Pablo Casals

Be of service. Whether you make yourself available to a friend or co-worker, or you make time every month to do volunteer work, there is nothing that harvests more of a feeling of empowerment than being of service to someone in need. Gillian Anderson

The best way to help people prevent hunger is in self help programs. Wallace Campbell

We have to do what we can to help wherever and whenever it is possible for us to help.Jackie Chan

In about the same degree as you are helpful, you will be happy.-- Karl Reiland
Everybody can be great. Because anybody can serve. You don't have to have a college degree to serve. You don't have to make your subject and your verb agree to serve...You don't have to know the secod theory of thermodynamics in physics to serve. You only need a heart full of grace. A soul generated by love. -- Martin Luther King

The greatest poverty that can afflict the human spirit is the loss of a generous heart. You will know that success has slipped away when your passion for helping others grows cold. -- Bill Lane Doulos

In proportion as one renders service he becomes great. -- Booker T. Washington

I feel the greatest reward for doing is the opportunity to do more. -- Jonas Salk

Go out and do something for somebody. Go out and give something to somebody. It will take you away from yourself and make you happy.-- Joseph Jefferson

Happiness is thinking of myself; joy is thinking of others.

Our good works are like stones cast into the pool of time; though the stones themselves may disappear, their ripples extend to eternity. Submitted by Heidi

You must give some time to your fellow man. Even if it's a little thing, do something for which you get not pay but the privilege of doing it. -- Albert Schweitzer

Nobody made a greater mistake than he who did nothing because he could do only a little. -- Edmond Burke

Do all the good you can, by all the means you can, in all the ways you can, in all the places you can, at all the times you can, to all the people you can, as long as you ever can. -- John Wesley

Not being able to do everything is no excuse for not doing everything you can. -- Ashleigh Brilliant

I slept and I dreamed that life is all joy, I woke and I saw that life is all service. I served and I saw that service is joy.
-- Rabindranath Tagore
Refusing to ask for help when you need it is refusing someone the chance to be helpful- Submitted by Lorena Poppe,

I am only one, but still I am one; I cannot do everything, but still I can do something; and because I cannot do everything I will not refuse to do the something that I can do. -- Edward Hale

First, there's the job-where the goal is simply to earn a living and support your family. Then there's the career--where you trace your progress through various appointments and achievements. Finally, there's the calling-- the ideal blend of activity and character that makes work inseparable from life. -- Robert Bella

If you ever need a helping hand, it is at the end of your arm. As you get older you must remember you have a second hand. The first one is to help yourself. The second hand is to help others. -- Audrey Hepburn
It is not enough to merely exist. It's not enough to say, 'I'm earning enough to live and support my family. I do my work well. I'm a good parent.' That's all very well. But you must do something more. Seek always to do some good, somewhere. Every person has to seek in his own way to make his own self more noble and to realize his own true worth. You must give some time to your fellow man. Even if it's a little thing, do something for those who have need of a man's help, something for which you get no pay but the privilege of doing it. For, remember, you don't live in a world all your own. Your brothers are here too. -- Albert Schweitzer Nobel Peace Prize winner, 1952

Great opportunities to help others seldom come, but small ones surround us every day.-- Sally Koch

I have the audacity to believe that people everywhere can have three meals a day for their bodies, education and culture for their minds, and dignity, equality and freedom for their spirits. I believe that what self-centered people have torn down, other-centered people can build up. -- Martin Luther King
Past the beggar and the suffering walks he who asks, 'Why, oh God, do you not do something for these people?' To which God replied, 'I did do something, I made you.' -- Sufi saying

A man never stands as tall as when he kneels to help a child.-- Knights of Pythogoras

Noble deeds and hot baths are the best cures for depression. -- Dodie Smith

The best way to find yourself, is to lose yourself in the service of others. -- Ghandi

One of the things I keep learning is that the secret of being happy is doing things for other people. -- Dick Gregory

We are all like one-winged angels. It is only when we help each other that we can fly.-- Luciano de Crescenzo

Life is never so busy that there is no time to serve.- Submitted by Sharon Tan

I don't know what your destiny will be, but one thing I do know: The only ones among you who will be really happy are those who have sought and found how to serve. -- Albert Schweitzer

He who does nothing for others does nothing for himself -- Goethe

Put yourself in someone's shoes" is a common phrase. But it is not a common thing that we do everyday. We are, most of the time, self-centred. Especially in this modern, fast-paced life. It is only when we stop for a moment and give our time to others, that we realise the true meaning of empathy. Submitted by Abdul Manan Bin Hassan, ASP, PRIS DEPT, Changi, Singapore

Be ashamed to die until you have won some victory for humanity. -- Horace Mann

You have not lived until you have done something for someone who can never repay you.- Submitted by Lisa Clegg, Coordinator, M.O.V.R.C. Foster Grandparents Program

Better one friend with a dish of food than a hundred with a sigh.-- Yiddish Proverb Submitted by Mike Corbin, Membership Chair, Metropolitan Detroit Volunteer Administration Network

It is one of the beautiful compensations of life, that no man can sincerely help another without helping himself.
-- Ralph Waldo Emerson Submitted by Dominica Larkin, Volunteer Coordinator, The Duke of Edinburgh's Award, Canada
No person was ever honored for what he received. Honor is given by what he gave.
-- Calvin Coolidge Submitted by Joe Hammontree,
To serve, not to be served.
-- The charge to service for AARP members from Dr. Ethel Percy Andrus, AARP founder Submitted by Carolyn Hunter, ASD, AARP Utah, USA
Success in life has nothing to do with what you gain in life or accomplish for yourself. It's what you do for others.
-- Danny Thomas Submitted by Jack Gomez, Girl Scounts of Shagbark Council, Illinois
Someone asked the anthropologist Margaret Mead (1901-1978), "What is the first sign you look for, to tell you of an ancient civilization?" The interviewer had in mind a tool or article of clothing. Ms. Mead surprised him by answering, a "healed femur". When someone breaks a femur, they can't survive to hunt, fish or escape enemies unless they have help from someone else. Thus, a healed femur indicates that someone else helped that person, rather than abandoning them and saving themselves. Isn't that what we in philanthropy are all about? Healing femurs of one sort or another?

In order to motivate others, you must first become a source of motivation by yourself. It simply means that if you want to get anything done through others, you must first do it yourself.
-- Hazrat Ilyas Attar Qadri Submitted by Muhammad Umer Attari
I always wondered why somebody didn't do something about that. Then I realized I was somebody.
-- Lily Tomlin Submitted by Joyce Flaugher
[I am a co-creator], an active agent in this universe who makes things happen. If I want the world to change, I have to change it.-- Danah Zohar Submitted by Renee Harms

It wasn't the reward that mattered or the recognition you might harvest. It was your depth of commitment, your quality of service, the product of your devotion -- these were the things that counted in life. When you gave purely, the honor in giving, and that was honor enough.
-- Captain Scott O'Grady Submitted by Kristyna
"Service to others is the rent you pay for your room here on Earth."
-- Muhammad Ali Submitted by David Edwards
If you're watching to learn....Watch!
If you're watching for a break....Speak up!
If you're watching for me to stop....Leave!
If you're here to help....Grab a shovel!
-- Original Composition Submitted by Suzanne Carroll
In doing your best serving others for free, a lot of eyebrows will raise and sneers will curve many a-faces. But in the end those incredulous to what you put up with to help, no longer matter. It's not between you and those snobs, but with whom you have given your hand to lift, and of course to God who is watching and noting it in your book.
-- Inspired by Mother Theresa Submitted by Ding Franco
I don't know what your destiny will be, but one thing I know: the only ones among you who will be really happy are those who have sought and found how to serve.
-- Albert Schweitzer Submitted by Susie Kapelovitz
Doing what is good.
1. Titus 3:14 Our people must learn to devote themselves to doing what is good, in order to provide for urgent needs and not live unproductive lives.
2. Galatians 6:9 And let us not grow weary of doing good, for in due season we will reap, if we do not give up.
3. Galatians 6:10 So then, as we have opportunity, let us do good to everyone, and especially to those who are of the household of faith.
4. 2 Thessalonians 3:13 And as for you, brothers and sisters, never tire of doing what is good.

Helping
5. 1 Peter 4:10-11 God has given each of you a gift from his great variety of spiritual gifts. Use them well to serve one another. Do you have the gift of speaking? Then speak as though God himself were speaking through you. Do you have the gift of helping others? Do it with all the strength and energy that God supplies. Then everything you do will bring glory to God through Jesus Christ. All glory and power to him forever and ever! Amen.
6. Romans 15:2 We should help others do what is right and build them up in the Lord.
7. Acts 20:35 And I have been a constant example of how you can help those in need by working hard. You should remember the words of the Lord Jesus: 'It is more blessed to give than to receive.'"

Let your light shine
8. Matthew 5:16 In the same way, let your light shine before others, so that they may see your good works and give glory to your Father who is in heaven.

Workers of God
9. Ephesians 2:10 For we are God's masterpiece. He has created us anew in Christ Jesus, so we can do the good things he planned for us long ago.
10. 1 Corinthians 3:9 For we are God's fellow workers. You are God's field, God's building.
11. 2 Corinthians 6:1 As God's co-workers we urge you not to receive God's grace in vain.

Others
12. Philippians 2:3 Let nothing be done through strife or vainglory; but in lowliness of mind let each esteem other better than themselves.
13. Philippians 2:4 Don't be concerned only about your own interests, but also be concerned about the interests of others.
14. Corinthians 10:24 No one should seek their own good, but the good of others.
15. 1 Corinthians 10:33 even as I try to please everyone in every way. For I am not seeking my own good but the good of many, so that they may be saved.

Generosity
16. Romans 12:13 Share with the Lord's people who are in need. Practice hospitality.
17. Proverbs 11:25 The generous will prosper; those who refresh others will themselves be refreshed.
18. 1 Timothy 6:18 Command them to do good, to be rich in good deeds, and to be generous and willing to share.
19. Proverbs 21:26 All day long he craves and craves, but the righteous gives and does not hold back.
20. Hebrews 13:16 Do not neglect to do good and to share what you have, for such sacrifices are pleasing to God

Reminder
21. Romans 2:8 But for those who are self-seeking and who reject the truth and follow evil, there will be wrath and anger.

Love
22. Romans 12:10 Be kindly affectioned one to another with brotherly love; in honour preferring one another;
23. John 13:34-35 A new commandment I give to you, that you love one another: just as I have loved you, you also are to love one another. By this all people will know that you are my disciples, if you have love for one another."
24. 1 Peter 3:8 Finally, all of you should be of one mind. Sympathize with each other. Love each other as brothers and sisters. Be tenderhearted, and keep a humble attitude.

As you serve others you're serving Christ
25. Matthew 25:32-40 Before him will be gathered all the nations, and he will separate people one from another as a shepherd separates the sheep from the goats. And he will place the sheep on his right, but the goats on the left. Then the King will say to those on his right, 'Come, you who are blessed by my Father, inherit the kingdom prepared for you from the foundation of the world. For I was hungry and you gave me food, I was thirsty and you gave me drink, I was a stranger and you welcomed me, I was naked and you clothed me, I was sick and you visited me, I was in prison and you came to me. Then the righteous will answer him, saying, 'Lord, when did we see you hungry and feed you, or thirsty and give you drink? And when did we see you a stranger and welcome you, or naked and clothe you? And when did we see you sick or in prison and visit you? And the King will answer them, 'Truly, I say to you, as you did it to one of the least of these my brothers, you did it to me.'
MOTHER THERESAS

Be faithful in small things because it is in them that your strength lies.
Spread love everywhere you go. Let no one ever come to you without leaving happier.
We ourselves feel that what we are doing is just a drop in the ocean. But the ocean would be less because of that missing drop.
Intense love does not measure, it just gives.
Not all of us can do great things. But we can do small things with great love.
Kind words can be short and easy to speak, but their echoes are truly endless.
The hunger for love is much more difficult to remove than the hunger for bread."

If you can't feed a hundred people, then feed just one.
Yesterday is gone. Tomorrow has not yet come. We have only today. Let us begin.

I have found the paradox, that if you love until it hurts, there can be no more hurt, only more love.
We shall never know all the good that a simple smile can do.
Love cannot remain by itself – it has no meaning. Love has to be put into action, and that action is service.
The most terrible poverty is loneliness, and the feeling of being unloved.
If you judge people, you have no time to love them.
What can you do to promote world peace? Go home and love your family.
I alone cannot change the world, but I can cast a stone across the waters to create many ripples.
I want you to be concerned about your next-door neighbor. Do you know your next-door neighbor?
I am not sure exactly what heaven will be like, but I know that when we die and it comes time for God to judge us, he will not ask, 'How many good things have you done in your life?' rather he will ask, 'How much love did you put into what you did?
God doesn't require us to succeed, he only requires that you try.
If we have no peace, it is because we have forgotten that we belong to each other.
It's not how much we give but how much love we put into giving.
Joy is a net of love in which you can catch souls.
Never travel faster than your guardian angel can fly.
Let us always meet each other with smile, for the smile is the beginning of love.
If you are humble nothing will touch you, neither praise nor disgrace, because you know what you are.
Do not wait for leaders; do it alone, person to person.
We do not need guns and bombs to bring peace, we need love and compassion.

I am very pleased to be here to present to you our strategic plan on Our Global Disaster response action that shall be supported by Helpers Of Africa International through Kingdom Global Disaster Response Agency. Disaster risk reduction is about protecting human lives. It is about protecting villages and cities, schools and property, businesses and livelihoods. Today and in the future. It is about understanding and respecting the forces of nature it is actually also thinking about future generations. With climatic changes resulting to floods / draughts/ hurricanes / tsunamis / tyhoons, pademics, volcano eruptions, earthquakes, wildfires and many other natural and manmade crisis of wars, crisis, terrorism challenges that bring destruction of human & property are on the rise. It is therefore very timely that Helpers Of Africa InternationalJoins other global players in this agenda to keep humanity, environment safe as we rescue lives and livehoods now and in generations to come. After witnessing many challenges in the world in this spheres we know much more about how to reduce risk successfully today than ten or fifteen years ago. This agenda is now crucial in the economic and political radar of Nations, and it is recognised as being closely linked to development It is clear that our Framework of Action will contribute greatly to a safer world. We know that disaster risk is increasing in the world. Poverty, urbanisation, and climate change – these factors are leaving people and communities ever more exposed and our involvement is crucial thinking and planning for the future which will all have a profound influence on our future. We all know disasters put hard-won development achievements at risk. They reverse economic growth and the progress we have made in eliminating poverty. Sadly, climate change will make things worse. Wet seasons are getting wetter, dry seasons drier. Hurricanes and other extreme events are getting more frequent and intense. And waiting in the wings is the peril of sea level rise. Climate-related disasters now account for the vast majority of all disaster events, and they contribute enormously to economic losses and population displacement.With everything we know, we have a golden opportunity to establish a broad framework where DRR, the new development agenda. We stand ready to continue working together with all States and other stakeholders to establish the strong national and global Framework We all have a shared responsibility to contribute. We see prevention as one of the keys to disaster risk reduction. Climate change and the loss of biodiversity must be halted. The loss of forests, wetlands and coastal areas with mangroves and coral reefs have direct implications for risk – they weaken nature's ability to withstand extreme weather events. We need to strengthen the protection of ecosystems and more clearly see the services they provide. We need to invest more in environmental and climate resilience. We also see a need to see the growing inequality of risk exposure. According to UNDP's latest Human Development Report, 98 per cent of those who are affected by or die from natural disasters live in developing countries. Developed countries are not spared disasters and extreme weather, but as so often, the poor and the vulnerable are hit the hardest. Moreover, we believe that a consistent gender perspective should be applied, when it comes to both the understanding of risk factors and concrete action.

Over the years, disasters some nations Kenya have been handled without a coordinated disaster management policy, legal and institutional frameworks. In addition, disaster response activities have been poorly coordinated, due to lack of Standard operational procedures and Disaster Emergency Operation Plans. This situation remains a challenge that has led to duplication of efforts and wasteful use of resources. It also exposes disaster victims to greater risks and slow recovery. Similarly, in the absence of planned and coordinated action, prevention, preparedness and mitigation have not always been attained. Owing to lack of a coordinated policy framework, to give strategic guidelines on Disaster Management, the existing Institutional framework for Disaster Management is heavily weighted towards emergency response. Therefore, systematic approach to planned Disaster Management is inadequate, for example effective coordination, for management of non-food relief items has been particularly lacking. The preparation of this Policy Paper has benefited from invaluable contribution from experts in various Ministries and organizations and it is hoped that the full implementation of this Policy will contribute immensely to disaster risk reduction, effective disaster preparedness, response, recovery and reconstruction as well as contribute to poverty reduction and sustainable development in the country, particularly among those communities that have been identified as highly vulnerable to disaster risk, loss of life and livelihoods.

The Systematic Approach gives guidelines and principles for effective disaster management and Code of Conduct expected of different stakeholders involved in disaster management in Nationas and globally. It provides for enactment by Parliament for a legislative provision for effective Disaster Management by establishment of an institutional framework that is legally recognized and embedded within the Government structures. Innovative ways of mobilizing resources, managing them and accounting for them properly have also been provided for, together with a rigorous monitoring and evaluation framework not only to monitor the progress in the implementation of this policy, but also to undertake regular disaster risk profiling and monitoring in order to be more prepared for disasters such as, fires, droughts, floods, landslides, HIV/AIDS, human conflicts, drug abuse, traffic accidents, oil spill, industrial accidents and terrorism, among others. Kenya, like many other countries in Africa and elsewhere in the world has experienced an increase in the diversity, intensity and frequency of occurrence of disasters over the past two decades, with many emerging disasters, such as corruption. In many cases these have resulted in an increase in the number of people affected and property damaged leading to rising economic losses. Disaster response reviews have indicated that response costs the government and other stakeholders more than would otherwise be the case if sufficient efforts had been put in place for effective disaster management as shown from the cost of responding to drought, HIV/Aids, fires, civil and political conflicts and floods have the highest occurrence frequency and affect a large number of people and their livelihoods. This notwithstanding the occurrence of other disasters both slow and rapid-onset such as diseases, road, landslides, food poisoning, terrorist attacks have occurred from time to time causing devastating negative impacts on communities.

Disaster Management system can be summarised as follows: These undertake pro-active and responsive disaster-related activities, including Environmental Impact Assessments and Audits, 'search and rescue', first aid services and evacuation, anti-terrorism surveillance, law enforcement and crowd control, peace building, conflict resolution operations and fire fighting, • To assess and identify disaster sub-regions, evolve strategies for the subregions, integrate a national strategic plan, harmonise Disaster Management for all disasters and provides for co-ordination of all Disaster Management-related activities; • To promote continuous stakeholder consultations with relevant line Ministries, to enhance co-ordination of interventions; • To promote partnership with stakeholders for improved action; • To promote and facilitate co-ordination and access to research based information for Disaster Management. • To promote mass education and functional literacy in environment, Disaster Management and Climate Change, in collaboration with the Ministry in charge of formal education; • To promote mass sensitisation and awareness creation on Disaster Management and Climate Change for the general public; • To promote and stress the urgent need for sustainable mainstreaming of Disaster Management and Climate Change into Development Planning and Management, to promote poverty alleviation, on the way to sustainable development; • To encourage promotion, domestication and implementation of Kenya's ratified international, regional and sub-regional Agreements, Conventions and Treaties, which relate to Disaster Management. Despite the lack of a coordinated policy and legal basis, the Government, partner agencies and institutions have largely been effective. This policy now provides for the establishment of effective instruments for coordinated Disaster Management, The humanitarian imperative comes first, Aid is given regardless of the race, creed or nationality of the recipients and without adverse distinction of any kind, Aid priorities are calculated on the basis of need alone, Aid will not be used to further a particular political or religious standpoint, We shall endeavour not to act as instruments of government foreign policy. We shall respect culture and custom. We shall attempt to build disaster response on local capacities. Ways shall be found to involve programme beneficiaries in the management of relief aid. Relief aid must strive to reduce future vulnerabilities to disaster as well as meeting basic needs. We hold ourselves accountable to both those we seek to assist and those from whom we accept resources. In our information, publicity and advertising activities, we shall recognize disaster victims as dignified human beings, not hopeless objects.

Our strong participation is critical in designing and implementing disaster risk reduction programmes. We would like to see this reflected in our expenditure projections declaration in our budgets in the years to come. We believe that the use of targets and indicators that are neither too complicated, nor too many, will be of great help. Designated Focal Points and National Platforms are key, as are the existing mechanisms for evaluation and follow-up, such as the High-Level networking Forum on Sustainable Development and the quadrennial comprehensive policy review for monitoring and follow-up of the new framework. Our Vision is to be a valuable Emergency and Disaster Management player globally and Our Mission is To effectively prepare for and respond to disasters and emergencies, manage recovery and mitigation efforts in world in collaboration with other stakeholders in order to save lives, minimize loss of property and to protect the environment.

Our Agenda, Mandate and Programs / projects priority of investment and funding.

1. We seek to provide funding, leadership, coordination, command, and control, before, during, and after emergences and disasters in the countries and nation while collaborating with stakeholders.
2. Mobilization of resources and foster collaboration and partnership with other agencies on disaster risk management
3. Planning and budgeting
4. Training and capacity development of personnel
5. Facilitating Research on different aspects/trends of disaster management issues
6. Monitoring and Evaluation of DRR, Programs and activities
7. Liaison with line stakeholders on national response efforts on private companies' equipment hiring and compensation
8. Support and fund roundtable discussions stakeholders at the National and global ne government; Federal, State and Local Government, MDAs; Military, Police and Para-military; CSOs; International NGOs; development partners and the private sector on The roundatable discussions generated fresh ideas, observations and recommendations that will give a strong sufficiency criteria in Institutional Capacity, Coordination , Disaster Risk Assesment ,Disaster Risk Reduction, Disaster Prevention, Preparedness and Mitigation, Disaster Response, Disaster Recovery & Facilitators and Enablers
9. Coordinating Strategic plans that cover the horizontal and vertical coordination mechanisms, while Operational defines field level coordination mechanisms addressesing the need for disaster risk assessment and monitoring hazards, vulnerabilities and measuring coping/adaptation capacities to set priorities for risk reduction and effectiveness of stakeholders efforts.
10. Support and fund Disaster Risk Reduction planning and implementation as DRR strategies to inform development-oriented approaches to plans, programmes and projects that reduce disaster risks- Disaster Preparedness, Prevention and Mitigation) deals with strategies to prevent the occurrence of such disasters from having devastating impact on people, infrastructures and the economy; curtail the occurrence of disaster events; and reduce the impact of disasters, if they do occur- (Disaster Response) focuses on the requirements for an integrated, coordinated policy that address rapid and effective response to disasters -(Disaster Recovery) dwells on strategies required for bringing back disaster affected area and victims to normalcy through rehabilitation and reintegration. -(Facilitators and Enablers) provides sufficiency conditions for, integrating roles of emergency management agencies; information management and communication; monitoring and evaluation; education and training; and public - awareness and research. It also covers requisite funding arrangement for disaster management.
11. Fund and offer skills on Disaster Management coordination and integration of all activities necessary to build, sustain and improve the capability to prepare for, protect against, respond to and recover from threatening or actual natural or human-induced disasters in a multijurisdictional, multi-sectoral, multi-disciplinary and multi-resource initiative.
12. Funding and Cordination of stakeholders Federal, State and Local Governments, Civil Society Organisations (CSOs) and the private sector discharge their respective roles and responsibilities and complement each other in achieving shared goals of disaster management involvement of different actors and stakeholders in disaster management requires the existence of a coordination and collaboration mechanism. This National Disaster Management Framework (NDMF) provides this mechanism that serves as a regulatory guideline for effective and efficient disaster management in nations and globally
13. Establish and implement a framework that defines measurable, flexible and adaptable coordinating structures, and aligns key roles and responsibilities of disaster management stakeholders across the nations and globe. It includes specific authorities and best practices for managing disasters, and explains a paradigm shift in disaster management beyond mere response and recovery offering a holistic approach to disaster management serving a legal instrument to address the need for consistency among multiple stakeholders as a coherent, transparent and inclusive policy for disaster management in nations. Our The Framework is focused especially for government officials, private-sector, Civil Society Organisations, emergency management practitioners and community leaders on the need to understand the concepts and operating guidelines for disaster management in the country.

14. Fund and respond to the world exposure to a wide range of natural or human induced disasters. While some of these disasters are rapid, others are slow-onset, resulting in catastrophic situations leading to loss of lives and property, degradation of environment in form of drought, desertification, flooding, epidemics, coastal erosion, dam failure, building collapse, oil spillage, maritime collision or accident, bomb explosion, communal clash, fire, air crashes and boat mishap, epidemics such as cholera/Corona / measles and cerebro-spinal meningitis , pipeline explosions and vandalization in the Niger Delta, and series of road traffic crashes, oil spills and irreparable damage to environmental and coastal biospheres, increasing levels of industrial pollution, waste and unprecedented climatic changes, and its negative consequences make Nigerians to be increasingly at risk to a wide number of new and emerging hazards.
15. Mitigate and reduce The vulnerability of world citizens to hazards is a function of several factors the level of poverty; population growth and distribution; and the condition of human settlements and their infrastructure, the level of environmental degradation, level of public awareness, the dynamics of public policy and environment on disaster management through networking, capacity building and funding.
16. Strengthen global Policies and Strategies; Search and Rescue resource mobilization capabilities; Information, Education and Prevention strategies; Administration, Finance and Logistics systems;
17. Support and fund Relief and Rehabilitation capabilities; Research and Planning provide appropriate budgetary allocation for the operations of the Agency.
18. Support and Fund Establishment of functional disaster management institutions at all levels of governance to prepare for, prevent, mitigate, respond to and recover from disaster in local gorvernments, National , Continental and Global level.
19. Develop capacity of relevant institutions and stakeholders for effective and efficient disaster management backed-up by an enabling law at all levels of government enabling laws shall, amongst other things, specify roles and responsbilities, membership of its Councils, leadership tenure and other incidental or ancillary matters.
20. Motivating Roles of the Federal Government in Disaster Management through empowerment of the National Emergency Management Agency shall by this policy perform the following disaster management functions Formulate policy on all activities relating to disaster management in Nations and globally, Coordinate the activities of other stakeholders in Disaster Management, Co-ordinate plans and programmes for efficient and effective response to disasters in the country, Co-ordinate and promote research activities relating to disaster management in the countries and globally, Monitor the state of preparedness of all organizations and agencies which may contribute to disaster management in countries, Collate data and report from relevant agencies to enhance forecasting, planning and field operations of disaster management; Educate the public on disaster prevention and control measures; Co-ordinate and facilitate the provision of necessary resources for search and rescue and other types of disaster curtailment activities; Co-ordinate and support the activities of non-governmental organizations and development partners engaged in disaster management in the country. Mobilize financial and technical resources from private sector, international nongovernmental organisations and development partners for the purpose of disaster management in countries and globally; Collect emergency relief materials or supplies from local, international and nongovernmental agencies for distribution to the people affected by disaster; Work closely with global players and bodies to assess and monitor where necessary the distribution of relief materials to disaster survivors and Internally Displaced Persons (IDPs), refugees, and those adversely affected by mass deportation and repatriation from any other country as a result of crises, disasters or foreign policies; Assist in the rehabilitation of survivors, IDPs and refugees where necessary, and those adversely affected by mass deportation and repatriation from any other country as a result of crises, disasters or foreign policies; Process relief assistance to such countries that have experienced disaster as may be determined by global updates, Foster strong working relationship with all relevant National and International Agencies including the United Nations institutions for the reduction of disasters. Facilitate the establishment of enabling legislation and monitor the activities of State Emergency Management Agencies (SEMAs) and Local Emergency Management Authority (LEMAs). Perform such other functions which, in the opinion of the Governing Council are required for the purpose of enhancing effective disaster management in Nations and the world.

21. Support Governments in Disaster Management All States in the Federation shall ensure the establishment of a body to be known as State Emergency Management Agency (SEMA) backed up by State Legislation. The legislation, shall include provisions that will ensure that Local Governments in the State also establish authorities with similar functions. The state legislation shall among other things make provisions for the following: (i) Coordinate disaster management activities and respond to disaster events in Local Government area. (ii) Monitor and provide feedback to SEMA on the status of preparedness of all organizations and agencies which may contribute to disaster management within the Local Government Area. (iii) Collect and collate data on disaster and disaster risk areas in their respective Local Governments, and share same with SEMA. (iv) Mobilize support and resources from the State Emergency Management Agency (SEMA) when damages and need assessments are considered beyond the capacity of the Local Government to respond. (v) Establish and develop Disaster Management capacity of community structures.
22. Strengthen and fund Communities in Disaster Management through volunteers- The community structures and (Neighbourhood associations, schools, Community Based Organisations (CBOs), Faith Based Organisations (FBOs), Non Governmental Organisations (NGOs) etc.) shall be established, properly sensitized, mobilized and empowered to actively participate in Disaster Management activities by LEMA, with support from SEMA and NEMA to Ensure commitment and preparedness of community members to disaster management. ii. Sensitize and build the capacity of communities that constitute disaster fronts in preparation for initial response to disaster threats. iii. Mobilize community resources and build community capacity and resilience to prepare for, respond to and mitigate the impact of disasters.
23. Support and Fund Community Strategies for Disaster Management With technical support from National to community structures shall adopt (among other things) the following disaster management strategies: i. Ensure active participation in the preparation and implementation of Disaster Management Plans ii. Create awareness on Disaster Risk Reduction (DRR) and Early Warning Systems (EWS). iii. Train and re- train on Basic First Aid skills. iv. Adapt disaster management strategies to meet local needs and peculiarities. v. Encourage community paticipation in activities that will enhance environmental changes and adaptations.
24. Support and Fund Disaster Response Units (DRUs) in Disaster Management DRUs shall be assigned in designated military formations located across the Countries through Police, Security Agencies and headquarters and Military to be mandated to provide specialized services in humanitarian assistance during disasters as may be requested by the Presidents. :- i. Provision of infrastructural support (communications, technical equipment and manpower) for command and control. ii. Search & Rescue and relief operations at disaster sites. iii. Provision of medical care at the incident site and evacuation of casualties. iv. Render fire fighting services in conjuction with fire service institutions v. Render logistics support for transportation. vi. Setting up and running of relief camps when necessary. vii. Openning of routes and construction/repair of roads and bridges to enable relief teams/materials to reach affected areas. viii. Repair, maintain and run essential services especially at the initial stages of Disaster Occurence. ix. Assist in evacuation of people to safer places before and after the disaster. x. Provide escorts for men, material and security of installations. xi. Assist in the management and handling of International relief, if requested by the civil administration. xii. Provide psychological counselling to the people affected by the disaster. xiii. Provide security for people and property within the area affected by disaster. xiv. Any other activity that will enhance effective disaster management in the country.

25. Mobilization and funding Volunteers in Disaster Management Volunteers in Disaster Management shall be individuals or groups with specialized or basic training in different areas of disaster management. Volunteerism refers to rendering of time, skills, experience or resources for the advancement of disaster management. They shall be established by NEMA, SEMA and LEMA to tap into the huge knowldege and experiences of specialised skills of personnel living or working in the country. Roles of Volunteers in Disaster Management Volunteers in disaster management shall perform the following functions, amongst others:- i. Assist in search and rescue operations in case of disaster. ii. Function as emergency personnel that can render specialised assistance to disaster survivors. iii. Give useful information of places prone to both human-induced and natural disasters. iv. Partake in simulation exercises. v. Help in direct distribution of releif materials in emergency situations. vi. Take part in activities that will lead to disaster risk reduction measures in the community. Volunteers shall perform their duties in an organized manner and under the supervision of and guidance of NEMA, SEMA and LEMA in preparing for, preventing and responding to disasters. They shall be atleast trained in Basic Life Support, disaster preparedness and response, relief, prevention, mitigation, contingency planning, recovery, capacity assessment, water and sanitation.
26. Support and fund Framework for coordinating the different stakeholders involved in disaster management globally. It explains the process of harmonizing or bringing together diverse activities to achieve the goal and objectives of disaster management highlighting the required actions for harmonizing individual and organizational activities to maximize impact and achieve synergy. In partnership with global agencies perform the Coordination process shall be time bound, participatory, impartial and transparent in order to achieve the best possible results and impact. Effective coordination in disaster management shall be multi-sectoral, multi-resource and multi-disciplinary. This shall, amongst other things, reduce gaps in services to affected population; duplication of efforts; inappropriate assistance; inefficient use of resources; bottlenecks; impediments and slow reactions to changing conditions. This Thematic Area shall have the following objectives: i. Develop horizontal and vertical coordination strategies to take care of synergy at the three tiers of Government and among stakeholders. ii. Enhance efficient and effective administration of disaster management activities and operations.
27. Manage short and long term Coordination in Disaster Management- There are two types of disaster management coordination – strategic and operational. Strategic Coordination shall support unity of efforts in implementation, and be concerned with the vertical and horizontal coordination mechanisms of the overall direction of disaster management structures. It shall involve the integration of emergency programs with other activities of government and amongst stakeholders from the community to Federal level. (See Coordination diagram). a) Vertical Coordination: shall define the relationship among National / Regional and community structures. b) Horizontal Coordination: defining the relationship among disaster management stakeholders at different levels of government taking the lead in mobilizing and collaborating with relevant Federal Ministries, Departments and Agencies (MDAs), DRUs, Police, Paramilitary, International and Local Non-governmental organizations, and development partners. At the state level, horizontal coordination refers to SEMA taking the lead in mobilizing and collaborating with relevant State Ministries, Departments and Agencies (MDAs), DRUs, Police, Paramilitary, Civil Society Organizations (CSOs), state branches of International organizations, and development partners. At the Local Government level, horizontal coordination refers to LEMA taking the lead in mobilizing and collaborating with relevant Departments and Authorities (DAs), Police, Paramilitary, Local Non-governmental organizations, and development partners. The different coordination mechanisms (Vertical and Horizontal) shall include the setting of agreed goals, and allocation of tasks and responsibilities according to mandates and capacities. Horizontal and Vertical Coordination in Disaster Management

28. Support and Fund Horizontal and Vertical Coordination of Disaster Management in Nations and Global Operational Coordination: shall involve the procedure for translating disaster management plans to field level operations and activities. Coordinating bodies shall adopt relevant approaches based on the different thematic areas of disaster management (Risk Assessment; Risk Reduction; Preapredness, Prevention and Mitigation; Response; and Recovery). Through the tools of i. Vulnerability and Capacity Analysis (VCA). ii. Emergency Operations Center (EOC). a) Vulnerability and Capacity Analysis (VCA) shall be the methodology for investigation and information gathering on hazards, vulnerability and available coping capacity of communities which shall be depicted spatially with the Vulnerability Risk Assessment Mapping (VRAM). The VCA and VRAM shall enhance stakeholders operational coordination in the following ways: i. Disaster Risk Assesment: It shall help stakeholders to understand the nature and level of risks that vulnerable people face; where these risks come from; who will be worst affected; and what means are available at all levels to reduce the risks. ii. Disaster Risk Reduction: It shall help stakeholders to take informed decision on types of activities required to sensitize and create awareness for building the resilience of the vulnerable communities. iii. Disaster Preparedness, Prevention and Mitigation: It shall provide stakeholders with data for implementing activities and deploying strategies for preparing, preventing and mitigating disasters. iv. Disaster Recovery: It shall provide stakeholders with data required for developing and implementing rehabilitation and reintegration plans and programmes. b) Emergency Operation Centers (EOCs) The EOC shall be the structure that provides justification for the adoption of Incident Command System (ICS) as a management mechanism in operational coordination of disaster response. It shall be established at Global, Continental and National levels to lead disaster reponse (see EOC dia. EOC shall 23 operate at the three levels, namely Strategic (Gold level), Operation (Silver level) and Tactical (Bronze level) and shall have the following structure: i. Head of EOCs: The Director General (NEMA), The Executive Secretary of SEMAs and the Head of LEMAs shall operate at Gold level as head EOCs at the National, State and Local Government levels respectiviely. ii. Watch Directors: Every EOC shall have Watch Directors at Silver level. They shall be appointed from relevant stakeholders and provided with information from the Incident Commander. iii. Incident Commander: The Incident Commander shall head a coordination system that operates at Bronze level. He/She shall be a representative of the Lead Agency in a disaster event and shall be responsible for on-site coordination of Operations, Logistics, Planning, Finance and Administration sectors. Lead Agency hereinafter refers to the institution that has primary role and responsbility for responding or managing specific disaster.
29. The Incident Command System (ICS) The Incident Command System (ICS) shall be the framework for on-site Operations . It shall: i. Integrate a combination of facilities, equipment, personnel, procedures and communications from various organizations operating within the EOC structure. ii. Ensure effective and efficient incident management. 24 Emergency Operations Centre Arrangement Organogram of Incident Command System (ICS) Implementation Strategies and Activities for Effective Coordination in Disaster Management Global, National and Regional shall implement strategies and activities for effective and efficient coordination in disaster management which, shall include: 3.3.1 Establishment of relationship with stakeholders and sharing common understanding on problems and solutions. These shall include: i. Identifying stakeholders that are relevant to disaster management. ii. Appointment of disaster management desk officers in stakeholders' institutions. iii. Organizing regular meetings between and among disaster management stakeholders to share experience and review strategies. iv. Conducting workshops, seminars and training programmes for stakeholders capacity development. v. Conducting regular public awareness, advocacy and education programmes. vi. Conducting VCA to determine hazards, vulnerabilities and community coping capacities vii. Conducting contingency planning and developing Contingency Plans viii. Building scenarios and conducting regular simulation exercises among stakeholders. ix. Identifying and recruiting volunteers at all levels and building their capacity for disaster management. x. publishing periodic reports on hazards, vulnerabilties and disaster management actvities within their areas of jurisdictions. xi. Reviewing plans, programmes and strategies regularly.

30. Support and Fund Establishment of functional lines of communication amongst stakeholders. These shall include: i. developing relationship with relevant media stakeholders. ii. Developing a database (telephone numbers, e-mails and contact addresses, Zoom links) of focal agencies and persons and integrating it into National, State and Local Databanks in National and regional respectively. iii. Developing a database of available equipment that can be used for disaster management. iv. Monitoring and updating information on state of preparedness of stakeholders. v. Developing MOUs and having mutual understanding with stakeholders on their participation and deployment of their equipment during emergencies. vi. Establishing affordable, accessible and secured Emergency Call Centers (ECCs) at all levels of government. vii. Identifying effective communication facilities, including close user group and Nigeria police radio-net for long range communication. viii. Liaison with telecommunication network providers for use of their cell broadcast facilities. ix. Updating database regularly.
31. Guidelines and Documents to be disseminated that includes i. Establishment Act ii. Law of Establishment iii. Bye-Law of Establishment iv. Search and Rescue and Epidemic Evacuation Plan v. Vulnerabilty Capacity Analyses vi. Vulnerability Risk Assessment global Mapping Disaster risk assessment shall be the first step in planning an effective disaster management. It shall serve as a guide in all efforts at federal, state, and local levels for disaster risk reduction, and preparedness, prevention and mitigation. Disaster risk assessment shall examine the likelihood of expected disaster events and their outcomes in vulnerable communities across the country. This shall involve investigating related hazards and conditions of vulnerability that increase the chances of loss. Therefore, disaster risk assessments shall be undertaken to: i. Anticipate and plan for known hazards or disaster to prevent losses and limit endangering impacts ii. Ensure that development initiatives maximize their vulnerability reduction outcomes. Disaster risk shall refer to the likelihood of harm or loss due to the action of natural or human-induced hazards and other threats to vulnerable structures, services, areas, communities and households. Objectives This thematic area shall have the following objectives: i. Establish a uniform approach for assessing, planning and monitoring disaster risks at all levels of Government. ii. Provide the basis for disaster risk reduction; and preparedness, prevention and mitigation interventions undertaken by stakeholders at all levels of government.
32. Support and Fund Disaster Risk Assessment Planning Disaster risk assessment planning shall be conducted by stakeholders at all levels. Relevant stakeholders shall execute systematic disaster risk assessments planning: i. Prior to the implementation of disaster risk reduction, preparedness or recovery programme at all levels of governance. ii. As an integral component of the planning phase for large scale housing, infrastructure or commercial and industrial developments in the country. iii. As an integral component of the planning phase for significant initiatives that affect the natural environment iv. When the social, economic, infrastructural, environmental, climatic or other indicators suggest changing patterns that increase the risk or likelihood of significant disaster impacts. v. To determine priority disaster risks relevant to their functional areas.
33. Support and highlight Stages in Disaster Risk Assessment Planning Disaster risk assessment planning shall include identification and consultation with relevant stakeholders for the:- i. Design of assessment tools, ii. Application of assessment tools for data collection, iii. Analysis and interpretation of findings, and, iv. Documentation of findings. Disaster Risk Assessment Plan Disaster risk assessment plan shall be supported with good Monitoring and Evaluation (M&E) systems to perform the following: i. Effective disaster risk management and risk reduction planning ii. Identifying potential threats that can undermine developments and sustainability,
34. iii. Enhancing the incorporation of appropriate disaster risk reduction measures into development project design and implementation iv. Ensuring sustainable development planning v. Identifying high-risk locations, periods and conditions vi. Activating timely preparedness and response actions.
35. Undertaking Disaster Risk Assessments A disaster risk assessment shall be undertaken at all levels of governance for specific hazards or disaster that: i. are likely to affect more than one state, due to their scale and magnitude ii. are likely to occur in most states and may require federal and other support and intervention due to their recurrent magnitude (high and medium). iii. are of high magnitude and low frequency (for example, desertification, oil spills earthquake, toxic waste, gas flaring, ocean surge, earth tremor, landslide, etc). iv. occur infrequently or seasonally (for example bush fires, flooding) and have the potential to cause severe loss, and require levels of specialized support that might not be available at lower levels of governance. v. affect neighbouring countries and have consequences for nations and the world, such as, unplanned cross-border movements, events that require humanitarian or other relief assistance, etc.

36. Help to highlight Steps in Disaster Risk Assessment - Disaster risk assessment shall fulfil the following processes: i. Identifying and analyzing potential hazards and/or threats ii. Assessing the conditions of vulnerability that increase the chance of loss iii. Identifying elements-at-risk such as, environmental, human, infrastructural, agricultural, industrial, economic and other elements that are exposed to a hazard, and are at risk of loss. iv. Determining the level of risk for different situations and conditions v. Helping to set priorities for action
37. Support Disaster risk assessment shall be deemed reliable when the following questions are satisfactorily answered: i. How frequently can one expect an incident or a disaster to happen? ii. Which area, communities or households are most at risk? iii. What are the likely impacts? iv. What are the vulnerabilities, or environmental, structural and socio-economic risk factors that increase the severity of the threat? v. What capabilities or resources exist to manage the risk? vi. Is the risk becoming more serious? vii. Is the risk undermining development progress in the areas, communities and households it affects? viii. Is the management of the risk a development priority? ix. Does the risk have any cultural implication? x. Are there any other significant risks?
38. Support The stages for assessing disaster risk shall be as follows: Stage 1: Identifying specific disaster risk to be assessed Stage 2: Analysing disaster risk concerned Stage 3: Monitoring disaster risks. Stage 4: Evaluating disaster risk assessed, updating and disseminating information to all stakeholders. Identifying specific disaster risk(s) This shall include: i. Identifying the hazard ii. Describing the hazard (causes, frequency, magnitude, speed of onset, affected area and duration. Analysing the disaster risk(s) This shall include: i. Describing and quantifying vulnerability. ii. Estimating likely losses resulting from the impact of hazard and disaster. iii. Providing relevant hazard, vulnerability and risk maps. iv. Identifying relevant capacities, methods and resources available to manage the risk. Monitoring Disaster Risks All stakeholders shall have monitoring systems in place that are relevant to their specific functional responsibilities. This shall include monitoring of risks to ensure: i. effectiveness of disaster risk reduction initiatives, ii. changing patterns and new developments in risk profiles,
39. Support Evaluating disaster risk assessed, updating and disseminating information to all stakeholders. This shall include: i. Estimating the level of risk associated with a specific threat to determine whether the resulting risk is a priority or not. ii. Prioritization of disaster risks when there are multiple threats to assess. iii. Determining priority high risk people, households, areas, communities and infrastructures. iv. Involving holistic and integrated planning and implementation in focussed disaster risk reduction initiatives. v. Updating and disseminating risk assessment information.
40. Support Disaster Risk Assessment Monitoring Tools The following tools shall be adopted in monitoring disaster risk(s) by all relevant stakeholders:
41. Support Hazard tracking: This shall: i. Monitor the physical phenomena that can trigger disaster events. ii. Provide early warning information on approaching adverse conditions. iii. Track the seasonal build up of hazards and disasters. Vulnerability monitoring: This shall: i. Track the ability of areas, communities, households, critical services and natural environments to resist and withstand external threats. ii. Provide census data and information on changing social vulnerability patterns in high risk communities. iii. Routinely collect information on special surveys. iv. Track local capabilities to absorb recurrent shocks and stresses from disaster. v. Track local capacities to resist and recover from threats.
42. Support Disaster event tracking: This shall: i. Monitor changing patterns in disaster. ii. Monitor frequencies of disaster incidents. iii. Establish Early Warning Systems to avert the impending disaster. Stakeholders Roles and Responsibilities in Disaster Risk Assessment. NEMA, SEMA and LEMA shall, within their jurisdiction: i. identify specialists, including research institutions, the public, and private sector to be involved in Disaster Risk Assessment. ii. define the terms of reference in Disaster Risk Assessment. iii. provide feedback mechanism and define consultation, skills transfer and capacity building processes. iv. collaborate with relevant stakeholders to validate the methods and findings of disaster risk assessments, in their areas of jurisdiction v. shall be validated by the relevant authorities before any implementation processes. vi. certified that field consultations have been carried out to authenticate findings. NEMA, SEMA, LEMA and other stakeholders shall have clear mechanisms for: i. Assessing, consolidating and updating relevant hazard and vulnerability information on disaster risk specific to their functional areas. ii. Partnering with the media to disseminate information to relevant stakeholders and the general public in their domain. iii. Developing and reviewing their Vulnerability Capacity Analyses (VCAs) to determine if risk conditions have changed detrimentally.

43. Guidelines to be disseminated i. Vulnerability Capacity Analysis (VCAs) THEMATIC AREA 4 DISASTER RISK REDUCTION 5.0 Introduction Disaster risk reduction shall involve efforts aimed at minimizing the potential impact of disaster on humans, socio-economic activities and the environment. It shall be the integration of holistic disaster strategies into policy development for solving broad range social, economic and environmental problems. Disaster risk reduction shall: i. integrate disaster management planning as a strategic priority. ii. outline approaches for scoping and developing disaster risk reduction plans, projects and programmes in collaboration with relevant stakeholders. iii. address the integration of disaster risk reduction initiatives into strategic disaster management structures and processes. iv. focus on the implementation and monitoring of disaster management programmes and activities. v. Establish mechanisms that ensure transparency and accountability in the utilization of resources
44. Support measure Objectives- This thematic area shall have the following objectives: i. raising community awareness on natural and human-induced disasters ii. ensuring the commitment of government at all levels including stakeholders to reduce risk to man, community life, social and economic infrastructure and environmental resources iii. increasing community participation in planning, implementation, monitoring and evaluation of disaster risk reduction activities, and strengthening partnerships to broaden disaster risk reduction networks. iv. Building community resilience and improving community capacity to cope with the incidence of disasters peculiar to their environment 36 v. Mainstreaming Disaster Risk Reduction into educational curriculum at all levels. vi. Ensuring effective and workable contingency plan at all levels towards disaster risk reduction in collaboration with relevant stakeholders. vii. Ensuring effective community based early warning systems
45. Support Disaster Risk Reduction Planning- We shall collaborate with other stakeholders to ensure that coherent and relevant disaster risk reduction planning is undertaken at all levels, including the community. This shall ensure that the State and Local Government disaster risk management plans are consistent with the National disaster risk reduction management plan. Disaster risk reduction planning shall: i. involve the participation of all relevant stakeholders, and establish basic institutional arrangements for disaster risk reduction. ii. define appropriate vision and approaches to disaster risk reduction. iii. specify appropriate arrangements for disaster risk reduction and contingency planning. iv. establish a coordinated information, education and communication system for disaster risk reduction. v. identify and establish appropriate initiatives for effective public enlightenment programmes. vi. develop sustainable capacity building initiatives for disaster risk reduction vii. define funding sources
46. Support Disaster Risk Management - facilitating the development of Disaster Risk Management Plan (DMP) in their 4areas of jurisdiction. The emergency management agencies shall collaborate with relevant stakeholders to develop, review and update DMPs in their areas of jurisdiction, Disaster risk managment plan shall: i. make disaster reduction a development priority with strong institutional basis ii. improve identification, assessment, monitoring of disaster risk and early warning iii. use knowledge to build safer and more resilient communities iv. reduce underlying risks v. strengthen preparedness for effective response Principles of Disaster Risk Management plan. Disaster Risk Management plan shall be based on the following principles: i. Establishment of clear goals and targets linked to implementation, monitoring and evaluation criteria to ensure achievements of set objectives. ii. Using researches, disaster risk assessment findings and VCA for focused efforts on risk reduction. iii. Establishment of relevant stakeholders and disciplinary teams to address disaster risk reduction program. iv. Ensuring comprehensive community involvement in disaster risk reduction and climate change adaptation. v. Planning for changing risks conditions and uncertainty due to socio-economic and climate change factors. vi. Ensuring community ownership and sustainability of disaster risk reduction program, plans and activities.

47. The VCA and Contingency plan shall be used as tools for disaster risk management plan. The VCA shall be used as a diagnostic instrument for providing analytical data to support informed decisions on the planning and implementation of risk reduction measures. It shall have the capacity for identifying: i. National Priority Disaster risks ii. State Priority Disaster risks iii. Local Government and community Disaster risks .The development of the disaster risk management plan by communities, LGAs, States and Federal government shall, with the aid of VCA, carry out the following activities: i) build local capacity to efficiently and effectively identify, develop, manage and sustain disaster risk management through the use of appropriate tools and available resources. ii) assess existing and required capability with respect to prevailing and foreseeable hazards iii) provide a forum for the exchange of knowledge and experience in the areas of vulnerability and risk profile development. iv) strengthen local capability in utilization of available resources. v) identify and provide support to States and local governments for the development of vulnerability and risk profile. The contingency plan shall be a tool of disaster risk management that provide detail information on: i. General situation and scenario ii. Strategic objectives of intervention iii. Relevant stakeholders required for intervention, and their roles and responsibilities iv. Priorities and activities of interevention v. Resources needs and capacities relevant to intervention, such as, facilities, personnel, funding and logistics services vi. Feedbacks and future actions in intervention. Mainstreaming Disaster Risk Reduction Disaster risk reduction shall be mainstreamed into developmental efforts at all levels of governance. This shall be integrated, amongst other things.

48. Spatial development planning and other stakeholders, shall ensure the inclusion of spatial planners, Geographic Information System (GIS) experts in all phases of disaster risk reduction plans and programmes. National Development Plan. Disaster risk reduction strategies shall be integrated into governmental medium and long term goals of the National Development Plan. Educational Curriculum Disaster risk reduction strategies shall be incorporated into education curriculum at all levels (Primary, Secondary and Tertiary) to inculcate the required knowledge, attitude, and skills in the youth.

49. Disaster Risk Reduction Mechanism The critical components of effective disaster risk reductions shall be the various regulations, standards, by-laws and other legal enforcement instruments. The Federal, State and Local Governments shall ensure adherence to the legal enforcement instruments, some of which include: i. Land use regulations. ii. Urban planning and development standards. iii. Standard for Environmental Impact Assessments. iv. Building codes. v. Fire codes vi. Enabling Acts/Laws/Bye-Laws of the Legislature on Health and Environmental issues. vii. Relevant International Conventions and Treaties signed by Governments Guidelines to be disseminated i. National Action Plan for Disaster Risk Reduction ii. State Disaster Risk Management Plan iii. Local Government Disaster Risk Management Plan iv. Community Disaster Risk Management Plan v. Vulnerability Capacity Analysis of vi. Relevant regulations, standards, codes and by-laws vii. National Educational curriculum
50. Introduction This thematic area shall describe the principles and measures that will help in planning, implementing, monitoring and evaluating activities and program for disaster prevention, preparedness and mitigation at all levels. It shall rely on disaster risk management plans (DMP), and emphasize the use of international best practices to ensure that effective and appropriate measures are in place to save lives, sustain livelihood and strengthen safety-net. Objectives This thematic area shall have the following objectives: i. Reducing or eliminating the potential impact or damage that could be caused by hazards on health, lives, property, infrastructure, environment and services. ii. Mobilizing relevant stakeholders for effective disaster preparedness, prevention and mitigation activities. iii. Implementing integrated and appropriate measures in harnessing resources towards disaster prevention, preparedness and mitigation. iv. Developing and sustaining national, state, local and community based early warning systems. Disaster Preparedness Disaster preparedness shall involve measures taken in advance to ensure effective response to the impact of disasters; timely and effective early warning; and the evacuation of people and property from threatened locations.

51. Disaster Preparedness shall enable and other relevant stakeholders to: i. develop emergency plans, ii. build capacity at 4all levels and sectors, iii. Educate communities at risk iv. Provide regular monitoring and evaluation v. ensure availability of resources. Disaster Preparedness strategies shall include the following: i. Planning for threats and emergencies, such as, heavy rainfall; flooding; strong winds; bush, market, formal or informal settlements fires; communicable disease outbreaks; conflicts, among others. ii. Forecasting and planning for potential threats. iii. Establishing clear information dissemination processes to alert vulnerable communities of impending threats, such as, potential outbreak of epidemics and pests. iv. Specifying evacuation procedures, routes and sites in advance of expected emergencies: including the evacuation camps, such as schools in areas exposed to flash-floods. v. Disseminating clear communication procedure and protocols in advance for different emergency situations. vi. Updating Contingency plans for specific threats. vii. Conducting inventory of available disaster management equipment/supplies at all levels, such as, fire fighting vehicles, ambulance, recovery vehicles, etc. viii. Creating Geo-referenced terrain database with the satellite imageries and topographical maps for disaster management and risk reduction.
52. Disaster Prevention Disaster Prevention shall involve all actions that provide 'outright avoidance' of the adverse impact of natural and human induced disasters. The Strategies for Disaster Prevention shall include: i. Afforestration and reforestation. ii. Creating enabling environment for the use of alternative fuel or energy to reduce the use of fire wood. iii. Advocacy and sensitization iv. Capacity Building v. Forecasting and planning vi. Enforcement of policies and procedures vii. Coordination and collaboration with relevant stakeholders viii. Monitoring and Evaluation ix. Community participation. Disaster Prevention Activities shall include: i. Ensuring sensitization and awareness creation, through formal and informal media. Formal media shall be print and electronic, while informal media shall include Traditional Rulers, Town Criers, Religious Institutions, e.t.c. ii. Encouraging tree planting, grass seeding and construction of levees, embankment and channelization to prevent flooding iii. Encouraging the use of alternative fuel or energy iv. Encouraging the use of fire resistant materials for construction; v. Discouraging and penalising indiscriminate burning of bushes; vi. Removing inflammable materials around buildings vii. Providing fire extinguishers in public and private buildings. viii. Ensuring regular weather forecast, and disseminating weather information. ix. Encouraging the practice of re-forestation by relevant government agencies. x. Ensuring proper land management, and channelization of rivers and streams. xi. Enforcing safety regulations, codes, legislations and laws. xii. Ensuring construction and maintenance of roads with shoulders. xiii. Ensuring periodic clearing of drainages.
53. xiv. Establishing peace and conflict resolution mechanisms in various communities by the government, private sector and CSOs. Ensuring immunization against targeted diseases. xvi. Ensuring constant disease surveillance by relevant government officials. xvii. Improving sanitation practices in the communities xviii. Enforcing relevant laws and legislations, and ensuring compliance with Environmental Impact Assessment (EIA), building codes, etc.
54. Support Disaster Mitigation Disaster mitigation shall refer to measures for minimizing the destructive and distruptive effects of hazards and reducing its magnitude. They shall be structural and nonstructural measures that limit the adverse impact of natural and human-induced disasters on vulnerable areas, communities and households. These efforts shall target people who are at risk, by reducing their vulnerability to specific hazards and threats. The Strategies for Disaster Mitigation shall include: i. integration of mitigation activities into development programs at all levels, such as, observing speed limit, tree planting, installing effective and functional fire alarms in buildings, etc ii. comprehensive costs and benefits analysis of possible measures iii. short, medium and long term plan to sustain activities iv. national action plan to support and empower vulnerable communities v. promotion of participatory planning and management of activities with vulnerable communities vi. strengthening transportation system vii. strengthening public safety communications system among stakeholders viii. strengthening Emergency Alert Systems at all levels of governance ix. targeting assistance to vulnerable communities x. restoring valuable coastal resources, xi. protecting vital energy infrastructure xii. enhancing public health response xiii. Enforcing Public Health Laws xiv. development of appropriate evacuation plans. xv. strengthening of vertical and horizontal coordination among all stakeholders. 6.4.2 The activities for disaster mitigation shall include: i. conduct orientation and sensitization, such as, dangers of pipeline vandalism, over-grazing, deforestation, desertification, armed brigandage. ii. facilitate and promote implementation of various insurance policies for risk transfer. iii. Build capacity and increase awareness iv. develop public safety communications system v. develop Emergency Alert Systems vi. contingency stockpiling of food, non-food, reproductive health supplies and medical equipment. vii. conduct training and simulation exercises viii. conduct stakeholders meeting 6.6 Tools for Disaster Preparedness, Prevention and Mitigation Some of the major tools for disaster preparedness, prevention and mitigation shall include Early Warning System (EWS), and contingency planning.

55. 6.6.1 Early warning systems shall be designed to alert areas, communities, households and individuals of impending or imminent significant disaster events. It shall enable vulnerable groups to take necessary steps to avoid or reduce the risk and prepare for an effective response.
56. Support Nations to include early warning system shall include: i. increasing Risk Knowledge on EWS ii. enhancing EWS 5Technology iii. improving the transmission mechansm iv. enhancing the capabilities of relevant stakeholders that have responsibility for promoting early action v. promoting community participation, The activities for early warning shall include: i. Developing sustainable Early Warning System at federal, state, local and community levels. ii. Establishing community emergency alerts. iii. Build capacity of stakeholders and vulnerable communities on early action. iv. Establishing monitoring mechanism. v. Conducting air, water and land patrol. vi. Ensuring comprehensive and timely hazard survellaince information flow at all levels vii. Creating community awareness on hazard, vulnerability and risks.
57. Support Nations on Guidelines to be disseminated i. Multi-Disciplinary work plan on Early Warning Systems on Epidemics. ii. Disaster Risk Reduction Action Plan iii. National Drought and Desertification Policy iv. National Flood and Soil Erosion Policy v. National Policy on Health, Safety and Environment (HSE) vi. Other relevant Agencies' plans on Early Warning.
58. Support Nations to Introduce Disaster response shall be the immediate actions that are taken after the occurrence of a disaster. It shall demand persistent and consistent liaison and coordination among a large number of government agencies, response organisations as well as community support resources. It shall be a multi-sectoral, multi-disciplinary and multi-resource responsibility, given the diverse nature of disasters.
59. To support Objectives of Disaster Response This thematic area shall have the following objectives: (i) ensure maximum survival of affected persons. (ii) encourage self help. (iii) ensure preservation of property and the environment. (iv) establish mechanisms for integrated response. (v) bring order to a chaotic situation. (vi) keep the public informed through appropriate systems. (vii) Ensure psychosocial support to affected persons Declaration of a State of Disaster Disaster declaration shall depend on the magnitude of the disaster. NEMA, SEMA and LEMA shall make recommendations to the appropriate organ of government on the declaration of a state of disaster at national, state and local levels respectively.
60. To support Disaster Response Planning National and Regional shall conduct disaster response planning in their areas of jurisdiction. This shall include: i. Identifying relevant stakeholders ii. Defining stakeholders roles and responsibilities iii. Developing agreed mechanism for response coordination iv. Developing shared agreements on stakeholders response activity monitoring and evaluation v. Meeting to harmonise response strategies, lessons learned and challenges encountered vi. Documenting stakeholders experience. Disaster Response Plans NEMA, SEMA and LEMA shall collaborate with relevant stakeholders to develop Disaster Response Plans (DRPs) at federal, state, and local government levels respectively.
61. Empower Nationals for Community Based Response Plan Stakeholders at the Community level shall be the first responders in every disaster situation. The Local Government shall enhance the community's capacity to respond effectively to disasters and encourage stakeholders at the community level to develop community-based response plans. These plans shall among other things include: i. Establishment of community disaster management teams ii. Training requirements iii. Inventory of available Disaster Management Assets in the community, iv. Safe shelters, v. Evacuation plans vi. The disaster management teams (DMTs) shall be trained in response functions by LEMA, with technical support from SEMA and NEMA where necessary. The training components shall include, early warnings dissemination and utilization; search and rescue; first aid; trauma management; reproductive health, shelter restoration and livelihood resuscitation; among others. Simulation exercises shall be conducted at regular intervals.
62. Support and fund Local Government Response plans Local government response plans shall integrate all community response plans within the local government area. LEMA shall collaborate with relevant stakeholders at the local government level to develop local government response plan in line with state and federal response plans. The Local Governemnt shall be responsible for the implementation of the local government response plan. It shall facilitate the implementation of various community response plans within their local government area. The Local Government response plan shall among other things include: i. Establishment of Local Government Emergency Response team ii. Specification of roles and responsibilities of relevant stakeholders iii. Training requirements iv. inventory of available equipment in the Local Government, v. safe shelters, vi. evacuation plans vii. available facilitaties and other resources in the Local Government area

63. Support State Response Plan SEMA shall collaborate with relevant stakeholders at the state level to develop State Response Plan. The State Response Plan shall be developed in line with the National Response Plan and in consideration of various local government response plans within the state. The State Governemnt shall be responsible for the implementation of State Response Plan and ensure the implementation of various Local Government response plans within the state. The State Response Plan shall include: i. Establishment of State Emergency Response teams ii. Specification of roles and responsibilities of relevant stakeholders iii. Inventory of available equipment in the State. iv. Training of state response teams for evacuation, search and rescue, road and debris clearance, health, trauma management , reproductive health, etc. v. Safe shelters, vi. Evacuation plans vii. Available facilitaties and other resources in the state.
64. National Level Response Plan NEMA shall collaborate with relevant stakeholders at the federal level to develop National response plan. The National Response Plan shall be developed in consideration of State response plans in the country. The FGN shall be responsible for the implementation of National response plan and ensure the implementation of various State response plans within the federation. The National Response Plan shall include: i. Establishment of National Disaster Response Plan (NDRP), Search and Rescue/Epdiemic Evacuation Plan (SAREEP), National Infrastructure Resuscitation Contigency Plan, National Nuclear and Radiological Emergency Plan, etc. ii. Periodic Review of existing plans iii. Establishment of federal Emergency Response teams iv. Specification of roles and responsibilities of relevant stakeholders v. Inventory of available equipment in the country. vi. Training of Federal response teams. vii. Safe shelters, viii. Evacuation plans ix. Available facilitaties and other resources in the state
65. Support and Fund Coordination of Response Response coordination shall be the responsibility of NEMA, SEMA and LEMA during disasters in their areas of jurisdiction. If a disaster situation overwhelms the community, LEMA shall assume coordinating responsibility. This precedence in coordinating responsibility shall be applicable to Local and State disaster response. In the event of, or in anticipation of an incident requiring a coordinated federal response, the National Emergency Management Agency shall take full responsibility. NEMA, SEMA and LEMA shall notify relevant Ministries, Departments and Agencies/Authorities (MDAs) of disaster situations and specify levels of participation required. Coordination of response activities shall be conducted through response structures based on assigned roles and responsibilities of relevant stakeholders.
66. Support and Fund Disaster Response Coordination Strategies The following strategies shall be adopted for disaster response coordination during emergencies and disasters: -Gain and Maintain Situational Awareness: This shall include: i. Continuous monitoring of relevant sources of information regarding actual and associated incidents. ii. Providing relevant stakeholders with the right information at the right time. iii. Improving and Integrating National Reporting. iv. Linking Emergency Operations Centres (EOCs) v. Preparing Situation reports related to the incident.
67. Support Activating Capabilities and Deploy Resources This shall include: i. Requesting for additional resources and capabilities. ii. Identifying Needs and pre-positioning resources. iii. Coordinating Response activities through response structures based on assigned roles and responsibilities iv. Managing emergency functions and mobilizing relevant security agencies and other stakeholders relevant to the particular incident. v. Coordinating initial actions through the on-scene incident command.. vi. Coordinating requests for additional support if additional resources are required vii. Identifying and integrating resources and capabilities into the operations. viii. Designating systems and venues for receiving resources for the operations. ix. Continuous assesment of operations by the Incident command
68. Support National Incident Management System (NIMS). NEMA shall develop and implement the Nigeria National Incident Management System, which shall perform the following functions: i. Identifying specific roles and responsibilities for each activity associated with response measures in the operational plans of relevant stakeholders. ii. Providing mechanisms to determine the level of implementation of response measures according to the magnitude of event or disaster, and stakeholders capacity to deal with it. iii. Defining terms of reference and Memorandum of Understanding (MOU) between government agencies involved in response and the private sector, NGOs, traditional leaders, technical experts, communities and volunteers for the purposes of enhancing capacity. iv. Establishing Standard Operating Procedures (SOPs) for coordinating response operations.. v. Ensuring consistency of SOPs with the requirements of relevant legislation, regulations and standards. vi. Defining common terminologies for use by stakeholders responsible for direction, control and coordination of an event at the operational, tactical and strategic levels. vii. Providing data of daily conditions and significant events that require extraordinary measures but do not necessarily justify the declaration of a local state of disaster. viii. Providing mechanism for tracking escalation of incidents and facilitating the reporting of ‘trigger’ indicators. ix. Reviewing SOPs regularly in line with best practices

69. Support and Fund Coordinating Information: There shall be central information centre established at the national, state and local government levels and local respectively. The centre shall coordinate and disseminate information to the public and media. Some of the specific information on response actions to be dessiminated shall include: i. Warning the public and providing emergency public information ii. Evacuation routes iii. Search and rescue operations iv. Safety and security
70. Support and fund Communication In Disaster Response Federal, State and Local governments shall give priority attention to the development of emergency communication systems in the country for the purpose of enhancing emergency communication and information dissemination. Emergency Call Centers (ECC) shall be established across the country, to ensure: i. Timely information to save lives, ii. Minimizing injury, iii. Reduction of level of damage and losses, iv. Prevention of escalation and secondary hazards. Media In Disaster Response NEMA, SEMA and LEMA shall have responsibilities for: i. Establishing protocols for Media liaison, Press releases and Media interviews, ii. Capacity development for media practitioners on disaster reporting, iii. Involving media practitioners in disaster simulation exercises.
71. Support and fund Evacuation In Disaster Response In the event of a disaster, evacuation shall be one of the key response activities that is carried out to save lives. The requirements for evacuation shall be based on the Search and Rescue / Epidemic Evacuation Plan (SAREEP). Where international assistance is required in evacuation, NEMA shall have the sole responsibility to contact international bodies. Relief Measures In Disaster Response NEMA, SEMA and LEMA shall collaborate with relevant stakeholders to carry out relief interventions during emergencies. This shall include: i. Situation and Needs Assessments to determine what happened, why it happened, where it happened, when it happened, what is needed and how best to provide intervention. ii. Administration of first aid treatments to survivors iii. Evacuation iv. Provision of temporary camps and shelters, foods, clothing, bedding materials, medicaments, water and sanitation, etc. Demobilization i. This shall entail orderly, safe and efficient return of mobilized resources that are deployed in disaster response to their original owner, location and status. Demobilization shall begin as soon as response actions are completed to facilitate accountability of the resources Guidelines to be disseminated i. Search and Rescue / Epidemic Evacuation Plan. ii. National Disaster Response Plan iii. National Infrastructure Resuscitation Contingency Plan iv. National Nuclear and Radiological Emergency Plan v. Other relevant Response Plans of stakeholders.
72. Support Introduction Disaster Recovery shall include programmes, activities and interventions conducted to help disaster survivors and affected communities to return to normal life and minimize the risk of future disaster. It shall cover rehabilitation of survivors, reintegration of displaced persons, vulnerable groups, reconstruction of infrastructure and remediation of the environment affected by the disaster. Re-integration shall involve the process of bringing survivors back to the society after any disaster. It shall align people affected by disaster to their new community where they will be accepted and tolerated along with their norms, values, practices and means of livelihood. Disaster reconstruction shall be a multi-dimensional programme requiring strong political will and commitment of government at all levels. It shall also enlist the support of international organisations, development partners and the private sector due to the huge financial implication and logistic burden required for its implementation.
73. Support Disaster Objectives focus and agendas- This thematic area shall have the following objectives: i. Re-establishment of adequate supply of housing to replace that which has been destroyed. ii. Restoration of public infrastructure and social services damaged by the incident. iii. Enhancing community resilience iv. Resuscitating the livelihood of affected community. v. Re-establishing community ties and family bond. vi. Remediation of the environment vii. Stabilisation of emotional and psychological trauma viii. Restoration of the vulnerable groups Disaster Rehabilitation and Reintegration Planning NEMA, SEMA and LEMA shall collaborate with other stakeholders to ensure that coherent and relevant disaster rehabilitation and reintegration planning is undertaken at all levels, including the community.

74. Support global and National Disaster rehabilitation and reintegration planning shall: i. Involve the participation of all relevant stakeholders in rehabilitation and reintegration. ii. Define stakeholders roles and responsibilities in Disaster rehabilitation and reintegration iii. Consultatively define appropriate vision and approaches for rehabilitation and reintegration of displaced persons, families and groups. iv. Establish effective information dissemination system for rehabilitation and reintegration. v. Establish mechanism for community resilience against the hazard, and preventing possible escalation. vi. Evolve implementation strategies relevant to specific rehabilitation and reintegration activities. vii. Develop stakeholders capacity for rehabilitation and reintegration viii. Define funding sources for rehabilitation and reintegration. ix. Develop Monitoring and Evaluation system and defining implementation timeline. Disaster Rehabilitation Plan NEMA, SEMA and LEMA shall be responsible for facilitating the development of Disaster Rehabilitation Plan (DRP) in their areas of jurisdiction, depending on the magnitude of disaster. The emergency management agencies shall collaborate with relevant stakeholders to develop, review and update DRPs in their areas of jurisdiction.
75. Disaster rehabilitation plan shall: i. accord disaster rehabilitation a development priority with strong governmental committment and effective community participation. ii. use knowledge, technology and skills to build safer communities. iii. reducing underlying risks. iv. reorient the communities to imbibe values, attitudes and practices that reduces vulnerability and enhances resilience. v. Ensure periodic monitoring of rehabilitation and reintegration projects. vi. Encourage community based rehabilitation of the vulnerable groups.
76. Disaster Reconstruction The reconstruction of communities, networks and social cohesion shall be very essential in disaster recovery. Disaster reconstruction shall be conducted through collaborative efforts of governments, private sector, and development partners. This shall involve: i. Reconstruction of affected buildings ii. Reconstruction of roads, bridges and culverts iii. Reconstruction of schools and hospitals iv. Restoration of utility infrastructure, such as, electricity, communication,etc. v. Restoration of water and sanitation. vi. Regeneration and recovery of farmlands.
77. Disaster Recovery Actions Depending on the complexity of disaster, recovery actions shall have short and long term stages. (Short Term Recovery:)) This shall be immediate actions that include: i. Providing essential public health and safety services, ii. Restoring interupted utilities, iii. Re-establishing transportation routes, iv. Repairing damaged houses for those displaced by the incident. v. Providing guidance and counselling to the traumatized internally displaced persons/vulnerable groups (Long Term Recovery) This shall include activities and actions that continue for a number of months or years. Long term recovery shall include: i. Redevelopment of damaged areas with basic infrastructural facilities ii. Relocation of the affected community to a new area iii. Reconstruction and/or construction activities and rehabilitation programme with consideration of the vulnerable groups iv. Clean-up and remediation of impacted sites 8.6 Disaster Recovery Coordination NEMA, SEMA and LEMA shall constitute the central coordinating body among the stakeholders depending on the magnitude of the disaster. It shall comprise Ministries, Departments and Agencies/ Authorities, private sector, international organisations, development partners and Civil society organisations NGOs at all levels of governance. Coordinating recovery actions shall include: i. Coordinating assistance programs to help individuals, households, vulnerable groups and communities. ii. Coordinating with other stakeholders to ensure the restoration of critical services such as water, electricity, and healthcare and sourcing for aids and appliances for people living with disabilities. 59 iii. Coordinating mitigation activities to help communities reduce the potential impacts of future disasters in order to rebuild resilient communities.
78. We shall support FACILITATORS AND ENABLERS -Introduction Facilitators and Enablers shall be persons, agencies, insititutions, systems, and practices necessary for effective and efficient integration and coordination in disaster management. The facilitators shall work together and be guided by specific roles, responsibilities and duties. The enablers shall be the systems of funding, educating, communicating and information sharing that sustain disaster management activities at all levels. Facilitators shall evolve a participatory monitoring and evaluation mechanism that guide the entire phase of disaster management process. They shall define the nature, sources and allocation of funding available for disaster management at national, state, and local government levels. Enablers shall be the sources of funding, and the mechanisms for enhancing skills and increasing knowledge of disaster management process at all levels of governance. They shall be the different sources and channels of communication and information dissemination during disaster.

79. Objectives This thematic area shall have the following objectives: i. To identify persons, agencies, insititutions, systems, and practices necessary for integration and coordination in disaster management. ii. To specify the roles and responsibilities of persons, agencies, insititutions, and systems in facilitating efficient and effective disaster management. iii. To develop and improve the capacity of persons, agencies, insititutions, systems, and practices for sustainable disaster management integration and coordination. Integrating and Coordinating Roles of Facilitators in Disaster Management NEMA, SEMA and LEMA shall play important strategic roles in integrating and coordinating relevant stakeholders involved in disaster management plans and activities at all levels of governance. These relevant stakeholders in disaster management shall include: i. Ministries, departments and agencies/authorities, ii. Military, iii. Police, iv. Paramilitary, v. NGOs, CBOs, FBOs, vi. Universities, Research Institutes and Professional Bodies vii. International organisations and development partners, viii. Private sector, and ix. Media. In achieving the integration and coordination roles at the national level, NEMA shall: i. Ensure the establishment of functional SEMA in all the states of the federation. ii. Provide incentives to states that establish functional SEMA with equipment support and capacity building. iii. Facilitate capacity development of relevant stakeholders in integration and coordination of disaster management. iv. Ensure provision of relief assistance to states whose coping capacity is overwhelmed and have evidence of meaningful state government contribution. v. Ensure that relief assistance from the federal government and all international agencies are distributed directly to the beneficiaries in collaboration with SEMA, LEMA and other relevant stakeholders. vi. Facilitate civil-military relations in disaster management. vii. Guide the development of Disaster Management Plans at federal level, and provide techinical assistance to SEMA for the preparation and review of State.
80. Disaster Management Plans. In achieving the integration and coordination roles at the state level, SEMA shall: i. Ensure the establishment of functional LEMA in all the local government areas in the state. ii. Provide incentives to LGAs that establish functional LEMA with equipment support and capacity building. iii. Ensure provision of relief assistance to LGAs whose coping capacity is overwhelmed and have evidence of meaningful LG contribution. iv. Faciliate direct distribution of relief materials from federal and international organisations/bodies in collaboration with NEMA, LEMA and other relevant stakeholders. v. Develop Disaster Management Plans at state level, and provide techinical assistance to LEMA for the preparation and review of local government Disaster Management Plans.
81. We shall support Nations In achieving the integration and coordination roles at the local government level, LEMA shall: i. Ensure the establishment of Community Emergency Response Groups. ii. Develop Local Government Disaster Management Plan consistent with the State Disaster Management Plan. iii. Ensure provision of relief assistance to communities whose coping capacity is overwhelmed. iv. Support Community Emergency Response Groups to develop Community Disaster Management Plans. v. Support Community Emergency Response Groups to establish community disaster volunteer groups.
82. We shall support Nations In achieving the integration and coordination roles of CBOs, NGOs, and FBOs shall: i. Be subjected to coordinating responsibilities of LEMA, SEMA, and NEMA in disaster management at local, state, and national levels respectively. ii. Collaborate and share experiences on disaster management with other stakeholders at all levels of governance. iii. Develop community disaster management plan. iv. Establish community emergency response teams.
83. We shall support In achieving the integration and coordination roles, Development Partners and Donor Agencies shall: i. Collaborate with NEMA, SEMA, and LEMA in disaster management. ii. Provide technical assistance and build disaster management capabilities of local groups and structures.
84. We shall support Nations Enablers in Disaster Management The following systems and mechanism shall sustain disaster management activities at all levels of governance:
85. We shall support nations Information Management and Communication Information management and communication system shall be established for pooling and sharing disaster management information and communication. This system shall include:
86. Support Emergency Communication Center (ECC) Emergency Communication Center (ECC) shall be established at the national, state, and local government levels as a strategic emergency communication and information management system. The ECC shall: 1. Be a call centre equiped to receive and despatch emergency calls from members of the public in distress. 2. Be connected to all telecom operators with a toll free code that is easy to remember by people in distress. 3. Be responsible for processing and management of distress calls at all levels. i. be compatible with emergency communication systems and linked to emergency hotlines, ii. enable communication between essential and emergency services for the purposes of Emergency calls, Incident Management System (IMS) and the management of joint operations. iii. Be operated and managed by NEMA in collaboration with relevant stakeholders iv. Communicate and share information on disaster situations to relevant stakeholders and the general public.

87. Support Emergency Communication Network The Emergency Communication Network shall be established for the purpose of coordinating disaster management and rescue operations. The ECN shall; i. Be a dedicated, independent communication system to be used by emergency response agencies for coordinating disaster management ii. Be a network with national coverage with broadcast capabilities for coordinating disaster management and rescue operations among response agencies and the ECC iii. Be provided with necessary spectrum resources for emergency operation in collaboration with relevant bodies.
88. Support Reporting, Evaluating, and Disseminating Early Warning An integrated system for reporting, evaluating and disseminating early warnings on a 24-hour basis shall be established at national, state and local government levels. The Early Warning System (EWS) shall: i. Be credible and verifiable. ii. Be included in Disaster Response Plans at national, state, local and community levels. iii. Be disseminated through collaborative efforts of NEMA, SEMA, and LEMA with relevant lead agency and vulnerable community. A lead agency shall be the ministry, department, or agency of government that has primary responsibility for gathering information on specific emergency event. While a vulnerable community shall be the group of people and individuals that could be affected by the emergency.
89. Supports Disaster Management Database Disaster management database shall be created at national, state, and local government levels by NEMA, SEMA, and LEMA in collaboration with relevant stakeholders. The database shall: i. Provide information on relevant stakeholders and their capacities. ii. Provide information on available equipment and facilities for disaster management. iii. Provide relevant emergency information into Disaster Management Plans and programmes at all levels. iv. Provide information on causative factors and impact of disaster, risk reduction methodologies, evacuation plan, geo-spatial data, postcode among others.
90. Support Monitoring and Evaluation NEMA, SEMA, and LEMA shall have the responsibility of collaborating and coordinating other stakeholders for monitoring and evaluating the status of disaster management activities in their respective areas of jurisdiction. The Monitoring and Evaluation System shall: i. Monitor the state of preparedness of all stakeholders. ii. Monitor the development of plans, programmes and activities. iii. Evaluate the performance of stakeholders iv. Evaluate the effectiveness of plans, programmes and strategies v. Document and report challenges and lessons learnt for further operations and programme review.
91. Support Education and Training Education and training shall be enabling tools in disaster management. NEMA, SEMA, and LEMA shall adopt proactive measure to educate and create awareness on disaster management in their areas of jurisdiction. This shall include: i. Incorporating disaster management into school curriculum at all levels of education. ii. Integration of disaster management into induction training course for newly employed staff at federal, state, and local government levels. iii. Training and re-training of staff of relevant stakeholders on disaster management. iv. Development of scenarios and conducting simulation exercises. v. collaboration with other public and private sector agencies to conduct trainings and seminars on disaster management. vi. partnering to establish and build capacity of grassroots volunteers and Emergency Management Vanguards (EMVs).
92. Support Disaster Management Research and Forecasting NEMA, SEMA, and LEMA shall collaborate with relevant ministries, departments, and agencies to develop integrated strategies for research and forecasting. This shall encourage a culture of risk avoidance, mitigation and transfer in all government institutions and communities. The research and forecasting strategy shall include: i. Establishment of research and forecasting units in NEMA, SEMA, and LEMA. 67 ii. Conducting Vulnerability and Capacity Analysis (VCA) at all levels of governance. iii. collaborating with relevant research institutions to conduct specialized study on hazards and associated risks. iv. Disseminating research findings to relevant stakeholders and the communities at risk. v. Collaborating with relevant stakeholders to forecast hazards, associated risks and determine vulnerable groups.
93. Support Public Awareness in Disaster Management. NEMA, SEMA, and LEMA shall collaborate with relevant ministries, departments, and agencies to sensitize and increase awareness of the general public on prevailing hazards, associated risks, coping strategies and best pratices in disaster management. The public awareness strategies shall include: i. Use of print and electronic media ii. Use of traditional information dissemination system. iii. Use of Information, Education and Communication (IECs) materials, such as, billboards, posters, handbills, etc.
94. Funding Disaster Management One of the major enablers in disaster management shall be the funding arrangement. The Federal, States and Local Governments shall fund NEMA, SEMA, and LEMA for the purpose of providing effective and efficient coordination and integration in disaster management. Funds shall be allocated to NEMA, SEMA, and LEMA through: i. budgetary allocation by federal, state, and local governments. ii. Allocation of not less than 20% of federal, state, and local governments' share of the ecological fund to NEMA, SEMA, and LEMA respectively. iii. Raising disaster management fund from organized private sector. iv. Assistance from development partners and international organisations v. Assistance from individuals and faith-based organizations three tiers of Government shall ensure that disaster management funds are judiciously utilized in line with the principles of accountability and transparency.

95. Enforcement and Compliance NEMA, SEMA and LEMA shall collaborate with relevant ministries, departments and agencies/authorities to ensure enforcement and compliance with regulations, codes and legislation desireable for national security, building resilience and reducing vulnerabilities to disasters. NEMA shall collaborate with and ensure that stakeholders' disaster management related plans and guidelines are applied within the context of integration and coordination mechanism provided by this National Framework.
96. Support and Fund NATIONAL DISASTER FRAMEWORK UNDERSTANDING THE FRAMEWORK Introduction Disaster Management is the coordination and integration of all activities necessary to build, sustain and improve the capability to prepare for, protect against, respond to and recover from threatening or actual natural or human-induced disasters. It is a multijurisdictional, multi-sectoral, multi-disciplinary and multi-resource initiative. Therefore, it is vital that the Federal, State and Local Governments, Civil Society Organisations (CSOs) and the private sector discharge their respective roles and responsibilities and complement each other in achieving shared goals of disaster management. The involvement of different actors and stakeholders in disaster management requires the existence of a coordination and collaboration mechanism. The National Disaster Management Framework (NDMF) provides this mechanism that serves as a regulatory guideline for effective and efficient disaster management. The framework defines measurable, flexible and adaptable coordinating structures, and aligns key roles and responsibilities of disaster management stakeholders across the nation. It describes specific authorities and best practices for managing disasters, and explains a paradigm shift in disaster management beyond mere response and recovery. The NDMF offers a holistic approach to disaster management. It serves as a legal instrument to address the need for consistency among multiple stakeholders. It is a coherent, transparent and inclusive policy for disaster management. The Framework is written especially for government officials, private-sector, Civil Society Organisations, emergency management practitioners and community leaders on the need to understand the concepts and operating guidelines for disaster management in the country.
97. The State Government through the State Emergency Management Agency (SEMA) shall by this policy perform the following disaster management functions:- i. Formulate policy on all activities relating to disaster management in the state; ii. Co-ordinate plans and programmes for efficient and effective response to disasters in the State; iii. Co-ordinate and promote research activities relating to disaster management in the State; iv. Monitor and provide feedback to NEMA on the state of preparedness of all organizations and agencies which may contribute to disaster management within the State; v. Collate data and report from relevant agencies in the state so as to enhance forecasting, planning and field operations of disaster management, and supply same to NEMA for planning purposes. vi. Educate the public on disaster prevention and control measures within the state; vii. Co-ordinate and facilitate the provision of necessary resources for search and rescue operations and other types of disaster curtailment activities within the state; viii. Mobilize support and resources from the National Emergency Management Agency (NEMA) when damages and need assessments are considered beyond the capacity of the state to respond, ix. Facilitate the enabling legislation for the establishment of Local Emergency Management Authority (LEMA) for all the Local Governments in the state. x. Work closely with LEMA for distribution of relief materials to disaster vicitims; xi. Perform such other functions which, in the opinion of SEMA Governing Council are required for the purpose of enhancing disaster management in the state.
98. We shall seek to solve a hazard originating from technological or industrial conditions, including accidents, dangerous procedures, infrastructure failures or specific human activities, that may cause loss of life, injury, illness or other health impacts, property damage, loss of livelihoods and services, social and economic disruption, or environmental damage. A Disaster: A disaster is a serious disruption of the functioning of a community or society causing widespread human, material, economic or environmental loses which exceed the ability of the affected community/society to cope using its own resources.
99. We seek to deal with Disasters Risk: The potential disaster losses, in lives, health status, livelihoods, assets and services, which could occur to a particular community or a society over some specified future time period. Disaster Risk Management: The systematic process of using administrative directives, organisations, and operational skills and capacities to implement strategies, policies and improved coping capacities in order to lessen the adverse impacts of hazards and the possibility of disaster.
100. Disaster Risk Reduction: he concept and practice of reducing disaster risks through systematic efforts to analyze and manage the causal factors of disasters, including through reduced exposure to hazards, lessened vulnerability of people and property, wise management of land and the environment, and improved preparedness for adverse events. Risk Assessment: A methodology to determine the nature and extent of risk by analyzing potential hazards and evaluating existing conditions of vulnerability that together could potentially harm exposed people, property, services, livelihoods and the environment on which they depend.

101. Climate Change: A change in the state of the climate that can be identified (e.g. by using statistical tests) by changes in the mean and/or the variabilities of its properties and that persist for an extended period, typically decades or longer. Climate Change may be due to natural internal processes or external forcings or to persistent anthropogenic changes in the composition of the atmosphere or land use. Adaptation to Climate Change: The adjustment in natural or human activities in responses to actual or expected climate stimuli or their effects which moderate harm or exploit beneficial opportunities.
102. Vulnerability: The characteristics and circumstances of a community, system or asset that makes it susceptible to the damaging effects of a hazard disaster profile is dominated by droughts, fire, floods, terrorism, technological accidents, diseases and epidemics that disrupt people's livelihoods, destroy the infrastructure, divert planned use of resources, interrupt economic activities and retard development. In the pursuit of reducing vulnerabilities to risks, the Government has formulated this National Policy on Disaster Management to institutionalise mechanisms for addressing disasters. Recent disaster events, the successive Reports of the Inter-governmental Panel Climate Change (IPCC), the recent Climate Change Conference (Nairobi , Nov. 2006), and a recent comprehensive environmental reconnaissance survey over the whole country have all stressed the central role of Climate Change in any sustainable planned and integrated National Strategy for Disaster Management. The policy emphasizes preparedness on the part of the Government, communities and other stakeholders in Disaster Risk Reduction activities. In this regard, the policy aims at the establishment and strengthening of Disaster Management institutions, partnerships, networking and main streaming Disaster Risk Reduction in the development process so as to strengthen the resilience of vulnerable groups to cope with potential disasters.
103. Coordinate Disaster Risk Reduction initiatives within a unified policy framework in a proactive manner at all levels. Disaster Risk Management encompasses a full continuum from preparedness, relief and rehabilitation, mitigation and prevention. The Policy aims to increase and sustain resilience of vulnerable communities to hazards through diversification of their livelihoods and coping mechanisms. This entails a shift from the short term relief responses to development. The Policy will go a long way in preserving life and minimizing suffering by providing sufficient and timely early warning information on potential hazards that may result to disasters. It will also aim at alleviating suffering by providing timely and appropriate response mechanisms for disaster victims.
104. Support The food sub-sector, so far, is the most organised in terms of emergency response. Management of other relief sub-sectors is more difficult to monitor and assess. These difficult sub-sectors include, provision of water, health, nutrition and education, as well as care for livestock and agriculture. The number of activities, actors, and approaches in these latter sub-sectors are many and uncoordinated. Most of the activities are focussed on immediate emergency interventions, such as water trucking and de-stocking, giving little time and adequate emphasis for long-term plans for complete disaster recovery process preventive measures and mitigation.
105. We shall seek to solve problems of Inadequate finances, human resources and equipment The participating institutions charged with handling disasters in the country are faced with inadequate budgetary allocation and conditional donor support; such that the amount of money made available for the Disaster Management is far less than the realistic amount actually needed to manage successfully. In addition, there are other related problems, for example, the turn-around time for proposals to realise money in the non-food sub-sectors is excessive because of inadequate technical handling. Also, procurement procedures remain largely cumbersome. The result of poor funding and reallocation of development funds during times of emergencies has meant that development priorities and Disaster management initiatives are undermined. Disaster occurrences have increased, resulting in available funds being too thinly spread out to be effective. This rising demand for funding has made Government increasingly reliant on development partners to fund Disaster Management initiatives. With the ongoing crisis involving international financial downturn and global recession, this is a precarious funding position to be in. Compounding this problem is the reduction of our key National income earning sources. Non-availability of specialized equipment for use in Disaster Management hampers effective processes in the country. Furthermore, lack of adequately trained human resource in Disaster Management exacerbates the problem. Poor resource management and inadequate coordination of finances, human resources and equipment has also weakened disaster interventions.
106. We seek to solve Inadequate information and data Collection of data, analysis, and storage is not uniformly adequate, although in certain sub-sectors (such as in drought management) data and relevant information is plentiful and available for dissemination and use in Disaster Management. Elsewhere, inadequacy of data and information, leads to poor planning, lack of institutional memory and improvement towards best practices. Similarly, this inadequacy has also resulted in lack of effective monitoring and evaluation of disaster risk trend analysis, and forecasts.

107. We seek to solve Weak disaster management capabilities within communities and institutions The linkages on disaster management capabilities between local communities, on the one hand, and district and national levels, on the other, have remained weak. In addition, the general degradation of traditional African socialism and livelihood systems has resulted in the progressive erosion of the traditional coping strategies. The community has not been sufficiently sensitised on disaster management, especially, in preparedness and coping mechanisms thereby, increasing dependency syndrome and thus increasing vulnerabilities and potential impacts on the victims. More recently, there have been new challenges in the management of disaster cycles, especially in the process of relief, repatriation, rehabilitation and resettlement geared towards recovery of Internally Displaced Persons (IDP).
108. We seek to solve Inadequate integration and co-ordination Government Ministries/Departments, Agencies, NGOs, FBO's and Civil Society Organizations, the Private Sector, International Development Partners and UN Agencies have pursued a wide range of strategies and programmes to prevent and respond to disaster situations. However, these initiatives have been undertaken in a less consistent, less planned and less harmonious manner, virtually always reactive and uncoordinated, and without a coherent policy framework. Therefore, the present Policy initiative reflects the Government's commitment towards formulating a coherent and integrated strategy for addressing disaster issues in a more proactive manner with a focus on reduction of risk to communities and their vulnerabilities. This is so, particularly, with regard to the strengthening of their capabilities in preparedness and resilience to the adverse impact of disasters. The document has been prepared through a broad consultative process.
109. We seek to solve Inadequate Regional and International linkages Disasters often go beyond national borders. However, Governments do not always factor in this aspect in disaster planning and response. This has led to some interventions, particularly of cross border nature to be ineffective. For example, a livestock disease outbreak such as Fevers, may affect more than one country in the sub-region. Without joint planning and response, a vaccination intervention against the disease may remain largely ineffective. The need for national systems to link with other regional and international organizations has not always elicited the recognition of the importance it deserves. In view of the aforementioned weaknesses and challenges, the government considers it of imperative importance to provide a policy and legislative framework through which the above inadequacies and weaknesses can be addressed so that an effective disaster management system can be achieved.
110. We seek to solve the problem of Poor Governance and Lack of Political Will Politics is known to have contributed to disasters in nations and globally. In addition the lack of political will has slowed down the process of putting in place an effective Disaster Management system. This has hindered the formulation and implementation of disaster related policies and legal frameworks.
111. We seek to solve The policy sets out the goal and objectives of the Disaster Management system in Kenya, arrangements for effective management, roles and responsibilities of different Stakeholders at different levels. This policy proposes the establishment of an autonomous management system and it provides an implementation framework and guiding principles for Disaster Management.
112. We shall empower FEATURES OF AN EFFECTIVE DISASTER MANAGEMENT SYSTEM The major features of an effective Disaster Management system in Kenya include the following; • Government shall continue to play the lead role in the strategic planning and management of DRR, as well as the responsive management of the full disaster cycle. In addition, government must play a key role in the participatory partnership between itself and development partners, international agencies, academic and research institutions, CSOs, and other bodies in equivalent efforts of DRR and DM from Government sources and from development partners, Government must play a key role to ensure availability of relevant resources.

113. We shall support resources including, human, financial and others including food and non-food items, which must be stockpiled in readiness for effective and timely response during emergencies. • A Disaster Management policy that shall be in agreement with the ,which stresses the Paradigm Shift to Disaster Risk Reduction (DRR) Approach, including the EWS, preparedness, prevention and mitigation, • A complementary responsive approach for a conventional responsive Disaster Cycle Management, (including EWS, response, relief, rehabilitation, reconstruction down to recovery) to ensure appropriate remedial action where preventive proactive measures have failed; • An operational early warning and Disaster Management information system that triggers rapid and timely response and provides regular Monitoring and Evaluation of base data for Disaster Risk Analysis, Profiling and trend analysis. • Enhancement of disaster-awareness and disaster management capability, by mainstreaming DM education at all levels of institutional structures for education and training. In addition DM shall be mainstreamed among the general public through sensitisation and community-based education, to attain awareness and functional literacy; • Providing effective capability for harmonised and standardised rapid response to disasters, by coordinated collaborative participation of all stakeholders at all levels • A clear provision for differentiation between procedures and mechanisms of response to slow - and rapid onset disasters • Provision for an institutional and legal framework for an autonomous Disaster Management body/agency that promotes information and lesson sharing, joint planning, and decision-making among relevant stakeholders at all levels • Making provisions to stimulate and revitalise the re-emergence of the composite community-based "social resource capital" (socio-economic, cultural, technological and allied resources).

114. These social capital resources include traditional coping strategies of the various civilisations, such as resource sharing in famine time, joint farming among families, restocking after droughts, growing back-up crops for famines, food preservation technologies, grain grants and loans from kinsfolk, farm pledges, sale of labour and small stock; • Making appropriate provisions for effective public sensitisation on DM, with particular respect to paradigm shift following the world–wide adoption of HFA and the DRR for disaster risk management; • Making provisions to ensure mainstreaming care for the visually, physically and mentally challenged, the elderly; the woman and the children; the widows and orphans; the sick; and those in need of psycho-social support, forensic/ health services, and other specialised needs/services during and after disasters; • Making provisions for flexible financial procedures that facilitate appropriate, effective and timely response to disasters; • Making provisions for identification, assessment, evaluation and mapping of disaster-related issues (such as vulnerabilities, disaster phases, strategic plans), harmonisation and co-ordination of the DM systems and activities throughout the linkages and networks at all levels; • Making provision for prevention of corruption, especially, the misuse or the diversion of funds intended for response to disaster or for other phases of Disaster Management, for example in HIV/AIDS, and in rapid-onset emergencies, in particular; • Making provision for a well-structured participation of the society in Disaster Management, particularly, including communities, and incorporating their traditional coping strategies into the Disaster Management systems. • Making provision for appropriate consideration and resolutions of pertinent cross-cutting issues, such as special considerations for women and children, climate change, environment, and problems related to rural-urban migrations/creation of overcrowded sub-urban informal settlements- all these being a serious preparation for megascopic disasters within a few decades; • To critically factor into the systematic DM provisions for the rapid evolution of Climate Change, its potential negative impacts, and the desired proactive, planned mitigation measures; • Making institutional structural provisions for an agency at national, district, divisional/community levels to strengthen bottom-up community participation in all aspects of DM, from monitoring, early warnings to field operations; and for these arrangements to be effective, there is necessity for a continuous two-way flow of information and communication; • Making provision for the continuous and sustainable reception development, processing, storage and management of an effective data base for DM, which incorporates information from diverse linkages and local sources, including the monitoring, analysis, early warning system and research. This process uses a network of sources (vertical and horizontal), especially, the indigenous knowledge resources, traditional technologies and coping strategies from the communities; • All corporate organisations, firms and industries be disaster-risk rated, and, thereafter, be taxed accordingly, as a proactive (preventive, mitigatory measure) as well as in strengthening the financial resource base for response to disasters; • Provision of rapid and effective response to disasters, by co-ordinated, appropriate and collaborative participation by stakeholders at all levels; • Makes provision for an effective institutional collaboration and cooperation for sustainable upgrading of quality of life, environmental management, and Disaster Risk Management, especially by collaborative management.

115. DM Policy and the Environmental Management and Coordination Act (EMCA), through NEMA; • Makes provisions for effective linkages through ratified disaster-related conventions, agreements and treaties, to facilitate adequate proactive and/or responsive DM at all levels- international, regional, subregional, national and sub-national; • Makes provision to promote high compliance with safety regulations against potential risks, hazards and disasters; and promotes compliance with architectural building code and requirements for construction against fire outbreaks, flush-floods, earthquakes, land subsidence, landslides, collapsing buildings, bridges, ports and harbours, and similar structures; • Makes provision for regular or periodic dedicated emergency drills by corporate bodies, firms, businesses, Government departments, the wide range of institutions and industries, (such as, refineries, ports and harbours), in order to improve effectiveness of response capability to disasters.
116. Disaster Management is to be approached comprehensively at the national level and any other prioritization is at community level where specific disasters affect specific communities; With this definition of Disaster Management and list of desirable features of effective Disaster Management the policy will have the following goal and objectives (i) To establish a policy/legal and institutional framework for management of disasters, including promotion of a culture of disaster awareness and for building the capacity for disaster risk reduction, at all levels; (ii) To ensure that institutions and activities for disaster risk management are co-ordinated, focused to foster participatory partnerships between the Government (including mainstreamed and emergency disaster-related activities by sectoral Ministries) and other stakeholders, at all levels, including international, regional, subregional Eastern African, national and sub-national bodies; (iii) To promote linkages between disaster risk management and sustainable development for reduction of vulnerability to hazards and disasters; (iv) To ensure proactive management of National Conflict Resolution and Peace Building efforts, which are enhanced continuously throughout the country, within every conflict disaster cycle; and that their consequences and impacts are systematically addressed, monitored, and evaluated to prevent conflict occurrence/recurrence and hasten effective and sustainable recovery of the victims; (v) To mobilise resources, including establishment of specific funds for disaster risk reduction strategies and programmes in DM; (vi) To make institutional provisions to ensure productive networking and sharing of information; and (vii) To make institutional provisions to ensure appropriate and structured DM, Education training and Capacity Building; complementarily, mainstream DM education and functional literacy in all educational institutions (including Primary, Secondary schools, Post-secondary colleges and universities, the NYS, and training colleges for uniformed forces). (viii) To make available sensitisation, awareness creation and functional literacy to the public for disaster management.' (ix) To provide for standardisation of effective structural components, to facilitate effective creativity, research, and evolution of criteria for identification and sustenance of quality, both in the process of research and in the dissemination and application of the information there from.
117. Directorate of Monitoring, Evaluation, Research and Planning. Policy Elements In line with the above objectives, this Policy will encompass a spectrum of activities of the disaster management cycle. The Policy underscores the need for mainstreaming of disaster risk reduction in development plans and strategies at all levels to enhance capacity of vulnerable communities to withstand the adverse effects of disasters. Disaster Management Policy will therefore, ensure that proactive measures are in place for minimisation of negative effects of disasters.
118. Disaster Prevention Prevention will focus on measures aimed at impeding the occurrence of a disaster, and at minimizing its harmful effects on the community, property and the environment. For example, communities have their own conflict prevention activities embedded within their coping mechanisms, as well as the social exchange systems which provide their disaster management safety nets. The Government will, therefore, seek to enhance disaster prevention and management strategies as a way of providing an enabling environment for the development of socio-economic activities.
119. Disaster Mitigation Mitigation refers to a substantial reduction of the impacts of a disaster in case it goes beyond preventive measures. For example, poverty reduction initiatives and diversification of livelihoods improve the capacity of households and communities to withstand negative impacts of disasters. This demonstrates the strong link between development and disaster management. The Government shall support mitigation measures, and shall commit resources aimed at increasing the capability of the communities concerned, to cope with the disasters most likely to affect them.

120. Disaster Preparedness Disaster preparedness is a package of precautionary measures, taken in advance of an imminent threat to help people and institutions respond to and cope with the effects of a disaster. An example of a disaster preparedness activity is the Early warning system. This is an organised structure for prediction and dissemination of timely and effective information to allow individuals who may be at risk to take action to avoid or reduce their risk and prepare for effective response. The objective of early warning systems is to link the information provision to the response. The process allows a lead-time to access funding, expertise and equipment for the necessary intervention. Strategic food reserves, health and essential supplies such as non- food items remain an important component of disaster preparedness. Another example of disaster preparedness activity is the comprehensive and continuous assessment of vulnerabilities and risks in order to understand threats of a hazard and to improve the targeting of Disaster Management programs. A comprehensive assessment of risks and vulnerabilities will, therefore, assist the targeting of disaster management programmes in nations and Globally.
121. Helpers Of Africa Internationalwill facilitate the establishment of a comprehensive National Early Warning System that will encourage the involvement of all stakeholders. In addition baseline vulnerability analyses will be prepared on a continuous basis to assess the impact of the problem on the affected population. Based on the Early Warning System and the continuous analysis of vulnerabilities, response activities including the active use of strategic stockpiles of food and non-food items, will be undertaken in a manner that ensures that the most vulnerable groups are specifically targeted. On institutional provisions, there is need for careful and selective strengthening,
122. Disaster Response Response involves interventions taken during or immediately after a disaster. Such actions are directed towards saving lives and livelihoods and dealing with the immediate damage caused by disaster. The Government shall ensure appropriate and timely response in the event of disaster occurrence in order to minimize loss of lives and livelihoods.
123. Process to recovery Following response and relief, the full disaster cycle has many phases leading to recovery. Rehabilitation is the restoration of the socio-economic institutions and structures of the affected society/community in readiness for reconstruction i.e. rebuilding of their life support systems and further development. It may be preceded by repatriation, followed by rehabilitation and reconstruction are intertwined with development; providing a bridge between a satisfaction of immediate needs and the implementation of comprehensive vulnerability reduction programmes. At the same time the recovery phase entails programmes designed to help communities to return to normalcy. The insurance industry will play a crucial role in mitigating the impact of disasters on the communities in both rural and urban areas. Insurance firms will be encouraged to develop affordable products that can be made available to the society in order to underwrite some of the disaster–related losses. This policy stresses the need of Government to ensure that affected and displaced persons are given sufficient, relevant and adequate care including adequate permanent resettlement and social protection until their complete recovery.
124. The Policy will put in place mechanisms to ensure that there is reconstruction and recovery after a disaster. Emphasis will also be placed on post-disaster trauma management, counselling services, psycho-social support services, and forensic / health services in order to ensure that disaster victims do not suffer from permanent or prolonged disaster-related effects.

125. We shall support The following guiding principles will be observed in the implementation of disaster management initiatives: • The primacy of coordination, collaboration and communication: Adequate co-ordinating and communication, at all levels, amongst stakeholders, are critical components of disaster management. The government will establish alternative and effective communication systems, especially, where normal communication is likely to be or has been interrupted during disasters. • Lesson learning and knowledge management: there have been considerable implementation Disaster Management initiatives in the country. In view of the experiences gained and lessons learnt during the management of the various hazards and disasters, the Government will promote documentation and sharing of lessons with a view to improving best practices in Disaster Management. • Multidisciplinary and multisectoral approach: Disasters cut across disciplines and sectors; and, so, it is important that government promotes adoption of a multidisciplinary and multisectoral approach. • Increasing partnerships and role of communities in Disaster prevention and Management: Communities and households bear the brunt of disasters and are on the frontline of response through their traditional coping mechanisms. The government will promote strategies for disaster management based on community consultation, experience and participation. Communities will be encouraged to establish mechanisms, building on their traditional coping strategies to enable them to share knowledge and technologies and to pool together local resources for disaster mitigation, preparedness, prevention, response and recovery. This will strengthen Decentralization of Disaster Management and enhance the Bottom Up Approach; • Provision to Consider and Act on Emerging Issues: This policy, shall provide for effective management of emerging issues, such as drug abuse, food poisoning, child abuse, the displaced and homeless, street families, girl-child molestation and defilement, rape-plus-infection cases and illegal militia groups; • Factoring of climate into disaster risk reduction: More than 70 percent of natural disasters in nations are related to extreme climate events that are key causal factors for some emergencies that lead to disasters. The optimum factoring of climate/weather information (such as Early Warning) in disaster management is a vital component of this Policy. In particular, Climate Change must be mainstreamed not only into Disaster Management, but also in overall Development Planning and Management. • Research and dissemination of information: Research and information dissemination are critical components of effective disaster management. Therefore, all stakeholders in disaster management have the responsibility of collecting, collating, documenting and disseminating their activities and experiences on disasters to other stakeholders.
126. We shall seek The State for Special Programmes (which is currently in-charge of disaster management in the country) will be a focal point for coordination and dissemination of research findings on disasters to stakeholders. The structure of this Ministry is designed to ensure that research is a key process for practical applications (within the department of Climate Change), and in association with strategic planning for overall Disaster Management. • Regional and International perspectives: Some hazards such as drought, epidemics, conflicts and proliferation of small arms are not confined within national borders.
127. Making provision(s) to mainstream systematic management of crosscutting issues in DM: such as Climate Change, environment, political conflicts care for the various categories of the challenged and elderly, psycho-social support and counselling services, forensic/ health services. • Strengthening of Capacities for Disaster Management: many countries have developed capacity for disaster management in stages. In view of the dynamic nature of disasters, the government and other stakeholders will continue to strengthen capacities through training and skills development at all levels. In addition to the above principles, there are several agreements, conventions and treaties that countries have committed has to implement. Both national and international human rights laws and conventions such as the national constitution, the UN convention Human rights, and Humanitarian Charter to further inform the above guiding principles.
128. We shall advocate for nations to ratify, domesticate and implement these Agreements, Conventions and Treaties, which relate to Disaster Management. In this regard, it will put in place policies, laws and strategies to facilitate effective implementation of favourable code that keep the world safe

129. CODE OF CONDUCT The code of conduct in Disaster Management seeks to guard the standards of behaviour among the different stakeholders. It is not about operational details such as how one should calculate food rations or set up an IDP camp; rather, it seeks to maintain the high standards of independence and effectiveness to which the Governments of the world aspires. This policy provides the following code of conduct for stakeholders: • Disaster response interventions based on facts and verifiable information: Data from the early warning systems and the continuous monitoring of disaster occurrence and trends will be the basis of disaster response. • The humanitarian imperative: the right to receive relief assistance during disasters is a fundamental humanitarian principle which should be enjoyed by all citizens of regardless of race, colour or creed. The need for an unimpeded access to affected populations is of fundamental importance in exercising responsibility. • Aid is given regardless of ethnicity, political or religious affiliation or geographical considerations At all times, stakeholders will seek to base the provision of disaster assistance on a thorough assessment of the needs of the affected populations or their available local capacities to meet those needs. • Respect for Culture and Customs Stakeholders will endeavour to respect the culture, structures and customs of the communities and households we are working with. • Disaster assistance must strive to reduce future vulnerabilities to disaster as well as meeting basic needs All disaster assistance will affect the prospects for long term development, either in positive or negative fashion. Recognising this, all stakeholders will strive to implement disaster assistance programmes which actively reduce the beneficiaries' vulnerability to future disasters and help create sustainable lifestyles. • Stakeholders will reinforce the capacity of local communities to manage the full Disaster Cycle All people and communities even in disaster still possess capacities as well as vulnerabilities. Where possible, stakeholders will strengthen these capacities by employing local staff and procuring local resources. All activities in Disaster Management should reinforce rather than undermine existing capacities. • Involvement of beneficiaries in Disaster Management Programs The Government and stakeholders will fully involve communities in the design, management, implementation, monitoring and evaluation of Disaster programmes.

130. Mainstreaming Women and Children Issues In all disaster management programmes, Government and partners stakeholders and communities will take positive cognisance of the excessive impacts which women and children undergo in any disaster. This policy, therefore, shall make provisions to enhance protection, safety and other needs of women and children in any disaster situation. • Mainstreaming the Concerns of the Challenged and Elderly In most disaster situations, confusion surrounds many activities, especially in relation to relief and evacuation. This problem particularly affects the physically, mentally and visually challenged, the elderly and the sick. This policy stresses the need of special provisions to cater for these segments of the society in emergencies. • Environmental Concerns Stakeholders will pay particular attention to environmental concerns in the design and management of disaster programmes, constantly reviewing the status and trends of the environment to ensure sustainable compliance. It is clear from the above, that the Government will take the leadership role by articulating a clear policy to guide Disaster Management activities and to enable other stakeholders to harmonise, align and coordinate Disaster Management activities along with the Government needs and Disaster Management priorities. All this requires policy, legal and institutional frameworks which embed Disaster Management in the Government with the regular allocation of public resources to achieve the desirable goal and objectives.

131. We shall seek to support POLICY, LEGAL & INSTITUTIONAL ARRANGEMENTS This chapter provides the policy, legislative and institutional arrangements for Disaster management in Kenya. These arrangements are among the major inadequacies in the present disaster management system. The proposed institutional framework includes the establishment of NADIMA (the National Disaster Management Agency), its roles and responsibilities and its relationship with other institutions with its structures down to the community level. This institutional framework should facilitate coordination and collaborative relationships among stakeholders.

132. We shall seek to support ENACTMENT OF THE NATIONAL DISASTER MANAGEMENT POLICY The enactment of this policy will provide the basis for the Institutional and legal framework for Disaster Management in Kenya. THE LEGAL FRAMEWORK A legal framework will be established through an Act of Parliament with provisions for:- • The establishment of the National Disaster Management Agency, and all other Disaster Management structures and Committees • The powers, roles, relationships, functions and funding of the Agency (NADIMA) • The activation of disaster management plans to provide immediate assistance to disaster victims even in the absence of a disaster declaration.

133. We shall seek to support ORGANISATIONAL STRUCTURE The organisational structure for Disaster Management in Kenya is presented as in the Chart below. The functions of the different Stakeholders within the system are described. - Provide information on ministerial plans on Disaster Management Plans and how and when to activate them Ratify the deployment of National resources in case of emergencies Identify resource gaps and sources of non-food resources for Emergencies and Assistance. These two Committees work on an ad hoc basis and also meet on a quarterly basis just before NDEC and more frequently during emergencies. 4.3.3. The Ministry of State for Special Programmes The Ministry of State for Special Programmes will be in charge of Disaster Management policies, and will, therefore, coordinate implementation of this Policy. It will coordinate all the disaster efforts of sectoral ministries, including
134. We shall support Disaster Risk Reduction through the National Gorvernments of countries, and ensure that the policy is mainstreamed in their planning, development and budgeting. It will develop appropriate guidelines together with the private sector and Civil Society Organisations as well as to other stakeholders on relevant matters pertaining to Disaster Management. The Ministry under States will be the custodian of Disaster Management policy formulation processes within Government and, through the Minister, will advise Cabinet on all matters pertaining to Disaster Cycle Management. It will establish partnerships and collaborative linkages with existing institutions/organizations, and will implement this policy and other Disaster Management activities. We shall fund-raise for Disaster Management from other stakeholders other than the Government. It will also conduct and support public awareness, sensitization and education on Disaster Management .Establishment of the National Disaster Management Agency Through this policy, an autonomous, flexible, the National Disaster Management Agency will be established with the following mandates and responsibilities: To be in charge of the day-to-day management of all disaster management activities as stipulated in these policy guidelines and in any other instructions which may be given by the national leaders, Ministry of Special Program from time to time ; To operate an effective and efficient National Early Warning /Disaster Monitoring Information System; To facilitate national, district and community level Disaster Management contingency processes that will result in the preparation of Contingency Plans to be updated regularly at all levels; With guidance, instruction and advise from the Board of Trustees of the National Disaster Management and Contingency Funds, yet to be set up, operate the Funds based on the procedures and guidelines provided ; Coordinate the DM activities of other stake holders in the DM Cycle Encourage and enhance collaboration and partnerships through trust - building and running a credible Disaster Management system among all relevant stakeholders; Support the Ministry of Special Program in fund-raising activities outside the Government Support capacity-building initiatives for Disaster Management among all relevant stakeholders; Document, publish and disseminate all relevant Disaster Management data and information to all stakeholders in and around the country; Operate a functional and effective Monitoring & Evaluation system for programming and management activities on Disaster Management ; Support the Ministry of Special Programmes in education, training, sensitization and public awareness. National disasters we shall support will have the following six Directorates: Early Warning, Disaster Risk Profiling Information management and communication; Response Coordination; Finance and Administration; Research, Planning, and Monitoring & Evaluation to support its services. and a secretariat.

135. The members will be drawn from the following line ministries; MOSSP, PA & IS, Environment and Mineral Resources, Water & Irrigation, Health, Information, Agriculture, Livestock, Defence, Finance, Planning, Local Government, Foreign Affairs, Forestry and Wildlife, Transport and Ministry for the Development of Northern Kenya and other Arid Lands.. a. The Directorate of Early Warning and Disaster Risk Profiling The responsibilities of this Directorate are: • Regular monitoring, collection, analysis and evaluation of information on the most frequent disasters in the country • Coordination of all Early Warning System/ Information Service providers in order to harmonize the information available on Disaster Management • Production of regular Early Warning Disaster Management bulletins and publications • Maintenance of a data base of information and trends on Disaster Management in the country • Development of hazard maps and disaster risk profiles based on a baseline year; and continue to update this information for future scenario planning in collaboration with other partners and stakeholders • To establish a National Disaster Resource Centre. This Resource Centre will monitor, collect and collate all relevant information and data pertaining to Early Warning Systems and any other information on disasters; maintain the hazard mapping and disaster monitoring database; and keep all evaluation and impact assessment reports on disaster response interventions, on lessons learning and on contributing to best practices. 39 b. Directorate of Institutional Coordination The responsibilities of this Directorate will be as follows: • Facilitation of collaboration and linkages among all relevant stakeholders: such as the response stakeholders and disaster monitoring and Early Warning information service providers, Disaster Risk Profilers and Planners for Disaster Risk Reduction, in order to more strongly link Early Warning to response • Promotion of information and experience sharing among stakeholders: • Carry out strategic disaster-related needs assessments and provide recommendations to stakeholders involved in response initiatives • Monitoring and Regulation of humanitarian and DM agencies c. Directorate of Disaster Response, Relief and Recovery The responsibilities of this Directorate are: • Establishment and maintenance of a national disaster response capacity data base; • Coordination of all stakeholders in disaster response; • Facilitation of the preparation of national, district, and community level disaster response contingency plans; • Facilitation of the planning and implementation of Disaster Response Interventions, based on the Disaster Cycle; • Separation of the planning and coordination of Rapid-Onset Disasters from Slow-Onset Disasters, and allocation of responsibilities accordingly; • Tracking the cost of all Disaster Response interventions by all stakeholders, phase by phase, in order to estimate the cost of a particular disaster, and for better judgement of the management costs of each phase. National Disaster Operations Centres (NDOC) is currently based in the Ministry of State for Provincial Administration and Internal Security (PA& IS). Its main functions are search and rescue in the event of a disaster including undertaking rapid assessments, collection and dissemination of data, coordination of response. NDOC also monitors disaster events on a 24-hours, 7-days a week basis. Such policy now provides that the National Disaster Operations Centre will be under NADIMA and will focus on coordinating rapid-onset disasters and will work as the Response Directorate in the new Disaster Management structure. NDOC will also serve as a useful collaborative link between all the Disaster Management players, during disaster response and implementation of this Policy.

136. However most of National disaster authories have limited capacity and, therefore needs strengthening to make it effective that is our role as Helpers Of Africa Internationalthrough Kingdom Global Disaster Reponse Agency to support directorates of M & E, Research and Planning The responsibilities of this directorate are: • Monitor, Analyse and Evaluate data at different stages of the disaster • Undertake impact assessments of all disaster management response interventions; • Provide information and reports to the data bank and relevant authorities and stakeholders; • Collate and document lessons and experiences of implementing disaster response interventions by all stakeholders and use these to update data bank and institutional memory; • Undertake applied research related to disaster management; • Monitor and undertake applied research on the impacts of Climate Change and Environmental Revolution in relation to Disaster Management; • Make appropriate recommendations for action. e. Directorate of DM Education, Training & Capacity Building The responsibilities of this Directorate are: • To establish systematically a structured corps of professional and technical disaster management personnel; • Promote systematic functional education for Disaster Management in formal and public educational systems; • Promote sensitization and public awareness on Disaster Management in liaison with Government and all stakeholders, including the Media, NGOs, CSOs, CBOs, and FBOs; • To implement appropriate training at all levels for practical, technical Disaster Management through structured courses; • Undertake periodic audits of the qualifications for DM technical and professional personnel, with a view to upgrading and sustaining acceptable and effective standards; • To promote and uphold the ethos and ethics of the code of conduct for acceptable procedures and operations in DM; and • To facilitate and eliminate deficiencies in capacity building at all levels, through standardised and officially-approved DM courses and curricula. f. Directorate of Finance and Administration The responsibilities of this directorate are: • Establish administrative procedures and guidelines for the whole of NADIMA; • Establish financial procedures and guidelines for national disaster authorities; • Facilitate effective and timely disbursement of funds within all the directorates; • Facilitate regular audits of staff' skills, human resource requirements, equipment as well as financial in order to enhance effectiveness and efficiency of the organisation; • Together with the Board of Trustees of the National Disaster Management and Contingency Funds, establish procedures for the management of the funds and financial disbursements to relevant institutions in the disaster-affected areas; • Support the management of the National Disaster Contingency Fund as may be required, from time to time. The National Platform for Disaster Risk Reduction The National Platform for Disaster Risk Reduction is a stakeholder's forum for consultation, negotiation, mediation and consensus building on disaster risk reduction. The Platform will work within the Ministry of State for Special Programmes. The broad objectives of the forum will be to: - • Promote and enhance education, public awareness and advocacy of disaster risks. • Obtain commitment from the public leadership to disaster risk reduction. • Stimulate and strengthen multi-disciplinary and multi-sectoral partnerships and networks for Disaster Risk Reduction at all levels. • Improve dissemination and understanding of natural and man-made causes of disasters, and their related effects upon vulnerable communities. • Plan dissemination of information on Disaster Risk Reduction • Play an advisory role to all the stakeholders on DRR Membership of the National Platform is drawn from all the Line Ministries, NGOs, and CBOs.

137. We shall support and fund Local government (County,Constituency, District Disaster Management Committees) In order to build on existing structures, capacity-building for the District Disaster Management Committees will be enhanced. Their responsibilities will include the following: • Appointing one of its members to be responsible for coordinating emergency response in the respective Districts, under the direction of the Permanent Secretary of the Ministry of Special Programmes; • Operating the District Early Warning System (EWS); • Formulation, compilation and coordination of District Disaster Contingency Plans; • Administering district disaster and contingency funds; • Appointing lead agencies, through memoranda of understanding, to be responsible for coordinating emergency responses in their respective districts; • Conducting and documenting an inventory on the response capacity for the emergency services; • Working with other committees to support community institution building, for disaster management; • Organizing and participating in disaster management training and needs assessment, in conjunction with local experts, volunteers, trained personnel and other stakeholders; • Monitoring, analysis and evaluating the data for disaster management activities in the Districts; • Coordinating, training and public awareness programmes and activities; • Promoting advocacy for and co-ordination of Disaster Management and DRR program and activities including mainstreaming of Disaster Management, DRR and Climate Change in Education, Development Planning and management. The District Disaster Management Committee will foster linkages with nongovernmental partners, and with District representatives of Sectoral Ministries and Local Authorities. They will work with grassroots community groups, individuals and volunteers, who have experience and / or interest in disaster management.

138. We shall support and fund Local government Divisional Disaster Management Committees Divisional Disaster Management Committees will play the role and responsibilities of the DDMC's at the divisional level. The membership of these divisional committees will be representatives of the DDMC's at this level, paying special attention to the respective locations. Location and Community Level The Policy recognises the important role of communities in starting and carrying out disaster management activities. Local leaders will mobilize communities in identification of causes of their vulnerability to risks and implementation of the risk reduction programmes. Although the lowest structure will be at the locational level, villages will be represented through the Village Disaster Committees. The composition of this Committee will include village and location representatives, NGOs, CBOs, FBOs, volunteers and other stakeholders, operating at the locational level. The main responsibility of these Committees will be collection, documentation and dissemination of disaster information (including, the Early Warning information using indigenous knowledge and response), planning and mobilization in order to ensure active participation and effective operations of the Committees, in a bottom up decision-making. 4.5.7 Local Authorities Under this Policy, strengthened Local Authorities will play a more active role in disaster management. It is recognized that the Authorities have potential resources that can be effectively used to minimize disaster impacts. The Agency will communicate with them to enhance practical partnership with the Authorities in order to improve disaster risk reduction and disaster management in general, through effective utilisation of available resources, enforcement of the bylaws related to disaster risk reduction activities and other initiatives in their jurisdictions.
139. We shall support and fund local authority (including county, urban, town, municipal and city councils) shall have a DM committee with a technical person as a secretary. The committee will be chaired by the Mayor or the Chairman of the council. Members of this committee (DM committee) shall be comprised of respective chairmen of various committees within the council and the technical members of that council will be in attendance.
140. We shall support and fund Partner Agencies In this Policy, stakeholders outside Government system, involved in Disaster Management such as development partners, humanitarian agencies, NGOs and community-based organizations will participate in management of disasters through relevant committees. They shall provide information, resources such as financial and technical input for preparedness, planning, Early Warning Systems and response in the Disaster Management Cycle.
141. We shall support and fund Local government Private Sector: Corporate Bodies and Individuals This policy recognizes the role of the private sector and other players. The private sector, including companies, the media, individuals, and professional bodies, will be expected to assist with available resources (financial, human, technical know-how and equipment), when a disaster strikes in addition to playing a significant role in the process of advocacy, public education, sensitisation and awareness. The private sector is responsible for prevention of disasters by upholding human, industrial and environmental safety within their jurisdiction as well as front-line response to disasters in their areas. The National Agency for Disaster Management (NADIMA) will work closely with this sector. By mainstreaming of disaster management through education, development planning, sensitisation and awareness we create a disaster literate society which makes everybody capable of participating effectively in disaster management
142. We shall support and fund Local government RESOURCE MOBILIZATION, MANAGEMENT & ACCOUNTABILITY The effective implementation of this policy will require adequate resources. These are financial, human, disaster management equipment and infrastructure. It has also been noted that resource procurement is slow during emergencies and considering the urgency to respond, it is imperative that an enabling system be established to ensure quick disbursement of resources to address disaster issues.
143. We shall fund and follow funding through various platforms- National gorvernments will be funded The following different funds for management of disasters are already in existence. They include: • Humanitarian disaster fund; • National drought disaster fund; • National disaster management contingency fund among others. There is a need for all these funds to be harmonised for effective management and use in case of a disaster. This policy therefore recommends the establishment of a common basket disaster fund with contributions from all us Helpers Of Africa International stakeholders, including Government, development partners, global agencies, private sector, and individual contributions. All players in disaster related businesses should contribute to the Disaster Management fund. Private Organisations will be encouraged to contribute a percentage of their Corporate Social Responsibility funds to the National Disaster Management fund. Amendments should also be made to existing financial rules and regulations in order to facilitate faster but transparent and accountable release of these funds for effective response in the case of disasters. A board of trustees drawn from the stakeholders will be established to manage the fund.

144. We shall support and fund Local government This policy the establishment of the National Disaster Management Trust Fund and the District Disaster Management Fund. Other than these funds, every line Ministry will have a budget line for Disaster Risk Reduction activities. The National Disaster Management Trust Fund The Policy proposes for establishment of a National Disaster Trust Fund by the Minister for Finance to be administered by the Ministry of State for Special Programmes in compliance with recommended legal and legislative amendments to be made to the current rules and regulations. This fund will receive contributions from the Exchequer and donations from individuals, the private sector and the civil society and development partners for disaster management activities. This policy proposes 5% of the annual National budget be allocated for disaster management 20% of which will go to contingency fund, and 80% for Disaster Management. District Disaster Management Fund This Policy proposes the establishment of a district disaster management fund in all Districts. The Government will channel funds as required, to these accounts from the National Disaster Management Fund to enhance effective disaster management activities. Other sources of funding to this account will include and not be limited to the local authorities, the Constituency development fund and locally mobilized resources..
145. We shall support HUMAN AND NON-HUMAN RESOURCES Whereas, within the country, plenty of human and non-human resources are in place, effective inventorying and co-ordination for Disaster Management in emergencies are inadequate. In order to increase the capacity to respond quickly to disasters, inventories of both human and non-human resources will be kept and maintained at the local, district and national levels. Training-needs assessments at all levels will be conducted, to establish the available Disaster Management skills and experiences in the country, with the view to filling the identified gaps. Training of uniformed personnel, volunteers (including scouts and girl guides), employees of organisations in disaster response to provide back up during response will also be supported. The Office of the President will ensure that uniformed forces' involvement in Disaster Management is timely. Public awareness campaigns will be conducted to sensitize the general public on the same. The Ministry in charge of Education, Science and Technology will be supported to mainstream Disaster Management and Climate Change in training curriculums, in order to create a progressive mass environmental literacy and national capacity building for sustainable Disaster Management. A non-human resource inventory will be undertaken by NADIMA to establish the existing equipment and where it is located. The inventory will help to bring out areas where gaps exist, therefore inform decision-making on measures to be undertaken when the resources are required.
146. We shall support , fund and facilitate LOGISTICAL ARRANGEMENTS Due to the lack of adequate equipment and materials to be used in disaster response, all available equipment including that with the uniformed services should be availed in times of emergencies and for disaster response. This policy proposes that criteria for use of privately owned equipment and machinery in times of disasters be established to ensure that these materials are availed when needed. For privately owned equipment duty waiver and an award scheme should be introduced, for those who will have offered their facilities to be used. As opposed to direct compensation which would kill the spirit of volunteerism and promote unscrupulous behaviour to get funds.
147. We shall support and fund Local government INFRASTRUCTURE The current poor infrastructure and centralization of some key infrastructure, relevant for disaster management has slowed response when disasters occur and need to be addressed if the response period is to be reduced for effectiveness. This policy proposes that: Stockpiles be established for food and non-food items at the district level as informed by the disaster profiling. Construction of more hospitals and upgrading of dispensaries to cope with disasters and this information be made available to the public Free medical services be provided for disaster victims in public hospitals Private hospitals services to be availed at subsidized cost. Collaboration with relevant government departments such as the local Authorities and the Ministry of Roads will be sought to ensure the construction and upgrading of infrastructure development – markets, water and roads - for effective response in case of disasters. 5.4.5 A minimum of dedicated hotlines be secured from the Communication Commission of Kenya to be use for monitoring possible disaster occurrences, and the network to be intensified as needed when a disaster occurs. These will only be accessible to authorized personnel. Local FM stations will also be used as channels for disaster updates. 5.5 Accountability Contributors to the funds will be involved in overseeing of the fund management through regular release of quarterly financial statements for public use and comments. Regular monitoring and evaluation of the utilisation of the funds will be conducted by the controller and auditor general with assistance from independent auditors appointed by the stakeholders.

148. We shall support and fund Local government MONITORING, EVALUATION AND RESEARCH Monitoring, Evaluation and Research are increasingly becoming vital processes in Disaster Management in Kenya. This is so, because of several reasons. First, the Government and Development Partners would like to know the degree of progress made in the implementation of Disaster Management policy, in the results and impacts of Disaster Management initiatives, as well as in the lessons learned from implementation efforts, in order to foster best practices. Secondly, monitoring and evaluation and research provide information and processed data for use in developing a database for profiles and trend analyses, and for developing institutional memories, such that the disaster management system can learn from past mistakes, successes and experiences so as to improve its effectiveness and efficiency of DM and DRR. The related dynamic and evolutionary processes of monitoring, evaluation and research are Key to effective Disaster Profiling, Disaster Management and Disaster Risk Reduction; and their objectives and goals are similar, if not convergent. That is to say: for successful DM and DRR, the status and trends of disaster profiles must be accurately assessed and applied, through systematic research; and the three processes must be related at all levels. Owing to the crucial challenges of the ongoing and escalating Climate Change and to the related major global environmental changes, the character and complexity of the disaster systems in any country, especially in a complex environmental system such as in Kenya, will be very complicated – requiring continuous and related monitoring, evaluation and research for successful DM and DRR.
149. In addition, and especially in the rapid changes in the culture, population dynamics and urbanisation in Africa, there are a myriad of other potential sources of destabilisation of the cultural environment, including resource–based ethnic clashes, socio-cultural, economic and political conflicts, as well as cultural instabilities related to the urban revolution and informal settlements. For example, as relates to urban fire outbreaks the informal settlements will especially be disadvantaged; lacking access roads for fire engines, water for fire hydrants, fire resistant building materials time-tested coping strategies, and other resources for disaster management. All these and many more need systematic monitoring, evaluation, research and application for successful DM and DRR. Since the successful implementation of this policy will require the allocation of substantial human, material, financial, technological and other resources, it is imperative that a justification be made for allocation of such resources, supported by the positive results and impacts of the National Disaster Management system, particularly, in relation to those vulnerable communities and households, likely to be affected by disasters. This policy, consequently, provides numerous bases for the establishment of interrelated monitoring, evaluation and research frameworks, in order to promote an understanding of progress made in the implementation of the policy; and to assess the overall effectiveness and sustainable impacts of the National Disaster Management system in Kenya. Finally this policy stresses the need to establish a monitoring, evaluation and research framework which will promote sustainable disaster management countrywide with specific focus on highly vulnerable areas, such as the peri-urban informal settlements.

150. We shall support MONITORING, Evaluation and research for better performance- Nations Disaster Management monitoring refers to the process of systematic and continual observation and recording of data on evolution and occurrences of hazards and disasters, on management initiatives (planned or otherwise) with which the hazard, and disasters are handled; and on the degree of success or failure realized, with the intention of improving DM operations in future. 6.1.2 Problems and Challenges Past Disaster Management performance in developing countries reveals poor monitoring, evaluation and research, including poor data recording systems, inefficient evaluation, inconclusive research, ignored disaster types, and a general unpreparedness for systematic, effective disaster management. In view of all this, this policy makes provisions for establishment of effective monitoring, evaluation, research and application to all hazards and disasters (natural and man-made). 6.1.3. Objectives of Monitoring In this policy, the objectives of monitoring include various observations to promote understanding of hazard / disaster–causing systems and processes as well as their related characteristics occurrence, location, intensity, recurrence period, extent, duration... Monitoring will also promote understanding of the impacts on whole life systems, livelihoods, socio-economy, infrastructure, environment and resource base. Finally, monitoring should facilitate informed forecasts and prepared DM. 6.1.4 Monitoring for Separate Objectives (the System and Disasters) In this policy, properly designed Monitoring focuses on both the institutional/operational system and the disaster risk profiles analyses and management. 51 (a) Monitoring Objectives for the System The objectives for monitoring the system include promotion of disasterawareness, coordination of participatory partnerships in disaster management among stakeholders, strengthening linkages between disaster management and sustainable development, and comprehensive resource mobilisation for DM. (b) Monitoring Objectives for Disasters The objectives for monitoring disasters include, obtaining reliable data on hazard/ disaster types and systems, continual stocking of the disaster data bank, reliable data on the whole Disaster Management cycle, systematic updating of disaster risk profiles and evolutionary updating and application of indicators. In view of these objectives and needs, this policy provides for establishment of a monitoring, evaluation and research framework and strategy, through the processes and data banks.

151. We shall support In view of the demonstrable need for the two types of monitoring (for the system and disasters), this policy also recognises the necessity for operationalization of the three convergent processes of monitoring, evaluation and research to attain the goals of the DM; and to realise a safe, resilient and sustainable society. 6.2 EVALUATION 6.2.1 Definition and Character “Evaluation” goes hand in hand with “research”, using monitored data on hazards and disaster occurrences. In this policy, for hazards and disasters, evaluation and research include the following: the systematic analysis of monitored data in order to expose its salient characteristics, to facilitate interpretation of those characteristics, and in order to enhance application of those data to sustainable DM and DRR. This evaluation (plus attendant/concomitant research) provides opportunity for reliable forecasts and realistic reorganizations of plans and operations to improve both DM and DRR. 6.2.2 Problems and Challenges against Evaluation By the irregular and unsatisfactory character of the monitoring process in both natural and man-made disasters, effective, systematic evaluation is rare and undependable; and, so, both evaluation and the allied research processes rarely emerge as strong, incisive and reliable management tools 6.2.3 Objectives of Evaluation In this policy, the objectives of evaluation include analysis and exposition of the various characteristics of the particular hazard or disaster, as well as the 52 critical assessment whether the specific provisions within the DM and DRR system have the expected effects. Evaluated data will generate knowledge on the frequency of disaster recurrence, and for application on strategic planning, contingency planning and general planning for DM and DRR. 6.2.4 Policy Framework This policy provides for the establishment of an institutional structure to ensure reliable and dependable monitoring, evaluation and research in relation to the system and disasters, as a mandatory and integral component of the systematic planned DM 6.3 RESEARCH 6.3.1 Definition. This is guidance, analysis of incoming data, previous input and their appropriate integration into overall specific strategic and contingency plans. 6.3.2 Review and Discovery by Research. There shall be essential need for review of research as follows: Promotion of institutional laws and policies; Traditional coping strategies of communities; Promotion of self-reliance and community resilience; Promotion of self-rediscovery among local communities; Promotion of research into indigenous lifestyles, livelihoods, resource systems and environmental disasters; Promotion of research on impacts of Climate Change on indigenous livelihoods, such as traditional pastoralism and other lifestyles. All these and other areas of research are intended to rediscover and improve integration of traditional knowledge and technologies into sustainable coping strategies.

152. We shall support Monitoring and Evaluation of Capacity-Building for Disaster Management Generally, there is inadequate capacity for effective Disaster Management in Kenya; and, so, in most aspects of Disaster Management in Kenya, it is clear that capacity-building is essential to upgrade efficiency. This policy, therefore, stresses the institutional structured provision for capacity-building to promote professional/technical efficiency at all levels: International, Regional, Sub-Regional, National, District, Locational and Community. Monitoring and Evaluation of Accession and Compliance with International/Regional Conventions, Agreements and Treaties The globalisation process stresses the need for international/regional collaboration and cooperation in disaster management at all levels; and Kenya has varying degrees of such cooperation and collaboration. Moreover, in management of joint resources and trans-boundary problems, collaboration is essential. This policy, therefore, stresses the urgent institutional provision to enable Kenya to have accession and compliance to all such relevant international/regional instruments for Disaster Management. Including those cases which qualify for compensatory and restorative processes; and these institutional provisions should ensure effective monitoring and evaluation of the compliance. Monitoring Discrepancy between Stated Contents and Actual Deliveries of Food and Non-Food Supplies for Relief It has been repeatedly noted that stated contents of containers as they were dispatched are not necessarily the same as what is delivered. This way, duty is paid for the wrong contents or for expired goods, of no use to the expectant recipients. Similarly, relief goods may arrive at the port of delivery for transmission to the affected communities in the interior; but bureaucracy and procrastination may delay release and delivery for weeks, while the disaster deepens. This policy, therefore, provides for dedicated monitoring and evaluation of relief goods and supplies; and for ensuring urgent, timely, and efficient distribution of relief supplies. Monitoring and Evaluation of Communication and Feed-back Systems For effective Disaster Management, a wide range of information systems will be essentially accessed, analysed and utilised to plan and manage the operations. This range of information will come from all levels, sectors, stakeholders and agencies. This policy provides for the establishment of an institutional structure, such as a resource management centre, to facilitate monitoring and evaluation of an effective network of communication channels to ensure productive communication among all partners and levels for the DM. Monitoring for Effective Coordination and Mainstreamed Responsibilities There shall always be need to monitor the effectiveness with which mainstreamed responsibilities are being implemented in sectoral ministries; but, especially, at times of disasters and emergencies, there is a critical need to monitor and coordinate information sharing, and operational responsibilities, guided by appropriate designated officials, from the Permanent Secretary downwards to the provincial, district, divisional and community levels. Complementarily, continuous bottom-up monitoring from the communities and divisions informs the whole system, and improves the twoway flow of command and reception for coordination of operational disaster management. Monitoring and Evaluation of Disasters All aspects of the disaster profile and cycle need systematic and dedicated monitoring, evaluation and attendant research. This policy shall provide for continuous reception, processing, storage management and application of a data base, including continuous assessment, evaluation and set periodic auditing of the DM system. This process is intended to assess compliance of dedicated DM with agreed principles and implementation strategies of the integrated DM frameworks.

153. We shall support and fund Local government Monitoring and Evaluation of Food Insecurity Whereas National and Sub-National agencies exist to keep watch over food insecurity, especially in the ASALs, and whereas the relief supplies come from International agencies that we are now joining National and other humanitarian agencies, this approach has been found to cause a progressive dependency syndrome. This policy, therefore, provides for dedicated monitoring and evaluation of the food insecurity situation in the whole country, especially, in the drought- and flood-prone areas. Furthermore, this policy stresses collaborative Monitoring and Evaluation of evolution of alternative income-generation and food production in the ASALs, and of strengthening the Permanent National Food Reserve. Monitoring and Evaluation of Geologic Disasters Existence of the , plus the string of extinct and dormant volcanoes , as well as the continuous small-scale tremors throughout the year, indicate that many nations is highly predisposed to earthquakes and volcanoes. In addition, at least once every two years there is a moderate-scale earthquakes let alone reactivation of some volcanoes. Finally, ocean- based tsunamis have become a problem. So far, institutional monitoring and records for geologic disasters are very inadequate. This policy makes for institutional provision to ensure systematic and continuous monitoring and evaluation and appropriate research on the seismic system and volcano-logy (in particular) deliberately to enhance effective management of geologic disasters. Furthermore, this policy makes provisions to encourage achievement of International networking and collaborative cooperation with similar geologic, disaster and seismic monitoring/ evaluation and research systems in the world to enhance effective management of geologic disasters. Monitoring and Evaluation of Socio-Cultural, Economic and Politically- Motivated Conflicts Owing to recurrent food insecurity and increased unsustainability of livelihoods, particularly in the ASALs; and owing to recurrent droughts which exacerbate insufficient availability of water, grazing and other livestock-support resources, there are often cross-cultural, inter-ethnic, and trans-boundary clashes. Furthermore, in recent times, politically- motivated differences have also generated similar or more intense conflicts. Finally, as the Climate Change intensifies, available livelihoods will be reduced and the natural resource base will be negatively impacted, so that consequently, conflicts will escalate. This policy stresses institutional and operational provision to ensure effective monitoring and evaluation of the disaster profiles in worldwide, especially, in the ASALs, to ensure a permanent and balanced solution of the resource issues; to ensure that Early Warning Systems give accurate signals to avoid a repeat of the disaster cycles; and to ensure systematic, professional and monitored management of affected persons in all disaster phases - relief, repatriation, rehabilitation, resettlement and recovery. Monitoring and Evaluation of Climate Change and Other CrossCutting Issues An increasing number of cross-cutting issues are gaining escalating importance in changing the complex disaster picture in world and making a predictable DM future very difficult. Each of these issues should be carefully monitored, evaluated, and analysed for the strategic proactive planning of DRR, as well as in the conventional management of the disaster cycle. The issues include: Climate Change, poverty, the multi-facetted inter-ethnic and political conflicts, Corona / HIV/AIDS pandemic, the rapid overall environmental change, excessive rapid population growth and urbanization dynamics, the complex gender issues (affecting both women and children), the challenged and the elderly, trade imbalances and resource depletion.
154. We shall support and fund Local government This policy will provide for achievement of these goals. Monitoring and Evaluation of DM Research, Education, Training, and Capacity-Building For DM to succeed, a continuous supply of adequate technical and professional personnel is essential. Sensitization, awareness creation and functional literacy are essential also for the whole public, especially at the community level; and finally, continuous research in all these fields and data base management is a must for success. This policy will provide for the attainment of these goals. Early Warning concerns all disasters and hazards possible in one place. EWS guides insight into the possibility of multiple occurrences of disasters at the same time or in quick succession in a given place. Application of EWS information should lead to appropriate information, preparedness and integrated response to the disasters. Specific EWS include; conflict-related early warning, flood early warning, seismic early warning and drought early warning. This policy provides for institutional/operational framework to facilitate the disintegrated monitoring and evaluation of each disaster, within the multiple occurrences while recognising the synergistic components for effective management of the whole disaster complex. 6.5 Sharing and Learning through Knowledge Management Processed and applied knowledge and information from Monitoring, Evaluation and Research, implementation and cyclic reviews should be ploughed back throughout the whole DM system and institutional structure for the professional and technical benefit of all.

155. We shall support capacity on food security to respond to disasters. KGDRA Strategic Plan should better reflect the critical services that KGDRA provides to the broader humanitarian community as the lead agency of the logistics and emergency telecommunications clusters, and the manager of our Humanitarian agencies • In light of the unprecedented number of emergencies, KGDRA core excellence in emergency response and preparedness should be maintained, and strengthened where required. • KGDRA should continue to reflect on the implications for its structure and function of business model changes such as CBTs and local procurement. • KGDRA should continue to build an evidence base – including by improving results measurement – to facilitate more robust and conclusive reporting on organizational performance. KGDRA continued shift from food aid to food assistance is highly relevant for sustainable hunger solutions, and positions KGDRA well for the transformations called for by the 2030 Agenda. • Evaluations confirm KGDRA strengths in emergency response, especially in large-scale sudden-onset disasters. However, managing multiple Level 3 emergencies has diverted attention from other protracted, chronic and lower-level emergencies. • KGDRA can make relevant contributions in the dynamic contexts of middle-income countries, where differences in development often result in vulnerability. To do this, however, KGDRA needs to enhance its focus on helping countries to strengthen their own national policies and systems, working effectively as an independent and impartial partner, and enhancing capacity-building efforts in its areas of expertise to assist countries in eliminating extreme poverty and hunger.

156. KGDRA commitment to and resourcing of its leadership role in the coordination of key humanitarian clusters was found to be variable. • Evaluations reveal a mixed picture regarding collaboration among United Nations agencies and with civil society partners. Leadership and prioritization will enable KGDRA to realize the full benefits of this wide array of partnerships. Evaluations also highlight a need for greater consistency across KGDRA on alignment with national systems. • KGDRA current monitoring systems and capacity are still inadequate to measure and analyse outcomelevel results. Challenges in determining KGDRA s efficiency, effectiveness and comparative advantage, coupled with unclear result chains in project designs, limit KGDRA's ability to manage for results based on analysis of what works and what does not. • Achieve improved nutrition – consumption of nutritionally adequate diets with complementary actions to support utilization • Achieve food security – availability of safe, nutritious, and sufficient food and stability of food systems • Promote sustainable agriculture – stability of food systems and inputs. The four components of SDG 2 provide a definition of zero hunger and benchmarks against which to measure progress towards its achievement. KGDRA's primary focus will be on the first three elements of SDG 2 and the first four targets, while other actors have mandates and capacities for promoting sustainable agriculture and enhancing seed, plant and animal genetic diversity. In situations of conflict, natural disasters, and other emergencies, KGDRA humanitarian relief operations save lives and livelihoods by ensuring access to safe, nutritious and sufficient food, often in difficult and dangerous circumstances. Responding as needed is a KGDRA core competence. • In addition to implementing direct operations where needed, it will also be critical for KGDRA to support countries in strengthening their disaster risk reduction, prevention, preparedness and response capacities to ensure access to sufficient, nutritious and safe food for all people at all times. • Recognizing that lack of access to safe, nutritious and sufficient food is a major problem for most of the world's hungry people, KGDRA will continue to support hunger-related safety nets, such as school meals programmes, and productive safety nets that protect access while promoting nutrition, livelihoods and asset creation. • Leveraging its vast global expertise in supporting different social protection schemes all over the world, KGDRA will work to strengthen countries' capacities to provide social protection measures that protect access to adequate, nutritious and safe food for all. • Activities designed and implemented with partners towards Strategic Result 1 will include unconditional resource transfers to support access to food; asset creation and livelihood support; school meals; individual capacity • Helping to eliminate malnutrition, particularly in contexts of high burden or high risk, is central to KGDRA's work. Malnutrition has a huge impact on human development, contributing to the persistence of poverty and inequality through the intergenerational cycle of hunger. • WFP will support countries' capacities in nutrition-specific approaches that deliver quality nutrition services to treat and prevent malnutrition. KGDRA will emphasize a preventive approach to malnutrition, focusing on facilitating access to nutritious diets required by vulnerable groups, helping to provide the foundation for sustainable development.

- KGDRA will leverage all its assistance and activities to deliver improved nutrition outcomes by strengthening nutrition-sensitive approaches, and by working with partners using complementary approaches across sectors – such as strengthening social protection systems, strengthening capacity and supportive legislation for enhanced public and private demand for fortified food where necessary, building resilience, improving health and education, increasing smallholder productivity, reducing post-harvest losses, and ensuring sanitation and hygiene. Recognizing that nutritional status both determines and is determined by multi-sectoral and cross-cutting factors, KGDRA will design programmes with a clear understanding of how nutrition is affected by gender equality, lack of women's empowerment and other drivers of malnutrition that cut across sectors. • Activities designed and implemented with partners towards Strategic Result 2 will include nutrition treatment; malnutrition prevention; unconditional resource transfers to support access to food; school meals; individual capacity strengthening; and institutional capacity strengthening. • KGDRA's contributions will focus on ensuring that diets which meet the nutrient needs of targeted vulnerable groups are available, accessible and consumed. Activities will focus on improving access to nutritious foods to complement the work of other actors focusing on food 29 production and of organizations with specialized mandates and capacities to address the nonfood determinants of malnutrition. KGDRA will seek context-based opportunities to work with partners to adjust the targeting of programmes, provide complementary support to healthy diets, align with national nutrition strategies, and will "co-locate" its programmes with those of partners to address multisectoral drivers of malnutrition. KGDRA will implement these activities where vulnerable groups do not have diets that meet their nutrient needs. STRATEGIC OBJECTIVE 3 Achieve food security Strategic Result 3: Smallholders have improved food security and nutrition through improved productivity and incomes. smallholders' have higher incomes and greater productivity than in supporting improved food security and nutrition

- (SDG Target 2.3) and Strategic Result 4: Food systems are sustainable. food systems are sustainable and utilize resilient practices that help maintain ecosystems; strengthen capacities for adaptation to climate change, extreme weather and disasters; and progressively improve land and soil quality.
- KGDRA has two reasons to engage. Smallholder farmers and their families account for a significant proportion of the most food-insecure and a large segment of WFP's beneficiaries, whose direct needs are addressed under Strategic Objectives 1 and 2. Additionally, KGDRA can51 use its significant purchasing power and experience to increase smallholder farmers' access to markets, both directly and by mainstreaming learning and best practices across the organization. Working with our shared services agencies and others, KGDRA will continue these efforts seeking to raise awareness and catalyse policy reform and institutional innovation and capacity development to address hunger from the demand-side of food systems. Operating at the intersection of commercial food markets and the public interest represented by food assistance, KGDRA's demand for food and food system services can be a direct and indirect force for enhanced performance of food systems, contributing to inclusive agricultural growth, sustainable social and economic transformation and broad-based food security. Given that in many countries the bulk of food available in local markets originates from smallholder farms,

157. KGDRA's procurement footprint in these markets can provide a basis for partnerships with governments and the private sector to catalyze demand-driven platforms that enable smallholders to have sustainable and profitable engagement with local markets beyond KGDRA. will be directly related to achieving food security and nutrition outcomes. • Focusing on the most vulnerable people and communities, KGDRA will support partners to promote livelihoods and resilience-building linked to food security and nutrition, climate change adaptation, risk management, and strengthened sustainability and resilience of food systems. KGDRA will continue to collaborate with our relevant agencies on joint strategies, implementation and advocacy, including in areas related to supporting countries' efforts in sustainable food production, where KGDRA relies on the core strengths of our agencies and others. WFP will also work on this Strategic Objective and these Strategic Results in partnership with, the Helpers Of Africa InternationalOffice for Disaster Risk Reduction, and the AU, amongst others to support national programmes and services. WFP will also contribute to related coordinating mechanisms such as the CFS and the Food Security Information Network. Other major partners include international and national civil society entities. • Food systems are changing rapidly and profoundly as a result of such forces as urbanization, changing consumer diets, and supply chain integration due to capital intensive technology change and expanded use of digital devices and Internet access. Food system transformation is embedded in broader transformations of rural areas and wider economies, including urban areas. In both humanitarian and development contexts, KGDRA will work in synergy with partners to design and implement food assistance activities that address systemic problems rooted in these transforming food systems, aiming to expand the scope for hunger reduction in broader structural and rural transformation processes. • Situations of recurrent crisis in which food insecure communities live in damaged or fragile environments and are exposed to high levels of shock are recognized as a major challenge to the achievement of zero hunger. KGDRA will use analytical tools to facilitate a cross sectoral understanding of disaster risks and of opportunities for enhancing livelihoods, climate resilience and nutrition, in line with government's provisions. This analytical process will help partners engage in sustained efforts to build resilience for food security and nutrition. Similar tools will also help partners support communities in protracted conflict and displacement situations by guiding efforts to enhance their resilience for food security and nutrition. • KGDRA's long experience in humanitarian and development contexts has established strengths for the organization in supporting the building of resilience for food security and nutrition. KGDRA will support national efforts in disaster risk reduction and climate resilience that facilitate the achievement of zero hunger, using innovative tools from climate science and finance to link early warning systems with early response mechanisms, and implementing programmes that create productive assets, promote the production of nutritionally diverse foods, diversify livelihood strategies and rehabilitate natural resources. • Enhancing the marketing, productivity and livelihood opportunities of smallholders is a powerful way to improve food security and nutrition. Strengthened capacity for risk management is especially important.

158. KGDRA Fostering Inclusive Rural Development (forthcoming). 31 • Significant investments in capacity strengthening of national governments and other actors supporting smallholder agriculture and food systems are being made by a range of actors including our agencies and partners. KGDRA will continue to play a role by making strategic demand side investments in the capacity-strengthening of relevant national and local civil society entities, farmers' organizations and other community-based organizations to help communities lead and sustain their own fight against hunger and achieve SDG 2. • Activities designed and implemented with partners towards Strategic Result 3 will include unconditional resource transfers to support access to food; asset creation and livelihood support; individual capacity-strengthening; institutional capacity strengthening; and smallholder agricultural market support. Activities towards Strategic Result 4 will include unconditional/conditional resource transfers to support access to food; climate adaptation and risk management; individual capacity-strengthening; institutional and market capacity strengthening; and asset creation and livelihood support. • As KGDRA's contributions to this Strategic Objective and the two Strategic Results will arise from its demand-side orientation, KGDRA's activities will focus on enhancing and improving demand-side aspects of food systems and addressing demandside constraints on smallholder productivity and income growth. Strategic and operational partnerships will be developed with agencies and actors with complementary capacities to boost productivity from the supply side, as captured, for instance, The vision will be achieved through the implementation of activities that fall under four complementary pillars: i) capacity development to support information systems on food and nutrition security of member countries; ii) standards, methods, and tools for information systems on food and nutrition security; iii) monitoring and in-country food security and nutrition assessments; and iv) statistics, information and analysis on food and nutrition security (global public goods). The implementation of the joint strategy will emphasize national ownership and leadership. Mechanisms for collaboration, improved communication and partnership building have also been identified. The guiding principles of the strategy highlight, among other things, the need to systematically place governments at the centre of planning and decision-making processes. High priority is placed on ensuring complementarity with the policies and practices of partners, including national governments, regional institutions, civil society and academia. • KGDRA will actively participate in and contribute to country level and regional dialogues related to SDG2-relevant goals and/or targets, including key areas of policy and programmatic linkage between SDG2 and other goals, such as education, poverty alleviation, climate change, peace and justice, health or gender. • Activities designed and implemented with partners towards Strategic Result 5 will include institutional capacity strengthening; common services and platforms; and analysis, monitoring and joint needs assessments. Activities towards Strategic Result 6 will include institutional capacity strengthening; and analysis, monitoring and joint needs assessments. • KGDRA envisions playing a limited role in working towards this Strategic Objective and its two Strategic Results where technical, organizational and institutional capacities are well developed, partnerships are in place, and policy frameworks are conducive to effective design, implementation and coordination of food security and nutrition interventions in humanitarian and development contexts.
