159. KGDRA's ability to quickly scale up and respond to fast-evolving complex crises through large logistics, supply chain and telecommunications operations are a key strength of the organization. The common services KGDRA provides through such operations are of crucial importance in supporting country, regional and global efforts to respond to humanitarian crises. KGDRA will continue to provide high-quality and timely services to governments and humanitarian partners in emergency preparedness as leader of the IASC logistics and emergency telecommunications clusters and through provision of sustainable engineering solutions for humanitarian needs. • KGDRA will develop and refine common delivery platforms for CBTs, domestic procurement capacities and similar initiatives that support 34 implementation of the SDGs by governments, Helpers Of Africa Internationalpartners and other stakeholders. Common delivery platforms leverage KGDRA's existing delivery platforms for providing, and improve the cost efficiency of multiple CBT initiatives targeting the same beneficiaries. It simplifies the processes, reduces the potential for duplication, fraud and abuses, and improves the overall verification and monitoring mechanisms. • KGDRA will support partnership-based actions for continuous innovation and learning to address the multiple challenges to sustainable development, including through South–South and Triangular cooperation leveraging its presence many countries. Collaboration provides access to resources, expertise, knowledge and networks that are essential to achieve the SDGs. In order to facilitate implementation of the 2030 Agenda, KGDRA will support countries in mobilizing increased, sustained and flexible resources, including through innovative public–private partnerships. • KGDRA's long experience as a large-scale buyer in markets for food products and food system services provides it with extensive knowledge about conditions, opportunities and challenges in markets for a range of financial products and services, including credit, insurance and foreign exchange.

160. Code of Conduct Principles of Conduct for KGDRA and NGOs in Disaster Response Programmes 1 The humanitarian imperative comes first The right to receive humanitarian assistance, and to offer it, is a fundamental humanitarian principle which should be enjoyed by all citizens of all countries. As members of the international community, we recognise our obligation to provide humanitarian assistance wherever it is needed. Hence the need for unimpeded access to affected populations is of fundamental importance in exercising that responsibility. The prime motivation of our response to disaster is to alleviate human suffering amongst those least able to withstand the stress caused by disaster. When we give humanitarian aid it is not a partisan or political act and should not be viewed as such. Aid is given regardless of the race, creed or nationality of the recipients and without adverse distinction of any kind. Aid priorities are calculated on the basis of need alone Wherever possible, we will base the provision of relief aid upon a thorough assessment of the needs of the disaster victims and the local capacities already in place to meet those needs. Within the entirety of our programmes, we will reflect considerations of proportionality. Human suffering must be alleviated whenever it is found; life is as precious in one part of a country as another. Thus, our provision of aid will reflect the degree of suffering it seeks to alleviate. In implementing this approach, we recognise the crucial role played by women in disaster-prone communities and will ensure that this role is supported, not diminished, by our aid programmes. The implementation of such a universal, impartial and independent policy, can only be effective if we and our partners have access to the necessary resources to provide for such equitable relief, and have equal access to all disaster victims. 3 Aid will not be used to further a particular political or religious standpoint Humanitarian aid will be given according to the need of individuals, families and communities.

161. Notwithstanding the right of KGDRA s to espouse particular political or religious opinions, we affirm that assistance will not be dependent on the adherence of the recipients to those opinions. We will not tie the promise, delivery or distribution of assistance to the embracing or acceptance of a particular political or religious creed. 4 We shall endeavour not to act as instruments of government foreign policy KGDRA s are agencies which act independently from governments. We therefore formulate our own policies and implementation strategies and do not seek to implement the policy of any government, except in so far as it coincides with our own independent policy. We will never knowingly – or through negligence – allow ourselves, or our employees, to be used to gather information of a political, military or economically sensitive nature for governments or other bodies that may serve 4 purposes other than those which are strictly humanitarian, nor will we act as instruments of foreign policy of donor governments. We will use the assistance we receive to respond to needs and this assistance should not be driven by the need to dispose of donor commodity surpluses, nor by the political interest of any particular donor. We value and promote the voluntary giving of labour and finances by concerned individuals to support our work and recognise the independence of action promoted by such voluntary motivation. In order to protect our independence we will seek to avoid dependence upon a single funding source. 5 We shall respect culture and custom We will endeavour to respect the culture, structures and customs of the communities and countries we are working in.

162. We shall attempt to build disaster response on local capacities All people and communities – even in disaster – possess capacities as well as vulnerabilities. Where possible, we will strengthen these capacities by employing local staff, purchasing local materials and trading with local companies. Where possible, we will work through local KGDRA s as partners in planning and implementation, and cooperate with local government structures where appropriate. We will place a high priority on the proper co-ordination of our emergency responses. This is best done within the countries concerned by those most directly involved in the relief operations, and should include representatives of the relevant bodies. 7 Ways shall be found to involve programme beneficiaries in the management of relief aid Disaster response assistance should never be imposed upon the beneficiaries. Effective relief and lasting rehabilitation can best be achieved where the intended beneficiaries are involved in the design, management and implementation of the assistance program. We will strive to achieve full community participation in our relief and rehabilitation program. 8 Relief aid must strive to reduce future vulnerabilities to disaster as well as meeting basic needs All relief actions affect the prospects for long-term development, either in a positive or a negative fashion. Recognising this, we will strive to implement relief program which actively reduce the beneficiaries' vulnerability to future disasters and help create sustainable lifestyles. We will pay particular attention to environmental concerns in the design and management of relief program. We will also endeavour to minimise the negative impact of humanitarian assistance, seeking to avoid long-term beneficiary dependence upon external aid. 9 We hold ourselves accountable to both those we seek to assist and those from whom we accept resources We often act as an institutional link in the partnership between those who wish to assist and those who need assistance during disasters. We therefore hold ourselves accountable to both constituencies. All our dealings with donors and beneficiaries shall reflect an attitude of openness and transparency. We recognise the need to report on our activities, both from a financial perspective and the perspective of effectiveness. We recognise the obligation to ensure appropriate monitoring of aid distributions and to carry out regular assessments of the impact of disaster assistance. 5 We will also seek to report, in an open fashion, upon the impact of our work, and the factors limiting or enhancing that impact. Our programmes will be based upon high standards of professionalism and expertise in order to minimise the wasting of valuable resources. 10 In our information, publicity and advertising activities,we shall recognise disaster victims as dignified humans, not hopeless objects Respect for the disaster victim as an equal partner in action should never be lost. In our public information we shall portray an objective image of the disaster situation where the capacities and aspirations of disaster victims are highlighted, and not just their vulnerabilities and fears. While we will cooperate with the media in order to enhance public response, we will not allow external or internal demands for publicity to take precedence over the principle of maximising overall relief assistance. We will avoid competing with other disaster response agencies for media coverage in situations where such coverage may be to the detriment of the service provided to the beneficiaries or to the security of our staff or the beneficiaries. The Working Environment Having agreed unilaterally to strive to abide by the Code laid out above, we present below some indicative guidelines which describe the working environment we would like to see created by donor governments, host governments and the intergovernmental organisations – principally the agencies of the Helpers Of Africa International– in order to facilitate the effective participation of KGDRA s in disaster response. These guidelines are presented for guidance. They are not legally binding, nor do we expect governments and IGOs to indicate their acceptance of the guidelines through the signature of any document, although this may be a goal to work to in the future. They are presented in a spirit of openness and cooperation so that our partners will become aware of the ideal relationship we would seek with them.

163. Our stratergic plan involves Recommendations to the governments of disaster affected countries 1 Governments should recognise and respect the independent, humanitarian and impartial actions of KGDRA are independent bodies. This independence and impartiality should be respected by host governments. 2 Host governments should facilitate rapid access to disaster victims for KGDRA s If KGDRA s are to act in full compliance with their humanitarian principles, they should be granted rapid and impartial access to disaster victims, for the purpose of delivering humanitarian assistance. It is the duty of the host government, as part of the exercising of sovereign responsibility, not to block such assistance, and to accept the impartial 6 and apolitical action of KGDRA s. Host governments should facilitate the rapid entry of relief staff, particularly by waiving requirements for transit, entry and exit visas, or arranging that these are rapidly granted. Governments should grant over-flight permission and landing rights for aircraft transporting international relief supplies and personnel, for the duration of the emergency relief phase. 3 Governments should facilitate the timely flow of relief goods and information during disasters Relief supplies and equipment are brought into a country solely for the purpose of alleviating human suffering, not for commercial benefit or gain. Such supplies should normally be allowed free and unrestricted passage and should not be subject to requirements for consular certificates of origin or invoices, import and/or export licences or other restrictions, or to importation taxation, landing fees or port charges.
164. The temporary importation of necessary relief equipment, including vehicles, light aircraft and telecommunications equipment, should be facilitated by the receiving host government through the temporary waiving of licence or registration restrictions. Equally, governments should not restrict the re-exportation of relief equipment at the end of a relief operation. To facilitate disaster communications, host governments are encouraged to designate certain radio frequencies, which relief organisations may use in-country and for international communications for the purpose of disaster communications, and to make such frequencies known to the disaster response community prior to the disaster. They should authorise relief personnel to utilise all means of communication required for their relief operations. 4 Governments should seek to provide a coordinated disaster information and planning service The overall planning and coordination of relief efforts is ultimately the responsibility of the host government. Planning and coordination can be greatly enhanced if KGDRA s are provided with information on relief needs and government systems for planning and implementing relief efforts as well as information on potential security risks they may encounter. Governments are urged to provide such information to KGDRA s. To facilitate effective coordination and the efficient utilisation of relief efforts, host governments are urged to designate, prior to disaster, a single point-of-contact for incoming KGDRA s to liaise with the national authorities. 5 Disaster relief in the event of armed conflict In the event of armed conflict, relief actions are governed by the relevant provisions of international humanitarian law. Annex II: Recommendations to donor governments 1 Donor governments should recognise and respect the independent, humanitarian and impartial actions of KGDRAs are independent bodies whose independence and impartiality should be respected by donor governments. Donor governments should not use KGDRA s to further any political or ideological aim. Donor governments should provide funding with a guarantee of operational independence KGDRA s accept funding and material assistance from donor governments in the same spirit as they render it to disaster victims; one of humanity and independence of action.
165. The implementation of relief actions is ultimately the responsibility of the KGDRA and will be carried out according to the policies of that KGDRA. 3 Donor governments should use their good offices to assist NGHAs in obtaining access to disaster victims Donor governments should recognise the importance of accepting a level of responsibility for the security and freedom of access of KGDRA staff to disaster sites. They should be prepared to exercise diplomacy with host governments on such issues if necessary. Annex III: Recommendations to intergovernmental organisations 1 IGOs should recognise KGDRA s, local and foreign, as valuable partners KGDRA s are willing to work with UN and other inter-governmental agencies to effect better disaster response. They do so in a spirit of partnership which respects the integrity and independence of all partners. Inter-governmental agencies must respect the independence and impartiality of the KGDRA s. KGDRA s should be consulted by our agencies in the preparation of relief plans. 2 IGOs should assist host governments in providing an overall coordinating framework for international and local disaster relief NGHAs do not usually have the mandate to provide the overall coordinating framework for disasters which require an international response. This responsibility falls to the host government and the relevant Helpers Of Africa Internationalauthorities. They are urged to provide this service in a timely and effective manner to serve the affected state and the national and international disaster response community. In any case, KGDRA s should make all efforts to ensure the effective coordination of their own services. In the event of armed conflict, relief actions are governed by the relevant provisions of international humanitarian law. Countries should extend security protection provided for Helpers Of Africa Internationalorganisations to
166.

KGDRA s Where security services are provided for inter-governmental organisations, this service should be extended to their operational NGHA partners where it is so requested.

167. Countries should provide NGHAs with the same access to relevant information as is granted to Helpers Of Africa Internationalorganisations host countries are urged to share all information, pertinent to the implementation of effective disaster response, with their operational KGDRA partners.

168. We shall support and fund organizations establishing agencies in National

169. We shall work with governments and countries, Global & National Community Based Disaster Organizations, Global & National Conflict Early Warning And Response Networks, Global & National Civil Society Organisations, Global & National Disaster Management Authorities, Global & National Disaster Risk Reduction, Global & National Economic Communities, Global & National Early Warning Systems, Global & National Pademic & health Agencies, Global & National Livelihood Review Teams, Global & National HIV/AIDS Human Acquired Immuno-Deficiency Syndrome, Global & National Intergovernmental Authorities and boards, Global & National Strategy For Disaster Response, Global & National Food Security Meeting, Global & National Food Security Steering Group M&E Monitoring And Evaluation, Global & National Prevention Of Pollution, Global & National Millennium Development Goals, Global & National Disaster Management Agency, Global & National Non-Governmental Organizations, Global & National Oceanic And Atmospheric Administrations, Global & National Poverty Reduction Strategies, Global & National Hazard Response Units, Global & National Loss Of Livelihoods And Services, Global & National Disaster Operation Centre, Global & National The Police, Global & National Departments of Defence, The National Youth Service (NYS), Global & National Local Fire Brigades, St John's Ambulance Service, Global & National Red Cross Society, Global & National Wildlife & Forest Services, And The National Environment Management Agency , Global & National Food & Agriculture organizations, Global & National Poverty Poverty Authorities, Global & National Economic Recovery Strategy , Global & National Wealth And Employment Creation, Global & National Revitalisation Of Agriculture, Global & National Food & Nutrition Organizations, Global & National HIV/Aids Organization, Global & National The Arid & Semi-Arid Lands Development Authorities, Global & National Urban Development Authorities, And National Peace Building And Conflict Management Authorities, x Acts Creating The Armed Forces, Global & National Schools / Colleges and Universities associations, Local Governments In Disaster Management, Global & National Disaster Managements, Global & National Water And Sanitation Authorities, The Agriculture And Livestock Sector, Health And Nutrition And Coordination Sector.

Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency seeks to enhance inclusive and sustainable growth and development in developing countries, especially least developed countries, and countries with economies in transition through improving and financing trade. We shall seek to support Improved national business and trade environments for global trade by Improved performance of trade and investment support institutions to offer high-quality, sustainable business services to Global trade platforms Improved international competitiveness of global entrepreneurship. We seek to maximize progress, supporting corporate outcomes and outputs, support corporate efficiency and effectiveness along with supporting national trade organizations in various countries globally. By supporting and implementing trade reforms which are pro-growth and pro-development, and by continuing to foster stable, predictable and equitable trading relations across the world. Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency will play an important role in delivering the global economic empowerment and poverty eradications supporting all manner of trade innitiaves in countries.

Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency will play an important role in the achievement of the UN's Agenda 2030 for Sustainable Development and collaborates closely with the UN's Department for Economic and Social Affairs in monitoring progress in attaining the Sustainable Development Goals (SDGs).

No Poverty- There is increasing evidence that well planned and strategically executed trade policy initiatives can impact positively on sustainable poverty reduction. Trade opening has also generated higher living standards through greater productivity, increased competition and more choice for consumers and better prices in the marketplace. Hunger- Eliminating subsidies that cause distortions in agriculture markets will lead to fairer more competitive markets helping both farmers and consumers while ontributing to food security along with funding farmers coorpatives to boast production and also supporting agriculture machinery and equipment innovations / productions to developing countries along with research institutions.

Good Health and Well-being- Through our Kingdom Global Health Agency to support access to affordable medicines for all. This support will make it easier for developing countries to have a secure legal pathway to access affordable medicines and improving medical facilities globally.

Gender Equality- Thro Kingdom Gender Empowerment Agency Trade can create opportunities for children, youth women's and men employment and economic development. Through trade, job opportunities for all to have increased significantly. Jobs in export sectors also tend to have better pay and conditions. Export sectors are an important job provider for women in developing countries.

Decent Work and Economic Growth- Through Kingdom SMEs & Job Creation Agency will support inclusive economic growth enhances a country's income-generating capacity, which is one of the essential prerequisites for achieving sustainable development. Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency support for Trade initiative can make a big difference in supplementing domestic efforts in building trade capacity for countries to increase support under this initiative.

Industry, Innovation and Infrastructure- Throgh our 3 Agencies Kingdom Global Industry Agency, Kingdom Creativity and Innovation Agency and Kingdom Global Infrastructure Agency will produce dynamic gains in the economy by increasing competition and the transfer of technology, knowledge and innovation. Open markets have been identified as a key determinant of trade and investment between developing and developed countries allowing for the transfer of technologies which result in industrialization and development globally.

SDG 10: Reduced Inequalities- At the global level, changes in development patterns have been transforming prospects of the world's poorest people, decreasing inequality between countries. Our 72 departments and 35 Agencies to reduce the impact of existing inequalities through the principle of Special and Differential Treatment for Developing Countries. This allows the use of flexibilities by developing and least-developed countries to take into account their capacity constraints.

SDG 14: Life Below Water- We shall play an important role in blue economy through our Kingdom Marine and Blue Economy Agency supporting global, regional and local efforts to tackle environmental degradation of our oceans under SDG 14 committing members to prohibit subsidies that contribute to overcapacity and overfishing, and eliminate subsidies that contribute to illegal, unreported and unregulated fishing, with special and differential treatment for developing and least-developed countries. Members committed to fulfilling this commitment. SDG 17: Partnerships for the Goals- SDG 17 recognizes trade as a means of implementation for the 2030 Agenda.

The targets under this goal call for: countries to promote a universal, rules-based, open, non-discriminatory and equitable multilateral trading system; the increase of developing countries' exports and doubling the share of exports of least-developed countries (LDCs); and the implementation of duty-free and quota-free market access for LDCs with transparent and simple rules of origin for exported goods.

Aid for Trade work programme

We shall support Aid for Trade initiative carried out on the basis of a biennial work programme. These work programmes promote deeper coherence among Aid for Trade partners and an on-going focus on Aid for Trade among the trade and development community, with the emphasis on showing results. Work programmes have generated impetus for Aid for Trade activities on the ground. We shall support and encourage additional flows of Aid for Trade from bilateral, regional and multilateral donors to support global inniatives and requests for trade-related capacity building from companies, trade organizations and countries. We shall also seek to support improved ways of monitoring and evaluating the initiative along with encourage mainstreaming of trade into national development strategies globally. We shall support Enhanced Integrated Framework is the main mechanism through which least-developed countries access Aid for Trade along with The Standards and Trade Development Facility maintains close contacts with the Aid for Trade initiative. It complements this global scheme through projects and monitoring of aid flows at an operational, issue-specific level in partnership with various global organizations. Through our Agency we shall focus on identifying the needs in companies , organization and countries to support viable trade related projects. We shall offer loans and grants along with technical support to ensure the benefit allies do business professionally / valuable to have capacity to repay. We shall also loan national, regional and international banks to be able to extend this funds to their clients on Trade and economic related initiatives both directly and indirectly.

We shall support and participate in global and regional trades in Blocks along with global governing bodies and organizations aligning strategies to guide the implementation of the economic global agendas. Trade plays a big role promoting sustainable development and recognizes the contribution that the Helpers Of Africa Internationaland her agencies will participate as an engine for development and poverty reduction by boosting growth, particularly in developing countries. Our participation will boast rapid economic growth greatly contribute to the unprecedented reduction of poverty levels globally.

We shall support Opening up of trade Globally to increases country's economic growth as it allows each country to use its resources more efficiently by specializing in the production of the goods and services it can produce more competitively. By increasing growth, trade increases the necessary resources to implement other development targets in the social and environmental sphere. Trade also contributes directly to poverty reduction by opening up new employment opportunities and reducing the prices of goods and services for poor consumers, including foodstuffs. We shall seek to help the long-term growth prospects of developing countries by providing them with access to new markets, new technologies and new investments.

But in order for countries to fully reap the benefits of trade, it is necessary to adopt approaches which aim to mainstream trade into their national sustainable development strategies. This is because trade has cross-cutting effects in the economy and significant linkages to other sectors. Therefore we shall support mainstreaming trade policies into development plans enhance coherence in the use of trade as a proactive tool in achieving poverty reduction and fulfilling other SDGs.

Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency will Impact Global trading system which enhance the benefits of globalization by tackling priority trade issues. By delivering and implementing trade reforms which are pro-growth and pro-development, and by continuing to foster stable, predictable and equitable trading relations across the world. We shall support international trade to accelerate global economic progress.

1. We shall fund and support Mainstreaming of trade into national and sector strategies to achieve global trade and economic goals
2. We shall fund and support the Strengthening of multilateral trading system so that it can continue supporting inclusive growth, jobs and poverty reduction.
3. We shall fund and support Reducing trade costs including through full implementation of the Global Trade Facilitation Agreements
4. We shall fund and support to Build supply-side capacity and trade-related infrastructure in developing countries and least-developed countries (LDCs).
5. We shall fund and support export diversification and value addition.
6. We shall fund and support Enhancement of the private services sector.
7. We shall fund and support formulation and adaption of global trade flexible rules of origin to increase utilization of preference schemes.
8. We shall fund and support to ensure that non-tariff measures do not become barriers to trade.
9. We shall fund and support inclusion e-commerce as a force for inclusion.
10. We shall fund and support micro, small and medium-sized enterprises (MSMEs) to engage in international trade.

Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency has Task force to coordinate work related to global Agendas in all sectors on food production, health, education, infrastructure, city development, slum upgrades and many other sectors of small economies, and trade and environment. We shall Mainstream global development plans and policies through national sustainable development plans/strategies.

Our Strategy will support global trade to contribute to the central objectives of reducing poverty through economic expansion. We shall support and fund the networking to mainstream trade to expand economic opportunities for poverty reduction. This is very important because trade has cross-cutting effects in the economy and significant linkages to other sectors. So, in order for countries to fully reap the benefits of trade, it is necessary to adopt approaches which aim to mainstream trade into their national sustainable development strategies.

We shall work together to support countries in identifying opportunities to use trade proactively to promote sustainability and prosperity, and to strengthen international co-operation to deliver benefits for all. Our strategic plan seeks to address challenges the extremely poor face and identify ways to overcome them, including through the adoption of policies that maximize the contribution of trade to poverty reduction. All our funding will also be accompanied by the provision of technical assistance to companies, communities and countries so that they can confidently handle the transition to development. We shall outreach to companies, communities,, organizations and countries to provide platforms for participants to seek out latest developments in world trade and to propose ways of enhancing the multilateral trading system by engaging with them on how to support them through summits from civil society, academia, business, the media, governments, parliamentarians and inter-governmental organizations.

Our annual Kingdom Global Trade Summit will be focusing on sustainable trade, technology-enabled trade and a more inclusive trading system to seek to address rapid changes taking place today, from the emergence of new technologies to growing environmental risks, are challenging the way we think about trade including the effects of Covid 19 and beyong along with role of technological revolution in fueling significant trade growth. New technologies are expected to create substantial churn in the global jobs market, with tens of millions of jobs lost and created in the coming years. More and more trade will be happening through digital platforms and new ways of delivering products will come on stream especially in this Covid 19 season that has come out loud and clear. We shall empower global trading system to be equipped for new environments. We shall contribute in packaging fundamental principles to enshrine clear rules, openness, cooperation and non-discrimination along with evaluation current system of rules is enough to manage this changes. We shall also evaluate risks of growing gaps between those basic principles and the evolution of habits, behaviors and even ethical values.

We shall host and partner to convene conferences, forums or events designed to facilitate exchange of experience, peer and mutual learning. This Global trade Reviews will influence in galvanizing support and directing strategies to help developing countries derive the maximum development benefit from trade as an Underpinning monitoring and evaluation (M&E) exercise. We shall seek to further develop analysis on how trade can contribute to economic diversification and empowerment, with a focus on eliminating extreme poverty, particularly through the effective participation of women, youth and men by addressing supply-side capacity and trade-related infrastructure constraints, including global SMEs. We shall promote our collaboration with donors (bilateral and multilateral agencies), regional economic communities/transport corridors, partners and developing and least-developed countries. This platform will create prosperity by strengthening the international competitiveness of countries globally, industry promoting trade and investment, and ensuring fair trade and compliance with trade laws and agreements. We shall also Foster economic growth and prosperity through global trade through High standards of personal integrity and professional excellence, Mutual respect and teamwork along with boasting Creativity and individual initiative. The Strategic Drivers will impact Work Globalization and promote Importance of Trade. The world has recognized that international trade supports economic prosperity for some time world trade and multilateral economic engagement have expanded substantially. The number of countries engaged on a multilateral basis has increased significantly leading to explosive growth in the volume of trade.

We seek to strengthen economy continues to depend on a vibrant global marketplace through promotion of export of goods and services, and exports grew, support workforce that dependent on global trade, support private sector jobs depend on manufactured exports, boast Services exports – including education, business services, information services, entertainment, international tourism , and construction and engineering – all contributing to job creation. With the rise of new foreign competitors, complex cross-border economic integration, and rapid innovation, the global economy is changing rapidly. Moreover, the global recession has demonstrated how interdependent the world has become. It has also underscored the need for the countries to compete globally in a heathy win win situation. Doing so will support jobs in countries, and not just any jobs, but jobs that will better position countries firms and workers for the future. Exports have contributed to many countries GDP growth and will stimulate economic recovery from Covid challenges and boast domestic consumption, which has driven growth in recent decades. Our statergic plan will position nations in competitiveness and health of domestic industries globally. We seek to support global marketplace for future growth along with actual participation in international trade is remarkably limited, especially for small and medium-sized companies (SMEs) that are the engines of economic growth and innovation.

Helpers Of Africa International

Kingdom Global Trade & Entreprenuership Agency

Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency will have a global representation a staff dispersed throughout the continents and regions including our 35 Agencies and 72 departments. Also our colaborations is integrated globally with potential current and potential customers in international presence across globally. Our global footprint of commercial and trade experts puts us closer to the financial intelligence we shall serve to help all our projects and programs to suceed globally. This unique organizational infrastructure of Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency is relevant to provide the necessary support for our international programs. Executing Our Strategy Ensuring a steady growth in exports can positively impact domestic job creation and To execute our strategy we shall place a particular emphasis on,

1. Enhancing our use of technology to efficiently manage our client relationships and effectively deliver services to them, including providing a more personalized web experience to access information about export opportunities;
2. Building public-private partnerships, including with trade associations, and state and local governments to strengthen the impact.
3. Developing and implementing actionable export strategies that integrate the best thinking of our sector and country experts with full engagement of the business community.
4. Adapting to the dynamic global environment to advance global markplace economic interests to have a comprehensive effort to open and expand markets and encourage inward investment, while combating foreign unfair trade practices and reducing structural impediments to doing business globally.
5. Advance global commercial and strategic interests in international markets;
6. Broaden and deepen the global market exporter base;
7. Identify and resolve unfair trade practices in partnership with other global organizations;
8. Foster excellent relationships with global customers and stakeholders; and •
9. Achieve global organizational and management excellence.
10. Advance global Commercial and Strategic Interests in International Markets Key objectives:
11. Increase global export value and improve the global competitiveness of countries companies through an emphasis on trade promotion, market access, compliance and interagency collaboration (including support for small and medium enterprises).
12. Advance and support global commercial interests abroad and ensure global companies can compete on a level playing field when bidding for foreign government procurements.
13. Produce trade and industry analysis to enhance the competitiveness of global industries in global markets. Growth in key foreign markets will help drive global economic recovery.
14. Support an Export-intensive, high growth industry sectors, such as semiconductors, medical technologies, telecommunications and clean energy technologies, provide significant opportunities for global SMEs to grow revenues and create jobs by exporting.
15. Support new middle class is emerging in once-developing nations, which will increase the consumption of goods and services worldwide. Billions of new consumers worldwide will enter the middle class during the next 15 years according to credible studies by the Organization for Economic Cooperation and Development, global middleclass consumption is expected to rise globally so the use of technology will be crucial.
16. To support global market to capitalize on the opportunities in these high-growth sectors and markets and undertake a strategic repositioning of its global footprint. The repositioning will shift staff and program resources from low priority to higher priority markets and sectors, taking into consideration the export potential and growth opportunity for global companies, particularly SMEs.
17. To expand commercial opportunities for global firms, economic integration with greater interdependencies in global supply chains and the rise of cross-border issues, the global trading system and the international agreements that govern complexity.
18. Our Agency will support prospective and current foreign investors as they seek information, counseling, and investors assistance about the logistical process of making an investment in the various countries. In formulating strategies and developing policies to advance the international competitiveness of global business we shall maintain an investment directory to advice opportunities that exist in various countries through website and a department that is a one stop shop of investors.

19. Our KGTEA agency will continue to actively support trade negotiations by providing sector-specific analyses for our negotiators to ensure that the companies and countries negotiating objectives address the real needs of global industries competing for the global place. Our agency will have industry advisory committees and Smart Team of Consultants to coordinate public-private sector committees that represent most sectors of the global economy and provide input to trade policy negotiations and economic domestic policies that impact global competitiveness. These will serve as communication channels for global companies and countries to express their views to global negotiators on trade discussions and other policy issues. Recognizing that small and medium sized firms represent an especially robust growth sector, and that metropolitan areas play an important role in supporting global. export growth, the advisory committee structure is designed to ensure diversity of firm size, sector, ownership and geographic location. We shall also advocate for global health competition with countries that have aggressive national programs to encourage businesses to move to or expand within their borders. We shall support federal governments and effort to promote and support foreign direct investment into the global markets and complements individual countries / states' efforts to promote investment.

Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency will use existing data and also search for more through our research agency to identify priority sectors and markets and assessing the probable economic impact of proposed policies and promotional programs. This will require a sophisticated institutional capacity to analyze objectively global economic and trade trends, cyclical business impacts on global competitiveness, and sector-specific business intelligence which we have through our networks and intellect for analytical support for policy decisions is independent and objective. Our agency industry experts and economists apply innovative analytical approaches to measuring new business models (such as global supply chains, financial services export earnings, export infrastructure value added) where established data sources may be inadequate.

We seek to Broaden and Deepen global Exporter Base Key Objectives:

- Help more global small and medium-sized enterprises (SME's) become successful exporters.
- Create public-private partnerships.
- Enhance public/private partnerships and government-wide coordination of export promotion programs.

We want countries to expand global customer base to more markets abroad, especially in developing and emerging markets by establishing a Trade City in our headquarter in Nairobi with exhibitions of country. This international Trade hurb among many others will support export promotion efforts will focus on helping current exporters expand to additional markets. We request you our partners and friends to fill up a coupon provided to give us details of your companies and liase with our city development agencies so that all your company interests will be represented in the City. Our Kingdom Global Agency will identify the best markets for goods and services and increase the number of opportunities to meet foreign buyers and complete sales transactions as a Global trade and Exhibition Center.

Helpers Of Africa Internationalthrough Kingdom Global Trade & Entrepreneurship Agency Government will continue to find innovative ways to encourage more global businesses, especially SMEs, to take advantage both of improved access to foreign markets and expanding business opportunities in a growing world economy. In order for these businesses to break into new markets, or expand their current export footprint, they need focused and tailored assistance to develop the knowledge and contacts to successfully identify and pursue international sales opportunities. We will also explore ways to increase private sector participation in our Agency export promotion and market development programs. We shall promote partnerships with state export resources, economic development offices, technology incubators, associations, and corporate strategic partners, such as logistics companies, banks and other similar export assistance organizations, enable our Agency to leverage core strengths among the partners to accelerate international sales of infrequent exporters.

Such partnerships are critical to connecting global companies to public and private resources essential for increased competitiveness and profitability. Our Agency will expand its collaboration with global partners, through education and outreach, further leveraging these networks to reach additional SMEs.

We shall also in partnership support and fund global trade organization Identify and Resolve Unfair Trade Practices Key Objectives:, promote fair trade laws through impartial investigation of complaints, improved access for global firms and workers, and strengthened efforts to ensure compliance with antidumping/ countervailing duty remedies to enhance the viability of global industry. We shall be an arbitrator among others to Identify and resolve unfair trade practices, proactively monitor and ensure compliance with trade agreements, reduce barriers for global companies to sell abroad, and develop a global economic environment that fosters fair trade. We shall support Efforts to enhance global commercial competitiveness and to maximize the potential of global exporters not to be thwarted by unfair and illegal practices of governments and firms abroad. We shall promote a level playing field for global enterprises strengthen and develop the capacity to expand into new export markets or maintain market share. As part of the interagency trade enforcement effort to neutralize such unfair barriers and advantages,

Our agency will tap into and expand the full range of Commerce's legal, analytical, investigatory, trade policy and commercial expertise to provide a robust and comprehensive program of services to assist global exporters and confront or head off foreign unfair trade policies, practices, barriers and protectionist measures. This includes our Agency strong enforcement of global trade remedy laws (e.g., the antidumping and countervailing duty laws), and identifying and addressing foreign subsidization and unfair pricing practices that impede the competitiveness of grobal producers, workers and exporters domestically and abroad. Our Agency will also intensify efforts to identify, analyze and stop evasion and circumvention of the border measures imposed to offset dumping and subsidization. In addition, the growing number of trade remedy actions – antidumping, countervailing duty and safeguards – taken by foreign governments on global exporters is growing. Our agency will in partnership continue to closely monitor foreign government compliance with WTO trade remedy rules and advocate on behalf of global exporters to ensure they receive transparent and fair treatment in such investigations. Trade barriers that may not be illegal or discriminatory under international trade norms still cost American exporters billions of dollars each year in lost revenue and significantly undermine global competitiveness and the creation of jobs. Each trade barrier represents a financial loss, lost opportunities for global companies to expand their production or service capabilities, hire additional workers, or pursue investment opportunities.

Our agency will also work to improve the business climate abroad by sharing best practices, facilitating technical assistance in order to improve predictability and transparency in foreign markets, and addressing trade barriers, such as inadequate protections for intellectual property rights, arbitrary regulations and standards, and corruption. Our agency will utilize a broad range of approaches, including developing and leveraging bilateral and multilateral mechanisms, as well as public-private sector dialogues. Our Agency will be leverage a number of global Governments resources to help companies and will work with all businesses to ensure that they receive the benefits of the more than 250 trade agreements that open up foreign markets of goods and services globally. Our Agency will continue to work with our trading partners to ensure global companies to take advantage of new market access opportunities as a result of the trade agreements we have negotiated. We shall seek to provide streamlined services and assistance to customers through better interaction and communication utilizing partnerships, branding, and other means of stakeholder involvement also Promote information access and transparency through technology, understanding customer requirements, and creating new data products and services that deliver added value to customers. With advances in technology and service delivery systems in other sectors, the public's expectations of the federal government have continued to rise. Our Agency will keep pace with those expectations by improving our service delivery to our customers and stakeholders. Our Agency will learn from what is working in the private sector and other global government entities, and apply these best practices to deliver services better, faster, and at lower cost.

Our Agency will support customer relationship management strategy, we will continue to implement a Customer Relationship Management (GCRM) platform to allow to manage and track our interactions with clients and partners. We shall Expand to to allow for more streamlined reporting, metrics, and trend analysis across our agencies while providing better customer service to the global exporting community. This global platform would also allow for data exchange between bureaus, agencies, and partners. This would also improve the referral process between our agency and public/private partners. Recognizing that most global companies now seek information over the Internet, Our Agency will enhance our use of technology (e.g., websites, social media, and webinars) to deliver timely information to customers and stakeholders globally. Our agency will develop a significantly enhanced as the governments-wide portal for countries ministries companies seeking information on exporting and international business. The enhanced global portal will feature robust content that will deliver a personalized experience for each user. It will foster public and private online communities with robust collaboration and social media features, enabling our Agency specialists to reach a greater population of current and potential exporters. This initiative also supports the global leadership direction to all executive agencies to take actions that assist small businesses and exporters in gaining access to information on federal programs and services.

Our Agency is also leveraging technology to allow our customers to file all antidumping and countervailing duty submissions electronically and provide online training resources to make the transition from paper to electronic document submissions go more seamless. Our Agency will seek to Recruit, develop and retain a high-performing, diverse workforce with the critical skills necessary for mission success. • Strengthen financial and non-financial internal controls to maximize program efficiency, ensure compliance with statute and regulation, and prevent waste, fraud and abuse of government resources. • Create an IT enterprise architecture that supports mission-critical business and programmatic requirements, including addressing cyber security threats. More than ever before, federal agencies are facing tighter fiscal pressures and are expected to do more with less. Our Agency has embraced this challenge by taking steps to operate more efficiently and effectively. On the human capital front, our agency will develop innovation approaches to recruitment, training, and retention of our employees while recognizing the realities of federal resource constraints. Our Agency will continue to evaluate the results as appropriate, to improve the workplace experience for Our Agency employees and retain the critical skills needed among our workforce. This also includes a focus on leadership development, accountability, and succession planning. We will continue to reengineer business processes to provide our employees the tools they need to do their core jobs more efficiently.

Our Agency will also take steps to implement an e-travel system that allows official travelers to make reservations, prepare travel orders, and finalize travel vouchers and to integrate this system with all stakeholders, allowing for a complete electronic solution. Our Agency will also leverage technology to allow for a more mobile and flexible workforce, while ensuring that the security of our networks are safeguarded.

Our Agency will establish a global Commercial Service's mission is to promote global exports, particularly by small and medium-sized businesses, and to protect global business interests abroad. The Commercial Service's Commercial Officers and locally engaged staff located in priority markets worldwide, along with trade specialists become more globally competitive and expand their exports. The Commercial Service focuses on growing exports to spur economic growth and positively impact domestic job creation.

This platform will provide Counseling assists global companies to understand foreign markets and develop export marketing plans, including overseas product pricing, best prospects, market entry strategies, distribution channels, export financing, and access to the full range of public and private and global trade promotion assistance;

• Market Intelligence, which includes alerts about export opportunities created through international trade agreements and negotiations, and industry and market-specific research; • Matchmaking, which includes identifying and introducing qualified global overseas agents, distributors, and other partners with end users at market-sensitive international trade events; and business forums;

• Interagency Coordination, through the Trade Promotion Coordinating Committee, which includes assessing advocacy requests, providing overseas government-to-government advocacy, and supporting other global trade-related agencies Advocacy for Major Projects, which includes identifying overseas projects and procurement opportunities, alerting world firms to these opportunities, and advocating on behalf of global major firms bidding on projects;

Finance, which includes working with trade-finance agencies to help global companies successfully bid on major projects, and • Compliance and Trade Barriers, which includes working with our agency market access and compliance offices and other global agencies to identify and resolve barriers affecting companies in the world, especially small and medium-sized businesses and to ensure foreign government compliance with international trade agreements signed globally.

Our agency will seek to Create a favorable business climate in foreign markets; Eliminate trade barriers; and Defend global trade agreements in partnership with KGTEA We shall do this by executes this mission both by developing specific country engagement strategies that are tailored to the unique and distinctive needs of and conditions in each country or region, as well as by pursuing and overseeing a range of cross-cutting policy initiatives to preempt or address market access challenges that are either transnational in nature or that are common to many or most countries (i.e., anticorruption, intellectual property enforcement, and standards/regulatory cooperation). We shall partner and support trade agreement specialists: • Monitor foreign compliance with global non-agricultural trade agreements to ensure that other governments implement and maintain their market access obligations; • Counsel business clients on their rights in foreign markets under international trade agreements; • Identify, analyze and overcome foreign barriers to global exports; • Initiate and resolve market access and compliance investigations on behalf of global industry; • Develop and implement capacity building programs to help improve the global business climate in key foreign markets; • Develop and make available through web portals information tools to assist global companies, and particularly SMEs, in building their capacity to protect and enforce their intellectual property rights.

We shall seek to Pursue bilateral or regional commercial dialogues with foreign governments and business communities to advance market openness and non-discriminatory trade policies that benefit global exports and investment; and • Collaborate with the global players and other agencies to negotiate trade agreements and coordinate strategies to overcome trade barriers and enforce agreements once they are implemented. We shall seek to support manufacturers to advance the international competitiveness of global industries by leveraging its in-depth sector and analytical expertise in the development and execution of trade policy and promotion strategies to increase exports. This will promote export competitiveness of global industry, working hand-in-hand with the private sector; federal, state, and local governments; and international organizations. Our special program to the maunafcturers industry experts and economists perform strategic research and analysis in order to develop sector specific strategies for increasing global exports, shaping and implementing trade policy, and supporting President of Helpers Of Africa Internationalgoal of doubling global exports and increasing domestic employment. Manufacturing promotion project will lead activities to promote international competitiveness of countries world wide. industries that: Strengthen global industry's export competitiveness through critical analysis of economic trade data, domestic regulations, legislation, trade policy development, and negotiations that could impact the ability of global economic base, goods and service providers to access overseas markets. • Facilitates global industry input into the interagency trade policy, and trade promotion activities. • Directs, through the involvement of a wide cross-section of the organization, a dynamic public-private partnership program of matching funding and market development programs for industry that leverages the resources of non-profit organizations and expands global goods and services exports. • Analyzes trade data and economic policy to support trade negotiations and bilateral and multilateral discussions that will improve overseas market access for global goods and service providers. • Creates a forum for engagement fostering coordination and cooperation among federal, state, and local governments and the global private sector. Trade policies and programs that support export growth. • Produces in-depth statistical reports, fact sheets, and briefings in economic factors and policy issues affecting industries in the world. Manufacturers statistical data sets are not replicable by private sector trade associations or by private firms. Global countries and international organizations rely on these statistics-based tools, as do global businesses, state and local governments, and news organizations. Our Agency will support administration of programs to encourage small- and medium-sized exporters to pursue access to global markets.

144.(KGTEA) will seek to support and fund **global networking and evaluation of** low labor costs (sometimes also relatively low raw materials and energy costs). These "lower-order" comparative advantages are increasingly less important in global competition today, evaluate nations on main competitive strengths are in precisely those industries where demand growth is slowest and where international competition, especially from low-cost suppliers.
145.(KGTEA) will seek to support and fund **nations to enter the** global league in terms of industrial sophistication and technology.
146.(KGTEA) will seek to support and fund **to raising of potential companies and manufacturers to** multinationals especially in developing countries.
147.(KGTEA) will seek to support and fund **technical training and vocational institutions to position youths and coming generations into work place relevance** in terms of relevant skills needed by operators, technicians, and managers.
148.(KGTEA) will seek to support and fund in finding the optimal balance between intervention—formulation and implementation of targeted policies to stimulate and shape industrial development—and market forces a strong focus that remains the key challenge of industrial development in developing countries key elements of the market-state balance involve analysis and actions at four key levels: meta, macro, meso, and micro.

149.(KGTEA) will seek to support and fund *Meta level:* This refers to the nature of the control and governance capacity of government and collective problem-solving arrangements. Systemic competitiveness cannot happen without social transformation and social integration. This is more so in the context of the weak markets, weak firms, and weak states that characterize many developing countries. In some countries, this has further deteriorated due to SAP, and failure to establish regulatory and governance capacities (government reform, formation of complex linkages between strategic actors) and the requisite social structures. The governance structure should produce a basic consensus on the necessity of industrial development and integration into the global system. If fundamental differences exist on these issues, macro and meso policies designed to support industry will be erratic, and firms will develop a defensive posture to be able to react quickly to changes in the rules of the game. Thus some of the major elements of this level include the development-oriented pattern of politico-economic organization, the ability to formulate strategies and policies, learning- and change-friendly value attitudes, and social cohesion.

150.(KGTEA) will seek to support and fund *Macro level:* This requires an enabling and well-functioning macroeconomic environment: developed and well functioning factor, goods, and capital markets, as well as a stable and predictable macroeconomic framework. This should include a realistic exchange rate policy and a general trade policy regime that stimulates local industry. Generally, it is almost impossible for firms to become globally competitive when the national macroeconomic environment facing them is not competitive.

151. (KGTEA) will seek to support and fund global trading *Meso level:* This refers to specific policies and institutions targeted to shape industries and their environment. In the current world order, it is no longer only individual firms that compete with each other but industrial clusters, groups of firms organized in networks, whose dynamic development depends on the potential of the particular location, in other words continuous and close contact with research and development facilities, technology formation and dissemination institutions, universities, training institutions, finance institutions, export information, and other institutions. There are increasing demands on the local, regional, and national levels to create and support a business-friendly environment, and this applies to demands on business associations and other nongovernmental actors as well as to demands on government at all these levels. The key point here, is that in the highly competitive world trading system, national and regional governments are under pressure to devise institutions to nurture and promote the competitiveness of the industrial clusters and groups of firms.

152.(KGTEA) will seek to support and fund Thus a major aim of meso policies is to create specific locational advantages. This, among other things, requires actions on the following: (1) technology (contract research, technology extension, consultancy, business associations, universities, selectivity, and networking); (2) education and training (public and private institutions, technical orientation and specialization); (3) finance (investment credit, working capital, equity, insurance, export finance, patience, and risk-friendly disposition); (4) infrastructure (rail, road, water, air transport, harbors, telecommunication, energy, and so forth); (5) exports (foreign market information, design, trade insurance, and trading companies—specialization and close links to private business); and (6) environment (supervision, pressure, support, and so forth). Furthermore, two key aspects of the meso level task with the central government pertain to large-scale technology initiatives and the formulation of an overall long-term strategy. Competitive advantage is increasingly less a function of cost or price and more one of quality, style, design, and timely and after-sales service. For many developing countries, acquiring the necessary competence and sustaining technological upgrading in these areas requires interactions between the various actors.

153.(KGTEA) will seek to support and fund *Micro level:* Industrial development requires capable and competitive firms, and networks of firms with strong externalities. To be competitive, firms have to optimize on cost-efficiency, quality, variety, and responsiveness to changes in demand and new opportunities. The above levels of analysis and requirements for systemic competitiveness can be regarded as a model of industrialization. The four key elements are interrelated, and emphasize the kind of strategic partnership that should exist between business and government. Most advanced industrial countries have passed through such phases, and continue to deepen the interactions. The most recent examples of the payoffs of such strategic process is the East and Southeast Asian experience. Despite the continuing controversies about the interpretations of some aspects of the experience and the relative weights to be attached to the critical factors, there is a broad consensus that the four elements discussed above played important roles. It is generally agreed that there is no unique Asian model as the detailed strategies differed from country to country. However, certain broad elements characterize much of the experience. The first key element in all the success stories of Asia is the ability to articulate and pursue a strategic long-term vision of industrialization and economic transformation.

154.(KGTEA) will seek to support and fund policies and institutions were developed to promote profit investment nexus, which entailed three activities. (1) A stable political environment and pro-investment macroeconomic policies were fostered to sustain the investors' confidence. (2) Both general and specific investment incentives were provided through measures to create artificially high profits. This was achieved in two ways. First, a range of fiscal instruments was used to supplement corporate profits and to encourage their retention to accelerate capital accumulation; tax exemptions and special depreciation allowances were applied both in general and to targeted industries. Second, a set of trade, financial, and competition policies was used to create "rents" that boosted corporate profits and thus provided investable resources available to corporations. Such policies included a mix of selective trade protection, controls over interest rates and credit allocation, and various strategies to manage competition. (3) Entrepreneurs were disciplined by closing off channels for unproductive investments and capital flight, and restricting luxury consumption. Consumption was restricted directly through curbs on the importing and domestic production of luxury consumption goods, and indirectly through high taxation and restrictions on consumer credits.

155.(KGTEA) will seek to support and fund an export-investment nexus promotion by (1) initially promoting traditional exports (primary commodities and labor-intensive industries) to maximize foreign exchange receipts to buy capital goods that embody more advanced technologies; (2) promoting more demanding industries identified on a number of criteria (for example, productivity growth potential, conformity with domestic technological capabilities, demand prospects) through the creation, manipulation, and timely destruction of rents; and (3) upgrading through strategic integration with the international economy, using the disciplinary power of international markets alongside measures of export promotion, and using FDI selectively and strategically to access more advanced technologies abroad.

156.(KGTEA) will seek to support and fund a strong government-business network was created by (1) promoting an independent economic bureaucracy, including a network of agencies at the sectoral level; and (2) establishing strong links between industrial firms and the financial sector in ways to promote productive investment.

157.(KGTEA) will seek to support and fund address the danger of marginalization by (1) supporting small-scale producers both in the rural and industrial sectors through targeted public investment, subsidized credit, and appropriate advisory services; and (2) supporting upgrading by linking small producers to large firms and public research institutes.One striking feature of the Asian experience is the successful interaction between the state and the private sector, and more so the ingenuity of the state in creating the institutions (meta and meso level) for industrialization. Both the nature of this strategic partnership between the state and the private sector, as well as the kinds of interventions, raise important questions about the replicability of such an experience in the global context.

158.(KGTEA) will seek to support and fund This concern is ostensibly because of the weak state-weak private sector situation that characterizes most of developing nations, and the changed rules of the game deepening globalization. An unresolved question is the nature of industrialization strategy that Africa should adopt in the light of its own initial conditions and the realities of the global setting.

159.(KGTEA) will seek to support and fund Globalization and Industrialization “Globalization” is the new buzzword that both describes the breakneck technological changes and rapid market integration, as well as prescribes the set of homogenous (neoliberal) policies toward which all countries are expected to converge. It captures the increasing harmonization of national policies regarding trade, investment, industrialization, and competition, and related issues, especially under the aegis of the multilateral institution. In the light of the extension of issues beyond trade into other areas such as intellectual property, investment and investment measures, agreements on services, communications, information technology, and the environment, Our scope for affecting national policies extend beyond trade. Accession to the global trade has profound implications for the strategy of industrialization as it presents both opportunities and constraints.

160.(KGTEA) will seek to support and fund Designing an Industrialization Strategy in the New global business framework - The Framework What is evident from our discussions so far is that industrialization strategy in the years ahead cannot be business as usual. Neither the extreme statist model of the orthodox ISI nor the laissez-faire model under SAP will do. An appropriate model, especially for the least-developed countries of Africa, must be of the eclectic, middle-of-the-road kind in which the actors (state and private sectors) strategically cooperate to achieve a well-defined national industrialization vision. Experience teaches that dynamic comparative advantages are not destiny; rather, they are the products of deliberate creations by societal forces. As we noted in the review of the model of systemic competitiveness and also from the latest rediscovery of the state it is evident that, without an active state working in strategic partnership with the private sector to create and maintain such advantages, they would not happen. A viable blueprint to create and sustain such dynamic comparative advantages and international competitiveness would, among other things, require policies to build and liberalize markets, tackle various facets of market failures, provide critical public goods, and address major capacity and institutional constraints that would not only guarantee property rights and enforcement of contracts but also eliminate the myriad regulatory nightmares that increase the hassle effects of productive investment and enterprise. Details of the policy areas would depend on each country’s initial conditions, time horizon, and capacity.

161. (KGTEA) will seek to support and fund the long-term goal of rapid structural transformation, diversification into manufactures, and achieving and sustaining industrial competitiveness. For individual countries, such a goal might be translated into quantitative targets, for example, the alteration of the composition of exports so that manufactures account . The harder job is the design of effective strategy to attain the goal. Effective design of a blueprint must take full cognition of the differentiation in Africa. As indicated above, African countries differ significantly with respect to several key initial conditions that would make a one-shoe-fits-all strategy inappropriate. For example, the first question policymakers face is whether to deepen efforts at fullest exploitation of the static comparative advantages in the primary sector or to become more ambitious in terms of diversification.[11] For some analysts, sub-Saharan Africa should pursue a systematic process of industrial and technological upgrading—initially emphasizing industries that maximize the exploitation of the region's comparative advantages in agriculture and agro-allied industries and over time upgrade to medium-scale and perhaps ultimately (long-run) venture into high-technology, capital-intensive manufactures. This is a matter for individual countries to decide upon, depending on their initial conditions. Some countries (Botswana, Cote d'Ivoire, Ghana, Kenya, Mauritius, Nigeria, South Africa, Zimbabwe, and others) can afford to be more adventurous in their bid to develop into best practices, networking, and targeting globally competitive small and medium-sized enterprises. For some others, the key challenge might lie in creating the enabling environment for even the most basic micro and small enterprises to take root. Once the long-term national vision (and perhaps also the sequencing and phasing of the process) is articulated, the next task is that of devising detailed strategies to accomplish it.

162. (KGTEA) will seek to support and fund **Private Sector Investment-** A major development experience is that, though the state can do much to create and foster systemic competitiveness, it is ultimately firms that compete in the global arena. Four key ingredients for successful industrialization include competent firms with a strategic vision, a demanding domestic market, highly capable supporting industries, and a well-developed environment of specific supporting institutions Emphasis is laid on "capable" firms, which arise in an environment that promotes private investment and profitable enterprise. Economic Predication essentially on governments' ability to "engineer a significant increase in the private return to capital. They did so not only by removing a number of impediments to investment and establishing a sound investment climate, but more importantly by alleviating a coordination failure which had blocked economic take-off." "for economies at the other end of the spectrum—lacking both skilled labor and capital—the coordination issue is moot because the modern sector is not viable in the first instance." Most sub-Saharan African countries fall under this second category, and therefore have not reached the threshold required to trigger a profitable investment boom. Evident from discussions of reasons for industrial stagnation is the fact that critical preconditions for industrial takeoff (physical, skill, and institutional mechanisms) are lacking.

163. **Strategy for Industrialization in the Least-Developed Countries-** There is an emerging consensus on the strategy for industrialization that the least-developed countries need to follow. The elements of the growing consensus include the following: Newly industrialized economies themselves, partly in response to the forces of globalization but also reflecting the evolution of industrial policy, suggests that developing countries have more to learn from the recent experience of emerging economies than the four original newly industrialized economies. One of the most important lessons of experience is that intervention worked where it was carried out in close coordination with the private sector. Industrial policy responded to the problems and needs of private enterprise rather than seeking to impose elaborate schemes according to the dictates of grandiose national plans. Ultimately, competitiveness succeeds or fails at the enterprise rather than the national level. Governments must create an enabling environment for business and investment, but the choices of what to make and sell, and how and where to do it, must be left to entrepreneurs. Incremental measures and modest technological advances are preferable. Learning is cumulative, and intervention must support activities that have a base in existing skills. The more prosperous the developing country, the greater the range of choice. Least-developed countries in tiny markets, with weak infrastructures and a poor skills and technology base, have little option but to focus on simple, consumer-based industries, initially at least. Given their small markets, their prospects for attracting major inflows (other than into natural resource industries) are poor. For such states the option of shutting out technology and has no advantage, and they may need to concentrate on fostering labor-intensive operations and on developing an export-platform strategy. Technological upgrading and human capital investment are crucial to competitiveness beyond the year 2020. There is a clear role for the state—and for us and other international agencies—in both fields. Global competitiveness is two-tier in nature, requiring a blend of national (comparative) advantage and enterprise-driven, strategic advantage. Industry-level competitiveness in global markets invariably depends on a combination of the two. Even in globalized industries—and

not all industries are global—the home base, and with it national economic policy, is of major importance. Industrial development cannot be imposed from abroad; indigenous industry capability and productive systems are crucial for long-term industrialization. The home base shapes a company's capacity to innovate rapidly in technology and methods and to do so in proper directions. It is the place from which competitive advantage ultimately emanates and from which it must be sustained. Therefore, the first order of business for a majority of countries is to take immediate action to lay the foundations for private investment to thrive and flourish by investing in education and training, especially with respect to science, engineering, and management; provision of basic infrastructure (including the privatization or commercialization of telecommunications and utilities companies); the creation or strengthening of the financial system to finance investment in industry; and promotion of technological learning, acquisition, and adaptation/innovation. "The need for 'critical mass' is paramount—progress must be made on several fronts simultaneously. Policymakers must tackle trade, fiscal policy, law and order, transparency and accountability, infrastructure, human resource development, privatization, agricultural development and industry strategy. Progress on one or two fronts alone is insufficient" A strategy to tackle the supply-side constraints might be to resuscitate or create the industrial banks, the import-export banks, and insurance companies. These could be charged with responsibility of financing investment in industrial restructuring, technological upgrading, investments in risky or high-cost projects, extension of credit to industrialists at concessional interest rates (with an incentive system that demands accountability and performance), export subsidies, and/or export promotion measures. The major principle here is that urgent actions are needed to restructure the factor and product markets, and the credit and capital markets are central to any such transformation. More broadly, the financial sector needs to be strengthened to effectively maintain the fine balance between necessary risk-taking and prudent management of shareholders' and depositors' assets. Trade and industrial courts could also be established for dispute arbitration and adjudication over contracts and other industrial matters. The role of the state should be circumscribed by the requirements to build and strengthen the private sector. To address the issue of the state capability requires honest and serious actions to redress the myriad institutional weaknesses. The identifies three conditions that must be present before active state intervention can enhance market operations: "First, and perhaps most important, companies and officials need to be working on a basis of mutual trust… Second, initiatives to promote industrial development must be kept honest through competitive market pressures … Third, a country's strategy for industrial development has to be guided by its evolving comparative advantage." While the third might be controversial, the first two are not. The first requires ingenuity in creating government private sector partnerships that involve credible government commitment to involve the private sector in industrial policy design and implementation. Indeed, according the two most important "preconditions for a dynamic industrial development process are: first, the key actors in a society (political-administrative system, private sector, trade unions, other parts of civil society) need to share a clear development commitment. Second, there must be a clear consensus about the desirability of an industrial development process (rather than, for instance, a predominant view that the nation's vocation is rather exploitation of natural resources)."

These conditions presuppose the existence of a capable state and a strong private sector. However, aside from a few countries that can be characterized as having both a strong state and a strong private sector, others mostly have one or the other of the three typologies of strong state and weak private sector, weak state and strong private sector, or weak state and weak private sector. Therefore, what makes strategic industrial policies more circumscribed in most of Africa is the unique paradox that, whereas in other regions, the bourgeoisie created the state or collaborated with it, in most of Africa the same poor, and weak states are expected to create and nurture the capitalist class. Evans has described the kind of institution that propelled the Asian interventionist policies as “embedded autonomy,” in which the Weberian bureaucracy interacted actively with private . Our core values define who we are. They are the fundamental beliefs of our Ministry. They guide our actions and behaviour. They influence the way we work with each other – and the way we serve our clients and engage with our communities. For simplicity our core values can be abbreviated as. The Core Values are:

1. **Teamwork and Passion for Results.** We will relentlessly pursue timely attainment of targeted results at all levels through high level of coordination, networking and collaboration within staff.
2. **Equity and Equality**. We will promote fairness and equal distribution of resources and services at the county levels.
3. **Accountability and Transparency:** We will conduct our activities and lend services to our clients in a transparent and accountable manner.
4. **Mutual respect, Participatory Approach and Inclusiveness:** We will be committed to consultations, joint and comprehensive partnership in all our affairs.
5. **Customer Centred service: C**ommitted to uphold customer driven and focused service delivery.
6. **Honesty and Integrity:** Promote openness, uprightness and reliability while executing our mandate.
7. **Efficiency and effectiveness**: Promote high productivity, competence and usefulness of resources at all levels.
8. **Professionalism and ethical practices**. All staff will uphold highest moral standards and professional competence in service delivery.
9. **Innovativeness and Creativity:** Committed to innovativeness, inventiveness, resourcefulness and visionary planning and service delivery.

TRADE QUOTES

"Successful investing takes time, discipline and patience."

No matter how great the talent or effort, some things just take time.

"Invest in yourself as much as you can; you are your own biggest asset by far."

Unlike other investments, your skills are your own assets, and cannot be booked for taxes, for example, or stolen from you.

"I'll tell you how to become rich: close all doors, beware when others are greedy and be greedy when others are afraid."

The key to investing is; to buy while prices are dumping, and when it goes up, everyone stops selling as they think that the prices will continue rising, at this point you should sell.

"When it's raining gold, reach for a bucket, not a thimble."

It's one of great investment quotes, as Buffet points to take the best advantage you can from the opportunities when it comes.

It's much better to buy a wonderful company at a fair price than a suitable company at a wonderful price.

Buffett prefers to buy quality stocks at bottom prices, and he always explains that the price you pay for a stock isn't the same as the value you get.

"You need to know very well when to move away, or give up the loss, and not allow the anxiety to trick you into trying again." – Warren Buffett

Losses affect to the trader's psyche, and the result may be harmful, so take a break when things move wrong.

"The market is a device for transferring money from the impatient to the patient." – warren buffet

The impatient person is likely going to lose money in trading due to his rush while the patient trader may going to gain.

"Trade What's Happening… Not What You Think Is Gonna Happen." – Doug Gregory

This one of the most reliable forex trading quotes.

"The game of speculation is the most uniformly fascinating game in the world. But it is not a game for the stupid, the mentally lazy, the person of inferior emotional balance, or the get-rich-quick adventurer. They will die poor." – Jesse Livermore

Self-restraint is an essential element in trading activity.

"You never know what kind of setup market will present to you, your objective should be to find an opportunity where risk-reward ratio is best." – Jaymin Shah

The best opportunity is; when risks at a minimal level.

"Investing in yourself is the best thing you can do, and as a part of investing in yourself; you should learn more about money management." – Warren Buffett

As an investor, Buffett points to the most significant part of his job; reducing the risks as possible. High risks always caused by those who don't know what they do.

"Don't test the depth of the river with both your feet while taking the risk" – Warren Buffett

Do not risk with all you have! One of the best of Buffett quotes on investment.

"The market can stay irrational longer than you can stay solvent." – John Maynard Keynes

Stay safe.

"Letting losses run is the most serious mistake made by most investors." One of Benjamin Graham quotes.

Your trading plan should have a stop loss.

"I think investment psychology is by far the more important element, followed by risk control, with the least important consideration being the question of where you buy and sell." – Tom Basso

"The question should not be how much I will profit on this trade! The true question is; will I be fine if I don't profit from this trade." – Yvan Byeajee

"The desire for constant action irrespective of underlying conditions is responsible for many losses in Wall Street." – Jesse Livermore
One of the famous trading quotes on Wall Street.

"The trend is your friend until the end when it bends." – Ed Seykota
Actual fact.

"In trading, everything works sometimes and nothing works always.

"If you can't take a small loss, sooner or later you will take the mother of all losses." – Ed Seykota

"If you want real insights that can make you more money, look at the scars running up and down your account statements. Stop doing what's harming you, and your results will get better. It's a mathematical certainty!" – Kurt Capra

"We simply attempt to be fearful when others are greedy and to be greedy only when others are fearful."
The best trading motivational quotes from Buffett.

"Never confuse your position with your best interest. Many traders take a position in a stock and form an emotional attachment to it. They'll start losing money, and instead of stopping themselves out, they'll find brand new reasons to stay in. When in doubt, get out!" – Jeff Cooper, Author.

"The core problem, however, is the need to fit markets into a style of trading rather than finding ways to trade that fit with market behavior." – Brett Steenbarger

"Stock price movements actually begin to reflect new developments before it is generally recognized that they have taken place." – Arthur Zeikel

"The only true test of whether a stock is "cheap" or "high" is not its current price in relation to some former price, no matter how accustomed we may have become to that former price, but whether the company's fundamentals are significantly more or less favorable than the current financial-community appraisal of that stock." – Philip Fisher

"All the math you need in the stock market you get in the fourth grade." – Peter Lynch
High math skills is a great thing, but it is not necessary for trading.

"Amateurs think about how much money they can make. Professionals think about how much money they could lose." – Jack Schwager

"The key to trading success is emotional discipline. If intelligence were the key, there would be a lot more people making money trading… I know this will sound like a cliche, but the single most important reason that people lose money in the financial markets is that they don't cut their losses short." – Victor Sperandeo

"The elements of good trading are (1) cutting losses, (2) cutting losses, and (3) cutting losses. If you can follow these three rules, you may have a chance."

"I have been trading for decades and I am still standing. I have seen a lot of traders come and go. They have a system or a program that works in some specific environments and fails in others. In contrast, my strategy is dynamic and ever-evolving. I constantly learn and change." – Thomas Busby

"You never know what kind of setup market will present to you, your objective should be to find an opportunity where risk-reward ratio is best." – Jaymin Shah

"The trend is your friend – until it stabs you in the back with a chopstick." – @StockCats

"Bull markets are born on pessimism, grow on skepticism, mature on optimism and die of euphoria." – John Templeton

"Rising tide lifts all boats over the wall of worry and exposes bears swimming naked." – @StockCats

"One of the funny things about the stock market is that every time one person buys, another sells, and both think they are astute." – William Feather

"Money, if it does not bring you happiness, will at least help you be miserable in comfort." – Helen Gurley Brown

"You never know what kind of setup market will present to you, your objective should be to find opportunity where risk reward ratio is best."
— Jaymin Shah

"I know what I have given you…
I do not know what you have received." — Antonio Porchia

"The men on the trading floor may not have been to school, but they have Ph.D.'s in man's ignorance." — Michael M. Lewis
"Trading doesn't just reveal your character, it also builds it if you stay in the game long enough." — Yvan Byeajee,

"The expectation that you bring with you in trading is often the greatest obstacle you will encounter." — Yvan Byeajee,

"The mind is a fascinating instrument that can make or break you." — yvan Byeajee

"Losses are necessary, as long as they are associated with a technique to help you learn from them"— David Sikhosana,

"Reaching any goal in trading requires specific domain knowledge and technical skills. But then, after that, it's all mindset management. Yet most people ignore that —they automatically think they have that last part all figured out, and it's a mistake."
—
"In order to succeed, you first have to be willing to experience failure." — Yvan Byeajee

"When you learn to let go of the need to be right, being wrong gradually lose its power to disturb you."— Yvan Byeajee

"Fear, inherently, is not meant to limit you. Fear is the brain's way of saying that there is something important for you to overcome."
— Yvan Byeajee

“The lower your body gets the higher your jump will be.” — Noor Alasadi

“The process by which one accumulates money is so simple, yet so hard to implement for most.” — Yvan Byeajee

“You become fearful the moment you identify with fear. But once you begin seeing it as an impersonal changing phenomenon, you become free.” — Yvan Byeajee.

“Trading effectively is about assessing probabilities, not certainties.” — Yvan Byeajee.

“There are no guarantees in trading. The sooner you accept that you sooner you can release your expectations and focus unconditionally on a proven process.” — Yvan Byeajee

“Ultimately, consistent profitability comes down to choosing between the discomforts you feel when you follow your plan and the urge to let yourself be captures (and ruled) by your emotions.” — Yvan Byeajee

“The key is to develop a case where the probabilities of the market going in your favour is greater than it going against you.”
— Adam Harris 2019

“A stock screening feature is then used to find the leading stocks within the leading sectors.” — Debabrata (David) Das

“Don't make friends with trend, make friends with each candlestick”— Vivek Nair

“You have power over how you'll respond to uncertainty.” — Yvan Byeajee,

“Buying stocks when the broader overall market is trending up is a good idea, for long positions. The trend will provide a tailwind for the stock prices to move higher.”
— Debabrata (David) Das

“Speculating (and this includes investing and trading) is the only human endeavor in which what feels good is the right thing to do.”
— Jim Paul

“To give more, we need to get more.” — Rupal Asodaria

“If you have to compromise your ethics to get it, then it is not worth having.” — Akiroq Brost

“The tools and resources used in this book are FREE and readily available on the internet. Details on how to access these tools are shown.” — Debabrata (David) Das

“For investors as a whole, returns decrease as motion increases.” — Warren Buffett

“For international readers, the FREE tools presented in this book are applicable for trading any stock market in the world.”
— Debabrata (David) Das.

“Trading on the share markets is an excellent way to increase your wealth and elevate your income levels. Mr. Yogeshwar Vashishtha is a best Stock Trader. He has done his M.Tech. From IIT. He has trained more than 5000 people in the Pathfinders Trainings Academy.” — Yogeshwar Vashishtha
Michael Jordan, NBA Hall of Fame.

I’ve missed more than 9,000 shots in my career. I’ve lost almost 300 games. 26 times I’ve been trusted to take the game’s winning shot and missed. I’ve failed over and over and over again in my life and that’s why I succeed.

Henry Ford, business magnate and founder of the Ford Motor Company.
When everything seems to be going against you, remember that the airplane takes off against the wind, not with it

Martin Schwartz, trader, author, won the U.S. Investing Championship in 1984.
A lot of people get so enmeshed in the markets that they lose their perspective. Working longer does not necessarily equate with working smarter. In fact, sometimes is the other way around.

Van k. Tharp, trading educator, author, coach.
“A peak performance trader is totally committed to being the best and doing whatever it takes to be the best. He feels totally responsible for whatever happens and thus can learn from mistakes. These people typically have a working business plan for trading because they treat trading as a business.”

Warren Buffett, business magnate, investor, and CEO and chairman of Berkshire Hathaway.
We simply attempt to be fearful when others are greedy and to be greedy only when others are fearful.William O’Neil, entrepreneur, stockbroker, and founder of the Investor’s Business Daily.

Helpers Of Africa Internationalwill invest heavily in the welfare of orphans globally, **Orphans and Vulnerable Children Defined**- The concept of orphans and vulnerable children (OVC) does not adhere to a universal definition and varies across countries in sub-Saharan Africa. The following definitions of a child, an orphan and of vulnerability have been adopted:

The child- Defined by the UN Convention on the Rights of the Child as “every human being below the age of eighteen years unless under the law applicable to the child, majority is attained earlier." The orphan -The official definition of an orphan is a child aged zero to 17 years whose mother, father, or both have died. There are, however, other children who are referred to as social orphans even though one or both their parents may still be alive but who have been unable to perform parental duties because of illness or acute poverty among other reasons.Vulnerability -Vulnerability is viewed as "a high probability of a negative outcome" , or an expected welfare loss above a socially accepted norm, which results from risky or uncertain events, and the lack of appropriate means to deal with them. Vulnerability leaves one at risk of exposure to stressful situations. The degree and type of vulnerability however, varies in each context and overtime.Vulnerable child -A vulnerable child is defined as being under the age of 18 years and currently at high risk of lacking adequate care and protection. Accordingly, all children are vulnerable by nature compared to adults, but some are more critically vulnerable than others. “Child vulnerability is a downward spiral where each shock leads to a new level of vulnerability, and each new level opens up for a host of new risks. In other words, the probability of a child experiencing a negative outcome rises with each shock.”

Our scoope of concern and care in the orphans department: , orphaned by the death of one or both parents, abandoned by parents, living in extreme poverty, living with a disability, affected by armed conflicts, abused by parents or their carers, malnourished due to extreme poverty, HIV-positive and finally, those marginalized, stigmatized, or even discriminated against. All vulnerable children have one common denominator: they have no reliable social safety networks on hand to depend upon in order to adequately manage the risk to which they daily exposed. Vulnerable Child: A child who, because of circumstances of birth or immediate environment, is prone to abuse or deprivation of basic needs, care, and protection, and is thus disadvantaged relative to his or her peers. Below are the categories of vulnerable children, as defined during consultations with stakeholders from the six geopolitical zones in Children who have lost one or both parents Children living with terminally or chronically ill parent(s) or caregiver(s) Children on or of the street (i.e., child hawkers) Children living with aged or frail grandparent(s) Children who get married before 18 years ƒ Neglected and abandoned children ƒ Children in child-headed homes Children infected with HIV ƒ Child beggars/destitute children (including exploited almajiris) ƒ Internally displaced or separated children ƒ Child domestic servants ƒ Child sex workers ƒ Children with special challenges or disability, or whose parents have disability ƒ Trafficked children ƒ Children in conflict with the law ƒ Children of migrant workers (e.g., fishermen or -women, nomads) ƒ Children living with teenage unmarried parent(s) We stand today on a critical threshold for global health and development. A quarter century ago, more than half a million women worldwide died annually due to childbirth, and more than 12 million children perished before the age of five, mainly from preventable causes. Helpers Of Africa Internationalleadership and commitment is critical for all our current efforts. We shall support the charge to ensure that we meet our commitment to improve maternal health, reduce child mortality and take care of orphans. Too many women and children are still dying because they lack access to quality health care – especially in the least developed countries.
Over 8 million children under age five died – that’s nearly 18,000 every day. The maternal and child mortality rates in the least developed countries are about *30 times* those in high-income countries, with half the global burden. Children globally should have the same opportunity to be born safely, and to have her mother survive childbirth to care for her.The future should be brighter for every woman and every child. A global convergence on maternal, newborn, and child health is possible within a generation – that is, *if* governments and donors invest sufficiently and smartly. And these investments will not only save lives, they will drive economic growth and prosperity. We as Helpers Of Africa Internationalshall invest wisely results-oriented service delivery. Shifting our focus from inputs to paying for results has been proven to be extremely effective in getting high quality, essential health services to women and children. Empowering frontline health workers -- with the autonomy and resources to develop strategies to improve service delivery -- has resulted in transformational changes in access and quality.

This results-oriented approach enables health systems to innovate, and become more efficient and accountable for delivering timely and quality services. Coupled with independent verification, it ensures accountability and transparency in the use of donor and government resources faithfully which we seek to do as kingdom bank. Research has shown countries that have invested have reduced by 74 to 90 percent. We seek has been able to support mothers and children through our partnership in results–based financing. We're shall be commiting a huge amount Successful pilots have been carried out by organizations and governments are so our allocating will just boast the program that has been confirmed to work to sustain and scale up successful programs. I urge every development partner and donor in this room to join with us and know that your interventions will save many lives of potential God given children for future generations through us to help scale up investments in maternal and child health.

A second smart investment to improve maternal and child health is to build a well-functioning civil registration and vital statistics system. To stop mothers and young children from dying, we first need to know who is dying, from what causes, and where. Vital statistics systems are also a keystone of any country's development infrastructure for our global response so we shall work with governments to establish this research. Donors and Policymakers can't plan and allocate resources effectively unless they have accurate data on the health and welfare of their country and global citizens. We have many researches that will be the first base of take off then we shall invest further in this sensitive area. Vital statistics promote accountability by providing a baseline for measuring progress, and for better targeting of health and other development programs -- like education and safety nets and vital statistics provide legal rights to families, for example, in conferring property. Research shows Only 34 developing countries have high quality, easily accessible data on something as important as the causes of death for their citizens and Two-thirds of all deaths globally are not counted at all. In some countries, particularly in Africa, as many as *80 percent* of deaths go unreported. Part of the problem lies in outdated, inaccurate definitions. Take the example of birth registration. The current definition of registration "at birth" is children registered *by age 5*. Only 10 percent of births are registered in the first year. This means that most still births and neonatal deaths go unregistered. This means that those lives are not counted. This is unacceptable – but it's a problem that the global community can solve. We have the technology no country should have to rely on passive, paper-based records systems.

We have the human resources. Health workers are present at vital events of birth and death, and we can empower them to record these events in real time. We have the know-how. If we can attend every delivery, then we can register every maternal and child outcome. We will support and advocate countries to register every single pregnancy and every single birth. In partnership with other organizations many others, we've developed a plan to improve and scale up existing registration systems. Every country should have a 21st century, active, digital, and truly "vital" system. These smart investments in results-oriented service delivery and vital statistics systems will help countries achieve the goal of universal health coverage. More than one billion people lack access to health care, and about 100 million people fall into poverty every year from paying out-of-pocket costs for health care. Universal health coverage is the progressive pathway that will save lives, increase economic growth, and help millions of people lift themselves out of poverty. Universal health coverage and saving women's and children's lives are mutually reinforcing goals. Universal health coverage is about ensuring that everyone – women, men, and children – can access a package of essential health services. No one should fall into poverty or be kept in poverty to pay for the health care they need. Universal health coverage is about equity, and delivering on the social contract. A growing number of countries at all income levels are pursuing universal global health coverage. They are responding to their emerging health needs and disease burdens, closing gaps in access to quality care, and protecting their poorest and most vulnerable populations. As more countries move toward universal coverage, fewer mothers die in childbirth, and more babies are born healthy. Our contribution will help lead to a significant reduction in maternal and child mortality. Our support will help health coverage. Now, 30 percent of insured poor women deliver their babies in a health facility with a skilled birth attendant, as compared to just 10 percent for uninsured households. We shall continue to invest in a myriad of health programs that are not very well-coordinated and have limited impact -- *or*, we can begin to consolidate and leverage our resources around the most equitable, effective, and efficient initiatives, backed by evidence jointly as kingdom Bank. You dear partners and donors of Helpers Of Africa Internationalthis room have done some extraordinary things. As a global health and development community, we have collectively mobilized once unthinkable resources over the last decade and saved hundreds of millions of lives. On the on set of Helpers Of Africa Internationalwe are committed to empower countries to deliver essential, quality health care to *every* woman, *every* child, *every* family, *everyone*, *everywhere* through partnerships and collaborations. Many children have been made vulnerable by poverty and HIV/AIDS. Our strategic plan to support orphans seeks to provide a social protection system through regular cash transfers to families living with OVCs in order to encourage fostering and retention of such children within their families and communities and to promote their human capital development.

Helpers Of Africa International Kingdom Global Orphans and Vulnerable Children Agency

Our General Focus on orphans program across the globe include

Education: increase school enrolment, attendance and retention for 6 to 17 year old children in basic school (up to standard 8).

- Health: reduce the rate of mortality and morbidity among 0 to 5 year old children, through immunizations, growth monitoring and vitamin A supplement provision.
- Civil registration: encourage caregivers to obtain identity cards within the first six months after enrolment, birth certificates for children and death certificates for deceased parents.
- Strengthening capacities within the household: Coordinate with other Ministries and partners training on areas such as nutrition and reproductive health. Provide guidance and refer cases related to HIV/AIDS, both among adults and children who are members of the household.
- To support countries to carry out feasibility of all operational registered and unregistered children homes and institutions caring for the Vulnerable children schools in nations and categorize them in classes for need assessment through county leaders , children departments, directories and convene meetings for bonding
- To safeguard the rights of orphans and vulnerable children against any form of violation
- To initiate and promote targeted programs that build the capacity of the community to effectively cater for the basic needs of the children
- To provide orphans and vulnerable children with access to the basic human needs including food, shelter, healthcare, clothing and education

To create linkages focused on eliminating all forms of vulnerability in children thereby enhancing their safety and well being.

Our General Focus on orphans program across the globe include, Our global OVC vision across countries is to advocate and facilitate children respect and value where all children are cherished and supported; where they enjoy a fulfilling childhood and realize their full potential and to provide a foundation for the physical, social, emotional and spiritual well being of orphans and disadvantaged children. We want to be the manifestation of God's caring grace and perfect love to OVCs in globally. We will endeavor to protect shelter, clothe, feed, educate, disciple and support them in an environment of family and community.

Food and Nutrition Program- In addition to providing shelter, the Helper of Africa caters for the daily nutritional needs of the OVCs under our care and in the neighborhood.

Education program -Our programs seeks to offer full educational sponsorship program up to secondary our schools level. The sponsorship includes our schools uniforms, stationery and field study tours. There is also a leadership development component under this program that will ensure children's leadership capacities are developed while at a young age. The other children from the community benefit from this program.

Healthcare program- We take the health of the OVCs seriously because we know and believe that a healthy child is a successful child. The management organizes periodical free medical camps in various children homes where the children's health is well checked and relevant and appropriate medication administered. Those who fall ill are referred to the local dispensary near the our schoolss.

Bible Club program-The home is built on a Spiritual foundation, to help children grow in the fear of God, was initiated. We believe through the program the home will develop future God fearing generation out of crime and drugs

Helpers Of Africa International

Kingdom Global Orphans and Vulnerable Children Agency

Mentorship program- We seeks to deploy and implement evidence-based, sustainable, high quality essential Programs that strengthen the capacity of OVCs to cope with their problems, mobilize resources to help them transition smoothly to the community upon attaining the age of 18.

Equipping the children who are finishing High Our schools for University and College life, those leaving college and university life for self employment on entrepreneurship skills and how to attend interview and fit in the job markets. Providing facilitation for children in our schoolss including, Our schools Uniforms, Bags, Books, Shoes, for existing our schoolss and our schools fees for extremely needy children. Providing basic equipments such as computers to existing our schoolss and supporting the feeding programs.

Helpers Of Africa InternationalOrphans Children's program not only feeds, clothes and educates the children in their care, but also have the mission to encourage the orphans to strive to become the next generation of leaders. We seek to do this by instilling identity, faith, creating self-sufficient communities, teaching social justice, and emphasizing the importance of an excellent education and leadership training.Most of the children are orphans who come from poor family backgrounds. They have lost one or both parents from epidemics like HIV (Aids), hunger, ethnic violence, accidents or just common diseases like malaria and typhoid. Due to their poor environment the children often end up in the streets and in search for food. Our strategic plan will also initiate rescue of children from such dangerous situations and provide them with care, food, education and accommodation. One of the ways we want to do that is by helping to start small Agri-enterprises to support our programs.

We seek globally through countries and institutions to network, care and develop Children Homes & Special Schools to own / support and run hundreds of schools across the country, continent and the world. The persons in charge at the 3 levels will maintain a far sightedness in order to ensure that the funds are utilized well and run our schools in an Excellent & professional way market the schools through Education Champions quarterly magazine, Education Champions exhibitions to market all our schools. Market schools for domestic through our organization network of churches, Saccos, work places, unions, sports clubs, constituencies, wards, counties, community groups and reach across all nursery & kinder gardens in the country etc in all our other departmental events through PR / Events / Communication and our media houses. This department will be hosting Good Samaritan Festival National and County events to bring together the Nation and people for Charity to minister to the needy. Under this department also we have programs to support children homes & Special Institutions on child protection, stigma reduction, parenting, personalized counseling , adoptions , immunization, proper nutrition, home based care, birth registrations, clothing, forester care, child development child rights, life skills program, protection from early marriages, protection from female genital mutilation, prevention from sexually transmitted diseases, psycho-social support, sanitary ware to children, education for all orphans and Vulnerable, vocational training, prevention from infection including H.I.V, Supportive intervention, access to health facilities and medicine, Sanitary towers , Support Community Based responses, coordination & structures, legal aid, related institutional support, discrimination stigma, good governance, transparency, care, mosquito nets, income generation activities, succession planning, reintegration of children back to community, bursary funds, HIV/ Fund, our schools enrollment, Our schools Uniforms & Stationery, Safe water access, water harvesting, Sanitation, Teachers Training, empowering Social welfare service providers, monitoring and evaluation and many more , vacation to provide Holidays, Career & Vocation, Education trips, equipping, mentorship, feeding, clothing, facilitation, Bursaries, Children rights along with supporting equipping and empowering our schoolss with furniture, computers, beds, TVs, Radios, Libraries, Dining halls, sound equipments, Books and our schools uniforms.

This very valuable department expected to impact millions of Vulnerable children through our network to be champions in all areas of life in partnership and network with our schools. The department will host organizational departmental events in liason and EARLY requisition from directors including management training through HR, Compliance and other departments as authorized by CEO office or Director Division for regulation and monitoring. The department will work from onset with the property procurement team to begin to access and profile the hotel and participate in valuation, due diligence, handing over and taking over with HR, Communication and PR management staff transition through fresh staff evaluation and re-engagement or fresh recruitment. This department will buy and build and run well built and furnished Primary, Secondary, Colleges, and Universities and empower orphans and Vulnerable children from there. We have envisioned buying and constructing our schools to both bring income from able learners and establish bursaries to sponsor needy children in a sustainable structure. We shall also use these facilities for our Special missions, Distribution or relief, feeding programs, sports, training, sports, talents centers, community programs, partners and stakeholders. These our schools will also bursaries to needy children, orphans and Vulnerable students at all levels. It will also run and support governments in informal education programs for adults, special education and research support throughout Africa. We have been actively involved in empowerment in education through informal sector adult literacy classes, life skills mentorship and coaching, leadership training in all sectors etc. With your partnership many life champions will be raised in professional, talents and business sector Through Building of Universities & Colleges hundreds of designs ready and land available in various Towns and counties across the country extending to the continents. We shall also continue to do short refresher courses which we have experienced a very big impact of empowering thousands of community leaders and religious leaders who are impacting the community in various spheres of socio-economic fronts to be the gate keepers and agents of sustainable development for our organization. We have already been very instrumental in empowering children homes and Vulnerable children home. We historically gathered 1000 leaders of these institutions. TOT- For Our schools owners and administrators on Life mentorship Skills, Career, How to prepare the children to excel in Education and career, Talent Development Quarterly 7 regional summits to equip the mature children directly on Life mentorship Skills, Career, How to prepare the children to excel in Education and career, Talent Development Equipping the children who are finishing High Our schools for University and College life, those leaving college and university life for self-employment on entrepreneurship skills and how to attend interview and fit in the job markets. Providing facilitation for children in our schools including Our schools Uniforms, Bags, Books, Shoes, for existing our schools and our schools fees for extremely needy children. Providing basic equipment such as computers to existing our schools and supporting the feeding programs
Our Global Specific objectives across the globe include

1. Advocate and Mobilize on the importance of appropriate family/household based care is available to the child.
2. Advocate and Mobilize on the importance to ensure that the family and child have appropriate housing or shelter
3. Advocate and Mobilize to ensure that the child has received all required immunizations as defined by Ministry of Health and indicated in the Ministry's immunization schedule.
4. Advocate and Mobilize to ensure that the child and caregivers visit the facility to receive health services under the Ministry of Health package/strategy
5. Advocate and Mobilize to ensure that the child receives proper nutrition, and that the household is food secure.
6. Advocate and Mobilize to ensure that the child has obtained an official birth certificate
7. Advocate and Mobilize to ensure that the child has appropriate clothing
8. Advocate and Mobilize to ensure that a child aged 4-5 has access to early childhood development (ECD).
9. Advocate and mobilize to ensure that the child and caregiver receive psychosocial support when appropriate.
10. Advocate and Mobilize to ensure that the child's caregiver receives Advocate and Mobilize to information on care of OVC including information on health issues of children, nutrition, foster care, acquisition of birth certificate, child development , child rights, child protection, child HIV status and treatment where appropriate, among others.
11. Advocate and mobilize to ensure that the child has appropriate clothing, including our schools uniform.
12. Advocate and Mobilize to Sensitize the child on life skills, dangers of drug abuse and reproductive health issues at an appropriate age, including HIV/AIDS prevention and testing
13. Advocate and Mobilize to Ensure that the child and caregiver receive information on development and protection of the child including protection from early marriages, female genital mutilation (FGM), gender based violence (GBV), prevention of sexually transmitted infections, including HIV, among others.

14. Advocate and mobilize to ensure that both the child and caregivers have psycho-social support.
15. Advocate and mobilize to ensure the availability of sanitary ware as appropriate.
16. Advocate and mobilize to ensure that appropriate family/household based care is available to the child.
17. Advocate and Mobilize to Ensure that the child attains appropriate level of education
18. Advocate and mobilize to ensure that the child and caregiver visit a health facility to receive health services under the package/strategy.
19. Advocate and Mobilize to ensure that the child receives proper nutrition and the household is food secure.
20. Advocate and Mobilize to Sensitize the child on life skills, dangers of drug abuse, and reproductive health issues at an appropriate age, including HIV/AIDS prevention and testing
21. Advocate and mobilize to ensure that the livelihood of the child is secured by providing future options such as vocational training and economic empowerment among others.
22. Advocate and Mobilize to Ensure that the adolescent child and caregiver receive information on development and protection of the child including protection from early marriages, FGM, GBV, prevention from the infections, including HIV
23. Advocate and Mobilize to Provide an extended package or supportive interventions
24. Advocate and Mobilize to Provision of ARV and drugs for opportunistic infections for HIV+ children
25. Advocate and Mobilize to Home visits by social workers
26. Advocate and Mobilize to Community based day-care centers for children whose head of household has to go to our schools
27. Advocate and Mobilize to provision of insecticide treated bed-nets
28. Advocate and Mobilize to Sanitary towels for adolescent girls who are OVC
29. Strengthen the capacity of families to protect and care for OVC through seminars and training.
30. Mobilize and support community based responses
31. Ensure access for OVC to essential services, including but not limited to education, health care, birth registration, psychosocial support and legal protection
32. Ensure that improved policy and legislation are put in place to protect the most vulnerable children
33. Create a supportive environment for children and families affected by HIV/AIDS
34. Strengthen and support national coordination and institutional structures.
35. Strengthen national capacity to monitor and evaluate Program effectiveness and quality.
36. To increase family based care and retention of OVC within family/household set up.
37. To increase care and support of OVC by communities
38. To increase access by OVC to essential services including but not limited to education, health care, nutrition , birth registration, legal aid, and reproductive health
39. To ensure that appropriate policies and legislation for protection and care of OVC are in place and operational
40. To create a supportive environment for children and families affected by HIV/AIDS
41. To increase the capacity of government and other institutional structures to coordinate OVC interventions.
42. To increase the capacity of the county and government to monitor and evaluate effectiveness of OVC structures and interventions. To empower families, extended families, county and the State organizations to remain the primary support structures for the care, protection and support of OVC.
43. To package Programs for the care, support, protection and development of OVC to respect cultural belief systems and ethical values – except where these are determined to cause harm to the child – and shall be guided by relevant national and international legal and policy instruments
44. To monitor those children shall be discriminated against in regard to access and provision of care, support and protection in Our schoolss.
45. To advocate that gender sensitivity and inclusiveness shall be emphasized and programming shall recognize and address the special needs of boys and girls
46. To advocate likewise that, programming shall respond appropriately to the needs of children who are marginalized or who have special needs.

47. To motivate Home based care that Institutional care shall be a last resort, when all other social safety nets are not available, or are not the best option for the child's care, support and protection.
48. To build capacity through seminars on management that transparency, accountability and good governance shall be required of all stakeholders providing care, support and protection to OVC.
49. To the best interests of the child shall guide all decision making and child participation will be upheld at all levels.
50. Mobilize the Increased number of households taking care of OVC enrolled in social safety net systems Social safety net for families taking care of OVC in place
51. Help children homes to establish and expanded cash transfer system to poor household taking care of OVC.
52. Improve economic capacity of the household through increasing household income by: training on income generation activities, establishing/strengthening financial schemes, loans to families and other micro enterprise development systems for caregivers taking care of OVC.
53. Research on Mechanisms for providing psychosocial support to OVC and their families in place.
54. Develop standard guidelines on psychosocial support in Kenya. Mainstream psychosocial support in OVC Programs.
55. Mentor on Succession planning mainstreamed into interventions programs for OVC .Develop mechanisms for protecting inheritance rights of OVC through training on memory books, will writing and training on legal provisions such as the role of public trustees.
56. Sensitize ill parents to identify guardians for their children. Develop training Programs for NGOs and other service delivery agencies on succession planning.
57. Accessing treatment and support of sick parents and children by , Increase access of HIV + caregivers to VCT services, Ensuring that HIV+ caregivers are accessing ARV/T, Increase diagnosis and timely treatment of opportunistic infections, Provide home-based care for HIV+ caregivers, Promotion of preventive programs.
58. Increased knowledge and skills of OVC care givers to care and protect OVC. Provide skills training programs for care givers/child headed households on: parenting, financial management, nutrition and health, legal affairs, safe sex, gender concerns, etc. Establish systems to monitor child-headed households Training older OVC and young people on vocational training, Facilitate the formation and strengthening of support groups and networks of families with OVC Develop and disseminate IEC materials for OVC care and protection, Integrate reproductive health and HIV/AIDS risks and prevention education in OVC, programs.
59. Empower the Increased capacity of communities to respond to the needs of OVC by Mobilizing and organizing for early identification of OVC and develop monitoring systems for service provision.
60. Develop the capacity of communities to respond to OVC through training of community leaders, community local committees like Area Advisory Councils (AAC), FBOs, CBOs, Men groups, youth groups etc. to respond to the needs of OVC Support the establishment of OVC rescue centers and provide needed trainings and materials to community resource persons on OVC issues such as paralegals, teachers, counselors and nutritionists, among others.
61. Develop supplementary fortified food schemes and enhance food security initiatives at community level Identify and support good practice models that support OVC.
62. To mobilize Increased number of OVC taken up by families within their communities through formal processes (guardianship, foster care and adoption) and kinship foster care.
63. Develop and enforce regulations that promote domestic guardianship , foster care and adoption of children as opposed to institutionalization of these children
64. Strengthen the capacity of social work systems, adoption organizations and societies to ensure adoption regulations are adequately followed.
65. Strengthen the system for reintegration of children into their communities from charitable children institutions, statutory institutions and streets, among others Increase public and community awareness on the benefits of children being raised in family set ups.
66. Increased co-ordination for OVC Programs at district level, constituency and county levels. Support the establishment of a community referral system. Strengthen linkages between community based initiatives and available government funds such as Community Development Fund (CDF), Local Authorities Trust Fund (LATF), Bursary Fund, HIV/AIDS funds, among others Establish and maintain a database of OVC services at community level
67. Increased mobilization of local resources to take care of OVC Support community based income generating activities (IGA) and micro enterprise development initiative (MEDI) Programs where the funds generated will be used for OVC support. Initiate community banking and revolving funds Build the capacity of community committees(AAC, Our schools Management Committee) to mobilize resources for OVC support , i.e., fund raising strategies

68. Ensure access for OVC to essential services, including education, healthcare, nutrition, birth registration and other necessities.
69. This strategic area therefore calls for establishment of mechanisms at all levels that ensure OVC have access to essential services
70. Establish joint networks of other stakeholders dealing with OVCs. The Government and other development partners are already offering some of the essential services such as the Free Primary Education (FPE), free health services to children below five years, provision of ARV, provision of free TB and malaria treatments, among others. Despite these efforts, many OVC are unable to access these services due to their difficult circumstances.
71. Mobilize for Increased our schools enrolment, attendance, retention and completion for OVC Support identification and address barriers that hinder OVC from accessing and completing FPE e.g. uniforms, shoes, our schools bags, food, books, etc.
72. Support OVC to access Early Childhood Development (ECD) services Support non-formal/special education for OVC who cannot attend formal education Support our schools feeding Programs
73. Initiate and expand peer to peer interventions to encourage out of our schools OVC to re- enroll, and attend primary our schools Advocate for greater allocation of Bursary Fund to needy OVC.
74. Mobilize resources for Increased number of OVC accessing safe water and sanitation, Support the installation of safe water points at our schoolss and community levels, Support the capacity of communities on water harvesting, water storing, water purifying and improving sanitation facility at the family level, Increase access to sanitation and hygiene services for orphaned and vulnerable girls in and out of our schools, including provision of sanitary towels and sanitary ware (safe toilets/latrines).
75. Mobilize resources for Increased number of OVC accessing reproductive health facilities and services, Strengthen capacity of reproductive health providers to deal with OVC, Support research on the situation of reproductive health for OVC to inform programs, Support awareness strategies for older OVC on reproductive health and prevention of HIV infections, Support development and dissemination of IEC and messages for OVC and youth on reproductive health.
76. Increased number of OVC accessing health and nutritional services, Support health services systems within the communities to ensure OVC access health services, Support sensitization of our schoolss/communities on primary health care, Support Programs within the community that promote nutritional status of OVC. Support HIV + children to access pediatric ARV and treatment for opportunistic disease, Advocate for medical fee waiver for OVC.

77. Increased number of OVC that are legally protected within their families and communities, Support the establishment of community level child protection committees, Support the training of community level paralegals on legal issues impacting on OVC, Support the establishment of community based paralegals structure, Strengthen the capacity of law enforcing officers to protect OVC, Support provision of legal aid to OVC
78. To advocate and mobilize for Increased number of OVC obtaining birth registration certificates, Support awareness strategies on importance of birth registration of OVC to attain birth certificates, Support families to attain birth certificates for OVC, Address barriers that hinder OVC from accessing their birth certificates
79. Support Programs that ensure families caring for OVC have appropriate shelter and Identify and support families caring for OVC that have inappropriate shelter.
80. Mobilize for Increased number of OVC receiving psychosocial support, Develop national guidelines on psychosocial support to OVC, Support set up of community based psychosocial interventions for OVC, Integrate psychosocial support interventions into OVC Programs, Train teachers on psychosocial support for OVC in our schools set up
81. Increased number of leaders engaged in campaigning for reduction of stigma and discrimination Support training and sensitizing leaders, including members of parliament on HIV/AIDS, OVC issues and impact of stigma and discrimination to the families and the country as a whole, Develop and disseminate IEC materials to leaders, Disseminating the OVC policy, guidelines and other legislative provisions to leaders.
82. 56. Mobilize towards Increased public awareness on the situation of OVC and dangers of stigma and discrimination, Develop and implement a comprehensive stakeholder's communication strategy on HIV/AIDS, Develop and implement dissemination mechanisms and strategies for essential OVC information and data (e.g. Situation Analysis findings, the HIV/AIDS indicators survey), Support community open forum discussion son HIV/AIDS and protection of OVC and their families,

83. Support the teaching of life skills for in and out of our schools children Support local actors i.e. teachers, health care workers, social welfare service providers, Men groups, youth groups among others, to integrate into their work discussions of protection as it relates to HIV/AIDS Support partnership with the media to highlight issues of HIV/AIDS, stigma and discrimination.
84. Mobilize to develop and Implement an integrated Monitoring and Evaluation Plan developed and implemented, Develop an integrated Monitoring and Evaluation Plan, Define indicators for use by all OVC stakeholders to monitor national progress on responding on OVC, Establish baseline data of agreed indicators, Strengthen institutional capacity of the Department of Children Services to monitor, OVC interventions, Develop and disseminate monitoring tools, Strengthen capacity of stakeholders implementing OVC interventions at all levels on monitoring progress of OVC.
85. Advocate for OVC indicators incorporated and enshrined into national data/information systems, Lobby for mainstreaming of OVC agenda/indicators into periodic national data collection efforts such as national census, integrated household surveys and poverty, surveys among others, Lobby for generation and provision of OVC data by key social services ministries providing services to children, e.g., the our schools enrolment and retention data by Ministry of Education, immunization data by Ministry of Health and civil registration data by the and Department of Civil Registrar, among others
86. Advocate for OVC information sharing system/mechanism in place and functional to Review, strengthen and harmonize the existing information data base on children and OVC under the coordination of Department of Children Services. We seek to also to strengthen the capacity of stakeholders on information generation, analysis and utilization and Support the development of a dissemination mechanism on OVC responses along with Support operational research on OVC issues.

OUR CORE VALUES of our program

1. Respect for children's rights
2. Service and dedication to the well being of children
3. Integrity and honesty in the discharge of our mandate
4. Professionalism, efficiency and effectiveness
5. Non-discrimination
6. Equality and fairness
7. Transparency and accountability
8. Justice
9. Partnership, collaboration and networking Eligibility

The household must be extremely poor
The household must have OVCs
Household must not be enrolled in other CT Programmes

Our Global Strategic plan of empowerments of OVCs, other children, teens and youth across the globe include

Mobization and search of OVCs from governments and countries settings & datas through ministries and children departments along with further seek and vet through religious settings, saccos, work places, unions, sports clubs, constituencies, wards, counties, community groups , Primary Schools, Secondary schools, Colleges, Universities etc. The four pillars of this department are Networking, Empowerment, Ministry, Mentorship and welfare. Organize one annual Kenya for Business Youth Festival and others in the counties as many as can be organized upto 47 to form county networks that will facilitate the National network. Some of this can be co-hosted with Children, Teens and Youth departments in partnership with PR / Communication / Event Management department and Media

- Specific mandate / activities / focus include
- Buy and Building Children (THOUSANDS OF DESIGNS DONE) & Youth Empowerment and Conference centers within our County Mega all inclusive Complexes establishment across all counties in the country in the malls etc
- Support positive youth development (PYD).
- Strengths-based approach where young people are engaged within their communities, schools, agencies, peer groups and families
- Creating opportunities for them to develop positive relationships
- Create opportunities for youth to acquire knowledge and skills they need to make successful transitions to adulthood.
- Focus on resilience and on building the protective factors in a young person's environment to help them to overcome adversity.
- Based on the social determinants of health, protective factors include but are not limited to engagement in community and school activities, access to mental health care, caring adults, positive family relationships, prosocial peer groups, cultural belonging, etc.
- Tap into energy in the youth who have multiple and diverse protective factors on which they can draw to protect them from vulnerable to mental health challenges.
- Safeguard youth from various youth factors different risk factors.
- Increase protective factors and decrease risk factors.
- Motivate meaningfully engaged, young people develop relationships and skills that promote resilience, and agencies and communities benefit from a greater understanding of issues.
- Build Strong intergenerational partnerships, which are developed when adults work as allies to support, advocate for, and collaborate with youth throughout their positive development journey. These partnerships acknowledge that youth have historically been excluded from organizational and community decisions that directly affect them.

Our stadiums will serve children, orphans and Vulnerable students at all levels for various recreations and team building centers. It will also run and support governments in facilitating national events.

STRUCTURE OF OUR OUR SCHOOLS MANAGEMENT- SCHOOLS DEPARTMENT.

We shall build new schools we have thousands of designs in place and buy existing to upgrade them accordingly and convert other building that we shall buy to upgade to the standards expected. Our Education institutions will have a unique brand to be a social institution that will guide the society's transmission of knowledge - including basic facts, job skills, spiritual nourishment, moral standards and also valuable cultural norms and values to its members. In industrial societies education is largely a matter of

Our schools setting up formal instruction under the direction of specially trained teachers. The extent of our schools in any society is closely be tied to its level of economic development. Industrial, high- income societies endorse the idea that everyone should go to schools that requirement is putting a great demand on education in the entire Africa and our vision is to meet this need efficiently and effectively. Our schools in low-income communities & nations will offer free or subsidized fees to ensure that all children be it orphans Vulnerable children across Africa will have access to education. All our schools through the bursary department will ensure a percentage of students ranging from 10% to 50% are caring for needy children who will be recruited through our network of children homes across the country and nations. Some of this school will be for 100% sponsored children who are helpless and forsaken in the society offering a comprehensive package of education, accommodation and homely environment to ensure they are well packaged that no child will lack what they need for this life to become society champions in all sectors since In low income countries and communities there is not much of it.

About one half of all elementary age children ever get to school, and perhaps only one half of them reach the secondary grades. Structural-functional analysis looks at how formal education contributes to the operation of society. The important functions performed by our schools include:

Socialization

Technologically simple societies transmit their ways of life informally from parents to children. As societies develop complex technology, kin can no longer stay abreast of rapidly expanding information and skills. Thus our schools gradually will emerge as a distinctive social institution employing specially trained personnel to Convey the knowledge needed for adult roles.

In primary our schools children learn basic language and mathematical skills, social skills and orientation.

Secondary our schools build on this foundation, and for many, college allows further specialization. Will also major on

Our schools pass on society's core values from one generation to another. Our schools are used for the inculcation of work values in relation to job markets to prepare them for great to fit in, family, population, democracy, justice, and so on.

Our schoolss explicitly instruct students in constructive participation in political life not to be misused for political gains in violence but participate in a sober and appropriate way. From the earliest grades, rituals such as saluting the flag and singing the national anthem foster patriotism. Similarly classroom drills will develop competitive individualism, respect for authority, and a sense of fair play.

Cultural Innovation

Education creates as well as transmits culture. Our schools stimulate intellectual inquiry and critical thinking, sparking the development of new ideas. At college and university the teachers are busy in research to expand our knowledge in countless areas. Medical research conducted at major universities over the years has increased our life expectancy, just as research by sociologists and psychologist helps us to take advantage of our longevity.

Social Change

Our schools will generate new knowledge, they are also the means for bringing social change.
Education may lead to dispelling the traditional attitudes and values. Education is likely to widen the
Perspectives of the youth make them `rational', willing to accept new ideas and carrying the message forward.

Social Integration

Our schools help forge a mass of people into a unified society. This integrative function is especially
Important in nations with pronounced social diversity, where various cultures know little about or may
even be hostile to one another. A basic way our schools integrate culturally diverse people is by teaching a
common language that encourages broad communication and builds a national identity.

Social Placement

Our schools help in identifying and developing each student's aptitudes and abilities and then evaluating a
student's performance in terms of achievement rather than social background.
Teachers encourage the "best and the brightest" to pursue the most challenging and advanced studies, while
guiding students with more ordinary ability into educational programs suited to their talents. In this way
our schools enhances meritocracy by making personal merit a foundation of future social position
Main Function and character of our rehab schools and our children centers

- **Conservation and promotion culture:**- Our schools conserve the valuable culture, tradition, values of the society and helps in promoting and developing these with the rolling of the time. It also spreads the store of culture to the next generation.
- **All-round development of the individual:**- For all-round development of the individual our schools has a package of program. Through its different activities, it draws out the hidden potentialities of the child and develops them in a proper way.
- **Development of higher values of life and life skills coaching:**- Our schools helps in developing and cultivating good and higher values like truth, sympathy, love, cooperation, etc. in child. Through different social interactions and moral teachings, it spreads the message of righteous living in a society.
- **Development of social responsibility:**- Our schools are a society in miniature. Because in our schools child shares feelings with various children coming from different strata. So they learn the lessons of social duty, responsibilities and understanding the feelings of others. So our schools help in social change and social control.
- **Citizenship training:**- Our schools creates the first civic society for the child. So child learns the duty and civic rights for the country as a responsible citizen. So our school trains the lessons of citizenship to a child.
- **Adjustability in society:**- Our schools prepares child to face the problems of the society. So proper adjustment and application of learned knowledge can be checked and guided by our schools. So the main function of the our schools is to develop adjustment capacity of an individual.
- **Vocational training:**- Through different activities, our our schools provides training in different vocations. It also cultivates the values of dignity of work and labor. It prepares children to face any challenge in the future to solve their bare necessities.
- **Hurb of learning** - The role of our schools cannot be confined with these lines. In modern days, the role of our schools has been increasing day by day. It is called the hub of learning. Every developed state gives first priority our schools for total national development. Really, our schools is now a prestigious institution in the society, which can be called a man-making factory.
- **Instill Confidence in a child-** access to classes, teachers, and administrators, interaction, sports, talent exposure etc will build self esteem and confidence.
- **Platform for positive Socialization**- Many valuable relations have been built in school relationship in classes, inter school networks across our network of schools as a strong family, friendships that contribute a child wholistic social growth. Our schools will cultivate this platform to provide wholistic growth to millions of children.

- **Promoting Teamwork & Networking virtue** - Cultivate important of team work and networking virtue which is key to any success of individual life. Friendships aren't the only important relationships that can be built through our schools. A our schools environment offers students the opportunity to learn to work with others, which is a very important "real world" skill. Through games and projects, and even participation in after-our schools sports, children can learn the importance of forging relationships with each other. These activities can also help us learn to manage difficult personalities, find our way as leaders, and better understand the way we work as individuals. These lessons provide valuable experiences that as adults, we use everyday. Working with others is all about managing different personalities and finding ways to make your workday run more smoothly.
- **Preparation**- Our schools don't merely teach facts and figures and numbers and letters. But the experience of preparing for exam, science congress, a sport , interview, a talent show will improve child focus to prepare for certain things in life which is a great virtue in life.
- **Getting information**- Perhaps one of the most important reasons to attend our schools is the wealth of knowledge and information provided within the our schools setting. Our schools provide a safe haven for the spread of ideas, and often gives us access to subjects and ideas that we wouldn't regularly find in our homes or with our friends. Learning a new language, for example, is often best done within the confines of the language's native country. Most people do not have the means to spend the many years it would take living in a foreign country to learn another language. Our our schools ofter access to those who have had the opportunity to really study a second or third language, and those educators can give a first hand advice on pronunciation, culture, sentence structure.
- Inspiration- Our schools don't just help develop lifelong friendships, work strategies, and career goals, but also functions to inspire. Taking a course often reignite energy and passion in life. Our schools benefits everyone at every level to inspire them in all sectors, and it's important to remember that everyone can better himself through learning to be inspired to undertake life challanges.
- Sense of belonging to a Community- Our schools are packaged to function as the center of a person's community and can act as a meeting place, a place for children to grow, and a second home to appreciate the sense of safety and comfort , so many of the activities that gives my identity as a youth is cultivated at our schools. The schools will facilitate community facilities such us swimming pools, libraries, hospitals, sports fields , a centerpiece of community gathering for kids and parents bond.
- Schools not only important to us as individuals our schools will help society progress by educating its members who bring their newly acquired information to the workforce. Our schools boost confidence and teach us to establish and maintain friendships, and help us learn how to work together as a team, which is a primary tenet of any successful society. Without schools, knowledge would not spread as quickly, and our access to new ideas and people could easily be cut off. A world without our schools would create difficulties in language learning, and would stall the dispersion of economic growth, tolerance, and the appreciation of our fellow human beings. Our Schools will also be operation bases for stations of various education, health and social economic activities for community such as Health campaigns, HIV reduction and stigma reduction, Peace campaigns in war torn regions, Conflict resolutions., Good news campaigns/ festivals / conferences Seminars, Festivals on Peace & integration and caravans ,Mobile education video programs for communities, Mobile Libraries, Mobile Clinic, Rotational or stationed IT Computers training to Our schoolss, running and sponsoring Sports & Talent search & competitions, Community Tournaments, Promotion Sports & Talents in Our schools colleges / university, Sourcing for Potential businesses to fund, Exhibitions, Free medical checks & vaccination programs, Research for solutions on various community challenges on medical such us jigger infection in communities, Pest control, Peace & cohesion building Program, Gospel Outreach program, Mobile education video program, Books & Mobile Libraries program, Mobile IT program, Sports & Talent sponsorship / scholarship program , Free medical checks program , Vaccination programs, Research for community challenges Programs , Jigger infection prevention program , Pest control programs, Healthy Mothers, Healthy Children Project, Education through Innovation project, Children Nutrition Project, Immunizations Project (Polio) Education Support to Institutions Project -(Facilitation & Empowerment project- Targeting low performing our schools, classrooms, libraries etc), Mental Health Advocacy and Counseling project, Farming & Livestock Productivity Project, Rehabilitation from Substance abuse Project, Malaria Eradication project, Poverty Eradication & Economic Empowerment project, Natural Family Planning Advocacy & Reproductive health Project , Culture Preservation Project, Marginalized Communities Empowerment Project, Access to Information Project, Innovation Project, Leadership Development Project., Community Volunteer Project, Patriotism Advocacy Project, Medical Research Project , Widows & Single Mothers Empowerment Project, Rebuilding & Repairing Homes Project, Disease Outbreaks Response Project, Heart , Cancer, Kidney Treatment Project, Adult literacy Project ,Fine Art

Development Project , Election Centers of government, grounds for hire for weddings, sports, drama / music festivals, parking of our missions trucks / buses along with equipment storage for counties and regions and other community valuable programs. This will be in liason with General managers and school administrations to advice on space and facilities availability at a time not to disrupt normal school programs others considering school holidays when students are out of school when most of this programs can be run by General Managers and Principles of all our education institutions. A proper Annual calendar by special missions department, events and HR should be discussed to slot in such to avoid administration ambush by any of our departments in using facilities.

    - With our donors and international partners arrange for scholarship programs abroad for exemporary talents and performances.

Helpers Of Africa Internationalwill heavily invest in children and Youth welfare both OVCs and those in ordinary settings including those in Disability in state in which a person has a visual, hearing, speech, physical, mental, emotional, or intellectual impairment that may be present singly or in combination; may be mild, moderate, or severe in nature.

We seek to empower youth Economically and build there career placement potential without subjection to Child labor. A broad concept that encompasses most productive activities undertaken by children, whether for the market or not, paid or unpaid, for a few hours or full time, on a casual or regular basis. It excludes chores undertaken in the child's own household or schooling. To be counted as economically active, a child must have worked for at least one hour on any day during a seven-day reference period Extended Family: A collection of a number of households or families of individuals who are related by blood and with social ties and responsibilities toward one another. Most communities especially in the rural areas depend on extended families for nutrition, care, and support. 6 Extreme Poverty: The state in which a person is living at a subsistence level that is below the minimum requirements for physical well-being, usually based on a quantitative proxy

Children without families are the most vulnerable people in the world.
Brooke Randolph

"When you lose your parents as a child, you are indoctrinated into a club, you re taken into life's severest confidence. You are undeceived.
Hilary Thayer Hamann

"I will not leave you as orphans, I will come to you
Jesus in John 14:18

"Orphans, are the one who has no parents, but have many parents. But having ones parents is more valuable than the other having many parents (it doesn't depend on numbers, but the feelings matters).
Siddwin S. Shetty

"The answer to 168 million orphans in our world can be summed up in two words: family and church.
Kay Warren

"The orphan does not rejoice after a heavy breakfast.
African Proverb

"Orphans are the only ones who get to choose their fathers and mothers, and they love them twice as much.
Adam Johnson

"Not everyone can be an orphan. But you can care for one
Andre Gide

"Orphans are easier to ignore before you know their names. They are easier to ignore before you see their faces. It is easier to pretend they're not real before you hold them in your arms, but once you do, everything changes.
David Platt

“History will judge us by the difference we make in the everyday lives of children.” — Nelson Mandela,

“If God places a child before you, and you are too busy to wield either a positive or negative influence...you just did the latter! You communicated that the child doesn't matter and isn't important.” — Wess Stafford,
“Every child is an artist, give them an opportunity .” - Pablo Picasso, artist

"Children are great imitators. So give them something great to imitate." — Anonymous
"There can be no keener revelation of a society's soul than the way in which it treats its children." — Nelson Mandela

"It is easier to build strong children than to repair broken men." — Frederick Douglass,
“Let us reach out to the children. Let us do whatever we can to support their fight to rise above their pain and suffering.” Nelson Mandela

“If we nurture the dreams of children, the world will be blessed. If we destroy them, the world is doomed!” — Wess Stafford
"Poverty is a very complicated issue, but feeding a child isn't." — Jeff Bridges, actor
“But when adults speak up for the vulnerable and the weak, working and demanding that safety and respect prevail, God's little lambs are protected and nourished. They know they are not abandoned; they are loved. And the world becomes a little more like heaven as a result.” — Wess Stafford SPONSOR A CHILD TODAY
"Even if people are still very young, they shouldn’t be prevented from saying what they think." Anne Frank, author
“Children are more than we think they are; they can do more than we think they can do. All they need is a vote of confidence from grownups, whom they will ultimately replace anyway. Their dream today will become the realities of tomorrow.” — Wess Stafford
"The child is the beauty of God present in the world, that greatest gift to a family." Mother Theresa
"The one lost child matters to the Lord." Danielle Strickland, Campaigner for justice and friend of Compassion
"If I could relive my life, I would devote my entire ministry to reaching children for God!" — Dwight L. Moody, evangelist
"Children are the hands by which we take hold of heaven." Henry Ward Beecher, clergyman and social reformer
"You may speak but a word to a child, and in that child there may be slumbering a noble heart which shall stir the Christian Church in years to come." Charles Spurgeon, preacher
"The greatest legacy one can pass on to one's children and grandchildren is not only money or other material things accumulated in one's life, but rather a legacy of character and faith." — Billy Graham, evangelist
Top of Form
Be generous to the poor orphans and those in need. The man to whom our Lord has been liberal ought not to be stingy. We shall one day find in Heaven as much rest and joy as we ourselves have dispensed in this life. - Saint Ignatius

I went to Africa without the perspective of a balance between teaching people the truth, which has been my calling, and helping people who have physical problems, like AIDS and orphans and hunger.
Bruce Wilkinson
Continuous persecution of widows and orphans is a crime. Even the Bible says there is a specific place in hell for those who oppress widows.
Imelda Marcos

There's a Biblical mandate to reach out to those who are the orphans, the widows in their distress, to take care of the stranger in your land. But that does not mean citizenship. James Lankford

Many people, for many reasons, feel rootless - but orphans and abandoned or abused children have particular cause.
Christina Baker Kline

I've pain and worry about number of orphans, children who have been abandoned or had something terrible happen to them.
Asa Butterfield

I will work with my colleagues on both sides of the aisle to preserve the Social Security promise that provides secure retirement benefits for all, especially those who are most at risk such as widows, orphans, and people with disabilities when the need arises.
Chaka Fattah

If only billions of the world would care for a single orphan in distress, there would effectively be no more orphans. If everybody would be willing to simply do something to care for one of these precious treasures, I think we would be amazed by just how much we could change the world.
Steven Curtis Chapman

When you lose a parent, you realize how vital they are to the foundation of your life. It's impossible to understand what it means until that curtain is pulled. You're an orphan. But then I think that life is kind of remarkable people who care, and the thing that causes the biggest pain can also bring amazing energy.
Neneh Cherry

When you lose a spouse, you're a widow or widower; when you lose your parents, you're an orphan. When you lose a child, there's no word in the English language for that position, that place that we are left if we don't care about orphans.
Frances McDormand

1. John 14:18-20 No, I will not abandon you as orphans–I will come to you. Soon the world will no longer see me, but you will see me. Since I live, you also will live. When I am raised to life again, you will know that I am in my Father, and you are in me, and I am in you.
2. Psalm 68:3-5 But let the godly rejoice. Let them be glad in God's presence. Let them be filled with joy. Sing praises to God and to his name! Sing loud praises to him who rides the clouds. His name is the Lord rejoice in his presence! Father to the fatherless, defender of widows— this is God, whose dwelling is holy.
3. God defends orphans.
4. Psalm 10:17-18 Lord, you know the hopes of the helpless. Surely you will hear their cries and comfort them. You will bring justice to the orphans and the oppressed, so mere people can no longer terrify them.
5. Psalm 146:8-10 The Lord opens the eyes of the blind. The Lord lifts up those who are weighed down. The Lord loves the godly. The Lord protects the foreigners among us. He cares for the orphans and widows, but he frustrates the plans of the wicked. The Lord will reign forever. He will be your God, O Jerusalem, throughout the generations. Praise the Lord!
6. Jeremiah 49:11 But I will protect the orphans who remain among you. Your widows, too, can depend on me for help.
7. Deuteronomy 10:17-18 For the Lord your God is the God of gods and Lord of lords. He is the great God, the mighty and awesome God, who shows no partiality and cannot be bribed. He ensures that orphans and widows receive justice. He shows love to the foreigners living among you and gives them food and clothing.
8. Psalm 10:14 Thou hast seen it; for thou beholdest mischief and spite, to requite it with thy hand: the poor committeth himself unto thee; thou art the helper of the fatherless.
9. Psalm 82:3-4 "Give justice to the poor and the orphan; uphold the rights of the oppressed and the destitute. Rescue the poor and helpless; deliver them from the grasp of evil people."

10. We are to help orphans.
11. James 1:27 Pure and genuine religion in the sight of God the Father means caring for orphans and widows in their distress and refusing to let the world corrupt you.
12. Exodus 22:22-23 “Do not take advantage of the widow or the fatherless. If you do and they cry out to me, I will certainly hear their cry.”
13. Zechariah 7:9-10 Thus speaketh the LORD of hosts, saying, Execute true judgment, and shew mercy and compassions every man to his brother: And oppress not the widow, nor the fatherless, the stranger, nor the poor; and let none of you imagine evil against his brother in your heart.
14. Deuteronomy 24:17 Thou shalt not pervert the judgment of the stranger, nor of the fatherless; nor take a widow’s raiment to pledge:
15. Matthew 7:12 “So whatever you wish that others would do to you, do also to them, for this is the Law and the Prophets.”
16. Isaiah 1:17 Learn to do good. Seek justice. Help the oppressed. Defend the cause of orphans. Fight for the rights of widows.
17. Deuteronomy 14:28-29 At the end of every third year, bring the entire tithe of that year’s harvest and store it in the nearest town. Give it to the Levites, who will receive no allotment of land among you, as well as to the foreigners living among you, the orphans, and the widows in your towns, so they can eat and be satisfied. Then the Lord your God will bless you in all your work.

18. God is serious when it comes to orphans.
19. Exodus 22:23-24 If you exploit them in any way and they cry out to me, then I will certainly hear their cry. My anger will blaze against you, and I will kill you with the sword. Then your wives will be widows and your children fatherless.
20. Deuteronomy 27:19 Cursed is anyone who denies justice to foreigners, orphans, or widows.’ And all the people will reply, ‘Amen.’
21. Isaiah 1:23-24 Your leaders are rebels, the companions of thieves. All of them love bribes and demand payoffs, but they refuse to defend the cause of orphans or fight for the rights of widows. Therefore, the Lord, the LORD of Heaven’s Armies, the Mighty One of Israel, says, “I will take revenge on my enemies and pay back my foes!

22. God’s Love
23. Hosea 14:3 “Assyria cannot save us; we will not mount warhorses. We will never again say ‘Our gods’ to what our own hands have made, for in you the fatherless find compassion.”
24. Isaiah 43:4 Because you are precious in my eyes, and honored, and I love you, I give men in return for you, peoples in exchange for your life.
25. Romans 8:38-39 For I am sure that neither death nor life, nor angels nor rulers, nor things present nor things to come, nor powers, nor height nor depth, nor anything else in all creation, will be able to separate us from the love of God in Christ Jesus our Lord.

26. God will never forsake His children
27. Psalm 91:14 “Because he loves me,” says the LORD, “I will rescue him; I will protect him, for he acknowledges my name.
28. Deuteronomy 31:8 The LORD himself goes before you and will be with you; he will never leave you nor forsake you. Do not be afraid; do not be discouraged.”

29. Reminder
30. Matthew 25:40 “And the King will say, ‘I tell you the truth, when you did it to one of the least of these my brothers and sisters, you were doing it to me!”

31. Example
32. Lamentations 5:3 We have become orphans, fatherless; our mothers are like widows. This is not the will of God.

Helpers Of Africa Internationalwill support the cause of those who live with disability On behalf of the Bank, I would like to thank you for the opportunity to participate in the of the bank and also this inniative of empowerment of Disability plan and Framework. This is an important step towards scaling up global efforts to address disability inclusion - by enabling each individual to tap into her full potential, and for society to benefit from a diverse set of abilities. Our departments' effort to unlock the potential of opportunity through this disability framework sets an example for the international community to deepen its commitment to inclusive development. We all recognize that disability, as a development issue, cuts across the core mission of our strategic plan, the Helpers Of Africa InternationalGroup and the international development community to reduce poverty. We are looking forward to learn from the implementation of our strategic plan and framework, and to strengthen our partnership on this crucial agenda. This platform today provides a further boost to a valued partnership with likeminded organizations, where all organizations will aggressively and collaboratively move forward towards a common goal. Today Over one billion people globally live with some form of disability, and disability prevalence is higher for developing countries. The social exclusion of persons with disabilities is unacceptable in the face of economic and social progress witnessed around the globe. They are over-represented amongst the persistently poor, and are less likely than others to be able to move themselves out of poverty. They are also harder to reach via traditional poverty alleviation and social protection programs. More people with disabilities live in poverty and more people in poverty have a disability. People with disabilities may also face cumulative disadvantage depending on their gender and ethnicity. We, as the Helpers Of Africa InternationalGroup, and as the world, will not be able to achieve our primary goal of eliminating extreme poverty by Global agenda 2030 unless we aggressively address the disability agenda. Addressing the agenda aggressively not only requires doing more and scaling up, but also developing a comprehensive vision on disability that also addresses issues related to perceptions and dignity in our interventions.

We need to move beyond traditional ways of doing business In Disability strategic plan and Framework contains features that will vastly bolster our approach on disability especially this time of Covid 19 including a solid grounding on data, a commitment to identify and act upon evidence related to what works and what doesn't, building staff capacity, and working with an in-house disability expert group; and the framework promotes both stand-alone activities and a re-energized focus on including a disability lens into education, health, and infrastructure projects, which is something that we in the World Bank Group are trying to promote as well. We are all fully committed to advancing our efforts in the same direction, and to move beyond traditional ways of doing business. Exclusion and stigmatization around the globe have helped perpetuate an environment which hinders people with disabilities from accessing goods, services and opportunities vital to their development and well-being. Be it education, health, labor markets, transport, social protection, or social networks, people with disabilities are marginalized at a higher rate across the development spectrum, and not enough is being done to address this problem.
There may also be a perception that addressing these issues is costly, complex and often with unclear results. We need to correct this. The most efficient way to give this issue the attention and action it deserves, and to get the most impact is by working closely together with governments and civil society, and in partnership with all like-minded partners. We would therefore like to partner with you and other key stakeholders in helping promote and advance this framework. The timing of this framework couldn't be more fortuitous. The Bank is trying to further strengthen its own stance and engagement on disability as part of its twin goals of ending poverty and boosting shared prosperity, so this is the right moment for us to build this partnership. What have we accomplished over the past few years is an asset as individuals dealing with those in diability will go a long way in supporting even the orphans.

The Bank's commitment on disability issues is channeled across all aspects of our work through a three-pronged approach—*building evidence, promoting operational interventions, and establishing partnerships.* On Building evidence In collaboration with other organizations, the Helpers Of Africa Internationalwill published the strategic plan on Disability, the first of its kind, has significantly contributed to the international discourse on disability and development. The plan will analyze the socio-economic impact of disability based on the best empirical evidence available; filling major knowledge gaps, particularly in health, education, humanitarian care and labor, and recommended clear, implementable actions to improve the lives of people with disability.We are also developing the Model Disability Research (MDS) with other organizations. This research will address the lack of accurate and comparable data on disability both at national and international levels, which was identified by previous Global reports the on Disability as one of the major impediments in developing a better understanding of disability and to the development and implementation of disability inclusion policies. The Helpers Of Africa Internationalalso will produces independent empirical studies on poverty and disability, disability and education, and disability and labor markets in developing countries . We are also focusing the process of conducting disability assessments and certification, which will help develop useful operational tools, and build the capacity of the Helpers Of Africa Internationaland client agencies for improving these systems.The Bank is currently finalizing a comprehensive piece of work on Disability Pensions and Insurance that countries can engage along with health care scheme Good Samaritan Cards that we want to support to provide recommendations for developing. The study assesses the design, outreach and costs of social insurance programs and takes stock of existing programs and institutions to promote opportunities and provide income protection for persons with disabilities . The Bank's plan encompases all sectors on transport sector of special buses of those with disability in many countries where those living with disability are not included in the normal transport system denying them the rights for movement and enjoying holidays. Our strategic plan book includes design guidelines and information on the adoption of low-cost technologies/practices in the transport sector; and lessons learned on "what" and "how-to" from operational work.

" Today, one billion people globally live with some form of disability, and disability prevalence is higher for developing countries. The social exclusion of persons with disabilities is unacceptable in the face of economic and social progress witnessed around the globe. "Promoting integration into operations and socio-economic inclusion:
We shall scale up our efforts in developing interventions that directly include people with disabilities. In this regard, Helpers Of Africa Internationaland other organizations will finance projects and programs in this directions will contribute to evidence into specific actions and projects. We've also made increased efforts to make *social inclusion* a more fundamental issue in operations, and make it more central in our efforts to achieve our core goal of eliminating extreme poverty. This has had significant implications on how we treat the issue of social inclusion in all of our activities. The integration of disability issues into Bank operations spans a wide range of sectors and covers a broad typology of interventions, which include promoting access to infrastructure facilities and social services, rehabilitation, skills development, creating economic opportunities, working with Disabled People's Organizations, focusing on the most vulnerable among people with disabilities, such as women and children, and influencing policies and institutional development. We have made significant strides and the list is long but will highlight a few here. We seek to support expanding the network of services for children-at-risk (including children with disabilities) in alignment with the legal and policy framework with the Rights of Child while strengthening the capacity of the institutions responsible for designing and overseeing programs for child protection. We shall launch entrepreneurship enhanced economic opportunities for rural populations and the most vulnerable groups, including those with phyiscal disabilities, though self-help groups including supporting inclusive education for children with disabilities including those with learning disabilities focusing on providing services for intellectual and developmental disabilities.

We shall also seek to strengthen technical education targeted especially to disadvantaged groups, including persons with disabilities including marketing products and equipments that have been made by people living with disability. This will be done through supporting to short-term training of youth between 16-40 years of age through designated training,, for trainees with disabilities. Our projects will work with civil society organizations to reach marginalized groups and currently includes a pillar on disability that focuses on capacity building and grant financing for disabled people's organizations (DPOs). We shall seek to build Social safety nets and support Integrated Early Childhood Development Project including components to provide education and health services to children with disabilities. We shall seek to support the creation of community-based infrastructure services (including health clinics and schools) with focus on accessibility of people with disabilities. We shall support the design of projects and programs living with disability to improve accessibility measures including advocating for parking slots, shoping malls, markets and buildings , airports that accommodate and are disability friendly. We shall also support factories and industries that make disability equipments and accessories with loans and grants respectively through our industry development departments.

Helpers Of Africa Internationalwill launch a Development and Loan to help governments to build cities and townships with action plan on accessibility and urban transport with specific focus on identifying priority interventions in select major cities and review of construction code to promote accessibility. We shall support and finance global, continental and national workshops to engage policy and decision makers at the ministerial level, and the recommendations of the national plans to care for disability friendly systems integrations and interventions. We seek also to ensure that Covid 19 protection gears , water and stilizers are provided along with medication along with the delivery of improved rehabilitation and prosthetic services for people with disabilities. We shall support for improving services and employment opportunities for people with disabilities. Through our innovation and creativity department we shall seek to design equipment's universal mobility. We shall also support to improve policy-making and the institutional framework addressing people with disability along with supporting education programs and institutions improvements of education for children with disabilities. We cannot do this alone but we shall Building Partnerships globally with organizations, institutions and platforms globally to build partnerships with crucial roles both at the strategic level, by developing policy and institutional frameworks, and at the project level, through joint implementation with National and community based organizations to promote inclusion of people with disabilities across all areas that affect lives and livelihoods in shelter, clothing, food, education, health, insuarances, pensions, disaster management etc. We shall finance disability interventions in all faces and sectors through Helpers Of Africa Internationalprojects and departments of children, orphans, men, women , youth, mining, agriculture & food production to ensure that there is total inclusivity of those living with **Disability** globally. We shall also host donor forums of International development agencies , NGOs , Gorvernments ministries and departments all major bilateral and multilateral development agencies with the objective of fostering international cooperation for the implementation of a global disability plan.

Helpers Of Africa Internationalwill continue to engage with as many disabilty Support Groups globally on the Implementation of the Convention on the Rights of Persons with Disabilities. The Bank serves as an observer to promote mainstreaming of benefitial programs reaching even to refugees along with all humanitarian and development agencies. We shall advocate the progress in disability mainstreaming across countries and agencies, and shares knowledge and best practice. We shall support The development community to make some impressive gains in addressing disability through your partnership donors we shall do much more. There is tremendous potential to increase our impact by doing things differently and more inclusively on matters that pertains to disability. There are huge challenges ahead, but we believe that by moving beyond traditional way of doing business, by the grace of God who helps us to be blessed by supporting the weak we shall achieve more to see much better results in the implementation of disability inclusive development . The Kingdom Bank's short to medium term 10 yrs goal is to vastly increase the Bank's ability to incorporate disability effectively, further strengthening our multi-dimensional approach. To accomplish this further, we shall set up groups of focal points from across the organization and globe to oversee the implementation of the agenda. The newly created Social, Urban, Rural and Resilience Global Practice, which houses the disability agenda, works towards building sustainable, inclusive communities, in both rural or urban settings. Disability is at the core of these efforts to build sustainable, inclusive communities. To further strengthen our joint efforts on disability, we plan to establish a platform drawing upon colleagues from various units across the Helpers Of Africa InternationalGroup - transport, water and sanitation, health, education, social protection, fragility conflict and violence etc., including other organizations to bring in private sector approaches to address issues of disability. This group will promote disability related work in their respective organizational units, and would work with social development specialists to ensure that the voices of the poor and vulnerable are reflected in our operations. We have also appoint Disability Advisors, who will work across all global practices and regions. Building staff skills for scaling up of our interventions and identifying additional entry points in projects and programs. We shall set up mechanisms for doing for social development specialists we have in the Practice who help conduct social analysis and assessments in a vast majority of operations, and who will play a key role in identifying and addressing disability issues in our projects. We plan to train them to better identify and address disability issues in operational and analytical work). Enhancing the knowledge and skills of these staff on "how to" include persons with disabilities is crucial. Joint staff learning between relevant organizations will be crucial to help all of us become stronger and better at addressing this important agenda.

Addressing disability issues in business processes and developing guidelines: Building on the analytical and operational work outlined earlier, we will make a more concerted effort to flag disability at the project concept stage, so that it can be integrated into project design and implementation, wherever feasible and pertinent. Discussing this at the project concept stage enables us to discuss it more systematically and explicitly with our clients. We are also updating the social assessment guidelines for the Kingdom Bank, which form the basis for providing advice to clients on how to identify and address social issues in operations, to include a section on disability issues. The objective is to make disability an integral part of our poverty and shared prosperity agenda. Doing things differently implies focusing on the enhancing the abilities, opportunities, and also the dignity of people with disabilities to help them become agents of development. It is important to shift the paradigm from seeing persons with disabilities solely as recipients of charity to strengthening their participation and role in the development process. This new approach should go beyond the socio-economic inclusion of people with disabilities and move towards a framework that recognizes their abilities as an asset to their communities and beyond. We are keenly looking forward to learning from the experience and insights of you our donors and your partners in all areas especially in this platforms and all our departments including how to deal with disability on how we can collective help promote this global ambitious and transformational agenda. In this agenda and strategic plan we seek to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all" we aim to make all the Helpers Of Africa Internationalfinanced projects/programs in education disability from our onset ensuring all education projects/programs are disability-inclusive.

The Helpers Of Africa Internationalwelcomes the opportunity to host the Initiative for Inclusive Education with support from like minded organizations and will support clients with the necessary technical expertise and resources to help catalyze their progress in reaching children with disabilities and in exploring innovative and inclusive pedagogies and learning environments with new ways of facilitating education.We shall also support private sector projects, committed to promote an inclusive agenda, which includes the right environment for equal opportunities for people with disabilities (including physical, learning, sensory, emotional), as well as non-discrimination. The Kingdom Education team, together with input from the Kingdom Bank, aims to develop a set of principles for education investments which will help push forward the inclusion and non-discrimination agenda in the sector, complementing other relevant focus areas such as gender, race, ethnicity, language, harassment and will include specific references to disability inclusion. On Technology and Innovation We shall encourage and advocate all digital development projects will be screened to ensure that they are disability sensitive including through the use of universal design and accessibility standards and we shall support technology companies we shall support in loans or grants on health, education and manufacturing etc. Achieving disability inclusion and empowerment demands transformative shifts and innovative solutions for removing structural barriers. Innovation and technology provide unprecedented opportunities in this regard, particularly for persons with disabilities, children with disabilities, and many persons with invisible disabilities experiencing marginalization.

Social innovations have the potential to serve as a powerful tool to break trends and increase the awareness, access and availability of opportunities for marginalized groups. Innovative approaches are central to delivering solutions for all. Information and Communication Technology (ICT)-enabled services and resources are often major elements of development projects, including initiatives to promote access to banking, expand health care, education, and income generation, strengthen disaster response and management, or access any government-related services. ICT can make previously inaccessible forms of written and spoken communication accessible to all. The multiple modes of communication can improve the functional capabilities of individuals with disabilities in an affordable way. Helpers Of Africa International**will consider initiatives that could facilitate the deployment of assistive technologies in emerging markets.** We shall fund a feasibility studies to help inform how best to accelerate the deployment of assistive technologies in the emerging markets. We shall also be introducing a category for awards on Assistive Technology as part of motivation for various humanitarian achievements done by various people annually to strengthen those that are involved with humanitarian work globally especially on work of disabilities. We shall also **Commit resources to support strengthened disability data and those organizations that deal with them currently because without data and statitics there is no effective response.** Under the Helpers Of Africa InternationalStrategy for Household Surveys to address data deprivation the Helpers Of Africa Internationalwill provide technical assistance and analytical support to client countries in their efforts to scale up the collection, and the effective use, of disability data from future national surveys and population censuses, guided by global standards and best practices, The Helpers Of Africa InternationalGroup will provide its project staff with clear and openly accessible guidelines for disability data collection globally based on disability questions for them to provide appropriate advice to its client countries.

Helpers Of Africa InternationalIn the short and medium-term, the Helpers Of Africa InternationalGroup commits to work with countries to:

1. Take stock of disability data in existing household surveys and censuses to establish a baseline
2. Include the short set disability questions in all censuses of the 2021 round supported by Helpers Of Africa InternationalGroup, via lending and/or TA.
3. Incorporate the Washington Group short set questions in countries with upcoming household surveys supported by the KBG.
4. Provide Technical Assistance that nudges all countries and organizations working with the WBG on collecting Household Surveys to use set disability questions as a default. The KBG will adapt its household survey guidance to recommend the set disability questions as best practice to collect data for disaggregating by disability. Furthermore, even among surveys not supported by the KBG, the KBG will advocate for collection of disability data globally
5. Include profiles of the disabled population in our publications such as poverty assessments and poverty and equity briefs, as data becomes available. This will help make this invisible dimension, much more visible in everything we do.

In the long term we will work towards mainstreaming of the inclusive data agenda in all countries we support by also building administrative systems to collect data on disability going forward along with other datas of education, health, humanitarian support. Our Strategic plan will also stretch to Women and Girls with Disabilities, The KBG commits to exploring opportunities to focus more deliberately on the economic empowerment of women and girls with disabilities. Through our Women and Youth Girls Wing departments we shall creates a unique opportunity to tackle, comprehensively, the full range of barriers facing women across developing countries. Future rounds of our funding will provide opportunities to focus more deliberately on the economic empowerment of women and girls with disabilities, by addressing the policy and regulatory frameworks; designing projects, for example, in the transport and ICT sectors, with a gender disability lens; and developing and rolling out new products, for example, disability insurance. The next round of the Women department will feed into a dataset on empowerment and development projects to support women and girls into global opportunities, will extend to those who live with disabilities.

Our Humanitarian programs will include projects financing public facilities in post-disaster reconstruction efforts will be disability-inclusive including feeding, shelter, education, slums upgrade, cities development, food production refugees, We shall advocate that all Transport in new urban mobility and rail projects supporting public transport services will be inclusive in their designs so as to incorporate key universal access features for people with disability and limited mobility. Ensuring that equity considerations, including access to persons with disabilities, continue to remain at the forefront of the Sustainable Mobility for All initiative. Currently under this initiative a Global Roadmap of Action is being developed by over 50+ global actors in transport. Under the Universal Access theme (one of 5 themes) the roadmap will propose actionable recommendations with regard to access for persons with disabilities. Advocate for enhanced road safety outcomes, given that road crashes are one of the most significant public health issues of the century, causing both death and disability. This work will be led by the Global Road Safety Facility which provides funding, knowledge, policy guidance, and technical assistance and generates research to leverage road safety investments in transport and health operations. We shall commit funds to support a specific research program on disability from road crashes and how to mitigate it globally through road safety. On Private Sector Enhanced due diligence on private sector projects. KBG will consider ways to enhance its due diligence regarding disability inclusion, including encouraging clients to adopt Good International Industry Practice (GIIP) related to disability inclusion and access. KBG will also prepare a Good Practice in industries favor people living with disability. On Social Protection, we shall seek to advocate countries adopt projects that have Social Protection globally will be disability inclusive.

On our Staffing, We shall also ensure our staff in KBG Include people living with disability. Currently, the Bank follows a process of voluntary disclosure of staff with disabilities. The Bank commits to actively seeking to hire and retaining staff with disabilities, and to improving accessibility, services and inclusion. Our Strategic plan will canvas policies and, to the extent possible, practices of major multilateral and bilateral development agencies, aimed at including disability in development. Development that includes disability in which persons with disabilities participate as both actors and beneficiaries. This will be achieved by disability specific initiatives, by adding disability-specific components to development programs, by fully inclusive programming, designed to include disability concerns into all development processes, or by a combination of these approaches globally. We may not cover every one single case but by the grace of God, your funding and collaborations we shall attempt to provide as comprehensive as possible an overview of policies and practices on disability and development through the network of Nations we shall engage and partner Globally and among major bilateral development agencies. It should be noted that this is a dynamic issue and thus many development agencies are either in the process of crafting new disability policies or strategies or are currently reviewing their existing approaches with a view to modifying or amending them. We shall support international legal and policy framework pertinent to the consideration of D&D with particular attention to the Convention on the Rights of Persons with Disabilities and Global Development Goals. We shall partner with multilateral agencies and structures, particularly those who will seek our hand of partnership and reviews their existing policies and/or practices related to disability participation in development. We shall enhance our regional structures supporting the inclusion of disability in development. We shall advocate, promote and finance systems and global policies to take steps to design and implement programs and practices that are inclusive of disability.

It is estimated that 10 percent of the world's population. The majority of persons with disabilities are estimated to live in developing countries, the fact that reflects the distribution of the world's population. The prevalence of disability is observed to increase with the age of the population. Some Facts from Around the World Disability is a stronger correlate of non-enrollment in school than either gender or class. "Analysis of 14 household surveys from 13 developing countries suggests that 1-2 percent of the population have disabilities. Adults with disabilities typically live in poorer than average households: disability is associated with about a 10 percentage point increase in the probability of falling in the two poorest quintiles. Much of the association appears to reflect lower educational attainment among adults with disabilities. People of ages 6-17 with disabilities do not live in systematically wealthier or poorer households than other people of their age, although in all countries studied they are significantly less likely to start school or to be enrolled at the time of the survey. The order of magnitude of the school participation deficit associated with disability - which is as high as 50 percentage points in three of the 13 countries - is often larger than deficits related to other characteristics, such as gender, rural residence, or economic status differentials.

The global crisis of COVID-19 is deepening pre-existing inequalities, exposing the extent of exclusion and highlighting that work on disability inclusion is imperative. People with disabilities—one billion people— are one of the most excluded groups in our society and are among the hardest hit in this crisis in terms of fatalities. Even under normal circumstances, persons with disabilities are less likely to access health care, education, employment and to participate in the community. They are more likely to live in poverty, experience higher rates of violence, neglect and abuse, and are among the most marginalized in any crisis-affected community. COVID-19 has further compounded this situation, disproportionately impacting persons with disabilities both directly and indirectly. An integrated approach is required to ensure that persons with disabilities are not left behind in COVID-19 response and recovery. It calls for placing them at the centre of the response, participating as agents of planning and implementation. All COVID-19 related action must prohibit any form of discrimination based on disability and take into consideration the intersections of gender and age, among other factors. This is necessary effectively and efficiently to address and prevent barriers that may arise during response and recovery. Disability inclusion will result in a COVID19 response and recovery that better serves everyone, more fully suppressing the virus, as well as building back better. It will provide for more agile systems capable of responding to complex situations, reaching the furthest behind first. This Policy Brief highlights the impact of COVID19 on persons with disabilities and in doing so, outlines key actions and recommendations to make the response and recovery inclusive of persons with disabilities. While the brief contains specific recommendations focusing on key sectors, it identifies four overarching areas of action that are applicable for all.

1. Ensure mainstreaming of disability in all COVID-19 response and recovery together with targeted actions. A combination of mainstream and disability-specific measures are necessary to ensure systematic inclusion of persons with disabilities.
2. Ensure accessibility of information, facilities, services and programmes in the COVID-19 response and recovery. Accessibility is fundamental to the inclusion of persons with
disabilities in the immediate health and socio-economic response to COVID-19. If public health information, the built environment, communications and 2

Our Kingdom Global Disabilty Empowernment Agency will support and fund dissabilty empowerment technology COVID-19 technologies, and goods and services are not accessible, people with disabilities cannot take necessary decisions, live independently and isolate or quarantine safely, or access health and public services on an equal basis with others. 3. Ensure meaningful consultation with and active participation of persons with disabilities and their representative organizations in all stages of the COVID-19 response and recovery. Persons with disabilities have important contributions to make in tackling the crisis and building the future. Many persons with disabilities have experience of thriving in situations of isolation and alternate working arrangements that can offer models for navigating the current situation. Perspectives and lived experiences of disability contribute to creativity, new approaches and innovative solutions to challenges.

Helpers Of Africa Internationalwill support the Establishment of accountability mechanisms to ensure disability inclusion in the COVID-19 response. Ensure inclusive investments to support disability-inclusive outcomes. Governments, donors, development agencies and other actors need to establish mechanisms to monitor investments to ensure it is reaching persons with disabilities. Disaggregating data by disability is key to ensure accountability. Inclusion of persons with disabilities in the COVID-19 response and recovery is a vital part of achieving the pledge to leave no one behind, and a critical test of the global commitments of the Convention of the Rights of Persons with Disabilities (CRPD), the 2030 Agenda for Sustainable Development, the Agenda for Humanity and the Global Disability Inclusion Strategy. It is also central to the Helpers Of Africa Internationalcommitment to achieve transformative and lasting change on disability inclusion. Technologies, and goods and services are not accessible, people with disabilities cannot take necessary decisions, live independently and isolate or quarantine safely, or access health and public services on an equal basis with others.

3. Ensure meaningful consultation with and active participation of persons with disabilities and their representative organizations in all stages of the COVID-19 response and recovery. Persons with disabilities have important contributions to make in tackling the crisis and building the future. Many persons with disabilities have experience of thriving in situations of isolation and alternate working arrangements that can offer models for navigating the current situation. Perspectives and lived experiences of disability contribute to creativity, new approaches and innovative solutions to challenges.

4. Establish accountability mechanisms to ensure disability inclusion in the COVID-19 response. Ensure inclusive investments to support disability-inclusive outcomes. Governments, donors, development agencies and other actors need to establish mechanisms to monitor investments to ensure it is reaching persons with disabilities. Disaggregating data by disability is key to ensure accountability. Inclusion of persons with disabilities in the COVID-19 response and recovery is a vital part of achieving the pledge to leave no one behind, and a critical test of the global commitments of the Convention of the Rights of Persons with Disabilities (CRPD), the 2030 Agenda for Sustainable Development, the Agenda for Humanity and the United Nations Disability Inclusion Strategy.

It is also central to the Helpers Of Africa Internationalcommitment to achieve transformative and lasting change on disability inclusion. How COVID-19 impacts persons with disabilities Persons with disabilities are disproportionately impacted by the COVID19 outbreak. An estimated 46% of older people aged 60 years and over are people with disabilitie.1 One in every five women is likely to experience disability in her life, while one in every ten children is a child with a disability.2 Of the one billion population of persons with disabilities, 80% live in developing countries. This special population represent They represent a diverse population of people with different impairments and support requirements, who face significant barriers in exercising their rights throughout the lifecycle. Some groups face even greater marginalization—for example persons with intellectual and psychosocial disabilities, persons who are deafblind—who are more likely to be excluded from services, live or be detained in institutions, and experience higher rates of violence, neglect and abuse. Our strategic plan is a Shared Responsibility, Global Solidarity' with other players on the socio-economic impact of the pandemic reflects, COVID-19 is not simply a health crisis—it is attacking societies at their core.The response is feeding on pre-existing social and economic inequalities associated with disability and threatens to exacerbate them further.

Even in past disasters of earth quakes, floods, pademics etc people living with diasabilities were more affected more than others They are among the most marginalized people in crisis-affected communities 2 and are disproportionately affected by conflict and emergency situations. In disasters, their mortality rate is two to four times higher than that of persons without disabilities. Persons with disabilities are not aœhomogeneous group. They are diverse in their experience, in the ways that attitudinal, physical and communication barriers impede their participation and inclusion in humanitarian action, and in their identity, including their age, gender, ethnicity, location and race. Due to the intersectionality of these factors, persons with disabilities face greater marginalization and discrimination. During humanitarian crises, for example, children with disabilities are at higher risk of abuse and neglect, and women with disabilities are at higher risk of sexual violence.

Persons with disabilities are at greater risk of contracting COVID-19. They may experience barriers to implement basic protection measures such as hand-washing and maintaining physical distancing for several reasons: lack of accessibility of water, sanitation and hygiene (WASH) facilities; a reliance on physical contact to get support; inaccessibility of public health information; or being placed in institutional settings which are often overcrowded and unsanitary. These barriers are exacerbated for those living in informal settlements and/ or affected by humanitarian emergencies. Persons with disabilities are at greater risk of developing more severe health conditions and dying from COVID-19. They have greater health requirements and poorer health outcomes. For example, they are more susceptible to secondary conditions and co-morbidities, such as lung problems, diabetes and heart disease, and obesity, which can worsen the outcome of COVID-19 infections.The barriers to accessing healthcare are further exacerbated during the COVID-19 crisis, making timely and appropriate care difficult for persons with disabilities. Persons with disabilities living in institutions are more likely to contract the virus and have higher rates of mortality. Persons with disabilities, including older people with disabilities, represent the majority of institutionalized people globally. People with disabilities are also overrepresented in the prison population, particularly persons with intellectual and psychosocial disabilities.

People in institutional settings, such as nursing homes, social care homes and psychiatric facilities, as well as detention facilities and penitentiaries, experience significant barriers to implement basic hygiene measures and physical distance, and have limited access to COVID-19-related information, testing and healthcare. Emerging evidence indicates that people in institutional settings are experiencing the highest rates of infection and mortality from COVID-19.The percentage of COVID-19 related deaths in care homes—where older persons with disabilities are overrepresented—ranges from 19% to 72% in countries in which official data is available. Persons with disabilities are at greater risk of discrimination in accessing healthcare and life-saving procedures during the COVID19 outbreak. In some countries, health care rationing decisions, including triage protocols Moreover, access to healthcare, rehabilitation and assistive technologies for persons with disabilities, including with respect to accessibility and affordability,can also be curtailed due to the increased pressure on healthcare systems. Persons with disabilities are particularly disadvantaged by the socio-economic consequences of COVID-19 and measures to control the pandemic. COVID-19 has both shortterm and far-reaching implications for people with disabilities in many areas of life, which may be further exacerbated in humanitarian and disaster contexts and fragile settings: • Impact on employment and social protection. Already facing exclusion in employment, persons with disabilities are more likely to lose their job and experience greater difficulties returning to work during recovery. In most countries social protection systems offer little support to persons with disabilities and their families with much less access to social insurance. Only 28% of persons with significant disabilities have access to disability benefits globally, and only 1% in low-income countries. The increased demand for unpaid care and domestic work in the context of the pandemic is deepening already existing inequalities which may be exacerbated for women with disabilities. Impact on education. While reliable figures on students with disabilities are not yet available, it is likely that the current crisis has exacerbated their exclusion from education. As detailed in the policy brief on the impact of COVID-19 on children, students with disabilities are least likely to benefit from distance learning solutions. Lack of support, access to the internet, accessible software and learning materials is likely to deepen the gap for students with disabilities. Disruption to skills and training programmes are likely to have far-reaching effects on youth with disabilities who face a multitude of barriers to entering the workforce. • Impact on support services. For many people with disabilities, access to support services is essential to lead safe, healthy and independent lives. Measures to contain the spread of COVID-19 have resulted in 12 A. support systems and informal networks, such as personal assistance, sign language and tactile interpretation, and psychosocial support. The economic impact of COVID-19 may also lead to even greater cuts within existing services in the post-pandemic period. • Impact of violence on persons with disabilities.

The policy brief on the impact of COVID-19 on women documents early reports which indicate a substantial increase of domestic violence in the midst of lockdown measures, which has a particular impact on women and girls with disabilities. Given that both children and adults with disabilities are at much higher risk of violence than their peers without disabilities, it can be assumed that they are disproportionately impacted. Increased stigma and discrimination against persons with disabilities within communities has also been reported. A human rights-based approach to disability is required to ensure persons with disabilities are not left behind. Both the CRPD and the 2030 Agenda call for placing persons with disabilities at the centre of all our efforts, as agents of planning and implementation. A combination of mainstreaming and targeted measures is necessary in all interventions. Persons with disabilities share the same primary needs as everyone else: health protection and treatment, basic services, shelter and income. The best way to address their inclusion is through mainstreaming disability in all plans and efforts. Targeted measures need to complement disability mainstreaming by addressing specific requirements that cannot be met by making general responses inclusive. Non-discrimination is a core human rights principle. COVID-19 response and recovery must prohibit discrimination on the basis of disability, as well as any criteria which could have a disproportionate impact on persons with disabilities. It is necessary to recognise and take measures against disadvantage experienced by persons with disabilities by taking proactive steps, including through reasonable accommodation, to ensure they equally benefit from COVID-19 response measures. Persons with disabilities experiencing intersectional and multiple discrimination as a result of their gender identity, age, ethnicity, race, sexual orientation, origin, location and legal status, among other factors, will carry a heavier burden of the immediate and longterm economic and social consequences of the pandemic. COVID-19 response and recovery needs to reflect and respond to the multiple and intersecting forms of discrimination faced by persons with disabilities to ensure that the most marginalised groups among them are not left behind.

Foundations for a disability-inclusive COVID-19 response and recovery. We are all in this together dear partners and donors for Reasonable Accommodation “Necessary and appropriate modification and adjustments not imposing a disproportionate or undue burden, where needed in a particular case, to ensure to persons with disabilities the enjoyment or exercise on an equal basis with others of all human rights and fundamental freedoms”. Our Disability and Development strategic plan will work towards , Realizing the Global Sustainable Development Goals by, for and with persons with disabilities, Ensuring accessibility of facilities, services and information is fundamental to a disability inclusive COVID-19 response and recovery. If public health information, buildings, transport, communications, technologies, goods and services are not accessible, persons with disabilities cannot take necessary decisions, live independently and isolate or quarantine safely, or access health and public services on an equal basis with others. Such measures do not need to add greatly to overall cost especially if the needs of the maximum number of users are considered in the initial design.

This stratergic plan Research shows that if they are considered from the design stage, ensuring accessibility. Participation of Persons living with disabilities have the right to participate fully and effectively in decisions that affect their lives. They are a diverse, non-homogenous population who possess unique knowledge and lived experience of disability that others do not. Close consultation and active involvement of people with disabilities and their representative organizations at all stages–from planning and design to implementation and monitoring— is key to ensuring inclusive response. Partnerships and collaboration will improve effectiveness and accountability, assist in directly achieving inclusion and ensuring that all action related to COVID-19 benefits persons with disabilities, and contributes to longer-term development and recovery. We shall seek a great global partnership with like minded organizations and institutions to be able to reach every continent, countries, cities, counties and villages reaching to every community. Accountability is essential for ensuring that the COVID-19 response and recovery is inclusive and respectful of the rights of persons with disabilities. Governments, Helpers Of Africa Internationaldepartments, sections and entities and other actors are accountable to affected populations, including persons with disabilities, and mechanisms need to be established to engage with communities to inform programming and adjust it according to feedback.

Helpers Of Africa Internationalwill support global data disaggregation to understand the different ways in which people with disabilities experience the impact of COVID19, and to monitor their inclusion in all phases of the response and recovery, ensuring the collection and availability of disaggregated data by disability is essential. To that end, data will be collected using internationally recognized methods, such as the countries census protocals with partnerships with governments. More in-depth qualitative data can be collected through needs assessments and surveys, such as the Global Model Disability Survey. For planning purposes, where primary data collection is not undertaken or secondary data sources on disability is not available. Other global organizations have more accurate 15 per cent estimate of persons with disabilities in the population may be used. Our Global Universal design stardards means the design of products, environments, programmes and services to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design to get more accurate datas. Our Structure outlines key actions to protect persons with disabilities from contracting COVID-19 and the impact of lockdowns, physical distancing and isolation measures, and to achieve a disability-inclusive response and recovery. To Support health of People with disabilities are more susceptible to contracting COVID-19, and barriers to accessing health services, including testing, are exacerbated during the crisis. Lockdowns can lead to restricted access to essential goods and medicines, as well as limit access to supports. The disruption of wider health services puts persons with disabilities at a disadvantage as they may require more frequent access due to underlying health conditions.

We shall support to ensure accessible public health information with an appropriate response that requires measures to ensure that information is accessible, up to date, and keeps pace with the rapidly changing knowledge evidenced during the pandemic and after that will help us manage other pademics in future in the same platform .We shall support some countries that have already begun to produce information and links on COVID-19 in Easy-toRead format in multiple languages. Through the joint Global Partnership on the Rights of Persons with Disabilities programme information on COVID-19 included accessibility features, including sign language. Implement protective measures against COVID-19 and Access to appropriate WASH facilities that make frequent hand-washing possible is essential, as is the targeted provision of protective measures for those providing support to persons with disabilities either at home or in institutions. The distribution of personal protective equipment to persons with disabilities needs to be tailored to their impairment. For example, given that masks make it impossible to read lips or see facial expressions, deaf and hard of hearing persons will benefit better from face shields. Ensure accessibility to services. Measures need to be put in place to facilitate the timely access to health services for persons with disabilities, such as transportation to healthcare facilities, access to sign language interpretation in hospitals, as well as the procurement of goods, medicines and services. Essential health services, including sexual and reproductive health, must be accessible—for example, ensuring telehealth programmes are accessible for persons with disabilities who require different modes of communication.

We shall support national programme to test persons with disabilities in their homes, COVID-19 tests of persons with disabilities. Ensure non-discrimination in the allocation of scarce medical resources. It is important to mitigate the risk of discriminatory decisions in resource allocation that put people with disabilities at a high level of disadvantage by applying ethical principles that prioritize treatment for persons in situations of particular vulnerability. Make mental health interventions inclusive of persons with disabilities. Anxiety, lockdowns, isolation, and information consumption, loss of livelihoods and support systems due to the pandemic impact on mental health of all people, including persons with disabilities. As documented in the policy brief on the impact of COVID-19 on older persons, physical distancing measures that restrict visitors and group activities in institutions can also negatively affect physical, as well as mental health and well-being. Mental health and psychosocial support needs to be accessible and not discriminate against persons with disabilities. We seek an to support a disability-inclusive response to covid-19 protecting people in institutional settings Institutional settings have become COVID-19 hotspots, highlighting systemic challenges in these settings. People with disabilities in institutional settings face heightened risk of contracting and dying from COVID-19. Their situation is compounded by greater risks, such as abuse, restraint, isolation and violence. Prepare institutions to prevent and respond to potential infections.

We shall support prioritising testing and preventive measures within institutions to reduce infection risks, addressing overcrowding, isolation and physical distancing measures among residents, modifying visiting hours, ensuring use of protective equipment is mandatory, and improving hygiene conditions. It is important to guarantee that those who contract the virus receive adequate treatment and health care and, when needed, are transferred to hospitals and/or emergency care units, In some countries priority testing guidelines have been issued with specific measures for institutional settings. Reduce the number of people within institutions. It is important to take immediate action to discharge and release persons with disabilities from institutions, whenever possible. Deinstitutionalization strategies need to be accelerated and reinforced with clear timelines and concrete benchmarks. Reduce the number of persons with disabilities in prisons. Whenever possible, it will be important to explore early release and probation or shorten or commute sentences. Other possible measures would include reducing the use of pre-trial detention, and promptly ensuring support in the community through family and/or informal networks.
In a number of countries around the world prisoners with disabilities have been released.

We shall support services for people living with disabilities. Many persons with disabilities rely on support services for daily living and to participate in their communities. These include personal assistance, sign language and tactile interpretation, in-home services and peer support, amongst others. Ensure the continuity of support services. It is important to develop and implement service continuity plans, particularly for people with disabilities with high support needs, as well as measures to reduce potential exposure to COVID-19 during the provision of services. This includes practical guidance and updated advice to informal carers on how to support persons with disabilities in a manner safe for everyone. Expand community support for persons with disabilities. The growth in demand for support services in the community without a corresponding supply of services can increase pressure on families to provide unpaid, informal care, with negative consequences on both persons with disabilities and family members, particularly women. In some countries persons who provide support to people with disabilities are exempted from restrictions of movement and physical distancing.We shall recruit and train volunteers as social, health and first aid workers to support persons with disabilities and older persons with their groceries and other purchases. We shall support and advocate social protection and employment for people living with disability. Social protection has already proven a key element in the immediate relief to be provided to persons affected by the socio-economic impact of the crisis. It is particularly relevant for persons with disabilities out of work, who have lost their job or their income resulting from the informal economy, all of which are at risk of poverty and extreme poverty. Expand mainstream and disability-targeted social protection and adapt delivery mechanisms to provide adequate relief and support to persons with disabilities and their families.

This strong support is crucial through your funds and this can be done by: advancing and/ or increasing payments of disability benefits; extending coverage to persons with disabilities already registered but who were not previously eligible, and through (online) registration of persons with disabilities; providing disability top-ups to beneficiaries of mainstream social assistance schemes, including to family members who have to stop work to support persons with disabilities; and establishing electronic payment and home delivery for cash and essential food and non-food items. Employment and working conditions need to be responsive to accessibility and inclusion. Persons with disabilities who continue working, whether essential workers or others, may need specific protection or adjustments to stay safe during the pandemic. At all times it is important that employers and workplaces provide accessible environments and reasonable workplace adjustments based on individual needs. Persons with disabilities who own businesses or work in the informal economy may need particular support to be able to maintain their livelihoods. Alternate working arrangements and conditions made accessible and inclusive. Platforms and new ways of meeting must be accessible to all, and adequate adjustments put in place to allow persons with disabilities to work from home. This we shall advocate and support strongly.

We shall support governments and organizations to Ensure disability-inclusive Occupational Health and Safety (OSH) measures. New OSH measures may apply particularly to persons with disabilities. In such cases, different arrangements may be required, such as priority to work from home or placed in paid leave. Approaches to coming out of lockdown need to be sensitive to the particular situation of persons with disabilities. Persons with disabilities and their family members or support services have different levels of vulnerability to COVID-19. Some persons with disabilities, including older persons with disabilities, may need to isolate for longer than other groups. Social protection and working arrangements need to be adaptive to support their ability to do this. Together with other institutions we shall develop more action plans developed a guidance note on socioeconomic actions for persons with disabilities. We shall avail Information on disability inclusion in COVID-19 and the world of work and Social protection measures for persons with disabilities in the COVID-19 crisis.

On EDUCATION Students with disabilities are likely to face greater barriers in accessing distance learning or rejoining classes once they are available, and face increased risk of dropping out of education during disruptions to learning. Ensure distance learning is accessible to, and inclusive of, students with disabilities. Education actors need to take measures to ensure continuity of learning for students with disabilities and return to school programmes. This may include providing specialized equipment to support their learning, including assistive technology and devices, and support to caregivers/parents of children with disabilities.

We shall partner and support production of material a guidance note for staff and partners on supporting the learning of children in areas of school closures, which includes guidance on making learning accessible to children with disabilities. We shall Address impacts that go beyond learning. For many children with disabilities, peer relations, social perception and social competence are significant aspects of their Individual Education Plans, all of which are challenged in the context of school closures. School closings can also mean that many children with disabilities will not access complementary services, such as food and medical check-ups, or referral mechanisms for abuse and neglect. Ensure that return to school programmes are inclusive. Education actors need to ensure that return to school programmes are inclusive of children and young persons with disabilities, in recognition of the increase in the learning/achievement gap. This may include development of plans for accelerated education, remedial, and catch-up programmes.

We shall assist mitigation and prevention of and response to violence Persons with disabilities often face incidents of violence in situations of isolation, with women and girls with disabilities at even higher risk. Reporting and access to domestic violence services and assistance are particularly challenging, as these are commonly not inclusive of, nor accessible to persons with disabilities. Ensure inclusive and accessible victim assistance services. It is important to ensure that reporting mechanisms and access to victim assistance services are accessible to persons with disabilities. Being proactive and innovative in outreach to those who are isolated, including through voluntary networks, has proven to be a key measure, as well as ensuring that online counseling and other technology based solutions are accessible and respond to the diversity of people with disabilities. Strengthen awareness raising and knowledge. Building capacity of services and communities to prevent disability-related violence is key, as is promoting awareness-raising about violence against persons with disabilities, particularly women and girls. We shall collaborate with like minded institutions working with partners to integrate COVID-19 aspects to improve quality and standards for counselling and case management services that will particularly target women with disabilities to run campaigns on ending violence against women in a pandemic.

We shall also support the humanitarian outcomes that come with Persons with disabilities in humanitarian and disaster contexts face specific and heightened challenges in the COVID-19 outbreak: barriers to implementing basic hygiene measures; physical distancing limitations in high-density sites; barriers to accessing health care on the basis of both disability and legal status, which may determine and restrict their access to health care and other services. We shall form Inter-Agency Committees and forums to layout Guidelines on Inclusion of Persons with Disabilities in Humanitarian Action provide detailed sectoral information for stakeholders working in humanitarian contexts Ensuring disability-inclusive humanitarian assistance and disaster response.

We shall support National and local coordination mechanisms and networks, as well as Preparedness and Response Plans need to be disability-inclusive. In particular, it is important to ensure that Humanitarian Response Plans factor in responses targeted towards persons with disabilities, including in WASH, health, and food and nutrition, with adequate resourcing, monitoring and adjustment, as required. Concrete adaptions in humanitarian assistance could include, for example, improving accessibility of WASH facilities; distribution of additional or disability-specific hygiene items and supplies; targeted shelter assistance for at-risk individuals to allow for physical distancing; in-kind provision of goods, cash and voucher assistance, and direct service provision; and providing alternative arrangements for food and non-food items distribution to households of persons with disabilities along with "Sexual and reproductive health and rights of girls with disabilities: a review of the literature",

Everything we do during and after the COVID-19 crisis must have a strong focus on building more equal, inclusive and sustainable economies and societies that are more resilient in the face of pandemics and the many other global challenges we face. Countries' immediate efforts towards social and economic recovery will be crucial for progress towards the Sustainable Development Goals (SDGs), including addressing inequalities and ensuring that no one is left behind. While building back better, it is critical that persons with disabilities are part and parcel of the response which countries, with the support of Helpers Of Africa Internationalprepare plans for countries. These responses, if well designed, can address the exclusion and discrimination faced by persons with disabilities, thus creating more resilient communities and systems. To build equal, inclusive and resilient communities it is important to Meaningfully engage persons with disabilities at all stages of the response: When supporting local initiatives, governments, our partner entities, international donors and civil society organizations need to promote, fund and monitor the inclusion of persons with disabilities in all stages of design and implementation of the relevant measures. We shall seek to Prioritize persons with disabilities in the socio-economic response: National and sub-national economic models and assumptions need to be critically reviewed to identify gaps that disproportionately impact persons with disabilities and take into account the cost of underinvestment in disability-inclusion. Track inclusion and empowerment of persons with disabilities in national response and recovery plans: A long-term inclusive response needs to be closely tied to inclusive national development planning and financing processes. Disability inclusion should be a requirement in all COVID-19 actions and systems to allow tracking and accountability. We shall seek to Improve health outcomes for persons with disabilities: This entails building accessible health systems, rights-based training of health personnel and ensuring universal health coverage for persons with disabilities as a cornerstone for achieving the health-related global targets. Further, improving the determinants of health for persons with disabilities is critical.
We shall seek to Build sustainable and disability inclusive social protection systems, Universal disability allowances across the life cycle addressing disability-related. Delivering on global health goals. We shall set extra funds to design that these are compatible with employment and other social assistance schemes aiming at basic income security and Address the specific situation of workers with disabilities in all sectors: Stimulus packages, including those that will promote training and jobs in the transition to a green economy should explicitly include persons with disabilities in general, as well as women and youth with disabilities in particular by Investing in community-based solutions now: Particular attention needs to be given to persons with disabilities living in residential institutions and funds should be used to initiate, accelerate and complete deinstitutionalization strategies and transition to community-based solutions. This includes investing and developing support services and implementing inclusive services at local level, such as education and primary health care, including rehabilitation, as cornerstones for achieving the global health goals and targets for persons with disabilities.

We shall mobilize, support and Initiate multi-stakeholder dialogue and collaboration: Inter-sectoral linkage is required to address the multi-dimensional nature of disability and the intersectoral response that is necessary. Bringing together all stakeholders— government, Helpers Of Africa Internationalentities, private sector, organizations of persons with disabilities and broader civil society—in the design, implementation and monitoring of the long-term rebuilding plan will be critical. COVID-19 has created a human crisis of unprecedented scale, which is disproportionately impacting one billion people with disabilities. This requires an unprecedented response—an extraordinary scale-up of support and political commitment—to ensure that people with disabilities have access to essential services, including to immediate health and social protection services, to tide over the crisis. A disability inclusive COVID-19 response and recovery will better serve everyone. It will provide for more inclusive, accessible and agile systems capable of responding to complex situations, reaching the furthest behind first. It will pave the way for a better future for all. Our strategic plan on disability will be produced in partnership with the other like minded organizations, as previous experience has shown the benefit of collaboration between agencies for increasing awareness, political will and action across sectors.

Our strategic plan will help policy-makers, practitioners, researchers, academics, development agencies, and civil society. Aims The overall aims of the Report are: To provide governments and civil society with a comprehensive description of the importance of disability and an analysis of the responses provided, based on the best available scientific information. Based on this analysis, to make recommendations for action at national and international levels.

The Scope of the strategic plan focuses on measures to improve accessibility and equality of opportunity; promoting participation and inclusion; and increasing respect for the autonomy and dignity of persons with disabilities. We shall seek to define disability, discusses prevention and its ethical considerations, introduces the International Classification of Functioning, Disability and Health and the, and discusses disability and human rights, and disability and development, will reviews the data on disability prevalence and the situation of people with disabilities worldwide. Will also explores access to mainstream health services for people with disabilities. Will also discusses rehabilitation, including therapies and assistive devices. It will investigate support and assistance services and explore inclusive environments, both in terms of physical access to buildings, transport, and so on, but also access to the virtual environments of information and communication technology. It will also discusses education and review employment for people with disabilities.

Our smart team of consultants globally dealing with research on health, education, food production, development, charity, shelta, orphans etc of all our projects and programs consists of consultants, reseachers, editors, experienced people in all fields with global exposure along with an editorial board led by people with various disabilities. Our strategic plan charts the steps that are required to improve participation and inclusion of people with disabilities. The aspiration of Helpers Of Africa Internationaland her entities / departments. Our strategic plan on disability is that it contributes to concrete actions at all levels and across all sectors, and thus helps to promote social and economic development and the achievement of the human rights of persons with disabilities across the world.

For us to really under the need try to figure out the Environment A person's environment has a huge impact on the experience and extent of disability. Inaccessible environments create disability by creating barriers to participation and inclusion. Examples of the possible negative impact of the environment include: a Deaf individual without a sign language interpreter a wheelchair user in a building without an accessible bathroom or elevator a blind person using a computer without screen-reading software. Health is also affected by environmental factors, such as safe water and sanitation, nutrition, poverty, working conditions, climate, or access to health care. Such changes can be brought about by legislation, policy changes, capacity building, or technological developments leading to, for instance: accessible design of the built environment and transport; signage to benefit people with sensory impairments; more accessible health, rehabilitation, education, and support services; more opportunities for work and employment for persons with disabilities. Environmental factors include a wider set of issues than simply physical and information access. Policies and service delivery systems, including the rules underlying service provision, can also be obstacles.

Our strategic plan focuses human functioning in three interconnected areas: impairments are problems in body function or alterations in body structure – for example, paralysis or blindness; activity limitations are difficulties in executing activities – for example, walking or eating; participation restrictions are problems with involvement in any area of life – for example, facing discrimination in employment or transportation. Disability refers to difficulties encountered in any or all three areas of functioning

We shall also focus on "physical" and "mental" health. "Health conditions" are diseases, injuries, and disorders, while "impairments" are specific decrements in body functions and structures, often identified as symptoms or signs of health conditions. Disability arises from the interaction of health conditions with contextual factors – environmental and personal factors as shown in the figure below. Representation of the International Classification of Functioning, Disability and Health Health condition (disorder or disease) Body functions and structures Activities Participation Environmental factors Personal factors. However, policy-making and service delivery might require thresholds to be set for impairment severity, activity limitations, or participation restriction. It is useful for a range of purposes – research, surveillance, and reporting – related to describing and measuring health and disability, including: assessing individual functioning, goal setting, treatment, and monitoring; measuring outcomes and evaluating services; determining eligibility for welfare benefits; and developing health and disability surveys.

Stigmas reduction include dealing with

- Children bullying other children with disabilities in schools
- Bus drivers failing to support access needs of passengers with disabilities
- Employers discriminating against people with disabilities
- Strangers mocking people with disabilities. Negative attitudes and behaviours have an adverse effect on children and adults with disabilities, leading to negative consequences such as low self-esteem and reduced participation (32). People who feel harassed because of their disability sometimes avoid going to places, changing their routines, or even moving from their homes (33). Stigma and discrimination can be combated,

- Reach of media campaign. The radio and tv spots were seen by 59% of respondents, or 275 million people.
- Transmissibility and curability. The proportion of people who believed leprosy was transmitted by touch fell from 52% to 27%. The proportion believing that people with leprosy who take multidrug therapy are still infectious fell from 25% to 12%. Those who knew that leprosy was curable rose from 84% to 91%. They undertake to:
- Adopt legislation and other appropriate administrative measures where needed;
- Modify or repeal laws, customs, or practices that discriminate directly or indirectly;

The strategic plan includes

- Include disability in all relevant policies and programmes;
- Refrain from any act or practice inconsistent with health stardards
- Take all appropriate measures to eliminate discrimination against persons with disabilities by any person, organization, or private enterprise.
- People with disabilities may have extra costs resulting from disability – such as costs associated with medical care or assistive devices, or the need for personal support and assistance – and thus often require more resources to achieve the same outcomes as non-disabled people. This is what amartya sen has called "conversion handicap" (75). Because of higher costs, people with disabilities and their households are likely to be poorer than non-disabled people with similar incomes
- Households with a disabled member are more likely to experience material hardship – including food insecurity, poor housing, lack of access to safe water and sanitation, and inadequate access to health care
- Information about programmes should be accessible and reach the intended recipients. This may require targeted outreach;
- Proxies designated by persons with disabilities should be allowed to conduct many of the transactions in accessing programmes;
- The welfare offices, as well as the transport system, need to be accessible;
- Programmes' eligibility criteria may need to specifically include disability;
- Means testing mechanisms may need to take into account the extra costs of disability;
- Cash transfers might provide higher payments to beneficiaries with disabilities to help with extra costs of living with a disability;
- Conditional cash transfers may need to be adjusted to specific circumstances of children with disabilities;
- Workfare can introduce quotas and be sensitive to disability;
- Labour activation measures should be sensitive to disability.
- Promote the need for inclusive development for people with disabilities in the mainstream health, education, social, and employment sectors;
- Emphasize the need to promote the empowerment of people with disabilities and their family members;
- Through the provision of practical suggestions, position cbr as a tool that countries can use to implement the convention on the rights of persons with disabilities. There was a high degree of consistency between the responses to the census
- Of those in private households who reported a disability in the census, also reported a disability;
- Of those in non-private households who reported a disability in the census, also reported a disability.
- Of those in private households who did not report a disability in the census, were found to have a disability in the nds. Extrapolating the nds findings to the whole population produced an overall national disability rate of 18.5%.
- The differences in the disability rates obtained in the census may result from the following:
- Used face-to-face interviews, while the census forms were self-completed.
- The census was a large survey designed for a range of purposes. Define the difficulties in functioning in any of the following domains: seeing, hearing, speech, mobility and dexterity, remembering and concentrating, intellectual and learning, emotional, psychological, and mental health, and pain and breathing.
- The inclusion of a pain domain in the resulted in a significantly higher disability rate, with of those not reporting disabilities in the census reporting pain .
- Those who only reported a disability had a lower level of difficulty and were more likely to have only a single disability, rather than disabilities in several domains.
- More children reported a disability than in the census,
- Complications and long-term disability from traumatic injuries, from lack of appropriate follow-up;
- Complications and premature mortality in individuals with chronic diseases, as a result of suspended treatment and delayed access to health care;
- Permanent hearing loss caused by explosions, stemming from the lack of early screening and appropriate treatment;
- Long-term mental health problems from the continuing insecurity and the lack of protection. A variety of measures can reduce the vulnerability of persons with disabilities including:

- Assessments of the specific needs of people with disabilities;
- Provisions of appropriate services;
- Referral and follow-up services where necessary.
- Base definitions and national data standards on the icf.
- Ensure that data collection cover the broad array of icf domains – impairments, activity limitations and participation restrictions, related health condition, environmental factors – even if a minimal set of data items is to be selected. Improve national disability statistics at the national level, information about people with disabilities is derived from censuses, population surveys and administrative data registries.
- Employ a “difficulties in functioning approach” instead of an “impairment approach” to determine prevalence of disability to better capture the extent of disability.
- As a first step national population census data can be collected in line with recommendations from the united nations washington group on disability and the united nations statistical commission.
- A cost-effective and efficient approach to gain comprehensive data on persons with disabilities is to add disability questions – or a disability module
- Dedicated disability surveys can be carried out to gain extensive information on disability and functioning – such as prevalence, health conditions associated with disability, use of and need for services, and other environmental factors, including on persons living in institutions and children.
- Data on persons with disabilities or those at particular risk of disability, including displaced persons, can also be collected through specific surveys in humanitarian crises. 46 world report on disability
- Administrative data collections can provide information on users, types and quantity of services and cost of services. In mainstream administrative data collections, standard disability identifiers can be included to monitor access to services by people with disabilities.
- Statistical linkage of various data sets can allow countries to bring together an array of information on a person from different time points, while at the same time protecting that individual’s confidentiality. These linkage studies can often be conducted quickly and at relatively low cost.
- Assess existing policies, systems, and services, including an analysis of the needs, experiences, and views of people with disabilities, identify gaps and priorities to reduce health inequalities and plan improvements for access and inclusion.
- Make required changes in policies, systems, and services to comply with the crpd.
- Establish health care standards related to care of persons with disabilities and frameworks and enforcement mechanisms to ensure standards are met.
- Involve people with disabilities in audits and related development and implementation of policies and services. Financing and affordability
- Ensure that people with disabilities benefit equally from public health care programmes.
- In countries where private health insurance dominates health care financing, ensure that people with disabilities are not denied insurance and consider measures to make the premiums affordable for people with disabilities.
- Use financial incentives to encourage health-care providers to make services accessible and provide comprehensive assessments, evidence-based treatment, and follow-ups.
- In low-income and middle-income countries, where effective primary care and mechanisms of disbursement exist, consider targeted conditional cash transfer schemes linked to the use of health care to improve affordability and the use of services.
- Consider options for reducing or removing out-of-pocket payments for people with disabilities who do not have other means of financing health care services.
- Consider providing support to meet the indirect costs associated with accessing health care, such as transport. Service delivery
- Empower people with disabilities to maximize their health by providing information, training, and peer support. Where appropriate, include family members.
- Provide a broad range of reasonable accommodations. 83 chapter 3 general health care
- Support primary health-care workers with specialists, who may be located elsewhere.
- Explore the options for use of communication and information technologies for improving services, health care capacity, and information access to persons with disabilities.
- Identify groups who require alternative service delivery models, for example, targeted services, care coordination to improve access to health care.

- Integrate disability education into undergraduate and continuing education for all health care professionals.
- Involve people with disabilities as providers of education and training wherever possible.
- Provide evidence-based guidelines for assessment and treatment emphasizing patient-centred care.
- Train community workers so that they can play a role in screening and preventive health care services. Data and research in health and disability related research use the icf, to provide a consistent framework.
- Conduct more research on the needs, barriers to general health care, and health outcomes for people with specific disabilities.
- Establish monitoring and evaluation systems to assess interventions and long-term health outcomes for people with disabilities.
- Include people with disabilities in research on general health care services.
- Include people with disabilities in health care surveillance by using disability identifiers - see chapter 2 for more information.
- Prevention of the loss of function
- Slowing the rate of loss of function
- Improvement or restoration of function
- Compensation for lost function
- Maintenance of current function. Rehabilitation outcomes are the benefits and changes in the functioning of an individual over time that are attributable to a single measure or set of measures
- Rehabilitation medicine therapy assistive technologies. Public awareness campaigns were implemented – including radio messages and distribution of posters and pamphlets to village health teams – to inform the general public that clubfoot is correctable.
- Screening infants at birth for foot deformity to detect the impairment.

- Building the capacity of health-care professionals across the continuum of care, from community midwives screening for deformity, to ngo technicians making braces, and orthopaedic officers performing tenotomies.
- Decentralizing clubfoot care services, including screening in the community, for example through communitybased rehabilitation workers, and treatment in local clinics, to address treatment adherence barriers.
- Incorporating ponseti method training into the education curricula of medical, nursing, paramedical, and infant health-care students. Establishing mechanisms to address treatment adherence barriers including travel distance and costs. 100 world report on disability rehabilitation medicine has shown positive outcomes, for example, in improving joint and limb function,
- Other stratergies include
- Training, exercises, and compensatory strategies
- Education
- Support and counselling
- Modifications to the environment
- Provision of resources and assistive technology.
- Major adaptations (bathroom conversions, extensions, lifts, for example) in most cases had transformed people's lives. Before adaptations, people used words like "prisoner", "degraded", and "afraid' to describe their situations; following adaptations, they spoke of themselves as "independent", "useful", and "confident".
- Where major adaptations failed, it was typically because of weaknesses in the original specification. Adaptations for children sometimes failed to allow for the child's growth, for example. In other cases, policies intended to save money resulted in major waste. Examples included extensions that were too small or too cold to use, and cheap but ineffective substitutes for proper bathing facilities.

- Supporting facilities crutches, prostheses, orthoses, wheelchairs, and tricycles for people with mobility impairments; hearing aids and cochlear implants for those with hearing impairments; white canes, magnifiers, ocular devices, talking books, and software for screen magnification and reading for people with visual impairments; communication boards and speech synthesizers for people with speech impairments; devices such as day calendars with symbol pictures for people with cognitive impairment. Assistive technologies, when appropriate to the user and the user's environment, have been shown to be powerful tools to increase independence and improve participation.
- Acute care doctors recognizing patients with disabling injuries, and involving the rehabilitation team in their care as early as possible;
- A small and well trained team in the general hospital;
- Basic rehabilitative care directed towards health promotion and prevention of complications, initiated soon after the acute phase of trauma care;
- Provision of basic equipment and supplies.
- Build more hospitals
- Prior to the earthquake no referral system existed. Referral rates improved for people with disabilities from the civil hospital to a new community network of 39 disability and development organizations supporting community-based rehabilitation services. District, secondary level
- Coordination will improve between different levels of government health providers, and between government health providers and nongovernmental organizations, with mechanisms for referral, treatment, and follow-up,
- The project will strengthen primary health care, training health-care workers to identify people with disabilities and provide appropriate interventions and referral.
- It will improve the provision of rehabilitation services at a community health centre through the establishment of a physiotherapy programme.
- It will include the people with disabilities in development initiatives by training community development workers, villages, to identify people with disabilities, deliver basic care and refer.
- It will increase the proportion of persons with paraplegia having access to both hospital and community-based rehabilitation services.
- It will increase awareness among community and family members, disabled persons, and professionals about disability prevention and disability management, through publishing eight new awareness materials in the local language.
- Identifying people with impairments and facilitating referrals.
- Delivering simple therapeutic strategies through rehabilitation workers, or taught to individuals with disabilities or a family member. Examples include adopting a better posture to prevent contractures, and training in daily living skills .
- Providing individual or group-based educational, psychological, and emotional support services for persons with disabilities and their families.
- Involving the community. Quality, the devices need to:
- Suit the environment donate more wheelchairs in low-income and middleincome countries,
- Be suitable for the user. Poor selection and fit of assistive devices, or lack of training in their use, may cause further problems and secondary conditions. Devices should be selected carefully and fitted properly. Users should be engaged in assessment and selection to minimize abandonment because of a mismatch between need and device.
- Include adequate follow-up to ensure safe and efficient use.
- Video and teleconferencing technologies in accessible formats;
- Mobile phones to those living with disability to imporove communication
- Remote data-collection equipment and telemonitoring – for example, cardiac monitors. Technology may be used by people with disabilities, rehabilitation workers, peers, trainers, supervisors, and community workers and families.
- Telepsychiatry services , cardiac rehabilitation, speech and language therapy , and cognitive rehabilitation for people with traumatic brain injury ;
- Remote assessments to provide home modification services to underserved elderly people
- Training and support of health-care personnel ;
- Computerized guidelines to help clinicians use appropriate interventions.

- The link between rehabilitation needs, receipt of services, health outcomes (functioning and quality of life), and costs;
- Access barriers and facilitators for rehabilitation, models of service provision, approaches to human resource development, financing modalities, among others;
- Cost–effectiveness and sustainability of rehabilitation measures, including community-based rehabilitation programmes. Obstacles to strengthening research capacity include insufficient rehabilitation researchers, inadequate infrastructure to train and mentor researchers, and the absence of partnerships between relevant disciplines and organizations representing persons with disabilities. Obtain information on good practices through:
- Guidelines that apply research knowledge, usually on a specific health condition, to actual practice for clinicians.
- An independent search for specific interventions.
- Continuing professional education.
- Clinical guidance notes on good practice from employers and health organizations.
- Discipline-specific internet databases that appraise the research for clinicians.
- Guide policy-makers in developing appropriate services
- Allow rehabilitation workers to employ appropriate interventions
- Support people with disabilities in decision-making. Long-term longitudinal studies are needed to ascertain if expenditure for health and health-related services decreases if rehabilitation services are provided.
- Involve end-users in planning and research, including people with disabilities and rehabilitation workers, to increase the probability that the research will be useful.
- Use the icf framework to help develop a global common language and assist with global comparisons.
- Use a range of methodologies. More research such as that by the cochrane collaboration (rehabilitation and related
- Systematically disseminate results so that: policy across government reflects research findings, clinical practice can be evidencebased, and people with disabilities and their families can influence the use of research.
- Enhance the clinical and research environment. Providing international learning and research opportunities will often involve linking universities in developing countries with those in high-income and middleincome countries disability a broad range of stakeholders have roles to play:
- Advocate to governments to develop, implement, and monitor policies, regulatory mechanisms, and standards for rehabilitation services, as well as promoting equal access to those services.
- Service providers should provide the highest quality of rehabilitation services.
- Other stakeholders (users, professional organizations etc.) Should increase awareness, participate in policy development, and monitor implementation.
- International cooperation can help share good and promising practices and provide technical assistance to countries that are introducing and expanding rehabilitation services. Policies and regulatory mechanisms
- Assess existing policies, systems, services, and regulatory mechanisms, identifying gaps and priorities to improve provision.
- Develop or revise national rehabilitation plans, in accord with situation analysis, to maximize functioning within the population in a financially sustainable manner.
- Where policies exist, make the necessary changes to ensure consistency with the global stardards.
- Where policies do not exist, develop policies, legislation and regulatory mechanisms coherent with the country context and with the crpd. Prioritize setting of minimum standards and monitoring. Financing develop funding mechanisms to increase coverage and access to affordable rehabilitation services. Depending on each country's specific circumstances, these could include a mix of:
- Public funding targeted at persons with disabilities, with priority given to essential elements of rehabilitation including assistive devices and people with disability who cannot afford to pay.
- Promoting equitable access to rehabilitation through health insurance.
- Expanding social insurance coverage.
- Public-private partnership for service provision.
- Reallocation and redistribution of existing resources.

- Where specialist rehabilitation personnel are in short supply, develop standards in training for different types and levels of rehabilitation personnel that can enable career development and continuing education across levels.
- Establish strategies to build training capacity in accord with national rehabilitation plans.
- Identify incentives and mechanisms for retaining personnel especially in rural and remote areas.
- Train non-specialist health professionals (doctors, nurses, primary care workers) on disability and rehabilitation relevant to their roles and responsibilities.
- Developing basic rehabilitation services within the existing health infrastructure.
- Strengthening rehabilitation service provision through community-based rehabilitation.
- Prioritizing early identification and intervention strategies using community workers and health personnel. Where services exist, expand service coverage and improve service quality. Relevant strategies include:
- Developing models of service provision that encourage multidisciplinary and client-centred approaches.
- Ensuring availability of high quality services in the community.
- Improving efficiency by improved coordination between levels and across sectors. In all settings, three principles are relevant:
- Include service-users in decision-making.
- Base interventions on sound research evidence.
- Monitor and evaluate outcomes. Technology increase access to assistive technology that is appropriate, sustainable, affordable, and accessible. Relevant strategies include:
- Establishing service provision for assistive devices.
- Training users and following up.
- Promoting local production.
- Reducing duty and import tax.
- Improving economies of scale based on established need. To further enhance capacity, accessibility and coordination of rehabilitation measures the use of information and communication technologies - telerehabilitation - can be explored. Research and evidencebased practice
- Increase research and data on needs, type and quality of services provided, and unmet need (disaggregated by sex, age, and associated health condition).
- Improve access to evidence-based guidelines on cost-effective rehabilitation measures.
- Disaggregate expenditure data on rehabilitation services from other health care services.
- Assess the service outcomes and economic benefits of rehabilitation.
- Community support and independent living – assistance with self-care, household care, mobility, leisure, and community participation;
- Residential support services – independent housing and congregate living in group homes and institutional settings;
- Respite services – short-term breaks for caregivers and people with disabilities;
- Support in education or employment – such as a classroom assistant for a child with a disability, or personal support in the workplace;
- Communication support – such as signlanguage interpreters;
- Community access – including day care centres;
- Information and advice services – including professional, peer support, advocacy, and supported decision-making;
- Assistance animals – such as dogs trained to guide people with a visual impairment.
- In childhood – respite care, special needs assistance in education;
- In adulthood – advocacy services, residential support, or personal assistance in the workplace;
- In old age – day centres, home-help services, assisted living arrangements, nursing homes, and palliative care. Often, problems in service provision occur between these stages – such as between childhood and adulthood (15).
- Communication support. Deaf people frequently have difficulties in recruiting and training interpreters, particularly in rural or isolated communities

- The ageing of consumers and ageing of family members who provide support point to a greatly increased demand for support services.
- Excessive demands on children. When adults acquire a disability, children are often asked to help (44).
- Greater difficulties as family members age. As parents or other family members contributing to care grow older and become frail or die, it can be difficult for the remaining family to continue providing care.
- Deal with slums challnges open sewage, rotting garbage, broken glass, and excrement and urine strewn around wards and common areas;
- Inadequate staffing in schools
- A lack of proper medical attention and medical record-keeping;
- Shortages of food and medicines;
- The detention of children with adults;
- A lack of adequate mental health services or rehabilitation.
- Support institutional assistance and support services, including: health care crisis response systems housing assistance income support support for social networks of people living in the community.
- Vocational training and resource centres;
- Rehabilitation centres providing specialist secondary and tertiary services;
- Smaller home units where people with complex impairments can live semi-independently with some support; respite facilities where people with disabilities can come for short breaks and training;
- Clubs or similar centres for people with mental health issues to achieve peer support and respite;
- Emergency sheltered accommodation, not only for people with disabilities but for all who may be vulnerable to abuse or exploitation
- A needs assessment. This identifies and ranks the care and support needs of a person, without taking into account possible funding and services;
- Service coordination or planning. This identifies the most appropriate services and support options to meet the assessed needs, within the available funding;
- Provision of services. This is generally a support package of services for the person with disability, as well as for the family, where appropriate.
- Improving health and well-being.
- Improving the quality of life
- Making a positive contribution to livehood
- Choice and control
- Freedom from discrimination
- Economic well-being
- Personal dignity.
- : quality standards
- Simplifying funding procedures
- An assessment system
- Allocation of resources well and raising more partners and donors and good distribution sytem and accountability
- Direct or indirect financial support. Provide some cash benefit for caregivers in families with people with disabilities (62, 159).
- Psychosocial support services to improve family well-being.
- Paid sick leave and other support from employers to facilitate family caring. Families can benefit from opportunities for autonomy and support services.
- In complaints procedures
- During evaluation and feedback
- As participants on management boards
- As members of advisory groups of people with disabilities

- More advocates & good will amabassadors – where the person is supported one-on-one by a trained and skilled individual to make and carry through a decision.
- Increase is support systems & circles of support – networks of supporters and friends who know the person well and who can make decisions to which the person freely consents.
- Keyring or living support networks – where people with intellectual impairments live in the community, but with a "community living worker" available to provide support and help make connections in the community.
- User-controlled independent living trusts – similar to circles of support, but with a legal structure that sets up the necessary framework of decision-making around the individual.
- Service brokerage – where a skilled supporter enables the person to choose services, helping with the assessment process and supporting implementation of assistance packages.

- The independent living movement brings together people from different impairment groups, and offers services such as peer support, information, training and personal assistance, with staff who themselves have disabilities. However, unlike those in developed countries, centres for independent living do not tend to receive money from the state, but instead have to raise their own funds, such as through employment brokerage services.
- Developing a multisectoral programme in partnership with the department of education and the parents association. It supports the training of teachers and parents on providing appropriate personal assistance, so that children with severe impairments can attend local mainstream schools.
- Setting up national association of parents of disabled children found that parents required support in how to teach, train and handle their child; information about the rights of people with disabilities and how to work with professionals; and information on how to create teaching aids and obtain equipment (174).
- Supporting community-based daycare centres for children with intellectual disabilities and cerebral palsy, with the help of local government and parents. The community contributes the venue and provides lunch for the children.
- Advocate with the government providing funding, direction, advice, and monitoring at the national and district levels (175). As the cbr model strengthens the quality of the relationship between people with disabilities and their families, it can bring significant support to people with disabilities and caregivers

- Advocating to countries to entrence national disability discrimination act (1992) encourages organizations to create action plans to eliminate discrimination in provision of goods, services and facilities (178).
- Supporting and advocating gorvernments to offer framework for government to begin removing barriers to the participation of people with disabilities
- Supporting the vision of complete access and seeks to eliminate discrimination at all levels. Cbr programmes can also promote local action plans in low-income and middleincome countries
- Plan adequately for the transition to a community-based service model, including human resources and sufficient funding for the transition phase.
- Progressively develop and reallocate resources to build community support services, including the possible transformation of institutions into alternative care services such as resource or day care centres. Foster development of the support services infrastructure
- Include the introduction and development of formal assistance and support services – customized to different economic and social environments – in national disability action plans to improve participation of persons with disabilities.
- Support the development of a range of providers – state, not-for-profit providers, for-profit entities, and individuals – and models to meet, in a cost-effective manner, the diverse assistance and support needs of people with disabilities.
- Consider a variety of financing measures including: contracting out services to private providers, offering tax incentives, and devolving budgets to people with willing to implement our strategic plan on disability disabilities and their families for direct purchases of services.
- In low-income and middle-income countries, support service provision through civil society organizations, which can expand the coverage and range of services. Ensure maximum consumer choice and control this is more likely to be achieved by formal services when:

- Services are individualized and flexible rather than “one size fits all” agency-based and controlled services.
- Consumers are involved in decisions on the type of support and direct the care tasks wherever possible rather than being a passive recipient of care.
- Providers are accountable to consumers and their relationship is regulated through a formal service arrangement.
- “supported decision-making” is available for people who have difficulties making choices independently – for example, people with severe intellectual impairment or mental health conditions.
- Support families as assistance and support providers separate the needs and rights of informal caregivers from the needs and rights of persons with disabilities. A balance must be found so that each person has independence, dignity, and quality of life.
- promote collaboration between families and family organizations, governmental and nongovernmental organizations, including disabled peoples’ organizations, to provide support for families through a range of systems and services including by:
- Arranging for respite care, which can provide a short break from care and psychosocial counselling to improve family well-being.
- Providing direct or indirect financial support.
- Providing information about the services available for caregivers and people with disabilities.
- Organizing opportunities for families, who share similar experiences in supporting relatives with disabilities, to come together and offer mutual information and support.
- support community-based rehabilitation workers, social workers, or community workers can provide these opportunities for families. Useful family-oriented approaches also include developing communities of care and social networks.
- step up training and capacity building effective assistance and support services require training of both care recipients and care providers, irrespective of whether the care is provided formally or informally.
- Formal support workers, regardless of setting and service, should be provided with relevant professional training, which takes into account the principles of global health stardards and preferably involves people with disabilities as trainers to sensitize and familiarize service providers with their future clients.
- Provide training to families on working with caregivers, defining roles, setting boundaries, and on how to empower their relative with disability.
- In low-income settings, community-based rehabilitation programmes can provide training to people with disabilities and their families to manage their support needs and create links with self-help groups for information and advice.
- Persons with disabilities directly employing support workers using allocated public funds may need training and assistance in recruitment, management and fulfilling their employer responsibilities.
- Training schemes for sign-language interpreters and advocacy workers will help improve supply of these vital personnel. Assistance and support improve the quality of services
- to ensure that formal assistance and support services are of good quality, the following are recommended:
- Develop sound and fair disability assessment criteria and procedures, focusing on support needs to maintain and improve functioning. Use our strategic plan as a guiding framework in developing disability assessment criteria.
- Develop clear eligibility criteria for assistance and support services and transparent decision-making processes. In resource constrained environments, focus on people with disabilities most in need of support services – those without any informal caregiver and limited means.
- Set standards of services, enforce them, and monitor compliance.
- Monitor service provision.
- Keep updated records of users, providers, and services provided.
- Ensure coordination across different government agencies and service providers, possibly through introducing case management, referral systems, and electronic record-keeping.
- Establish complaints mechanisms.
- Introduce mechanisms to detect and prevent physical and sexual abuse in both residential and community settings.

- Encourage the monitoring of service quality by disabled peoples' organizations and other
- Ramps in all polling stations.
- Braille numbers by ballot buttons on electronic voting machines.
- Separate queues for disabled people at polling stations.
- Electoral staff trained to understand and respect the needs of people with disabilities. As a result of the campaigning and awareness-raising, the leading parties explicitly mentioned disability issues in their manifestos.
- People who are hard of hearing may need speech-reading, assistive listening devices, and good environmental acoustics in indoor settings (16). Deaf and deafblind people use sign languages. Hearing loss in both ears (19).
- People who are blind or have low vision require instruction in braille, equipment to produce braille materials, and access to library services that provide braille, audio and large-print materials, screen readers, and magnification equipment (20, 21). About 314 million people around the world have impaired vision, due either to eye diseases or uncorrected refractive errors. Of this number, 45 million people are blind (22, 23).
- People with intellectual impairments need information presented in clear and simple language (24). People who have severe mental health conditions need to encounter healthworkers who have the communication skills and confidence to communicate effectively with them (25).
- Non-speaking individuals need access to "augmentative and alternative communication" systems and acceptance of these forms of communication where they live, go to school and work. These include communication displays, sign language and speech-generating devices.
- Lnjecting more financial resources;
- Planning well and show design capacity;
- Support research and information;
- Advocate and support cooperation between institutions taking care of disability
- Advacate to gorvernments and institutions to enforcement mechanisms;
- Promote user participation;
- Stabilize geographic and climatic constraints;
- Promote disability-awareness component in the training curricula of planners, architects and construction engineers. Standards. The basic features of access in new construction should include: provision of curb cuts (ramps) safe crossings across the street accessible entries an accessible path of travel to all spaces access to public amenities, such as toilets. Systematic comparison is difficult, but several practices can lead to better enforcement: laws with mandatory access standards are the most effective way to achieve accessibility.. Standards and compliance should be regulated and mandated by law. Good design reviews and inspections ensure that accessibility will be provided from the day a building is completed. Accessibility standards thus need to be part of building regulations. The delays caused by the denial of permits for construction or occupancy should provide an incentive for builders and developers to meet the rules.
- Accessibility audits can also be conducted by disability organizations – or even by individual citizens. Such audits can encourage compliance.
- Set up pilot projects around the country, to make local communities better able to provide accessibility for people with disabilities (64).
- Promote working with the municipal administration in an assessment of barriers, with recommendations for their removal
- Following the development of accessibility standards in association with the government, a national accessibility audit team national association on physical disability. There is an important role for people with disabilities and other members of the general public to be vigilant and seek redress, through legal and administrative actions, when building owners do not fulfil their obligations under the law.
- A combination of regulation, persuasion, and powerful interest groups can be most effective
- Buildings without barriers in to ensure that people with disabilities have the same rights and opportunities as others.
- Promotes rights of access for persons with disabilities to public facilities, housing, transport, and ict, as well as to education and employment, cultural life and sport.

- After a building is constructed, an “access audit” examines its usability by disabled people. The purpose of this audit is:
- To increase awareness among planners and architects about barrier-free environments for people with disabilities;
- To ensure, in both new buildings and retrofitting, the use of universal design concepts and adherence to the standard codes relating to people with disabilities;
- To evaluate the degree of access to existing public buildings and recommend improvements. University schools of architecture can be a focus of education and research efforts for both students and practicing professionals.
- Create awareness of design issues for children, disabled people and older people;
- Conduct research and develop new technologies of equipments that can be used by people with disability and support productions of such.
- Promote disseminate information;
- Educate the design profession and the public on design regulations. Enabling environments education and campaigning education, along with technical assistance on enforcement procedures, is essential to improve awareness of the need for accessibility and understanding of universal design. Educational programmes should be targeted to all those involved in enforcing accessibility laws and standards – including people with disabilities, design educators and professionals (68), government regulators, business owners and managers, and building developers and contractors
- Support advocacy identified accessibility to physical spaces as a key area for mainstreaming the rights of people with disabilities. A project was launched to build awareness in the region on accessibility, increase the capacity for local action, and build strategic alliances for advocacy by: setting up an informal “access resource group”, bringing together architects, builders, designers, engineers, people with disabilities, and development and rehabilitation professionals; staging public events highlighting what can be done to improve access; greater stress was placed on the message that “access benefits all”. Campaigns have the greatest impact when user groups acted collectively for their rights; conducting media training; holding workshops on accessibility, including national policies on disability and access; producing educational materials providing accessible parking spaces, ramps, and lifts installing accessible toilets adjusting counter heights providing tactile maps and improving signage. A seating platform next to a communal hand pump to provide an opportunity for rest and enable small children to reach the pump ; ramped access and a concrete apron at the pump post to help wheelchair users, making it possible to bring large, wheeled water containers to the village pump and reduce the number of trips ; a bench fitted over a pit latrine, making latrine use easier . An important application for universal design is to provide for emergency evacuations from buildings. Transportation systems focus primarily on: improving accessibility to public transportation infrastructure and services; setting up “special transport services” for people with disabilities; developing campaigns and education programmes to improve policies, practices, and the use of services. Specific obstacles are related to each of these goals. Immediate surroundings of stations. Common problems here include: nonexistent or poorly maintained pavements; inaccessible overpasses or underpasses; crowded pavements in the vicinity of stations and stops; hazards for people with visual impairments and deafblind people; traffic controls; lack of aids at street crossings for people with visual impairments; dangerous local traffic behaviours. Existing rail systems presents various technical difficulties, including: dealing with the size of the gaps between vehicle floors and the platforms, which may be different at every station (87); increasing space in vehicles for wheelchair access; providing access to tracks at different levels within stations. Technologies for automated lifts, bridgeplates, and ramps overcome the problems with platforms. Curbs and short-ramp access from street levels. Lifts or ramps on all transit vehicles – not only on a limited number; a raised pad at a bus stop with ramp access, making it easier for someone with mobility impairment to enter a bus, helping visually impaired and cognitively impaired individuals find the stop, and improving the safety of all those waiting for a bus; real-time information on waiting times; smart cards for fare collection, gates, and ticketing; visual and tactile warning systems at the edge of platforms – or full safety barriers along the entire platform; railings and posts painted in bright contrasting colours; audible signs to help people with web access to real-time information about accessible routes and temporary obstacles, such as a lift out of order. Simple low-cost examples of universal design include: lower first steps; better interior and exterior handrails at entrances to buses; priority seating; improved lighting;

Our strategic plan includes supporting in Designing and planning disability friendly cities raised paved loading pads where there are no pavements; the removal of turnstiles. Curitiba's integrated system is a good model of a less expensive universal design approach express bus lines with dedicated right-of-way routes into the city centre; conventional local bus routes connecting at major terminals; interline "connector" buses travelling around the perimeter of the city; "Parataxi" vans for door-to-terminal service for those requiring them. All terminals, stops, and vehicles are designed to be accessible. are newer rapid-transit systems in existence, lessons can be learned from Curitiba. Even in developing countries accessibility can be provided relatively easily throughout a transportation system if it is an integral part of the overall plan from the start. Platform boarding allows for the convenient and rapid movement of passengers and provides full accessibility. The construction of "tube" stations requires the express buses to stop at a distance from the edge of the platform, to avoid hitting the curved station walls. Methods for achieving the goal include (8, 92): determining the initial priorities, through consultations with people with disabilities and service providers; introducing accessibility features into regular maintenance and improvement projects; developing low-cost universal design improvements that result in demonstrable benefits to a wide range of passengers, thus gaining public support for the changes. as hearing aids or screen readers. Overcoming this requires: designing the mainstream features for the widest possible range of user capabilities; ensuring the device is adaptable for an even wider range of capabilities; ensuring the device can connect with a wide range of user interface devices (109). People with disabilities should have the same choice in everyday telecommunications as other people – in access, quality, and price (28). People with hearing and speech impairments, including the deafblind, need public or personal telephones with audio outputs adjustable in volume and quality, and equipment compatible with hearing aids (28, 110). Many people need text telephones or videophones with visual displays of text, or sign language in real-time telephone communications (111). A relay service with an operator is also required, so that users of text telephones and videophones can communicate with users of ordinary voice telephones. People who are blind or deafblind and cannot access visual displays at all require other options such as speech and audio and Braille (112). Those with low vision need visual presentations to be adjusted for font type and size, contrast, and use of colours. People with dexterity impairments and upper extremity amputees may experience difficulties with devices requiring fine manipulation, such as small keyboards (113). Switch interfaces, alternative keyboards or use of head and eye movement can be possible solutions to access computers. To use computers and access the web, some people with disabilities need screen readers, captioning services, and web page design features such as consistent navigation mechanisms (114–116). People with cognitive impairments, including age-related changes in memory, and older adults may find the various devices and online services difficult to understand (117–120). Plain language and simple operating instructions are important. The lack of captioning, audio description and sign language interpretation limit information access for people who are deaf and hearing impaired. provide such programming (39). Elsewhere: public service television is obliged to include closed captioning, subtitles, or sign language. a requirement for captioning.

Our strategic plan includes supporting in captioning requirements for both analogue and digital television such as: several ICT accessibility projects, including improving payphone access for people with disabilities. set up a system to evaluate and correct access problems on web sites. The ministry also helps other government organizations make web sites more accessible for people with disabilities including older persons. National Accessibility Portal that can handle many languages. The portal is accessed by computers in service centres with accessible equipment and through a telephone interface . innovations in mobile telephony include: Hand-held devices, using mobile phones as platforms, can deliver a range of services, including route guidance for people with motor disabilities – video sign-language communication for deaf people – memory aids for older users and people with cognitive disabilities. The "VoiceOver", a screen reader that "speaks" whatever appears on the display of the "iPhone" mobile device, lets visually impaired users make calls, read e-mail, browse web pages, play music, and run applications The cognitive accessibility of mobile phones can be increased for people with intellectual impairments. A special phone has been designed for those who find the ordinary mobile device too complicated, with a large back-lit keyboard and simple menus and access options . In Australia the mobile telephone industry has launched a global information service for reporting the accessibility features of mobile phones (160). Australia and the United States also require that accessible information be provided with telecom equipment. Deaf people often use SMS (texting on mobile telephones) for face-to-face as well as long distance communication . In Japan the Raku Raku phone has been universally designed, with a large screen, dedicated buttons, read aloud menus, voice input text messages, and an integrated DAISY player. More than 8 million have been sold, particularly for the ageing population, previously an untapped market for mobile phone manufacturers . Disabled people's organizations have called for universal design in computers and the web – a proactive rather than reactive approach to accessible technology . suggests areas for improvement:

procurement processes that require tenderers to consider accessibility and usability; better communication with stakeholders; marketing of accessible products and services as an ethical choice; wider access to information and mechanisms for sharing knowledge about the needs of older and disabled people. Removing operational barriers can also enable companies to benefit from the expertise of disabled workers. specific measures that can improve accessibility. Across domains of the environment Accessibility policies and standards should meet the needs of all people with disabilities. Monitor and evaluate the implementation of accessibility laws and standards. World report on disability An impartial monitoring body, preferably outside government, and with a significant membership of disabled people, could be designated and funded to track progress on accessibility and recommend improvements. Awareness-raising is needed to challenge ignorance and prejudice surrounding disability. Personnel working in public and private services should be trained to treat disabled customers and clients on an equal basis and with respect. Professional bodies and educational institutions can introduce accessibility as a component in training curricula in architecture, construction, design, informatics, marketing, and other relevant professionals. Policy-makers and those working on behalf of people with disabilities need to be educated about the importance and public benefits of accessibility.

International organizations can play an important role by: – Developing and promoting global accessibility standards for each domain of the physical environment that are widely relevant, taking into account constraints such as cost, heritage, and cultural diversity. – Funding development projects that comply with relevant accessibility standards and promote universal design. – Supporting research to develop an evidence-based set of policies and good practices in accessibility and universal design, with particular emphasis on solutions appropriate in low-income settings. – Developing indices on accessibility and reliable methods of data collection to measure progress in improving accessibility. Industry can make important contributions by promoting accessibility and universal design in the early stages of the design and development of products, programmes, and services. Persons with disabilities and their organizations should be involved in accessibility efforts – for example, in the design and development of policies, products and services to assess the need of users, but also for monitoring progress and responsiveness. Public accommodations – building and roads Adopt universal design as the conceptual approach for the design of buildings and roads that serve the public. Develop and mandate minimum national standards. Full compliance should be required for new construction of building and roads that serve the public. For developing countries a strategic plan with priorities and a series of increasing goals can make the most of limited resources. Policy and standards should be flexible to account for differences between rural and urban areas. Transportation Introduce accessible transportation as part of the overall legislation on disability rights. Identify strategies to improve the accessibility of public transport, including: – Applying universal design principles in the design and operation of public transport, for example in the selection of new buses and trams or by removing physical barriers when renovating stops and stations.Enabling Environments – Requiring transportation agencies, in the short-term, to provide STS such as shared vans or accessible taxis. – Making public transport systems more flexible for the user by optimizing the use of information technology. – Make provisions for alternative forms of transport such as tricycles, wheelchairs, bicycles, and scooters by providing separate lanes and paths. Establish continuity of accessibility throughout the travel chain by improving the quality of pavements and roads, pedestrian access, installing ramps (curb cuts), and ensuring access to vehicles. To improve affordability of transport, subsidize transport fares for people with disabilities who may not be able to afford them. Educate and train all parties involved in transportation: managers need to understand their responsibilities and front-line staff need to ensure customer care. Public awareness campaigns can assist the educational process: posters, for example, can teach passengers about priority seating. pavements, and the removal of turnstiles. Accessible information and communication Consider a range of bottom-up and topdown legislative and policy mechanisms including: consumer protection, non-discrimination legislation covering information and communication technologies and direct obligations on those developing ICT systems, products, and services. In the public and private sector adopt policies on procurement which take into consideration accessibility criteria. Support the development of telephone relay, sign language, and Braille services. When designing and distributing ICT equipment and services, developers should ensure that people with disabilities gain the same benefits as the wider population.

Producers and providers should incorporate accessibility features in the products and services they design and sell. Support the education and training of persons with disabilities to take advantage of ICT – including training to ensure digital literacy and skills. important for four main reasons. Education contributes to human capital formation and is thus a key determinant of personal well-being and welfare. Excluding children with disabilities from educational and employment opportunities has high social and economic costs. For example, adults with disabilities tend to be poorer than those without disabilities, but education weakens this association. Countries cannot achieve Education for All or the Millennium Development Goal of universal completion of primary education without ensuring access to education for children with disabilities . Countries that are signatories to the CRPD cannot fulfil their responsibilities under Educational. The requirement for inclusive schools to educate all children together means that the schools have to develop ways of teaching that respond to individual differences, to the benefit of all children. Social. Inclusive schools can change attitudes towards those who are in some way "different" by educating all children together. This will help in creating a just society without discrimination. Economic. Establishing and maintaining schools that educate all children together is likely to be less costly than setting up a complex system of different types of schools specializing in different groups of children. quality . While placement was not the critical factor in student outcomes, the review found: slightly better academic outcomes for students with learning disabilities placed in special education settings Delivery of education by type of model for selected European countries Note: The data refer to pupils who have been officially identified as having SEN. inclusive settings. World report on disability higher dropout rates for students with emotional disturbances who were placed in general education; better social outcomes for students with severe intellectual impairments who were taught in general education classes. While children with hearing impairments gained some academic advantage in mainstream education, their sense of self suffered. most of the studies reviewed were not of good quality methodologically, and dependent measures varied widely across studies; the researchers often had difficulty separating educational settings from the types and intensity of services; the research was frequently conducted before critical policy changes took place; much of the research focused on how to implement inclusive practices, not on their effectiveness. Zealand shows how government ministries can promote an understanding of the right to education of disabled students by: publicizing support available for disabled children reminding school boards of their legal responsibilities reviewing information provided to parents reviewing complaints procedures. A survey of low-income and middle-income countries found that if political will is lacking, legislation will have only a limited impact. Other factors leading to a low impact include insufficient funding for education, and a lack of experience in educating people with disabilities or special educational needs. reflect international commitments to the right of disabled children to be educated; identify the number of disabled children and assess their needs; stress the importance of parental support and community involvement; plan for the main aspects of provision – such as making school buildings accessible, and developing the curriculum, teaching methods, and materials to meet a diversity of needs; increase capacity, through the expansion of provision and training programmes; make available sufficient funds; 218 World report on disability conduct monitoring and evaluation, and improve the qualitative and quantitative data on students Funding There are basically three ways to finance special needs education, whether in specialized institutions or mainstream schools: through the national budget, such as setting up a Special National Fund (as in Brazil), financing a Special Education Network of Schools (as in Pakistan), or as a fixed proportion of the overall education budget (0.92% in Nicaragua and 2.3% in Panama); through financing the particular needs of institutions – for materials, teaching aids, training, and operational support (as in Chile and Mexico); through financing individuals to meet their needs (as in Denmark, Finland, Hungary, and New Zealand). Other countries, including Switzerland and the United States, use a combination of funding methods that include national financing that Box 7.3. Inclusion is possible in Viet Nam – but more can be done In the early 1990s Viet Nam launched a major programme of reform to improve the inclusion of students with disabilities in education. The Centre for Special Education worked with an international nongovernmental organization to set up two pilot projects, one rural and one urban. Local steering committees for each project were active in raising awareness in the community and conducting house-to-house searches for children who were missing from official school lists. Training was provided to administrators, teachers, and parents on: the benefits of inclusive education special education services individualized educational programmes carrying out accommodation and environmental modifications assessment family services. complex. Whichever funding model is used, it should: be easy to understand be flexible and predictable provide sufficient funds be cost-based and allow for cost control connect special education to general education be neutral in identification and placement (98, 99). One system for comparing data on resources between countries categorizes students according to whether their needs arise from medical conditions, behavioural, or emotional conditions, or socioeconomic or cultural disadvantages an educational or interactive approach. The following principles were proposed: Assessment procedures should promote learning for all students.

All students should be entitled to be part of all assessment procedures. The needs of students with disabilities should be considered within all general assessment policies as well as within policies on disability-specific assessment. The assessment procedures should complement each other.
The assessment procedures should aim to promote diversity by identifying and valuing the progress and achievements of each student. Inclusive assessment procedures should explicitly aim to prevent segregation by avoiding – as far as possible – forms of labelling. students with disabilities such as: Embracing diversity: Toolkit for creating inclusive, learning friendly environments contains nine self-study booklets to assist teachers to improve their skills in diverse classroom settings (107). Module 4: Using ICTs to promote education and job training for persons with disabilities in Toolkit of best practices and policy advice provides information on how information and communication technologies can facilitate access to education for people with disabilities (108). Education in emergencies: Including everyone:

Adocacy of more teachers with disability In Uganda teachers' attitudes improved simply by having regular contact with children with disabilities (56). In Mongolia a training programme on inclusive education was run for teachers and parents with the support of specialist teachers. The 1600 teachers trained had highly positive attitudes towards the inclusion of children with disabilities and towards working with the parents: the enrolment of children with disabilities in preschool facilities and primary schools increased from 22% to 44% (121). practices that link CBR to inclusive education can be found in many low-income countries: In the Karamoja region of Uganda, where most people are nomads and only 11.5% of the population are literate, children's 224 World report on disability domestic duties are essential to the survival of their families. crop production. The Oriang project in western Kenya has introduced inclusive education in five primary schools. Technical and financial assistance is provided by Leonard Cheshire Disability (60). The support includes training new teachers and working with students, parents, teachers, and the wider community to change attitudes and build the right structures for delivering inclusive education. are designed to increase the variety and quality of sport choices available for children in Fijian schools. Its activities include: Pacific Junior Sport – a games-based programme that provides opportunities for children to participate and develop their skills; qito lai lai ("children's games") for smaller children; arranging for sport federations – such as those of golf, table tennis, tennis, and archery – to run sessions in schools; supporting schools so that students can play popular sports, such as football, volleyball, and netball, and paralympic sports such as boccia, goalball, and sitting volleyball; managing regional and national sport tournaments, as well as festivals in which students test their skills in football, netball, and volleyball against children from mainstream schools; providing role models through the athlete ambassador programme, in which athletes with a disability regularly visit schools, including mainstream schools. Sport can improve the inclusion and well-being of people with a disability: by changing what communities think and feel about people with a disability – and in that way reducing stigma and discrimination; by changing what people with a disability think and feel about themselves – and in that way empowering them to recognize their own potential; by reducing their isolation and helping them integrate more fully into community life; by providing opportunities which assists young people to develop healthy body systems (musculoskeletal, cardiovascular) and improve coordination. particularly effective in bringing out the views of children in a range of socioeconomic settings Young people in nine Commonwealth countries were consulted about their views on the CRPD through a series of focus groups. The right to education featured in the top three issues in three quarters of these groups. In a refugee programme in Jhapa, Nepal, children with disabilities were found to be a neglected and vulnerable group. A full-time disability coordinator for the programme was therefore appointed to undertake participatory action research. Disabled children talked about their family lives and described how they were taunted if they left their homes. Both children and parents listed education as the top priority. After 18 months more than 700 children had been integrated into schools, and sign-language training had been introduced in all refugee camps, for Deaf and non-deaf children.

In September 2007 the Portuguese Ministry of Education organized a Europewide consultation in collaboration with the European Agency for Development in Special Needs Education (133). The young people consulted favoured inclusive education, but insisted that each person should be able to choose where to be educated. Develop a clear national policy on the inclusion of children with disabilities in education supported by the necessary legal framework, institutions, and adequate resources. Definitions need to be agreed on what constitutes "inclusive education" and "special educational needs", to help policy-makers develop an equitable education system that includes children with disabilities. Identify, through surveys, the level and nature of need, so that the correct support and accommodations can be introduced. Some students may require only modifications to the physical environment to gain access, while others will require intensive instructional support.

Establish monitoring and evaluation systems. Data on the numbers of learners with disabilities and their educational needs, both in special schools and in mainstream schools, can often be collected through existing service providers. Research is needed on the cost–effectiveness and efficiency of inclusive education. Share knowledge about how to achieve educational inclusion among policymakers, educators, and families. For developing countries the experience of other countries that have already moved towards inclusion can be useful. Model projects of inclusive education could be scaled up through local-to-regional-toglobal networks of good practice. Adopt strategies to promote inclusion Focus on educating children as close to the mainstream as possible. This includes, if necessary, establishing links between special education facilities and mainstream schools.

Do not build a new special school if no special schools exist. Instead, use the resources to provide additional support for children with disabilities in mainstream schools. Ensure an inclusive educational infrastructure – for example, by mandating minimum standards of environmental accessibility to enable access to school for children with disabilities. Accessible transport is also vital. Make teachers aware of their responsibilities towards all children and build and improve their skills for teaching children with disabilities. Educating teachers about including children with disabilities should ideally take place in both pre-service and in-service teacher education. It should have a special emphasis on teachers in rural areas, where there are fewer services for children with disabilities. Support teachers and schools to move away from a one-size-fits-all model towards flexible approaches that can cope with Education diverse needs of learners – for example, individualized education plans can ensure the individual needs of students with disabilities are met. Provide technical guidance to teachers that can explain how to group students, differentiate instruction, use peers to provide assistance, and adopt other low-cost interventions to support students having learning difficulties. Clarify and reconsider policies on the assessment, classification, and placement of students so that they take into consideration the interactional nature of disability, do not stigmatize children, and benefit the individuals with disabilities. Promote Deaf children's right to education by recognizing linguistic rights. Deaf children should have early exposure to sign language and be educated as multilinguals in reading and writing. Train teachers in sign language and provide accessible educational material. Provide specialist services, where necessary

Increase investment in school infrastructure and personnel so that children with disabilities that are identified as having special educational needs obtain the needed support, and continue to receive that support during their education. Make available speech and language therapy, occupational therapy, and physiotherapy to learners with moderate or significant disabilities. In the absence of specialist providers, use existing community-based rehabilitation services to support children in educational settings. If these resources are absent, an attempt should be made to develop these services gradually. Consider introducing teaching assistants to provide special support to children with disabilities, while ensuring that this does not isolate them from other students. Support participation Involve parents and family members. Parents and teachers should jointly decide on the educational needs of a child. Children do better when families get involved, and this costs very little. Involve the broader community in activities related to the education of children with disabilities. This is likely to be more successful than policy decisions handed down from above. Develop links between educational services and community-based rehabilitation – and other rehabilitation services, where they exist. In this way, scarce resources can be used more efficiently, and education, health care, and social services can be properly integrated. Encourage adults with disabilities and disabled people's organizations to become more involved in promoting access to education for children with disabilities. Consult and involve children in decisions about their education. Participation of people with disabilities in the labour force is important for other reasons: Maximizing human resources. Productive engagement of persons with disabilities increases individual well-being and contributes to the national output. Promoting human dignity and social cohesion. Apart from income, employment brings personal and social benefits, adding to a sense of human dignity and social cohesion. All individuals should be able to freely choose the direction of their personal lives, to develop their talents and capabilities to the full. Accommodating the increasing numbers of people with disabilities in the working age population. The prevalence of disability is expected to increase in the coming decades because of a rise in chronic conditions together with improved health and medical rehabilitation services that preserve and prolong life.: the unemployment rate is the number of unemployed people expressed as a percentage of the labour force; the employment rate is the share of the working age population which works for pay; the labour force participation rate is the proportion of the adult population which is economically active, whether employed or unemployed the employment ratio is the ratio of the employment rate of people with disabilities compared to the employment rate of the general population. world to address barriers to the labour market: laws and regulations tailored interventions vocational rehabilitation and training self-employment and microfinance social protection working to change attitudes. Not all of these reach workers in the informal sector, which predominates in many countries. To counter these obstacles, various financial incentives can be offered:

Tax incentives are often offered to employers, especially smaller employers. Government employment agencies can provide advice and funding for employment-related accommodations, as with one state's vocational rehabilitation agency.. Workplace modifications can be supported. In disabilities is changing:

There has been a move from a model of job placement that tried to fit people into available job openings to a "person-centred" model involving the interests and skills of the individual. The aim is to find a match that will lead to viable longer term employment and a life-long career . There has been a shift from using sheltered employment towards supported employment – that is, from "train and place" to "place and train". The idea is to employ people first, before they are trained, to help dispel beliefs that disabled people cannot perform a particular job disability Several successful user-controlled disability employment services have been launched in recent years: In Rio de Janeiro, Brazil, the Centro de Vida Independiente serves as an employment broker and ongoing support agency for disabled people. In Spain Fundación ONCE was founded in 1988 to promote training and employment and accessibility, funded by the national lottery – which is operated by ONCE, the association of blind people (109). In Manchester, United Kingdom, "Breakthrough" is an innovative usercontrolled employment service that works with disabled people and employers, helping to find and sustain employment and to find training for work In South Africa, Disability Employment Concerns was established in 1996 with the aim of emulating the ONCE model. Owned by disabled people's organizations, it invests in and supports companies to promote disability employment equity targets In India the National Centre for Promotion of Employment for Disabled People sensitizes the corporate world, campaigns for access, promotes education, and raises awareness. vocational services for people with disabilities in New Zealand In 2001 the New Zealand government launched Pathways to Inclusion to increase the participation of people with disabilities both in the workforce and in communities (99). People with disabilities working in sheltered workshops had been paid less than the minimum wage, regardless of their skills or abilities. Providers of sheltered employment, with advice and government funding, shifted their operations to include supported employment and community participation services. Although sheltered work is still part of a range of vocational services funded through the Ministry of Social Development, supported employment services have now largely replaced it. An evaluation of the Pathways to Inclusion programme since its inception found the following (100): the number of people participating in vocational services increased from 10 577 in 2003 to 16 130 in 2007; employment outcomes have improved, with more participants either moving off benefits or declaring earnings while remaining on benefits; the number of providers of vocational services that aim to achieve paid employment increased from 44% to 76% over three years; the proportion of services providing segregated employment that paid at least the minimum wage all or most of the time increased from 10% in 2004 to 60% in 2007; the number of service users moving off benefits or declaring earnings within 12 to 24 months of starting the service has increased –with disabilities are presented here by key actors. Governments Laws and regulations Enact and enforce effective anti-discrimination legislation. Ensure that public policies are harmonized to provide incentives and support for individuals with disabilities to seek employment, and for employers to hire them. Changing attitudes Promote awareness among employers of their duty not to discriminate, and of the means available to them to support the employment of people with disabilities. Instil a belief among the public that people with disabilities can work, given the proper support.

As employers, lead by example in promoting the employment of disabled people in the public sector. Public programmes Make mainstream vocational guidance and training programmes accessible to people with disabilities. Make mainstream employment services available to persons with disabilities on an equal basis with other job seekers. Develop services tailored to individual and community needs, rather than services of a "one-size-fits-all" nature. Ensure that mainstream social protection programmes include people with disabilities, while at the same time supporting their return to work, and not creating disincentives to those seeking work or returning to work. Design safety net interventions to promote labour market inclusion of disabled people by including assistance and support services or covering the additional costs incurred by those who enter employment – such as the cost of travel to work and of equipment. Adjust disability assessment systems so that they assess the positive aspects of functioning (as opposed to disability) and capacity to work. Monitor and evaluate labour market programmes aimed at facilitating and increasing employment of persons with disabilities and scale up those that deliver results with focus on inclusive, not segregated solutions. Provide adequate and sustainable funding for training programmes, to build a skilled workforce of people with disabilities. Data collection Include persons with disabilities in labour market data collection activities, for instance labour force survey. Use internationally agreed (for example ILO) labour market indicators to measure and monitor the labour market status and livelihood experiences of people with disabilities. Employers Hire people with disabilities, making reasonable accommodations available where needed. Set up disability management programmes to support the return to work of employees who become disabled. Develop partnerships with local employment agencies, educational institutions, skill training programmes, and social enterprises to build a skilled workforce that includes people with disabilities. Ensure that all supervisors and human resource personnel are acquainted with the requirements for accommodation and nondiscrimination with regard to individuals with disabilities. 252 World report on disability

For larger businesses, aim to become model employers of people with disabilities. Other organizations: NGOs including disabled people's organizations, microfinance institutions, and trade unions For organizations providing mainstream training opportunities, include people with disabilities. Provide targeted support when mainstream opportunities are not available. Support community-based rehabilitation, to enhance the development of skills and enable people with disabilities to make a decent living. Where the informal economy is predominant, promote micro-enterprises and selfemployment for people with disabilities. For microfinance institutions, improve access to microfinance for persons with disabilities through better outreach, accessible information and customized credit conditions. Support the development of networks of people with disabilities that can campaign for the rights of people with disabilities. For labour unions, make disability issues, including accommodations, part of their bargaining agendas. of barriers, including the following. Inadequate policies and standards. Policy design does not always take into account the needs of people with disabilities, or existing policies and standards are not enforced. Examples include a lack of clear policy of inclusive education, a lack of enforceable access standards in physical environments, and the low priority accorded to rehabilitation.

Negative attitudes. Beliefs and prejudices constitute barriers when health-care workers cannot see past the disability, teachers do not see the value in teaching children with disabilities, employers discriminate against people with disabilities, and family members have low expectations of their relatives with disabilities. Lack of provision of services. People with disabilities are particularly vulnerable to deficiencies in services such as health care, rehabilitation, or support and assistance. Problems with service delivery. Issues such as poor coordination among services, inadequate staffing, staff competencies, and training affect the quality and adequacy of services for persons with disabilities. Inadequate funding. Resources allocated to implementing policies and plans are often inadequate. Strategy papers on poverty reduction, for instance, may mention disability but without considering funding. 263 Chapter 9 The way forward: recommendations Lack of accessibility. Built environments (including public accommodations) transport systems and information are often inaccessible. Lack of access to transport is a frequent reason for a person with a disability being discouraged from seeking work or prevented from accessing health care. technologies such as telephones and television. Lack of consultation and involvement. Often people with disabilities are excluded from decision-making in matters directly affecting their lives. Lack of data and evidence. A lack of rigorous and comparable data on disability and evidence on programmes that work often impedes understanding and action. How are the lives of people with disabilities affected? These barriers contribute to the disadvantages experienced by people with disabilities, such as the following. They have poor health outcomes. Depending on the group and setting, persons with disabilities may experience greater vulnerability to preventable secondary conditions and co-morbidities, untreated mental health conditions, poor oral health, higher rates of HIV infection, higher rates of obesity, and premature mortality. They have lower educational achievements. Children with disabilities are less likely to start school than their peers without disabilities. They also have lower rates of staying in school and of being promoted, as well as lower transition rates to postschool education. They are less economically active. People with disabilities have lower employment rates than people without disabilities. Where people with disabilities are employed, they commonly earn less than their counterparts without disabilities. They experience higher rates of poverty. Households with a person with a disability have higher rates of poverty than households without disabled members. As a group and across settings, people with disabilities have worse living conditions and fewer assets. Poverty may lead to disability, through malnutrition, poor health care, and dangerous working or living conditions. Disability may lead to poverty through lost earnings, due to lack of employment or underemployment, and through the additional costs of living with disability, such as extra medical, housing, and transport costs. They cannot always live independently or participate fully in community activities. Reliance on institutional solutions, lack of community living, inaccessible transport and other public facilities, and negative attitudes leave people with disabilities that the strategy is working: People with disabilities are more visible and taking a central role in decision- making,

Australia's support is bolstering partner Government's efforts, such as in Papua New Guinea, Cambodia and TimorLeste, towards more equitable national development that benefits all citizens, including people with disability. Investments in leadership by people with disabilities, together with advocacy by Australian leaders internationally, is helping to increase the priority and resources for inclusive development globally. AusAID's processes, systems and information about the aid programme are more accessible to people with disabilities. Key programme areas such as scholarships have revised guidelines resulting in increased number of scholars with disabilities. The strategy takes a rights-based approach, is sensitive to the diversity of people with disabilities, gender issues, and focuses on children with disabilities. The way forward: recommendations strategies. the impact of environmental factors (policies, physical environment, attitudes) on disability and how to measure it; the quality of life and well-being of people with disabilities; barriers to mainstream and specific services, and what works in overcoming them in different contexts; accessibility and universal design programmes appropriate for low-income settings;

the interactions among environmental factors, health conditions, and disability – and between disability and poverty; 268 World report on disability the cost of disability and the cost–effectiveness of public spending on disability programmes. Research requires focused investments in human and technical capacity, particularly in low-income and middle-income countries. A critical mass of trained researchers on disability needs to be built. stakeholders can take. Governments can: Review and revise existing legislation and policies for consistency with the CRPD; review and revise compliance and enforcement mechanisms. Review mainstream and disability-specific policies, systems, and services to identify gaps and barriers and to plan actions to overcome them. Develop a national disability strategy and action plan, establishing clear lines of responsibility and mechanisms for coordination, monitoring and reporting across sectors. Regulate service provision by introducing service standards and by monitoring and enforcing compliance. Allocate adequate resources to existing publicly-funded services and appropriately fund the implementation of the national disability strategy and plan of action. Adopt national accessibility standards and ensure compliance in new buildings, in transport, and in information and communication. Introduce measures to ensure that people with disabilities are protected from poverty and benefit adequately from mainstream poverty alleviation programmes. Include disability in national data collection systems and provide disability-disaggregated data wherever possible. Implement communication campaigns to increase public knowledge and understanding of disability.

Establish channels for people with disabilities and third parties to lodge complaints on human rights issues and laws that are not implemented or enforced. United Nations agencies and development organizations can: Include disability in development aid programmes, using the twin-track approach (mainstreaming and targeted). Exchange information and coordinate actions – to agree on priorities for initiatives to learn lessons and to reduce duplication of effort. The way forward: recommendations Provide technical assistance to countries to build capacity and strengthen existing policies, systems and services – for example, by sharing good and promising practices. Contribute to the development of internationally comparable research methodologies for collecting and analysing data relating to people with disabilities.

Regularly include relevant disability data into statistical publications. Disabled people's organizations can: Support people with disabilities to become aware of their rights, to live independently, and to develop their skills. Support children with disabilities and their families to ensure inclusion in education. Represent the views of their constituency to international, national, and local decisionmakers and service providers, and advocate for their rights. Contribute to the evaluation and monitoring of services, and collaborate with researchers to support applied research that can contribute to service development. Promote public awareness and understanding by professionals about the rights of persons with disabilities – for example, through campaigning, advocacy, and disability-equality training. Conduct audits of environments, transport, and other systems and services to promote barrier removal. Service providers can: Carry out access audits, in partnership with local disability groups, to identify physical and information barriers that may exclude persons with disabilities. Ensure that staff are adequately trained about disability, implementing training as required and including service users in developing and delivering training. Develop individual service plans in consultation with disabled people, and their families where necessary. Introduce case management, referral systems, and electronic record-keeping to coordinate and integrate service provision. Ensure that people with disabilities are informed of their rights and the mechanisms for complaints. Academic institutions can: Remove barriers to the recruitment and participation of students and staff with disabilities. Ensure that professional training courses include adequate information about disability, based on human rights principles. Conduct research on the lives of persons with disabilities and on disabling barriers, in consultation with disabled people's organizations. The private sector can: Promote diversity and inclusion in working environments. Facilitate employment of persons with disabilities, ensuring that recruitment is equitable, that reasonable accommodations are provided, and that employees who become disabled are supported to return to work. Remove barriers of access to microfinance, so that persons with disabilities can develop their own businesses. Develop a range of quality support services for persons with disabilities and their families at different stages of the life cycle. Ensure that construction projects, such as public accommodations, offices and housing include adequate access for persons with disabilities. Ensure that ICT products, systems, and services are accessible to persons with disabilities. 270 World report on disability Communities can: Challenge and improve their own beliefs and attitudes. Protect the rights of persons with disabilities. Promote the inclusion and participation of disabled people in their community. Ensure that community environments are accessible for people with disabilities, including schools, recreational areas and cultural facilities. Challenge violence against and bullying of people with disabilities. People with disabilities and their families can: Support other people with disabilities through peer support, training, information, and advice. Promote the rights of persons with disabilities within their local communities – for example by conducting access audits, delivering disability equality training, and campaigning for human rights. Become involved in awareness-raising and social marketing campaigns. Participate in forums (international, national, local) to determine priorities for change, to influence policy, and to shape service delivery. Participate in research projects. the current initiatives to improve disability statistics, the work of five organizations is described here. They are:

The project combines several components including: country pilot tests of standard question sets; targeted training of statistical experts and health professionals; country advisory services; development of knowledge management tools and the establishment of a regional network of national disability statistics experts working within governments, to facilitate cross-country cooperation.
to participation and inclusion. Examples of the possible negative impact of the environment include: a Deaf individual without a sign language interpreter a wheelchair user in a building without an accessible bathroom or elevator a blind person using a computer without screen-reading software. Health is also affected by environmental factors, such as safe water and sanitation, nutrition, poverty, working conditions, climate, or access to health care. As the World Health Organization (WHO) Commission on Social Determinants of Health has argued, inequality is a major cause of poor health, and hence of disability (20). The environment may be changed to improve health conditions, prevent impairments, and improve outcomes for persons with disabilities. Such changes can be brought about by legislation, policy changes, capacity building, or technological developments leading to, for instance: accessible design of the built environment and transport; signage to benefit people with sensory impairments; more accessible health, rehabilitation, education, and support services; more opportunities for work and employment for persons with disabilities. Environmental factors include a wider set of issues than simply physical and information access. Policies and service delivery systems, including the rules underlying service provision, can also be obstacles (21). Analysis of public health service financing in Australia, for Understanding disability Box 1.1. New emphasis on environmental factors The International Classification of Functioning, Disability and Health (ICF) advanced the understanding and measurement of disability. It was developed through a long process involving academics, clinicians, and – importantly – persons with disabilities (18). The ICF emphasizes environmental factors in creating disability, which is the main difference between this new classification and the previous International Classification of Impairments, Disabilities, and Handicaps (ICIDH). In the ICF, problems with human functioning are categorized in three interconnected areas: impairments are problems in body function or alterations in body structure – for example, paralysis or blindness; activity limitations are difficulties in executing activities – for example, walking or eating; participation restrictions are problems with involvement in any area of life – for example, facing discrimination in employment or transportation. Negative attitudes towards disability can result in negative treatment of people with disabilities, for example: children bullying other children with disabilities in schools bus drivers failing to support access needs of passengers with disabilities employers discriminating against people with disabilities strangers mocking people with disabilities. Negative attitudes and behaviours have an adverse effect on children and adults with disabilities, leading to negative consequences such as low self-esteem and reduced participation.

Adopt legislation and other appropriate administrative measures where needed; modify or repeal laws, customs, or practices that discriminate directly or indirectly; include disability in all relevant policies and programmes; refrain from any act or practice inconsistent with the CRPD; take all appropriate measures to eliminate discrimination against persons with disabilities by any person, organization, or private enterprise. employment, earnings, and increased expenditures related to disability. Children with disabilities are less likely to attend school, thus experiencing limited opportunities for human capital formation and facing reduced employment opportunities and decreased productivity in adulthood. People with disabilities are more likely to be unemployed and generally earn less even when employed . Both employment and income outcomes appear to worsen with the severity of the disability. It is harder for people with disabilities to benefit from development and escape from poverty (74) due to discrimination in employment, limited access to transport, and lack of access to resources to promote self-employment and livelihood activities . People with disabilities may have extra costs resulting from disability – such as costs associated with medical care or assistive devices, or the need for personal support and assistance – and thus often require more resources to achieve the same outcomes as non-disabled people. This is what Amartya Sen has called “conversion handicap” . Because of higher costs, people with disabilities and their households are likely to be poorer than non-disabled people with similar incomes. Households with a disabled member are more likely to experience material hardship – including food insecurity, poor housing, lack of access to safe water and sanitation, and inadequate access to health care. special measures may be needed to ensure that safety nets are inclusive of disabled people. For example: information about programmes should be accessible and reach the intended recipients.

This may require targeted outreach; proxies designated by persons with disabilities should be allowed to conduct many of the transactions in accessing programmes; the welfare offices, as well as the transport system, need to be accessible; programmes' eligibility criteria may need to specifically include disability; means testing mechanisms may need to take into account the extra costs of disability; cash transfers might provide higher payments to beneficiaries with disabilities to help with extra costs of living with a disability; conditional cash transfers may need to be adjusted to specific circumstances of children with disabilities; workfare can introduce quotas and be sensitive to disability; labour activation measures should be sensitive to disability. Some countries, such as Albania, Bangladesh, Brazil, China, Romania, and the Russian Federation also have specific programmes targeted at people with disabilities. regional networks such as the CBR Africa Network, the CBR Asia-Pacific Network, and the CBR American and Caribbean Network. The recent publication of the CBR guidelines joins the development and human rights aspects of disability. The guidelines: promote the need for inclusive development for people with disabilities in the mainstream health, education, social, and employment sectors; emphasize the need to promote the empowerment of people with disabilities and their family members; through the provision of practical suggestions, position CBR as a tool that countries can use to implement the Convention on the Rights of Persons with Disabilities. high degree of consistency between the responses to the census and the NDS: of those in private households who reported a disability in the census, 88% also reported a disability in the NDS; of those in non-private households who reported a disability in the census, 97% also reported a disability in the NDS; of those in private households who did not report a disability in the census, 11.5% were found to have a disability in the NDS. Extrapolating the NDS findings to the whole population produced an overall national disability rate of 18.5%. The differences in the disability rates obtained in the census and the NDS may result from the following: The NDS used face-to-face interviews, while the census forms were self-completed. The census was a large survey designed for a range of purposes. The NDS focused solely on disability defined as difficulties in functioning in any of the following domains: seeing, hearing, speech, mobility and dexterity, remembering and concentrating, intellectual and learning, emotional, psychological, and mental health, and pain and breathing. The inclusion of a pain domain in the NDS resulted in a significantly higher disability rate, with 46% of those not reporting disabilities in the census reporting pain in the NDS. Those who only reported a disability in the NDS had a lower level of difficulty and were more likely to have only a single disability, rather than disabilities in several domains. More children reported a disability in the NDS than in the census, perhaps because of the more detailed questions in the NDS. Disability and Health (ICF). International frameworks and resources are important in these efforts. Policy frameworks and agreed principles are set out in the CRPD. Information-related standards are provided by the ICF. Attempts to harmonize and standardize question sets for assessment of health status and disability at population level are in progress (see Technical appendix B for information on European Statistical System, United Nations Washington Group on Disability Statistics, United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP), WHO Regional Office for the Americas/Pan American Health Organization/Budapest Initiative). A training manual on disability statistics, prepared by WHO and UNESCAP, provides useful guidance on how countries can enhance their national statistics. Prevalence of disability – difficulties in functioning In examining the prevalence of disability in the world today, this Report presents survey were chosen based on several considerations: the need to fill data gaps in geographical regions where data were most lacking, such as sub-Saharan Africa; a spread of countries that would include high-income, middle-income, and lowincome countries with a focus on lowincome and middle-income countries; inclusion of countries with large adult populations complications and long-term disability from traumatic injuries, from lack of appropriate follow-up; complications and premature mortality in individuals with chronic diseases, as a result of suspended treatment and delayed access to health care; permanent hearing loss caused by explosions, stemming from the lack of early screening and appropriate treatment; long-term mental health problems from the continuing insecurity and the lack of protection. Humanitarian organizations do not always respond to the needs of people with disabilities promptly, and gaining access to persons with disabilities who are scattered among affected communities can be difficult. A variety of measures can reduce the vulnerability of persons with disabilities including: effective planning to meet disability needs by humanitarian organizations before crises; assessments of the specific needs of people with disabilities; provisions of appropriate services; referral and follow-up services where necessary. These measures may be carried out directly or through mainstreaming.– a global picture

to face discrimination and restricted access to social services, including early-childhood education; to be underweight and have stunted growth; to be subject to severe physical punishment from their parents (106). provide a standard for health and disability statistics and help in the difficult task of harmonizing approaches across sources of disability data.

To achieve this, countries can: Base definitions and national data standards on the ICF. Ensure that data collection cover the broad array of ICF domains – impairments, activity limitations and participation restrictions, related health condition, environmental factors – even if a minimal set of data items is to be selected. Improve national disability statistics At the national level, information about people with disabilities is derived from censuses, population surveys and administrative data registries. Decisions on how and when to collect data depend on the resources available. Steps that can be taken to improve disability data, prevalence, need and unmet need, and socioeconomic status are outlined below. Disaggregating data by sex, age, and income or occupation will provide information about subgroups of persons with disabilities, such as children and older persons. Employ a "difficulties in functioning approach" instead of an "impairment approach" to determine prevalence of disability to better capture the extent of disability. As a first step national population census data can be collected in line with recommendations from the United Nations Washington Group on Disability and the United Nations statistical commission. Census data can provide an estimate of prevalence, information on socioeconomic situation, and geographical data and be used to identify populations at risk. It can also be used to screen respondents to implement more detailed follow up surveys. A cost-effective and efficient approach to gain comprehensive data on persons with disabilities is to add disability questions – or a disability module – to existing sample surveys such as a national household survey, national health survey, a general social survey or labour force survey. Dedicated disability surveys can be carried out to gain extensive information on disability and functioning – such as prevalence, health conditions associated with disability, use of and need for services, and other environmental factors, including on persons living in institutions and children. Data on persons with disabilities or those at particular risk of disability, including displaced persons, can also be collected through specific surveys in humanitarian crises. 46 World report on disability Administrative data collections can provide information on users, types and quantity of services and cost of services. In mainstream administrative data collections, standard disability identifiers can be included to monitor access to services by people with disabilities. Statistical linkage of various data sets can allow countries to bring together an array of information on a person from different time points, while at the same time protecting that individual's confidentiality. These linkage studies can often be conducted quickly and at relatively low cost. Where resources exist, collect longitudinal data that include questions on disability. Longitudinal data – the study of cohorts of people and their environments over time – allow researchers and policy-makers to understand better the dynamics of disability. Such analyses would provide better indications of what happens to individuals and their households after disability onset, how their situation is impacted by public policies aimed at improving the social and economic status of disabled people, of the causal relationship between poverty and disability, and how and when to instigate prevention programmes, modify interventions, and make environmental changes. Improve the comparability of data Data gathered at the national level Standardize metadata on national disability prevalence, for example, by defining the measures of disability, purpose a measurement, indicate which aspects of disability are included, and define the cut-off on the continuum. This will facilitate the compilation of country-reported disability prevalence in international data repositories such as WHO's Global Health Observatory. Refine methods of generating prevalence rates using a continuous metric that measures multidomain functioning levels. This would include more work on the various approaches for setting thresholds, including sensitivity analyses of the different thresholds and the implications for services and policies. Comparable definitions of disability, based on the ICF, and uniform methods for collecting data on people with disabilities need to be developed, tested across cultures, and applied consistently in surveys, censuses and administrative data. Extended measures of disability should be developed and tested that can be incorporated into population surveys, or used as supplements to surveys, or as the core of a disability survey as initiated by the United Nations Washington Group on Disability Statistics and the Budapest Initiative. Develop appropriate instruments for measuring childhood disability. Improve collaboration and coordination between various initiatives to measure disability prevalence at global, regional and national levels (including the Budapest Initiative, European Statistical Commission, UNESCAP, United Nations Statistical Commission, Washington Group, WHO, United States and Canada). Develop appropriate tools and fill the research gaps To improve validity of estimates – further research is needed on different types of investigation, such as self-report and professional assessment. To gain a clearer understanding of people in their environments and their interactions – better measures of the environment and its impacts on the different aspects of disability need to be developed. These will facilitate the identification of cost-effective environmental interventions. To understand the lived experiences of people with disabilities, more qualitative research is required.Disability – a global picture with measurements of the well-being and quality of life of people with disabilities. To better understand the interrelationships and develop a true epidemiology of disability – studies are needed that bring health condition (including co-morbidity) aspects of disability into a single data set describing disability, and that explore the interactions between health conditions and disability and environmental factors.

To better understand the costs of disability – technical agreement is required on definitions and methods of calculating the extra costs of living with a disability.
example: A child born blind may not specifically require ongoing health care for a primary health condition and associated impairment (20). An adolescent with a traumatic spinal cord injury may have considerable health care needs during the acute phase of the primary condition but thereafter may require only services to maintain health – for example, to prevent secondary conditions. Adults with chronic conditions such as multiple sclerosis, cystic fibrosis, severe arthritis, or schizophrenia may have complex and continuing health care needs related to their primary health condition or associated impairments autism: Had more chronic health conditions than the general population. They were more likely to be obese and have heart disease, high blood pressure, respiratory disease, diabetes, strokes, or breast cancer. Developed chronic health conditions at a younger age than other people.

Reforming policy and legislation addressing barriers to financing and affordability addressing barriers to service delivery addressing human resource barriers filling gaps in data and research. Reforming policy and legislation International, regional, and national policy and legislation can help meet the health care needs of people with disabilities where political will, funding, and technical support accompany implementation. indicates the following areas for action: Accessibility – stop discrimination against people with disabilities when accessing health care, health services, food or fluid, health insurance, and life insurance. This includes making the environment accessible. Affordability – ensure that people with disabilities get the same variety, quality, and standard of free and affordable health care as other people. Availability – put early intervention and treatment services as close as possible to where people live in their communities. Quality – ensure that health workers give the same quality care to people with disabilities as to others. Formal acknowledgement, within national. People-centred approaches should: Educate and support people with disabilities to manage their health. Self-management approaches have been effective in improving health outcomes and quality of life for a range of chronic conditions, and in some instances have lowered costs for the health care system Provide time-limited, self-management courses, involving peer support to enable persons with disabilities to better manage their health. In Nicaragua, where the health system is overburdened with increasing patients with chronic disease, “chronic clubs” have been established in health centres to teach people with diabetes about risk factors, disease management, signs of complications, and healthy lifestyles. In Rwanda a study regarding the health promotion needs of individuals with lower limb amputation recommended workshops to enable people with disabilities to share experiences and motivate each other to improve health behaviours. Involve family members and caregivers in service delivery where appropriate. Family members and caregivers may have limited knowledge and skills. They may not understand the importance of a healthy lifestyle, or they may not be able to General health care Develop an individual care plan. A customized care plan is important to bridge current and past care and for arranging future needs. A plan should be flexible enough to accommodate changes in people’s needs and circumstances. Enhanced Primary Care in Australia encourages general practitioners to carry out comprehensive health assessments, multidisciplinary care plans, and case conferences with older people, people with chronic illness, and people with intellectual impairment. Provide appropriate referral and effective information transfer to other services. Timely referral can facilitate access and decrease stress, frustration, and the development of secondary conditions. Good communication between service providers is critical. Electronic records or client passbooks – which include information on a person’s abilities, challenges, and methods of learning or communicating – can support transition between child and adult services and between multiple health care practitioners. Inventories of relevant services and community resources also may be useful. Use information and communication technologies Information and communication technologies can increase the capacity of health care services, improve the delivery of services and enable people to better manage their own health (198). Evidence on the efficacy of some technologies is limited, or shows limited effect, while other technologies promise benefits for the health care system a

Electronic medical records – shared electronic medical records can overcome common problems in care continuity. Telemedicine services – people receiving psychiatric telemedicine services, such as psychiatric evaluations and medication management, have reported high satisfaction with their care and video conferencing also has successfully delivered self-management programmes. Consumer health informatics – internetbased, self-management programmes have helped people with chronic disease (175,. successful outcomes across a range of health professionals: A study of Australian fourth-year undergraduate medical students indicated a significant change in attitudes towards people with developmental disabilities following a three-hour communication skills workshop. In a United States study, third-year medical students reported that they felt less "awkward" and "sorry for" people with disabilities after attending a 90-minute education session. A study found that medical students educated by individuals with disabilities helped students to learn how disability affects treatment plans, and helped students reflect on, and recognize, attitudes about disability A study of fourth-year medical students used panel presentations led by individuals with disabilities. Students reported that they valued hearing about the personal experiences of people with disabilities, and about what worked and what did not in the medical setting and in patient-provider relationships. Introductory courses for students enrolled in the first occupational therapy and post-diploma management courses in the Russian Federation, developed and taught by the All-Russian Society of the Disabled, successfully developed positive attitudes in the students A study to determine whether a change in curriculum affected nursing student's attitudes towards people with disabilities showed that their attitudes were more positive at the completion of their senior year. Provide health-care workers with continuing education Many health-care workers acknowledge a need for continuing education about disability. below. Health services research Data needed to strengthen health care systems include: number of people with disabilities health status of people with disabilities social and environmental factors influencing the health of people with disabilities responsiveness of health care systems to people with disabilities use of health care services by people with disabilities need, both met and unmet, for care. People with disabilities should be included in all general health care surveillance and data on people with disabilities should be disaggregated. A good comparability, quality, and disability research capacity include: Organizations funding research could routinely require researchers to include people with disabilities in their population samples. Despite challenges, randomized controlled trials with people with intellectual impairment are possible. Researchers should be required to justify restricted eligibility criteria on scientific grounds. People with intellectual disabilities, people who face communication barriers, and others with low levels of literacy may need support completing survey instruments or participating in interviews People with disabilities can actively participate in research, as researchers themselves, as participants in consultations or advisory groups, or playing a central role in commissioning and monitoring research.

The International Classification of Functioning, Disability and Health (ICF) – which uses accepted and understood terminology, language, and concepts – can ensure consistency across studies and settings, thus removing these as barriers to progress in disability and health research and public policy. A range of research methods are needed including clinical trials, observational and epidemiological studies, health services research, surveys, and social and behavioural studies. Well designed, qualitative research can be used to investigate the full range of barriers and document good practices. Capacity building, research tools, and research training on disability are needed. Good instruments are particularly important for disability outcome research given evidence that people with disabilities often perceive health status and quality of life differently than people without disabilities . Conclusion and recommendations People with disabilities experience health disparities and greater unmet needs in comparison to the general population. All countries need to work towards removing barriers and making existing health care systems more inclusive and accessible to people with disabilities. strengthen existing policies, system, and services. Policy and legislation Assess existing policies, systems, and services, including an analysis of the needs, experiences, and views of people with disabilities, identify gaps and priorities to reduce health inequalities and plan improvements for access and inclusion. Make required changes in policies, systems, and services to comply with the CRPD. Establish health care standards related to care of persons with disabilities and frameworks and enforcement mechanisms to ensure standards are met. Involve people with disabilities in audits and related development and implementation of policies and services. Financing and affordability Ensure that people with disabilities benefit equally from public health care programmes. In countries where private health insurance dominates health care financing, ensure that people with disabilities are not denied insurance and consider measures to make the premiums affordable for people with disabilities. Use financial incentives to encourage health-care providers to make services accessible and provide comprehensive assessments, evidence-based treatment, and follow-ups.

In low-income and middle-income countries, where effective primary care and mechanisms of disbursement exist, consider targeted conditional cash transfer schemes linked to the use of health care to improve affordability and the use of services. Consider options for reducing or removing out-of-pocket payments for people with disabilities who do not have other means of financing health care services. Consider providing support to meet the indirect costs associated with accessing health care, such as transport. Service delivery Empower people with disabilities to maximize their health by providing information, training, and peer support. Where appropriate, include family members. Provide a broad range of reasonable accommodations. General health care Support primary health-care workers with specialists, who may be located elsewhere. Explore the options for use of communication and information technologies for improving services, health care capacity, and information access to persons with disabilities. Identify groups who require alternative service delivery models, for example, targeted services, care coordination to improve access to health care. In high-income countries incorporate disability access and quality standards into contracts with public, private, and voluntary service providers.
Promote community-based rehabilitation, specifically in less-resourced settings, to facilitate access for disabled people to existing services. Human resources Integrate disability education into undergraduate and continuing education for all health care professionals. Involve people with disabilities as providers of education and training wherever possible. Provide evidence-based guidelines for assessment and treatment emphasizing patient-centred care. Train community workers so that they can play a role in screening and preventive health care services. Data and research In health and disability related research use the ICF, to provide a consistent framework. Conduct more research on the needs, barriers to general health care, and health outcomes for people with specific disabilities. Establish monitoring and evaluation systems to assess interventions and long-term health outcomes for people with disabilities. Include people with disabilities in research on general health care services. Include people with disabilities in health care surveillance by using disability identifiers - see Chapter 2 for more information incorporated research to inform the project's activities and evaluate outcomes. The project has resulted in many positive achievements in two years including: The Ugandan Ministry of Health has approved the Ponseti method as the preferred treatment for clubfoot in all its hospitals. 36% of the country's public hospitals have built the capacity to do the Ponseti procedure and are using the method. health-care professionals received training to identify and treat clubfoot. Teaching modules on clubfoot and the Ponseti method are being used in two medical and three paramedical schools. students in various health disciplines received training in the Ponseti method. children with clubfoot received treatment, an estimated 31% of infants born with clubfoot during the sample period – very high, given that only 41% of all births occur in a health care centre. Public awareness campaigns were implemented – including radio messages and distribution of posters and pamphlets to village health teams – to inform the general public that clubfoot is correctable. The project shows that clubfoot detection and treatment can quickly be incorporated into settings with few resources. The approach requires: Screening infants at birth for foot deformity to detect the impairment. Building the capacity of health-care professionals across the continuum of care, from community midwives screening for deformity, to NGO technicians making braces, and orthopaedic officers performing tenotomies. Decentralizing clubfoot care services, including screening in the community, for example through communitybased rehabilitation workers, and treatment in local clinics, to address treatment adherence barriers. Incorporating Ponseti method training into the education curricula of medical, nursing, paramedical, and infant health-care students. Establishing mechanisms to address treatment adherence barriers including travel distance and costs. 100 World report on disability Rehabilitation medicine has shown positive outcomes, for example, in improving joint and limb function, pain management, wound healing, and psychosocial well-being (40–47). Therapy Therapy is concerned with restoring and compensating for the loss of functioning, and preventing or slowing deterioration in functioning in every area of a person's life. Therapists and rehabilitation workers include occupational therapists, orthotists, physiotherapists, prosthetists, psychologists, rehabilitation and technical assistants, social workers, and speech and language therapists.
Therapy measures include:
training, exercises, and compensatory strategies education support and counselling modifications to the environment provision of resources and assistive technology. Convincing evidence shows that some therapy measures improve rehabilitation outcomes. study found that: Minor adaptations (rails, ramps, over-bath showers, and door entry systems, for example) – most costing less than £500 – produced a range of lasting, positive consequences for virtually all recipients: 62% of respondents suggested they felt safer from the risk of accident, and 77% perceived a positive effect on their health. Major adaptations (bathroom conversions, extensions, lifts, for example) in most cases had transformed people's lives. Before adaptations, people used words like "prisoner", "degraded", and "afraid' to describe their situations; following adaptations, they spoke of themselves as "independent", "useful", and "confident". Where major adaptations failed, it was typically because of weaknesses in the original specification. Adaptations for children sometimes failed to allow for the child's growth, for example. In other cases, policies intended to save money resulted in major waste. Examples included extensions that were too small or too cold to use, and cheap but ineffective substitutes for proper bathing facilities.

The evidence from recipients suggests that successful adaptations keep people out of hospitals, reduce strain on carers, and promote social inclusion. Benefits were most pronounced where careful consultation with users took place, where the needs of the whole family had been considered, and where the integrity of the home had been respected. with disabilities" (59). Common examples of assistive devices are: crutches, prostheses, orthoses, wheelchairs, and tricycles for people with mobility impairments; hearing aids and cochlear implants for those with hearing impairments; white canes, magnifiers, ocular devices, talking books, and software for screen magnification and reading for people with visual impairments; communication boards and speech synthesizers for people with speech impairments; devices such as day calendars with symbol pictures for people services and may be useful for setting appropriate priorities for rehabilitation (87). The number of people needing hearing aids worldwide is based on 2005 World Health Organization estimates that about 278 million people have moderate to profound hearing impairments (88). In developed countries, industry experts estimate that about 20% of people with hearing impairments need hearing aids (89), suggesting 56 million potential hearing-aid users worldwide. Hearing aid producers and distributors estimate that hearing aid production currently meets less than 10% of global need (88), and less than 3% of the hearing aid needs in developing countries are met annually (90). The International Society for Prosthetics and Orthotics and the World Health Organization have estimated that people needing prostheses or orthotics and related services represent 0.5% of the population in developing countries; and 30 million people in Africa, Asia, and Latin America (91) require an estimated 180 000 rehabilitation professionals. In 2005 there were 24 prosthetic and orthotic schools in developing countries, graduating 400 trainees annually. Worldwide existing training facilities for prosthetic and orthotic professionals and other providers of essential rehabilitation services are deeply inadequate in relation to the need (92). A national survey of musculoskeletal impairment in Rwanda concluded that 2.6% of children are impaired and that about 80 000 need physical therapy, 50 000 need orthopaedic surgery, and 10 000 need assistive devices (93). Most of the available data on national supply and unmet need are derived from 103 Chapter 4 Rehabilitation disability-specific surveys on specific. Promote National studies on living conditions of people with disabilities conducted in Malawi, Mozambique, Namibia, Zambia, and Zimbabwe (94–98) revealed large gaps in the provision of medical rehabilitation and assistive devices (see Table 2.5 in Chapter 2). Gender inequalities in access to assistive devices were evident in Malawi (men 25.3% and women 14.1%) and Zambia (men 15.7% and women 11.9%) (99). A survey of physical rehabilitation medicine in Croatia, the Czech Republic, Hungary, Slovakia, and Slovenia found a general lack of access to rehabilitation in primary, secondary, tertiary, and community health care settings, as well as regional and socioeconomic inequalities in access (100). In a study of people identified as disabled from three districts in Beijing, China, 75% of those interviewed expressed a need for a range of rehabilitation services, of which only 27% had received such services (101). A national Chinese study of the need for rehabilitation in 2007 found that unmet need was particularly high for assistive devices and therapy (102). United States surveys report considerable unmet needs – often caused by funding problems – for assistive technologies (103). Addressing barriers to rehabilitation The barriers to rehabilitation service provision can be overcome through a series of actions, including: reforming policies, laws, and delivery systems, including development or revision of national rehabilitation plans; developing funding mechanisms to address barriers related to financing of rehabilitation; 104 World report on disability increasing human resources for rehabilitation, including training and retention of rehabilitation personnel; expanding and decentralizing service delivery; increasing the use and affordability of technology and assistive devices; expanding research programmes, including improving information and access to good practice guidelines. Reforming policies, laws, and delivery systems A 2005 global survey (110) of the implementation of the nonbinding, United Nations Standard Rules on the Equalization of Opportunities for Persons with Disabilities found that: in 48 of 114 (42%) countries that responded to the survey, rehabilitation policies were not adopted; in 57 (50%) countries legislation on rehabilitation for people with disabilities was not passed; in 46 (40%) countries rehabilitation programmes were not established. Many countries have good legislation and related policies on rehabilitation, but the implementation of these policies, and the development and delivery of regional and local rehabilitation services, have lagged. Systemic barriers include: Lack of strategic planning. A study of rehabilitation medicine related to physical impairments – excluding assistive technology, sensory impairments, and specialized disciplines – in five central and eastern European countries suggested that the lack of strategic planning for services had resulted in an uneven distribution of service capacity and infrastructure (100). Lack of resources and health infrastructure. Limited resources and health infrastructure in developing countries, and in rural and remote communities in developed countries, can reduce access to rehabilitation and quality of services (111). In a survey on the reasons for not using needed health facilities in two Indian states, 52.3% of respondents indicated that no healthcare facility in the area was available (112). Other countries lack rehabilitation services that have proven effective at reducing longterm costs, such as early intervention for children under the age of 5 (5, 113–115). A study of users of community-based rehabilitation (CBR) in Ghana, Guyana, and Nepal showed limited impact on physical well-being because CBR workers had difficulties providing physical rehabilitation, assistive devices, and referral services (116). In Haiti, before the 2010 earthquake, an estimated three

Lack of agency responsible to administer, coordinate, and monitor services. In some countries all rehabilitation is integrated in health care and financed under the national health system. In other countries responsibilities are divided between different ministries, and rehabilitation services are often poorly integrated into the overall system and not well coordinated. A report of 29 African countries found that many lack coordination and collaboration among the different sectors and ministries involved in disability and rehabilitation, and 4 of the 29 countries did not have a lead ministry. Inadequate health information systems and communication strategies can contribute to low rates of participation in rehabilitation. Aboriginal Australians have high rates of cardiovascular disease but low rates of participation in cardiac rehabilitation, for example. Barriers to rehabilitation include poor communication across the health care sector and between providers (notably between primary and secondary care), inconsistent and insufficient data collection processes, multiple clinical information systems, Rehabilitation and incompatible technologies . Poor communication results in ineffective coordination of responsibilities among providers. Complex referral systems can limit access. Where access to rehabilitation services is controlled by doctors, medical rules or attitudes of primary physicians can obstruct individuals with disabilities from obtaining services. People are sometimes not referred, or inappropriately referred, or unnecessary medical consultations may increase their costs . This is particularly relevant to people with complex needs requiring multiple rehabilitation measures. Absence of engagement with people with disabilities. The study of 114 countries mentioned above did not consult with disabled people's organizations in 51 countries, and did not consult with families of persons with disabilities about design, implementation, and evaluation of rehabilitation programmes in 57 of the study countries. The Council has been very successful in developing physical rehabilitation and supporting professional training (physical therapy, prosthetics, orthotics, wheelchairs, and CBR). Further benefits include : joint negotiation for equipment and supplies; sharing knowledge and expertise; continuing education through sharing specialist educators, establishing clinical education sites, reviewing and revising curricula, and disseminating information; 106 World report on disability support for the transition from expatriate professional services to local management. Developing funding mechanisms for rehabilitation The cost of rehabilitation can be a barrier for people with disabilities in high-income as well as low-income countries. effectiveness before being implemented. Financing strategies may include the following: Reallocate or redistribute resources. Public rehabilitation services should be reviewed and evaluated, with resources reallocated effectively. Possible modifications include: – changing from hospital or clinic-based rehabilitation to community-based interventions (74, 83); – reorganizing and integrating services to make them more efficient (26, 7 – relocating equipment to where it is most needed . Cooperate internationally. Developed countries, through their development aid, could provide long-term technical and financial assistance to developing countries to strengthen rehabilitation services, including rehabilitation personnel development. Aid agencies from Australia, Germany, Italy, Japan, New Zealand, Norway, Sweden, the United Kingdom, and the United States have supported such activities (145–147). 108 World report on disability

Include rehabilitation services in foreign aid for humanitarian crises. Conflict and natural disaster cause injuries and disabilities and make people with existing disabilities even more vulnerable – for example, after an earthquake there are increased difficulties in moving around due to the rubble from collapsed buildings and the loss of mobility devices. Foreign aid should also include trauma care and rehabilitation services Combine public and private financing. Clear demarcation of responsibilities and good coordination among sectors is needed for this strategy to be effective. Some services could be publicly funded but privately provided – as in Australia, Cambodia, Canada, and India. Target poor people with disabilities. The essential elements of rehabilitation need to be identified, publicly funded, and made available for free to people with low incomes, as in South Africa and India . Evaluate coverage of health insurance, including criteria for equitable access. A study in the United States on access to physical therapy found that health care funding sources provided different coverage for physical therapy services depending on whether people had cerebral palsy, multiple sclerosis, or spinal cord injury . universities, and private companies. Several approaches were instrumental in the success of this training initiative: Strong partnership. An established education institution with strong pedagogical expertise, University Don Bosco was identified to assume overall responsibility for the training. The German Technical Cooperation agency, experienced in developing prosthetics and orthotics training programmes in Asia and Africa, provided the technical and financial support. Long-term vision for sustainable training provision. A six-month orientation phase enabled the different partners to agree on details of project implementation, including objectives, activities, indicators, responsibilities, and resources. A 7–10 year strategy enabled the programme to become self-sustaining. internationally recognized guidelines. All University Don Bosco training programmes have been developed with support from the International Society for Prosthetics and Orthotics, accredited based on the international guidelines for training developed by the Society and by WHO. Capacity building. Technical content was developed and delivered by two advisors from the German Technical Cooperation for the initial three-year training programme degree programme in prosthetics and orthotics was started. Ensuring recruitment. Prosthetic and orthotic technicians and engineers were integrated into the general health system in El Salvador, and support was provided to other countries to establish similar programmes.

Choosing appropriate technologies. Identifying and developing appropriate technologies ensured sustainable provision. World report on disability across the world: three years in China (Chinese Standards), at least four years in Europe, and five years in the United States . Help coordinate the delivery of rehabilitation services , and having an interdisciplinary health care team under one roof can provide essential health care at an affordable cost (209). Improve availability, accessibility, and affordability which can overcome barriers to referral, such as inaccessible locations, inadequate services, and the high costs of private rehabilitation. Improve patient experience by ensuring services are available early and that waiting time and travelling time are reduced. Together with patient involvement in service development, this can produce better outcomes, improve compliance with treatment, and increase satisfaction among patients and rehabilitation personnel . rehabilitation strategies, to reduce secondary conditions.

Acute care doctors recognizing patients with disabling injuries, and involving the rehabilitation team in their care as early as possible; a small and well trained team in the general hospital; basic rehabilitative care directed towards health promotion and prevention of complications, initiated soon after the acute phase of trauma care; provision of basic equipment and supplies. Source Physical assistance to earthquake victims and rehabilitation service strengthening in Gujarat, India On 26 January 2001 an earthquake measuring 6.9 on the Richter scale struck Gujarat State, India. An estimated 18 000 people were killed and 130 000 people were injured in the Kutchch District of Gujarat, creating a heavy burden on an already fragmented health care system. The response shows that overall care – particularly rehabilitation services for people with disabilities – can be considerably strengthened affordably and sustainably even in low-income and post-disaster settings. In the wake of the disaster, a partnership between the state government of Gujarat, Handicap International (an international nongovernment organization) and the Blind People's Association (a local cross-disability NGO) was established to build the capacity of existing services. Tertiary level The project improved equipment and infrastructure for physiotherapy and other aspects of facility-based rehabilitation at the Civil Paraplegic Hospital and in Kutchch. It improved discharge planning for people with disabilities admitted to the Civil Paraplegic Hospital Centre through the training of social workers. Prior to the earthquake no referral system existed. Referral rates improved for people with disabilities from the Civil Hospital to a new community network of 39 disability and development organizations supporting community-based rehabilitation services. District, secondary level The project improved rehabilitation service delivery by providing technical assistance to the Blind People's Association to establish one secondary-level rehabilitation centre – providing prosthetics and orthotics, and physical therapy (by eight visually impaired physiotherapists) near the new Kutchch District Hospital. Nearly 3000 people received orthopaedic devices, an additional 598 received free assistive devices through the Government assistance scheme, and 208 people were fitted with devices in their homes by physical therapists. The referral centre supported satellite centres for six months after the earthquake. Coordination improved between different levels of government health providers, and between government health providers and nongovernmental organizations, with mechanisms for referral, treatment, and follow-up, which helped ensure access and continuity of service. An individual case record system and a directory of all rehabilitation facilities in and around Kutchch were developed and managed by the primary health care centres. Community level The project strengthened primary health care, training 275 health-care workers to identify people with disabilities and provide appropriate interventions and referral. An evaluation eight months after the training showed high knowledge retention, with many workers able to identify children with disabilities under 10 months old. It improved the provision of rehabilitation services at a community health centre through the establishment of a physiotherapy programme. It included the people with disabilities in development initiatives by training 24 community development workers, in 84 of 128 villages, to identify people with disabilities, deliver basic care and refer. It increased the proportion of persons with paraplegia having access to both hospital and community-based rehabilitation services. It increased awareness among community and family members, disabled persons, and professionals about disability

Identifying people with impairments and facilitating referrals. CBR workers in Bangladesh were trained as “key informants” to identify and refer children with visual impairments to specialist eye camps; referrals by the informants accounted for 64% of all referrals to the eye camps. Children were identified earlier and were more representative of the overall incidence of blindness across the community. A subsequent review of 11 similar studies that used Participatory Rural Appraisal and informants to identify disabled children concluded that community-based methods were consistently less expensive than other methods, and that children benefited from longer engagement with subsequent community interventions. delivering simple therapeutic strategies through rehabilitation workers, or taught to individuals with disabilities or a family member. Examples include adopting a better posture to prevent contractures, and training in daily living skills. providing individual or group-based educational, psychological, and emotional support services for persons with disabilities and their families. A study of our model for people with chronic schizophrenia in rural India found that while the community-based rehabilitation model was more time- and resource-intensive than outpatient services, it was more efficient, better at overcoming economic, cultural, and geographic barriers, better for programme compliance, and appropriate for resourcepoor settings. Another study on disabilty in Italy found that people with mental illness experienced improved interpersonal relationships and social inclusion. Very isolated people also benefited from the close relationship developed between the patient and the worker . involving the community. In Thailand a study in two rural districts building capacity for CBR used group meetings for people with disabilities, their families, and community members to manage rehabilitation problems collaboratively (167). Increasing the use and affordability of technology Assistive devices Many people around the world acquire assistive technology on the open market. Access to assistive technology can be improved by improving economies of scale in purchasing and production to reduce cost. Suit the environment. A large number of wheelchairs in low-income and middleincome countries, donated by the international community without related services, are rejected because they are not appropriate for the user in their environment. Be suitable for the user. Poor selection and fit of assistive devices, or lack of training in their use, may cause further problems and secondary conditions. Devices should be selected carefully and fitted properly. Users should be engaged in assessment and selection to minimize abandonment because of a mismatch between need and device. Include adequate follow-up to ensure safe and efficient use. A study in rural Finland on why prescribed hearing aids remain unused found that follow-up care, including counselling, resulted in increased and more consistent use of the devices. Availability and affordability of local maintenance is also important. Access to batteries affects ongoing hearing-aid use, for instance. Improved hearing-aid battery technologies are needed for resource-poor settings. A project in Botswana discovered that rechargeable batteries using solar power offered a promising option (240). Telerehabilitation The use of information, communication, and related technologies for rehabilitation is an emerging resource that can enhance the capacity and accessibility of rehabilitation measures by providing interventions remotely. Telerehabilitation technologies include:

Video and teleconferencing technologies in accessible formats; mobile phones; remote data-collection equipment and telemonitoring – for example, cardiac monitors. Technology may be used by people with disabilities, rehabilitation workers, peers, trainers, supervisors, and community workers and families. Where the Internet is available, e-health (telehealth or telemedicine) and telerehabilitation techniques have enabled people in remote areas to receive expert treatment from Rehabilitation specialists located elsewhere. Examples of telerehabilitation include: telepsychiatry services, cardiac rehabilitation , speech and language therapy , and cognitive rehabilitation for people with traumatic brain injury remote assessments to provide home modification services to underserved elderly people; training and support of health-care personnel; computerized guidelines to help clinicians use appropriate interventions; consultation between tertiary hospital and community hospitals for problems related to prosthetics, orthotics, and wheelchair prescription ; sharing professional expertise between countries, as well as at critical times such as in the aftermath of a disaster. Growing evidence on the efficacy and effectiveness of telerehabilitation shows that telerehabilitation leads to similar or better clinical outcomes when compared to conventional interventions. Further information on resource allocation and costs is needed to support policy and practice. Expanding research and evidence-based practice Some aspects of rehabilitation have benefited from significant research, but others have received little attention. the link between rehabilitation needs, receipt of services, health outcomes (functioning and quality of life), and costs; access barriers and facilitators for rehabilitation, models of service provision, approaches to human resource development, financing modalities, among others; cost–effectiveness and sustainability of rehabilitation measures, including community-based rehabilitation programmes. Obstacles to strengthening research capacity include insufficient rehabilitation researchers, inadequate infrastructure to train and mentor researchers, and the absence of partnerships between relevant disciplines and organizations representing persons with disabilities. Obtain information on good practices through: Guidelines that apply research knowledge, usually on a specific health condition, to actual practice for clinicians. An independent search for specific interventions. Continuing professional education. Clinical guidance notes on good practice from employers and health organizations. Discipline-specific Internet databases that appraise the research for clinicians.

A wide variety of sources, including general bibliographic databases and databases specializing in rehabilitation research, are available on the Internet. Most of these databases have already evaluated the research for quality, provided ratings of research studies, and summarized the evidence. Effectiveness of interventions and programmes is extremely beneficial to: guide policy-makers in developing appropriate services allow rehabilitation workers to employ appropriate interventions support people with disabilities

Long-term longitudinal studies are needed to ascertain if expenditure for health and health-related services decreases if rehabilitation services are provided. Research is also needed on the effect rehabilitation has on families and communities, for example, the benefits accrued when caregivers return to paid work, when support services or ongoing long-term care costs are reduced, and when persons with disabilities and their families feel less isolated. A broad approach is required as benefits of rehabilitation often accrue to a different government budget line from that funding rehabilitation. Relevant strategies for addressing barriers in research include the following: Involve end-users in planning and research, including people with disabilities and rehabilitation workers, to increase the probability that the research will be useful. Use the our framework to help develop a global common language and assist with global comparisons Use a range of methodologies. More research such as that by the Cochrane Collaboration (Rehabilitation and Related Therapies) is needed when feasible. Alternative, rigorous research methodologies are indicated, including qualitative research, prospective observational cohort design (259), or high-quality, quasi-experimental designs that suit the research questions, including research studies . Systematically disseminate results so that: policy across government reflects research findings, clinical practice can be evidencebased, and people with disabilities and their families can influence the use of research. Enhance the clinical and research environment. Providing international learning and research opportunities will often involve linking universities in developing countries with those in high-income and middleincome countries . Countries in a particular region, such as South-East Asia, can also collaborate on research projects. Conclusion and recommendations Governments should develop, implement, and monitor policies, regulatory mechanisms, and standards for rehabilitation services, as well as promoting equal access to those services. Service providers should provide the highest quality of rehabilitation services. Other stakeholders (users, professional organizations etc.) should increase awareness, participate in policy development, and monitor implementation. International cooperation can help share good and promising practices and provide technical assistance to countries that are introducing and expanding rehabilitation services. Policies and regulatory mechanisms Assess existing policies, systems, services, and regulatory mechanisms, identifying gaps and priorities to improve provision. Develop or revise national rehabilitation plans, in accord with situation analysis, to maximize functioning within the population in a financially sustainable manner. Where policies exist, make the necessary changes to ensure consistency. Where policies do not exist, develop policies, legislation and regulatory mechanisms coherent with the country context. Prioritize setting of minimum standards and monitoring. Financing Develop funding mechanisms to increase coverage and access to affordable rehabilitation services. Depending on each country's specific circumstances, these could include a mix of: Public funding targeted at persons with disabilities, with priority given to essential elements of rehabilitation including assistive devices and people with disability who cannot afford to pay. Promoting equitable access to rehabilitation through health insurance. Expanding social insurance coverage. Public-private partnership for service provision. Reallocation and redistribution of existing resources.
Support through international cooperation including in humanitarian crises. Human resources Increase the numbers and capacity of human resources for rehabilitation. Relevant strategies include: Where specialist rehabilitation personnel are in short supply, develop standards in training for different types and levels of rehabilitation personnel that can enable career development and continuing education across levels. Establish strategies to build training capacity in accord with national rehabilitation plans. Identify incentives and mechanisms for retaining personnel especially in rural and remote areas. Train non-specialist health professionals (doctors, nurses, primary care workers) on disability and rehabilitation relevant to their roles and responsibilities. Service delivery Where there are none, or only limited, services introduce minimum services within existing. Rehabilitation health and social service provision. Relevant strategies include: Developing basic rehabilitation services within the existing health infrastructure. Strengthening rehabilitation service provision through community-based rehabilitation. Prioritizing early identification and intervention strategies using community workers and health personnel. Where services exist, expand service coverage and improve service quality. Relevant strategies include: Developing models of service provision that encourage multidisciplinary and client-centred approaches. Ensuring availability of high quality services in the community. Improving efficiency by improved coordination between levels and across sectors. In all settings, three principles are relevant: Include service-users in decision-making. Base interventions on sound research evidence. Monitor and evaluate outcomes. Technology Increase access to assistive technology that is appropriate, sustainable, affordable, and accessible. Relevant strategies include: Establishing service provision for assistive devices.

Training users and following up. Promoting local production. reducing duty and import tax. Improving economies of scale based on established need. To further enhance capacity, accessibility and coordination of rehabilitation measures the use of information and communication technologies - telerehabilitation - can be explored. Research and evidencebased practice Increase research and data on needs, type and quality of services provided, and unmet need (disaggregated by sex, age, and associated health condition). Improve access to evidence-based guidelines on cost-effective rehabilitation measures. Disaggregate expenditure data on rehabilitation services from other health care services. Assess the service outcomes and economic benefits of rehabilitation more common types of assistance and support services include: community support and independent living – assistance with self-care, household care, mobility, leisure, and community participation; residential support services – independent housing and congregate living in group homes and institutional settings; respite services – short-term breaks for caregivers and people with disabilities; support in education or employment – such as a classroom assistant for a child with a disability, or personal support in the workplace; communication support – such as signlanguage interpreters; community access – including day care centres; information and advice services – including professional, peer support, advocacy, and supported decision-making; assistance animals – such as dogs trained to guide people with a visual impairment. This chapter deals mainly with assistance and support in the activities of daily life and community participation. need for assistance and support changes through stages of the lifecycle. Formal support may include:

In childhood – respite care, special needs assistance in education; in adulthood – advocacy services, residential support, or personal assistance in the workplace; in old age – day centres, home-help services, assisted living arrangements, nursing homes, and palliative care. Often, problems in service provision occur between these stages – such as between childhood and adulthood. Needs and unmet needs Data are sparse on the needs for national formal support services. disability found that: 70% relied on family and friends for assistance with daily activities, and only 8% used home-health aides and personal assistants; 42% reported having failed to move in or out of a bed or a chair because no one was available to help; 16% of home-care users reported problems paying for home care in the previous 12 months; 45% of participants in the study worried that caring for them would become too much of a burden on the family; 23% feared having to go into a nursing home or other type of facility (20). For most countries, including developed ones, and for many disability groups, there are large gaps in meeting needs for support: Community support and independent living. In China there is a shortage of community support services for people with disabilities who need personal care and lack family support. In New Zealand a household disability survey of 14 500 children with physical disabilities reported that 10% of families reported unmet need for household care, and 7% for funding for respite care. Communication support. Deaf people frequently have difficulties in recruiting and training interpreters, particularly in rural or isolated communities. A survey on the human rights situation of Deaf people found that 62 of the 93 countries that responded have sign language interpreting services, have some kind of sign language interpreters training, and 30 countries had 20 or fewer qualified sign language interpreters, including Iraq, Madagascar, Mexico, Sudan, Thailand, and the United Republic of Tanzania. Respite services. In the United Kingdom a large study of family caregivers of adults with intellectual disability found that 33% had a high but unmet need for respite services and 30% a high but unmet need for home-based services (28). A 2001 United States cross-sectional survey of children with special health care needs found that of (8.8%) reported a need for respite care in the prior 12 months, especially among younger children, mothers with low education, lowincome households, and minority race or ethnicity. Social and demographic factors affecting demand and supply Population growth affects the supply of care. Growth in older age cohorts and their rates of disability influence both supply and demand, and changes in family structure impact on the availability and willingness to provide care. The ageing of consumers and ageing of family members who provide support point to a greatly increased demand for support services. The number of people aged 60 years or over worldwide has roughly tripled – from 205 million in 1950 to 606 million in 2000 – and is projected to triple again by 2050. The likelihood of acquiring a health condition increases as people age – something relevant to prospective users of support services and to family members who provide support.

Despite high proportions of young people in many countries – for example in Kenya 50% of the population is under 15 years of age (31) – there has been a decrease in the number of children per family. Over 1980–2001 fertility rates declined in developed countries (from 1.5 to 1.2) and in developing countries (from 3.6 to 2.6). Even though infant and child mortality rates have been steadily falling in most countries, the counteracting impact of falling fertility rates is greater, with the net effect that smaller family sizes are projected , indicating less family care. In most countries there has been an increase in geographical mobility. With young people moving more readily from rural areas to urban centres or abroad, and with changing attitudes, shared living arrangements within families are becoming less common. Assistance and Support It is uncertain whether informal care and existing provisions for supporting older people with a disability will cope with these demographic shifts. Modelling from Australia suggests that fears about future lack of caregivers may be misplaced. Consequences for caregivers of unmet need for formal support services Informal care can be an efficient and costeffective way of supporting people with disabilities. But exclusive reliance on informal support can have adverse consequences for caregivers.

Stress. The demands of caring often result in stress for families, particularly for women, who tend to be responsible for domestic labour, with care for family members with disability representing a significant share. good condition. I request for more from you. I wish you good luck." Source World report on disability Fewer opportunities for employment. Where employment would otherwise be an option, caring for a family member with a disability is likely to result in lost economic opportunities, as caregivers either reduce their paid work or refrain from seeking it. An analysis of the General Household Survey in the United Kingdom found that informal care reduced the probability of working by 13% for men and 27% for women. In the United States members of families of children with developmental disabilities work fewer hours than members in other families, are more likely to have left their employment, have more severe financial problems, and are less likely to take on a new job. Excessive demands on children. When adults acquire a disability, children are often asked to help. Male children may be expected to enter the workforce to compensate for a parent who is no longer working. Female children may be expected to contribute to domestic tasks or to help support the parent with a disability. dropped out of school. Greater difficulties as family members age. As parents or other family members contributing to care grow older and become frail or die, it can be difficult for the remaining family to continue providing care. The increased life expectancy of children with intellectual disabilities, cerebral palsy, or multiple disabilities suggests that parents may eventually be unable to continue providing care for their disabled family member. institution also lived in atrocious conditions, which included: open sewage, rotting garbage, broken glass, and excrement and urine strewn around wards and common areas; inadequate staffing; a lack of proper medical attention and medical record-keeping; shortages of food and medicines; the detention of children with adults; a lack of adequate mental health services or rehabilitation. DRI, along with the Center for Justice and International Law (CEJIL), it requires a range of institutional assistance and support services, including: health care crisis response systems housing assistance income support support for social networks of people living in the community. Unless the agencies responsible for these services work together, there is a danger that individuals will not obtain adequate support at crucial times in their lives (110 institutions into alternative facilities, such as: vocational training and resource centres; rehabilitation centres providing specialist secondary and tertiary services; smaller home units where people with complex impairments can live semi-independently with some support; respite facilities where people with disabilities can come for short breaks and training; clubs or similar centres for people with mental health issues to achieve peer support and respite; emergency sheltered accommodation, not only for people with disabilities but for all who may be vulnerable to abuse or exploitation. with developed care systems include: charges to users restrictions on eligibility case management to limit the use of services budget-limited programmes (63). In countries in transition that have invested widely in residential care, reallocating resources can help build community support services.

In low-income and middle-income countries, for example in Yemen, there have been good examples of social funds financing support services. Funding services There are many ways to pay providers, with the main government mechanisms including: retrospective fee-for-service payments; direct budgetary allocations to decentralized providers; performance-based contracting; consumer-directed services through devolution of budgets to people with disabilities or their families. Each method has its incentives and limitations, and each therefore has the potential to 150 World report on disability influence how cost-effective and equitable the support system is. The success of a support system depends on the mix, volume, and deployment of staff and other resource inputs and the services they deliver. In turn, these depend on how funds are made available through the various commissioning arrangements. Devolved or direct payments to people with disabilities offer a relatively new commissioning option. In Sweden the Personal Assistance Reform Act of 1994 ensured that individuals with extensive disabilities would be entitled to cash payments from the national social insurance fund to pay for assistance. The weekly number of assistance hours is determined on the basis of need. About 70% of users buy services from local governments, and 15% have organized themselves into user cooperatives that provide services. The remainder purchase services from private companies or directly employ assistants . More than 15 000 individuals in Sweden use state aid to purchase services to meet their care needs. In the Netherlands the Persoonsgebondenbudget is a similar direct payment system. The most common service purchased is personal assistance – from an existing informal care provider or a nonprofessional private service provider. Introduced in 2003, when 50 000 people used the new style Persoongebondenbudget, 120 000 people were taking advantage of the scheme by 2010, when it was temporarily halted. The benefits include lower administrative costs and greater individualization of services. Evaluations have found high levels of satisfaction, better quality of life, and greater independence. In South Africa the Social Assistance Act of 2004 established a direct payment known as "grant in aid".

Individuals who already receive old age, disability, or war veterans' benefits qualify for this additional money if they require full-time care. But the small monthly allowance is insufficient to pay for support. The scheme is currently being reviewed by the Department of Social Development depends on: A needs assessment. This identifies and ranks the care and support needs of a person, without taking into account possible funding and services; Service coordination or planning. This identifies the most appropriate services and support options to meet the assessed needs, within the available funding; Provision of services. This is generally a support package of services for the person with disability, as well as for the family, where appropriate. Assessment, historically, was based on eligibility according to medical criteria. inspections. Social care providers are judged by seven criteria: improving health and well-being. improving the quality of life making a positive contribution choice and control freedom from discrimination economic well-being personal dignity. In countries where NGOs, assisted by foreign aid and local philanthropy, have been the main providers of support services, stable public regulatory frameworks and funding are needed to sustain and build on the services. Regulatory frameworks should cover: quality standards contracting and funding procedures an assessment system allocation of resources . In establishing regulatory frameworks, in whatever setting, people with disabilities and their families should be included, and service users should help in evaluating services. Service outcomes can improve when providers are accountable to consumers. Supporting public-privatevoluntary services A variety of suppliers from different sectors (public, private, voluntary) provide support services. In high-income countries, assistance and support services were set up mostly by charities and self-help groups, with later support from the state. This approach is still in use: In the past decade NGOs working on disability have been set up in the Balkan countries. Many are delivering services, often initially in pilots, with the support of state funding, such as the Serbian Social Innovation Fund. An example is the pilot project for interpreting in Novi Pazar, Serbia, run by the Association of Deaf and Hard of Hearing People. In India the National Trust Act – created as the result of a campaign for the rights of people with disabilities – has produced collaboration among a range of NGOs. The Act gives individuals with autism, cerebral palsy, intellectual impairment, or multiple impairments, as well as their families, access to government services to enable people with disabilities to live as independently as possible within their communities. In Zambia the Mental Health Users Network provides a forum for users of mental health services to support each other and exchange ideas and information. In the United States MindFreedom has "landing zones" for communities to provide support and housing to people so that they can avoid hospitalization or institutionalization. Consumer-directed services are often less costly and just as safe as professional-directed services. family members and others providing informal care, as suggested by the Illinois Home Based Support Services Program. Respite services – either in the home or outside the home – providing short-term breaks from caring. These have been developed in high-income countries and countries in transition, but unmet needs for respite are reported.

Direct or indirect financial support. Countries in transition, including the Republic of Moldova and Serbia, and parts of South America, where pensions have been provided for otherwise unpaid caregivers, and developing countries, such as South Africa, provide some cash benefit for caregivers in families with people with disabilities. Psycho-social support services to improve family well-being. Paid sick leave and other support from employers to facilitate family caring. Families can benefit from opportunities for autonomy and support services. in complaints procedures during evaluation and feedback as participants on management boards as members of advisory groups of people with disabilities in making decisions for themselves. The concept of the "co-production" of support services has recently been promoted, bringing together the traditional organizations working on behalf of people with disabilities with organizations controlled by people with disabilities. Advocates – where the person is supported one-on-one by a trained and skilled individual to make and carry through a decision. Circles of support – networks of supporters and friends who know the person well and who can make decisions to which the person freely consents. KeyRing or living support networks – where people with intellectual impairments live in the community, but with a "community living worker" available to provide support and help make connections in the community. User-controlled independent living trusts – similar to circles of support, but with a legal structure that sets up the necessary framework of decision-making around the individual. Service brokerage – where a skilled supporter enables the person to choose services, helping with the assessment process and supporting implementation of assistance packages. An agency can act as the named employer of support on behalf of an individual, if required. Despite evidence of the benefits of direct payments, mental health users are underrepresented in individualized funding arrangements in Australia, Canada, the United Kingdom, and the United States

Because of the lack of funds, personal assistance is rarely publicly provided in lowincome and middle-income settings. But some innovative programmes suggest that low-cost solutions can be effective and that independent living principles remain relevant. In 2003 in Brazil there were 21 centres for independent living, with the first in Rio de Janeiro, already been operating for 15 years 155 Chapter 5 Assistance and Support. As elsewhere, the independent living movement brings together people from different impairment groups, and offers services such as peer support, information, training and personal assistance, with staff who themselves have disabilities. However, unlike those in developed countries, centres for independent living do not tend to receive money from the state, but instead have to raise their own funds, such as through employment brokerage services. share similar experiences in supporting relatives with disabilities. In Lesotho the leaders of nine branches of the national association of parents of disabled children found that parents required support in how to teach, train and handle their child; information about the rights of people with disabilities and how to work with professionals; and information on how to create teaching aids and obtain equipment. RUCODE, an NGO in the state of Tamil Nadu, India, runs community-based daycare centres for children with intellectual disabilities and cerebral palsy, with the help of local government and parents. Each centre caters to around 10 children, with one teacher and one attendant at each centre and support from RUCODE staff. The community contributes the venue and provides lunch for the children.

In Nepal CBR programmes are implemented in 35 districts by local NGOs, with the government providing funding, direction, advice, and monitoring at the national and district levels . As the CBR model strengthens the quality of the relationship between people with disabilities and their families, it can bring significant support to people with disabilities and caregivers . Recently the principles of independent living have started to be introduced within community-based rehabilitation, which will help CBR services ensure greater self-determination for people with disabilities. Community home-based care Community home-based care is any support given, in their homes, to people who are ill and their families. The model, developed particularly to cope with HIV/AIDS, operates in many African and Asian countries, with care of orphans a special concern. A government community home-based care programme might provide food, transport, medication, respite care, cash allowances, and emotional and physical care. Including assistance and support in disability policies and action plans The inclusion of formal assistance and support services within a national disability policy and related action plan can improve community participation of persons with disabilities, for example: Australia's Disability Discrimination Act (1992) encourages organizations to create action plans to eliminate discrimination in provision of goods, services and facilities . New Zealand's Disability Strategy (2001) offers a framework for government to begin removing barriers to the participation of people with disabilities . Sweden's "From Patient to Citizen" national action plan (2000) has a vision of complete access and seeks to eliminate discrimination at all levels . CBR programmes can also promote local action plans in low-income and middleincome countries that have previously relied on institutional living: Plan adequately for the transition to a community-based service model, including human resources and sufficient funding for the transition phase. Progressively develop and reallocate resources to build community support services, including the possible transformation of institutions into alternative care services such as resource or day care centres. Foster development of the support services infrastructure Include the introduction and development of formal assistance and support services – customized to different economic and social environments – in national disability action plans to improve participation of persons with disabilities. Support the development of a range of providers – state, not-for-profit providers, for-profit entities, and individuals – and models to meet, in a cost-effective manner, the diverse assistance and support needs of people with disabilities. Consider a variety of financing measures including: contracting out services to private providers, offering tax incentives, and devolving budgets to people with World report on disability disabilities and their families for direct purchases of services. In low-income and middle-income countries, support service provision through civil society organizations, which can expand the coverage and range of services. CBR programmes have been effective in delivering services to very poor and underserved areas. Ensure maximum consumer choice and control This is more likely to be achieved by formal services when: Services are individualized and flexible rather than "one size fits all" agency-based and controlled services. Consumers are involved in decisions on the type of support and direct the care tasks wherever possible rather than being a passive recipient of care. Providers are accountable to consumers and their relationship is regulated through a formal service arrangement.

"Supported decision-making" is available for people who have difficulties making choices independently – for example, people with severe intellectual impairment or mental health conditions. Support families as assistance and support providers Separate the needs and rights of informal caregivers from the needs and rights of persons with disabilities. A balance must be found so that each person has independence, dignity, and quality of life. Promote collaboration between families and family organizations, governmental and nongovernmental organizations, including disabled peoples' organizations, to provide support for families through a range of systems and services including by: Arranging for respite care, which can provide a short break from care and psychosocial counselling to improve family well-being. Providing direct or indirect financial support. Providing information about the services available for caregivers and people with disabilities. Organizing opportunities for families, who share similar experiences in supporting relatives with disabilities, to come together and offer mutual information and support. Community-based rehabilitation workers, social workers, or community workers can provide these opportunities for families. Useful family-oriented approaches also include developing communities of care and social networks. Step up training and capacity building Effective assistance and support services require training of both care recipients and care providers, irrespective of whether the care is provided formally or informally. Formal support workers, regardless of setting and service, should be provided with relevant professional training, which takes into account the principles of the CRPD and preferably involves people with disabilities as trainers to sensitize and familiarize service providers with their future clients. Provide training to families on working with caregivers, defining roles, setting boundaries, and on how to empower their relative with disability.

In low-income settings, community-based rehabilitation programmes can provide training to people with disabilities and their families to manage their support needs and create links with self-help groups for information and advice. Persons with disabilities directly employing support workers using allocated public funds may need training and assistance in recruitment, management and fulfilling their employer responsibilities. Training schemes for sign-language interpreters and advocacy workers will help improve supply of these vital personnel. Assistance and Support Improve the quality of services To ensure that formal assistance and support services are of good quality, the following are recommended: Develop sound and fair disability assessment criteria and procedures, focusing on support needs to maintain and improve functioning. Use ICF as a guiding framework in developing disability assessment criteria. Develop clear eligibility criteria for assistance and support services and transparent decision-making processes.

In resourceconstrained environments, focus on people with disabilities most in need of support services – those without any informal caregiver and limited means. Set standards of services, enforce them, and monitor compliance. Monitor service provision. Keep updated records of users, providers, and services provided. Ensure coordination across different government agencies and service providers, possibly through introducing case management, referral systems, and electronic record-keeping. Establish complaints mechanisms. Introduce mechanisms to detect and prevent physical and sexual abuse in both residential and community settings. Ensure that support staff have appropriate training, proper levels of pay, status, and working conditions. Encourage the monitoring of service quality by disabled peoples' organizations and other NGOs. Ramps in all polling stations. Braille numbers by ballot buttons on Electronic Voting Machines. Separate queues for disabled people at polling stations. Electoral staff trained to understand and respect the needs of people with disabilities. As a result of the campaigning and awareness-raising, the leading parties explicitly mentioned disability issues in their 2009 manifestos. Increased political participation of people with disabilities may result in progress towards more disabilityinclusive public policy. While progress has been achieved in making elections accessible, it is rare for people with disabilities to be elected to public positions. However, in countries including the United States, the United Kingdom, Germany, Ecuador, and Peru, persons with disabilities have held the highest office. In Uganda Section 59 of the Constitution of 1995 states that "Parliament shall make laws to provide for the facilitation of citizens with disabilities to register and vote," while Section provides for representation of people with disabilities in Parliament. People with disabilities are elected through an electoral college system at all levels from village up to Parliament, giving influence which has resulted in disability-friendly legislation. Uganda has among the highest numbers of elected representatives with disabilities in the world. Further information: http://www.electionaccess.org; http://www.ifes.org/disabilities.html; http://www.everyvotecounts.org.uk. World report on disability speech impairment, are at a significant social disadvantage, in both developing and developed countries. This disadvantage is particularly experienced in sectors where effective communication is critical – such as those of health care, education, local government, and justice. People who are hard of hearing may need speech-reading, assistive listening devices, and good environmental acoustics in indoor settings. Deaf and deafblind people use sign languages.

They need bilingual education in sign language and the national language, as well as sign language interpreters, including tactile or hands-on interpreters. According to World Health Organization (WHO) estimates, in 2005, around 278 million people worldwide have moderate to profound hearing loss in both ears. People who are blind or have low vision require instruction in Braille, equipment to produce Braille materials, and access to library services that provide Braille, audio and large-print materials, screen readers, and magnification equipment. About 314 million people around the world have impaired vision, due either to eye diseases or uncorrected refractive errors. Of this number, 45 million people are blind. People with intellectual impairments need information presented in clear and simple language. People who have severe mental health conditions need to encounter healthworkers who have the communication skills and confidence to communicate effectively with them. Non-speaking individuals need access to "augmentative and alternative communication" systems and acceptance of these forms of communication where they live, go to school and work. These include communication displays, sign language and speech-generating devices. various factors, including: lack of financial resources; a lack of planning and design capacity; limited research and information; a lack of cooperation between institutions; a lack of enforcement mechanisms; a lack of user participation; geographic and climatic constraints; a lack of a disability-awareness component in the training curricula of planners, architects and construction engineers.

The basic features of access in new construction should include: provision of curb cuts (ramps) safe crossings across the street accessible entries an accessible path of travel to all spaces access to public amenities, such as toilets. A compilation of data on 36 countries and areas in Asia and the Pacific showed that 72% have accessibility standards for either the built environment or public transport or both. An assessment of the content of standards and coverage is required to understand the scope and application of these norms. Systematic comparison is difficult, but several practices can lead to better enforcement: Laws with mandatory access standards are the most effective way to achieve accessibility. The first accessibility standard in the world – a voluntary one in the Unites States – demonstrated a very low level of adoption (44). Similar results are reported in other countries. Standards and compliance should be regulated and mandated by law. Good design reviews and inspections ensure that accessibility will be provided from the day a building is completed. Accessibility standards thus need to be part of building regulations. The delays caused by the denial of permits for construction or occupancy should provide an incentive for builders and developers to meet the rules. If there are no design reviews or inspections, the law can require effective penalties for non-compliance, as well as a mechanism for identifying non-compliance and correcting the offence. Government funding agencies – including those that fund health care facilities, transportation, and schools – can also review plans as part of their approval process, using consistent standards. undermine the goals of the law. In Norway, after a monitoring exercise found that few local communities had carried out any accessibility planning, the government set up pilot projects around the country, to make local communities better able to provide accessibility for people with disabilities. In Winnipeg, Canada, a local action group worked with the municipal administration in an assessment of barriers, with recommendations for their removal. In Kampala, Uganda, following the development of accessibility standards in association with the government, a National Accessibility Audit Team was created by Uganda National Association on Physical Disability. constructed, an "access audit" examines its usability by disabled people.

The purpose of this audit is: to increase awareness among planners and architects about barrier-free environments for people with disabilities; to ensure, in both new buildings and retrofitting, the use of universal design concepts and adherence to the standard codes relating to people with disabilities; to evaluate the degree of access to existing public buildings and recommend improvements. University schools of architecture can be a focus of education and research efforts for both students and practicing professionals. The International Islamic University in Malaysia recently introduced "barrier-free architecture" as an elective subject in its Bachelor of Architecture programme. In addition, the new Kaed Universal Design Unit at the university's Kulliyyah School of Architecture and Urban Design seeks to: create awareness of design issues for children, disabled people and older people; conduct research and develop new technologies; disseminate information; educate the design profession and the public on design regulations. Enabling Environments Education and campaigning Education, along with technical assistance on enforcement procedures, is essential to improve awareness of the need for accessibility and understanding of universal design.

Supporting Educational programmes should be targeted to all those involved in enforcing accessibility laws and standards – including people with disabilities, design educators and professionals, government regulators, business owners and managers, and building developers and contractors for advocacy by: setting up an informal "access resource group", bringing together architects, builders, designers, engineers, people with disabilities, and development and rehabilitation professionals; We shall support observation of month of disability globally through government ministries and institutions for nations to engage in a constructive dialogue to respond to the issues that continue to confront people with disabilities to further affirm government's commitment to provide a better life for all, including people with disabilities, who are among the most disadvantaged people of our country and still excluded from all aspect of societal life such as health, education, employment opportunities etc. The observance of the Day aims to promote an understanding of disability issues and mobilize support for the dignity, rights and well-being of persons with disabilities. Correctly so, this dialogue takes place under theme "Break barriers, open doors to realise an inclusive society for all". This theme calls upon us to act in order to protect the rights and dignity of people with disabilities. We must thus act with vigour to improve their quality of life. We must act to break down the barriers that prevent them from achieving their full potential. During this Disability Month we shall advocate ought to act in a manner that shows our true commitment to every initiative that is aimed at supporting people living with disabilities. We shall recognize talents and abilities such us Paralympics and other honor events People living with disabilities continues to inspire us to appreciate life, regardless of its challenges. In most instances they do remarkable things which many able-bodied people cannot do. In spite of the limitation of the necessary resources to make things simple for them, they still strive to succeed, at times without the assistance of other people. We should always understand that no person ever chose to live with disability and it will be wrong to judge any person because of his or her disability.
We must not only care about people with disabilities we should forever know that caring for those who need our utmost assistance cannot be replaced or postponed. We must be available to help people with disability without expecting any reward. Those who volunteer their services in various centers are true heroes who deserve words of appreciation and admiration. We are indebted to such people for they go an extra step in supporting people living with disability. On behalf of Helpers Of Africa Internationall appluade you donors for helping us to help many with disability.

The Helpers Of Africa Internationalwe are privileged to lead and care for is a caring bank, eternally dedicated to the betterment of all citizens, we recognized the challenge faced by disabled persons and made the commitment to elevate their concerns into the top priority of the bank and global agenda of reconstruction and development. One of the first actions of the Helpers Of Africa Internationalis to place the issues, concerns and affairs of disabled persons in the Office of the President of the Bank. We are also blessed because we have a department that is responsible for all people with disabilities in to demonstrate our commitment and seriousness to respond to the plight of people with disabilities. As a bank, our caring attitude to disabled persons is underpinned by our commitment to society and our Helpers Of Africa Internationalpolicy and structure that values human dignity, equality and the development to full capacity of all citizens, including disabled persons. We believe that disabled persons must also enjoy the prosperity, a better life and all the opportunities that our freedom and blessings that God has released. Evidence and experience shows that when barriers to their inclusion are removed and persons with disabilities are empowered to participate fully in societal life, their entire community benefits. Barriers faced by persons with disabilities are, therefore, a detriment to society as a whole, and accessibility is necessary to achieve progress and development for all.Helpers Of Africa International through Kingdom Global Disabilty Empowerment Agency Will pledge a huge amount towards disability empowerment Support and solidarity with the disabled persons all over the world on this launch of Disability department as we launch our bank.

Our solidarity we pledge must be expressed in actions I have shared and raising awareness through practical action to educate our people about norms and standards that guide processes that are aimed at improving the quality of life of persons with disabilities. And through such standards we should be in a good position to ensure the participation of persons with disabilities in various sectors of the society globally. Working hand governments and like minded institutions is paying attention to transforming lifes to improve access for disabled persons. We shall advocate through gorvernments need to ensure, among other things, that buildings have proper signage, that lifts have proper sensors and speakers and that we have buildings that are generally sensitive to the needs of the disabled persons. We shall advocate and support to ensure the active involvement and participation of people with disabilities in the mainstream of the global economy & equal access to work opportunities in the public service and the private sector. This, and others, is a challenge that we address daily through various works that are underway. We are talking here of transforming the whole society and even the environment, to ensure that it successfully addresses the challenges of service delivery to the disabled communities.In doing so, I wish to reaffirm our commitment as a global bank to building a society that cares and values our disabled persons.

We believe disabled persons are special people. I take this opportunity to encourage all of us here today to continue to support and donate more and raise more partners doing the best we can to contribute in the effort of creating a better life for people with disabilities, especially those in the rural areas of our countries through our solid strategic plan. Our environments are created by us and we can change them.

We applaud and salute work done by United Nations General Assembly of the International Convention on the Rights of People with Disabilities, world bank, international development partners and NGO along with institutions that care for those with disabilities we are not coming in a vacuum but with fore funners who have done a lot and we are just coming to add value and resources fueling a fire that is already burning. Over 100 have signed, and 8 have ratified, sets out fundamental rights and freedoms for people with disabilities around the world, in all areas of life. This is a goodwill and platform for our vision projects and programs to prosper and receive easy support and collaboration to advance the rights of people with disabilities the value of an international instrument such as this to people with disabilities around the world cannot be under-estimated. The provisions of the Convention and global achievements is a strong place for us to take off. But of particular relevance because the focus of this year's international day is decent employment for people with disabilities of the Convention which deals with work and employment. The article recognises the right to work, in a labour market that is open, inclusive and accessible. It requires States to promote the realisation of that right through-

- Prohibition of discrimination;
- Protection of just and favourable conditions of work;
- Exercise of trade union rights;
- Availability of vocational training;
- Promotion of employment opportunities and continued advancement;
- Promotion of self-employment;
- Provision of employment in the public sector;
- Promotion of private sector employment through affirmative action, incentives and other measures;
- Ensuring the provision of reasonable accommodation or adjustment;
- Promotion of work experience in open employment; and
- Promotion of rehabilitation and return-to-work programmes.

We shall through Governments and corporate initiatives, doing most of these things. But clearly, given the major disparity in employment rates between people with disabilities and the general community. By the grace of God in whose mandate we shall operate we hope to do our best. We shall empower thousands of architects, designers, builders and certifiers, about how to make sure buildings are accessible at a level consistent with responsibilities under the Disability Discrimination Act (DDA). Human Rights Commission has issued advisory notes and guidelines on good practice, the DDA does not include technical specifications that can be referred to for compliance. For new buildings are being built, and existing buildings renovated access to disability is key advocacy that we want to entrench. Many of the developing countries don't have buses with disability standards and Helpers Of Africa Internationalwill begin to buy such and entrust them to reputable companies to run with free rides to people living with disability. We shall also support redesigning and upgrades of cities to and towns to The Standards require that people with mobility disabilities must be able to-

1. Get to, and away from, the bus stop -- while the Standards do not extend beyond the bus stop, they do require a seamless transition from the bus stop to the surrounding footpath where one exists;
2. Have sufficient circulation space to get onto and off an accessible bus;
3. Safely use a boarding device deployed by an accessible bus; and
4. Get to and from any infrastructure associated with the bus stop, and used by passengers in conjunction with travelling on a public transport service, such as a bus shelter.We shall partner with like minded organizations , International development agencies and donors to create public awareness project, Getting everybody on the bus, which will encourage schools, universities, and other sectors of the community, to start auditing their local bus stops, and drawing non-compliance to the attention of the local council responsible. When bus stops project is successful, the campaign will be extended to a broader range of community facilities. People with disabilities are members of the broader community, and this campaign will encourage the broader community to ensure that facilities are available to everyone, including people with disabilities. Over the coming years we shall advocate for school and university students completing access audits as part of their curriculum work, and submitting the results to the providers of those facilities. Owners of offices, shops, playground equipment and transport systems would then have to explain why their facilities are only available to people who do not have disabilities. The responsibility for achieving an accessible community does not just rest with people with disabilities- it rests with all of us.

I want to express my deepest gratitude for all you do to advance the rights of persons with disabilities across our agenda and around the world through your generosity and networks. Your giving will be vital in our hands – not just for persons with disabilities, but, indeed, for all people in the world through all spheres of life in education, health, shelter, environment, socio-economic life etc. Disability inclusion is a fundamental human right. When we fight to secure those rights, we move our world closer to upholding the core values and principles of global humanitarian Charter. Disability inclusion is central to the promise of the 2030 Global Agenda on Sustainable Development. When we remove policies or biases or obstacles to opportunity for persons with disabilities, the whole world benefits we shall support and work on this.

Indeed, the International Labour Organization found that excluding people with disabilities from the world of work can rob countries of as much as 7 per cent of their Gross Domestic Product. Realizing the rights of persons with disabilities is a matter of justice as well as a common-sense investment in our common future. Our strategic plan will go a long way to go in changing mindsets, laws and policies to ensure the rights, opportunity and dignity for persons with disabilities around the world. So we are here, together, to take action to make the goals and the objectives of welfare of the world a reality on the ground including orphans and those who live with disability. We shall promote stronger collaboration among donors and partners, the Global system, civil society organizations -- in particular, organizations of persons with disabilities / charity / empowerment and development partners – as well as the private sector and institutions through your networks our donors and partners.

And we are here as friends of the world and humanity “to transform society, community and development the world to be inclusive, accessible and sustainable for all”. The global progress has highlights core challenges: disproportionate levels of poverty, lack of access to education, health services, employment and the under-representation of persons with disabilities in decision-making and political participation. That is what we seek to we must do much more to address discrimination and exclusion -- particularly against girls and women with disabilities. We must do much more to ensure full accessibility to schools, health care and services, the workplace, leisure and recreational activities, sports, and all areas of life. We must also do much more on transportation, infrastructure and information and communications technology to make our cities, rural areas, and societies inclusive. Our destination is clear: a world in which all persons – including those with disabilities – can enjoy equal opportunities, have a full say in decision-making processes and truly benefit from economic, social, political and cultural life.

I urge all donors to be more ambitious in implementing financial commitments to ensure the realization of Helpers Of Africa International programs and plans including the rights of all persons with disabilities. We have some examples of good practices – but the review shed light on gaps – big gaps – across all our work from headquarters Kenya to the country level. The rep understanding and systemic approaches to ensure we fulfil our responsibilities. It showed unevenness in our approach – in our use of existing tools and mechanisms – in not only our strategies, but even in awareness of core policies. Our strategic plans in Helpers Of Africa International in all spheres is not a strategy of words – it is a strategy of action – action to raise the standards of our performance in the global sphere among many players disability inclusion across the board – and action to bring about the unified and transformative change we need globally. We have accountability framework to monitor progress and to make sure we address the challenges and gaps – not only in headquarters but in the field through a strong monitoring and evaluation with real time, online reporting time. We have established clear benchmarks and a focus on critical areas including leadership, strategic planning, accessibility, participation, programming, procurement and a call for more persons with disabilities working with us and better supported by the organization.

I want the Helpers Of Africa International to be an employer of choice for persons with disabilities. I want our humanitarian, development and peace operations to fully recognize and advance the rights of persons with disabilities. And I want the Helpers Of Africa International to be fully accessible for one and all. We cannot be a platform for change when persons with disabilities cannot access that platform to speak globally and that is what we seek to do. And I count especially on persons with disabilities and on other project to ensure that the entire Helpers Of Africa International family makes good on the promise of this strategy across all departments and divisions. We are a family as Donors and as workers implementers. Together, with persons with disabilities as agents of change, we can build an inclusive, accessible and sustainable world and together, we can create the conditions to realize the dream of a better world. Disabilty should not prevent people from having a prominent career. We shall work hard to make those who live with disability to benefit from the good world that God has in this world access to class medical care. We shall create a support system that make it possible to live and work in comfort and dignity. Avail good health, shelter, jobs, business opportunities, talent and career development. We shall support those with disabilities with technology in communication, mobility and function to live a worthwhile life. It is very clear that the majority of people with disabilities in the world have an extremely difficult time with everyday survival, let alone productive employment and personal fulfilment. Our strategic plan makes a major contribution to our understanding of disability and its impact on individuals and society. It highlights the different barriers that people with disabilities face – attitudinal, physical, and financial. Addressing these barriers is within our reach. We have a moral and godly duty to remove the barriers to participation, and to invest sufficient funding and expertise to unlock the vast potential of people with disabilities. Governments throughout the world can no longer overlook the hundreds of millions of people with disabilities who are denied access to health, rehabilitation, support, education and employment, and never get the chance to shine.

Our Strategic plan makes recommendations for action at the local, national and international levels. It will thus be an invaluable tool for policy-makers, researchers, practitioners, advocates and volunteers involved in disability. It is my hope that our coming in global affairs will be value addation. In the years ahead, disability will be an even greater concern because its prevalence is on the rise. This is due to ageing populations and the higher risk of disability in older people as well as the global increase in chronic health conditions such as diabetes, cardiovascular disease, cancer and mental health disorders. Across the world, people with disabilities have poorer health outcomes, lower education achievements, less economic participation and higher rates of poverty than people without disabilities. This is partly because people with disabilities experience barriers in accessing services that many of us have long taken for granted, including health, education, employment, and transport as well as information. These difficulties are exacerbated in less advantaged communities. To achieve the long-lasting, vastly better development prospects that lie at the heart of global Development Goals and beyond, we must empower people living with disabilities and remove the barriers which prevent them participating in their communities; getting a quality education, finding decent work, and having their voices heard. As a result, Helpers Of Africa International will join world players and stakeholders to provide the evidence for innovative policies and programmes that can improve the lives of people with disabilities, and facilitate implementation as a global response to humanitarian response. Our plans and actions in all sectors of global affairs education, health, environment, shelter, food, groups empowerment, cities & urban development, mining, infrastructure and other will reinforced a global impact and understanding of development as we join other players. The our global strategic plans suggests steps for all stakeholders – including governments, civil society organizations and disabled people's organizations – to create enabling environments, develop rehabilitation and support services, ensure adequate social protection, create inclusive policies and programmes, and enforce new and existing standards and legislation, to the benefit of people with disabilities and the wider community. People with disabilities should be central to these endeavors. Our driving vision is of an inclusive world in which we are all able to live a life of health, comfort, and dignity.

Our historical commitment funds reaffirms that people like you who have been blessed by God can step in to make the lives of others better in being a blessing and to orphans and those with disabilities are entitled to exactly the same rights as everyone else, and that societies must be organized so that all people, including those with disabilities, can exercise their rights freely. We shall engage Countries to accept and adobt our development policies, investments and legal systems, to leave no one behind as moses of the bible told pharoh we are going all of us not leaving the weak and elders or youthful to serve God in the promised land. Societies will never succeed without the full participation of everyone, including people with disabilities. We cannot afford to ignore or marginalize the contributions of 1.5 billion people. Upholding the rights of people with disabilities is a moral imperative. But it is not an act of charity. It is a recognition of rights and a practical necessity, if we are to build healthy, sustainable societies to the benefit of everyone – those with disabilities, and those without. I strongly believe that despite many international agreements and initiatives, we must all support civil society, the private sector, and all stakeholders – do much more to ensure that people with disabilities have full access to opportunities and can participate fully in society. This is why advancing the rights of persons with disabilities and orphans is firmly situated at the heart of our global blueprint for peaceful, prosperous societies on a healthy planet. From the workplace to public transport systems, from concert halls to cyberspace and daily social interactions, people with disabilities face overt discrimination, stereotyping, and lack of respect for their basic human rights. There is also a strong gender dimension to disability. Women and girls are disproportionately affected, particularly in the poorest countries in the world. Every minute, more than 30 women are seriously injured or disabled during childbirth. Women and girls with disabilities face multiple barriers to accessing education, health services and jobs. Without women's empowerment and gender equality, millions of women will continue to suffer from double discrimination based on both their gender and their disability.

We must all find new approaches and tools to work for and with people with disabilities. These should include mainstreaming disability in national legislation and development strategies; and engaging and empowering people with disabilities, and the organizations that represent them. It must also include raising awareness. Discrimination against people with disabilities has been going on for centuries. It will take major efforts to challenge stereotypes and to change mindsets.The powerful advocacy of the disability rights movement and the inspiring achievements of women and men with disabilities in all walks of life, from the science lab to the sports field, are creating lasting change. It will also be crucial to support the work Governments and global institutions to develop their capacity on these issues. We need to strengthen the policy frameworks and laws on orhans and disability at the multilateral and global level together with others. If people with disabilities are to be part of our efforts to achieve global future fo all we must make institutions, mechanisms and processes coherent and coordinated. There is still a lot to go, and employment to mainstreaming disabilities across all our work, particularly development and humanitarian aid.

It will inform a new Helpers Of Africa InternationalAction Plan and an accountability framework to help us aim higher and live up to our promises. Together, we can remove barriers and raise awareness, so that people with disabilities can play a full part in every sphere of society, around the world. The world's poor are significantly more likely to have or incur a disability within their lifetime compared to more financially privileged populations. The rate of disability within impoverished nations is notably higher than that found in more developed countries. Since the early 2010s there has been growing research in support of an association between disability and poverty and of a cycle by which poverty and disability are mutually reinforcing. Physical, cognitive, mental, emotional, sensory, or developmental impairments independently or in tandem with one another may increase one's likelihood of becoming impoverished, while living in poverty may increase one's potential of having or acquiring special needs in some capacity.

Individuals who already receive old age, disability, or war veterans' benefits qualify for this additional money if they require full-time care. But the small monthly allowance is insufficient to pay for support. The scheme is currently being reviewed by the Department of Social Development A needs assessment. This identifies and ranks the care and support needs of a person, without taking into account possible funding and services; Service coordination or planning. This identifies the most appropriate services and support options to meet the assessed needs, within the available funding; Provision of services. This is generally a support package of services for the person with disability, as well as for the family, where appropriate. Assessment, historically, was based on eligibility according to medical criteria. inspections. Social care providers are judged by seven criteria: improving health and well-being. improving the quality of life making a positive contribution choice and control freedom from discrimination economic well-being personal dignity. In countries where NGOs, assisted by foreign aid and local philanthropy, have been the main providers of support services, stable public regulatory frameworks and funding are needed to sustain and build on the services. Regulatory frameworks should cover: quality standards contracting and funding procedures an assessment system allocation of resources (108). In establishing regulatory frameworks, in whatever setting, people with disabilities and their families should be included, and service users should help in evaluating services (133). Service outcomes can improve when providers are accountable to consumers. Supporting public-privatevoluntary services A variety of suppliers from different sectors (public, private, voluntary) provide support services. In high-income countries, assistance and support services were set up mostly by charities and self-help groups, with later support from the state. This approach is still in use: In the past decade NGOs working on disability have been set up in the Balkan countries. Many are delivering services, often initially in pilots, with the support of state funding, such as the Serbian Social Innovation Fund. An example is the pilot project for interpreting in Novi Pazar, Serbia, run by the Association of Deaf and Hard of Hearing People. In India the National Trust Act – created as the result of a campaign for the rights of people with disabilities – has produced collaboration among a range of NGOs. The Act gives individuals with autism, cerebral palsy, intellectual impairment, or multiple impairments, as well as their families, access to government services to enable people with disabilities to live as independently as possible within their communities. In Zambia the Mental Health Users Network provides a forum for users of mental health services to support each other and exchange ideas and information. In the United States MindFreedom has "landing zones" for communities to provide support and housing to people so that they can avoid hospitalization or institutionalization. Consumer-directed services are often less costly and just as safe as professional-directed services. family members and others providing informal care, as suggested by the Illinois Home Based Support Services Program. Respite services – either in the home or outside the home – providing short-term breaks from caring. These have been developed in high-income countries and countries in transition, but unmet needs for respite are reported .

Direct or indirect financial support. Countries in transition, including the Republic of Moldova and Serbia, and parts of South America, where pensions have been provided for otherwise unpaid caregivers, and developing countries, such as South Africa, provide some cash benefit for caregivers in families with people with disabilities. Psychosocial support services to improve family well-being. Paid sick leave and other support from employers to facilitate family caring. Families can benefit from opportunities for autonomy and support services. in complaints procedures during evaluation and feedback as participants on management boards as members of advisory groups of people with disabilities in making decisions for themselves. The concept of the "co-production" of support services has recently been promoted, bringing together the traditional organizations working on behalf of people with disabilities with organizations controlled by people with disabilities. Advocates – where the person is supported one-on-one by a trained and skilled individual to make and carry through a decision. Circles of support – networks of supporters and friends who know the person well and who can make decisions to which the person freely consents. KeyRing or living support networks – where people with intellectual impairments live in the community, but with a "community living worker" available to provide support and help make connections in the community. User-controlled independent living trusts – similar to circles of support, but with a legal structure that sets up the necessary framework of decision-making around the individual. Service brokerage – where a skilled supporter enables the person to choose services, helping with the assessment process and supporting implementation of assistance packages. An agency can act as the named employer of support on behalf of an individual, if required. Despite evidence of the benefits of direct payments, mental health users are underrepresented in individualized funding arrangements in Australia, Canada, the United Kingdom, and the United States. Because of the lack of funds, personal assistance is rarely publicly provided in lowincome and middle-income settings. But some innovative programmes suggest that low-cost solutions can be effective and that independent living principles remain relevant. In 2003 in Brazil there were 21 centres for independent living, with the first in Rio de Janeiro, already been operating for 15 years. As elsewhere, the independent living movement brings together people from different impairment groups, and offers services such as peer support, information, training and personal assistance, with staff who themselves have disabilities. However, unlike those in developed countries, centres for independent living do not tend to receive money from the state, but instead have to raise their own funds, such as through employment brokerage services. share similar experiences in supporting relatives with disabilities. In Lesotho the leaders of nine branches of the national association of parents of disabled children found that parents required support in how to teach, train and handle their child; information about the rights of people with disabilities and how to work with professionals; and information on how to create teaching aids and obtain equipment. RUCODE, an NGO in the state of Tamil Nadu, India, runs community-based daycare centres for children with intellectual disabilities and cerebral palsy, with the help of local government and parents. Each centre caters to around 10 children, with one teacher and one attendant at each centre and support from RUCODE staff. The community contributes the venue and provides lunch for the children. In Nepal CBR programmes are implemented in 35 districts by local NGOs, with the government providing funding, direction, advice, and monitoring at the national and district levels. As the CBR model strengthens the quality of the relationship between people with disabilities and their families, it can bring significant support to people with disabilities and caregivers. Recently the principles of independent living have started to be introduced within community-based rehabilitation, which will help CBR services ensure greater self-determination for people with disabilities. Community home-based care Community home-based care is any support given, in their homes, to people who are ill and their families. The model, developed particularly to cope with HIV/AIDS, operates in many African and Asian countries, with care of orphans a special concern. A government community home-based care programme might provide food, transport, medication, respite care, cash allowances, and emotional and physical care. Including assistance and support in disability policies and action plans The inclusion of formal assistance and support services within a national disability policy and related action plan can improve community participation of persons with disabilities, for example: Australia's Disability Discrimination Act (1992) encourages organizations to create action plans to eliminate discrimination in provision of goods, services and facilities . New Zealand's Disability Strategy (2001) offers a framework for government to begin removing barriers to the participation of people with disabilities . Sweden's "From Patient to Citizen" national action plan (2000) has a vision of complete access and seeks to eliminate discrimination at all levels . CBR programmes can also promote local action plans in low-income and middleincome countries that have previously relied on institutional living: Plan adequately for the transition to a community-based service model, including human resources and sufficient funding for the transition phase. Progressively develop and reallocate resources to build community support services, including the possible transformation of institutions into alternative care services such as resource or day care centres. Foster development of the support services infrastructure Include the introduction and development of formal assistance and support services – customized to different economic and social environments – in national disability action plans to improve participation of persons with disabilities. Support the development of a range of providers – state, not-for-profit providers, for-profit entities, and individuals – and models to meet, in a cost-effective manner, the diverse assistance and support needs of people with disabilities.

Consider a variety of financing measures including: contracting out services to private providers, offering tax incentives, and devolving budgets to people with 158 World report on disability disabilities and their families for direct purchases of services. In low-income and middle-income countries, support service provision through civil society organizations, which can expand the coverage and range of services. CBR programmes have been effective in delivering services to very poor and underserved areas. Ensure maximum consumer choice and control This is more likely to be achieved by formal services when: Services are individualized and flexible rather than "one size fits all" agency-based and controlled services. Consumers are involved in decisions on the type of support and direct the care tasks wherever possible rather than being a passive recipient of care. Providers are accountable to consumers and their relationship is regulated through a formal service arrangement.

"Supported decision-making" is available for people who have difficulties making choices independently – for example, people with severe intellectual impairment or mental health conditions. Support families as assistance and support providers Separate the needs and rights of informal caregivers from the needs and rights of persons with disabilities. A balance must be found so that each person has independence, dignity, and quality of life. Promote collaboration between families and family organizations, governmental and nongovernmental organizations, including disabled peoples' organizations, to provide support for families through a range of systems and services including by: Arranging for respite care, which can provide a short break from care and psychosocial counselling to improve family well-being. Providing direct or indirect financial support. Providing information about the services available for caregivers and people with disabilities. Organizing opportunities for families, who share similar experiences in supporting relatives with disabilities, to come together and offer mutual information and support. Community-based rehabilitation workers, social workers, or community workers can provide these opportunities for families. Useful family-oriented approaches also include developing communities of care and social networks. Step up training and capacity building Effective assistance and support services require training of both care recipients and care providers, irrespective of whether the care is provided formally or informally. Formal support workers, regardless of setting and service, should be provided with relevant professional training, which takes into account the principles of the CRPD and preferably involves people with disabilities as trainers to sensitize and familiarize service providers with their future clients. Provide training to families on working with caregivers, defining roles, setting boundaries, and on how to empower their relative with disability. In low-income settings, community-based rehabilitation programmes can provide training to people with disabilities and their families to manage their support needs and create links with self-help groups for information and advice. Persons with disabilities directly employing support workers using allocated public funds may need training and assistance in recruitment, management and fulfilling their employer responsibilities. Training schemes for sign-language interpreters and advocacy workers will help improve supply of these vital personnel. Assistance and Support Improve the quality of services To ensure that formal assistance and support services are of good quality, the following are recommended: Develop sound and fair disability assessment criteria and procedures, focusing on support needs to maintain and improve functioning. Use a guiding framework in developing disability assessment criteria. Develop clear eligibility criteria for assistance and support services and transparent decision-making processes. In resourceconstrained environments, focus on people with disabilities most in need of support services – those without any informal caregiver and limited means. Set standards of services, enforce them, and monitor compliance. Monitor service provision. Keep updated records of users, providers, and services provided. Ensure coordination across different government agencies and service providers, possibly through introducing case management, referral systems, and electronic record-keeping. Establish complaints mechanisms. Introduce mechanisms to detect and prevent physical and sexual abuse in both residential and community settings. Ensure that support staff have appropriate training, proper levels of pay, status, and working conditions.

Encourage the monitoring of service quality by disabled peoples' organizations and other NGOs. Ramps in all polling stations. Braille numbers by ballot buttons on Electronic Voting Machines. Separate queues for disabled people at polling stations. Electoral staff trained to understand and respect the needs of people with disabilities. As a result of the campaigning and awareness-raising, the leading parties explicitly mentioned disability issues in their 2009 manifestos. Increased political participation of people with disabilities may result in progress towards more disabilityinclusive public policy. While progress has been achieved in making elections accessible, it is rare for people with disabilities to be elected to public positions. However, in countries including the United States, the United Kingdom, Germany, Ecuador, and Peru, persons with disabilities have held the highest office. In Uganda Section 59 of the Constitution of 1995 states that "Parliament shall make laws to provide for the facilitation of citizens with disabilities to register and vote," while Section 78 provides for representation of people with disabilities in Parliament. People with disabilities are elected through an electoral college system at all levels from village up to Parliament, giving influence which has resulted in disability-friendly legislation. Uganda has among the highest numbers of elected representatives with disabilities in the world. Further information: http://www.electionaccess.org; http://www.ifes.org/disabilities.html; http://www.everyvotecounts.org.uk. 172 World report on disability speech impairment, are at a significant social disadvantage, in both developing and developed countries.

This disadvantage is particularly experienced in sectors where effective communication is critical – such as those of health care, education, local government, and justice. People who are hard of hearing may need speech-reading, assistive listening devices, and good environmental acoustics in indoor settings. Deaf and deafblind people use sign languages. They need bilingual education in sign language and the national language, as well as sign language interpreters, including tactile or hands-on interpreters. According to World Health Organization (WHO) estimates, in 2005, around 278 million people worldwide have moderate to profound hearing loss in both ears. People who are blind or have low vision require instruction in Braille, equipment to produce Braille materials, and access to library services that provide Braille, audio and large-print materials, screen readers, and magnification equipment. About 314 million people around the world have impaired vision, due either to eye diseases or uncorrected refractive errors. Of this number, 45 million people are blind. People with intellectual impairments need information presented in clear and simple language. People who have severe mental health conditions need to encounter healthworkers who have the communication skills and confidence to communicate effectively with them . Non-speaking individuals need access to "augmentative and alternative communication" systems and acceptance of these forms of communication where they live, go to school and work. These include communication displays, sign language and speech-generating devices. various factors, including: lack of financial resources; a lack of planning and design capacity; limited research and information; a lack of cooperation between institutions; a lack of enforcement mechanisms; a lack of user participation; geographic and climatic constraints; a lack of a disability-awareness component in the training curricula of planners, architects and construction engineers.

The basic features of access in new construction should include: provision of curb cuts (ramps) safe crossings across the street accessible entries an accessible path of travel to all spaces access to public amenities, such as toilets. A compilation of data on 36 countries and areas in Asia and the Pacific showed that 72% have accessibility standards for either the built environment or public transport or both. An assessment of the content of standards and coverage is required to understand the scope and application of these norms. Systematic comparison is difficult, but several practices can lead to better enforcement: Laws with mandatory access standards are the most effective way to achieve accessibility. The first accessibility standard in the world – a voluntary one in the Unites States – demonstrated a very low level of adoption (44). Similar results are reported in other countries. Standards and compliance should be regulated and mandated by law. Good design reviews and inspections ensure that accessibility will be provided from the day a building is completed. Accessibility standards thus need to be part of building regulations. The delays caused by the denial of permits for construction or occupancy should provide an incentive for builders and developers to meet the rules. If there are no design reviews or inspections, the law can require effective penalties for non-compliance, as well as a mechanism for identifying non-compliance and correcting the offence. Government funding agencies – including those that fund health care facilities, transportation, and schools – can also review plans as part of their approval process, using consistent standards. undermine the goals of the law. In Norway, after a monitoring exercise found that few local communities had carried out any accessibility planning, the government set up pilot projects around the country, to make local communities better able to provide accessibility for people with disabilities. In Winnipeg, Canada, a local action group worked with the municipal administration in an assessment of barriers, with recommendations for their removal . In Kampala, Uganda, following the development of accessibility standards in association with the government, a National Accessibility Audit Team was created by Uganda National Association on Physical Disability. constructed, an "access audit" examines its usability by disabled people. The purpose of this audit is: to increase awareness among planners and architects about barrier-free environments for people with disabilities; to ensure, in both new buildings and retrofitting, the use of universal design concepts and adherence to the standard codes relating to people with disabilities; to evaluate the degree of access to existing public buildings and recommend improvements. University schools of architecture can be a focus of education and research efforts for both students and practicing professionals. The International Islamic University in Malaysia recently introduced "barrier-free architecture" as an elective subject in its Bachelor of Architecture programme. In addition, the new Kaed Universal Design Unit at the university's Kulliyyah School of Architecture and Urban Design seeks to: create awareness of design issues for children, disabled people and older people; conduct research and develop new technologies; disseminate information; educate the design profession and the public on design regulations.Enabling Environments Education and campaigning Education, along with technical assistance on enforcement procedures, is essential to improve awareness of the need for accessibility and understanding of universal design.

Our stratergy will support

Supporting Educational programmes should be targeted to all those involved in enforcing accessibility laws and standards – including people with disabilities, design educators and professionals, government regulators, business owners and managers, and building developers and contractors for advocacy by: setting up an informal "access resource group", bringing together architects, builders, designers, engineers, people with disabilities, and development and rehabilitation professionals; We shall support observation of month of disability globally through government ministries and institutions for nations to engage in a constructive dialogue to respond to the issues that continue to confront people with disabilities to further affirm government's commitment to provide a better life for all, including people with disabilities, who are among the most disadvantaged people of our country and still excluded from all aspect of societal life such as health, education, employment opportunities etc. The observance of the Day aims to promote an understanding of disability issues and mobilize support for the dignity, rights and well-being of persons with disabilities. Correctly so, this dialogue takes place under theme "Break barriers, open doors to realise an inclusive society for all". This theme calls upon us to act in order to protect the rights and dignity of people with disabilities. We must thus act with vigour to improve their quality of life. We must act to break down the barriers that prevent them from achieving their full potential. During this Disability Month we shall advocate ought to act in a manner that shows our true commitment to every initiative that is aimed at supporting people living with disabilities. We shall recognize talents and abilities such us Paralympics and other honor events . People living with disabilities continues to inspire us to appreciate life, regardless of its challenges. In most instances they do remarkable things which many able-bodied people cannot do. In spite of the limitation of the necessary resources to make things simple for them, they still strive to succeed, at times without the assistance of other people. We should always understand that no person ever chose to live with disability and it will be wrong to judge any person because of his or her disability.

We must not only care about people with disabilities we should forever know that caring for those who need our utmost assistance cannot be replaced or postponed. We must be available to help people with disability without expecting any reward. Those who volunteer their services in various centers are true heroes who deserve words of appreciation and admiration. We are indebted to such people for they go an extra step in supporting people living with disability. On behalf of Helpers Of Africa Internationall appluade you donors for helping us to help many with disability. The Helpers Of Africa Internationalwe are privileged to lead and care for is a caring bank, eternally dedicated to the betterment of all citizens, we recognized the challenge faced by disabled persons and made the commitment to elevate their concerns into the top priority of the bank and global agenda of reconstruction and development. One of the first actions of the Helpers Of Africa Internationalis to place the issues, concerns and affairs of disabled persons in the Office of the President of the Bank. We are also blessed because we have a department that is responsible for all people with disabilities in to demonstrate our commitment and seriousness to respond to the plight of people with disabilities. As a bank, our caring attitude to disabled persons is underpinned by our commitment to society and our Helpers Of Africa Internationalpolicy and structure that values human dignity, equality and the development to full capacity of all citizens, including disabled persons. We believe that disabled persons must also enjoy the prosperity, a better life and all the opportunities that our freedom and blessings that God has released. Evidence and experience shows that when barriers to their inclusion are removed and persons with disabilities are empowered to participate fully in societal life, their entire community benefits. Barriers faced by persons with disabilities are, therefore, a detriment to society as a whole, and accessibility is necessary to achieve progress and development for all. We pledge strong support to government's overarching message of Support and solidarity with the disabled persons all over the world on this launch of Disability department as we launch our bank. Our solidarity we pledge must be expressed in actions I have shared and raising awareness through practical action to educate our people about norms and standards that guide processes that are aimed at improving the quality of life of persons with disabilities. And through such standards we should be in a good position to ensure the participation of persons with disabilities in various sectors of the society globally. Working hand governments and like minded institutions is paying attention to transforming lifes to improve access for disabled persons. We shall advocate through gorvernments need to ensure, among other things, that buildings have proper signage, that lifts have proper sensors and speakers and that we have buildings that are generally sensitive to the needs of the disabled persons. We shall advocate and support to ensure the active involvement and participation of people with disabilities in the mainstream of the global economy & equal access to work opportunities in the public service and the private sector. This, and others, is a challenge that we address daily through various works that are underway. We are talking here of transforming the whole society and even the environment, to ensure that it successfully addresses the challenges of service delivery to the disabled communities.In doing so, I wish to reaffirm our commitment as a global bank to building a society that cares and values our disabled persons.

We believe disabled persons are special people. I take this opportunity to encourage all of us here today to continue to support and donate more and raise more partners doing the best we can to contribute in the effort of creating a better life for people with disabilities, especially those in the rural areas of our countries through our solid strategic plan. Our environments are created by us and we can change them. We applaud and salute work done by United Nations General Assembly of the International Convention on the Rights of People with Disabilities, world bank, international development partners and NGO along with institutions that care for those with disabilities we are not coming in a vacuum but with fore funners who have done a lot and we are just coming to add value and resources fueling a fire that is already burning. Over 100 have signed, and 8 have ratified, sets out fundamental rights and freedoms for people with disabilities around the world, in all areas of life. This is a goodwill and platform for our vision , projects and programs to prosper and receive easy support and collaboration to advance the rights of people with disabilities the value of an international instrument such as this to people with disabilities around the world cannot be under-estimated. The provisions of the Convention and global achievements is a strong place for us to take off. But of particular relevance because the focus of this year's international day is decent employment for people with disabilities, of the Convention which deals with work and employment. The article recognises the right to work, in a labour market that is open, inclusive and accessible. It requires States to promote the realisation of that right through-

Our stratergy will support national and global innitiatives that support cause of disability in discrimination matters and stigma reduction, Protection of just and favourable conditions of work; Exercise of trade union rights; Availability of vocational training; Promotion of employment opportunities and continued advancement; Promotion of self-employment; Provision of employment in the public sector; Promotion of private sector employment through affirmative action, incentives and other measures; Ensuring the provision of reasonable accommodation or adjustment; Promotion of work experience in open employment; and Promotion of rehabilitation and return-to-work programmes. We shall through Governments and corporate initiatives, doing most of these things. But clearly, given the major disparity in employment rates between people with disabilities and the general community. By the grace of God in whose mandate we shall operate we hope to do our best. We shall empower thousands of architects, designers, builders and certifiers, about how to make sure buildings are accessible at a level consistent with responsibilities under the Disability Discrimination Act (DDA). Human Rights Commission has issued advisory notes and guidelines on good practice, the DDA does not include technical specifications that can be referred to for compliance. For new buildings are being built, and existing buildings renovated access to disability is key advocacy that we want to entrench. Many of the developing countries don’t have buses with disability standards and Helpers Of Africa Internationalwill begin to buy such and entrust them to reputable companies to run with free rides to people living with disability.

We shall also support redesigning and upgrades of cities to and towns to The Standards require that people with mobility disabilities must be able to Get to, and away from, the bus stop -- while the Standards do not extend beyond the bus stop, they do require a seamless transition from the bus stop to the surrounding footpath where one exists, Have sufficient circulation space to get onto and off an accessible bus, Safely use a boarding device deployed by an accessible bus; and Get to and from any infrastructure associated with the bus stop, and used by passengers in conjunction with travelling on a public transport service, such as a bus shelter. We shall partner with like minded organizations , International development agencies and donors to create public awareness project, Getting everybody on the bus, which will encourage schools, universities, and other sectors of the community, to start auditing their local bus stops, and drawing non-compliance to the attention of the local council responsible. When bus stops project is successful, the campaign will be extended to a broader range of community facilities. People with disabilities are members of the broader community, and this campaign will encourage the broader community to ensure that facilities are available to everyone, including people with disabilities. Over the coming years we shall advocate for school and university students completing access audits as part of their curriculum work, and submitting the results to the providers of those facilities. Owners of offices, shops, playground equipment and transport systems would then have to explain why their facilities are only available to people who do not have disabilities. The responsibility for achieving an accessible community does not just rest with people with disabilities- it rests with all of us.

We as Helpers Of Africa Internationalwill use our voice and resources to play a part in the inclusion process:By including people with disabilities, as we do other members of our community, as part of our lives, at school, work or in community and sporting activities; By working with disability advocacy organisations to achieve positive change; orBy supporting the many areas in which all levels of Government and private enterprise are facilitating change. We express my deepest gratitude for all you do to advance the rights of persons with disabilities across our agenda and around the world through your generosity and networks. Your giving will be vital in our hands – not just for persons with disabilities, but, indeed, for all people in the world through all spheres of life in education, health, shelter, environment, socio-economic life etc. Disability inclusion is a fundamental human right. When we fight to secure those rights, we move our world closer to upholding the core values and principles of global humanitarian Charter. Disability inclusion is central to the promise of the 2030 Global Agenda on Sustainable Development. When we remove policies or biases or obstacles to opportunity for persons with disabilities, the whole world benefits we shall support and work on this. Indeed, the International Labour Organization found that excluding people with disabilities from the world of work can rob countries of as much as 7 per cent of their Gross Domestic Product. Realizing the rights of persons with disabilities is a matter of justice as well as a common-sense investment in our common future. Our strategic plan will go a long way to go in changing mindsets, laws and policies to ensure the rights, opportunity and dignity for persons with disabilities around the world. So we are here, together, to take action to make the goals and the objectives of welfare of the world a reality on the ground including orphans and those who live with disability. We shall promote stronger collaboration among donors and partners, the Global system, civil society organizations -- in particular, organizations of persons with disabilities / charity / empowerment and development partners – as well as the private sector and institutions through your networks our donors and partners. And we are here as friends of the world and humanity "to transform society, community and development the world to be inclusive, accessible and sustainable for all". The global progress has highlights core challenges: disproportionate levels of poverty, lack of access to education, health services, employment and the under-representation of persons with disabilities in decision-making and political participation. That is what we seek to we must do much more to address discrimination and exclusion -- particularly against girls and women with disabilities. We must do much more to ensure full accessibility to schools, health care and services, the workplace, leisure and recreational activities, sports, and all areas of life.

We must also do much more on transportation, infrastructure and information and communications technology to make our cities, rural areas, and societies inclusive. Our destination is clear: a world in which all persons – including those with disabilities – can enjoy equal opportunities, have a full say in decision-making processes and truly benefit from economic, social, political and cultural life. I urge all donors to be more ambitious in implementing financial commitments to ensure the realization of Helpers Of Africa Internationalprograms and plans including the rights of all persons with disabilities. We have some examples of good practices – but the review shed light on gaps – big gaps – across all our work from headquarters Kenya to the country level. The rep understanding and systemic approaches to ensure we fulfil our responsibilities. It showed unevenness in our approach – in our use of existing tools and mechanisms – in not only our strategies, but even in awareness of core policies.

Our strategic plans in Helpers Of Africa Internationalin all spheres is not a strategy of words – it is a strategy of action – action to raise the standards of our performance in the global sphere among many players disability inclusion across the board – and action to bring about the unified and transformative change we need globally. We have accountability framework to monitor progress and to make sure we address the challenges and gaps – not only in headquarters but in the field through a strong monitoring and evaluation with real time, online reporting time. We have established clear benchmarks and a focus on critical areas including leadership, strategic planning, accessibility, participation, programming, procurement and a call for more persons with disabilities working with us and better supported by the organization.

I want the Helpers Of Africa Internationalto be an employer of choice for persons with disabilities. I want our humanitarian, development and peace operations to fully recognize and advance the rights of persons with disabilities. And I want the Helpers Of Africa Internationalto be fully accessible for one and all. We cannot be a platform for change when persons with disabilities cannot access that platform to speak globally and that is what we seek to do. And I count especially on persons with disabilities and on other project to ensure that the entire Helpers Of Africa Internationalfamily makes good on the promise of this strategy across all departments and divisions. We are a family as Donors and as workers implementers. Together, with persons with disabilities as agents of change, we can build an inclusive, accessible and sustainable world and together, we can create the conditions to realize the dream of a better world

Disabilty should not prevent people from having a prominent career. We shall work hard to make those who live with disability to benefit from the good world that God has in this world access to class medical care. We shall create a support system that make it possible to live and work in comfort and dignity. Avail good health, shelter, jobs, business opportunities, talent and career development. We shall support those with disabilities with technology in communication, mobility and function to live a worthwhile life. It is very clear that the majority of people with disabilities in the world have an extremely difficult time with everyday survival, let alone productive employment and personal fulfilment. Our strategic plan makes a major contribution to our understanding of disability and its impact on individuals and society. It highlights the different barriers that people with disabilities face – attitudinal, physical, and financial. Addressing these barriers is within our reach. We have a moral and godly duty to remove the barriers to participation, and to invest sufficient funding and expertise to unlock the vast potential of people with disabilities. Governments throughout the world can no longer overlook the hundreds of millions of people with disabilities who are denied access to health, rehabilitation, support, education and employment, and never get the chance to shine.

Our Strategic plan makes recommendations for action at the local, national and international levels. It will thus be an invaluable tool for policy-makers, researchers, practitioners, advocates and volunteers involved in disability. It is my hope that our coming in global affairs will be value addation. In the years ahead, disability will be an even greater concern because its prevalence is on the rise. This is due to ageing populations and the higher risk of disability in older people as well as the global increase in chronic health conditions such as diabetes, cardiovascular disease, cancer and mental health disorders. Across the world, people with disabilities have poorer health outcomes, lower education achievements, less economic participation and higher rates of poverty than people without disabilities. This is partly because people with disabilities experience barriers in accessing services that many of us have long taken for granted, including health, education, employment, and transport as well as information. These difficulties are exacerbated in less advantaged communities. To achieve the long-lasting, vastly better development prospects that lie at the heart of global Development Goals and beyond, we must empower people living with disabilities and remove the barriers which prevent them participating in their communities; getting a quality education, finding decent work, and having their voices heard.

As a result, Helpers Of Africa InternationalGroup will join world players and stakeholders to provide the evidence for innovative policies and programmes that can improve the lives of people with disabilities, and facilitate implementation as a global response to humanitarian response. Our plans and actions in all sectors of global affairs education, health, environment, shelter, food, groups empowerment, cities & urban development, mining, infrastructure and other will reinforced a global impact and understanding of development as we join other players. The our global strategic plans suggests steps for all stakeholders – including governments, civil society organizations and disabled people's organizations – to create enabling environments, develop rehabilitation and support services, ensure adequate social protection, create inclusive policies and programmes, and enforce new and existing standards and legislation, to the benefit of people with disabilities and the wider community. People with disabilities should be central to these endeavors. Our driving vision is of an inclusive world in which we are all able to live a life of health, comfort, and dignity.

Our historical commitment funds reaffirms that people like you who have been blessed by God can step in to make the lives of others better in being a blessing and to orphans and those with disabilities are entitled to exactly the same rights as everyone else, and that societies must be organized so that all people, including those with disabilities, can exercise their rights freely. We shall engage Countries to accept and adobt our development policies, investments and legal systems, to leave no one behind as moses of the bible told pharoh we are going all of us not leaving the weak and elders or youthful to serve God in the promised land. Societies will never succeed without the full participation of everyone, including people with disabilities. We cannot afford to ignore or marginalize the contributions of 1.5 billion people. Upholding the rights of people with disabilities is a moral imperative. But it is not an act of charity. It is a recognition of rights and a practical necessity, if we are to build healthy, sustainable societies to the benefit of everyone – those with disabilities, and those without.

I strongly believe that despite many international agreements and initiatives, we must all support civil society, the private sector, and all stakeholders – do much more to ensure that people with disabilities have full access to opportunities and can participate fully in society. This is why advancing the rights of persons with disabilities and orphans is firmly situated at the heart of our global blueprint for peaceful, prosperous societies on a healthy planet. From the workplace to public transport systems, from concert halls to cyberspace and daily social interactions, people with disabilities face overt discrimination, stereotyping, and lack of respect for their basic human rights. There is also a strong gender dimension to disability. Women and girls are disproportionately affected, particularly in the poorest countries in the world.

Every minute, more than 30 women are seriously injured or disabled during childbirth. Women and girls with disabilities face multiple barriers to accessing education, health services and jobs. Without women's empowerment and gender equality, millions of women will continue to suffer from double discrimination based on both their gender and their disability. We must all find new approaches and tools to work for and with people with disabilities. These should include mainstreaming disability in national legislation and development strategies; and engaging and empowering people with disabilities, and the organizations that represent them. It must also include raising awareness. Discrimination against people with disabilities has been going on for centuries. It will take major efforts to challenge stereotypes and to change mindsets.

The powerful advocacy of the disability rights movement and the inspiring achievements of women and men with disabilities in all walks of life, from the science lab to the sports field, are creating lasting change. It will also be crucial to support the work Governments and global institutions to develop their capacity on these issues. We need to strengthen the policy frameworks and laws on orhans and disability at the multilateral and global level together with others. If people with disabilities are to be part of our efforts to achieve global future fo all we must make institutions, mechanisms and processes coherent and coordinated. There is still a lot to go, and employment to mainstreaming disabilities across all our work, particularly development and humanitarian aid. It will inform a new Helpers Of Africa InternationalAction Plan and an accountability framework to help us aim higher and live up to our promises. Together, we can remove barriers and raise awareness, so that people with disabilities can play a full part in every sphere of society, around the world.

The world's poor are significantly more likely to have or incur a disability within their lifetime compared to more financially privileged populations. The rate of disability within impoverished nations is notably higher than that found in more developed countries. Since the early 2010s there has been growing research in support of an association between disability and poverty and of a cycle by which poverty and disability are mutually reinforcing. Physical, cognitive, mental, emotional, sensory, or developmental impairments independently or in tandem with one another may increase one's likelihood of becoming impoverished, while living in poverty may increase one's potential of having or acquiring special needs in some capacity.

A multitude of studies have been shown to demonstrate a significant rate of disability among individuals living in poverty. "People with disabilities in developing countries are over-represented among the poorest people. They have been largely overlooked in the development agenda so far, but the recent focus on poverty reduction strategies is a unique change to rethink and rewrite that agenda." The link between disability and development has been further stressed . Over 10,000 individuals with disabilities die each day as a result of extreme poverty, showing that the connection between these two constructs is especially problematic and deep-seated. This connection is also present in developed countries, with the Disability Funders Network reports show those with disabilities are twice as likely to live below the poverty line than those without special needs.
"Persons with disabilities on average as a group experience worse socioeconomic outcomes than persons without disabilities, such as less education, worse health outcomes, less employment, and higher poverty rates." Researchers have demonstrated that these reduced outcomes may be attributed to a myriad of institutional barriers and other factors. Furthermore, the prevalence of disabilities in impoverished populations has been predicted to follow a cyclical pattern by which those who live in poverty are more likely to acquire a disability and those who have a disability are more likely to become impoverished.

There is vicious circle we need to break, Experts from the United Kingdom Disabled Persons Council attribute the connection between disability and poverty to many systemic factors that promote a "vicious circle." Statistics affirm the mutually reinforcing nature of special needs and low socioeconomic status, showing that people with disabilities are significantly more likely to become impoverished and people who are impoverished are significantly more likely to become disabled. Barriers presented for those with disabilities can lead individuals to be deprived of access to essential resources, such as opportunities for education and employment, thus causing them to fall into poverty. Likewise, poverty places individuals at a much greater risk of acquiring a disability due to the general lack of health care, nutrition, sanitation, and safe working conditions that the poor are subject to.

Experts assert that this cycle is perpetuated mainly by the lack of agency afforded to those living in poverty. The few options available to the poor often necessitate that these individuals put themselves in harms way, consequently resulting in an increase in the acquisition of preventable impairments. Living in poverty is also shown to decrease an individual's access to preventive health services, which results in an increase in the acquisition of potentially preventable disabilities. In a study by credible organizations found that well over half of the instances of childhood blindness and hearing impairment in Africa and Asia were considered preventable or treatable. Another estimate released provides further evidence of this vicious circle, finding that 100 million people living in poverty suffer from impairments acquired due to malnutrition and lack of proper sanitation.

Discrimination Prejudice held against individuals with disabilities, otherwise termed ableism, is shown to be a significant detriment to the successful outcomes of persons in this population. According to one study following the lives of children with disabilities in the children in the sample described "discrimination from other metal children and adults in the community as their most significant daily problem. Additional forms of discrimination may lead disability to be more salient in already marginalized populations. Women and individuals belonging to certain ethnic groups who have disabilities have been found to more greatly suffer from discrimination and endure negative outcomes. Some researchers attribute this to what they believe is a “double rejection” of girls and women who are disabled on the basis of their sex in tandem with their special needs.[12]

The stereotypes that accompany both of these attributes lead females with disabilities to be seen as particularly dependent upon others and serve to amplify the misconception of this population as burdensome. The societal consequences of having a disability while belonging to an already marginalized population were highlighted, stating, “A disabled women suffers a multiple handicap. Her chances of marriage are very slight, and she is most likely to be condemned to a twilight existence as a non-productive adjunct to the household of her birth... it is small wonder that many disabled female babies do not survive. Additionally, women with disabilities are particularly susceptible to abuse. A 2004 UN survey in Orissa, India, found that every women with disabilities in their sample had experienced some form of physical abuse. This double discrimination is also shown to be prevalent in more industrialized nations. In Some developed countries 72 percent of women with disabilities live below the poverty line. The intensified discrimination individuals with disabilities may face due to their sex is especially important to consider when taking into account that, according to the Organisation for Economic Co-operation and Development, women report higher incidences of disability than men. Furthermore, the connection between disability and poverty holds particular significance for the world's women, with females accounting for roughly 70 percent of all individuals living in poverty.[15]Institutional discrimination also exists as there are policies existing in organizations that result in inequality between a disabled person and non-disabled person. Some of these organizations systematically ignore the needs of disabled people and some interfere in their lives as a means of social control.[16]

Access to Health care, Another reason individuals living with disabilities are often impoverished is the high medical costs associated with their needs. One study, conducted in villages in South India, demonstrated that the annual cost of treatment and equipment needed for individuals with disabilities in the area ranged from three days of income to upwards of two years' worth, with the average amount spent on essential services totaling three months worth of income. This figure does not take into account the unpaid work of caregivers who must provide assistance after these procedures and the opportunity costs leading to a loss of income during injury, surgery, and rehabilitation. Studies reported by medical anthropologists Benedicte Ingstad and Susan Reynolds Whyte have also shown that access to medical care is significantly impaired when one lacks mobility. They report that in addition to the direct medical costs associated with special needs, the burden of transportation falls most heavily on those with disabilities.

This is especially true for the rural poor whose distance from urban environments necessitates extensive movement in order to obtain health services. Due to these barriers, both economic and physical, it is estimated that only 2 percent of individuals with disabilities have access to adequate rehabilitation services. The inaccessibility of health care for those living in poverty has a substantial impact on the rate of disability within this population. Individuals living in poverty face higher health risks and are often unable to obtain proper treatment, leading them to be significantly more likely to acquire a disability within their lifetime. Financial barriers are not the only obstacles those living in poverty are confronted with. Research shows that matters of geographic inaccessibility, availability, and cultural limitations all provide substantial impediments to the acquisition of proper care for the populations of developing countries. Sex-specific ailments are particularly harmful for women living in poverty. The World Health Organization estimates that each year 20 million women acquire disabilities due to complications during pregnancy and childbirth that could be significantly mitigated with proper pre-natal, childbirth, and post-natal medical care.[21] Other barriers to care are present in the lack of treatments developed to target diseases of poverty. Experts assert that the diseases most commonly affecting those in poverty attract the least research funding. This discrepancy, known as the 10/90 gap, reveals that only 10 percent of global health research focuses on conditions that account for 90 percent of the global disease burden. Without a redistribution in research capital, it is likely that many of the diseases known to cause death and disability in impoverished populations will persist. Institutional barriers, Researchers assert that institutional barriers play a substantial role in the incidence of poverty in those with disabilities. Physical environment may be a large determinant in one's ability to access ladders of success or even basic sustenance. Professor of urban planning Rob Imrie concluded that most spaces contain surmountable physical barriers that unintentionally create an “apartheid by design,” whereby individuals with disabilities are excluded from areas because of the inaccessible layout of these spaces.

This "apartheid" has been seen by some, such as the United Kingdom Disabled Persons Council, as especially concerning with regard to public transportation, education and health facilities, and perhaps most relevantly places of employment.[9] Physical barriers are also commonly found in the home, with those in poverty more likely to occupy tighter spaces inaccessible to wheelchairs. Beyond physical accessibility, other potential excluding agents include a lack of Braille, sign language and shortage of audio tape availability for those who are blind and deaf.

Education- The roots of unemployment are speculated to begin with discrimination at an early age. UNESCO reports that 98 percent of children with disabilities in developing countries are denied access to formal education.[24] This statistic is even more jarring for women with disabilities, with the United Nations Development Program reporting that the global literacy rate for this population is a mere 1 percent.[13] This may be attributed to the fact that, according to the World Health Organization, boys with disabilities are significantly more likely to receive an education than similarly abled girls.[21] Beyond simply the skills obtained, experts such as former speculate that the societal value of education and the inability of schools to accommodate special needs children substantially contributes to the discrimination of these individuals. It is important to note that the deprivation of education to individuals with special needs may not be solely an issue of discrimination, but an issue of resources. Children with disabilities often require specialized educational resources and teaching practices largely unavailable in developing countries.[25]

On Employment- Some sociologists have found a number of barriers to employment for individuals with disabilities. These may be seen in employer discrimination, architectural barriers within the workplace, pervasive negative attitudes regarding skill, and the adverse reactions of customers. According to sociologist Edward Hall, "More disabled people are unemployed, in lower status occupations, on low earnings, or out of the labour market altogether, than non-disabled people." The International Labour Organization estimates that roughly 386 million of the world's working age population have some form of disability, however, up to eighty percent of these employable individuals with disabilities are unable to find work. Statistics show that individuals with disabilities in both industrialized and developing countries are generally unable to obtain formal work. In India, only 100,000 of the country's 70 million individuals with disabilities are employed. In the United States of a projected 48.9 million people with disabilities were employed, with two-thirds of those unemployed reporting that they were unable to find work. Similarly in Belgium, only 30 percent of persons with disabilities were able to find gainful employment. In the United Kingdom, 45 percent of adults with disabilities were found to live below the poverty line. Reliable data on the rate of unemployment for persons with disabilities has yet to be determined in most developing countries.

Sociologists Colin Barnes and Geof Mercer demonstrated that this exclusion of persons with disabilities from the paid labor market is a primary reason why the majority of this population experiences far greater levels of poverty and are more reliant on the financial support of others.[29] In addition to the economic gains associated with employment, researchers have shown that participation in the formal economic sector reduces discrimination of persons with disabilities. One anthropologist who chronicled the lives of persons with disabilities in Botswana noted that individuals who were able to find formal employment "will usually obtain a position in society equal to that of non-disabled citizens."[30] Because the formal workplace is such a social space, the exclusion of individuals with disabilities from this realm is seen by some sociologists to be a significant impediment to social inclusion and equality.Equity in employment has been strategized by some, such as sociologists Esther Wilder and William Walters, to depend on heightened awareness of current barriers, wider use of assistive technologies that can make workplaces and tasks more accessible, more accommodating job development, and most importantly deconstructing discrimination.Creating inclusive employment that better facilitates the participation of individuals with disabilities is demonstrated to have a significantly positive impact on not only the lives of these individuals, but also the economies of nations who implement such measures. The International Labour Organization estimates that the current exclusion of employable individuals with special needs is costing countries possible gains of 1 to 7 percent of their GDP.

Implications- The relationship between disability and poverty is seen by many to be especially problematic given that it places those with the greatest needs in a position where they have access to the fewest resources. Researchers from the United Nations and the Yale School of Public Health refer to the link between disability and poverty as a manifestation of a self-fulfilling prophecy where the assumption that this population is a drain of resources leads society to deny them access to avenues of success. Such exclusion of individuals on the basis of their special needs in turn denies them the opportunity to make meaningful contributions that disprove these stereotypes.Oxfam asserts that this negative cycle is largely due to a gross underestimation of the potential held by individuals with disabilities and a lack of awareness of the possibilities that each person may hold if the proper resources were present.

The early onset of preventable deaths has been demonstrated as a significant consequence of disability for those living in poverty. Researchers show that families who lack adequate economic agency are unable to care for children with special medical needs, resulting in preventable deaths.[9] In times of economic hardship studies show families may divert resources from children with disabilities because investing in their livelihood is often perceived as an investment caretakers cannot afford to make. Benedicte Ingstad, an anthropologist who studied families with a member with disabilities, asserted that what some may consider neglect of individuals with disabilities "was mainly a reflection of the general hardship that the household was living under." A study conducted by Oxfam found that the rejection of a child with disabilities was not uncommon in areas of extreme poverty. The report went on to show that neglect of children with disabilities was far from a deliberate choice, but rather a consequence of a lack of essential resources. The study also demonstrated that services necessary to the well being of these children "are seized upon" when they are made available. The organization thus concludes that if families had the capacity to care for children with special needs they would do so willingly, but often the inability to access crucial resources bars them from administering proper care.

Current initiatives. Initiatives on the local, national, and transnational levels addressing the connection between poverty and disability are exceedingly rare. According to the UN, only 45 countries throughout the world have anti-discrimination and other disability-specific laws. Additionally, experts point to the Western world as a demonstration that the association between poverty and disability is not naturally dissolved through the development process. Instead, a conscious effort toward inclusive development is seen by theorists, such as Disability Policy expert, as essential in the remediation process.[1]Disability rights advocates that it is crucial to better incorporate the voices of individuals with disabilities into the decision making process. Literature on disability rights made popular the slogan, "Nothing about us without us," evidencing the need to ensure those most affected by policy have an equitable hand in its creation. This need for agency is an issue particularly salient for those with special needs who are often negatively stereotyped as dependent upon others.

Furthermore, many who are part of the disability rights movement argue that there is too little emphasis on aid designed to eliminate the physical and social barriers those with disabilities face. The movement asserts that unless these obstacles are rectified, the connection between disability and poverty will persist. Employment is seen as a critical agent in reducing stigma and increasing capacity in the lives of individuals with disabilities.

The lack of opportunities currently available is shown to perpetuate the vicious cycle, causing individuals with disabilities to fall into poverty. To address these concerns many recent initiatives have begun to develop more inclusive employment structures.[31] Some good model stresses education and pairs individuals with intellectual disabilities with mentors until they have developed the skills necessary to perform their roles independently. The program then matches individuals with local employers. This gradualist model ensures that people who may have been deprived of the resources necessary to acquire essential skills are able to build their expertise and enter the workforce. This are good models that Helpers Of Africa Internationalseeks to support .Many global institutions have been at the forefront of initiating legislation that aims to deter the current toll disabilities take on individuals in society, especially those in poverty. "Particular efforts should be made to integrate the disabled in the development process and that effective measures for prevention, rehabilitation and equalization of opportunities are therefore essential." The global Standard Rules encourages states to remove social, cultural, economic, educational, and political barriers that bar individuals with disabilities from participating equally in society. Proponents claim that these movements on behalf of the UN helped facilitate more inclusive development policy and brought disability rights to the forefront.

QUOTES

"Unfruitfulness in Disability is a matter of perception. All have strength of one thing we can do well, you're needed by someone." -Martina Navratilova

"Start by doing what's necessary; then do what's possible; and suddenly you are doing the impossible." -Francis of Assisi

"For me, disability is a way of getting some extremity, some kind of very difficult situation, that throws an interesting light on people." -Mark Haddon

"A hero is an ordinary individual who finds the strength to persevere and endure in spite of overwhelming obstacles of disability." –Christopher Reeve

"It's the repetition of affirmations that leads to belief. And once that belief becomes a deep conviction, things begin to happen." –Muhammad Ali

"I'm officially disabled, but I'm truly enabled because of my lack of limbs. My unique challenges have opened up unique opportunities to reach so many in need." –Nick Vujicic

"I can't change the direction of the wind, but I can adjust my sails to always reach my destination." –Jimmy Dean (We shall help many to position there sails)

"Today I choose life. Every morning when I wake up I can choose joy, happiness, negativity, pain… To feel the freedom that comes from being able to continue to make mistakes and choices – today I choose to feel life, not to deny my humanity but embrace it." –Kevyn Aucoin (We shall help many phyisically challenged to get Joy, Happiness, relieve pain)

"Believe you can and you're halfway there." –Theodore Roosevelt (We shall help many to believe)

"Keep your face always toward the sunshine – and shadows will fall behind you." –Walt Whitman

"I was slightly brain damaged at birth, and I want people like me to see that they shouldn't let a disability get in the way. I want to raise awareness – I want to turn my disability into ability." —Susan Boyle (We shall turn many disabilities to ability)

"….What I learned was that these athletes were not disabled, they were super–abled. The Olympics is where heroes are made. The Paralympics is where heroes come." — Joey Reiman (We shall support Paralympics through our sports agency)

"Life is all about balance. Since I have only one leg, I understand that well."— Sandy Fussell, Shaolin Tiger

"Hard things are put in our way, not to stop us, but to call out our courage and strength." — Unknown

"Abled does not mean enabled. Disabled does not mean less abled." — Khang Kijarro Nguyen

"The measure of a man, or woman, is not so much what they have accomplished, though that has weight. It often is much more though what that man or woman has overcome to accomplish what they have." — Leif Gregersen, Through The Withering Storm

"I do not have a disability, I have a gift! Others may see it as a disability, but I see it as a challenge. This challenge is a gift because I have to become stronger to get around it, and smarter to figure out how to use it; others should be so lucky." — Shane E. Bryan

"Some would look at Emily's life and think that a child born with Down's syndrome has little hope for a meaningful life. Throw in the diagnosis of leukemia and that little hope turns into no hope whatsoever. I disagree. Emily's life, with all its imperfections, had great meaning. Because of how many people she touched, I realize that we are far more than what we can accomplish. We are the very thumbprints of God." — Matt Patterson

"Whether someone is useful only matters if you value people by their use." — Corinne Duyvis, On the Edge of Gone

"When you focus on someone's disability you'll overlook their abilities, beauty and uniqueness. Once you learn to accept and love them for who they are, you subconsciously learn to love yourself unconditionally." — Yvonne Pierre, The Day My Soul Cried: A Memoir

"Aerodynamically the bumblebee shouldn't be able to fly, but the bumblebee doesn't know that so it goes on flying anyway." – Mary Kay Ash

"Disability is natural. We must stop believing that disabilities keep a person from doing something. Because that's not true . . . Having a disability doesn't stop me from doing anything." — Benjamin Snow, Grade 8, in his essay "Attitudes About People with Disabilities"

"Just because a man lacks the use of his eyes doesn't mean he lacks vision." – Stevie Wonder

"So many of our dreams at first seem impossible, then they seem improbable, and then, when we summon the will, they soon become inevitable." – Christopher Reeve

"It was probably no accident that it was the cripple Hephaestus who made ingenious machines; a normal man didn't have to hoist or jack himself over hindrances by means of cranks, chains and metal parts. Then it was in the line of human advance that Einhorn could do so much." — Saul Bellow, The Adventures of Augie March

1. “My advice to other disabled people would be, concentrate on things your disability doesn’t prevent you doing well, and don’t regret the things it interferes with. Don’t be disabled in spirit as well as physically.” – Stephen Hawking
2. “Disability is a matter of perception. If you can do just one thing well, you’re needed by someone.” – Martina Navratilova
3. “When you hear the word ‘disabled,’ people immediately think about people who can’t walk or talk or do everything that people take for granted. Now, I take nothing for granted. But I find the real disability is people who can’t find joy in life and are bitter.” – Teri Garr
4. “Start by doing what’s necessary; then do what’s possible; and suddenly you are doing the impossible.” – Francis of Assisi
5. “For me, disability is a way of getting some extremity, some kind of very difficult situation, that throws an interesting light on people.” – Mark Haddon
6. “A hero is an ordinary individual who finds the strength to persevere and endure in spite of overwhelming obstacles.” – Christopher Reeves

14. “What I learned was that these athletes were not disabled, they were superable. The Olympics is where heroes are made. The Paralympics is where heroes come.” – Joey Reiman
15. “Know me for my abilities, not my disability.” – Robert M. Hensel
16. “Healing severe or chronic pain, I believe, includes transforming our relationship to the pain, and, ultimately, it is about transforming our relationship to who we are and to life.”
    — Sarah Anne Shockley
17. “People didn’t always see a person with a disability who had to use a ramp or elevator as people who have been given unnecessary privileges. But I run into that often now. People are saying, ‘Why do we have to go to great expense for these people?’” – Major Owens
18. “Hard things are put in our way, not to stop us, but to call out our courage and strength.”
19. ‘The only disability in life is a bad attitude.’ – Scott Hamilton
20. “I have had this desire my whole life to prove people wrong, to show them I could do things they didn’t think I could do.” – David A. Paterson
21. “Continuous effort — not strength or intelligence — is the key to unlocking your potential.” – Winston Churchill
22. “The difference between those who fail and those who succeed is largely perseverance. Never quit.” – Charles Schwab
23. “Great ideas originate in the muscles.” – Thomas Edison
24. “The message I’ll share…is that inclusion is extremely important for kids with and without disabilities.” – Clay Aiken
25. “When everyone else says you can’t, determination says,”YES YOU CAN.” – Robert M. Hensel
26. ‘Concentrate on things your disability doesn’t prevent you doing well, and don’t regret the things it interferes with. Don’t be disabled in spirit as well as physically.’ – Stephen Hawking
27. ‘No disability or dictionary out there is capable of clearly defining who we are as a person.’ – Robert M Hensel
28. “Genius is one percent inspiration and ninety-nine percent perspiration.” – Thomas Edison
29. “Our greatest weakness lies in giving up. The most certain way to succeed is always to try just one more time.” – Thomas Edison
30. “My disability has opened my eyes to see my true abilities.” – Robert M. Hensel
31. “I have suffered from bullying in many ways, from bullying in school due to my disability in reading to digital abuse that I deal with on a daily basis. I’d like to tell the kids that are being bullied that no one should have to deal with the abuse, ever!” – Bella Thorne

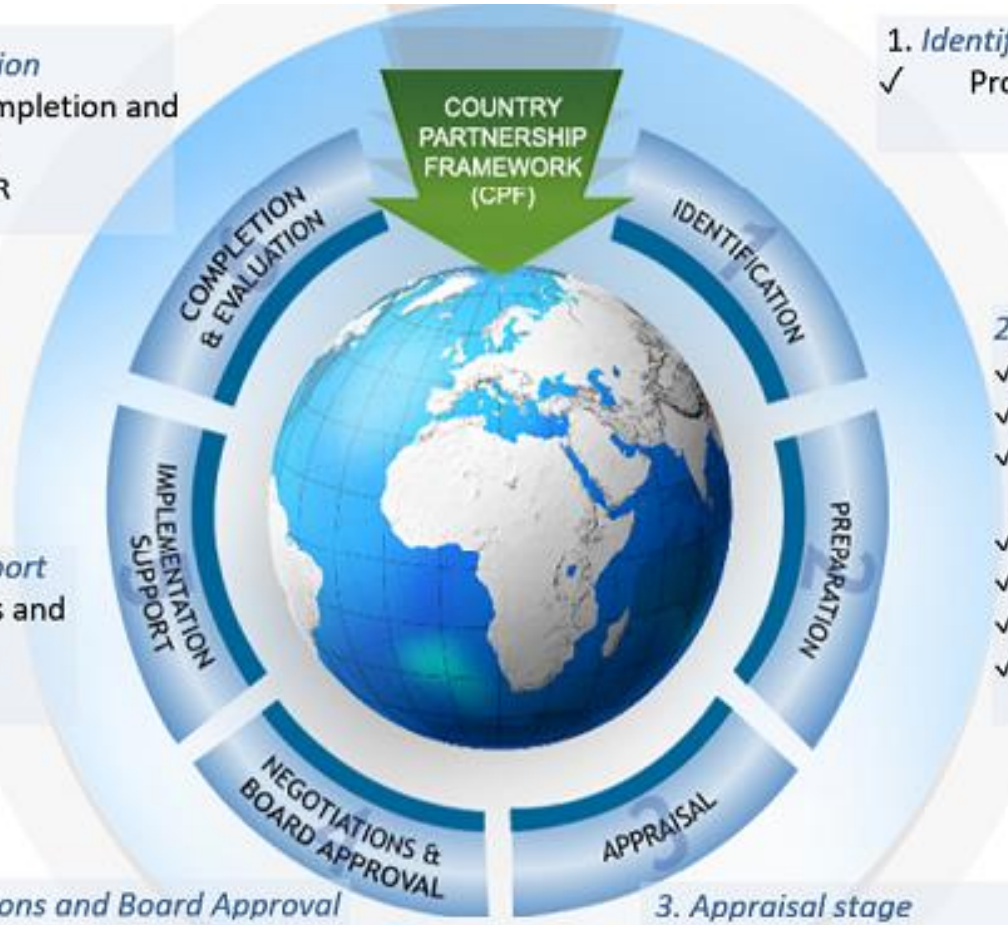
32. “There are a plan and a purpose, a value to every life, no matter what its location, age, gender or disability.” – Sharron Angle
33. “The moral test of government is how it treats those who are in the dawn of life… the children; those who are in the twilight of life.. the elderly; and those who are in the shadow of life the sick, the needy and the disabled.” – Hubert Humphrey
34. “I was diagnosed with a severe temporal-spatial deficit, a learning disability that means I have zero spatial relations skills. It was official: I was a genius trapped in an idiot’s body.” – Sloane Crosley
35. Let’s stop “tolerating” or “accepting” difference as if we’re so much better for not being different in the first place. Instead, let’s celebrate difference because in this world it takes a lot of guts to be different.’ – Kate Bornstein
36. “People presume my disability has to do with being an amputee, but that’s not the case; our insecurities are our disabilities, and I struggle with those as does everyone.” – Aimee Mullins
37. “Let’s face it, in America today we don’t have a health care system, we have a sick care system. We wait until people become obese, develop chronic diseases, or become disabled – and then we spend untold hundreds of billions annually to try to make them better.” – Tom Harkin
38. “I seem to be thinking rationally again in the style that is characteristic of scientists. However, this is not entirely a matter of joy as if someone returned from physical disability to good physical health.” – John Forbes Nash
39. “I was, on the whole, considerably discouraged by my school days. It was not pleasant to feel oneself so completely outclassed and left behind at the beginning of the race.” – Winston Churchill
40. “These days the technology can solve our problems and then some. Solutions may not only erase physical or mental deficits but leave patients better off than ‘able-bodied’ folks. The person who has a disability today may have a superability tomorrow.” – Daniel H. Wilson
41. “One of the most ignored disabilities on earth is allowing one’s thoughts to discourage one from taking advantage of one’s abilities in life.” – Edmond Mbiaka
42. “The white, the Hispanic, the black, the Arab, the Jew, the woman, the Native American, the small farmer, the businessperson, the environmentalist, the peace activist, the young, the old, the lesbian, the gay and the disabled make up the American quilt.” – Jesse Jackson
43. “I think that everyone has somethizzng about themselves that they feel is their weakness… their ‘disability.’ And I’m certain we all have one, because I think of a disability as being anything which undermines our belief and confidence in our own abilities.” – Aimee Mullins
44. “Once we accept our limits, we go beyond them.” – Albert Einstein
45. “I have a Disability yes that’s true, but all that really means is I may have to take a slightly different path than you.” – Robert M. Hensel
46. “Kindness is the language which the deaf can hear and the blind can see.” – Mark Twain
47. “The greatest feeling of accomplishment for me is the fact that I was an athlete who was somewhat disabled.” – Bill Toomey
48. “Disability doesn’t make you exceptional, but questioning what you think you know about it does.” – Stella Young
49. “If we are to achieve a richer culture, we must weave one in which each diverse human gift will find a fitting place.” – Margaret Meade
50. “It’s not that I’m so smart, it’s just that I stay with problems longer.” – Albert Einstein
51. 51.“I choose not to place “DIS”, in my ability.” – Robert M. Hensel
52. “Attitude is a little thing that makes a big difference.” – Winston Churchill
53. “We are the trade union for pensioners and children, the trade union for the disabled and the sick… the trade union for the nation as a whole.” – Edward Heath
54. ‘When you have a disability, knowing that you are not defined by it is the sweetest feeling.’ – Anne Wafula Strike
55. “Employers have recognized for some time that it’s smart business to have a diverse workforce – one in which many views are represented and everyone’s talents are valued. Well, disability is part of diversity.” – Thomas Perez
56. “You can take them in a wheelchair and put them in a pool, so they can move their arms and legs. In a pool disabled people can do things that they can’t normally do otherwise.” – Jack LaLanne
57. “We know that equality of individual ability has never existed and never will, but we do insist that equality of opportunity still must be sought.” – Franklin D. Roosevelt
58. “Aerodynamically the bumblebee shouldn’t be able to fly, but the bumblebee doesn’t know that so it goes on flying anyway.” – Mary Kay Ash
59. “I don’t have a dis-ability, I have a different-ability.” – Robert M. Hensel

60. “Being disabled should not mean being disqualified from having access to every aspect of life.” – Emma Thompson
61. “It is a lonely existence to be a child with a disability which no-one can see or understand, you exasperate your teachers, you disappoint your parents, and worst of all you know that you are not just stupid.” – Susan Hampshire
62. “And for a very special group of people, we’ve provided their only job. I’m speaking of course of the disabled. They have stated they don’t want a hand out just a hand. We are happy to give them one.” – Carl Karcher
63. “Placing one foot in front of the other, I’ve climbed to higher lengths. Reaching beyond my own limitations, to show my inner strength. No obstacle too hard, for this warrior to overcome. I’m just a man on a mission, to prove my disability hasn’t won.” – Robert M. Hensel
64. “Being unconscious is the ultimate disability.” – Jessa Gamble
65. “My disability exists not because I use a wheelchair, but because the broader environment isn’t accessible.” – Stella Young
66. “Childhood vaccines are one of the great triumphs of modern medicine. Indeed, parents whose children are vaccinated no longer have to worry about their child’s death or disability from whooping cough, polio, diphtheria, hepatitis, or a host of other infections.” – Ezekiel Emanuel
67. “It is unacceptable that disabled veterans in Illinois rank at the bottom of the list when it comes to disability pay. We owe our disabled veterans more than speeches, parades and monuments.” – Dick Durbin
68. “Congress acknowledged that society’s accumulated myths and fears about disability and disease are as handicapping as are the physical limitations that flow from actual impairment.” – William J. Brennan
69. “I am different but not less.” – Temple Grandin
70. “Start by doing what’s necessary; then do what’s possible; and suddenly you are doing the impossible.” – Francis of Assisi
71. “Nobody’s good in everything. Advantages and disadvantages come in many forms.” – Charles Schwab
72. “If you’re an underdog, mentally disabled, physically disabled, if you don’t fit in, if you’re not as pretty as the others, you can still be a hero.” – Steve Guttenberg
73. “Growing up in a group home, and with an undiagnosed learning disability to boot, the odds of success were not on my side. But when I joined the high school football team, I learned the value of discipline, focus, persistence, and teamwork – all skills that have proven vital to my career as a C.E.O. and social entrepreneur.” – Darell Hammond
74. “There are so many opportunities in life, that the loss of two or three capabilities is not necessarily debilitating. A handicap can give you the opportunity to focus more on art, writing, or music.” – Jim Davis quotes
75. “I’ve had tons of bullies who would call me retarded, even on my Facebook page. It’s sad and it really hurts. I want to tell people not to use the word. Don’t say your friend’s retarded when they do something foolish. If you have a disability, keep working hard. Whatever it takes, do it, and don’t be mean to people.” – Lauren Potter
76. “Limitations only go so far.” – Robert M. Hensel
77. “Obviously, because of my disability, I need assistance. But I have always tried to overcome the limitations of my condition and lead as full a life as possible. I have traveled the world, from the Antarctic to zero gravity.” – Stephen Hawking
78. “Although the world is full of suffering, it is full also of the overcoming of it.” – Helen Keller
79. “I have a son, Mason, who is disabled – cerebral palsy – and he does not walk independently, sit independently or speak. He uses a talking computer. I started becoming an advocate for him when he was 3 years old.” – Laura San Giacomo
80. “The only disability in life is a bad attitude.” – Scott Hamilton
81. “The more I read and the more I talked to other parents of children with disabilities and normal children, the more I found that feelings and emotions about children are very much the same in all families. The accident of illness or disability serves only to intensify feelings and emotions, not to change them.” – Judith Weatherly
82. “Equality is the public recognition, effectively expressed in institutions and manners, of the principle that an equal degree of attention is due to the needs of all human beings.” – Simone Weil
83. “People with disabilities are the largest minority in the world, and we are the most underrepresented in entertainment.” – Maysoon Zayid
84. “That’s software in the States that I helped to develop. It enables people with disabilities to improvise.” – Pauline Oliveros

85. “A good government is one with a duty to help everyone, to maximise his or her potential: Indigenous people, people with disabilities, and our forgotten families.We will not leave anyone behind.” – Warren Mundine
86. When you can’t change the direction of the wind — adjust your sails – H. Jackson Brown
87. “However difficult life may seem, there is always something you can do and succeed at.” – Stephen Hawking
88. “My life goal is to see the world’s one billion people with disabilities embraced and encouraged by the church.” – Joni Eareckson Tada
89. “You can be sure that I will always consider how changes to Social Security will impact people with disabilities when considering the various proposals offered for reform.”
– Steve Israel
90. “No pessimist ever discovered the secret of the stars, or sailed to an uncharted land, or opened a new doorway for the human spirit.” – Helen Keller
91. “A lot of roles for people with disabilities are quite patronising. It’s a real pity when they are just used to give dull PC kudos to a drama, or when they’re wheeled on in a tokenistic way without any real involvement in the plot.” – Mark Haddon
92. “I want to do theater and I am looking forward to doing more Television and Movies. I also want to direct some plays in theater workshops for people with disabilities.” – Chris Burke
93. “There are so many opportunities in life that the loss of two or three capabilities is not necessarily debilitating. A handicap can give you the opportunity to focus more on art, writing, or music.” — Jim Davis quotes
94. “Being born with a disability can sometimes be a struggle, but it is the ability to overcome such a challenge, that makes it so worth the fight. NEVER GIVE UP!!!” – Robert M. Hensel
95. “I know that there’ll be a continuation of making the world more accessible for people with disabilities.” – Stevie Wonder
96. “As a disabled man, let my life be a reflection of the endless amount of ability that exists in each and everyone of us.” – Robert M. Hensel
97. “We, the ones who are challenged, need to be heard. To be seen not as a disability, but as a person who has and will continue to bloom. To be seen not only as a handicap, but as a well intact human being.” – Robert M. Hensel
98. “Just because a man lacks the use of his eyes doesn’t mean he lacks vision.” – Stevie Wonder
99. “It is a waste of time to be angry about my disability. One has to get on with life and I haven’t done badly. People won’t have time for you if you are always angry or complaining.” – Stephen Hawking
100. “Disability is natural. We must stop believing that disabilities keep a person from doing something. Because that’s not true . . . Having a disability doesn’t stop me from doing anything.” – Benjamin Snow
101. “To sit there and tell anybody they can’t do something because of a disability, I think that’s ridiculous.” – Pat McDonald
102. “I was slightly brain damaged at birth, and I want people like me to see that they shouldn’t let a disability get in the way. I want to raise awareness – I want to turn my disability into ability.” – Susan Boyle
103. “Use the skills that I have got.Do not focus on what I have not.Of course, I am aware of my limitation. Yet, I am a part of God’s wonderful creation.” – William E. Lightbourne
104. “Hold my hand and walk with me. We must break the back of social inequity; We must empower every individual with a disability To live with dignity in an inclusive society.”
– William E. Lightbourne
105. “Optimism is the faith that leads to achievement. Nothing can be done without hope and confidence.” – Helen Keller
106. “Courage, sacrifice, determination, commitment, toughness, heart, talent, guts. That’s what little girls are made of; the heck with sugar and spice.” – Bethany Hamilton
107. “I can’t change it, That was God’s plan for my life and I’m going to go with it.” – Bethany Hamilton
108. “Courage doesn’t mean you don’t get afraid. Courage means you don’t let fear stop you.” – Bethany Hamilton
109. “I don’t need easy. I just need possible.” – Bethany Hamilton
110. “I could never have embraced this many people with two arms.” – Bethany Hamilton

111. “The challenges in our lives are there to STRENGTHEN our CONVICTIONS. They are NOT there to run us over.” – Nick Vujicic
112. “If I fail, I try again, and again, and again. If YOU fail, are you going to try again? The human spirit can handle much worse than we realize. It matters HOW you are going to FINISH. Are you going to finish strong?” – Nick Vujicic
113. “If the world thinks you’re not good enough, it’s a lie, you know. Get a second opinion.” – Nick Vujicic
114. “I never met a bitter person who was thankful. Or a thankful person who was bitter.” – Nick Vujicic
115. “In life, you have a choice: Bitter or Better? Choose better, forget bitter.” – Nick Vujicic
116. “We are put in situations to build our character… not destroy us.” – Nick Vujicic
117. “Never give up.” – Nick Vujicic
118. “I long to accomplish a great and noble task, but it is my chief duty to accomplish small tasks as if they were great and noble.” – Helen Keller
119. “Everything has its wonders, even darkness, and silence, and I learn, whatever state I may be in, therein to be content.” – Helen Keller
120. “Keep your face to the Sunshine and you will not see the Shadows.” – Helen Keller
121. “Don’t call us people with disabilities… we have DIFFabilities!” – Edward Barbanell
122. “As selfishness and complaint pervert the mind, so love with its joy clears and sharpens the vision.” – Helen Keller
123. “The marvelous richness of human experience would lose something of rewarding joy if there were no limitations to overcome. The hilltop hour would not be half so wonderful if there were no dark valleys to traverse.” – Helen Keller
124. “We could never learn to be brave and patient if there were only joy in the world.” – Helen Keller
125. “The most pathetic person in the world is someone who has sight but has no vision.” – Helen Keller
126. “If I regarded my life from the point of view of the pessimist, I should be undone. I should seek in vain for the light that does not visit my eyes and the music that does not ring in my ears. I should beg night and day and never be satisfied. I should sit apart in awful solitude, a prey to fear and despair. But since I consider it a duty to myself and others to be happy, I escape a misery worse than any physical deprivation.” – Helen Keller
127. “No pessimist ever discovered the secret of the stars, or sailed to an uncharted land, or opened a new doorway for the human spirit.” – Helen Keller
128. “One can never consent to creep when one feels an impulse to soar.” – Helen Keller
129. “I thank God for my handicaps, for through them I have found myself, my work and my God.” – Helen Keller
130. “So many of our dreams at first seem impossible, then they seem improbable, and then, when we summon the will, they soon become inevitable.” – Christopher Reeve
131. I can’t change the direction of the wind, but I can adjust my sails to always reach my destination. – Jimmy Dean
132. “Once you choose hope, anything’s possible.” – Christopher Reeve
133. “People won’t have time for you if you are always angry or complaining.” – Stephen Hawking
134. “I’m just a man on a mission, to prove my disability hasn’t won” – Robert M. Hensel
135. “I will crawl upon my knees just to know the joy of suffering.” — Sidewalk Prophets
136. “Life is all about balance. Since I have only one leg, I understand that well.” — Sandy Fussell
137. “I often wished that more people understood the invisible side of things. Even the people who seemed to understand didn’t really.” — Jennifer Starzec
138. “I had learned quickly that life doesn’t always go the way I want it to, and that’s okay. I still plod on.” — Sarah Todd Hammer
139. “Disabled people need more invested in their education, housing, job training, transportation, assistive technology, and independent-living facilities. Governments earn back this investment – and more – by making people with disabilities economically productive citizens.” – Jesse Ventura
140. “Disability is not a brave struggle or courage in the face of adversity. Disability is an art. It’s an ingenious way to live.” – Neil Marcus
141. “Dancing with a spinal cord injury is a challenge like no other, but I aspired to prove to myself that I could still be a phenomenal dancer even with an SCI” — Sarah Todd Hammer
142. “The thought of being able to [move my arms] made me want to give up my legs [instead] since I was accustomed to using them. But, I figured that after a few hours of sitting in a wheelchair…I would switch back…in a flash.” — Sarah Todd Hammer

143. “I am not sick.I am broken.But I am happy to be alive.”
— Carmen T
144. “Compassion, acceptance and LOVE is the cure to MOST of the issues that plague this world.” — Yvonne Pierre
145. “So to all who are situated as I am, I would say–Grow up as fast as you can.”
— Randolph Bourne
146. People with disabilities have abilities too and that is what this course is all about – making sure those abilities blossom and shine so that all the dreams you have can come true. – Mary McAleese
147. “I’m not going to be one of those amputees who dances and everyone finds inspiring. I’m not inspiring. I’m just me.” — Katherine Locke
148. “The video was still playing, although I didn’t know why. It seemed as if the able-bodied dancers were mocking me.” — Sarah Todd Hammer
149. “Attacking People With Disabilities is the Lowest Display of Power I Can Think Of.”
– Morgan Freeman
150. ‘Your child has taught you to see the world through the eyes of unconditional love.’ – Nancy Dyer



Developing countries are facing a massive infrastructure deficit. Despite robust growth over the last decade, many people in emerging markets and developing economies still do not have access to reliable and safe basic services. The lack of infrastructure comes at an economic and social cost. Today 1.2 billion people live without electricity; 2.8 billion still cook their food with solid fuels (such as wood); 1 billion people live more than two kilometers from an all-weather road; 60 percent of the world's population lack internet access; and at least 748 million people lack access to safe drinking water. Developing countries now spend about US$1 trillion a year on infrastructure. Many countries already face large gaps in the stock and quality of existing infrastructure, along with rising demand for services. Just to illustrate one source of rising demand in emerging economies, the number of people living in cities is expected to double in 30 years to 2030, adding 2 billion more people. With this mass urban migration comes rising demand for basic services such as water, power and transport.

It's estimated that an additional US$1 trillion to US$1.5 trillion of annual investment in low and middle income countries will be required through 2020 to meet the infrastructure demand from industry and households. Electricity, water, and transport are expected to account for the bulk of future spending needs. So developing countries need to double spending on infrastructure every year until 2020 to bridge the infrastructure gap. The price tag goes up further by approximately $200 billion a year when you factor in the spending required to reduce greenhouse gas emissions and to adapt assets to the challenges of increasingly volatile climates. With the research showing that a 10 percent increase in infrastructure investment contributes to one percent growth in GDP, helping countries bridge the infrastructure gap is critical for boosting growth, creating jobs, and delivering on the World Bank Group's twin goals of ending extreme poverty and boosting shared prosperity.

Our strategic plan is focused to support Global Infrastructure with mobilizing funds from you donors, multilateral development banks and development partners to leverage more public and private investments in infrastructure, Bridging infrastructure gaps in developing countries is key to reducing extreme poverty, At least 663 million people lack access to safe drinking water while 1.2 billion people live without electricity, promoting financing for infrastructure, proposed actions include improving data on infrastructure, supporting compatible approaches, and strengthening project preparation. Countries will need to spend resources better—by improving efficiency and building capacities—in order to support high-quality infrastructure projects that can achieve significant development results to meet the Sustainable Development Goals. Increasing coordination among development institutions to support planning and development of infrastructure projects. We seek to engage and work in collaboration with G-7, G-20, UN , Regional and Global Banks also to work with us l request you able partners to help and facilitate this networking for us.

We can get the most of every dollar of infrastructure capital by helping countries improve governance, local planning, preparation, and administration capacity," to encourage efficient spending should also encourage more investment from the private sector—which is seen as a key source of financing for infrastructure projects. World's infrastructure challenges is critical to achieving the goals of ending extreme poverty by 2030 and ensuring prosperity for all. At least 663 million people lack access to safe drinking water while 1.2 billion people live without electricity. More than one-third of the world's rural population is not served by an all-weather road. Increased collaboration If we are to achieve our goals and leave no one behind, we must address large infrastructure gaps in developing countries," and allow for a great range of voices to be heard. Developing countries, especially the most vulnerable, need international support to bridge their infrastructure gaps." We shall motivate Countries and development partners to use the forum to jointly build on existing multilateral collaboration mechanisms and coordinate efforts with multilateral and national development banks, global agencies, and the private sector.

The space should also help partners identify and address infrastructure and capacity gaps, as well as highlight opportunities for investment and cooperation—while ensuring investments are environmentally, socially and economically sustainable. We shall Promote compatible, efficient approaches to key infrastructure bottlenecks. This should help reduce transaction costs of building and implementing projects; Strength project preparation, to develop sustainable project pipelines. We shall Promote financing for infrastructure and partners will explore increasing the level of private sector participation, pursuing new approaches to collaboration, and fostering the secondary market for infrastructure equity and debt. Other possibilities are developing new tools to leverage balance sheets and bring in new private sector capital, and further increasing financial capacity through the use of risk-sharing instruments such as political risk insurance; We shall also seek to Help countries improve their data on infrastructure. This should enable public and private sectors to make more informed decisions, better plan projects, and prioritize investments. Improving accountability in service delivery and raising levels of transparency are also objectives.

6. Completion and Evaluation

- ✓ Implementation Completion and Results report (ICR)
- ✓ IEG Evaluation of ICR

1. *Identification stage:*

- ✓ Project Concept Note (PCN)

2. Preparation stage:

- ✓ Technical Assessment
- ✓ Economic/Financial
- ✓ Institutional Capacity and Institutional Arrangements
- ✓ Financial Management
- ✓ Procurement
- ✓ Social and Environmental
- ✓ Results, Risks

5. Implementation and Support

- ✓ Implementation Status and Results report (ISR)

4. Negotiations and Board Approval stage:

- ✓ PAD (final)
- ✓ Legal Agreement (final)
- ✓ Memorandum of President

3. Appraisal stage

- ✓ Project Appraisal Document (appraisal stage)
- ✓ Legal Agreements (draft)

We shall seek to support Community-driven development programs operate on the principles of transparency, participation, accountability, and enhanced local capacity. Our Experience has shown that when given clear and transparent rules, access to information, and appropriate technical and financial support, poor communities can effectively organize to identify community priorities and address local problems by working in partnership with local governments and other institutions to build small-scale infrastructure and deliver basic services. The Helpers Of Africa International recognizes that National, Local governments and communities approaches and actions are important elements of an effective poverty-reduction and sustainable development strategy. In many countries, operations are the only safety net available to reach remote and vulnerable groups in a timely and credible manner. They have a strong track record in moving funds quickly and flexibly in response to disasters and global crises such as the COVID-19 pandemic. For instance, as a complement to household cash transfers, community-level (block) grants that are based on community emergency plans can be distributed to rural villages and urban neighborhoods since community leaders often know best what the specific needs are in each community.

The Helpers Of Africa International will support governments in designing, implementing, and evaluating community programs across a range of low to middle-income countries, including countries affected by fragility, conflict, and violence. The programs respond to a variety of urgent needs including access to clean water, rural roads, school and health clinic construction, nutrition programs for mothers and infants, and support for micro-enterprises. These programs have consistently shown an ability to deliver an increase in access to quality infrastructure and services in a cost-effective manner, in ways that have broad community support. The Helpers Of Africa International will provide financing and services to low and middle-income countries to support development and change. Development projects are implemented by borrowing countries following certain rules and procedures to guarantee that the money reaches its intended target. The project cycle is the framework used to design, prepare, implement, and supervise projects. The duration of the project cycle is long by commercial standards. It is not uncommon for a project to last more than four years; from the time it is identified until the time it is completed.
Our Helpers Of Africa International funding project process will consists of six stages mainly Identification, Preparation, Appraisal, Negotiation/Approval, Implementation/Support, Completion /Evaluation & Identification. The Helpers Of Africa International, jointly with other funders and donors will work with a borrowing country's government and other stakeholders to determine how financial and other assistance can be designed to have the largest impact. After analytical work is conducted, the borrower and the Bank Group produce a strategy, called Country Partnership Framework, to identify the country's highest priorities for reducing poverty and improving living standards. The projects we shall Identify projects can range across the economic and social spectrum from infrastructure, to education, to health, to government financial management. The Helpers Of Africa International and the government agree on an initial project concept and its beneficiaries, and the Bank's project team outlines the basic elements in a Project Concept Note. This document identifies proposed objectives, imminent risks, alternative scenarios, and a likely timetable for the project approval process. Our Strategic plan outlines the scope of the intended project and contains useful public information for tailoring bidding documents to the proposed project, and the publicly available Integrated Safeguards Data Sheet identifies key issues related to the Bank's safeguard policies for environmental and social issues.

In Project Preparation, The borrower government and its implementing agency or agencies are responsible for the project preparation phase, which can take several years to conduct feasibility studies and prepare engineering and technical designs, to name only a few of the work products required. The government contracts with consultants and other public sector companies for goods, works and services, if necessary, not only during this phase but also later in the project's implementation phase. Beneficiaries and stakeholders are also consulted now to obtain their feedback and ensure the project meets their needs. Due to the amount of time, effort and resources involved, the full commitment of the government to the project is vital. The Helpers Of Africa International generally takes an advisory role and offers analysis and advice when requested, during this phase. However, the Bank does assess the relevant capacity of the implementing agencies at this point, in order to reach agreement with the borrower about arrangements for overall project management, such as the systems required for financial management, procurement, reporting, and monitoring and evaluation. Earlier screening by our staff of the Bank and agency will help to determine that a proposed project could have environmental or social impacts that are included under the Bank's and Agency Safeguard Policies. If necessary, the borrower now prepares an Environmental Assessment Report that analyzes the planned project's likely environmental impact and describes steps to mitigate possible harm. In the event of major environmental issues in a country, the borrower's Environmental Action Plan describes the problems, identifies the main causes, and formulates policies and concrete actions to deal with them.

From a social point of view, various studies aimed at analyzing a project's potentially adverse effects on the health, productive resources, economies, and cultures of indigenous peoples may be undertaken. An Indigenous Peoples Plan identifies the borrower's planned interventions in indigenous areas that may be needed, with the objective of avoiding or lessening potential negative impacts on the people. These plans are integrated into the design of the project.

The Enviromental Accessment will be carried out to Safeguard Policies projects supported through the Investment Project Financing instrument are governed by operational policies and procedures which are designed to ensure that the projects are economically, financially, socially and environmentally sound. The Helpers Of Africa International and Our Kingdom Global Infrustructure Agency **Environmental and Social Framework** expands protections for people and environment in Bank-financed projects to investment projects for which a concept note is issued. The Project Appraisal-Appraisal gives stakeholders an opportunity to review the project design in detail and resolve any outstanding questions. The government and the Helpers Of Africa International will review the work done during the identification and preparation phases and confirm the expected project outcomes, intended beneficiaries and evaluation tools for monitoring progress. Agreement is reached on the viability of all aspects of the project at this time. The Bank team confirms that all aspects of the project are consistent with all Helpers Of Africa International and our Agency operations requirements and that the government has institutional arrangements in place to implement the project efficiently. All parties agree on a project timetable and on public disclosure of key documents and identify any unfinished business required for final Bank approval. The final steps are assessment of the project's readiness for implementation and agreement on conditions for effectiveness (agreed upon actions prior to implementation). The Project Information Document is updated and released when the project is approved for funding.

The Project Approval and Appraisal -Once all project details are negotiated and accepted by the government and the Helpers Of Africa International, the project team prepares the Project Appraisal Document (for **investment project financing**) or the Program Document (for **development policy financing**), along with other financial and legal documents, for submission to the Bank's Board of Executive Directors for consideration and approval. When funding approval is obtained, conditions for effectiveness are met, and the legal documents are accepted and signed, the implementation phase begins. In Project implementation The borrower government implements the development project with funds from the Helpers Of Africa International. With technical assistance and support from the Bank's team, the implementing government agency prepares the specifications for the project and carries out all procurement of goods, works and services needed, as well as any environmental and social impact mitigation set out in agreed upon plans. **Financial management** and **procurement** specialists on the Bank's project team ensure that adequate fiduciary controls on the use of project funds are in place. All components at this phase are ready, but project delays and unexpected events can sometimes prompt the restructuring of project objectives. Once underway, the implementing government agency reports regularly on project activities. The government and the Bank also join forces twice a year to prepare a review of project progress, the Implementation Status and Results Report. The project's progress, outcomes and impact on beneficiaries are monitored by the government and the Bank throughout the implementation phase to obtain data to evaluate and measure the ultimate effectiveness of the operation and the project in terms of results.

Project Completion- When a project is completed and closed at the end of the loan disbursement period, a process that can take anywhere from 1-10 years, the Helpers Of Africa International and the borrower government document the results achieved; the problems encountered; the lessons learned; and the knowledge gained from carrying out the project. Our Bank and Agency operations team compiles this information and data in an Implementation Completion and Results Report, using input from the implementing government agency, co-financiers, and other partners/stakeholders. The report describes and evaluates final project outcomes. The final outcomes are then compared to expected results. The information gained during this exercise is also often used to determine what additional government measures and capacity improvements are needed to sustain the benefits derived from the project. In addition, the evaluation team assesses how well the entire operation complied with the Bank's operations policies and accounts for the use of Bank resources. The knowledge gained from this results measurement process is intended to benefit similar projects in the future.

Project completion and evaluation Faced with a large infrastructure deficit, governments have no way to close the financing gap using public funds alone. Public funding of infrastructure in developing countries accounts for between 70 and 80 percent of total infrastructure spending. The challenges of raising funds for infrastructure projects in emerging markets and developing economies have become particularly acute since the global financial crisis. Faced with rising demand from developing countries, the Helpers Of Africa International's financing commitments in roads, bridges, power generation and transmission, water supply and sewerage, and other critical infrastructure projects will be strong in the coming years. While official development assistance from multilateral development banks and other international financial institutions can play its part, attracting private finance to complement public funds is vital to provide governments the long-term liquidity they need for infrastructure. Indeed, only between 5 and 10 percent of infrastructure finance in the developing world comes from multilateral development banks. The private sector has played a small but critical role in financing and operating public infrastructure since the early 1990s. Over the last few years, the private sector's contribution to public infrastructure—through Public-Private Partnerships (PPPs)—has averaged about $180 billion a year.

However, analysis of the Kingdom Group Bank Group's Private Participation in Infrastructure Database shows that private infrastructure investment in emerging markets has been declining. The challenge is not a fundamental lack of capital, but rather a shortage of capital willing to invest in the more complex, longer-term and riskier investments that are typical of infrastructure projects in emerging markets and developing economies. This highlights the need for an innovative new approach, involving the private sector, to mobilize other sources of private financing for infrastructure investment such as from institutional investors—a major source of long-term capital. Currently less than one percent of pension fund assets are allocated directly to infrastructure projects, and the bulk of this is in advanced economies. This represents an untapped market for potential funding in emerging market infrastructure projects. The Helpers Of Africa International research shows that private infrastructure investment is very sensitive to country risk. A country's investment climate—such as its predictable handling of contracts, regulations and prices—are key drivers of the levels of investment in infrastructure. Reinvigorating the supply of infrastructure in the developing world requires work to establish a more supportive environment for investment. As a background note prepared by the Helpers Of Africa International for the G20 explains, governments need to pay more attention to the selection, quality and management of infrastructure projects as well as to the quality of the underlying investment climate. Failing to choose, prepare and develop the right projects means emerging markets face a shortage of investments that are attractive to private financiers—that is, a lack of financially viable projects. The Helpers Of Africa International will create the Global Infrastructure Fund —a global open platform—that will facilitate the preparation and structuring of complex infrastructure PPPs to mobilize private sector and institutional investor capital. It's unique because of its partnership approach. The fund platform offers governments, multilateral development banks, private sector investors and financiers a new way to collaborate on complex projects that no single institution could do on its own. From the start to the finish of a project, the GIF platform will provide support, drawing on its array of technical and advisory partners, which will include private investors, to ensure well-structured and bankable infrastructure projects are brought to market. Its unique collaborative approach has already won strong support from institutional investors. Its aim is to provide integrated support—using the wide range of skills and resources from within the Helpers Of Africa International and within the public and private sectors—to unlock a credible pipeline of viable and bankable public private partnership projects in emerging markets and developing economies to help meet the infrastructure challenge.

Sustainable economic growth continues to offer the surest path out of poverty. The Helpers Of Africa International will support investments in countries that underpin long-term growth and that help to meet the needs of their citizens. We will work with policy makers to develop markets, institutions, and economies that are stable, equitable, and efficient. We help countries to meet their essential infrastructure needs in a way that ensures sustainability. Through analysis, advice, financial instruments, convening power, and crucially, a solid evidence base, we provide our clients with the tools to make informed development decisions for lasting impact. We shall Pursue low-carbon energy Access to modern, reliable, and affordable energy is critical for countries to meet their development needs, but it must be pursued in a sustainable manner. The Helpers Of Africa International works with governments to provide low-carbon options for energy access that fit every country's circumstances, including renewable sources like solar. The Bank will provide and make available Trillions of Dollars ready for lending for solar projects, including a rooftop solar initiative that will deliver electricity to millions Through off-grid solutions, gaining access to energy, mostly with solar lanterns and home systems, Smart grids are boosting the uptake of renewable energy , hydo electric multipurpose dams, geo thermal research and establishments of viable projects along with boasting existing ones for Comprehensive analytical tools—like the Regulatory Indicators for

Sustainable Energy (RISE), which assess countries' policies and regulatory support for sustainable energy—help governments to craft policies that attract private sector investments as well as to track progress toward access to energy for all.

Through our Kingdom Global Infrastructure Agency and Kingdom Global water and Sanitation Agency we shall lend funds to National , local governments and community Providing safe water and sanitation for all. As the world's largest multilateral source of financing for water in developing countries, the Helpers Of Africa International is committed to working closely with partners to achieve the vision of "A Water-Secure World for All." To this end, the Bank prioritizes the sustainability of water investment, and supports financing that includes mobilizing private capital to move toward safe water and sanitation for all. The work promotes inclusive access to the benefits of water, institutions that manage water equitably, and resilience to help countries scope with the impact of external shocks on water access to improved water sources and hygienic latrines. Water and sanitation service delivery cannot be addressed separately from sustainable and safe management. We shall fund the water and sanitation Strategic plan acting on developing water resources that will help to ensure the availability and sustainable management of water and sanitation for all.

We shall support global technology innovation, development and expansion to allow the world to Reap the benefits of digital technologies. Digital technologies are rapidly changing the way people, businesses, and governments communicate, transact, and access services and information. The digital economy is becoming a critical driver of economic growth, investment, and job creation, so the adoption of digital technology by traditional industries is important for improving productivity and opening access to new markets. The Kingdom Global Infrastructure Agency and Kingdom Global Creativity and Innovation Agency will support countries and their citizens as they take advantage of these opportunities. This support includes expanding affordable Internet access to the more than 4 billion people who remain unconnected, developing digital infrastructure, and building the digital skills and institutions necessary to participate in the digital economy especially in this time of Covid 19 technology migration has shown it. We shall support and fund through loans and grants Digital Development Partnership with participants from the public and private sectors to operationalize the lessons our strategic plans. This will help to close the global digital divide to ensure that everyone can reap the economic and social benefits of connectivity increase access, improved quality, and lowered the cost of international connectivity by as much as 90 percent through market competition reforms and thousands of kilometers of network infrastructure investment of fibre optic cables.

We shall also fund and support Global Growth of better transport connectivity to enable the movement of people, goods, and ideas around the globe, and provides better access to economic opportunities, such as jobs. Transport also plays a major role in social inclusion. Rural roads can unlock a world of opportunities for isolated communities, while urban transport that benefits low-income com- munities can promote access to affordable ways to reach jobs. Ensuring that such outcomes are sustainable means tackling climate change mitigation in this sector—which accounts for 23 percent of the world's energy-related CO_2 emissions—by supporting the development of low-carbon, efficient transport systems. The development of Global system will reduce travel time and costs for commuters, saving them up to 90 minutes a day by developing bypasseses in the Cities and across countries through our Kingdom Global Smart Cities and slum upgade Agency.

We also seek to Partner more with the private sector on infrastructure helping governments make informed decisions about improving access to quality, sustainable infrastructure services, including where appropriate, using public-private partnerships to support good decision making by policy makers on infrastructure projects, often in collaboration with other multilateral development banks (MDBs) or development partners. We shall seek to support and fund Delivering Inclusive, Sustainable Infrastructure to countries through stakeholders and development partners and the private sector we can work with countries and the private sector to create markets for infrastructure projects. Expanding knowledge was also a priority. With partners from across the multilateral development community, the Bank will release funds to countries with a holistic outlook of all aspects ranging from environmental and social issues to risk mitigation and credit enhancement In addition, the Global Infrastructure Funds in partnership to expand the market for private financing of infrastructure in emerging markets.

We shall support and fund Boosting agriculture to create jobs. Roughly 80 percent of the world's extreme poor live in rural areas and depend largely on farming to make a living. Because the food system currently provides more jobs than any other sector in many countries, boosting agriculture can be one of the most powerful tools against poverty. Through Kingdom Global food and Agriculture Agency and Kingdom Global Infrastructure Agency we shall improve the livelihoods of billions of people globally. We shall support national / local governments, communities and cooperatives to establish 'one-stop shops' for agriculture, which connect farmers with credit, inputs, agricultural training, and farmer field schools. Backyard poultry farms, dairy training, product marketing assistance, and other livelihood interventions helped to boost annual incomes. Job skills training to improve employment prospects for rural communities, women and youth. The projects will also empower women and marginalized groups with access to government institutions and financial services, enabling billions in credit and facilitating in household savings.

We shall seek to support and fund Strengthening to protect for natural resources through our Kingdom Global Enviromental Agency and Kingdom Global Mining and Oil Agency as per our strategic plans of this 2 agencies. Natural resource assets are rapidly being depleted. The costs associated with increased scarcity are very high. Through the development of natural capital accounts, the Helpers Of Africa International will help clients to better manage these assets, which typically make up about 36 percent of total wealth in developing countries. Work on environmental sustainability promotes strong governance of marine and coastal resources by supporting sustainable fisheries and aquaculture, establishing protected coastal and marine areas, and reducing ocean pollution to improve the sustainability of fishing stock through a quota system for fishers to receive better prices for there catch, and commercial fishing companies to expand and invest in more sustainable activities. We shall also promote mining by providing loans and grants for geo surveys, licences, technology, markets and miniers both artisans and industrial mega mines that need more capital boasts to increase on research and production according to the very comprehensive strategic plan of Kingdom Global Mining and Oil Agency.

We shall also Promote investment through reforms to reduce risk through our Kingdom Global Trade and Enterpreneurship Agency to Reduce real or perceived risks to investors across macroeconomic, business, and financing dimensions is a prerequisite for creating markets that can attract the investment needed to create opportunity by providing a series of development policy loans to support a reform program that is helping the country to recover from a downturn in investment. The reforms by the governments will boost confidence in the global economy especially after this big economic hit because of Covid 19. We shall help to promote foreign investors as a voice of investors to the Nationals after helping them package investments and a good environment for growth. We shall help government secured actual investments and support new direct jobs in the country's in sectors as per feasible projects presented. We shall package joint venture Helpers Of Africa International and gorvernments / parastatals / local governments and communities to forster Investment Generation Programs that will bring together public officials, the private sector, and foreign investors on promotion strategies and special economic zones. Despite the challenging local environment, we shall helped to attract new investors of sectors and revive national economies.

We shall keep raising more avenues of Tapping new sources of financing by Stable and diversified financial markets are also an essential building block for achieving inclusive, sustainable growth. In an environment where long-term bank financing is becoming increasingly scarce, countries need to tap into new sources of financing to meet their development needs through Joint Capital Markets Initiative. It promotes capital market development in emerging countries by supporting liquid, diverse, long-tenor financing and well-regulated local capital markets. This new initiative will ensure that countries receive end-to-end analytical, advisory, and financing support for developing their markets. Mobilizing domestic resources for effective services So that Countries that can effectively deliver services grow faster, innovate, and respond more quickly to internal and external shocks. But without a sufficient revenue base, governments have difficulty funding basic state services, such as road construction, health care, and public safety. Research has found that countries that collect less than 15 percent of GDP in taxes are at a disadvantage, not only in providing services but also in economic growth. We shall seek to support and Facilitate trade and integration Increased trade integration has helped to drive economic growth in developing economies in recent decades, lifting millions out of poverty. The Helpers Of Africa International will work with governments to fund design and implement policies to maximize trade competitiveness in both goods and services.

Many developing countries has performed well in the past decade in terms economic growth, mainly driven by the services sector, both traditional and modern. Expansion in services such as financial intermediation and mobile communications has stimulated demand for other services such as trade. Maximizing the potential of services can continue to spur economic growth, especially given that most formal, high quality jobs are in this sector. Agriculture, which still contributes to more than quarter of the economy (and employs most of the rural poor) and manufacturing have stagnated. Due to the stagnation, agriculture and manufacturing have not been able to create enough jobs for growing working population. Most of the jobs are created by the informal economy and are concentrated in the low productivity segments of hospitality, trade, etc. Improving the ease of doing business is one way toward job creation and higher productivity in the manufacturing sector. There is still a need for creating job opportunities for the rural poor for poverty reduction and achieving shared prosperity. Reviving agriculture remains the pathway for poverty reduction. Other development challenges that we shall help nations in areas that include maintaining macroeconomic stability to boost savings and investments; continuing to build countries energy and transport infrastructure to ease costs of doing business and improvement competitiveness; ensuring efficiency in public investment management process and better execution; tackling the issue of perceived petty and grand corruption; and addressing security challenges posed by the terrorism that we shall support countries to deal with. We shall support nations towards competitiveness and sustainability, protecting the vulnerable and helping them develop their potential, and (iii) building consistency and equity. Connecting the three areas is a platform of garnering good governance. A selective test was used to determine the three domains, the sectors within each domain, and to make trade-offs between particular operations and Advisory Services and Analytics.

The Infrastructure support to nation include to develop geothermal capacity, connect new customers connectivity to electricity electricity price paid by consumers, funding drainage system for sewage and flood protection from periodic flooding, improved infrastructure, roads rehabilitated, high mast security lights installation to improve night life and security especially slums security life and interconnectivity between small towns and rural villages that can be done by solar lighting for sustainability, Supporting of transformation of the roads subsector through implementation major institutional and policy reforms – roads policy, established size of road network and its reclassification, Construction of new terminal in airports and sea ports along with railway stations / terminals. Other areas of infrastructure include expansion of airport, new airports and airstrips, expansion and extension of runways, paved roads, drainage systems, high mast flood lights, and improved water and sanitation services, by passes and under passes Corridor Transport Improvement Project to reduce traffic jams in cities reduced transit time from towns and estates, ferries, water and oil pipelines, bridges small and mega across rivers / seas

Helpers Of Africa International through Kingdom Global infrastructure Agency through Kingdom Global Health Agency to develop and boost health facilities new hospitals, Wards, hospital equipment's, vehicles, High return investments in fiscal infrastructure: transport, utilities, and information and communication technologies, Establish 14 regionalised e-Health hubs with call centres for coordination of Emergency transport and services, To facilitate and maximize referral services and hospitals, purchase helicopters for highly specialised critical emergency evacuation of needy patients (KNH and MTRH referrals), . Physical buildings expansion and rehabilitated both at national and county levels to conform to the current norms and standards for the health infrastructure ,The technical capacity of the Human resources for health for both national and county levels should be enhanced to support the MES and service delivery, Procure and adequately equip health facilities with patient medical beds and medical equipment to conform to the norms and standards for the health infrastructure, develop health guidelines on how to establish and set up a facility and its operations at all levels, communication technologies to facilitate access and efficient use of health services across the country, inpatient beds, equipment, transport, and technology (including ICT) required for effective delivery of services at the National Government and County Government level. Optimal- functional and operating to the required standards , Coordination of transport for emergency services and call centre(s) for coordination of transport and management of Emergency services., Physical health infrastructure (buildings): Majority of the physical buildings are dilapidated, inadequate space and not prioritized by national /counties as areas of critical investments but influenced by political leaders, Bed capacity and medical equipment, medical equipment for diagnostics, treatment and management of patients across the countries together with capacity of technical human resources for health to operate the fixed equipment and machines and Communication technologies limited access to communication equipment to the health service providers across the countries. All this will be together with Kingdom Global Health Agency which can further health infrastructure as per health needs.

We shall substantial investments in infrastructure, achieving dramatic gains for households and producers by expanding their access to services such as safe water, sanitation, electric power, telecommunications, and transport. Even more infrastructure investment and expansion are needed in order to extend the reach of services especially to people living in rural areas and to the poor. But as this report shows, the quantity of investment cannot be the exclusive focus of policy. Improving the quality of infrastructure service also is vital. Low operating efficiency, inadequate maintenance, and lack of attention to the needs of users have all played a part in reducing the development impact of infrastructure investments in the past. Both quantity and quality improvements are essential to modernize and diversify production, help countries compete internationally, and accommodate rapid urbanization. Future success means building on lessons learned. The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure. Other areas of focus on Infructructure

1) Kingdom Global Infrastructure Agency will fund and support nations To promote more efficient and responsive service delivery, incentives need to be changed through commercial management, competition, and user involvement. Commercial management including financial autonomy, accountability, and well-defined objectives focuses providers of infrastructure services on increasing efficiency and meeting customer demand.
2) Kingdom Global Infrastructure Agency will fund and support countries in provides users with choices that can better meet their needs and compels providers to become more efficient and accountable. Involvement of users and other stakeholders in the design, operation, and maintenance of infrastructure is also key to better performance, particularly in areas where competition is constrained. Several trends are helping to improve the performance of infrastructure.
3) Kingdom Global Infrastructure Agency will fund and support innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services.
4) Kingdom Global Infrastructure Agency will fund and support evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public-private partnerships is highlighting new ways to increase efficiency and expand services.
5) Kingdom Global Infrastructure Agency will fund and support increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance. Differences between and within infrastructure sectors, together with major variations in country needs and capacities, mean that the detailed design and implementation of policy reform must be tailored to specific cases.
6) Kingdom Global Infrastructure Agency will fund and support Infrastructure: achievements, challenges, and opportunities Infrastructure's impact on development.
7) Kingdom Global Infrastructure Agency will fund and support capacity building public sector role in infrastructure, The record of performance, Diagnosis and directions for change ,Running public entities on commercial principles, Lessons of success and failure , Corporatization ,Focused goals and accountable management, Pricing for financial independence ,The need for a political commitment to reform , Using markets in infrastructure provision , Unbundling services for competition, The range of market alternatives , Paths to market provision , Beyond markets in infrastructure, Decentralization and participation, involving users, Improving budgetary allocations, Subsidies and transfers to the poor, Addressing externalities, Elements of infrastructure planning, Financing needed investments, Old ways of financing infrastructure and new, The spread of project financing, achievements and lessons, Institutions and instruments for resource mobilization, infrastructure Prospects, Infrastructure's role and record
8) Kingdom Global Infrastructure Agency will fund and support Diagnosing the causes of poor performance New opportunities and initiatives, Options for the future , Implementing reform ,Potential payoffs from reform, Setting priorities and implementing reform ,Choosing among alternatives, institutional options and country conditions, Sectoral agendas for reform, Payoffs from reform, Bibliographical note, Infrastructure data, World Development Indicators, packaging Returns on infrastructure investment, importance of infrastructure sustainability to economic development, Throwing infrastructure overboard, Infrastructure's direct and indirect effects in rural areas, Households' responses to unreliability of water supply, Public failures raise private costs , Infrastructure activities threats, run a public utility training, Infrastructure Utility Corporation, Severance pay eases layoffs for infrastructure, corporatization of main ports, packaging performance agreements, Management contracting for nations parastatals, sustaining urban infrastructure, Designing tariffs to achieve financial autonomy while addressing multiple goals, improve highways, unbundling railway , lease contract water supply, concession for water supply, Telecom privatization, evolution of private power , Regulation and privatization, Development of regulatory capacity, regulatory roller coaster for telecommunications, ,approaches to water and sanitation planning, Centralized and decentralized infrastructure planning, Women and Youth benefit from infrastructure, Donor coordination in infrastructure, project evaluation,

9) Incorporating environmental concerns early in planning, Population resettlement and project design, Management of hydropower project for profitability, government financing, Tapping international capital markets, Warning signs from the nineteenth century, Land grants and eminent domain, Management of toll stations to repay infructructure loans, Leveraging through guarantees , government exposure to contingent liabilities, Successful municipal credit, Ingredients of good performance under alternative institutional forms, growing country's income for repayments, infrastructure increases with construction costs, composition of infrastructure changes with country income level, Infrastructure expansion for decades of future, better access to safe drinking water, eliminating mispricing and inefficiency , Cost effective Public infrastructure investment, management of large fraction of both total and public investment in developing countries, capita availability of major infrastructure is closely related to income levels, Infrastructure services differ substantially in their economic characteristics across sectors, Developing Infrastructure technologies, The rural-urban gap in access to power and water in developing countries, Participation increases water project effectiveness by improving maintenance, maintenance of water and sewerage, centrally planned economies, infrastructure subsidies, official development finance for infrastructure for energy and transport ,
10) Kingdom Global Infrastructure Agency will fund and support build capacity for Government department Public enterprise Leasing contract ,Concession contract Private (including cooperative), ownership and operation User or community provision Traditional ('self-help'), Corporatized and commercial With service contract With management contract Ownership of assets Public Public (majority) ,Public (majority) Private (majority) Private or in common Sectoral investment planning, coordination, policymaking, regulation Internal to government, Public authority negotiated with private operator None or public authority None or public authority Capital financmg (fixed assets) Government budget Subsidies and public loans Mainly market-based financing Public Private operator, Current financing (working capital) Government budget Mainly subsidies, Mainly internal revenues Private operator Private (government may pay for pubfic service obligations), Private operator for specific services Private operator Government Private operator Private Private Collection of tariff revenues Government Government or public enterprise Public enterprise Private operator, Managerial authority Government Public enterprise Private operator Private operator Private Private Bearer of commercial risk Government Public enterprise Mainly public Private operator Private Private Basis of private party compensation Not applicable Fixed fee based on services rendered Based on services and results Based on results, Public ownership and public operation Government roles as owner, regulator, and operator clearly separated. No government interference in detailed management. Public enterprises subject to general commercial law and to general accounting and auditing standards (operating on "level playing field" with private enterprises). Tariffs set to achieve cost recovery as appropriate, and enterprise subject to hard budget. Public service obligations, if any, targeted and compensated explicitly by government transfers. Managers selected by professional qualifications and compensated appropriately. Appropriate mechanisms in place to obtain feedback from users. Discrete activities and functions that can be unbundled open to private entry (for example, through service contracts). Private management skills obtained as needed (for example, through management contracts). Ownership and control shared with the private sector (for example, as minority shareholder). Public ownership and private operation Basic legal framework of contract law, including credible enforcement mechanism, in place. Contracts clearly specify monitorable performance targets, responsibilities of owner and operator, processes for periodic review (especially to account for unforeseen changes in input costs), mechanisms to resolve disputes, and sanctions for nonperformance. Contracts awarded by transparent selection process, preferably competitive bidding. Private ownership and private operation Appropriate competitive restructuring of subsector undertaken. Practical and statutory barriers to private entry removed (for example, restrictions on access to credit and foreign exchange). Regulation in place to protect public interest when competitive discipline is insufficient and to ensure private entrants access to network facilities when relevant. Option D: Community and user provision Participation of users or community members from earliest stage of program preparation to ensure willingness to pay and ownership of scheme.

11) Kingdom Global Infrastructure Agency will fund and support Official lending for infrastructure structures, guaranteed private loans, Infrastructure privatization proceeds, foreign financing of infrastructure privatization, administrative capacity and maturity of domestic capital markets, infrastructure services by country groups, Expansion of infrastructure coverage in low-/middle-/and high-income economies, recent decades, richest population quintiles with access to infrastructure, Management of Common management problems in public sector infrastructure entities, Contractual arrangements for private water supply, Value of infrastructure privatizations in developing countries, Portfolio and foreign direct investment in developing countries, Infrastructure project financing for projects funded and in the pipeline, financing of funded infrastructure projects, institutional options for provision of infrastructure, Country infrastructure coverage and performance, Feasibility of private sector delivery varies by infrastructure components, Options in telecommunications and energy, Options in water and waste , Options in transport, Fiscal burden of underpriced infrastructure, Savings from increased efficiency, Physical measures of infrastructure provision, Access to drinking water and sanitation for rural regions, Official development finance commitments ,

12) Kingdom Global Infrastructure Agency will fund and support Diagnosing the causes of poor performance The problems of insufficient maintenance, misallocated investment, unresponsiveness to users, and technical inefficiencies present daunting challenges for future reforms - challenges compounded by new demands and constrained resources. The solutions lie in the successes and failures of policy and in the lessons from recent policy experiments. There is great variation both within and across countries in the efficiency of providing infrastructure services. Moreover, good performance by a country in one infrastructure sector is not necessarily associated with good performance in other sectors. Some developing countries and not always the richer ones--perform at high levels

13) Kingdom Global Infrastructure Agency will fund and support nations to manage competition can also occur across sectors between road and rail, or between electricity and gas.

14) Kingdom Global Infrastructure Agency will fund and support structured funding and repayment for infrastructure includes public utilities (power, piped gas, telecommunications, water supply, sanitation and sewerage, solid waste collection and disposal), public works (major dam and canal works for irrigation, and roads), and other transport sectors (railways, urban transport, ports and waterways, and airports). Social infrastructure, often encompassing education and health care.
15) Kingdom Global Infrastructure Agency will fund and support social and economic importance of infrastructure, which has strong links to growth, poverty reduction, and environmental sustainability. Infrastructure's impact on development Links to economic growth Infrastructure represents.
16) Kingdom Global Infrastructure Agency will fund and support, telecommunications, electricity, and water are used in the production processes and transport is an input for every commodity.
17) Kingdom Global Infrastructure Agency will fund and support Industrial infrastructure Public capital Transportation, water, and communication Transportation, water, and communication Transportation, power, water, and sanitation Power, communication, and transportation
18) Kingdom Global Infrastructure Agency will fund and support Transportation ,major advances in communications, transport, and storage technologies. These advances center on the management of logistics (the combination of purchasing, production, and marketing functions) to achieve cost savings in inventory and working capital and to respond more rapidly to customer demand.
19) Kingdom Global Infrastructure Agency will fund and support growth of electronic data exchange involving telecommunications informatics--is central to efficient operations in manufacturing, services, the financial sector, arid government. Availability of power allows substantial improvements in workers' productivity (for example, in the transition from foot-powered to electrically powered sewing), while international telecommunications, facsimile services, and rapid transport of goods permit the artisan to produce to order for a computerized global market. A higher quality of water and sanitation is required to shift from production of raw agricultural commodities to processed foods.
20) Kingdom Global Infrastructure Agency will fund and support Surveys of prospective foreign investors over a wide range of countries show that the quality of infrastructure is an important factor in ranking potential sites for location of direct investment.

21) Kingdom Global Infrastructure Agency will fund and support Improved management of traffic and land use and promotion of nonmotorized modes, cleaner fuels, and public transport.
22) Kingdom Global Infrastructure Agency will fund and support demands for water, lighting, communications, and waste disposal are met.
23) Kingdom Global Infrastructure Agency will fund and support invention of cast-iron pipes and steam-driven pumps did extensive water infrastructure spread, beginning with a piped water network.
24) Kingdom Global Infrastructure Agency will fund and support piped water, electric power, gas, telecommunications, sewerage, and rail services. The delivery system is in most cases dedicated, that is, it carries only one good. Investments in the delivery system (such as underground water pipes or electric wires) are mostly irrecoverable because they cannot be converted to other uses or moved else where unlike the investment in a vehicle, for example. Once paid, these costs are said to be "sunk." Because the delivery system is networked, coordination of service flows (traffic, electricity, communications signals) along the system is critical to its efficiency.
25) Kingdom Global Infrastructure Agency will fund and support Many infrastructure services can be produced by very different technologies. Sanitation based on improved latrines or septic tanks provides the same underlying service as does sewerage disposal of wastes, but without networked investments. Small-scale irrigation particularly irrigation based on wells or borehole sand small-scale renewable-energy-based power generation (such as micro-hydro schemes) also need not involve intercormections with large networks but can provide service highly responsive to users.
26) Kingdom Global Infrastructure Agency will fund and support Telephone services provided over wire-based networks or through radio-based systems. Consumption characteristics As seen earlier, the demand for infrastructure services derives from the activities of both industries and individuals. Ensuring a flow of services of at least minimum quality and quantity is often considered by governments to be of strategic importance, since any interruption or restriction of supply would be seen as a threat to society.
27) Kingdom Global Infrastructure Agency will fund and support Microelectronic monitoring devices and nondestructive testing techniques can facilitate the assessment of infrastructure facilities (at reduced cost), often permitting testing by an agent other than the operator such as the owner or regulator. Remotely controlled devices for inspecting pipe networks and the shift from analog to digital telephone switching have greatly simplified and reduced maintenance costs. Electronic information systems, including geographic mapping, improve the planning and design of investments and the coordination of network operations.
28) Kingdom Global Infrastructure Agency will fund and support Technologies that are clearly more efficient, robust, and flexible than earlier methods enable developing countries to "leapfrog" sectoral transitions experienced earlier by high-income countries.
29) Kingdom Global Infrastructure Agency will fund and support an enhanced understanding of the relative strengths and weaknesses of governments and markets, is also creating opportunities for reform of infrastructure provision. In the 1980s, the efforts of many countries to reduce the size of their overextended public sectors led to a better realization of what governments and markets can and cannot do.
30) Kingdom Global Infrastructure Agency will fund and support Worldwide liberalization of markets and experiments with different forms of private sector participation in many sectors have provided a new body of experience to reinforce this pragmatic attitude. Theoretical and institutional advances have also revealed when regulation is necessary and how to refine its application.
31) Kingdom Global Infrastructure Agency will fund and support for infrastructure provision to local governments, to increase participation, and to foster self-help. Awareness that the poor (and future generations) are constituencies that must be answered to has stimulated a search for alternative ways of providing services or managing demands so as to broaden access while avoiding environmental problems. Relatively simple changes in design parameters for sewerage and improved design of latrines have made sanitation affordable to low-income communities while permitting private initiatives in financing, maintenance, and manufacture of parts. An increasing range of technical, economic, and institutional alternatives to conventional wastewater treatment can reduce the need for costly filtration plants.

32) Kingdom Global Infrastructure Agency will fund and support Countries to adopting alternatives to large-surface schemes in irrigation such as drip, bubble, and sprinkler systems and low-level canals with low-lift pumpsthat are highly responsive to farmers' needs for water and are also environmentally sustainable. There is renewed interest in nonmotorized means of transport, including bicycles and hand carts, and simple road improvements that enhance mobility in both rural and urban areas. Recognition of the need to conserve scarce resources has led to efforts to avoid unnecessary infrastructure investmentsfor example, by promoting recycling and recovery of solid waste materials; reducing waste and effluents at the source; and managing demand for water, power, and transport Industrial and developing countries are learning from each other in these areas.
33) Kingdom Global Infrastructure Agency will fund and support irrigation project was introduced, distributing hectares of irrigated land to farming households. An explicit intention of the project was to improve the economic status of the female cultivators by raising their incomes from higher yields.
34) Kingdom Global Infrastructure Agency will fund and support By providing guarantees to private operators and municipalities that help them to secure loans from commercial lenders, the government's guaranty facility will create longer-term financing. With increased lending to local government, it will soon be possible to establish credit ratings for cities and to allow them to issue bonds.
35) Kingdom Global Infrastructure Agency will fund and support primary beneficiaries of loan guarantees for investments in wastewater treatment, solid waste collection and disposal, and potable water supply.
36) Kingdom Global Infrastructure Agency will fund and support Guaranty Facility for financing environmental infrastructure. This facility will not lend directly to infrastructure projects but will guarantee private loans to municipalities and private operators.
37) Kingdom Global Infrastructure Agency will fund and support The main institutional options for provision of infrastructure Function Option

38) Kingdom Global Infrastructure Agency will fund and support provide smaller scale infrastructure such as village feeder roads, water supply and sanitation, and canals, or small scale power generation off the national grid can provide effective and affordable service in many areas, when those who contribute to the costs are the primary beneficiaries. Community self-help schemes must be selected, designed, and implemented locally not imposed from outside.

39) Kingdom Global Infrastructure Agency will fund and support The marketability of telecommunication services is high, especially for long distance and value-added services such as data transmission. Falling transmission and switching costs, technological innovations (such as wireless services), and changing patterns of demand have strongly boosted the competitive potential of the telecommunications industry for most services, including in many cases local telephony. Private provision is appropriate in countries that have the capacity to provide the necessary regulatory framework. Concessions with regulatory constraints embodied in contracts are attractive alternatives in countries where independent regulatory capacity is unlikely to be effective.

40) Kingdom Global Infrastructure Agency will fund and support Market liberalization, like privatization, puts pressure on existing service providers to be more efficient and more responsive to consumers. The transition from state-owned monopoly to multiple operators requires new attention to regulation. Preventing the dominant operator from abusing its market power (by restricting output and underpricing competitive services) requires proper accounting and disclosure requirements, performance targets, and incentive-based price controls.

41) Kingdom Global Infrastructure Agency will fund and support Thermal generation Transmission Distribution Gas production, transmission Rail bed and stations Rail freight and passenger services Urban bus Urban rail Rural roads Primary and secondary roads Urban roads Port and airport facilities Port and airport services Urban piped network Nonpiped systems Piped sewerage and treatment Condominial sewerage On-site disposal Collection Sanitary disposal Primary and secondary networks Tertiary (on-farm)

42) Kingdom Global Infrastructure Agency will fund and support Natural gas potentially be competitively supplied in many countries. Often, natural gas production is vertically integrated with petroleum production that is under public ownership. Unbundling is required to permit competitive production under concessions, contracts, or private ownership. The main regulatory issue is to ensure competitive access of producers to the transmission pipeline. That assurance can be handled by a regulatory body or through contract terms in leases or concessions. Competition from substitute fuels (when realistically priced) can provide sufficient market discipline to obviate the need to regulate gas prices. Private (foreign) investment has considerable potential to meet investment needs for gas production and distribution, provided that noncommercial risks related to the heavy foreign exchange requirement of projects can be reduced. Water and waste Activities involving water and waste all have strong environmental links that make them less marketable than telecommunications or energy, and their local nature makes some activities natural candidates for community provision.
43) Kingdom Global Infrastructure Agency will fund and support Urban piped water and sewerage at the municipal or metropolitan level should be provided by enterprises run on commercial principles. Professional management accountable to users and having clear incentives for providing high-quality, reliable services and efficient asset management is also desirable. The responsibilityof government in such situations is, at minimum, to ensure commercial operation, which can be achieved through delegation to a private company via a management, lease, or concession contract. Public oversight is necessary to ensure access for low-income users and to protect public health and environmental quality. In countries with modest technical capacity, concessions can successfully draw on international expertise. Pricing water to reflect the full financial, environmental, and economic costs of supply is essential for generating funds to expand service and for promoting efficient use.
44) Kingdom Global Infrastructure Agency will fund and support approach to developing sanitation. First, contracting schemes, such as concessions, can apply commercial management to sanitation facilities in urban areas. Second, in poorer urban and rural communities which are unlikely to be connected to the formal supply systems in the foreseeable future, intermediate technology can be adapted to match users' service requirements and their willingness to pay. These lower-cost tertiary systems (facilities directly serving end-users, described in Chapter 4) can be chosen, financed, and operated by the community with technical assistance. The trunk infrastructure to which the tertiary systems connect and the associated treatment facilities remain the direct responsibility in planning, financing, and operationof the sector utilities concerned.
45) Kingdom Global Infrastructure Agency will fund and support The policy agenda for irrigation works also varies according to the characteristics and scale of the systems involved, but it is much the same across country groups. The operation of trunk and feeder facilities can increasingly be handled by financially autonomous entities, while the ownership and operation of tertiary systems may be best devolved to user associations or cooperatives.
46) Kingdom Global Infrastructure Agency will fund and support This solution improves both maintenance and the collection of water charges two perennial problems in many irrigation systems.

And any other projects deemed to be Infrastructure oriented.

QUOTES

There is a huge need and a huge opportunity to get everyone in the world connected, to give everyone a voice and to help transform society for the future. The scale of the technology and infrastructure that must be built is unprecedented, and we believe this is the most important problem we can focus on. - Mark Zuckerberg
We can only create good jobs if we make smarter investments in infrastructure and do more to support small businesses, not stiff them. - Michael Bloomberg
The objective I propose is quite simple to state: to foster the infrastructure of democracy - the system of a free press, unions, political parties, universities - which allows a people to choose their own way to develop their own culture, to reconcile their own differences through peaceful means. - Ronald Reagan

Infrastructure web services had to happen. - Jeff Bezos
When it comes to space, I see it as my job, I'm building infrastructure the hard way. I'm using my resources to put in place heavy lifting infrastructure so the next generation of people can have a dynamic, entrepreneurial explosion into space. - Jeff Bezos
You cannot make a giant space company in your dorm room. Not today. And the reason is that the heavy lifting infrastructure isn't in place. - Jeff Bezos
Two kids in their dorm room can't start anything important in space today. That's why I want to take the assets I have from Amazon and translate that into the heavy-lifting infrastructure that will allow the next generation to have dynamic entrepreneurialism in space, to build that transportation network. - Jeff Bezos
There's 20 companies that I have investments in - some batteries, some solar-thermal, one big nuclear thing. We need hundreds and hundreds of companies like that, so that in a 20-year time frame we really are starting to change the energy infrastructure. - Bill Gates
People want to watch whatever video they want to watch whenever they want to watch. If you provision your Internet infrastructure adequately, you can do that. - Bill Gates
The highly functional infrastructure that surrounds us, particularly in the West, is a gift from our ancestors: the comparatively uncorrupt political and economic systems, the technology, the wealth, the lifespan, the freedom, the luxury, and the opportunity. - Jordan Peterson
The smart way to improve broadband is not to junk the existing network but to make the most of it. It's to let a competitive market deliver the speeds that people need at an affordable price with government improving infrastructure in the areas where market competition won't deliver it. - Tony Abbott

What charitable 1 percenters can't do is assume responsibility - America's national responsibilities: the care of its sick and its poor, the education of its young, the repair of its failing infrastructure, the repayment of its staggering war debts. - Stephen King
The whole infrastructure of air travel was, and is, part of government policy. It is not a natural development of a free economic system - at least not in the way that is claimed. The same is true of the roads, of course. - Noam Chomsky

Move fast with stable infrastructure. - Mark Zuckerberg
Science is definitely part of America's infrastructure, the engine of prosperity. And yet science is given almost no visibility in the media. - Michio Kaku

What made Manhattan Manhattan was the underground infrastructure, that engineering marvel. - Andrew Cuomo

On the back end, software programming tools and Internet-based services make it easy to launch new global software-powered start-ups in many industries - without the need to invest in new infrastructure and train new employees. - Marc Andreessen
In terms of job creation, every billion dollars invested in the physical infrastructure creates 47,000 new jobs. - Bernie Sanders
First, our focus on security is on the infrastructure itself. So it is all about how you protect the network, the device, and the application that is riding on the server. - John W. Thompson

The wealthiest Americans often live as though they and their children had nothing to gain from investments in education, infrastructure, clean-energy, and scientific research. - Sam Harris
We can put millions of America's idle young people to work helping to repair and restore America's deteriorating infrastructure, public utilities, and transportation systems. Nothing would revitalize the nation's sagging economy more than such a commitment. - Bernice King

In 2008 we came perilously close to killing money, exposing in the process how out of date money's infrastructure has become. - Douglas Coupland

Money is more than a massively consensual IOU note. It is a piece of infrastructure and is as artificial as Interstate 5, NutraSweet or season three of 'Mad Men.'
Douglas Coupland
America used to be a uniquely productive, low-cost place to do business. We had efficient infrastructure. We had limited regulation. We believed in the market. - Michael Porter
Most larger companies now see that for the market to grow, Web infrastructure must be royalty-free. - Tim Berners-Lee

CONCLUDE BY SHARING SOME FOOD FOR THOUGHT FROM PROMINENT PEOPLE WHO EXPERIENCED BLESSINGS , FAVOUR FROM GENEROSITY TOWARDS HUMANITY AND HAD THIS TO SAY

"We make a living by what we get, But we make a life by what we give." Winston Churchill

"Be the change you want to see in the world." Mahatma Gandhi

"The life of a man consists not in seeing visions and in dreaming dreams, but in active charity and in willing service" Henry Wadsworth Longfello

"Service to others is the rent you pay for your room here on earth." Muhammad Ali

"He who wished to secure the good of others, Has already secured his own." Confucius

"Where there is charity and wisdom, There is neither fear nor ignorance." St. Francis of Assisi

"Every good act is charity. A man's true wealth hereafter is the good that he does in this world to his fellows." Moliere

"If you haven't any charity in your heart, You have the worst kind of heart trouble." Bob Hope

"Charity begins at home, but should not end there" Proverb

"Charity sees the need, not the cause" German Proverb

"May your charity increase as much as your wealth" Proverb

"He who opens a school door, closes a prison." Victor Hugo

"The work of volunteers impacts on all our lives, Even if we are not aware of it." Anthony Worrall-Thompson

"Good actions give strength to ourselves and inspire good actions in others." Plato *"An effort made for the happiness of others lifts us above ourselves."* Mrs. Lydia Maria Child

"We cannot do great things on this Earth, Only small things with great love." Mother Teresa

"Happiness is not something ready made. It comes from your own actions." Dalai Lama

"The way you get meaning into your life is to devote yourself to loving others, devote yourself to your community around you, and devote yourself to creating something that gives you purpose and meaning." Mitch Albom

"Every man must decide whether he will walk in the light of creative altruism or in the darkness of destructive selfishness." Martin Luther King, Jr.

"Generosity consists not the sum given, But the manner in which it is bestowed" Mahatma Gandhi

"The best way to find yourself Is to lose yourself in the service of others." Mahatma Gandhi

"The difference between what we do and what we are capable of doing would suffice to solve most of the world's problems" Mahatma Gandhi

"You may never know what results come of your action, But if you do nothing there will be no result" Mahatma Gandhi

"Pray for the dead. And fight like hell for the living!" Mother Jones

"Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it's the only thing that ever has." Margaret Mead

"As one person I cannot change the world, But I can change the world of one person." Paul Shane Spear

*"Never take more out of life, than you intend to give back."*Robert M. Hensel

*When it comes to charity; many people stop at nothing.....*Anon

"If you do things well, do them better.Be daring, be first, be different, be just." Anita Roddick

"I want to work for a company that contributes to and is part of the community. I want something not just to invest in. I want something to believe in." Anita Roddick

"To succeed you have to believe in something with such a passion that it becomes a reality." Anita Roddick

"The end result of kindness is that it draws people to you." Anita Roddick

"If you think you're too small to have an impact, Try going to bed with a mosquito." Anita Roddick

"There can be no Faith where there is no charity" Charles Caleb Colton

*"Every charitable act is a stepping stone towards heaven."*Henry Ward Beecher

"Do all the good you can,By all the means you can, In all the ways you can, In all the places you can, At all the times you can, To all the people you can, As long as ever you can." John Wesley

"Christian life consists of faith and charity" Martin Luther

"As the purse is emptied the heart is filled." Victor Hugo

"Do your little bit of good where you are; It's those little bits of good put together that overwhelm the world." Archbishop Desmond Tutu

"Nothing will work unless you do!" Maya Angelou

"There is no exercise better for the heart than reaching down and lifting people up."
— John Holmes

"You give but little when you give of your possessions. It is when you give of yourself that you truly give."
— Kahlil Gibran, the Prophet

"Generosity is giving more than you can, and pride is taking less than you need."
"You have not lived today until you have done something for someone who can never repay you."
— John Bunyan

"The most truly generous persons are those who give silently without hope of praise or reward."
— Carol Ryrie Brink, Caddie Woodlawn's Family

"A kind gesture can reach a wound that only compassion can heal."
— Steve Maraboli, Life, the Truth, and Being Free

"Give a bowl of rice to a man and you will feed him for a day. Teach him how to grow his own rice and you will save his life."
— Confucius

"That's what I consider true generosity: You give your all, and yet you always feel as if it costs you nothing."
— Simone de Beauvoir

"When will our consciences grow so tender that we will act to prevent human misery rather than avenge it?"
— Eleanor Roosevelt

“I care not for a man's religion whose dog and cat are not the better for it.”
— Abraham Lincoln

“For it is in giving that we receive.”
— Francis of Assisi

“Give what you have. To someone, it may be better than you dare to think.”
— Henry Wadsworth Longfellow

“Generosity is not in giving me that which I need more than you do, but it is in giving me that which you need more than I do.”
— Kahlil Gibran, Sand and Foam

“Do not neglect to show hospitality to strangers, for by doing that some have entertained angels without knowing it.”
— Anonymous, Holy Bible: King James Version

“Be practical as well as generous in your ideals. Keep your eyes on the stars, but remember to keep your feet on the ground.”
— Theodore Roosevelt

“Silence the angry man with love. Silence the ill-natured man with kindness. Silence the miser with generosity. Silence the liar with truth.”
— Gautama Buddha

“Every sunrise is an invitation for us to arise and brighten someone's day.”
— Richelle E. Goodrich, Smile Anyway

“I come in a world of iron…to make a world of gold”
— Dale Wasserman, Man of La Mancha

“You make all kinds of mistakes, but as long as you are generous and true and also fierce, you cannot hurt the world or even seriously distress her.”
— Winston S. Churchill

“You can't live a perfect day without doing something for someone who will never be able to repay you.”
— Debbie Macomber, One Simple Act: Discovering the Power of Generosity

“But I give best when I give from that deeper place; when I give simply, freely and generously, and sometimes for no particular reason. I give best when I give from my heart.”
— Steve Goodier

“[G]iving yourself some loving attention is not selfish. It is sensible. If you feel loved and cherished--even if it is only by yourself--then you will have more love to give to others, too. (83)”
— Penelope Quest, Reiki for Life: A Complete Guide to Reiki Practice

"If truth doesn't set you free, generosity of spirit will."
— Katerina Stoykova Klemer

"Generosity is the most natural outward expression of an inner attitude of compassion and loving-kindness."
— Dalai Lama XIV

"When it comes to giving, some people stop at nothing."
— Vernon McLellan

"Generosity needs no logrolling."
— Toba Beta, My Ancestor Was an Ancient Astronaut

"Be generous with your kindness, with your love"
— Akiroq Brost

"Happiness is the ultimate inner experience of living with generosity, love, kindness, compassion, and gratitude."
— Debasish Mridha

"Your wealth is measured by your ability to give not your ability to receive."
— Avina Celeste

Here's where the real power of generosity comes in. Often, the more we give, the more we receive.
Author: Debbie Macomber

Cultivating the habit of good deeds will not only affect those around us, it will improve our own emotional well being. Author: Debbie Macomber

"Rivers don't drink their own waters; trees don't eat their own fruits. The salt seasons the soup in order to have its purpose fulfilled. Live for others!"
Israelmore Ayivor, Leaders' Watchwords

I wondered why somebody didn't do something. Then I realized, I am the somebody the world was waiting.
Unknown

I feel that the greatest reward for doing is the opportunity to do more.
Dr. Jonas Salk

We make a living by what we get, but we make a life by what we give.
Winston Churchill

Be who God meant you to be and you will set the world on fire through generosity.

St. Catherine of Siena

How wonderful that no one need wait a single moment to improve the world. Make the world better as you have opportunity any opportunity through valuable dreams
Anne Frank

I've seen and met angels wearing the disguise of ordinary people living ordinary lives but doing great things to humanity for generations.
Tracy Chapman

Go out into the world and do good until there is too much good in the world.
Larry H. Miller

Go into the world and do well. But more importantly, go into the world and do good.
Minor Myers

Never believe that a few caring people can't change the world. For, indeed, that's all that the world a few people with the right vision and ideas to touch the hurting.
Margaret Mead

In a gentle way, you can shake the world.
Mahatma Gandhi

I have one life and one chance to make it count for something… My faith demands that I do whatever I can, wherever I am, whenever I can, for as long as I can with whatever I have to try to make a difference.
Jimmy Carter

It takes each of us to make to a difference for the world and humanity.
Jackie Mutcheson

It is the greatest of all mistakes to do nothing because you can only do little – do what you can.
Sydney Smith

We must become the change we want to see in the world.
Mahatma Gandhi

The best things in life aren't things. But they are big to the needy who receive them.
Art Buchwald

Plant flowers in others' gardens and your life becomes a bouquet!
Unknown

Live today the way you want to be remembered tomorrow.
Dillon Burroughs

When I chased after money, I never had enough. When I got my life on purpose for humanity I was fulfilled and focused on giving of myself and everything that arrived into my life, then I was prosperous. Wayne Dyer

Never get tired of doing little things for others. Sometimes, those little things occupy the biggest part of their hearts.
A wiseman

We can do no great things – only small things with great love in generosity to transform the world
Mother Teresa

As we work to create light for others, we naturally light our own way.
Mary Anne Radmacher

If there is to be any peace it will come through being of value to others, not having by having only.
Henry Miller

Act as if what you do makes a difference. It does for sure if directed to the needy to empower and develop the work.
William James

When you cease to make a contribution, you begin to die.
Eleanor Roosevelt

Unless someone like you cares a whole awful lot, nothing is going to get better. It's not.
Dr. Seuss

Go the extra mile to reach and empower the needy. It's never crowded.
Unknown

Money often costs too much. If it is left behind without impacting the world, it is just like paper
— Ralph Waldo Emerson

Be not simply good; be good for something to impact others and humanity.
Henry David Thoreau

Scientists have discovered that the small, brave act of cooperating with another person, of choosing trust over cynicism, generosity over selfishness, makes the brain light up with quiet joy.
Natalie Angier

It's good to be blessed. It's better to be a blessing.
Unknown

Help one another; there's no time like the present and no present like the time.
James Durst

The great use of life is to spend it for something that outlasts it.
William James

Anyone who thinks that they are too small to make a difference has never tried to fall asleep with a mosquito in the room.
Christine Todd Whitman

Your thoughts, words and deeds are painting the world around you. Implement them to change the world
Jewel Diamond Taylor

We have it in our power to change the world over.
Thomas Paine

I am only one, but I am one. I cannot do everything, but I can do something. And I will not let what I cannot do interfere with what I can do.
Edward Everett Hale

Even if you're on the right track, you'll get run over if you just sit there and do nothing. Do something for humanity
Will Rogers

The true meaning of life is to plant trees, under whose shade you do not expect to sit or enjoy others and the world will.
Nelson Henderson

If the world seems cold to you, kindle fires to warm it through generosity.
Lucy Larcom

Every piece of the universe, even the tiniest little snow crystal, matters somehow. I have a place in the pattern, and so do you.
T.A. Barron

Nobody made a greater mistake than he who did nothing because he could only do a little.
Edmund Burke

It is the heart that does the giving; the fingers only let go.
Nigerian saying

If you want to touch the past, touch a rock. If you want to touch the present, touch a flower. If you want to touch the future, touch a life.
Unknown

The best way to find yourself, is to lose yourself in the service of others.
Mahatma Gandhi

I've learned that you shouldn't go through life with a catchers mitt on both hands. You need to be able to throw something back.
Maya Angelou

One is not born into the world to do everything but to do something.
Henry David Thoreau

What counts in life is not the mere fact that we have lived. It is what difference we have made to the lives of others that will determine the significance of the life we lead.
Nelson Mandela

Service to others is the rent you pay for your room here on earth.
Mohammed Ali

I have been impressed with the urgency of doing. Knowing is not enough; we must apply. Being willing is not enough, we must do.
Leonardo da da Vinci

If you can't feed a hundred people, then feed just one.
Mother Teresa

Thousands of candles can be lighted from a single candle, and the life of the candle will not be shortened. Happiness never decreases by being shared.
Buddha

"A false friend and a shadow attend only while the sun shines.
Ben Franklin (1706-1790)

"A thing is bigger for being shared.
Gaelic (on generosity)

"Give even an onion, graciously.
Afghan (on generosity)

"Great spenders are bad lenders.
Ben Franklin (1706-1790)

"If you have, give; if you lack, seek.
Malay (on generosity)

"It is better to return a borrowed pot with a little something you last cooked in it.
Omaha (Native American) (on the conduct of life)

“It is said that you can't take it with you; I say there are two things you can take with you: the things you do for others and the things you do to others
(harold h. cornett, jr.)

“Nice words are free, so choose ones that please another's ears.
Vietnamese (on courtesy and respect)

“No act of kindness no matter how small is ever wasted.
Aesop (c.620-560 BC)

“Nothing is impossible to the generous willing heart.
John Heywood (c.1497-1580)

“One good turn deserves another.
Aesop (c.620-560 BC)

“Scatter with one hand; gather with two.
Welsh (on thrift)

“What you do to others will bear fruit in you.
Singhalese (on generosity)

“Without kindness there can be no true joy.
Thomas Carlyle (1795-1881)

“You catch more flies with honey than you do with vinegar.
Ben Franklin (1706-1790)

“You may light another's candle at your own without loss.
Danish (on generosity)

“Real generosity toward the future lies in giving all to the present.
Albert Camus

“True generosity is an offering; given freely and out of pure love. No strings attached. No expectations.
Suze Orman

“Real generosity is doing something nice for someone who will never find out.
Frank A. Clark

“Generosity is not giving me that which I need more than you do, but it is giving me that which you need more than I do.
Khalil Gibran

“Generosity is nothing else than a craze to possess. All which I abandon, all which I give, I enjoy in a higher manner through the fact that I give it away. To give is to enjoy possessively the object which one gives.
Jean-Paul Sartre

“Giving frees us from the familiar territory of our own needs by opening our mind to the unexplained worlds occupied by the needs of others.
Barbara Bush

"Gentleness, self-sacrifice and generosity are the exclusive possession of no one race or religion."
Mahatma Gandhi

"There is no exercise better for the heart than reaching down and lifting people up."
John Holmes

"Generosity is giving more than you can, and pride is taking less than you need."
Steve Maraboli

"Goodness is about character - integrity, honesty, kindness, generosity, moral courage, and the like. More than anything else, it is about how we treat other people."
Dennis Prager

"True generosity is an offering; given freely and out of pure love. No strings attached. No expectations. Time and love are the most valuable possession you can share."
Suze Orman

"That's what I consider true generosity: You give your all, and yet you always feel as if it costs you nothing."
Simone de Beauvoir

"I am a generous man, by nature, and far more trusting than I should be. Indeed. The real world is risky territory for people with generosity of spirit. Beware."
Hunter S. Thompson

"To practice five things under all circumstances constitutes perfect virtue; these five are gravity, generosity of soul, sincerity, earnestness, and kindness."
Confucius

"You give but little when you give of your possessions. It is when you give of yourself that you truly give."
Kahlil Gibran

"Sustainability, ensuring the future of life on Earth, is an infinite game, the endless expression of generosity on behalf of all."
Paul Hawken

"Generosity could be as contagious as the zombie plague as long as enough people were willing to be carriers."
Jonathan Maberry

"Money is but one venue for generosity. Kindness is an even more valuable currency."
Alan Cohen

"The value of a man resides in what he gives and not in what he is capable of receiving."
Albert Einstein

"Think of giving not as a duty but as a privilege."
John D. Rockefeller Jr.

"Believe, when you are most unhappy, that there is something for you to do in the world. So long as you can sweeten another's pain, life is not in vain."
Helen Keller

"You will discover that you have two hands. One is for helping yourself and the other is for helping others."
Audrey Hepburn

"Since you get more joy out of giving joy to others, you should put a good deal of thought into the happiness that you are able to give."
Eleanor Roosevelt

"No person was ever honored for what he received. Honor has been the reward for what he gave."
Calvin Coolidge

"Remember that there is no happiness in having or in getting, but only in giving. Reach out. Share. Smile. Hug. Happiness is a perfume you cannot pour on others without getting a few drops on yourself."
Og Mandino

"Give what you have. To someone, it may be better than you dare to think."
Henry Wadsworth Longfellow

"Minds, nevertheless, are not conquered by arms, but by love and generosity."
Baruch Spinoza

"There is overwhelming evidence that the higher the level of self-esteem, the more likely one will be to treat others with respect, kindness, and generosity."
Nathaniel Branden

"Real generosity toward the future lies in giving all to the present."
Albert Camus

"The best way to find yourself, is to lose yourself in the service of others."
Mahatma Gandhi

"Ah! What pleasure it must be to a woman to suffer for the one she loves!"
Honoré de Balzac

"If we are going to be kind, let it be out of simple generosity, not because we fear guilt or retribution."
J.M. Coetzee

"The wise man does not lay up his own treasures. The more he gives to others, the more he has for his own."
Lao Tzu

"Humanity is the virtue of a woman, generosity that of a man."
Adam Smith

"Pride only helps us to be generous; it never makes us so, any more than vanity makes us witty."
George Eliot

"Generosity is not giving me that which I need that you do, but it is giving me that which you need more that I do."
Kahlil Gibran
gautama Buddha

"Silence the angry man with love. Silence the ill-natured man with kindness. Silence the miser with generosity. Silence the liar with truth."
Gautama Buddha

"When you win and the other fellow loses, what do you see? A losing face. There is great joy in losing and making the other person win and have a happy face. Who will be the happiest person? The one who brings happiness to others."
Swami Satchidananda

"But I give best when I give from that deeper place; when I give simply, freely and generously, and sometimes for no particular reason. I give best when I give from my heart."
Steve Goodier

"What we have done for ourselves alone dies with us; what we have done for others and the world remains and is immortal."
Albert Pike

"I expect to pass through this world but once; any good thing therefore that I can do, or any kindness that I can show to any fellow creature, let me do it now; let me not defer or neglect it, for I shall not pass this way again."
Etienne de Grellet

"We should give as we would receive, cheerfully, quickly, and without hesitation; for there is no grace in a benefit that sticks to the fingers."
Seneca

"When you become detached mentally from yourself and concentrate on helping other people with their difficulties, you will be able to cope with your own more effectively. Somehow, the act of self-giving is a personal power-releasing factor."
Norman Vincent Peale

"Listen with regard when others talk. Give your time and energy to others; let others have their own way; do things for reasons other than furthering your own needs."
Larry Scherwitz

"The greatest gift you ever give is your honest self."
Fred Rogers

"I gave you all my secrets and you lost them all. You lost a lot of things.
But the treasure of it was in the giving, not the keeping."
Julio-Alexi Genao

"Unless we think of others and do something for them, we miss one of the greatest sources of happiness."
Ray Lyman Wilbur

give a bowl of rice
"Give a bowl of rice to a man and you will feed him for a day. Teach him how to grow his own rice and you will save his life. "
Confucius

"Generosity is giving more than you can, and pride is taking less than you need."
Steve Maraboli

"Goodness is about character - integrity, honesty, kindness, generosity, moral courage, and the like. More than anything else, it is about how we treat other people."
John Bunyan

"To practice five things under all circumstances constitutes perfect virtue; these five are gravity, generosity of soul, sincerity, earnestness, and kindness."

"Listen with regard when others talk. Give your time and energy to others; let others have their own way; do things for reasons other than furthering your own needs."
Larry Scherwitz

"Unless we think of others and do something for them, we miss one of the greatest sources of happiness."
Ray Lyman Wilbur

“Generosity could be as contagious as the zombie plague as long as enough people were willing to be carriers.
Jonathan Maberry

“It takes generosity to discover the whole through others. If you realize you are only a violin, you can open yourself up to the world by playing your role in the concert.
Jacques-Yves Cousteau

“Being generous often consists of simply extending a hand. That's hard to do if you are grasping tightly to your righteousness, your belief system, your superiority, your assumptions about others, your definition of normal.
Patti Digh

“Sometimes when we are generous in small, barely detectable ways it can change someone else's life forever.
Margaret Cho

“What we have done for ourselves alone dies with us; what we have done for others and the world remains and is immortal.
Albert Pike

“He who cannot give anything away cannot feel anything either.
Friedrich Nietzsche

“Be generous with kindly words, especially about those who are absent.
Johann Wolfgang von Goethe

“Every man must decide whether he will walk in the light of creative altruism or in the darkness of destructive selfishness.
Martin Luther King, Jr.

“Generosity consists not the sum given, but the manner in which it is bestowed
Anonymous

“One would give generous alms if one had the eyes to see the beauty of a cupped receiving hand.
Johann Wolfgang von Goethe

“Many men have been capable of doing a wise thing, more a cunning thing, but very few a generous thing
Alexander Pope

“It is through generous giving, that we affirm before the world, our nation's faith in the inalienable right of every man, to a life of freedom, justice and security.
Harry S. Truman

“Giving is God's way. It is the way that I now understand is the truth of the Universe. Giving multiplies me and makes me feel complete and fulfilled. Giving makes me feel that I make a real and important difference.
Mark Victor Hansen and Robert G. Allen

“Too many have dispensed with generosity in order to practice charity.
Albert Camus

“It is a powerful practice to be generous when you are the one feeling in need.
Allan Lokos

“As desire abates, generosity is born. When we are connected and present, what else is there to do but give?
Jack Kornfield

“Generosity during life is a very different thing from generosity in the hour of death; one proceeds from genuine liberality and benevolence, the other from pride or fear.
Horace Mann

“Never measure your generosity by what you give, but rather by what you have left behind.
Bishop Fulton J. Sheen

“Generosity is the flower of justice.
Nathaniel Hawthorne

“The most powerful thought is a prayerful thought. When I'm praying for you, I am praying for my own peace of mind. I can only have for myself what I am willing to wish for you.”
Marianne Williamson

“People can copy anything; your mode of dressing, the way you talk, walk, dance, sing, cry, but they will find it very hard to imitate the way you donate money.”
Michael Bassey Johnson

“Generous leaders are servant leaders. They always come with open hands and an open heart.”
Farshad Asl, The "No Excuses" Mindset: A Life of Purpose, Passion, and Clarity

“The heart is a generous muscle.”
Sharon Salzberg, Real Love: The Art of Mindful Connection

“If you’re in a position to lift someone off the ground;
i. Say nothing about what it cost you to
ii. Don’t remind them that they were once on the ground

iii. Don't be the one to take them back to the ground"
Chinonye J. Chidolue

"One of the effects of the gospel going deeper into our souls is that it frees our fingers to loosen their grasp on our goods."
David Mathis, Habits of Grace: Enjoying Jesus through the Spiritual Disciplines

"He who is not liberal with what he has, does but deceive himself when he thinks he would be liberal if he had more"
William Swan Plumer

"If we stretch ourselves to open our minds, to see our shared humanity with others, we allow ourselves to see the existence of community and generosity in unexpected places."
Sharon Salzberg, Real Love: The Art of Mindful Connection

"If we have nothing material to give, we can offer our attention, our energy, our appreciation. The world needs us. It doesn't deplete us to give."
Sharon Salzberg, Real Love: The Art of Mindful Connection

"Love is defined by difficult acts of human compassion & generosity."
Sharon Salzberg, Real Love: The Art of Mindful Connection

"Sacrifice" and "self" both begin with the same letter, but the spelling is way different after that."
Craig D. Lounsbrough

"God commands both individuals and the society in which they live to be generous and always take care of the poor. In such a community, shalom has a chance to thrive. In such a community, God will actually be glad to assign his name and dwell."
Randy S. Woodley

"Remember to be your brother's keeper Always"
Ernest Agyemang Yeboah

"I am selfish by habit, but sacrificial by nature. Therefore, I'd be wise to develop the habit of following my nature."
Craig D. Lounsbrough

"I don't play head games… I come from a family that could easily be called Generous to a fault."
Genereux Philip

"Generous leaders have faith in others to succeed. In turn, they receive tenfold loyalty, commitment, and a positive outcome."
Farshad Asl, The "No Excuses" Mindset: A Life of Purpose, Passion, and Clarity

"If you are truly concerned about helping people and creating value for them in your business and life. God will take care of you, and the universe will reward you."
Bernard Kelvin Clive

“Give to others whatever you need to receive. At the very least, you'll be making the world a better place for whoever you grace with your gifts. I bet that will feel wonderful and fill your heart. A full and rich heart will cure almost anything.”
Akiroq Brost

Never worry about numbers. Help one person at a time and always start with the person nearest you.
Mother Teresa

The poor are great! The poor are wonderful! The poor are very generous! They give us much more than what we give them.
Mother Teresa

Kind words can be short and easy to speak, but their echoes are truly endless.
Mother Teresa

If you can't feed a hundred people, then feed just one.
Mother Teresa

Give your hands to serve and your hearts to love.
Mother Teresa

Riches, both material and spiritual, can choke you if you do not use them fairly. For not even God can put anything in a heart that is already full.
Mother Teresa

“The Dead Sea in the Middle East receives fresh water, but it has no outlet, so it doesn't pass the water out. It receives beautiful water from the rivers, and the water goes dank. I mean, it just goes bad. And that's why it is the Dead Sea. It receives and does not give. In the end generosity is the best way of becoming more, more, and more joyful.”
Desmond Tutu, The Book of Joy: Lasting Happiness in a Changing World

“Stars shine even for those who refuse to look up.”
Matshona Dhliwayo

“If I am not touching a life, I am not touching life.”
Craig D. Lounsbrough

“...The happy Warrior... is the generous Spirit, who, when brought among the tasks of real life, hath wrought upon the plan that pleased his boyish thought: whose high endeavors are an inward light that makes the path before him always bright.”
William Wordsworth, Character of the Happy Warrior

“The greatest dividends in life are those that we give away.”
Craig D. Lounsbrough

"If sacrifice is not the theme of my life, there's no sense telling the story."
Craig D. Lounsbrough

"To calculate sacrifice is to attempt to sacrifice safely, and safe sacrifice is one of the most outrageous oxymoron's I can think of."
Craig D. Lounsbrough

"Abundance in life comes from generosity."
Debasish Mridha

"Humility, gratitude, and generosity – three things you can never go wrong with."
Kevin J. Donaldson

"Generosity is a strength, not a weakness."
Farshad Asl, The "No Excuses" Mindset: A Life of Purpose, Passion, and Clarity

"Society's collective fear of love must be faced if we are to lay claim to a love ethic that can inspire us and give us the courage to make necessary changes."
bell hooks, All About Love: New Visions

"Generosity does not come from wealth. Wealth comes from the flowers of Generosity."
Debasish Mridha

"It's important that the satisfaction of our giving be our giving."
Kelly Corbet, Already Here: The Matter of Love

"Abundance of life does not come from having a great job. Abundance comes from generosity."
Debasish Mridha

"My reason to live is to love, my reason to get is to give. - The Lord is my witness."
Nurudeen Ushawu

"When you begin to overlook the routine act of kindness given by a generous & caring soul, you unwittingly halt your blessings"
Bernard Kelvin Clive

"I cannot live my life striving only for my own security, I can only feel secure when I see myself useful in other people's life."
Nurudeen Ushawu

"The Bible consistently and directly indicates that when we give generously, we're serving, honoring, and glorifying God. After all, generosity is fundamental to God's nature."
Craig Groeschel, Weird: Because Normal Isn't Working

"We can give away all that He entrusts to us in the same spirit of generosity."
Craig Groeschel, Weird: Because Normal Isn't Working

"No amount of money can fill your heart up with what kindness and compassion can."
Eileen Anglin

"Creative people depend on the generosity and graces of strangers."
Wayne Gerard Trotman

"Giving when you can is generosity.
Giving when you can't is sacrifice."
J.R. Rim

"Generosity opens the windows of heavenly blessings."
Lailah Gifty Akita

"You will only have what you give away."
Debasish Mridha

"Generous people are likely to receive more respect from their peers."
Arthur P. Ciaramicoli, The Stress Solution: Using Empathy and Cognitive Behavioral Therapy to Reduce Anxiety and Develop Resilience

"The Universe blesses a generous heart."
Eileen Anglin

"I love the tranquility, serenity, generosity, and the beauty of the ocean."
Debasish Mridha

"We appreciate things not for their beauty but for how they kindle our minds' generosity."
Debasish Mridha

"Quality depends on kindness. Beauty depends on simplicity. Joy depends on generosity."
Debasish Mridha

"Good deeds are seeds of generosity."
Lailah Gifty Akita, Pearls of Wisdom: Great mind

"If you want to live forever, give yourself away for others."
Debasish Mridha

“He who accumulates has little. He who gives away has much.”
Debasish Mridha

“Generosity is love.”
Lailah Gifty Akita

“To give to others is but sowing seed for ourselves.”
Charles Haddon Spurgeon, Morning and Evening, Based on the English Standard Version

“May we find more grace to do good deeds.”
Lailah Gifty Akita, Think Great: Be Great!

“Generosity is also marked by doing what one says one will do. Saadi teaches: ‘when the generous promise, they perform”
Idries Shah, Learning How to Learn: Psychology and Spirituality in the Sufi Way

“He that enjoys the ocean may rejoice, though some drugs may be taken from him.”
Charles Haddon Spurgeon, Lectures to My Students

“Even Karma rewards generosity. The good that you do must surely catch up with you!”
Chinonye J. Chidolue

“Every gift you give, will multiply a hundred-fold.”
Lailah Gifty Akita, Think Great: Be Great!

“The only wealth that mattered was affinity and generosity. Affinity towards oneself and generosity towards the world itself.”
Soroosh Shahrivar, The Rise of Shams

“Love is an active word.”
Lailah Gifty Akita, Think Great: Be Great!

“Show your compassion to people in their life time; no amount of your tears can serve as compensation when their coffins are lowered!”
Israelmore Ayivor, Daily Drive 365

“I have noticed that most times, the least that you give out is the best that someone really needs. So, don't always wait till you have something big to give before you do so! Someone's "big" is your "little"!”
Israelmore Ayivor, Daily Drive 365

“Generosity is a mark of bravery, so all Sioux boys were taught to be generous.”
Luther Standing Bear, My Indian Boyhood

“True kindness is not necessarily giving something to someone who is down, but showing them that they still have something to give to get back up.”

Charles F. Glassman, Brain Drain The Breakthrough That Will Change Your Life

"Give today to get better tomorrow."
Ashish Patel

"The rule for J.O.Y is Jesus, Others and You. You can't have a perfect joy if all you think about is about how to groom your life!"
Israelmore Ayivor, Leaders' Watchwords

"When we face death with hope, we can live life with generosity."
Henri J.M. Nouwen

"A man cannot own more than his heart can love."
Gabriele Corno

"The giver is always worth more than the gift."
Matshona Dhliwayo

"There aren't nearly enough worldly mansions for the kind folks who deserve them."
Bryant A. Loney, To Hear The Ocean Sigh

"It's not the depth of your intellect that will comfort you or transform your world. Only the richness of your heart and your generosity of spirit can do that"
Rasheed Ogunlaru

"Give thanks to the earth for the hospitality and generosity
Show gratitude for life, light and every little beauty."
Debasish Mridha

"Greed harms you: generosity helps you. This is why it has been said: 'Greed is the mother of incapacity'."
Idries Shah, Learning How to Learn: Psychology and Spirituality in the Sufi Way

"The best things to do with the best things in life is to give them away."
Dorothy Day

BLESSINGS AND COMMANDS FOR SUPPORTING CHARITY, EMPOWERMENT AND DEVELOPMENT OF HUMANITY

- *God created man to care in Eden; we need to care for others and the environment.*
- *We are called to mix our faith with works by showing physical attention to needy (James 2:14 -26).*
- *The commission of Jesus was to bring good tiding to broken hearted and needy.*
- *Encouragement is a full ministry in the bible that was with Ananias & Barnabas.*
- *Rahab though a prostitute was favoured to be in the genealogy of Jesus & was spared for her generosity towards the Israelites.*

- *Generosity brings Prosperity - (A generous soul will prosper those who water others will be watered. (Proverbs 11:24-25).*
- *Generosity to the needy is a good seed you will reap to generations. Do not grow weary to do good you will reap in due time. (Gal 6.9)*
- *God hears the prayers of those who show concern and bless the needy. Whoever ignores the*
- *Needy & the less fortunate, he himself will cry to God and God will not hear him.*
- *Proverbs 21:13 (Cornelius was heard UNSUALLY because of his generosity to the needy.Acts 10: 12).*
- *One of the reasons you are blessed is to be a blessing to the needy. (Genesis 12).The children of Israel were instructed not to ignore the needy in the land of blessings.*
- *Kindness and goodness is one of the fruits of the holyspirit (Galatians 6).*
- *This is a test of stewardship. Paul worked hard for himself and those that were WITH HIM.*
- *Paul exhorted the blessed not to be proud but be generous and show concern to others.*
- *(1st Thess 5:15, 2:17).*
- *A sign of Loving God. You cannot claim to love God and you are unconcerned or hate a brother that you see.*
- *Early Church gave generously and attended to each other's needs Acts 2, They Sent food to Judea when there was a drought. .*
- *Protection and Long life - Dorcas was raised from the dead because of her concern for the needy. Those who mourned her displayed her works of mercy that she did (Acts 9:36).*
- *You will be raised in time of illness, preserved from trouble, deliverance by God in times of affliction/troubles. (Psalm 41:1-6.)*
- *Banking with God to be refunded or Withdraw in times of needs. (Proverbs 19:17).*
- *We demonstrate Christ to the People by tangible fruit of love. You shall know them by their fruits, (John 17) the world will know that they are mine when they live in love and Unity.*
- *Fulfilling righteousness -The rich young ruler was obedient in many areas but was stingy about the needy. (Mark 10: 17-23).*
- *Paul instructed the church in Galatians to take care of the hurting/ and the needy & he was very eager to do so himself. (Gal 2:10).*
- *A prudent Wife has a law of Kindness to the needy. (Proverbs 31: 26).*
- *Jesus showed generosity by feeding 4,000 & 5,000 people respectively, showing the acts of a true christian by NOT sending them away.*
- *The early church appointed 7 leaders to take care of the needy. (Acts 6).*
- *Moses appointed 70 and other leaders to attend to the needs of peoples.*

Matthew 24:34-36
"Then the King will say to those on his right, come you who are blessed by my Father; take your inheritance, the kingdom prepared for you since the creation of the world. For i was hungry & you gave me something to eat, I was thirsty & you gave me something to drink, I was a stranger & you invided me in, I needed clothes & you clothed me, I was sick & you looked after me, I was in prison & you came to visit me"

- God created first an Environment then RELATIONSHIP , Then Work (We must take care of relationships)
- Stinglyness is a curse affects even self (Build a house not live in it, plant a field not its fruit etc)
- Parable of the Good Samaritan the Hearten like Good Samaritan was considered to have done better than the priest. (Good Samaritan administered Emergency help (Dressing the wounds, Follow-up & long term (in an inn & meeting the need) Luke 10 : 25-37
- Mixing faith with works by showing physical act to a wounded person or needy James 2:14 -26).
- The assignment given to us by Jesus is to Set captives free (Not only demonic), Good news to others,

- Taking care of the seed of God of destiny. Jesus Born in a major of a hospitable person, David preserved by Jonathan , Moses received from the sea as a strange child later became the deliverer, Encouragement from Annanias & Barnabas Kept Pauls Vision on through encouragement, They spared a seed of destiny. (Elijah & John the Baptist lacked motivators that is why they were depressed)
- Rahab was favoured and spared for her generosity (WELCOMING STRANGERS ATTENDING TO ANGLES) Abraham welcomed angles through a heart of hospitality and heard a message.
- Don't be stingy / enclosed/ (Business ideas, jobs, tenders, Marriage partnerships important information will come through interactions) Business teas, After Church meetings, etc
- Any form of Charity or concern you show is a seed. (A generous soul will prosper those who water others will be watered Pvbs 11:24-25) Do not grow wearily to do good especially those in the house hold of faith.
- God hears the prayers of those who show concern and bless others
  Whoever ignores the needy, hurting he himself will cry God and God will not hear
  Pvbs 21:13 (Cornelius was heard UNSUALLY because of his generosity to others Acts Chpt 10: 12)
  > One of the reasons for your blessing (Blessed to blessing Abraham Genesis 12)
  Children of Israel were instructed not to be selfish in the land of blessings
- Proper relationships and interaction is a Fruit of the Spirit More superior than GIFTS, YOU CAN FAKE GIFTS BUT NOT THE FRUIT OF THE SPIRIT, Galatians 6: Kindness, goodness (generosity), gentleness, peace, love, long suffering.
- The Test of stewardship is not how we treat others but how we treat others. Paul worked hard for himself and those that were WITH HIM. Ist Thess 5:15, 2:17. Paul exhorted the blessed not to be proud but Be generous and show concern to others (RICHES IS NOT ONLY MONEY – SMILE, ATTENTION ETC.
- A sign of Loving God. You cannot clame to love God and you are unconcerned or hate a brother that you see. DEEP SPIRITUALITY is intimidation not a sign of loving God.
- Key to prosperity ---- Majority of the rich who enjoy there wealth they are generous people (Top billionaires run charity)
- Early Church gave generously and attended to each other (No one had need they sold land to give that the ministry had no need that the overflow was felt by all others Act 2, When peter was arrested the people prayed vigoulosly at NIGHT DENEYING THEMSELVES SLEEP. Act Send Food to Judea when their was a draught .
- Protection and Long life. Dorcas was raised from the dead because of her concern for others. Mourners displayed her works of mercy that she did (Acts 9:36)
- You will be raised in time of illness, preserved from trouble, deliverance from God in times of affliction Ps 41:1-6
- Banking with God to be refunded or Withdraw in time of need(Tangible or emotional gifts). Pvbs 19:17
- We demonstrate Christ to the People with tangible fruit of love. You shall know them by their fruits, John 17 the world will know that they are mine when they live in love and Unity.
- Key to evangelism Evangelism—Cults have been able to win people for being available in disaster regions to WIN peoples heart.
- Fulfilling righteousness --- The rich young ruler was obedient in many areas but was stingy about the needs of others Mark 10: 17-23
- Gifts of the Holy Spirit are given, released and maintained by Love. 1 corithians 13: 1-9
- Paul instructed the church in Galatians to take care of the hurting/ and the poor and he was very eager to do so himself. (Gal 2:10)
- A prudent Wife has a law of Kindness Pvbs 31: 26
- Jesus was generous to feed 4,000 / 5,000 people respectively showing the acts of a Christian NOT sending them away.
- The early church appointed 7 leaders to take care of the Widows Acts 6
- Moses appointed 70 and other leaders to attend to the needs of peoples.
- YOU ARE YOUR BROTHERS/ SISTER KEEPER

CALL TO GENEROSITY QUOTES AND SCRIPTURES

1. "We make a living by what we get, but we make a life by what we give." Winston Churchill

2. “No one has ever become poor by giving.” Anne Frank
3. “Giving is not just about making a donation. It is about making a difference.” Kathy Calvin
4. “Life is a boomerang. What you give, you get.” Anonymous
5. “We rise by lifting others.” Robert Ingersoll
6. “Only by giving are you able to receive more than you already have.” Jim Rohn
7. “Do come and good will come to you.” Anonymous
8. “Giving opens the way for receiving.” Florence Scovel Shinn
9. “When you learn, teach. When you get, give.” Maya Angelou
10. “It’s not how much we give, but how much love we put into giving.” Mother Teresa
11. “Give people the best of what is within you and help others to awaken to their best self so that they too can live a life of abundance.” ATGW
12. “I learned to give not because I have much, but because I know exactly how it feels to have nothing.” Anonymous
13. “Giving is the master key to success, in all applications of human life.” Bryant McGill
14. “At the end it’s not about what you have or even what you’ve accomplished. It’s about who you’ve lifted up, who you’ve made better. It’s about what you’ve given back.” Denzel Washington
15. “There are those who give with joy, and that joy is their reward.” Khalil Gibran
16. “Happiness doesn’t result from what we get, but from what we give.” Ben Carson
17. “If you want something, give it.” Deepak Chopra
18. “If you have much, give of your wealth; if you have little, give of your heart.” Proverb
19. “Don’t expect to receive if you’re not willing to give.” Anonymous
20. “Selfless giving is the art of living.” Frederick Lenz
21. “The degree of loving is measured by the degree of giving.” Edwin Louis Cole
22. “Act of giving something to others is an art of flowering your heart.” Vinayak
23. “To do more for the world than the world does for you – that is success.” Henry Ford
24. “He who serves the most, reaps the most.” Jim Rohn
25. “Remember that the happiest people are not those getting more, but those giving more.” Robin Sharma
26. “To give your best is to receive the best.” Raymond Holliwell

Other Giving Quotes

1. *Be inspired by these quotes about giving. Find thoughts on what the true meaning of giving is. If we all gave a bit more it would make a huge impact on the world.*

2. Giving to others will not take away from what you have but will in fact add to your life. Catherine
3. All you have shall someday be given; therefore give now, that the season of giving may be yours and not your inheritors.
4. The moment practicing gratitude daily becomes a habit, you can start to incorporate gratitude for your future. You can start giving gratitude for things that you want but do not have yet. Gabor Cadman,
5. Just the will to give or lend, This will make you someone's friend.
   "The process of giving will only serve to open your world in ways you could not even begin to imagine

6. Giving kindness does us as much good as receiving it. Piero Ferrucci, The Power of Kindness
7. Sharing Grace is God's power and ability to meet our needs and take joy in giving to others. Tony Cooke,
8. Getting to purpose in life - by going within and discovering that purpose is about loving unconditionally and serving, and making contact with what is there about us always - alters one's worldview dramatically.

9. When you volunteer your time, donate funds, or provide acts of service, always give from your heart and give for the sake of giving. Heidi Catherine Culbertson, Wisdom and Recipes
10. Retirement allows you to be giving in your time and your expertise to organizations that need help. It can be the most rewarding time of your life! Kate Summers
11. It seemed to me that the people who were genuinely thriving in their lives were the ones who had made room for well-being, wisdom, wonder, and giving. Arianna Huffington, Thrive
12. Happiness can be the result, not of spending more money on oneself, but rather of giving money away to others. Christian Smith, The Paradox of Generosity
13. The great apparent dichotomy is that the more we give, the more we get. Stephen Covey
14. Friends demonstrate faithfulness to one another. Sacrifice is the essence of friendship. Martin Murphy,
15. If you knew what I know about the power of giving you would not let a single meal pass without sharing it in some way. Buddha
16. Mercy will cost you, too. It'll cost you time, money, or potentially relationships. Mercy that doesn't cost much isn't worth much. But God promises that when you help hurting people by giving what you have, he will bless you in return. Rick Warren
17. "Spouses who forget a birthday or anniversary or who never give gifts to someone who truly enjoys gift giving will find themselves with a spouse who feels neglected and unloved." Cindy Hyde,
18. | You have to start giving first and expect absolutely nothing. Dalai Lama
19. Giving freely and giving with a good heart, will never go unrewarded. James Clear,
20. Our giving to God is like giving a thimble of water to the ocean, or like giving a candle to the Sun. It seems so insignificant that we tend to lose the thrill of Thanksgiving. Steve Pease,
21. Which would you rather have - someone who is nice and helpful to you all the time who might not give you a gift or someone who shows no interest in you all year and then gives you a token gift once a year? Tawra J. Kellam; Jill Cooper,
22. With 'give and receive', you are offering something for the other person with a willingness to receive something in return, but not an expectation. Derek C. Doepker,
23. The gift of sight to see beyond The darker clouds of now! John McLeod,
24. We all should give what we have decided in our hearts to give, not reluctantly or under compulsion, for God loves a cheerful giver. 2 Corinthians 9:7
25. Also, remember that in relationships, you get what you give, so treat other people the way you'd like them to treat you. Gavin Bird,
26. Not what we give, but what we share, for the gift without the giver is bare; who gives himself with his alms feeds three, himself, his hungering neighbor, and me. James Russell Lowell
27. If you loved someone, you loved him, and when you had nothing else to give, you still gave him love.
28. All relationships are designed to embody a dual role of giving and receiving. If one person is doing all the giving and the other doing all the receiving, there will be an imbalance. Charles Stanley

29. Our attitude in giving matters much more to God as the size of our giving. Oluwakemi Ola-Ojo,
30. For it is in the giving that we receive. Saint Francis of Assisi
31. We are all on the same island working towards different goals. When we take a moment to acknowledge another person and give just a little of ourselves to another then we set forth amazing things. Scott Wyatt,
32. When you learn, teach, when you get, give. Maya Angelou
    It is in giving, not in seeking gifts, We find out quest. James Allen
33. Our giving is a reflexive response to the grace of God in our lives. True generosity doesn't just come out of altruism or philanthropy, it comes out of joy. Rene Schlaepfer,
34. Being wealthy is about being productive, giving to others, serving society, and creating a legacy. Joe Mansueto

35. We are rich only through what we give, and poor only through what we refuse. Ralph Waldo

36. Cheerful givers do not count the cost of what they give. Their hearts are set on pleasing and cheering the person to whom the gift is given. Julian of Norwich
37. You don't have to be an angel, just be someone who can give. Patti LaBelle
38. Men are rich only as they give. He who gives great service, gets great returns. Elbert Hubbard,
39. When you do give, make it a practice to do so intentionally with the idea of benefitting others. M. Ahlers,
40. And everyone can experience the joy and blessing of generosity; because everyone has something to give. Jan Grace,
41. Being connected means having access to real people anywhere in the world. Also means there is a give and take. Not just take. Devin Schoening
42. Even if you have money and you give it to people, when you are not happy for who those people are, you are not being generous. Gary M. Douglas,
43. In this world it is not what we take up, but what we give up, that makes us rich. Henry Ward
44. Giving of ourselves, sharing our gift, is what lifts us. The tricky part is, none of us knows exactly how we will impart the gift we have to give: what kind word we speak, what song we sing, which hug we give will be the one that touches another soul. Laya Saul.
45. "Your freedom is your ability to choose what you give your attention to, what you believe, what you commit to, where you devote your energy, and the kind of person you will be." Neville Berkowitz,
46. We give gifts to those we love in the tradition of the Wise Men and worship the King in the manner of both the Wise Men and the lowly shepherds. We search our minds and make ready our hearts to welcome the Messiah anew each Christmas season. Margie Harding,
47. Love is giving. God loved the world so much that He gave His Son. Jesus loved the world so much, loved you, loved me so much that He gave His life. And He wants us to love as He loved. And so now we have also to give until it hurts. True love is a giving and giving until it hurts. Mother Teresa
48. The most obvious lesson in Christ's teaching is that there is no happiness in having or getting anything, but only in giving. Henry Drummond
49. ... when you approach relationships by thinking about giving rather than getting, and about adding value before seeking value, you'll be amazed at the return you see on your investment. Mark Goulston,
50. "Giving" is a verb, a word describing an action.. It is not a badge you wear, but an action you "give". Costa Mitchell,
51. .. change the way you approach giving, shifting the focus from charity to empathy, from a one-way transfer to a mutually beneficial act, from guilt and obligation to pleasure and happiness. Carl Liederman
52. Given the growing inequity on our planet, what is the solution? ... a culture of giving can change the world around us while fulfilling each of our lives at the deepest level. Shiv Khemka
53. ... the act of giving creates a multiplier effect, adding something to the life of those in need but also intrinsically rewarding the giver too, making him or her happier as well. Altruistic or not - the effect is positive. Boris F.J. Collardi
54. The measure of life, after all, is not its duration, but its donation. Peter Marshall

55. Join a giving community and you will surely find your talents, caring and compassion valued more than you might believe. Catherine Pulsifer,

56. Its a time for giving and sharing. Give to those who need you. Share with those who need you. Give and share with what you have and God will bless you. M. Lawrence,
57. The giving of gifts is a natural response to Jesus' stupendous act of self-giving, when he laid aside his glory and was born into the human race. The concern for the needy recalls that the Son of God was born not into an aristocratic family but into a poor one. Timothy Keller, Hidden Christmas
    Each day's a gift of Life divine a precious jewel that's yours and mine! John McLeod,
58. There are many things in life that are beyond our control. But there are few things in life that are beyond our power of choice and our ability to make lemonade from lemons if we just put our minds to it while we focus on the gifts of the present Julie Donner Andersen,
59. They serve best who give most of themselves. Self is forgotten by the one who serves, for such a one rejoices to see success coming to others through his or her efforts. James Cash Penney
60. Maybe life is supposed to be like that - a little giving that means a lot to others. I have never forgotten this unusual event, and, to this day, I believe that giving of one's humanity is better than the mere observation of life. Byron Pulsifer,

61. We are sowers and reapers. We must be continually giving and receiving. Scott F Neve,
62. True giving from the heart is an expression of love. Cara Stein
63. Another way to bring positivity into your life is to become a giver. Riley Stevens
64. In order to downsize, we must get rid of this clutter. This can mean giving items up to thrift stores, having a garage sale or using them as hand me downs. Kathy Stanton,
65. However, the thing about giving is that each one of us has something to give and once you realise that you don't need to have a lot of money in order to give, you will be able to transform people's lives. John Michaels,
66. Another major factor in having a happy and a successful marriage comes from making sure that you are giving people the honest response they look for. Anna Shine, Marriage:
67. Spouses who forget a birthday or anniversary or who never give gifts to someone who truly enjoys gift giving will find themselves with a spouse who feels neglected and unloved. Cindy Hyde,
68. Before you ever receive the wonderful treasures of a happy life, you must first give. Give of yourself. Be of service to others. Only what you give can be multiplied back into your own life. That is the law of the harvest, the law of the ten-fold return. If you give nothing, even if it is multiplied, you receive nothing. Mary Kay Ash Helping Others
69. Simply give others a bit of yourself; a thoughtful act, a helpful idea, a word of appreciation, a lift over a rough spot, a sense of understanding, a timely suggestion. You take something out of your mind, garnished in kindness out of your heart, and put it into the other person's mind and heart. Charles H. Burr
    Generous giving starts when it hurts to give. When one moves in the direction of "poverty" in order to make someone else "rich." By richness we are not talking about adding to someone else's net worth. Rather we are talking about spiritual richness or the richness that comes from living the life that God intended for all (not just the privileged) to live. Gordon MacDonald,
70. An experienced mentor (who knows how to relate to a novice) can greatly improve your self-efficacy in two ways - by giving you the right example (social modeling) and by encouraging you (social persuasion). Martin Meadows, Confidence

71. “Generosity: The habit of giving freely without expecting anything in return.” Anonymous
72. “Generosity is giving more than you can.” Khalil Gibran
73. “Generosity is the most natural outward expression of an inner attitude of compassion.” Anonymous
74. “The heart that gives, gathers.” Tao Te Ching
75. “Generosity isn’t about money, it’s about the heart.” Anonymous
76. “Real generosity is doing something nice for someone who will never find out.” Frank Howard Clark
77. “Generosity, kindness, honesty, humor – makes us truly rich.” Waylon Lewis
78. “Where grace happens generosity happens.” Max Lucado
79. “Give – the generous life.” Anonymous
80. “Make generosity part of your growth strategy.” Anonymous
81. “Don’t wait for other people to be loving, giving, compassionate, grateful, forgiving, generous, or friendly, lead the way.” Steve Maraboli
82. “A generous heart, kind speech, and a life of service and compassion are the things that renew humanity.” Anonymous
83. “Real generosity toward the future lies in giving all to the present.” Albert Camus
84. “Generosity isn’t an act. It’s a way of life.” Chip Ingram
85. “You do not have to be rich to be generous.” Anonymous
86. “A generous person will prosper.” Anonymous
87. “The greatest way to learn the genius of generosity is to practice it in real time with others.” Chip Ingram
88. “Sometimes, we need only to look at the sunrise to see the generosity of God.” Jocelyn Soriano
89. “Attention is the rarest and purest form of generosity.” Simone Weil

90. “The law of prosperity is generosity. If you want more, give more.” Bob Proctor
91. “Goodness is about character, integrity, honesty, kindness, generosity, moral courage, and the like. More than anything else, it is about how we treat other people.” Dennis Prager
92. “My intent is to be generous of spirit and live with total integrity every day of my life.” Deepak Chopra
93. “Generosity is the best investment.” Diane Con Furstenberg
94. “The most generous persons are those who give silently without hope of praise or reward.” Carol Ryrie Brink
95. “Some people are afraid of generosity. They feel they will be taken advantage of or oppressed. In cultivating generosity, we are only oppressing our greed and attachment. This allows our true nature to come out and become lighter and freer.” Ajahn Chah
96. “Generosity takes an open heart and a love that asks for nothing in return.” Anonymous
97. “Being generous of spirit is a wonderful way to live.” Pete Seeger
98. “Generosity is the flower of justice.” Nathaniel Hawthorne
99. “Every minute of every hour of every day you are making the world just as you are making yourself, and you might as well do it with generosity and kindness and style.” Rebecca Solnit
100. “Generosity is an activity that loosens us up. By offering whatever we can – a dollar, a flower, a word of encouragement – we are training in letting go.” Pema Chodron
101. “Through radical generosity we are awakening people.” Bill Johnson
102. “Too many have dispensed with generosity in order to practice charity.” Albert Camus
103. “A generous heart, kind speech, and a life of service and compassion are the things which renew humanity.” Buddha
104. “Our only hope lies in the power of our love, generosity, tolerance and understanding and our commitment to making the world a better place for all.” Muhammad Ali
105. “Your greatness is not what you have, it’s what you give.” Anonymous

106. “In the end, though, maybe we must all give up trying to pay back the people in this world who sustain our lives. In the end, maybe it's wiser to surrender before the miraculous scope of human generosity and to just keep saying thank you, forever and sincerely, for as long as we have voices.” Elizabeth Gilbert,

107. “Generosity is giving more than you can, and pride is taking less than you need.” Khalil Gibran,
108. “You have not lived today until you have done something for someone who can never repay you.” — John Bunyan
109. “A kind gesture can reach a wound that only compassion can heal.” — Steve Maraboli,
110. “The most truly generous persons are those who give silently without hope of praise or reward.” — Carol Ryrie Brink,
111. “It’s important that what thoughts you are feeding into your mind because your thoughts create your belief and experiences. You have positive thoughts and you have negative ones too. Nurture your mind with positive thoughts: kindness, empathy, compassion, peace, love, joy, humility, generosity, etc. The more you feed your mind with positive thoughts, the more you can attract great things into your life.” — Roy T. Bennett
112. “Give a bowl of rice to a man and you will feed him for a day. Teach him how to grow his own rice and you will save his life.” — Confucius
113. “That's what I consider true generosity: You give your all, and yet you always feel as if it costs you nothing.” — Simone de Beauvoir
114. “When will our consciences grow so tender that we will act to prevent human misery rather than avenge it?” — Eleanor Roosevelt
115. “I care not for a man's religion whose dog and cat are not the better for it.” — Abraham Lincoln
116. “Conquer the angry one by not getting angry; conquer the wicked by goodness; conquer the stingy by generosity, and the liar by speaking the truth.
117. “For it is in giving that we receive.” — St. Francis of Assisi
118. “Give what you have. To someone, it may be better than you dare to think.” — Henry Wadsworth Longfellow

119. “(I)f we are going to be kind, let it be out of simple generosity, not because we fear guilt or retribution.” — J.M.
120. “People who love themselves come across as very loving, generous and kind; they express their self-confidence through humility, forgiveness and inclusiveness.” — Sanaya Roman

121. “Generosity is not in giving me that which I need more than you do, but it is in giving me that which you need more than I do.” — Kahlil Gibran,

122. “Do not neglect to show hospitality to strangers, for by doing that some have entertained angels without knowing it.” — Anonymous,
123. “Be practical as well as generous in your ideals. Keep your eyes on the stars, but remember to keep your feet on the ground.” — Theodore Roosevelt
124. “Silence the angry man with love. Silence the ill-natured man with kindness. Silence the miser with generosity. Silence the liar with truth.” — Gautama Buddha
125. “Every sunrise is an invitation for us to arise and brighten someone's day.” — Richelle E. Goodrich,
126. “I come in a world of iron...to make a world of gold through giving” — Dale Wasserman
127. “You give but little when you give of your possessions. It is when you give of yourself that you truly give.” — Kahlil Gibran, The Prophet

128. “When will our consciences grow so tender that we will act to prevent human misery rather than avenge it?” — Eleanor Roosevelt

129. “Give what you have. To someone, it may be better than you dare to think.” — Henry Wadsworth Longfellow

130. Here's where the real power of generosity comes in. Often, the more we give, the more we receive.
131. Author: Debbie Macomber

132. Cultivating the habit of good deeds will not only affect those around us, it will improve our own emotional well being. Author: Debbie Macomber

133. "You are so fortunate, but what are you giving back to make this world a better place for others?" Catherine Pulsifer

134. "You will be enriched in every way so that you can be generous on every occasion, and through us your generosity will result in thanksgiving to God. " 2 Corinthians 9:11

135. Unlike its close cousin, compassion, generosity requires action. To be a generous person, you must act. In many ways, generosity is compassion in action, and it is love in action. ... Generosity is a practice. And as with anything we practice, we get better at it over time. Barbara Bonner, Inspiring Generosity

136. "The people I have encountered have shown me time and time again that no matter how little you have, it is possible to give something back. They proved this by their unprompted generosity." Tony Clark

137. "No person was ever honored for what he received. Honor has been the reward for what he gave." Calvin Coolidge

138. "Generosity can have many expressions, including care, time, skill, intelligence, gifts, and money. I believe that one cannot omit any of these without curtailing them all." Mark V. Ewert,

139."Generosity brings happiness at every stage of its expression. We experience joy in forming the intention to be generous. We experience joy in the actual act of giving something. And we experience joy in remembering the fact that we have given." Buddha

140.Generosity is giving good things to others freely and abundantly. Generous behaviors are intended to enhance the well-being of others. Patricia Snell Herzog; Heather E. Price,
141.... to be fulfilling, generosity must be motivated internally, by joy and delight, not by guilt or obligation. That's why, when you read about generosity in the Bible, it always starts with God's generosity toward you. Rene Schlaepfer, Richer Life
142."God's given you the ability to honor him, to serve others, to make a living, to be an example, to have money to pass on to others." And I've learned from personal experience that the more generous you are, the more God blesses your life. Rick Warren

143."That's God's design for the way we give and express His generosity. Giving is meant to be joyful and fulfilling. It isn't rooted in guilt, self- righteousness, or a martyr complex. It's rooted in joy. And, in fact, it's genius. It's the smartest way to live." Chip Ingram,
144."Doing nothing for others is the undoing of one's self. We must be purposely kind and generous, or we miss the best part of existence. The heart that goes out of itself, gets large and full of joy. This is the great secret of the inner life. We do ourselves the most good doing something for others." Horace Mann
Joy |
145.I can think of few people living out the idea of biblical generosity like David. The values expressed ... are timeless because they are biblical. Chris Holdorf
146.God wants us to be generous, gracious, kind-hearted and compassionate. Robert Morris,
147.'We humans seem to be most generous when we feel grateful and desire to pass on some measure of what we have been given." Arthur W. Frank,
148."Generosity is paradoxical. Those who give, receive back in turn. By spending ourselves for others' well-being, we enhance our own standing." Christian Smith,
149."What I'm talking about is Operation Christmas Child. Every year, children around the world receive gifts because of the generosity of believers packaging and sending them a gift for Christmas. It is likely that is the only present they will receive all year." Alex Bricker,
150."The greatest way to learn the genius of generosity is to practice it in real time with others." Chip Ingram,
151."God gives generously and liberally IF you believe that He HAS ALREADY granted you what you desire." Jim Ballew,
152."While it runs contrary to much of modern thinking, generosity has the power to change your life for the better." David Khalil,
153.""People who are generous are constantly giving things away: courage, money, introductions - whatever is needed. Look around today and see what you have in abundance that others might be lacking." David Jeremiah
154.Generosity is ... revitalizing for a church, and in my experience, that's true of congregations around the world. Truax Laura
155."Generosity of character is important. It builds confidence by reminding you that you are a decent human being, and that you deserve any good things which might come your way." John Franz,

156."Grateful people achieve more and are more goal oriented as they give. People who practice being grateful are more generous and do more paying it forward." Lainey Garretson,
157."I will suggest that joy and contentment are found in simplicity and generosity, in faith and in pursuing your purpose in life." Adam Hamilton, Enough,
158."If you give, it will be given to you. And I have found that generous people are blessed people." Greg Laurie
"What I gave I have, what I spent I had; and what I left I lost." Robert of Doncaste
159."When our attitude towards ourselves is big, and our attitude toward others is generous and merciful, we attract big and generous portions of success." W. Clement Stone
160."Sometimes when we are generous in small, barely detectable ways it can change someone else's life forever." Margaret Cho
161."Love calls for generosity and self-sacrifice." Lawrence G. Lovasik,
162."Success may or may not mean that you've acquired a lot. It does mean that you have become a generous person." Robert H. Schuller

163."We must give more in order to get more. It is the generous giving of ourselves that produces the generous harvest." Orison Swett Marden
"To know when to be generous and when to be firm - this is wisdom." Elbert Hubbard
164."Blessed are those who can give without remembering and take without forgetting." Elizabeth Bibesco
Memory |
165."Giving frees us from the familiar territory of our own needs by opening our mind to the unexplained worlds occupied by the needs of others." Barbara Bush Life Changing |
166."This is the life-giving power of generosity - doing good to others, simply because you can." Jan Grace, Generosity: The Life Giving Power of Doing Good To Others Good |

167."What makes generosity a real and powerful witness to God's love is our action." Chris Willard, Contagious Generosity Action |

168."Generosity and giving are incredibly important to me. As I've followed God's principles of giving, there are many times I have found myself on the giving and receiving ends of generosity. Robert Morris,
169."Only by giving are you able to receive more than you already have." Jim Rohn

170."No life worth living is possible without generosity. Indeed, it is doubtful whether the tender plant of newborn human life would even survive without generosity."Miroslav Volf,
171."We should give as we would receive, cheerfully, quickly, and without hesitation; for there is no grace in a benefit that sticks to the fingers." Seneca

172."There is no act of faith more beautiful than the generosity of the very poor.-- Abdullah"
"Generosity needs no logrolling." — Toba Beta, My Ancestor Was an Ancient Astronaut
173."Honesty and contentment are the pathways that lead to a life of integrity and generosity."
— Gary Rohrmayer, 21 Dangerous Prayers: 21 Day Transformational Prayer Guide
174."Be generous, be spirited, and you'll lead a happy life." — Kevin Crossley-Holland, Norse Myths: Tales of Odin, Thor and Loki
175."Share yourself often, easily, authentically and generously from wherever you are in the moment." — Amy McTear, We Need You: A Call to an Imaginal Reality
176."Be generous with your kindness, with your love" Akiroq Brost
177."Happiness is the ultimate inner experience of living with generosity, love, kindness, compassion, and gratitude." — Debasish Mridha
178.The beautiful thing about inspiration is that we can live our everyday life with more courage and generosity." — Amar Ochani
179."When you give everything You have nothing to lose." — Kate McGahan
180."Your wealth is measured by your ability to give not your ability to receive." — Avina Celeste
181."Attention is the rarest and purest form of generosity."
— Simone Weil

"Do all the good you can, By all the means you can, In all the ways you can, In all the places you can, At all the times you can,
To all the people you can, As long as ever you can."
— John Wesley, Letters of John Wesley
182.
"Generosity could be as contagious as the zombie plague as long as enough people were willing to be carriers."
— Jonathan Maberry, Dust and Decay

"Sir, I did not count your glasses of wine, why should you number up my cups of tea?" — Samuel Johnson, The Life of Samuel Johnson,

183. “You cannot do a kindness too soon because you never know how soon it will be too late.”
— Ralph Waldo Emerson
184. “It takes generosity to discover the whole through others. If you realize you are only a violin, you can open yourself up to the world by playing your role in the concert.” — Jacques-Yves Cousteau

“It wasn’t that he was specially ungenerous but that he put things off to give his generosity a longer and more significant route.”
— Saul Bellow, The Adventures of Augie March

“The greatest gift you ever give is your honest self.” — Fred Rogers

“Be a gift to everyone who enters your life, and to everyone whose life you enter. Be careful not to enter another’s life if you cannot be a gift. (You can always be a gift, because you always are the gift — yet sometimes you don’t let yourself know that.)”
— Neale Donald Walsch, Conversations With God: An Uncommon Dialogue, Vol.2

“How can I give you nothing? Do you seriously expect me to buy nothing, wrap up nothing, stick a gift tag on nothing, send a card saying I really hope you like your nothing and lie awake worrying that the nothing I got you was the right color!”
— Hilary McKay, Caddy Ever After

“Time cannot be packaged and ribboned and left under trees for Christmas morning. Time can’t be given. But it can be shared.”
—Cecilia Ahern, The Gift

185. Giving frees us from the familiar territory of our own needs by opening our mind to the unexplained worlds occupied by the needs of others. Author: Barbara Bush

186. When we give cheerfully and accept gratefully, everyone is blessed. Author: Maya Angelou

187. If there is anything I have learned about men and women, it is that there is a deeper spirit of altruism than is ever evident. Just as the rivers we see are minor compared to the underground streams, so, too, the idealism that is visible is minor compared to what people carry in their hearts unreleased or scarcely released. Author: Albert Schweitzer

188. Oh, the comfort -- the inexpressible comfort of feeling safe with a person -- having neither to weigh thoughts nor measure words, but pouring them all right out, just as they are, chaff and grain together, certain that a faithful hand will take and sift them, keep what is worth keeping, and with the breath of kindness blow the rest away. Author: Dinah Maria Mulock Craik, poet and novelist (26 Apr 1826-1887)

189. One can never pay in gratitude; one can only pay "in kind" somewhere else in life. Author:
190. True prosperity is when you earn wealth in the process of making others wealthy. It is not a zero sum game.
191. Author: Unknown

192. Selflessness. Humility. Truthfulness. These are the three marks of an honorable man. Author: Suzy Kassem

193. Too many have dispensed with generosity in order to practice charity.

194. Author: Albert Camus, writer and philosopher (1913-1960)

195. It is a powerful practice to be generous when you are the one feeling in need. Author: Allan Lokos
196. Be generous in prosperity, and thankful in adversity. Be worthy of the trust of thy neighbor, and look upon him with a bright and friendly face. Be a treasure to the poor, an admonisher to the rich, an answerer of the cry of the needy, a preserver of the sanctity of thy pledge. Sacred text: Gleanings From the Writings of Bahá'u'lláh,

197. As desire abates, generosity is born. When we are connected and present, what else is there to do but give? : Jack Kornfield

198. If you want trust, trust others. If you want respect, respect others. If you want help, help others. If you want love and peace in your life, give them away. If you want great friends, be one. That's how it works.
199. Author: Dan Zadra

200. To enjoy the journey is to leap into people's lives. To enjoy the journey is to give until the stretch is a sacrifice. The question always is: what is it in life that will pull you out of your seat to be brave, risk and serve. Author: Janie Jasin

201. One of the sanest, surest, and most generous joys of life comes from being happy over the good fortune of others. Author: Archibald Rutledge

202. We must try to contribute joy to the world. That is true no matter what our problems, our health, our circumstances. We must try. I didn't always know this and am happy I lived long enough to find out.
203. Author: Roger Ebert

204. A generous individual will always respect the old and show love and care for the young.

205. A generous individual will always have mercy for the poor and any other individual who suffers from any kind of disability.

206. "Give what you have. To someone, it may be better than you dare to think." —Henry Longfellow

207. Generosity makes our world a better place. It improves the life of the receiver. And it improves the life of the giver. Yet, despite the benefits, generosity is still too rare in our world today.
208. onsider then, these 9 ways generous people see the world differently:
209. They recognize the resource pie is not finite.
210. The mindset of competition—that my resources only grow when someone else's shrinks—is based on a faulty premise. It assumes there is a finite sized pie and if someone else enjoys success, my opportunity shrinks. But quite frankly, this thinking is incorrect. The pie of resources is not finite. It continues to grow as society benefits from others' success.

211. They know that generosity leads to greater happiness.
212. Studies confirm what generous people already know: Giving increases happiness, fulfillment, and purpose in the life of the giver. We were not designed to be creatures of selfishness. Instead, we were designed to seek and discover happiness in loving and caring for others. And those who decide to look for fulfillment there, quickly discover it.

213. They find success in helping others succeed.
214. The easiest path to finding success in your life is to help someone else find theirs. After all, our contribution to this world has to be measured by something more significant than the size of our savings account. Our lives are going to find their greatest significance in how we choose to live them—and how we enable others to live theirs.

215. They believe changing even one life is worthwhile.
216. Generous people are quick to admit the world's problems will never be solved by one person… and perhaps, never completely solved even in the future. But perfection does not slow them. To them, changing even one life within their sphere of influence is reward enough. And is a worthy endeavor to be sought.

6. They see more resources to give than money.
217. We have so much more to offer this world than just financial resources. We have time, talents, experiences, and lessons learned. Giving people think beyond their money and begin to invest their lives into others. Often times, this step can be more difficult than signing a check… but usually, it is more desperately needed.

7. They fully embrace the reality that life is short.
218. Life is short. And we only get one shot at it. Those who fully embrace this reality learn to live life in light of it. They recognize we have but a short time to leave our imprint on this world. And they cheerfully give their resources to accomplish it.

219. It is true that it takes courage to be generous.

220. It takes trust.

221. It takes faith.

222. It takes surrender.

223. It takes an open heart and a love that asks for nothing in return.

224. Be brave, be bold in your generosity.

225. Give it all away.

226. What you receive will astound you.

227. "Generosity is the most natural outward expression of an inner attitude of compassion and loving-kindness."
228. 90 Giving Quotes
229. Be inspired by these quotes about giving. Find thoughts on what the true meaning of giving is. If we all gave a bit more it would make a huge impact on the world.

230. Giving to others will not take away from what you have but will in fact add to your life. Catherine

231. All you have shall someday be given; therefore give now, that the season of giving may be yours and not your inheritors.
232. The moment practicing gratitude daily becomes a habit, you can start to incorporate gratitude for your future. You can start giving gratitude for things that you want but do not have yet. Gabor Cadman,
233. Just the will to give or lend, This will make you someone's friend.
"The process of giving will only serve to open your world in ways you could not even begin to imagine

234. Giving kindness does us as much good as receiving it. Piero Ferrucci, The Power of Kindness
235. Sharing Grace is God's power and ability to meet our needs and take joy in giving to others. Tony Cooke,
236. Getting to purpose in life - by going within and discovering that purpose is about loving unconditionally and serving, and making contact with what is there about us always - alters one's worldview dramatically.
237. When you volunteer your time, donate funds, or provide acts of service, always give from your heart and give for the sake of giving. Heidi Catherine Culbertson, Wisdom and Recipes
238. Retirement allows you to be giving in your time and your expertise to organizations that need help. It can be the most rewarding time of your life! Kate Summers
239. It seemed to me that the people who were genuinely thriving in their lives were the ones who had made room for well-being, wisdom, wonder, and giving. Arianna Huffington, Thrive
240. Happiness can be the result, not of spending more money on oneself, but rather of giving money away to others. Christian Smith, The Paradox of Generosity
241. The great apparent dichotomy is that the more we give, the more we get. Stephen Covey
242. Friends demonstrate faithfulness to one another. Sacrifice is the essence of friendship. Martin Murphy,
243. If you knew what I know about the power of giving you would not let a single meal pass without sharing it in some way. Buddha
244. Mercy will cost you, too. It'll cost you time, money, or potentially relationships. Mercy that doesn't cost much isn't worth much. But God promises that when you help hurting people by giving what you have, he will bless you in return. Rick Warren
245. "Spouses who forget a birthday or anniversary or who never give gifts to someone who truly enjoys gift giving will find themselves with a spouse who feels neglected and unloved." Cindy Hyde,
246. | You have to start giving first and expect absolutely nothing. Dalai Lama
247. Giving freely and giving with a good heart, will never go unrewarded. James Clear,
248. Our giving to God is like giving a thimble of water to the ocean, or like giving a candle to the Sun. It seems so insignificant that we tend to lose the thrill of Thanksgiving. Steve Pease,

249. Which would you rather have - someone who is nice and helpful to you all the time who might not give you a gift or someone who shows no interest in you all year and then gives you a token gift once a year? Tawra J. Kellam; Jill Cooper,
250. With 'give and receive', you are offering something for the other person with a willingness to receive something in return, but not an expectation. Derek C. Doepker,
251. The gift of sight to see beyond The darker clouds of now! John McLeod,
252. We all should give what we have decided in our hearts to give, not reluctantly or under compulsion, for God loves a cheerful giver. 2 Corinthians 9:7
253. Also, remember that in relationships, you get what you give, so treat other people the way you'd like them to treat you. Gavin Bird,
254. Not what we give, but what we share, for the gift without the giver is bare; who gives himself with his alms feeds three, himself, his hungering neighbor, and me. James Russell Lowell
255. If you loved someone, you loved him, and when you had nothing else to give, you still gave him love.

256. All relationships are designed to embody a dual role of giving and receiving. If one person is doing all the giving and the other doing all the receiving, there will be an imbalance. Charles Stanley

257. Our attitude in giving matters much more to God as the size of our giving. Oluwakemi Ola-Ojo,
258. For it is in the giving that we receive. Saint Francis of Assisi
259. We are all on the same island working towards different goals. When we take a moment to acknowledge another person and give just a little of ourselves to another then we set forth amazing things. Scott Wyatt,
260. When you learn, teach, when you get, give. Maya Angelou
It is in giving, not in seeking gifts, We find out quest. James Allen
261. Our giving is a reflexive response to the grace of God in our lives. True generosity doesn't just come out of altruism or philanthropy, it comes out of joy. Rene Schlaepfer,
262. Being wealthy is about being productive, giving to others, serving society, and creating a legacy. Joe Mansueto

263.

264. We are rich only through what we give, and poor only through what we refuse. Ralph Waldo
265. Cheerful givers do not count the cost of what they give. Their hearts are set on pleasing and cheering the person to whom the gift is given. Julian of Norwich
266. You don't have to be an angel, just be someone who can give. Patti LaBelle
267. Men are rich only as they give. He who gives great service, gets great returns. Elbert Hubbard,
268. When you do give, make it a practice to do so intentionally with the idea of benefitting others. M. Ahlers,
269. And everyone can experience the joy and blessing of generosity; because everyone has something to give. Jan Grace,
270. Being connected means having access to real people anywhere in the world. Also means there is a give and take. Not just take. Devin Schoening
271. Even if you have money and you give it to people, when you are not happy for who those people are, you are not being generous. Gary M. Douglas,
272. In this world it is not what we take up, but what we give up, that makes us rich. Henry Ward
273. Giving of ourselves, sharing our gift, is what lifts us. The tricky part is, none of us knows exactly how we will impart the gift we have to give: what kind word we speak, what song we sing, which hug we give will be the one that touches another soul. Laya Saul.
274. "Your freedom is your ability to choose what you give your attention to, what you believe, what you commit to, where you devote your energy, and the kind of person you will be." Neville Berkowitz,
275. We give gifts to those we love in the tradition of the Wise Men and worship the King in the manner of both the Wise Men and the lowly shepherds. We search our minds and make ready our hearts to welcome the Messiah anew each Christmas season. Margie Harding,

276. Love is giving. God loved the world so much that He gave His Son. Jesus loved the world so much, loved you, loved me so much that He gave His life. And He wants us to love as He loved. And so now we have also to give until it hurts. True love is a giving and giving until it hurts. Mother Teresa

277. The most obvious lesson in Christ's teaching is that there is no happiness in having or getting anything, but only in giving. Henry Drummond
278. .... when you approach relationships by thinking about giving rather than getting, and about adding value before seeking value, you'll be amazed at the return you see on your investment. Mark Goulston,

279. "Giving" is a verb, a word describing an action.. It is not a badge you wear, but an action you "give". Costa Mitchell,

280... change the way you approach giving, shifting the focus from charity to empathy, from a one-way transfer to a mutually beneficial act, from guilt and obligation to pleasure and happiness. Carl Liederman

281. Given the growing inequity on our planet, what is the solution? ... a culture of giving can change the world around us while fulfilling each of our lives at the deepest level. Shiv Khemka
282.... the act of giving creates a multiplier effect, adding something to the life of those in need but also intrinsically rewarding the giver too, making him or her happier as well. Altruistic or not - the effect is positive. Boris F.J. Collardi
283. The measure of life, after all, is not its duration, but its donation. Peter Marshall

284. "Generosity: The habit of giving freely without expecting anything in return." Anonymous
285. "Generosity is giving more than you can." Khalil Gibran
286. "Generosity is the most natural outward expression of an inner attitude of compassion." Anonymous
287. "The heart that gives, gathers." Tao Te Ching
288. "Generosity isn't about money, it's about the heart." Anonymous
289. "Real generosity is doing something nice for someone who will never find out." Frank Howard Clark
290. "Generosity, kindness, honesty, humor – makes us truly rich." Waylon Lewis
291. "Where grace happens generosity happens." Max Lucado
292. "Give – the generous life." Anonymous
293. "Make generosity part of your growth strategy." Anonymous
294. "Don't wait for other people to be loving, giving, compassionate, grateful, forgiving, generous, or friendly, lead the way." Steve Maraboli
295. "A generous heart, kind speech, and a life of service and compassion are the things that renew humanity." Anonymous
296. "Real generosity toward the future lies in giving all to the present." Albert Camus
297. "Generosity isn't an act. It's a way of life." Chip Ingram
298. "You do not have to be rich to be generous." Anonymous
299. "A generous person will prosper." Anonymous
300. "The greatest way to learn the genius of generosity is to practice it in real time with others." Chip Ingram
301. "Sometimes, we need only to look at the sunrise to see the generosity of God." Jocelyn Soriano
302. "Attention is the rarest and purest form of generosity." Simone Weil
303. "The law of prosperity is generosity. If you want more, give more." Bob Proctor
304. "Goodness is about character, integrity, honesty, kindness, generosity, moral courage, and the like. More than anything else, it is about how we treat other people." Dennis Prager
305. "My intent is to be generous of spirit and live with total integrity every day of my life." Deepak Chopra
306. "Generosity is the best investment." Diane Con Furstenberg
307. "The most generous persons are those who give silently without hope of praise or reward." Carol Ryrie Brink
308. "Some people are afraid of generosity. They feel they will be taken advantage of or oppressed. In cultivating generosity, we are only oppressing our greed and attachment. This allows our true nature to come out and become lighter and freer." Ajahn Chah
309. "Generosity takes an open heart and a love that asks for nothing in return." Anonymous
310. "Being generous of spirit is a wonderful way to live." Pete Seeger
311. "Generosity is the flower of justice." Nathaniel Hawthorne

312. “Every minute of every hour of every day you are making the world just as you are making yourself, and you might as well do it with generosity and kindness and style.” Rebecca Solnit
313. “Generosity is an activity that loosens us up. By offering whatever we can – a dollar, a flower, a word of encouragement – we are training in letting go.” Pema Chodron
314. “Through radical generosity we are awakening people.” Bill Johnson
315. “Too many have dispensed with generosity in order to practice charity.” Albert Camus
316. “A generous heart, kind speech, and a life of service and compassion are the things which renew humanity.” Buddha
317. “Our only hope lies in the power of our love, generosity, tolerance and understanding and our commitment to making the world a better place for all.” Muhammad Ali
318. “Your greatness is not what you have, it’s what you give.” Anonymous

319. “In the end, though, maybe we must all give up trying to pay back the people in this world who sustain our lives. In the end, maybe it's wiser to surrender before the miraculous scope of human generosity and to just keep saying thank you, forever and sincerely, for as long as we have voices.” Elizabeth Gilbert,

320. “Generosity is giving more than you can, and pride is taking less than you need.” Khalil Gibran,
321. “You have not lived today until you have done something for someone who can never repay you.” — John Bunyan
322. “A kind gesture can reach a wound that only compassion can heal.” — Steve Maraboli,
323. “The most truly generous persons are those who give silently without hope of praise or reward.” — Carol Ryrie Brink,
324. “It’s important that what thoughts you are feeding into your mind because your thoughts create your belief and experiences. You have positive thoughts and you have negative ones too. Nurture your mind with positive thoughts: kindness, empathy, compassion, peace, love, joy, humility, generosity, etc. The more you feed your mind with positive thoughts, the more you can attract great things into your life.” — Roy T. Bennett
325. “Give a bowl of rice to a man and you will feed him for a day. Teach him how to grow his own rice and you will save his life.” — Confucius
326. “That's what I consider true generosity: You give your all, and yet you always feel as if it costs you nothing.” — Simone de Beauvoir
327. “When will our consciences grow so tender that we will act to prevent human misery rather than avenge it?” — Eleanor Roosevelt
328. “I care not for a man's religion whose dog and cat are not the better for it.” — Abraham Lincoln
329. “Conquer the angry one by not getting angry; conquer the wicked by goodness; conquer the stingy by generosity, and the liar by speaking the truth.
330. “For it is in giving that we receive.” — St. Francis of Assisi
331. “Give what you have. To someone, it may be better than you dare to think.” — Henry Wadsworth Longfellow
332. “(I)f we are going to be kind, let it be out of simple generosity, not because we fear guilt or retribution.” — J.M.
333. “People who love themselves come across as very loving, generous and kind; they express their self-confidence through humility, forgiveness and inclusiveness.” — Sanaya Roman

334. “Generosity is not in giving me that which I need more than you do, but it is in giving me that which you need more than I do.” — Kahlil Gibran,

335. “Do not neglect to show hospitality to strangers, for by doing that some have entertained angels without knowing it.” — Anonymous,
336. “Be practical as well as generous in your ideals. Keep your eyes on the stars, but remember to keep your feet on the ground.” — Theodore Roosevelt

337. “Silence the angry man with love. Silence the ill-natured man with kindness. Silence the miser with generosity. Silence the liar with truth.” — Gautama Buddha
338. “Every sunrise is an invitation for us to arise and brighten someone's day.” — Richelle E. Goodrich,
339. “I come in a world of iron...to make a world of gold through giving” — Dale Wasserman

340. “You give but little when you give of your possessions. It is when you give of yourself that you truly give.”
— Kahlil Gibran, The Prophet

341. “When will our consciences grow so tender that we will act to prevent human misery rather than avenge it?”
— Eleanor Roosevelt

342. “Give what you have. To someone, it may be better than you dare to think.” — Henry Wadsworth Longfellow

343. Here's where the real power of generosity comes in. Often, the more we give, the more we receive.
344. Author: Debbie Macomber

345. Cultivating the habit of good deeds will not only affect those around us, it will improve our own emotional well being. Author: Debbie Macomber

346. "You are so fortunate, but what are you giving back to make this world a better place for others?" Catherine Pulsifer

347. "You will be enriched in every way so that you can be generous on every occasion, and through us your generosity will result in thanksgiving to God. " 2 Corinthians 9:11

348. Unlike its close cousin, compassion, generosity requires action. To be a generous person, you must act. In many ways, generosity is compassion in action, and it is love in action. ... Generosity is a practice. And as with anything we practice, we get better at it over time. Barbara Bonner, Inspiring Generosity

349. "The people I have encountered have shown me time and time again that no matter how little you have, it is possible to give something back. They proved this by their unprompted generosity." Tony Clark

350. "No person was ever honored for what he received. Honor has been the reward for what he gave." Calvin Coolidge

351. "Generosity can have many expressions, including care, time, skill, intelligence, gifts, and money. I believe that one cannot omit any of these without curtailing them all." Mark V. Ewert,
352. "Generosity brings happiness at every stage of its expression. We experience joy in forming the intention to be generous. We experience joy in the actual act of giving something. And we experience joy in remembering the fact that we have given." Buddha

353. Generosity is giving good things to others freely and abundantly. Generous behaviors are intended to enhance the well-being of others. Patricia Snell Herzog; Heather E. Price,
354. ... to be fulfilling, generosity must be motivated internally, by joy and delight, not by guilt or obligation. That's why, when you read about generosity in the Bible, it always starts with God's generosity toward you. Rene Schlaepfer, Richer Life

355."God's given you the ability to honor him, to serve others, to make a living, to be an example, to have money to pass on to others." And I've learned from personal experience that the more generous you are, the more God blesses your life. Rick Warren

356."That's God's design for the way we give and express His generosity. Giving is meant to be joyful and fulfilling. It isn't rooted in guilt, self- righteousness, or a martyr complex. It's rooted in joy. And, in fact, it's genius. It's the smartest way to live." Chip Ingram,
357."Doing nothing for others is the undoing of one's self. We must be purposely kind and generous, or we miss the best part of existence. The heart that goes out of itself, gets large and full of joy. This is the great secret of the inner life. We do ourselves the most good doing something for others." Horace Mann
Joy |
358.I can think of few people living out the idea of biblical generosity like David. The values expressed ... are timeless because they are biblical. Chris Holdorf
359.God wants us to be generous, gracious, kind-hearted and compassionate. Robert Morris,
360.'We humans seem to be most generous when we feel grateful and desire to pass on some measure of what we have been given." Arthur W. Frank,
361."Generosity is paradoxical. Those who give, receive back in turn. By spending ourselves for others' well-being, we enhance our own standing." Christian Smith,
362."What I'm talking about is Operation Christmas Child. Every year, children around the world receive gifts because of the generosity of believers packaging and sending them a gift for Christmas. It is likely that is the only present they will receive all year." Alex Bricker,
363."The greatest way to learn the genius of generosity is to practice it in real time with others." Chip Ingram,
364."God gives generously and liberally IF you believe that He HAS ALREADY granted you what you desire." Jim Ballew,
365."While it runs contrary to much of modern thinking, generosity has the power to change your life for the better." David Khalil,
366.""People who are generous are constantly giving things away: courage, money, introductions - whatever is needed. Look around today and see what you have in abundance that others might be lacking." David Jeremiah
367.Generosity is ... revitalizing for a church, and in my experience, that's true of congregations around the world. Truax Laura
368."Generosity of character is important. It builds confidence by reminding you that you are a decent human being, and that you deserve any good things which might come your way." John Franz,

369."Grateful people achieve more and are more goal oriented as they give. People who practice being grateful are more generous and do more paying it forward." Lainey Garretson,
370."I will suggest that joy and contentment are found in simplicity and generosity, in faith and in pursuing your purpose in life." Adam Hamilton, Enough,
371."If you give, it will be given to you. And I have found that generous people are blessed people." Greg Laurie
"What I gave I have, what I spent I had; and what I left I lost." Robert of Doncaste
372."When our attitude towards ourselves is big, and our attitude toward others is generous and merciful, we attract big and generous portions of success." W. Clement Stone
373."Sometimes when we are generous in small, barely detectable ways it can change someone else's life forever." Margaret Cho
374."Love calls for generosity and self-sacrifice." Lawrence G. Lovasik,
375."Success may or may not mean that you've acquired a lot. It does mean that you have become a generous person." Robert H. Schuller

376."We must give more in order to get more. It is the generous giving of ourselves that produces the generous harvest." Orison Swett Marden
"To know when to be generous and when to be firm - this is wisdom." Elbert Hubbard
377."Blessed are those who can give without remembering and take without forgetting." Elizabeth Bibesco
Memory |
378."Giving frees us from the familiar territory of our own needs by opening our mind to the unexplained worlds occupied by the needs of others." Barbara Bush Life Changing |

379. "This is the life-giving power of generosity - doing good to others, simply because you can." Jan Grace, Generosity: The Life Giving Power of Doing Good To Others Good |

380. "What makes generosity a real and powerful witness to God's love is our action." Chris Willard, Contagious Generosity Action |

381. "Generosity and giving are incredibly important to me. As I've followed God's principles of giving, there are many times I have found myself on the giving and receiving ends of generosity. Robert Morris,
382. "Only by giving are you able to receive more than you already have." Jim Rohn

383. "No life worth living is possible without generosity. Indeed, it is doubtful whether the tender plant of newborn human life would even survive without generosity."Miroslav Volf,
384. "We should give as we would receive, cheerfully, quickly, and without hesitation; for there is no grace in a benefit that sticks to the fingers." Seneca

385. "There is no act of faith more beautiful than the generosity of the very poor.-- Abdullah"
"Generosity needs no logrolling." — Toba Beta, My Ancestor Was an Ancient Astronaut
386. "Honesty and contentment are the pathways that lead to a life of integrity and generosity."
— Gary Rohrmayer, 21 Dangerous Prayers: 21 Day Transformational Prayer Guide
387. "Be generous, be spirited, and you'll lead a happy life." — Kevin Crossley-Holland, Norse Myths: Tales of Odin, Thor and Loki
388. "Share yourself often, easily, authentically and generously from wherever you are in the moment." — Amy McTear, We Need You: A Call to an Imaginal Reality
389. "Be generous with your kindness, with your love" Akiroq Brost
390. "Happiness is the ultimate inner experience of living with generosity, love, kindness, compassion, and gratitude." — Debasish Mridha
391. The beautiful thing about inspiration is that we can live our everyday life with more courage and generosity." — Amar Ochani
392. "When you give everything You have nothing to lose." — Kate McGahan
393. "Your wealth is measured by your ability to give not your ability to receive." — Avina Celeste
394. "Attention is the rarest and purest form of generosity."
— Simone Weil

"Do all the good you can, By all the means you can, In all the ways you can, In all the places you can, At all the times you can,
To all the people you can, As long as ever you can."
— John Wesley, Letters of John Wesley
395.
"Generosity could be as contagious as the zombie plague as long as enough people were willing to be carriers."
— Jonathan Maberry, Dust and Decay

"Sir, I did not count your glasses of wine, why should you number up my cups of tea?" — Samuel Johnson, The Life of Samuel Johnson,
396. "You cannot do a kindness too soon because you never know how soon it will be too late."
— Ralph Waldo Emerson

397. "It takes generosity to discover the whole through others. If you realize you are only a violin, you can open yourself up to the world by playing your role in the concert." — Jacques-Yves Cousteau

"It wasn't that he was specially ungenerous but that he put things off to give his generosity a longer and more significant route."
— Saul Bellow, The Adventures of Augie March

"The greatest gift you ever give is your honest self." — Fred Rogers

"Be a gift to everyone who enters your life, and to everyone whose life you enter. Be careful not to enter another's life if you cannot be a gift. (You can always be a gift, because you always are the gift — yet sometimes you don't let yourself know that.)"
— Neale Donald Walsch, Conversations With God: An Uncommon Dialogue, Vol.2

"How can I give you nothing? Do you seriously expect me to buy nothing, wrap up nothing, stick a gift tag on nothing, send a card saying I really hope you like your nothing and lie awake worrying that the nothing I got you was the right color!"
— Hilary McKay, Caddy Ever After

"Time cannot be packaged and ribboned and left under trees for Christmas morning. Time can't be given. But it can be shared."
—Cecilia Ahern, The Gift

398. Giving frees us from the familiar territory of our own needs by opening our mind to the unexplained worlds occupied by the needs of others. Author: Barbara Bush

399. When we give cheerfully and accept gratefully, everyone is blessed. Author: Maya Angelou

400. If there is anything I have learned about men and women, it is that there is a deeper spirit of altruism than is ever evident. Just as the rivers we see are minor compared to the underground streams, so, too, the idealism that is visible is minor compared to what people carry in their hearts unreleased or scarcely released. Author: Albert Schweitzer

401. Oh, the comfort -- the inexpressible comfort of feeling safe with a person -- having neither to weigh thoughts nor measure words, but pouring them all right out, just as they are, chaff and grain together, certain that a faithful hand will take and sift them, keep what is worth keeping, and with the breath of kindness blow the rest away. Author: Dinah Maria Mulock Craik, poet and novelist (26 Apr 1826-1887)

402. One can never pay in gratitude; one can only pay "in kind" somewhere else in life. Author:
403. True prosperity is when you earn wealth in the process of making others wealthy. It is not a zero sum game.
404. Author: Unknown

405. Selflessness. Humility. Truthfulness. These are the three marks of an honorable man. Author: Suzy Kassem

406. Too many have dispensed with generosity in order to practice charity.
407. Author: Albert Camus, writer and philosopher (1913-1960)

408. It is a powerful practice to be generous when you are the one feeling in need. Author: Allan Lokos

409. Be generous in prosperity, and thankful in adversity. Be worthy of the trust of thy neighbor, and look upon him with a bright and friendly face. Be a treasure to the poor, an admonisher to the rich, an answerer of the cry of the needy, a preserver of the sanctity of thy pledge. Sacred text: Gleanings From the Writings of Bahá'u'lláh,

410. As desire abates, generosity is born. When we are connected and present, what else is there to do but give? : Jack Kornfield

411. If you want trust, trust others. If you want respect, respect others. If you want help, help others. If you want love and peace in your life, give them away. If you want great friends, be one. That's how it works.
412. Author: Dan Zadra

413. To enjoy the journey is to leap into people's lives. To enjoy the journey is to give until the stretch is a sacrifice. The question always is: what is it in life that will pull you out of your seat to be brave, risk and serve. Author: Janie Jasin

414. One of the sanest, surest, and most generous joys of life comes from being happy over the good fortune of others. Author: Archibald Rutledge

415. We must try to contribute joy to the world. That is true no matter what our problems, our health, our circumstances. We must try. I didn't always know this and am happy I lived long enough to find out.
416. Author: Roger Ebert

417. A generous individual will always respect the old and show love and care for the young.

418. A generous individual will always have mercy for the poor and any other individual who suffers from any kind of disability.

419. "Give what you have. To someone, it may be better than you dare to think." —Henry Longfellow

420. Generosity makes our world a better place. It improves the life of the receiver. And it improves the life of the giver. Yet, despite the benefits, generosity is still too rare in our world today.
421. onsider then, these 9 ways generous people see the world differently:
422. They recognize the resource pie is not finite.
423. The mindset of competition—that my resources only grow when someone else's shrinks—is based on a faulty premise. It assumes there is a finite sized pie and if someone else enjoys success, my opportunity shrinks. But quite frankly, this thinking is incorrect. The pie of resources is not finite. It continues to grow as society benefits from others' success.

424. They know that generosity leads to greater happiness.
425. Studies confirm what generous people already know: Giving increases happiness, fulfillment, and purpose in the life of the giver. We were not designed to be creatures of selfishness. Instead, we were designed to seek and discover happiness in loving and caring for others. And those who decide to look for fulfillment there, quickly discover it.

426. They find success in helping others succeed.

427. The easiest path to finding success in your life is to help someone else find theirs. After all, our contribution to this world has to be measured by something more significant than the size of our savings account. Our lives are going to find their greatest significance in how we choose to live them—and how we enable others to live theirs.

428. They believe changing even one life is worthwhile.
429. Generous people are quick to admit the world's problems will never be solved by one person… and perhaps, never completely solved even in the future. But perfection does not slow them. To them, changing even one life within their sphere of influence is reward enough. And is a worthy endeavor to be sought.

8. They see more resources to give than money.
430. We have so much more to offer this world than just financial resources. We have time, talents, experiences, and lessons learned. Giving people think beyond their money and begin to invest their lives into others. Often times, this step can be more difficult than signing a check… but usually, it is more desperately needed.

9. They fully embrace the reality that life is short.
431. Life is short. And we only get one shot at it. Those who fully embrace this reality learn to live life in light of it. They recognize we have but a short time to leave our imprint on this world. And they cheerfully give their resources to accomplish it.

432. It is true that it takes courage to be generous.

433. It takes trust.

434. It takes faith.

435. It takes surrender.

436. It takes an open heart and a love that asks for nothing in return.

437. Be brave, be bold in your generosity.

438. What you receive will astound you.

439. "Generosity is the most natural outward expression of an inner attitude of compassion and loving-kindness."

440. Dalai Lama XIV

Teaching on unity & GIVING from Dr Lukes books and teachings on Unity

IMPORTANCE, MANIFESTATIONS AND NUGGETS OF UNITY/ TEAMWORK

FOR THE CHURCHES IN AMERICA

1. Unity is Gods desire for the church Prayer of Jesus. John 17
2. " I pray for them that they may be one as we are in the trinity"
3. Body is complete only through Unity. Every organ is valuable complementing each other in function (Body of Christ 1 cor 12:12)
4. Born of One spirit and one destiny in Faith therefore endeavour to keep the bond of peace as we press to fulfil our call. (Ephesians 4:1)
5. Those who are doing the work of God are for us. (Jesus warned His disciples not fight other MINISTERS who are doing Kingdom work although they may not be KNOWN or PART of our Network.
6. Much work is accomplished. (Through Unity Nehemiah was able to build Mobilize the construction of big wall round Jerusalem in 52 days, Mind to work, protect each other, respond to each others needs) Different families / Different tasks one wall
7. Nothing can be impossible (Gods testimony about the people who had one language building the tower of Babel)
8. Assignments will be easy and accomplished. (Children of Israel were in such a great accord when building the Tabernacle and Temple They gave more that enough) 50 years after the day of Pentecost the gospel reached all over the world without the technology & facilities we have because
9. The church will be highly esteemed that no Hypocrisy was surviving. ANNANIAS & WIFE DIED NOT BECAUSE OF LYING BUT BREAKING THE COOPERATE ANOINTING OF UNITY. (SIN OF NOT DISCERNING THE BODY others are weak and others sleep.
10. There were 12 tribes of Israel that were to take portions of the Promised Land. (No one ministry can take over a city/ town alone. Every minister and ministry have there share.
11. Unity is Key to birthing and sustaining revival (Early church and other revivals
12. The early church was in One Accord and accomplished much, miracles & Growth. Acts 1:14 in waiting Upper room, Day of Pentecost Acts 2:1, In Fellowship Acts 2:46 , In Prayer Acts 4:24, In giving Acts 5:12, In submission to the Apostles & Great Commission Acts 8:6, In consultations, Doctrine & Network Acts 15:25 Acts 18:12, Acts 19:29.
13. 11) Unity prayer accomplishes much- Where two or three agree concerning anything it shall be done Math 18:19, One shall chase one thousand two shall put 10,000 to flight Deut 32: 30
14. Winning teams use the power of teamwork more than one skilled person to Win (Italy, Egypt, German etc) Olympics relay team lost because of exchange of button. WE ARE MEMBERS ONE TEAM and we must finish stronger in UNITY.

15. There is protection in Unity – Ziporah protected moses by discerning his weakness, Hyenas / Zebras/ Vouchers/ Bees/ insects Use the power of unity to eat and defend.
16. There is extension / Not division in the kingdom unity (Philip / Peter, Paul / Barnabas, Peter / Paul)
17. One Kingdom One Ark many animals of various characters accommodating each other Until God finished the work. NO ANIMAL WAS THROWN OUT.
18. One vine yard different workers and assignment (Paul planted Apollos watered GOD GAVE INCREASE)
19. One spirit but (Various / Different ADMINISTRATIONS, METHODOLOGIES, of Gifts) I Corinthians.
20. One Kingdom various assignments grace (Paul to gentiles and Kings / Peter to the jews)
21. One Kingdom same office but various levels of grace and working.

22. One spirit upon different workers from various backgrounds and experiences. (Every disciple of Jesus was unique in ministry and purpose because of BACKGROUND)
23. Many are called but with various levels of faith.
24. The Fivefold minister's assignment is To bring maturity to the body, To Equip Saints for work of the ministry, Build the Church upon a Strong foundation and PROMOTE UNITY OF FAITH / NOT DIVISION.
25. Seed of division spreads so easily to the INNOCENT members who again become victims. Aron , Korah, Dathan, Spies to the land. (Plagues)
26. You need other people to establish your assignment. Moses needed the elders of Israel to be received by Israel, Paul needed Annanias / Barnabas to be received and instructed, Paul needed brethren to be lowered in a basket from the walls of Damascus, the spies needed Rahab to be hidden from death
27. Every covenant of ministry should be respected. (Junior respect seniors Romans 13, Early church respected Peter (council from Antioch, Paul came to be with Peter, Joshua respected and served Moses) / Seniors respect the Junior (Fathers do not provoke children, If you stumble the little ones a stone in the Neck. (RANKS IN ARMY – Police / Air force/ Navy – Miriam failed to realize this fact and landed in Judgement.
28. Unity brings excellence in the Kingdom. Apollo's was corrected by Priscilla and Aquilla on Doctrine, Paul corrected peter, Barnabas stood with Mark in weakness until he became an Valuable Asset to Paul who had earlier rejected him. (As iron sharpens iron so does a man sharpen another).
29. Unity is promoted through honour and submission to each other- You cannot command submission if you have never or do not submit. (You hold a hand of another and another holds your hands)
30. Every minister with grace of God is a GOOD ground to multiply seed sown- GOOD / BAD (Gal 6.9)
31. Let us unit in work of God which has eternal rewards , remembering it is only the fruit and stewardship that will count not strives and our rewards will come from God (Parable of talents, I cor 4)
32. Unity will make God glorified and a great Key to Evangelism
33. Unity is the true MARK of Kingdom people of God. (The world will know you have send me and they belong to me)
34. Many are called but not all are willing to pay the price. Out ward results represent price paid privately so honour every result as a price paid.
35. Unity provides basis of Checks and balances
36. Unity provides bases of being corrected
37. Unity realises avenues of gifts to be circulated to benefit the body.
38. When you are alone you may breakout of pressure and loneliness (Elijah & John the Baptist)

Purpose and Blessings of Team Ministry

The blessing is to be found in the cluster of grapes, not in one grape alone (Isaiah 65:8).

Rev. Ken Malmin in Leadership notes gives the following points on team ministry.

1. A Team Ministry provides a living demonstration of Body ministry (I Corinthians 12).
2. Team Ministry makes it better in speaking, "present truth" for there is more than one voice speaking the same thing (Deuteronomy 17:6; Matthew 18: 16; II Corinthians 13:10).
3. Team Ministry makes it easier to find the mind of the Lord and His will in things (Matthew 18:19, 20; Daniel 2-4. Daniel and his friends)
4. Team Ministry is more effective and produces greater results (Ecclesiastes 4:9- 12).
5. Team Ministry provides for greater safety and checks and balances (Proverbs 11-14).
6. Team Ministry helps to guard against the immoral or other snares set by the enemy which have ensnared so many lone ministries.
7. Team Ministry provides strength and encouragement for the ministries themselves (Exodus 17: 12). Hands may be upheld giving inspiration and spiritual strength in the fellowship of team-work.
8. Team Ministry provides an opportunity for the development of disciples in the Lord and releasing their ministries. i.e. Timothy, Titus, Joshua, Elisha, all were trained under other ministries.

When brethren dwell together in UNITY, then the Lord commands the blessing, even life for evermore. This unity must be demonstrated in the leadership of the local Church in order to be manifested in the congregation (Psalms 133).

Ethics that develop UNITY.

- Love one another (John 13:34-35; John 15:12,17; 1 Thes 3:3:12; Thes.4:9; 1Pet 1:22;1John3:18;1John4:7, 11-12)
- Encourage one another (1Thes.4:18;Heb.3:13;Heb.10:25)
- Stir up one another on towards love and good deeds (Heb 10:24)
- Build one another up (1Thes. 5:11)
- Edify one another (Rom 14:19)
- Admonish one another (Col. 3:16)
- Instruct one another (Rom 15:14)
- Serve one another Gal 5:13; 1Peter4:10
- Bear with one another (Eph 4:2; Col l3:13)
- Forgive one another (Eph 4:32; Col 3:13)
- Be kind to one another Eph 4:32)
- Be compassionate to one another (Eph 4:32; 1Pet3:8)
- Be devoted to one another (Rom 12:10)
- Honour one another (Rom. 12:10)
- Live in harmony with one another(Rom. 12:16;1Pet3:8)
- Be sympathetic with one another(1Pt 3:8)
- Be gentle with one another (Eph.4:2;1pt3:8)
- Be patient with one another (Eph.4:2)
- Accept one another (Rom. 15:7)
- Submit to one another (Eph5:21)
- Clothe yourselves with humility towards one another (Eph4:2;1Pt5:5)
- Teach one another (Col.3:16)
- Live at peace with one another (Mark 9:50; Rom.12:18)
- Confess your sins to one another (James 5:16)
- Pray for one another (Jam 5:16)
- Offer hospitality to one another (1Pet 4:9)
- Greet one another (Rom 16:16; 1Pet 5:14)

- Have fellowship with one another (1John 1:7)
- Agree with one another (1Cor 1:10)
- Carry one another's burdens (Gal6:2)
- Gifts and giving to each other (Spiritual and physical connection)

THINGS THAT DESTROY UNITY CHURCH

The defiled heart of the leader. Do not backbite or devour one another (Gal 5:15)

- Do not provoke or envy one another (Gal 5:26)
- Do not hate one another (Tit 3:3)
- Do not judge one another (Rom.14:13)
- Do not lie to one another (Col 3:9)
- Do not slander or speak evil about one another (Jam4:11)
- Do not grumble against one another (Jam5:9)
- Do not defile yourself or Disobey God

(The whole body suffers and penalized for the disobedience of one SIN OF ACHAN)

KEEP OFF FROM SOME OF THE THINGS THAT DESTROY FELLOWSHIP, UNITY AND TEAMWORK IN CHURCH

1. A competitive or a comparative spirit (Matthew 18:1-4)
2. A dictatorial spirit, or lordship(1Peter 5:1-5; Matthew23:11)
3. A proud self-exalting spirit (Luke 22:24) that bring strife. Pride brings contention (Proverbs 13:10)
4. Party spirit (1Corinthians 1:10)
5. A Diotrephes spirit loving the pre-eminence (111John 9,10). The fruit of such is evil deeds, malicious spirit, rejection of others, forbidding fellowship and excommunicating others
6. Lack of communication
7. Lack of transparency, dishonesty with each other cf. (Ephesians 5:8-14) Light.
8. Lack of divine love
9. Lack of tolerance. cf. The twelve apostles.
10. Lack of forgiving spirit (Ephesians 4:32; Matthew 18:21,22)
11. Lack of spiritual maturity; carnality manifested (1Corinthians 3:1-4)
12. Lack of true humility (Matthew 18:1-4; Mark 9:33-37)
13. Lack of wisdom, doing a thing the right way, time, place, words.
14. Lack of submissive, servant spirit (1Peter 5:3; Mark 10:42-45; 1Kings 12:7-11)
15. Lack of confidence in each other (Philippians 4:13)
16. Lack of concentration or wrong priorities (Matthew 6:33)
17. Lack of organization in the team; misdirected efforts.
18. Lack of spiritual concern for others (Matthew 23)
19. Lack of knowledge (Hosea 4:6; Proverbs 3)

20. Lack of mutual respect for each other (Ephesians 5:29,30)
21. Lack of co-operative efforts
22. Lack of appreciation for one another; taking one another for granted
23. Lack of maintaining vision (Proverbs 29:18)
24. Lack of involvement in the work (Haggai 1:4)
25. Lack of pure motive. Beware of Judas or Simony spirit (1Timothy 6)
26. Lack of teachable spirit; leaning to own understanding

Acknowledgment of Content on Unity from Foundations of Christian Living, The Church in the New Testament Kelvin Corner.

1) To build & facilitate His kingdom

- God gave Israelites money to build Him a tabernacle Exodus 25
- God Enriched David & Solomon to Build the temple (David & Solomon gave exceedingly for the building & Dedication of the house of Temple) God Blessed Abraham to Build Israel
- God allowed peter to catch the fish with money to pay Kingdom Bills

NB in this end time revival God will bless believers with wealth to empower them to support end time Kingdom task

2 To worship God – The highest worship is Giving (First fruits, Tithes, offerings)

- God commands that you should not come before his presence with empty hands.
- Abel & Cain first devotion to God was tested with giving.
- Abraham's supreme worship was tested in willingness to give.
- The Children of Israel were given

3 Building the right Image Kingdom of God collectively & Believers Individually

- The strength and Image of Every kingdom is respected and valued by its resources
- Demons will respect ANOINTING but people regard RESOURCES.

4) Enjoy life – God desires us to have Joy in Full.

- Apart from spiritual joy all the other joy is from PHYSICAL THINGS. (HOLIDAYS, HOUSES, CARS, DRESSING WELL, GOOD FOOD,
- Joshua 1:15 ---- God desired the Children of Israel inherit the
- Ecclesiastes 2: 25 There is nothing better for a man, than that he should eat and drink and that he should make his soul good in his labour this also I saw that it was from the hand of God.
- Ecclesiastes 3: 13 And also everyman should eat and drink and enjoy the good of all his labour because it is the gift of God.

5) Live Comfortably Lives

> God desired and promised the children of Israel to make them comfortable and bless them with beautiful houses, fruitful livestock & vineyards so that they may glorify him.

6) To Inheritance for Our Children

Proverbs 13:12 A good man leaves an inheritance for his children, Children . Numbers 26:53: 27:7-11, Psalms 25:13, I Chronicles 28: 8, I Timothy 5: 8

7) Wealth Gives Us Answer To All Things

Ecclesiastes 10: 19 Money answers all things, Every needed aspect of life has Value to it and that value today is MONEY

8) Money will win and maintain Friendship

- Proverbs 19:4 Wealth makes many friends but the poor is separated from His neighbour
- Luke 16: 9 parable of a shrewd servant "Make to yourself friends by means of Mammon of righteousness that when it fails they may receive you into habitation".

GIFTS, OUTINGS, and COMMUNICATION BUILD FRIENDSHIPS. ALL THIS IS AN EXPENSIVE AFFAIR. FRIENDSHIP IS IMPORTANT FOR EVANGELISM.

9) It ONE of the signs of GOD COVENANT

God declared to Israel through Isaiah that he shall bless them until other nations know that He is a God with a Patriarch covenant with Israel. Isaiah 60:16

10) Wealth is accompanies every true revival.

- Joel 2:1-28 Promised revival had wealth first restored then outpouring of the spirit
- Haggai 2: Gold and silver connected to later glory
- Exodus 12: Children of Israel released from Egypt (revived) and given wealth
- Isaiah 60: 1-22 The revival that Isaiah saw was full of material
- Act 4:34 Neither was their any among them that lacked.

11) Wealth give Rest

Most of life anxieties are wealth deficiency related, if you have money you get rest in SOME areas of life. Rest Joshua 1:15 ---- God desired the Children of Israel inherit the

12) Wealth gives Freedom & Personal Dependency.

- If you have a car and fuel you can go where you want whatever time.
- You can go wherever you want and when ever you desire
- You can eat & lodge wherever you want whenever you wish.
- You can roll out your potential and dreams freely.

13) Care and love for others

- Good Samaritan anointed the wounds with oil and paid all his bills in a hotel until he was healed.
- The bible esteems us to do good to all and sow seeds to each other along with taking care of widow, orphans, the poor. YOU CANT DO THIS WITHOUT RESOURCES. Gal 6: 8

14) Wealth facilitates Good health

- Eating good diet promotes health this requires money
- resting in mind promotes health this requires money (High blood pressure , stomach ulcers,
- Proper health care (Exercise Gyms, Skin care, etc requires money)

15) Wealth gives us a voice and respect.

Eccl 9: 16– A poor mans wisdom is despised and his words are not heard)

- People who have wealth will speak and others will listen
- A wealthy Church will be respected by their community and their gospel respected.
- The most respected in a family is not the oldest but the richest

16) Wealth is a defense (Money is a defense Eccl 7: 12) A poor man has no defense .A rich man will have and maintain hedge in his house with security systems, guards, have insurance for compensations, hire a lawyer to defend his case and sort out his matters,
WHEN ISRAEL SETTLED NEHEMIAH BUILD A WALL WITH RESOURCES FOR DEFENCE THAT WAS VERY EXPENSIVE.

17) Wealth results to thanksgiving To God.

- God told Israelites he will bless them so that the will be careful to be glorify God
- Heathen will glorify God when they glorify God.
- Prayer language changes to thanksgiving easily when all needs are met.

18) To send the gospel to the Nations

- Roman 10:15------ "How can they go unless they are sent?"
- Paul commended the Corinth Church
- The Great commission GO YE means SPEND
- Women of Zeraphath facilitated for Elijah.

NB TO ALL WHO DESIRE TO BE FACILITATORS OF THE GOSPEL
GOD WILL PUT MONEY IN THEIR HANDS TO PROVIDE FOR THE GOSPEL
19) Grow spiritually. Money facilitates spiritual growth directly

- With money you will buy spiritual resources (books , cds, that will help you grow)
- With Money you can support Gods work
- You can attend any mission or valuable conference that leads you to be spiritual. Pvbs 23:23 **BUY** spiritual knowledge and sell it not

20) Take care of our families & Remain in the faith. I Timothy 5:8 He who can not take care of His family is worse than a non believer.

1) Give yourself to the Lord first (2Cor 8:5)
2) Give sacrificially (Luke 21:1-4)
3) Give willingly (1Chro 29:3,5,9)
4) Give cheerfully (2 Cor 9:7)
5) Give liberally (2 Cor 9:13)
6) Give generously (2 Cor 8:2)
7) Give proportionally (2 Cor 8:2)
8) Give regularly (1 Cor 16:1-2)
9) Give systematically (2 Cor 9:7)
10) Give lovingly (2 Cor 8:24)
11) Give thankfully (2 Cor 8:24)
12) Give according to your ability (Deut 16:17)
13) Give as sowing a seed of faith (Galatians 6:7)
14) Give with simplicity (Rom 12:8)
15) Give freely; as you have received

16) Give as unto the Lord, not man (Math 6:3)
17) Give out of compassion.

When you practice the principles that I have shared in this chapter, God's blessing, favour, protection will come upon your business.

God set the principle of sowing and reaping, just like the natural principal of day and night.
(Gen 8:22) "While the earth remains, Seedtime and harvest, cold and heat, Winter and summer, and day and night shall not cease".

We cannot ignore this principle if we are to tap from the supernatural provision of God. This principle operates on some basic rules that include:-

a) Whatever you sow, you will reap,
(Gal 6:7-8) "Do not be deceived, God is not mocked; for whatever a man sows, that he will also reap. (8) For he who sows to his flesh will of the flesh reap corruption, but he who sows to the Spirit will of the Spirit reap everlasting life".

This principle is applied in farming. If you want to harvest maize, you do not plant a bean seed. Therefore if you need an increase in finances, you must sow money in the kingdom of God; if you want to have friends, you must be friendly. Likewise, if you want to be loved, you must love.

This principle is not only centred on good things but also on bad things.
. If you fight others in business others will fight you.
. If you cheat others, you will be cheated.
. If you steal from others, others will steal from you
. If you hate others, you will be hated.

b) You must sow in fertile ground.
The fertile ground is the kingdom of God, and the lives of those who are of the household of faith.
A wise farmer does not sow on barren land. He looks for a fertile ground. If the land is not fertile, he uses artificial methods to enrich the soil so that he does not lose his seed. Likewise you should not "waste your seed". We determine good ground by the spiritual fruit of a minister, ministry or local church. "Therefore by their fruits you will know them".
(Luke 6:43) "For a good tree does not bear bad fruit, nor does a bad tree bear good fruit".

The quality of the spiritual fruit is gauged by the impact in winning souls, sharing the living Word, righteousness, and manifestation of the glory of God. Jesus declared that those who shall leave material things for the sake of the gospel will read a hundred fold blessings.

(Mar 10:29-30) "So Jesus answered and said, "Assuredly, I say to you, there is no one who has left house or brothers or sisters or father or mother or wife or children or lands, for My sake and the gospel's, (30) "who shall not receive a hundredfold now in this time; houses and brothers and sisters and mothers and children and lands, with persecutions; and inthe age to come, eternal life".

Following are good grounds to sow in:

. Your local church, if it is fruitful
. Another church or ministry that is fruitful
. Those who teach you the word
(Gal 6:6) "Let him who is taught the word share in all good things with him who teaches".
. Your spiritual father
. Other fruitful ministers of the Gospel. For example; The Church in Macedonia and Phillipi were sowing to Paul's life by supporting his missionary work.

c) The harvest is greater than the seed.
The harvest is normally greater than the seed you sow. No wise farmer would count gain if the seed he sowed brings forth the same quantity in the harvest.
(Luke 6:38) "Give, and it will be given to you: good measure, pressed down, shaken together, and running over will be put into your bosom. For with the same measure that you use, it will be measured back to you".

(2 Cor 9:6-8) "But this I say: He who sows sparingly will also reap sparingly, and he who sows bountifully will also reap bountifully. (7) So let each one give as he purposes in his heart, not grudgingly or of necessity; for God loves a cheerful give. (8) And God is able to make all grace abound toward you, that you, always having all sufficiency in all things, may have abundance for every good work".

(Mark 4:24) "Then He said to them, "Take heed what you hear. With the same measure you use, it will be measured to you; and to you who hear, more will be give.".
Those who continually sow will always increase because whatever they sow returns to them in higher measure.
If you practice this, your business will prosper; and God's favour will be upon it, to bring supernatural increase.

d) Every seed has got it's harvest time.

If you plant a mango seed, you do not expect to read at the same time with the one who planted a maize seed. Therefore it would be wrong to have a mentality of instant fruit. Some fruits will take a long time to mature, but to mature reaping will eventually come. Others will come fast, but they may yield just a little,

(Eccl 3:102) "To everything there is a season, A time for every purpose under heave: (2) A time to be born, and a time to die; a time plant, and a time to pluck what is planted.

e) Add "Manure to increase the harvest".

Just like a farmer adds manure or fertiliser to the soil to increase the harvest, so also, you should mix your spiritual sowing with other ingredients. This includes mixing your giving with holiness, serving God, prayer, diligence and other spiritual principles of increase. In the parable of the sower, the seeds that fell in the fertile ground did not yield the same amounts , yet the seed were thesame type, and they fell on the same type of soil.

(Mark 4:20) "But these are the ones sown on good ground, those who hear the word, accept it, and bear fruit: some thirty fold, some sixty, and some a hundred".

When our obedience is complete, we should expect to receive the hundred fold blessing.

f) When the harvest is ripe, reap the harvest and set aside a seed to sow again.

When the harvest is ripe, you must bring it in. Many people are reluctant to bring in the harvest. If you fail to bring in the harvest when it is ripe, it will rot. The harvest may come in through the commanded blessings, of God, through men or through God's favour for increase in your business.

(Mark 4:29) "But when the grain ripens, immediately he puts in the sickle, because the harvest has come".

From your harvest set apart more seed to sow. Do not eat the seed; so sow it that you can have continuity of your blessings.

g) God gives Seed to the sower.

When you set your priorities to sow in the Kingdom of God, He will give you a seed to sow. Consider (2Cor 9:10-11).
When God provided the seed, do not eat it, but sow it with thanksgiving and with great expectation.

h) Do not Curse your seed.
It is possible to curse your seed, after you have sown it, through negative confession or unbelief. Some people sow to churches or ministers and then they begin criticising them. That is cursing your seed and it will rot in the ground, and yield nothing.
(James 3:8-10) "But no man can tame the tongue. It is an unruly evil, full of deadly poison. (9) With it we bless our God and Father, and with it we curse men, who have been made in the similitude of God. (10) Out of the same mouth proceed blessing and cursing. My brethren, these things ought not to be so".
You should give in faith, without any doubt, and expect a harvest.
(Heb 11:6) "But without faith it is impossible to please Him, for he who comes to God must believe that He is, and that He is a rewarder of those who diligently seek Him".
(Rom 14:23) "But he who doubts is condemned if he eats, because he does not eat from faith; for whatever is not from faith is sin".

(2Cor 9:7) "So let each one give as he purposes in his heart, not grudgingly or of necessity; for God loves a cheerful giver".

Helpers Of Africa International through Kingdom Global Education Agency will partner and support development of Education at all levels of pre-school, primary, secondary, colleges and university along with technical and vocational training national and globally towards development this sector support and partner for global and national boast in education sector. Education is an important issue in global citizen's life. It is the key to success in the future and to have many opportunities to nations and the world in creating a universal language of logical thinking, status, career positions, building moral ethics, platform of holistic development, building life skills, raising professionals and entrepreneurs among many other benefits. Education plays a big role in illumination and developing global citizens in mind and thinking. It helps build capacity to plan for work or pursue a higher education while graduating from university. Having education in an area helps people think, feel, and behave in a way that contributes to their success, and improves not only their personal satisfaction but also their community, nation and globally. In addition, education develops human personality, thoughts, dealing with others and prepares people for life experiences. It makes people have a special status in their own society and everywhere they live in. I believe that everyone is entitled to have education "from cradle to grave". There are various benefits of having education such as having a good career, having a good status in society, and having self-confidence.

First of all, education gives us the chance of having a good career in our life. We can have plenty of chances to work at any workplace we wish. In other words, opportunities for a better employment can be more and easy. The highly educated we are the better chance we get. Moreover, education polishes our mind, reinforces our thoughts, and strengthens our character and behaviors toward others. It equips us with information in various fields in general and our specialization in particular; especially what we need to master in our job career. Therefore, without education we may not survive properly nor have a decent profession. Furthermore, education grants us a good status in society. As educated people, we are considered as a valuable source of knowledge for our society. Having education helps us teach others morals, manners and ethics in our society. For this reason, people deal with us in a considerable and special way for being productive and resourceful. In addition, education makes us a role model in society when our people need us to guide them to the right way or when they want to take a decision. Thus, it is an honor for us to serve our community and contribute towards its advancement. In fact, being educated is an advantage to help our people and build a good society. Besides, it is very well-known that having self-confidence is always generated from education. It is a great blessing for us to have self-confidence which leads to many advantages and success in life.

All in all, education is the process of acquiring knowledge and information that lead to a successful future. As discussed above, there are a lot of positive traits of having education; such as having a good career, having a good status in society, and having self-confidence. Education is a learning experience, where an individual learns about various aspects of life, understands the different perspectives and tries to apply it in daily life. Education is important to the children, to adults and to the society. Education gives people knowledge of the world around them and changes it into something better. It develops in people a perspective of looking at life, helps them build opinions and have points of view on things in life.

Mahatma Gandhi once quoted, "Live as if you were to die tomorrow. Learn as if you were to live forever." This portrays the importance of education and learning in one's life and the world at large that is why we shall invest heavily in education.If a child is joined in a school, he will start learning, playing and enjoy with friends. While learning he will understand what position he is in acquiring knowledge and he will learn slowly to grab the top position. While playing he will understand the logic to win it; this way they start building goals at an early stage. But parents should understand whether their children are working only for ranks and grades or acquiring some wisdom or not. It is important that they are aware of the purpose of education and how it works in real life. They start maintaining a structured life. To an individual, education increases the level of confidence as it makes a person aware about his/her surroundings. It also helps an individual to communicate better and express his/her opinions. The mind gets matured by proper education and training. A person can judge what is right and what is not. Education makes a person independent and helps him abide by the rules of the land. Education improves the standard of living of the people. It helps people understand their needs and gives them the way to acquire them. Education provides a platform for a decent livelihood. One can take up a job in industry or another professional service if he/she is educated. Advances in medicine, equipments, technology were possible due to constant exploration and research. People of current age carry this exploration. They could do so due to their education and knowledge about the past technology. People with higher education in science, mathematics, and technology can do this. The food production, medicine, electronic gadgets, automobiles and other luxury items were developed due to the spread of science and technology among the professionals through studies. To be a better human, an active participant in society and to gain respect from the world one should always learn new things. Learning new things in education. Education makes us view obstacles as challenges to overcome with no fear; facing new things. It is the main factor behind successful people and the merit of developed countries. Therefore, education is deemed a real success behind any future success.

Helpers Of Africa International

Kingdom Global Education Agency

Helpers Of Africa International through Kingdom Global Education Agency has capture research done be UN, UNICEF and UNESCO along with other global education agencies to work out it strategic plan that indicates around 63 million adolescents between the ages of 12 and 15 years are denied their right to an education, according to a new joint report from the UNESCO Institute for Statistics and UNICEF, Fixing the Broken Promise of Education for All: Findings from the Global Initiative on Out-of-School Children, released today during the Education World Forum. Globally, 1 in 5 adolescents is not in school compared to almost 1 in 10 primary school-age children. So adolescents are twice as likely to be out of school as their younger counterparts. The report also shows that as children get older, the risk that they will never start school or will drop out increases especially with Covid 19 that has shaken the entire education sector globally. In total, 121 million children and adolescents have either never started school or dropped out despite the international community's promise to achieve Education for All by 2015. Data show that there has been almost no progress in reducing this number since 2007. Children living in conflict, child labourers and those facing discrimination based on ethnicity, gender and disability are the most affected. There is also a growing concern that previous gains in expanding access to education will erode without a major shift in policies and resources. "Business as usual strategies based on more teachers, more classrooms and more textbooks are not enough to reach the most disadvantaged children," said UNESCO Director-General Irina Bokova. "We need targeted interventions to reach the families displaced by conflict, the girls forced to stay home, the children with disabilities and the millions obliged to work. But these policies come at a cost. This report serves as wake-up call to mobilize the resources needed to guarantee basic education for every child, once and for all." As pressure mounts to include universal secondary education in the post-2015 global development agenda, the report shows the way forward to break the barriers that keep children out of school. If current trends continue, 25 million children – 15 million girls and 10 million boys – are likely to never set foot inside a classroom. "To realize the promise of universal education for every child, we need a global commitment to invest in three areas: getting more children into primary school; in helping more children – especially girls – stay in school through the secondary level; and improving the quality of the learning they receive throughout their schooling," said UNICEF Executive Director Anthony Lake. "There should be no debate among these priorities: we need to do all three, because the success of every child – and the impact of our investment in education – depends on all three."

UNESCO and UNICEF believe that new policies and new players as Helpers Of Africa International must come must in to focus specifically on the most marginalized children as part of larger efforts to improve access to and quality of education. To do this, governments need robust information on who these children are, where they live, whether they have ever attended school and if they are likely to do so in the future. But many of these children remain invisible within current data collection methods. Children with disabilities are amongst the least visible – reliable data simply don't exist – and they are being overlooked in national responses to out-of-school children. The report calls for action to invest in better data and demonstrates that reaching the most marginalized may initially cost more but also yields greater benefits. Better statistics and innovative tools can help guide governments and donors to allocate their education funding more effectively and efficiently. A 2019 data published by the United Nations cultural agency reveals that without taking urgent measures, around 12 million young children will never set foot inside a school, with girls facing "the greatest barriers". "According to our projections, nine million girls of primary school age will never start school or set foot in a classroom, compared to about three million boys", said Audrey Azoulay, Director-General of the UN Educational, Scientific and Cultural Organization (UNESCO). According to updated information on the world's out-of-school children from the UNESCO Institute for Statistics (UIS), little or no progress has been seen in more than a decade. "Four of those nine million girls live in sub-Saharan Africa, where the situation gives cause for even greater concern", Ms. Azoulay continued. "We must therefore continue to centre our actions on girls' and women's education, as an utmost priority." A grim picture roughly 258 million children, adolescents and youth between the ages of six and 17 were out of school. This new data paints a clear picture of the difficulties ahead in achieving inclusive quality education for all, one of the Sustainable Development Goals (SDGs) set by the international community for 2030. It also confirms recent UNESCO projections showing that at the present rate, by 2030, one-in-six children will not be attending primary and secondary school at all, and only six in every ten young people will complete secondary education. The update also highlights the gap between the world's richest and poorest countries. According to UIS figures, 19 per cent of six-to-11-year olds in low-income countries are out of school, compared to just two per cent in high-income States. And the gap grows wider still for older children and youth, where some 61 per cent of 15- to 17-year-olds are out of school in low-income countries, compared to eight per cent in their high-income counterparts. "We have just 11 years to make good on the promise that every child will be in school and learning", UIS Director Silvia Montoya asserted. "Yet the new data shows us an unchanging and persistent picture of poor access and quality, year after year".But Ms. Montoya also flagged that "these challenges are not inevitable"."They can be overcome by a combination of intensive action and greater funding", she maintained. "We need real commitment from every single government, backed by resources, to get the job done."

Helpers Of Africa International

Kingdom Global Education Agency

Helpers Of Africa International through Kingdom Global Education Agency will partner and support globally and nationally towards development of Education at all levels of pre-school, primary, secondary, colleges and university along with technical and vocational training national and globally towards development this sector support and partner for global and national boast in education sector. Kingdom Global Education Agency is charged by Helpers Of Africa International with the responsibility of coordinating education and national skills training at all levels. It is responsible for policy, curriculum development, registration and supervision of our institutions in the Country along with those that are government and private owned. We shall also own schools at all levels by buying existing and building new ones across the world we have thousands of unique designs concepts ready along with many on offer for sale in kenya and in the world that will begin to be our launch pad of raising the bar of education as we support others along with education systems in countries.

The mandate is in consultation with the other governments in countries and the bank be involved in education and training to develop policies- and provide strategies for the development of a national training system, have the overall responsibility in the provision of training and in collaboration with other Ministries and stakeholders, be responsible for promoting access, equity, quality ,relevance in education and training developing and coordinating the implementation of national skills training policy and strategy; facilitation of elementary, primary, secondary & High school, university, tertiary technical education and training, policy for technical and vocational skills instruction, curricula development and assessment; oversight of the implementation of technical and vocational training programmes, and management of middle-level tertiary institutions; namely supporting Nursury schools and kindergadens, primary, secondary, technical colleges, national polytechnics and technical trainers colleges; establishment of organs and institutions, recruitment and appointment of boards of Governors of technical colleges and vocational centres for our schools, recruitment and appointment of councils of national polytechnics and technical trainers colleges; recruitment and appointment of Institition Authority Board, recruitment and appointment of Fund Boards; and appointment of Curriculum Development, Assessment and Certification Council in liason with head office HR structure and Executive recommendations.

Helpers Of Africa International through Kingdom Global Education Agency will partner and support globally and nationally towards Core Programs include Increasing access and equity in training, Enhancing quality and relevance of training programmes, Implementing the Education Act to regulate and monitor training standards in education, ICT Integration in education institutions provision and pedagogy, Extension and outreach programmes, Collaboration and linkages with industry and other relevant institutions, Establishment of Education Centres of Excellence, Upgrading of National Polytechnics to award degrees and to open up transition from diploma level to the degree level, Upgrading of technical institutes to National Polytechnics to create clear Pathways for upward mobility of trainees, Promotion of structured applied research and innovation culture through Annual Education Fairs, Robot Contests and exhibitions , Establishment of industrial processing and manufacturing business incubators and intellectual property rights portfolios to empower institutions for pursuing autonomy status. The vision, mission and focus is to provide skilled and globally competitive employable human resource, To provide, promote and co-ordinate the training sector by assuring quality, inclusiveness and relevance for the enhancement of the national economy and global competitiveness, To provide relevant and adequate skills and competencies in strategic disciplines for spurring industrial and economic development in line with the aspirations of the global citizens, to develop an effectively co-ordinated and harmonized education system that is capable of producing quality skilled human resource with the right attitudes and values required for growth and prosperity of the various sectors of the economy, Provide adequate and appropriate skilled Artisans Craftsmen Technicians and Technologists at all levels of the economy through practical training and work experience, Transfer technology continuously through collaborative approach between education institutions and the relevant industries, Promote dignity and decency of labour particularly manual work, Provide increased training opportunities for the increasing school leavers and other trainees to increase employability, Provide continuous upgrading of skills and knowledge at the pace and ability of the trainees, Provide a dynamic curriculum responsive to the manpower needs of a dynamic economy Impart marketable skills technical know-how and attitudes that respond to contemporary labour market demands by the industry informal sector and for self-employment, promotion of inclusive and equitable quality education and lifelong learning for all, promotion of culture as a driver and enabler for sustainable development, promote sciences as an accelerator for poverty eradication and building peaceful, promoting and advocating children's right to free and compulsory basic education, including quality services, and to access education institutions and facilities for persons with disabilities that are integrated into society, to the extent compatible with the interests of the person, including the use of Sign language, Braille or other appropriate means of communication, and access to materials and devices to overcome constraints arising from the person's disability, provisions on access for youth to relevant education and training, access education for employment, participation and representation of minorities and marginalized groups in governance and other spheres of life through education.

Helpers Of Africa International

Kingdom Global Education Agency

Helpers Of Africa International through Kingdom Global Education Agency will partner and support globally and nationally towards special opportunities for those with disability in educational and economic fields, and special opportunities for access to employment. The rights of minorities and marginalized groups to reasonable access to water, health services and infrastructure are also enshrined, as it is incumbent upon government to develop a culture of human rights, promote gender equality and equity and facilitate gender mainstreaming in national development

Our partnership with Governments globally will in education sector will to promote and strengthen education policy, standards, curriculum, examinations, granting of university charters, universities, tertiary educational institutions, institutions of research, higher learning, primary schools, special education, secondary schools, special education institutions and promotion of sports and sports education, pre-primary education, village polytechnics, home-craft centres, farmers training centres and childcare facilities towards Education Policy Management, Management of Continuing Education, Administration of Early Childhood Education, education; Standards and Norms, Management of Education Standards, Management of National Examinations and Certification, Curriculum Development, Quality Assurance in Education; Primary and Secondary Education Institutions Management, Teacher Education and Management, School Administration and Programmes, Registration of Basic Education and Training Institutions, Special Needs Education Management, Adult Education Management, University Education Policy Management, University education, Public Universities and Tertiary Institutions, Science technology innovation policy; Management of Technical Training Institutes including Youth Polytechnics, Management of Institutes of Science and Technology; Management of National Polytechnics; National Council for Sciences and Technology.
We shall seek to support and fund departments, sectors institutions and projects based on Global & National Education Policy Management, Global & National Management of Continuing Education, Global & National Administration of Early Childhood Education, Global & National Standards and Norms inspectorates, Global & National Management of Education Standards, Global & National Management of National Examinations and Certification, Global & National Curriculum Development, Global & National Quality Assurance in Education, Global & National Primary and Secondary Education Institutions Management, Global & National Teacher Education and Management, Global & National School Administration and Programmes, Global & National Registration of Basic Education and Training Institutions, Global & National Special Needs Education management, Global & National Representation of countries in global education agencies, Global & National Adult Education Management, Global & National University Education Policy Management, Global & National University Education, Global & National Public Global & National Education and Training Basic program, Global & National Education Higher Education Child Care program & project, Global & National Adult Education program, Global & National Education Child care program, Global & National Education Lower Primary program, Global & National Education Primary program, Global & National Education Program, Global & National Education Upper Primary program, Global & National Education Junior Secondary program, (3 years) Global & National General Motivation and Mentorship Education program, Global & National Talent Discovery and Development program, Global & National Technical Education program, Global & National Vocational Training program. Global & National University Educational program, Global & National Middle level Institutions Education Program, Global & National Post Graduate Program, Global & National Basic Education program, Global & National Communication skills development program, Global & National Manipulation skills development program, Global & National Social skills development program, Global & National Environmental awareness Observation program, Global & National Numeracy skill program, (Global & National Writing Skills Development program, Global & National Technological Skills program, Global & National Innovation Skills program, Global & National Moral and Ethical Values program, Global & National Talent Search E Identification program, Global & National Observation skills Observation program, Global & National pupil profiling and accessment program, Global & National literacy and numeracy development project, Global & National Written and oral language development Program, Global & National Enquiry skills development program, Global & National Advanced Communication skills program, Global & National Advanced Technology and Innovation program, Global & National Talent Enhancement program, Global & National Entrepreneurship development program, Global & National ICT development program, Global & National Languages development program, Global & National Humanities program, Global & National Pure Sciences development project, Global & National Applied Sciences program, Global & National Technical Specialization Stream program, Global & National Citizenship and Patriotism program, Global & National Technical Disciplines program, Global & National Trade Disciplines program, Global & National Performing Arts program, Global & National Creative Arts and Sports program, Global & National Phyisical Education & psychomotor development program, Global & National life skills program, Global & National Creative skills program, Global & National emotional skills program, Global & National English program, Global & National Kiswahili program, Global & National Mathematics program, Global & National Agriculture Education program, Global & National Water and Sanitation Education program, Global & National Religious Education program, Global & National Music Education program, Global & National Art and Craft Education program, Global & National Building and Construction program, Global & National Electronics Education program,

Global & National Electrical Education program, Global & National Carpentry and Joinery Education Program, Global & National Barkery Education Program, Global & National Food and Beverage Education training program, Global & National Biology Education program, Global & National plumbing Education program, Global & National Hotels and Hospitality Education program, Global & National Mathematics Education Program, Global & National French Education Program, Global & National German Education program, Global & National Spanish Education program, Global & National Chinese and Asian Education program, Global & National History Education, Global & National Geography Education Program, Global & National Leadership Education Program, Global & National Home Economics Education program, Global & National Welding and Fabrication Education Program, Global & National Business Technology Program, Global & National Media and Journalism Education, Global & National Publishing Skills Education program, Global & National Social Media Program, Global & National Interior Design and painting Education, Global & National Zoology and Animal Science Education program, Global & National Marketing Education, Global & National Strategic Management Education, Global & National Insurance Education, Global & National Law Education program, Global & National Livestock and Vertinary Science Education, Global & National Mining and Geology Education program, Global & National Behaviour Management Education program, Global & National Computer Assisted Learning program, Global & National Community Learning program, Global & National Curriculum Design Education, Global & National Educational Theories Program, Global & National Educational Software program, Global & National Employability Skills Education program, Global & National Engineering Education Program, Global & National Power

Mechanics program, Global & National Drawing and Design Program, Global & National Aviation Technology Education program, Global & National Arabic Education program, Global & National Special education program, Global & National Accounting and Finance Education Program, Global & National Theology and Ministries Studies program, Global & National Archaeology Education Program, Global & National Mechanical Engineering Education Program, Global & National Manufacturing and Plant Engineering Education, Global & National aeronautical engineering education program, Global & National Economics Education program, Global & National Health and Medicine Education program, Global & National Computer Science & Information Systems program, Global & National Chemical Engineering Education Program,

Global & National Civil & Structural Engineering Education program, Global & National Electrical & Electronic Engineering Education Program, Global & National Mechanical Engineering Education Program, Global & National Ecology and Wildlife Education, Global & National Disaster Response and Management Education program, Global & National Conflict Resolution and Peace Education program, Global & National Marine and Blue Economy Education, Global & National Transport and Logistics Education program, Global & National Art and Film Education program, Global & National Fashion Industry Education Program, Global & National Food Science and Nutrition Education program, Global & National Inter cultural Education program, Global & National Atmospheric Chemistry Education, Global & National Medicinal Education, Global and National Monitoring and Evaluation Directorates, Global and National School Infrastructure Technical evaluation and statics project, Global and National Legal Framework on Education project, Global and National Education Training and Research program, Global and National Conference on Education and Training project,

Our strategic plan expounds and elaborates how all the projects, programs and objectives of partnership with nations will operate around the pillars focus on Curriculums, Social benefits Context, National benchmarking standards, Public expectations, globalization, Public resources available for education, Competitiveness of the teaching profession on the labour market, National governance and management strategies, Philosophical standpoint of teacher and learner, peer effects ,Parental support , Time available for schooling and work , Economic and labour conditions in the community , Educational knowledge and support infrastructure Enabling Inputs, Teaching and Learning Materials, Physical infrastructure and facilities, Human resources, teachers, principals, inspectors, supervisors, administrators Teaching and Learning, Learning time, teaching methods - Assessment, feedback, incentives and Class sizes . It also stipulated how to uphold core values of patriotism, equality, peace, security, honesty, humility, love, respect, tolerance, democracy and the philosophy of education is expounded in the Vision whose pursuit is the provision of quality, lifelong education and training for sustainable development at individual, institutional and societal levels.

62. Kingdom Global Education Agency will partner and support globally and nationally to strengthen the school management through capacity building seminars and summits.
63. Kingdom Global Education Agency will partner and support globally and nationally toward education strategic plans focusing on entry into various levels of the education system, time available for curriculum coverage, determination of the curriculum content and delivery modalities, through a structure that the system is fitted into the natural cycle of life and evaluating the structure dictates transferability/mobility of citizens, nationally and internationally.
64. Kingdom Global Education Agency will partner and support globally and nationally to help develop education structure at pre- school, nursery, primary, secondary or high school, university, vocational colleges and institutes highlighting number of years and curriculum along with qualifications of transitional acceptable grades range portfolios.
65. Kingdom Global Education Agency will partner and support globally and nationally to overcome some structure challenges that include failure to incorporate the pre-school cycle as part and parcel of the education structure, Lack of open-door opportunities for learners to pursue further education towards lifelong learning, Unhealthy competition and over emphasis on examinations based certification at the end of each cycle, Limited training and vocational opportunities for learners wishing to acquire vocational, industrial and technological skills, Lack of harmony with the educational structures of the other regional and global countries, Limited focus to the world of work and Lack of the secondary equivalent for Adult Basic Education and Training along with dealing with stick pathways for flexibility.
66. Kingdom Global Education Agency will partner and support globally and nationally towards content for primary level focus on literacy, numeracy and communication skills along with determination of range of ages approved for learners at various levels observed at admission to successive levels of education.

67. Kingdom Global Education Agency will partner and support globally and nationally towards support of global general vision strategic plan that adopts equitable access to learning opportunities, improved learning and skills for all and improved learning in emergencies and fragile contexts.
68. Kingdom Global Education Agency will partner and support globally and nationally towards a greater focus on improving learning outcomes, including supporting the development of the breadth of skills that allow young people to become agile, adaptive learners and citizens, equipped to navigate personal, social, academic, economic and environmental challenges.
69. Kingdom Global Education Agency will partner and support globally and nationally towards "Kingdom education for every child project increasingly promote equity and inclusion focussing particularly on children excluded on the basis of gender, children with disabilities, the poorest, ethnic and linguistic minorities, and children affected by emergencies.
70. Kingdom Global Education Agency will partner and support globally and nationally towards focus to expand support for reaching children during their early years (3–5 years old) and during adolescence (10–19 years old).
71. Kingdom Global Education Agency will partner and support globally and nationally towards increased work on pre-primary education to enable countries to benefit from the unparalleled positive return from investing in this area. Providing multiple learning pathways, particularly for adolescents, by introducing and scaling up innovative approaches.
72. Kingdom Global Education Agency will partner and support globally and nationally towards strengthening and enhanced partnership with governments, non-governmental organizations and other non-state providers. This will include enhanced support to sector-wide analysis, planning, implementation and accountability, with a clear focus on promoting learning and greater equity.
73. Kingdom Global Education Agency will partner and support globally and nationally towards to promote and realize their potential as a tool for transforming societies and economies – challenging, rather than replicating, harmful gender and social norms.
74. Kingdom Global Education Agency will partner and support globally and nationally towards collection of data and using this education data Every to enhance decision making, investments and areas of grants particularly related to levels of learning, to generate a better understanding of the children being left behind, and the effectiveness of education systems in meeting the learning needs of every child.
75. Kingdom Global Education Agency will partner and support globally and nationally towards greater and more effective investment in education sector to strengthen the systematic measurement of learning outcomes for all learners (regardless of pathway).
76. Kingdom Global Education Agency will partner and support globally and nationally towards Mobilizing and enabling the wide range of duty-bearers to act on the data and evidence on learning at all levels will be central to the Strategy.
77. Kingdom Global Education Agency will partner and support globally and nationally towards innovation as per countries need to scalable and sustainable levels to be a key and expanded programmatic approach in the Strategy, including promoting new ways to accelerate learning for vulnerable children and transforming the effectiveness of education systems at scale to leverage significant opportunities over the next decade. With more data and awareness than ever before on the depth of the learning crisis, there is a growing consensus on the urgency for global coordinated actions which place learning and equity center stage.
78. Kingdom Global Education Agency will partner and support globally and nationally towards effectiveness of approaches to transforming education systems to improve learning growth of technology especially at this time of Covid 19 global challenges, and the increasingly broad range of partners providing learning opportunities, bring the potential to deliver learning opportunities anywhere, to anyone, at any time.
79. Kingdom Global Education Agency will partner and support globally and nationally towards education strategy that confirms the importance towards education and a commitment to deliver with partners for education and the realization of the Convention on the Rights of the Child – so that "Kingdom Education for Every Child" is achieved.
80. Kingdom Global Education Agency will partner and support globally and nationally towards a global education strategy to provide a clear vision and strategic framework our work in promotion of balanced education worldwide along with sufficient flexibility at country level to be led by country context and local education needs.

81. Kingdom Global Education Agency will partner and support globally and nationally towards education existing priorities – primary and secondary education; gender equality; education in emergencies and fragile contexts in a greater focus on: learning and skills development; equity and inclusion; pre-primary education and education for marginalized adolescents; systems strengthening, the use of data and evidence, and innovation.
82. Kingdom Global Education Agency will partner and support globally and nationally towards setting out a global priorities and preferences especially in this Covid 19 season that has shaken education sector considering data and analytics to set a firm foundation in data and evidence and to draw on the best future-thinking on education challenges for the next decade, extensive internal and external consultations in countries with governments and other education stakeholders other multilateral organizations, public and private donors, academia, global education thought leaders and young people.
83. Kingdom Global Education Agency will partner and support globally and nationally towards packaging education systems focuses above all on learning the breadth and depth of the learning crisis provides the greatest global challenge to preparing children for life, work and active citizenship. No task can be more important in the service of the world's children. "Hope is building a world where the sound of education and enlightenment is louder than the sound of guns."
84. Kingdom Global Education Agency will partner and support globally and nationally towards education values that deals with challenges of inequitable access to education for children and adolescents, the global learning crisis, and education in emergencies and fragile contexts.
85. Kingdom Global Education Agency will partner and support globally and nationally towards education system that reduces poverty, drives sustainable economic growth, prevents inequality and injustice, leads to better health – particularly for women and children – and it helps to protect the planet empowering children and adolescents.
86. Kingdom Global Education Agency will partner and support globally and nationally towards economic and social benefits of education that depend on generating learning outcomes, and not just getting children into school.
87. Kingdom Global Education Agency will partner and support globally and nationally towards Significant compounding disparities exist in access and learning in relation to wealth, location, gender and inequity of education investment. Other dimensions, rarely measured or reported, can be associated with even larger equity gaps, for example disability, mother-tongue instruction, ethnicity, displacement and subnational differences.
88. Kingdom Global Education Agency will partner and support globally and nationally towards all-inclusive education system for all. Half of all children with disabilities in developing countries are excluded from school. With respect to gender girls' education gender parity, focusing on girls or boys, according to context and gender transformation, maximizing education's potential to be gender transformative and improve equitable outcomes for girls.. Gender transformation is a universal challenge that we seek to focus on as Helpers Of Africa International.
89. Kingdom Global Education Agency will partner and support globally and nationally towards promoting Gender norms, combined with inadequate systems of child protection and lack of access to health services, magnify gender inequality in education, especially for the most marginalized girls. Some 12 million girls each year are married in childhood and pregnant girls can be unfairly and unlawfully excluded from schools. We shall should always focus on the most disadvantaged and hardest to reach children."
90. Kingdom Global Education Agency will partner and support globally and nationally towards promoting political commitment to prioritize education sector plans and strategies along with budgetary allocations towards education priority by governments at a national and local level to add to donors contributions
91. Kingdom Global Education Agency will partner and support globally and nationally towards strengthening education ministries, departments and divisions towards strong institutional capacity to plan, implement and assure quality at scale in education sector programs.
92. Kingdom Global Education Agency will partner and support globally and nationally towards strong coordination and coherence among partners at national and global levels to advance education programs and eliminate poor linkages between homes and schools in the early childhood period.
93. Kingdom Global Education Agency will partner and support globally and nationally towards mitigating exclusion from early childhood education programmes Poorest children Children living in urban areas , slums and rural areas drop-out rates from primary, secondary and college education.

94. Kingdom Global Education Agency will partner and support globally and nationally towards management of education continuity in times of conflicts, natural disasters lead to loss of school days, resulting in cumulative deficits that are detrimental to education outcomes and the well-being of children. There is a vicious cycle between education, inequality and violent conflict. Inequality in multiple dimensions is associated with an increased likelihood of violent conflict. Violent conflict is in turn associated with loss of schooling and with education inequality. Schools, teachers and students are often the target of violence, including genderbased violence in war torn regions and countries. Between 2013 and 2017, there were more than 12,700 attacks registered, harming more than 21,000 students and educators in at least 70 countries.
95. Kingdom Global Education Agency will partner and support globally and nationally towards providing of education in emergencies in humanitarian response extending education to refugees and internally displaced persons in countries and regions in partnership liason with Kingdom Global Disaster Agency, Kingdom Global Food Agency, Kingdom Water and Sanitation Agency and Kingdom Global Housing Agency working together with other international agencies to maintain a progressive livelihood for displaced persons and refugees in the countries globally.
96. Kingdom Global Education Agency will partner and support globally and nationally towards hiring, engaging facilitating and maintaining volunteer teachers and training in formal and informal platforms through governments engaging them to public schools and through private schools sectors deploying them to private schools.
97. Kingdom Global Education Agency will partner and support globally and nationally to facilitate intersectional working of Education staff work in close collaboration with colleagues working on health, nutrition, child protection, WASH, social policy, disability, gender, adolescent development and Communication for Development. This includes using schools as an integrated service platform to deliver a range of interventions and outcomes for children, in development and humanitarian settings. Intersectional approaches help address causes of low enrolment and poor education outcomes that lie beyond the education sector.
98. Kingdom Global Education Agency will partner and support globally and nationally to play a global leadership role in pre-primary and primary education including the development of foundational skills in the early years, such as basic literacy and numeracy.
99. Kingdom Global Education Agency will partner and support globally and nationally towards inclusive education: for children with disabilities and other vulnerable children such as the extreme poor, ethnic and linguistic minorities, migrant children and girls; education sector analysis, planning and strategy development: working with governments and with international partners including the UNICEF, Global Partnership for Education, the World Bank, bilateral donors, the United Nations Educational, Scientific and Cultural Organization (UNESCO; and its institutes) and other United Nations agencies.
100. Kingdom Global Education Agency will partner and support globally and nationally towards learning materials production, procurement and provision for all school levels including owning printing presses across the nations, stores of school equipment to ensure that we produre materials at cost effective prices through whole sale quantities and offer access at cost effective prices along with donations to schools and education institutions according to needs.
101. Kingdom Global Education Agency will partner and support globally and nationally towards education system that raises champion professionals, talents and entrepreneurships by centering on upper-secondary education, technical and vocational education and training / job-specific skills development.
102. Kingdom Global Education Agency will partner and support globally and nationally to join the class of global leader in education adopting greater focus and prioritization in programming, simplifying internal processes, putting more emphasis on evidence and the use of data, and investing more in technical staff, in particular for data collection and analysis, sector planning and policy dialogue, and for key thematic areas. In addition to the survey conducted in support of this Strategy, we also conducted an extensive consultation exercise, seeking views from external partners and our colleagues on a short consultation draft of this Strategy.
103. Kingdom Global Education Agency will partner and support globally and nationally promoting education work strengthen fundraising efforts for education, with a particular emphasis on unreached regions with lower spending; continue the trend to support more education systems strengthening; further strengthen evidence-based programming; ensure that pilot projects are systematically evaluated, in particular by measuring learning outcomes, and then scaled up or discontinued depending on the evaluation results; recognize and address both girls' and boys' disadvantages, where they exist; build on positive efforts undertaken to achieve and demonstrate results and impact in education placing learning at the Centre of our programming and technical support ensuring that learning outcomes are at the heart of everything we do in education.

104. Kingdom Global Education Agency will partner and support globally and nationally increase investment in disaggregated data to help monitor inequality and discrimination consistent with children's rights legislation; intensify the strengthening of national systems to address the most disadvantaged children; scale up equity-focussed programming; intensify community engagement and social mobilization to address demand-side barriers to the fulfilment of children's rights, including damaging social norms; support the meaningful participation of children and adolescents in decisions that affect them; invest in risk-informed programming and systems strengthening to prevent or mitigate the impact of humanitarian crises; invest in integrated/multisectoral approaches to address underlying causes of children's rights violations; invest in gender analysis and gender equality programming; strengthen partnerships with other global partners and agencies.
105. Kingdom Global Education Agency will partner and support globally and nationally to develop "Improved learning and skills development for boys and girls from early childhood to adolescence, in particular for the most marginalized and those affected by humanitarian situations and we will pursue this vision with every ounce of resource, commitment and professional dedication that we can muster.
106. Kingdom Global Education Agency will partner and support globally and nationally to promote education system that recognizes Rights of Persons with Disabilities; children's rights and associated principles – such as non-discrimination, participation, transparency and accountability – are at the core of our mandate and mission;
107. Kingdom Global Education Agency will partner and support globally and nationally to promote education system with comparative advantage, Equitable access to learning opportunities, Improved learning and skills for all, Improved learning and protection for children in emergencies along with prevention (resilient systems), and response (education in emergencies).
108. Kingdom Global Education Agency will partner and support globally and nationally towards Underpinning the Children's rights involving making the fulfilment of children's rights central to our advocacy, policy dialogue, programming and accountabilities, equity and inclusion, gender responsiveness, focus on the most disadvantaged (e.g., the poorest children, girls, children with disabilities, minorities, displaced children); address household financial barriers. Intersectoral approaches: working with other sectors (e.g., health, nutrition, water and sanitation, social policy, child protection); using schools as an integrated service platform.
109. Kingdom Global Education Agency will partner and support globally and nationally towards education system contextualization programming at country level with flexibility based on country context (local education needs; UNICEF comparative advantage; division of labour with others).
110. Kingdom Global Education Agency will partner and support globally and nationally to promote education system with a results-based management measurement, particularly of learning outcomes transparency, accountability for results supporting the implementation of core programmatic approaches of systems strengthening, data and evidence, innovation, communications and advocacy, community engagement, and effective service delivery.
111. Kingdom Global Education Agency will partner and support globally and nationally towards education sytem and structure than bring together 3 pillars of financial resources, human resources, and partnerships.
112. Kingdom Global Education Agency will partner and support globally and nationally of education system with a professional approach of Inequitable access to education, The learning crisis Humanitarian crisis Assumptions Vision Goals Programmatic principles Programmatic approaches Enabling inputs Problem statement Every Child Learns Equitable access to learning opportunities Improved learning and skills for all Improved learning in emergencies and fragile contexts Financial resources Partnerships Human resources Systems strengthening Data and evidence Innovation Communication and advocacy Community engagement Service delivery Children's rights Making the fulfilment of children's rights central to all to all our work in education Equity and inclusion Gender responsiveness.
113. Kingdom Global Education Agency will partner and support globally and nationally advocating for education system that is focused on the most disadvantaged Intersectoral approaches Realizing potential synergies with other sectors including promoting schools as an integrated service platform Contextualization Programme with flexibility based on national and local context Results-based management Strengthen planning and monitoring, particularly of learning outcomes; transparency; accountability for results Full realization of children's rights.
114. Kingdom Global Education Agency will partner and support globally and nationally of education system that has a wholistic sustainable approach working across the life cycle from early childhood to adolescence. Increasing our work in pre-primary education and early learning to constitute a strategic shift for this Strategy period, as will education for marginalized adolescents. These strategic shifts will complement our existing core work in primary and secondary education.

115. Kingdom Global Education Agency will partner and support globally and nationally to address the Strategy's equitable access goal will work with partners to strengthen national Education Management Information Systems that will help identify out-of-school children and adolescents and those most at risk of being out of school, and contribute to the development and implementation of policies and strategies to reach them.
116. Kingdom Global Education Agency will partner and support globally and nationally support education system that will include addressing ethical risks related to child data privacy and protection ss part of our increasing focus on systems strengthening and will advocate for allocation of national budgets to education, and for donors to contribute more to education, particularly at pre-primary level. We will advocate for, and support the implementation of, pro-poor public expenditure, and work with governments to improve the quality of public expenditure – more equitable, more efficient, more effective participation in education globally.
117. Kingdom Global Education Agency will partner and support globally and nationally to support global treaties that have been signed by global organizations and agencies of UN, UNICEF, UNESCO and others including in education, supported by associated rights frameworks such as the Convention on the Rights of Persons with Disabilities, the International Covenant on Economic and Cultural Rights, and the Convention on the Elimination of All Forms of Discrimination against Women. This Strategy sees children's rights both as a programming principle – to guide education programming decisions and accountabilities for and our partners – and as an outcome allied to our vision.
118. Kingdom Global Education Agency will partner and support globally and nationally of education systems that will help address the household-level financial and social barriers that contribute to low enrolment, drop out and poor outcomes by supporting governments to strengthen their social protection systems for greater impact on child well-being. In line with the forthcoming Social Protection Program Framework including generating evidence on how well the social protection system works for children, and identifying gaps and options to improve impact, expanding and improving cash transfers for children including, where appropriate, education scholarships and grants, strengthening links between cash transfers and access to services, improving access to childcare and program that support adolescent employability, and strengthening the social welfare workforce and direct outreach to families.
119. Kingdom Global Education Agency will partner and support globally and nationally towards education system principle of progressive universalism that was adopted initially in the health sector as a way to make rational spending decisions in constrained financial contexts. This means giving initial priority in the allocation of public funding to lower levels of education, and gradually increasing allocations to higher levels when coverage is close to universal at lower levels, with a focus on the poorest and most vulnerable children.
120. Kingdom Global Education Agency will partner and support globally and nationally towards education system core strategies for secondary-age (adolescent) education: supporting quality formal primary education (for those currently in primary education and for those who never attended school but are still age-eligible to enter primary) and secondary education, with a particular focus on reaching the most marginalized adolescents; strengthening non-formal education and alternative delivery models (e.g., catch-up classes, bridging and accelerated education, second-chance education, skills development training and apprenticeships), including the recognition, validation and accreditation of no formal learning outcomes; advancing adolescent girls' secondary education, learning and skills development (including in science, technology, engineering and mathematics.
121. Kingdom Global Education Agency will partner and support globally and nationally towards education system that will be complemented by cross sectoral work addressing child marriage, harmful social norms and gender-based violence in and around schools and address transitions to decent work,
122. Kingdom Global Education Agency will partner and support globally and nationally towards education system that will partner with others to ensure continuity of services as young people transition from childhood into adulthood.
123. Kingdom Global Education Agency will partner and support globally and nationally towards education system that will engage with partners to ensure that supply- and demand-side interventions work together to enhance adolescent and youth skills for employability and transition into decent work.
124. Kingdom Global Education Agency will partner and support globally and nationally education sector that has balanced gender balance focusing on girls' education, gender parity, focussing on girls or boys, according to context; and gender transformation. We will advocate for, and support the implementation of, gender-responsive budgeting and education sector planning, and interventions for the transformation of gender norms in education systems (policies, curricula, teacher education, teacher deployment, monitoring and evaluation). Education must become a tool for transforming societies and economies – challenging, rather than replicating, harmful social norms and stereotypes. of children with disabilities in developing countries.

125. Kingdom Global Education Agency will partner and support globally and nationally to work with governments and other partners to orient policies, expenditure, implementation and accountability towards the twin goals of equity and learning, both in development programming and in emergency settings to focus on gender mainstreaming in education institutions as much as possible to try to build more spaces for healthy relationships in the future to help them engage with private financing and provision of education services, including supporting regulatory frameworks and enabling environments that prioritize learning and equity in both state and non-state provision, including faith-based schools.
126. Kingdom Global Education Agency will partner and support globally and nationally for governments to be structured in a way that guarantors but not necessarily the sole provider of education services so that private sectors in the countries and international community can have space to operate.
127. Kingdom Global Education Agency will partner and support globally and nationally to improved learning and skills development learning is the process of developing and acquiring skills, subject knowledge and values. Skills are developed from early childhood to adulthood. We shall seek to support global education systems that promote typology for learning and skills development, Foundational skills, basic literacy and numeracy, skills that are needed regardless of employment aspirations relevant to job markets and are essential for further learning, productive employment and civic engagement which are transferable skills for generations.
128. Kingdom Global Education Agency will partner and support globally and nationally towards entrepreneurship culture , values and skill development progressively from early years and allow young people to become agile, adaptive learners and citizens equipped to navigate personal, social, academic, economic and environmental challenges such as problem-solving, negotiation, empathy, communication, participation, play, peacebuilding, environmental awareness, emotional and mental well-being
129. Kingdom Global Education Agency will partner and support globally and nationally to digital skills and knowledge that support the development of digitally literate children and allow them to use and understand technology, search for and manage information, communicate, collaborate, create and share content, and solve problems safely, critically and ethically especially the season of covid 19 has shown that this will be important most of the learning and conferencing has been done through virtual learning. We shall support the extension of fibre cable to schools and provision of tablets, computers to facilitate this project is very important and Kenya will be the pilot country and first beneficially since the pilots and needs have been specified.
130. Kingdom Global Education Agency will partner and support globally and nationally to education system that prepares students and graduates for Job-specific skills (also called 'technical' and 'vocational' skills): skills which prepare young people for entry into specific trades or professions from lower and higher institutions of learning along with braoder entrepreneurship training and life skills to prepare students to fit in in job markets and create jobs for employment.
131. Kingdom Global Education Agency will partner and support globally and nationally to will prioritize foundational and transferable skills. We will also work on digital skills and on job-specific skills for marginalized adolescents within the age-mandate and according to country needs, comparative advantage and fit with in-country partners.
132. Kingdom Global Education Agency will partner and support globally and nationally towards education systems that will build strong foundations, a healthy, well-nourished, cared-for and stimulated child who has also had some form of preprimary education will learn faster than their peers.
133. Kingdom Global Education Agency will partner and support globally and nationally towards provision and development of education Infrastructure and learning inputs physical and digital infrastructure such as classrooms and connectivity, as well as curricula, books and other learning materials, are necessary but not sufficient conditions for learning with them, children might learn – without them, they will not.
134. Kingdom Global Education Agency will partner and support globally and nationally towards empowering teachers and teaching in focus of the number and functions, deployment, capability and working conditions of teachers are key determinants of learning; as are time-on-task, pedagogical practice and accountability for learning outcomes along with teachers orientation towards Information technology skills that have proved vital dusring the Covid 19 season and preparedness for the future pademics.
135. Kingdom Global Education Agency will partner and support globally and nationally to support education systems with evidence-based approaches and evaluations that includes the conventional expansion of education inputs is largely not working, generation and act on evidence of what works, including testing innovations.

136. Kingdom Global Education Agency will partner and support globally and nationally towards Measurement of learning outcomes of education systems measurement of learning at all levels – the child, the school, national and global progress – critical to driving performance and accountability in education.
137. Kingdom Global Education Agency will partner and support globally and nationally towards Institutional capability and strong systems in education buy advocating for high performing systems have capable staff and institutions, and align all inputs and actors in the education system to the goal of learning.
138. Kingdom Global Education Agency will partner and support globally and nationally towards Education for all children kingdom project through consideration Intersectoral approaches in focus of the use of intersectoral approaches is based on interdependency of outcomes (education is critical to deliver outcomes in health, nutrition, water, sanitation and hygiene, protection and other sectors; other sectors are critical to delivering education outcomes), potential efficiencies in using schools as an integrated platform for services to deliver a wide range of children's rights and child development outcomes and comparative advantage in working through intersectoral approaches globally.
139. Kingdom Global Education Agency will partner and support globally and nationally towards collaborations in education sectors including, but are not limited to Early childhood development, support to parents and caregivers to provide stimulation and early learning within the home and community, outreach and behaviour change work around responsive care, strengthening linkages between home and early education programmes in preschools and other settings.
140. Kingdom Global Education Agency will partner and support globally and nationally towards health schools and institutions advocacy including child and adolescent immunization and child and adolescent screening services especially after the discovery of Covid 19 vaccines this will be very crucial, Health education and promotion (including healthy eating, comprehensive sexuality education, sexual and reproductive health and rights, menstrual hygiene management, and mental health.
141. Kingdom Global Education Agency will partner and support globally and nationally towards Healthy schools including sports / physical activity, road safety, elimination of harmful substances, prevention of bullying. Nutrition support supplementation (e.g., iron and folic acid), disease prevention activities (e.g., deworming, distribution of insecticide-treated mosquito nets); and provision of food and safe water (e.g., midday meals, children milk project, school feeding programmes, clean water).
142. Kingdom Global Education Agency will partner and support globally and nationally towards Water, sanitation and hygiene institutionalization of sanitization and washing in schools for prevention of Covid and provision of masks along with social distancing project to protect from Covid 19 in classrooms, sports, accommodation and boarding facilities. Evidence-based intervention models towards hygiene promotion and infrastructure upgrading, models to reduce bottlenecks to upscaling, such as the high cost of water supply systems by having boreholes in remote schools and in house water treatment plants, storage and treatment.
143. Kingdom Global Education Agency will partner and support globally and nationally towards health facility maintenance and improvements in monitoring of Kingdom Exellence Hygine project in schools through strengthening and developing standards for health stardards in schools. HIV school-based programmes for HIV and sexually transmitted infection (STI) prevention, as part of comprehensive sexuality education, promotion of treatment adherence, measures to combat stigma and discrimination.
144. Kingdom Global Education Agency will partner and support globally and nationally towards Child protection systems to address bullying and violence; protective factors for children and adolescents (e.g., school-related gender-based violence, sexual violence, female genital mutilation, child marriage, teenage pregnancy and HIV); civil registration; providing a safe space in emergencies.
145. Kingdom Global Education Agency will partner and support globally and nationally towards Social inclusion and policy: advocacy, technical support, evidence generation and policy dialogue for greater, more equitable and more efficient public investment in education; community empowerment to track spending and performance of education systems and schools; child poverty measurement; cash transfer programmes to address household financial barriers.

146. Kingdom Global Education Agency will partner and support globally and nationally towards creating enabling environment for learning – Conceptual framework System Data, planning monitoring and accountability Financing (volume, equitable cost-sharing and spending) Assessments and accreditation Curriculum content (inclusive and relevant to cultural and linguistic context and to life skills and labor market needs) Institutional development and management, governance Inspection (QA) of and support to schools & teachers School management and leadership School, classroom and other learning environments Learning and skills development outside of School resources (textbooks, etc.) Teachers (development, pedagogy, teaching practices, etc.) Child, household, community Parental/ community engagement at school level (social accountability) Home environment (safe and stimulating for E- learning)
147. Kingdom Global Education Agency will partner and support globally and nationally towards Gender and social norms adopt different intervention points – the child, household and community, the school, classroom and broader learning environment, and education systems – within the broad enabling environment for learning.
148. Kingdom Global Education Agency will partner and support globally and nationally towards early childhood care and education to address the Strategy's learning and skills goal to help build strong foundations, working with colleagues in Early Childhood Development, Communication for Development, Health and Nutrition to increase support to responsive caregiving, early stimulation and play-based learning in the home, community and childcare facilities. To deliver quality at scale in pre-primary education.
149. Kingdom Global Education Agency will partner and support globally and nationally towards comprehensive we will focus planning and resource allocation, curriculum development, workforce development, family engagement; and standard setting and quality assurance – with a priority focus on workforce development and quality assurance.
150. Kingdom Global Education Agency will partner and support globally and nationally to work with governments to support the provision of safe and secure infrastructure and learning inputs. This will be primarily through technical support to government planning, budgeting and implementation, both in overall terms and in areas where we have specific expertise and focus, including gender- and disability-responsive planning. As a provider of last resort in emergency situations, in keeping with Helpers Of Africa International and her agencies humanitarian mandate will directly provide infrastructure and learning inputs.
151. Kingdom Global Education Agency will partner and support globally and nationally in partnership with Kingdom Global Creativity and Innovation Agency along with Education Innovation Team we will collaborate with partners to support the goal of connecting all schools to the Internet by 2030 to 2050.
152. Kingdom Global Education Agency will partner and support globally and nationally towards teachers and teaching in the support to provide to ministries of education and other partners to have the size and composition of the teacher workforce, particularly given the rapid expansion of many education systems over the coming decade, deployment of teachers, particularly in rural areas the capability of teachers, including as supported through pre- and in-service training based on qualifications frameworks, and supportive supervision, working conditions for teachers, time-ontask, working with teachers to maximize time spent teaching in the classroom, pedagogical practice, with a particular focus on activity-based learning, teaching at the right level, gender-responsive and learner-centred pedagogies and accountability for learning outcomes, including better use of formative and summative assessment, including classroom based assessment. We will also work with teacher's organizations, school principals, inspectors and teacher trainers to provide more effective support to teachers.
153. Kingdom Global Education Agency will partner and support globally and nationally to support the generation and scaling up of evidence-based approaches, focusing on the expansion of interventions and learning strategies that work – e.g., mother-tongue/bilingual instruction.
154. Kingdom Global Education Agency will partner and support globally and nationally towards structured pedagogy and teaching at the right level; activity-based learning – making these central to our policy dialogue, systems strengthening and direct programming. We will generate new evidence of what works through testing existing interventions and through investing in innovation, both with ministries of education and with the private sector, including new technologies, particularly for personalized and adaptive learning not only the collection of data but also its analysis and use in ongoing education planning and monitoring.
155. Kingdom Global Education Agency will partner and support globally and nationally to support education systems to systematically measure learning outcomes – from the classroom up to the national level – and we will support the systematic measurement of learning outcomes in education in emergencies and protracted crises. We will collect and use new learning data, including through Multiple Indicator Cluster Surveys. We will support social accountability for better learning, providing parents with information on learning to challenge and support the quality of service provision.

156. Kingdom Global Education Agency will partner and support globally and nationally to advocate for learning as the main focus of education and build coalitions of national actors to work together to advocate for a greater focus on improving learning for all.
157. Kingdom Global Education Agency will partner and support globally and nationally to Capacity development of human resources in the education sector (teachers, school directors, Ministry of Education officials, Teacher Training Institute trainers, pedagogical university professors, etc.) needs to be prioritized.
158. Kingdom Global Education Agency will partner and support globally and nationally to invest in building institutional capability and strong education systems. We will support the capacity development of government staff and institutions. We will support the alignment of all inputs and actors in the system – national and local governments, communities' private sector – to the goal of learning, particularly ensuring that foundational and transferable skills run through the core of curriculum– teaching–assessment. We will support multiple learning pathways for children and adolescents, including but not limited to formal education and drawing on inputs from multiple sectors and corresponding our teams.
159. Kingdom Global Education Agency will partner and support globally and nationally towards the support the goal of the multi-stakeholder 'Generation Unlimited' partnership to ensure that every young person is in school, learning, training or employment by 2030 to 2050. Generation Unlimited focusses on adolescent education, skills development and training, and empowerment, particularly for girls. Our support to Generation Unlimited will be aligned to the age group (up to age 19) and our mandate.
160. Kingdom Global Education Agency will partner and support globally and nationally towards Life stage Where children learn What children learn Where other sectors contribute Examples Home and the community Pre-primary school Primary school Secondary school Catch-up education / accelerated learning , apprenticeships Foundational skills (basic literacy and numeracy) Transferable skills (also called life skills / 21st century skills) Digital skills Job-specific skills (also called technical and vocational skills) (services, nurturing care, stimulation, play) Health (health services, health education & promotion, healthy schools) infrastructure, hygiene promotion, in schools) Child protection (systems to address violence, anti-bullying, protective factors, safe space in emergencies) HIV (prevention) HIV (prevention, anti-stigmatization) Older adolescents 14 to 19 years Conception 0 to 2 years 3 to 5 years to birth Nutrition (supplementation, disease prevention, provision of food & safe water) Pregnancy Babies and infants Young children 6 to 18 years School-age children , early childhood development among others.
161. Kingdom Global Education Agency will partner and support globally and nationally towards technical and vocational education and training, water, sanitation and hygiene. The Strategy sets policy and operational parameters to deliver that vision, while allowing for sufficient flexibility at country level to be led by country context and by local education needs. This point cannot be overstated. Education needs and priorities differ hugely across different countries and regions.
162. Kingdom Global Education Agency will partner and support globally and nationally to as programmatic approaches and partnerships in each case – though governments, and particularly ministries of education, will remain our primary partners in most cases.
163. Kingdom Global Education Agency will partner and support globally and nationally towards providing typology of countries of overcoming inter-related challenges of equitable access, learning and skills, and education in emergencies and fragile contexts – indicating the diversity of country contexts in which we shall operate. In each case, operational choices on how to implement analysis of local education needs comparative advantage, both generic and country-specific and division of labour with other actors, analysis, objective-setting and programming choices will be embedded in operational tools such as situation analyses and Country Programme policy documents which we shall fund nations to package.
164. Kingdom Global Education Agency will partner and support globally and nationally towards improved learning and protection for children in emergencies and fragile contexts including prevention (resilient systems), response (education in emergencies) including managing riots through our Kingdom Global Peace Building & Conflict Response Agency and for fires Kingdom Global Disaster Response Agency.
165. Kingdom Global Education Agency will partner and support globally and nationally towards development of Global Education Cluster co-lead agency in the InterAgency Standing Committee system-wide humanitarian response along with coordination staffing of the country-level coordination mechanisms and inter confers an additional accountability of being provider of last resort to co-lead the Global Education Cluster with other agencies and organizations funded by Helpers Of Africa International such us Dr Luke Foundation , JBA- Helpers Of Africa International, JBA-Good Samaritan and JBA – Ministry and Missions dealing on

Faith based sectors within the education systems and schools all have a footprint of operation in development of education systems and institutions globally in various dimensions platforms.

166. Kingdom Global Education Agency will partner and support globally and nationally towards empowerment and financing other groups dealing with development of education and institutions NGOs and Faith Based groups with a key role to play in the way the collective humanitarian response is shaped, including mainstreaming cross-cutting issues such as protection, gender-based violence, prevention of sexual exploitation and abuse, gender, age and disability.
167. Kingdom Global Education Agency will partner and support globally and nationally towards a critical humanitarian role working with UNHCR in refugee contexts using the Refugee Coordination Model, and in working with internally displaced persons and stateless people to address the Strategy's education in emergencies and fragile to work on prevention (resilient systems) and response (education in emergencies) raising students Peace Ambassadors and Champions program.
168. Kingdom Global Education Agency will partner and support globally and nationally towards prevention (resilient systems) and adopt a much stronger focus on systems strengthening through risk-informed approaches to help governments, other key institutions and communities build resilience to shocks like ones caused by Covid 19 to education systems and schools. Risk-informed programming should address multiple hazards, risks and shocks, including climate change, floods, pestilences and others. This will include bringing up new generations of young people for better environmental stewardship and a green and sustainable economy.
169. Kingdom Global Education Agency will partner and support globally and nationally to education systems that build peace and national global cohesion along with peaceful patriotic cohesion in the current global context to take into account the building of peaceful societies through education and her stakeholders.
170. Kingdom Global Education Agency will partner and support globally and nationally towards Good-quality, accessible education to counter the underlying causes of violence, by fostering values of inclusion, tolerance, human rights and conflict resolution along with occupying parents and youth into areas of constructive and positive energy occupations. We will work to strengthen education systems on this basis making the education sector a stakeholder in peace promotions in nations and globally.
171. Kingdom Global Education Agency will partner and support globally and nationally towards education financing and education systems more risk-informed and responsive, and to help governments to accommodate children affected by protracted crisis and education in emergencies to provide global leadership on education in emergencies, which will continue to constitute a large share of our programming, advocacy, leadership and convening. We will work with others to build an architecture for education in emergencies that is fit-for purpose, adequately resourced, and maximally effective and continue to provide direct services and supplies on a demand-driven basis. We will build on the increased use of cash transfers as an element of emergency response, ensuring that this multisectoral support to families is deployed, monitored and optimized to improve children's access to education, and links to other services that support learning outcomes.
172. Kingdom Global Education Agency will partner and support globally and nationally towards work on construction and promoting the centrality of social cohesion and peacebuilding within the humanitarian architecture. We will expand work on child protection in emergencies, focussing on physical, psychosocial and cognitive protection for children and adolescents. Early and adequate investments in education and child protection during and after emergencies are crucial in order to reduce needs and vulnerabilities in the future.
173. Kingdom Global Education Agency will partner and support globally and nationally towards deepening integrated approaches in promoting girls' education in emergencies and protracted crises and being key responders to address school-related gender-based violence, to end child marriage, and to conduct targeted gender transformative programmes.
174. Kingdom Global Education Agency will partner and support globally and nationally towards supporting recognition of learning, certification, mobility, accreditation and transition of displaced and migrating children and adolescents between education systems, and actions that ensure entry and retention of children through different formal and non-formal education pathways.
175. Kingdom Global Education Agency will partner and support globally and nationally towards education commitments within the Core Commitments for Children in Humanitarian Action, the Global Compact for Refugees and its commitments to the Grand Bargain / New Ways of Working, particularly our accountability to affected populations, including migrant populations through multi-year financing, and will continue to advocate for prioritization of education within humanitarian financing. We will work with government partners to ensure that domestic financing is not risk-blind.

176. Kingdom Global Education Agency will partner and support globally and nationally to strengthen the regulatory role of ministries of education and to establish common standards, norms and principles for education partners. We will partner with other humanitarian actors in the global systems such us notably the United Nations Office for the Coordination of Humanitarian Affairs (OCHA), UNHCR, International Organization for Migration (IOM) and WFP, and also with Education Cannot Wait – a critical partner for UNICEF in education in emergencies.
177. Kingdom Global Education Agency will partner and support globally and nationally to provide leadership, with Save the Children, as Global Education Cluster co-leads in the Inter-Agency Standing Committee for system-wide humanitarian response. We will work closely with other civil society partners actively to promote and implement Inter Agency Network for Education in Emergencies Minimum Standards, Child Protection Minimum Standards and Sphere standards, and work with partners to advance the goals of the Global Coalition to Protect Education from Attack. The key impact indicator for the education in emergencies goal – aligning with the SDG 2030 targets and indicators – are parity indices (female/male, rural/urban, bottom/ top wealth quintile and others such as disability status, indigenous peoples and conflict-affected, as data become available) for all education indicators that can be disaggregated.
178. Kingdom Global Education Agency will partner and support globally and nationally to motivational education backed by involving celebrates and our Kingdom Champions in Social media, media, sports, talents, beauty queens and kings, movie, drama, news casters, musicians, government leaders, business, all professionals, motivational speakers, preachers, peace makers to be engaged in motivating students on life skills as mentors, role models and coaches to bring out hidden treasure in students for their future. This team of Kingdom Honor Agencies will be used also to manage schools crises as counsellors along with all other projects and programmes across our agencies.
179. Kingdom Global Education Agency will partner and support globally and nationally towards Systems strengthening is about putting the learner at the centre (in development and humanitarian settings) and making learning the primary goal aligning of the different components of the system – particularly the curriculum, teaching and assessment – to deliver and be accountable for that goal, while also addressing implementation blockages and accountabilities accordingly. Strengthening education sector analysis and evidence based sector planning and monitoring, including gender and disability-responsive planning, and risk-informed planning responsive to conflict, climate change and other major risks. Supporting pro-poor polices and public expenditure through analytical tools, policy dialogue and technical support. Strengthening capacity at central and subnational levels in areas such as data, delivery, and accountability for results, and protecting education from all forms of attack.
180. Kingdom Global Education Agency will partner and support globally and nationally towards improving the alignment of inputs and actors in the education system so that education systems are clearly focused on addressing equity and the learning crisis. Improving the alignment of the education system with other sectors, such as social protection, health and labour. Improving links with social protection systems that address, inter alia, household financial barriers to equitable access and learning.
181. Kingdom Global Education Agency will partner and support globally and nationally towards healthy transition from 'Child Friendly Schools' to 'child friendly systems', which will ensure wider support to the improvement of education quality by boasting education spending by type of support Distribution of spending by type and by region
182. Kingdom Global Education Agency will partner and support globally and nationally towards Education System Strengthening Service Delivery Other/Not classified, increasing trend in system strengthening work Source Systems strengthening will be further enhanced, including working closely with governments, non-governmental organizations and other non-state providers. This will include enhanced support to sector-wide analysis, planning, implementation and accountability, with a clear focus on goals of equity and learning. Education systems will be supported to further promote and realize their potential as a tool for transforming societies and economies – challenging, rather than replicating, harmful gender and social norms.
183. Kingdom Global Education Agency will partner and support globally and nationally towards a shift to position learning and skills more centrally in the concept and operationalization of child-friendly schools; this is in large part based on the critique, supported by a recent evaluation, that Child Friendly Schools have been overly focused on inputs (e.g., the built environment) and processes (e.g., participation) and insufficiently focused on learning outcomes. This shift is about re-balancing, not jettisoning, what was been done and learned to date. A shift from 'Child Friendly Schools' to child friendly systems: moving from our supported pilot projects to helping governments integrate child friendly policies, approaches and quality standards into national education systems.

184. Kingdom Global Education Agency will partner and support globally and nationally to reinterpretation of Child Friendly Schools – centered on learning and integrated into national education systems to be conceived and operationalized by governments themselves, subject to their own needs and systems requirements.
185. Kingdom Global Education Agency will partner and support globally and nationally towards Learning environments with inputs and outcomes linked to child well-being and learning, i.e., protection, health, gender equality (one key lesson to date is that an enabling school environment is a necessary but not sufficient condition for learning).
186. Kingdom Global Education Agency will partner and support globally and nationally towards pedagogies that place learners at the Centre (e.g., activity-based learning; personalized and adaptive learning; teaching at the right level), based on the child's capabilities and engaging children on the basis of their capabilities and learning levels
187. Kingdom Global Education Agency will partner and support globally and nationally towards positive learning outcomes as the single most important result of the schooling process; including but not limited to foundational skills of basic literacy and numeracy and transferable skills.
188. Kingdom Global Education Agency will partner and support globally and nationally based on data and evidence in education sector for generations and use of data and evidence will be further enhanced, particularly in relation to levels of learning to generate a better understanding of the children being left behind, and the effectiveness of education systems to meet the learning needs of every child. Greater and more effective investment will be accorded to strengthening the systematic measurement of learning outcomes for all learners (regardless of pathway). Mobilizing and enabling the wide range of duty-bearers to act on the data and evidence on learning at all levels will be central to the Strategy.
189. Kingdom Global Education Agency will partner and support globally and nationally to co-create and deploy data and evidence – working with partners such in global education platform Institutes and organizations of Statistics including statistics of countries by National bodies or education sectors.
190. Kingdom Global Education Agency will partner and support globally and nationally to countries in terms of the challenges related to each of goals of the Strategy Equitable access, Learning and skills and Emergencies and fragile contexts.59 The equitable access challenge reflects the combined challenge of the number of additional school seats needed in 2030 to 2050 to reach universal pre-primary,60 primary and secondary, based on current enrolment, projected population and the existing disparities in access to education between boys and girls, between urban and rural, and between children from the poorest and richest quintiles. The two indicators are combined into one synthetic index with countries assigned to one of three categories: (1) Red: high challenge, i.e., large increase needed and high current inequities; (2) Yellow: medium challenge; and (3) Green: comparatively low challenge. The learning and skills challenge captures the current level of learning outcomes as measured by standardized learning assessments.
191. Kingdom Global Education Agency will partner and support globally and nationally towards investment to develop Information, Communication Technology (ICT) to be strengthened hand in hand with Research, Science, Technology and Innovation to facilitate the realization of Mentoring and Molding have been positioned to enhance national values. Monitoring and Evaluation will be strengthened at all levels to ensure that standards and quality are maintained.
192. Kingdom Global Education Agency will partner and support globally and nationally towards a legal framework for the entire education sector is proposed to achieve its objectives efficiently on Finance, investment and resource mobilization, Institutional management, governance, curriculum review and human resource capacity, Standards, Quality Assurance, Monitoring and Evaluation; Information and Communication Technology; Research, Science, Technology and Innovation; National Assessment System and National Qualification Framework and Regulatory and Legal Framework on Education.
193. Kingdom Global Education Agency will partner and support globally and nationally to analysis and review of Key detailed situational analysis of the education sector in countries including reviewing the Education Act, various commission reports, other relevant policy and legal documents, benchmarking with good practices from countries with national and county governments, receiving submissions by various stakeholders and Holding country cluster stakeholder consultation forums and Analysis of memoranda.
194. Kingdom Global Education Agency will partner and support globally and nationally towards provision of quality education and training to all nations globally as fundamental to the success of the Government's overall development strategy and to anticipates that learners who have embraced entrepreneurship are able to engage in lifelong learning, learn new things quickly, solve more complex problems and assume more responsibility in education sector in Nations.

195. Kingdom Global Education Agency will partner and support globally and nationally towards having a globally competitive quality education, training and research for countries' sustainable development
196. Kingdom Global Education Agency will partner and support globally and nationally to promote, provide and coordinate quality, equitable and lifelong education and training for national development.
197. Kingdom Global Education Agency will partner and support globally and nationally towards relevance education system strategic plan for countries with regard to content and delivery, Sufficient flexibility to adapt to the changing socio-economic needs, Quality enough to match global competitiveness and to address challenges, Effective governance and management, Retention and transition rates at various levels, Teacher education, management and attrition, Effective structure, Standards and Quality Assurance, Monitoring and Evaluation, Access especially to the vulnerable for example, children with disabilities, refugees and internally displaced children, orphans, children affected and infected by HIV AND AIDS or alcohol and drug abuse and those from marginalized communities, Sufficiently flexible and responsive regulatory framework to be able to deal with the current and emerging challenges and ensure total access, equity and quality Structure of Education, Curriculum and Assessment.
198. Kingdom Global Education Agency will partner and support globally and nationally to recommend a more flexible and comprehensive structure for Education System and Curriculum Reform to specify the expected competences at every level of learning the rationale for the revised structure is to ensure learners acquire competences and skills that will enable them to meet the human resource aspirations of global education vision offering a choice of subject pathways at the end of the elementary School phase to ensure the attainment of 100% transition rate from primary to secondary, thereby reducing wastage by introducing automatic progression to the junior secondary phase based on the acquisition of core skills and competences (literacy, numeracy and communication skills) , focus on early identification and nurturing of talent in individual learners at the end of the junior secondary phase. In so doing it provides flexibility and allows learners to pursue areas of specialist interest in their learning. Allow for specialization at the end of junior secondary, measuring knowledge, skills and competences, a formative assessment process credits accumulated in the summative assessment at the end of each phase, Align it with the Constitution and to ensure that the aspirations of global vision education system are met. Structure the curriculum within a skills and competences framework that identifies the knowledge, skills and competences all learners will acquire, and which will provide both vertical and horizontal coherence. Develop a progressive assessment framework that identifies the knowledge, skills and competences that will be assessed for each level (Senior Secondary, Junior Secondary, Upper Primary and Lower Primary).
199. Kingdom Global Education Agency will partner and support globally and nationally towards school-based assessments need to be strengthened so that regular and cumulative assessment in the form of Competence Assessment Tests. Transforming current education system from being examination based to molding good citizens and for self-reliance by introducing competency-based assessment in line with a competency based curriculum revision of curriculum and textbooks is proposed to ensure skills and competences are emphasized.
200. Kingdom Global Education Agency will partner and support globally and nationally toward education system assessment not seen as part of the teaching and learning process but as a sieve to determine those who can move to higher education where the limited available space dictates the teaching/learning process towards examinations as opposed to competences applicable to life.
201. Kingdom Global Education Agency will partner and support globally and nationally towards education system that awards accumulated education assessment beyond one day evaluation where achievement at Primary Education Certificate level and Junior Secondary Education Certificate will be considered in Senior Secondary School admission and streaming.
202. Kingdom Global Education Agency will partner and support globally and nationally toward Schools ranking based on holistic assessment on performance indicators built around the following areas: academic, co-curricular activities, quality of management, operations and maintenance of physical facilities, environmental care, learners 'services and community outreach program.
203. Kingdom Global Education Agency will partner and support globally and nationally towards a broad education system that expands access to education at all levels, Undertaking regular curriculum reviews, Abolish all school levies which discriminate against poor households, Review capitation grants to be in line with inflationary trends, establish a National Council for Nomadic and refugee Education in country along with Standards and Quality Assurance.

204. Kingdom Global Education Agency will partner and support globally and nationally to whilst enrolment rates at primary and secondary levels, learning achievements increased. The application of standards and quality assurance measures are to be comprehensive, quality standards achieved as schools are regularly inspected and therefore teachers and school management in general are held into account for the declining educational achievements in the country.
205. Kingdom Global Education Agency will partner and support globally and nationally toward semi-autonomous Education Standards and Quality Assurance Commission be established and reporting to government education ministers for private checks on the system because they are national custodian of standards and quality in education and it will hold to account all service providers across the education sectors.
206. Kingdom Global Education Agency will partner and support globally and nationally towards establishing compliance commissioners and inspectorates of Education assumes responsibility for Standards and Quality Assurance across all institutions of higher learning.
207. Kingdom Global Education Agency will partner and support globally and nationally towards Education system National Assessment Centre be adequately funded to facilitate effective administration of necessary studies and learning achievement tracking, effective mechanism for dissemination and implementation of findings be developed. The National Assessment Centre needs to be institutionalized, aligned with the new structure of education and capacitated to manage and administer National Summative Assessment for each cycle.
208. Kingdom Global Education Agency will partner and support globally and nationally towards continuous review of examination Act to address current and future challenges in examination administration and other issues regarding governance of examinations including the marking exercise along with assessments that are diagnostic in nature should be enhanced to effectively evaluate learner achievements at all levels of education.
209. Kingdom Global Education Agency will partner and support globally and nationally towards Capitation grants be allocated to learners in primary, secondary, special needs education, adult education and not-for-profit non-formal schools that meet set criteria. Mainstream Technical and Vocational education so that the students can benefit from mainstream financing and enhanced skills development, Diversify and institutionalise university education funding sources to include government (grants, education bond and loans), private sector, development partners, scholarships, bursaries, financial institutions, income generating activities and philanthropy, Encourage local, regional and international public private partnerships in financing education, Invest in teacher professional development, Institutional Management and Governance of Education and Training.
210. Kingdom Global Education Agency will partner and support globally and nationally towards a strategic networking plan that will help Improved coordination, accountability and increased community/stakeholder participation in planning, implementation, management and governance of education at all levels directorates are established such us Policy and Planning , Partnerships and Private Educational Institutions , Research and Development , Higher Education and Teacher Education , Basic Education, Adult and Continuing Education , Technical training and vocational development, Field and Co-curricular Services , Administration, Finance and Support Services.
211. Kingdom Global Education Agency will partner and support globally and nationally towards establishment of administrative directorates with Support functions or auxiliary service departments reporting directly to heads of governments in education Centre including Central Planning, Legal, Human Resource, Administration, Finance, Internal Audit and Accounts all headed by officers at the rank of deputy directors and operating as small, independent units.
212. Kingdom Global Education Agency will partner and support globally and nationally to Functions of these divisions or departments will be derived from the office of the Principal Secretary or other to offer Technical oversight Education sector Secretariats with tasks that include regulation, coordination, policy, planning, partnerships and curriculum oversight.
213. Kingdom Global Education Agency will partner and support globally and nationally towards education system Proper positioning of mentoring and molding at all levels with a clear policy and legislation be in place, Partnership and collaboration with the relevant stakeholders including parents and local communities be encouraged, National values be mainstreamed in the curriculum, Institutional managers and teachers be provided with necessary resources to deal with emerging issues such as emerging health issues, substance abuse, violence and national values and cohesion.

214. Kingdom Global Education Agency will partner and support globally and nationally towards Research, Education and Training Research be cascaded to lower levels to encourage critical, independent and investigative thinking among young learners, Research be institutionalized by teaching basic research skills among teachers in TTCs and other tertiary institutions including the universities; and formation of strong research clubs/groups, Research be introduced as a discipline (curriculum) and as a management tool at all levels, both national and county, Development of a clear policy and legal framework that guides the development of research be undertaken More resources - Financial, human and infrastructure be allocated for research.
215. Kingdom Global Education Agency will partner and support globally and nationally towards education systems in countries with adequate and well trained staff, Curriculum is regularly reviewed to meet skills demands that are constantly changing, Technical capacities be strengthened, Intensification of innovation in priority areas be undertaken and Enhancing of Science, Technology and Innovation awareness be undertaken.
216. Kingdom Global Education Agency will partner and support globally and nationally towards Information and Communication (ICT) in Education ensuring ICT institutional framework be strengthened to allow efficient integration of ICT in the entire education sector with enhanced ICT capacity at all levels, A National Centre for ICT Integration in Education be established and be devolve to local gorvernment levels, Connectivity to enhance communication among headquarters, counties and individual institutions be enhanced and The Government provides technical backup in ICT initiatives in government learning educational institutions.
217. Kingdom Global Education Agency will partner and support globally and nationally towards Open and Distance Learning in Education Open and Distance Learning is merely mentioned in the current Sessional Paper and lacks policy framework for implementation especially with Covid 19 this has come out cleary we cannot overlook distance learning. There is minimum use of Open and Distance Learning approaches in Primary and Secondary schools in many developing countries in areas where physical and socio-economic barriers hinder access - especially among the difficult to reach communities.
218. Kingdom Global Education Agency will partner and support globally and nationally towards already existing initiatives in open and distance education, the Government should facilitate the establishment of a national university dedicated to Open and Distance Learning with ICT Technology especially for this season of covid, A regulatory and Legal Framework for open and distance learning be developed, The government explores the possibility of adopting distance and open learning approaches including home schools at all levels of countries education, The capacity of teachers and educators be built to enable them acquire skills in e-learning, Relevant materials in e-learning be developed.
219. Kingdom Global Education Agency will partner and support globally and nationally towards Teacher Education and Management, Teaching and teacher education be professionalized, The government grants public universities full academic and professional responsibility for Teachers Training Colleges, The government raises entry requirements and screen applicants for pre-service training to enable only those seeking career in teaching to join teacher training colleges especially untrained teachers.
220. Kingdom Global Education Agency will partner and support globally and nationally towards public Private Partnerships Public private partnership in education is a mutual collaboration between the government and the private sector that could help reduce public spending, increase access, equality, equity in the provision of education. The government facilitates the creation of a revolving fund which would be accessed by members at a lower interest rate for both short term and long term interest in education projects, The governments develops a Public Private Partnership in education policy and entrenches it in law.p Private investors in education, The government provides adequate incentives to private investors in education so that they are able to effectively contribute to improving access, quality, equity and relevance and The governments establishes a directorate for partnerships and private educational institutions.
221. Kingdom Global Education Agency will partner and support globally and nationally towards consolidation of all functions of Ministry Education, inter-ministerial committee to coordinate all the ministries and nonline departments that have a stake in the regulation of educational matters in their various capacities,

222. Kingdom Global Education Agency will partner and support globally and nationally to analyses the implications of the new Constitution on education, training and research for national development, Review the education system in countries regularly towards Relevance and responsiveness of the curriculum to national and global Vision 2030 and 2050; Access, equity, quality and transitional issues; Structure of education system from Kindergarten to University, including tertiary educational institutions, institutions of research, special needs education, adult education, village polytechnics, home craft centers and child care facilities; Investment in education, both public and private; Institutional management or governance; Human capacity in education at all levels; The place of information communication technology and other technologies; Niche markets with reference to national, regional, and international dynamics; and Molding and mentorship values. Undertake a situational analysis of the education sector by: Reviewing relevant documents including commissions' reports, policy papers and legal documents; and Reviewing best practices from countries which have national and county governments. Undertake a needs assessment to establish gaps in relation to: Curriculum delivery process including relevance and responsiveness of the curriculum; and the status of implementation of the targeted education sector interventions. Present periodic reports as and when required. Propose an appropriate educational management framework at the national, county, and institutional levels and review policy and legal frameworks.
223. Kingdom Global Education Agency will partner and support globally and nationally to empower government education system to hold consultative clustered county meetings or workshops with stakeholders; hold a national level consultative conference of stakeholders; co-opt local and international experts in particular areas as may be necessary; commission studies or researches to institutions or individuals with requisite expertise as required to undertake its tasks; co-ordinate and consult with relevant ministries, departments and agencies in order to access such information, documentations and studies as are relevant to enable the education sector to execute its mandate.
224. Kingdom Global Education Agency will partner and support globally and nationally towards Financing of education at all levels and modalities of resource mobilization to ensure provision of free and compulsory Basic Education, Regulatory frameworks for both Public and Private investors in the country; Framework on the relationship between National and County governments and structures in the management and implementation of education programs; A national strategy for institutional and human resource capacity development in the education sector; A national strategy for research, monitoring and evaluation, education management information system, information and communication technology and to redefine their role in the education sector; and (vi) A national education qualification framework.
225. Kingdom Global Education Agency will partner and support globally and nationally towards Finance, investment and resource mobilization, Regulatory and legal framework on education, Institutional management, governance, mentoring and molding, curriculum review and human resource capacity, Quality assurance, standards, ICT in education, Research and Development, monitoring and evaluation.
226. Kingdom Global Education Agency will partner and support globally and nationally towards education relevant as it should be, both with regards to structure, content and delivery, Sufficiently flexible to adapt to the changing needs of society: Without discrimination, physically and economically accessible to everyone, especially the vulnerable and marginalized, persons with disabilities, refugees and internally displaced persons, orphans, persons affected and infected by HIV AND AIDS and alcohol and drug abuse:
227. Kingdom Global Education Agency will partner and support globally and nationally to Reviewing relevant documents such as commission reports, policy papers, and legal documents, Reviewing good practices from countries which operate National and local Governments and Undertaking a needs assessment to establish gaps.
228. Kingdom Global Education Agency will partner and support globally and nationally to Curriculum delivery process; relevance and responsiveness of the curriculum (ensure issues of spirituality, integrity, compliance to global and national vision, citizen values, mentorship and governance are addressed); access, equity, quality and transitional issues; The status of implementation of the targeted education sector interventions; and Educational infrastructure.

229. Kingdom Global Education Agency will partner and support globally and nationally towards School Mapping Conducting inclusive consultative clustered county meetings, workshops and focus group discussions with key stakeholders; Meetings with specialist interest groups; Financing of education at all levels and modalities of resource mobilization to ensure provision of free and compulsory Basic Education; Regulatory frameworks for both Public and Private investors in the country; Developing a framework on the relationship between National and County governments as well as other necessary structures in the management and implementation of education programmes (including management of education at municipality level ; Developing a national strategy for institutional and human resource capacity development in the education sector; Developing a national strategy for research, quality assurance, monitoring and evaluation, EMIS, Information and Communication Technology, to redefine their role in the education sector; and Developing a national education qualification framework
230. Kingdom Global Education Agency will partner and support globally and nationally towards Education ownership as a national responsibility, Decentralization, Resource allocation, Management, Infrastructure , Education service delivery; The respective roles of the national and county governments, and between counties and educational institutions.
231. Kingdom Global Education Agency will partner and support globally and nationally towards grounded Education system to provide a system that is in line with the learner's growth and maturity cycle as provided in theories of learning. To provide for an education system that is less burdening for the learners. To provide a system that allows for specialization at the end of the junior secondary school. To ensure learners acquire competences and skills that will enable them to meet the human resource aspirations of global Vision 2030 to 2050 by offering a choice of subject pathways. To provide for a system that allows ease of re-entry of learners that had dropped out of the education system later on as adult learners. To ensure reduction of wastage by introducing automatic progression from primary to secondary phase. To provide an opportunity for the learners to acquire core skills and competences throughout the entire Basic Education cycle. To provide an opportunity for early identification and nurturing of talents in individual learners. To allow for flexibility and choice by learners to pursue areas of special interest in their learning. To provide a system of Competency Assessment Tests (CATs) that will contribute to the overall performance of learners. To align structure with international best practices and global cohesion. To provide a system that is not examinations oriented.
232. Kingdom Global Education Agency will partner and support globally and nationally towards Education System with a pre-Primary The Task Force noted that has been in operation for a long time, operating under various titles like baby class, nursery and pre-school unit. This level of education has over the years been offered by the communities, local authorities and private organizations. Pre-primary provides an opportunity for the development of the learner's brain, which is most rapid during the first five years of life. In addition, this stage provides emotional, cognitive, social, physical, moral values, spiritual and aesthetic development of the learner. Therefore, the curriculum will consist of communication skills, manipulation skills, awareness of the immediate environment and play. Investing in pre-primary education prepares children for further learning and growth. Moreover, a proper approach at this level can help the education system reduce costs in the long run.
233. Kingdom Global Education Agency will partner and support globally and nationally towards Education system with a foundation exposure in Promoting cognitive skills, and exposure to general knowledge in various fields, Instill life and social skills, national values and encouraging interpersonal relationships at an early age, Encourage an independent personality, the capacity of treating others with respect and tolerance, and accepting similarities as well as differences. , Encourage linguistic and symbolic literacy, becoming acquainted with technology and means of communication, instilling sensitivity to aesthetics and recognition of the arts and various means of artistic expression, Instil skills that will turn children into lifelong learners.
234. Kingdom Global Education Agency will partner and support globally and nationally towards Education System programme flexible and accelerated. Upon completion of the secondary equivalent, the adult learner may access Middle Level Institutions or University Education, all formal and non-formal education and training offered after the Basic Education cycle and comprises middle level institutions and university levels of education and training including All Teacher Training Colleges, All Technical and Vocational Institutions , All Sectoral Colleges within Government Ministries , All Institutions offering Pre-University Academic Programs , All Private and Public Chartered Universities, All Non-Governmental Institutions offering commercial and other skill-development courses beyond Basic Education provided approved by the Commission of Higher Education and Middle Level Institutions.

235. Kingdom Global Education Agency will partner and support globally and nationally towards Education System regulations and guidelines to set up the regulations for admission to universities, Undergraduate degrees, Post graduate Diplomas, Master's degree and Doctoral degrees.
236. Kingdom Global Education Agency will partner and support globally and nationally towards supporting countries in making this transformative change, through its work to ensure that all learners have the skills and knowledge they need to become responsible, green, global citizens; to advance science, technology and innovation for the development of sustainable solutions to mitigate and adapt to climate change and other global challenges; to expand access to ICTs to promote socio-economic development; and to ensure that culture is integrated into sustainable development strategies.
237. Kingdom Global Education Agency will partner and support globally and nationally towards Education System that is relevant, e-ective and adapted to local contexts, Universality and interdependence, with universal agenda, reacting a changing world and a new appreciation for the growing complexity and interconnectedness of development challenges reaching beyond borders, which need to be addressed in an integrated, coordinated and coherent manner; it emphasizes that developed countries can no longer achieve sustainable development without commensurate progress in developing countries and vice versa.
238. Kingdom Global Education Agency will partner and support globally and nationally towards Education systems to bring out global development values including structural economic transformation and inclusive growth; science, technology and innovation; people-centered development; environmental sustainability, natural resources management and disaster risk management; peace and security; and partnerships,
239. Kingdom Global Education Agency will partner and support globally and nationally towards Education system that eradicates poverty through its work to promote quality education and skills development to help people obtain decent work; harness science, technology for poverty reduction and sustainable development; promote culture as an enabler for sustainable development; support media development and access to information; and build resilience to the e-acts of climate change, natural disasters and connects. To reduce inequalities through its work to ensure that all learners have access to quality education at all levels; reduce the science and knowledge gaps between and within countries; close the digital divide and ensure that all development policies are inclusive and respect cultural diversity.
240. Kingdom Global Education Agency will partner and support globally and nationally towards Education system that promotes an integrated approach to achieving global Cooperation in all of its areas of competence; promoting international cooperation on and access to science, technology and innovation, including through its support to the Technology Facilitation Mechanism and the Technology Bank ; providing e-active, targeted capacity building, including on data collection and monitoring; promoting policy and institutional coherence; and convening multi-stakeholder partnerships.
241. Kingdom Global Education Agency will partner and support globally and nationally towards Develop education systems that foster quality inclusive education and promotes lifelong learning opportunities for all along with contribution to the building of peace, the eradication of poverty, sustainable development and intercultural dialogue through education, the sciences, culture, communication and information Support girls' and women's education, the participation and empowerment of women in science, the media, and culture and combating violence against women in all its forms. Improve water security through water research, water resources management, education, capacity building, advocacy and global monitoring.
242. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes inclusive sustainable cities through quality education for all, safeguarding cultural heritage, innovation and creativity, promoting environmental sustainability and building resilience to the effects of climate change, disasters and conflicts. Provide climate services in support of climate change mitigation and adaption efforts with a focus on knowledge (co) production and dissemination, policy advice, education, public awareness and capacity-development. Promote ocean science knowledge and build capacity to protect and sustainably manage the ocean and coasts. Foster intercultural dialogue, culture of peace and non-violence, and prevent violent extremism through global citizenship education; support free, independent and pluralistic media, ensure the safety of journalists; protect cultural and natural heritage, strengthen governance systems for culture and enhance fundamental freedoms. Strengthen science technology and innovation systems and policies.

243. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes Support the protection and sustainable use of biodiversity and management of natural resources through (World Heritage, Biosphere Reserves and Global Geo-parks). Reduce inequalities through quality education for all, reduce the science and knowledge gaps between and within countries, close the digital divide, and develop inclusive public policies, which include the contribution of culture to sustainable development. Strengthen the Means of Implementation by providing capacity building, strengthening multi-stakeholder partnerships and supporting data monitoring and reporting. Eradicate poverty by developing human capacity and productivity through quality education and skills development; science, technology and innovation; access to ICTs and the media; sustainable management of terrestrial and marine resources; protection and promotion of cultural heritage and of the diversity of cultural expressions.
244. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes Inclusive quality education and lifelong learning for all Leading the coordination and review/monitoring at global and regional levels and supporting the implementation at country level Access to safe, inclusive and health-promoting learning environments and comprehensive sexuality education. Strengthen national education systems to ensure access to inclusive, quality education and lifelong learning.
245. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes Strengthen Technical and vocational systems to equip youth and adults with the skills required for employment, decent work and entrepreneurship. Girls' and women's education, including through the Global Partnership for Girls' and Women's Education and combating gender-based violence along with Transmit knowledge and skills for responsible consumption and production patterns and foster responsible global citizens through the Global Education for Sustainable Development agenda. Ensure that inclusive, quality education and lifelong learning are part of urban planning polices to promote inclusive, sustainable cities. Climate Change Education to enable informed decision making and increase adaptation and mitigation capacities of communities and empower women and men to adopt sustainable lifestyles. Foster peaceful and inclusive societies through Global Citizenship Education, including peace and human rights education as well as the provision of education in emergencies. Mobilize strong global multi-stakeholder engagement through education institutions Steering Committee, regional partnership mechanisms and providing capacity building, data monitoring and reporting. Quality, inclusive education for all, as a key driver in eradicating poverty.
246. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes education programme aligned with global development supporting the implementation of Education at country level; leading the coordination and monitoring of Education at global and regional levels. Support for the advancement of SDG-Education 2030 to 2050 guided by the principles of equity, quality, inclusion and gender equality whilst promoting creativity and critical thinking.
247. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes provides guidance to countries on how to implement SDG 4 on education and its related targets, and proposes ways of implementing, coordinating, nancing and monitoring Education 2030 to ensure inclusive and equitable quality education and lifelong learning opportunities for all.
248. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes global, regional and national stakeholders to guide the implementation of the Education 2030 agenda as a focal point for education within the overall Education 2030 to 2050 agenda for Sustainable Development coordination structure. It convenes the SDG-Education 2030 to 2050 Steering Committee - a multi-stakeholder partnership acting as a key structure for coordinating global education e-orts.
249. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global agenda that will be promoted by development of All schools' infrastructure should be targeted for upgrading and standardization, More senior secondary schools are established while expanding the existing secondary schools to ensure 100% transition, All senior secondary schools should have adequate infrastructure to ensure that they admit learners from across the country, Selection to senior secondary schools shall consider the school's local catchment area, (i.e. constituency, county and national), national cohesion, learner ability and individual/personal subject choice. , The government to ensure that each county has a sufficient number of schools to absorb all learners up to senior secondary school, The government to enhance the development of model schools as pilot schools for excellence (i.e. smart schools) in each constituency, The national and county governments should develop and implement an effective transport policy for pupils and students and Encourage the development of more day schools.

250. Kingdom Global Education Agency will partner and support globally and nationally towards Education System that Promotes national unity, should be organized and managed at all levels of education including tertiary colleges, set benchmarks and general guidelines to guide planning and management of community service programmes by learning institutions, to develop more specific guidelines to govern the running of Community Outreach Programme activities. organized and managed by institutional managers and teachers, sensitize all stakeholders on their nature and implementation, Each participating student on completion of primary, junior secondary, senior secondary school and college education will be given a Community Outreach Programme Certificate and earn credits.
251. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global solutions of Poverty reduction, increased individual earnings, Enhanced democracy and good governance, strengthening of skills and abilities, improved nutrition and health promotion for economic growth and Enhanced productivity.
252. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global positive ideals of nationalism, patriotism and national unity but the social context impedes the inculcation of these values; relegates practical skills necessary for economic development as espoused in Vision 2030 to 2050 to non-examinable subjects the acquisition of requisite practical technological and entrepreneurial skills is not addressed; Achievement of the goal of producing morally upright and patriotic citizens of countries, achieving social cohesion has been hampered by the fact that carrier subjects like History and Government, and Religious Studies at the secondary level are optional yet they are necessary.
253. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and curriculum not overloaded in that there is too much content to be covered, forcing learners to spend all their time on books and limits time to play and spend holidays at home, There is no emphasis on technical subjects in that the few technical subjects offered are optional and that they are offered in few schools. The curriculum is objective oriented and geared towards passing examinations. This approach hampers learning as learners are often drilled to pass examinations. Reduce pressure focus to joining university and thus any post-secondary education is looked down upon. Provides limited opportunity for individual talent development and It is not responsive to current needs of the society as spelt out in the Vision 2030 to 2050 and the Constitution It lays no emphasis on ICT, Technology and Science. Linkage with the world of work is weak. In addition, the current curriculum does not address the following: Technology, innovativeness and entrepreneurship, which are the prime drivers of Vision 2030 to 2050 Primary school teacher's education training is at certificate level, yet global trends indicate that the lowest level of teacher education is at diploma. local communities' needs and priorities.
254. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Align it with the Constitution, Structure the curriculum within a skills and competences framework that identifies the knowledge, skills and competences that all learners will acquire, and which will provide both vertical and horizontal coherence, Develop a progressive assessment framework which identifies the knowledge, skills and competences that will be assessed for each level of Basic Education (Lower Primary, Upper Primary, Junior Secondary, and Senior Secondary, Address local needs and include the study of local knowledge and culture. especially with regards to equal opportunities, gender and civil rights and the content addresses the skills and competences framework.

255. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes Citizenship (it should encompass History of countries and the Constitution), ICT , Entrepreneurship, Environmental Studies, Languages for global competitiveness, Technical Industrial Vocational and Entrepreneurship Training, general education, the study of technologies and related sciences, and the acquisition of knowledge, practical skills, and attitudes relating to occupations in various sectors of economic and social life, provides and promotes lifelong education and training for self-reliance, provide opportunities for individuals to learn the practical, social and personal skills that will enable them to function at workplaces and as members of society, provide for progress within their occupational area and serve as avenues to further education and training.
256. Kingdom Global Education Agency will partner and support globally and nationally towards Education System designed in line with the government's goal of industrialization which will enhance the transformation of countries into a newly-industrialized, middle income country providing a high quality of life to all its citizens in a clean and secure environment. Curriculum is a crucial component of any training process as it is what ultimately shapes the outcomes of training programmes. It is thus important that curriculum processes are fairly harmonized across the public and private sectors.
257. Kingdom Global Education Agency will partner and support globally and nationally towards Education System that will solve challenges in some countries education system that includes Inflexible and outdated practical and relevant skills curricula, Mismatch between skills learnt and skills demanded by modern industries , Inadequate mechanisms for quality assurance, Inadequate physical facilities for training, coupled with lack of sufficient modern equipment , Inadequate and expensive training materials and textbooks, Low participation of the industry and private sector in curriculum design and development, training and assessment of skills.
258. Kingdom Global Education Agency will partner and support globally and nationally towards Education System harmonization and rationalization of Technical Vocational and industrial curricula, examinations, testing and certification. addressesing the emerging needs of our society in order to enable the learners to acquire and develop the desired knowledge, skills, values and attitudes for emerging knowledge society.
259. Kingdom Global Education Agency will partner and support globally and nationally towards Education System that will enable the government attain the Millennium Development Goals (MDGs), industrialization identifying as critical in realizing its economic, social and political pillars.
260. Kingdom Global Education Agency will partner and support globally and nationally towards Education System and global mindsets that Promotes Provide vertical and lateral curriculum overlaps to facilitate credit points transfer between successive training levels and from one programme to another, Introduce adequate, relevant contents and curriculum delivery modes to cater for new and emerging job performance trends as well as modern planning and quality management best practices, Integrate ICT driven industrial processes and technologies in the trade contents on national production systems, Adopt a broadly scoped units driven competences based modular curriculum design model to achieve multi-skill training programmes, flexible attendance, self-paced learning and alternative routes of progression via the course modules formulation. Adopt an appropriate mechanism for syllabus development that makes testing flexible and responsive to the current trends in the skilled labour market. Increase the general academic component of the curriculum to cater for the life skills and knowledge of citizens. Develop programmes on pedagogy and andragogy to satisfy demand for Technical vocational and industry trainers, Design a flexible technical teacher education curriculum that allows skilled persons with valuable experience as trainers or part-time instructors to be considered for credit transfer when they enrol for teacher training or pedagogy, Training programmes be designed on the basis of five broad areas, namely: (Science, engineering and technology (Applied sciences (Business management (Hospitality management (Entrepreneurship and innovation.
261. Kingdom Global Education Agency will partner and support globally and nationally towards Education System where universities develop and implement their own curricula in the disciplines they offer curricula offered at the Basic Education cycle, should undertake to quality assure the programmes offered at all Universities in the countries, Fast track the passage of proposed education Bills to oversee the national skills and competences training programmes , Encourage high academic achievers with talents to pursue TIVET courses to promote high standards in the institutions, , Establish mechanisms for linkages and credit transfers to attract students of high calibre in courses, facilitate horizontal and vertical mobility to sustain high standards and quality in skills and competences in various programmes.

262. Kingdom Global Education Agency will partner and support globally and nationally towards Equitable Education System where Equity means offering equal opportunities for education and training to all, irrespective of gender, ethnicity, religion, political affiliation or social status. Special attention is focussed on disadvantaged persons such as persons with special needs and those from marginalised communities and minorities. Equity also refers to fairness in participation in or using a service or allocation of resources. In education and training, equity focuses on Gender – girls vis-à-vis boys or females vis-à-vis males, Regional differences, ASAL/Slum areas vis-à-vis other areas , Socio-economic classes, mainly the poor vis-à-vis the rich, Special Needs – such as disadvantages caused by disabilities. In education and training, equity is the most elusive characteristic at all levels and in some cases, affirmative action is needed to realise it.
263. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Education System Quality is an indicator of the extent to which educational goals and objectives are achieved through implementation activities. Such objectives are normally stated in the curriculum documents. Assessment of quality is complicated as the tendency is to peg it to examinations performance.
264. Kingdom Global Education Agency will partner and support globally and nationally towards relevant education system ,Relevance refers to being fit for purpose and depends mainly on the curriculum content, learning materials and other support resources. An education and training system is relevant if it seeks to meet the development needs of the nation as anticipated by the national goals.
265. Kingdom Global Education Agency will partner and support globally and nationally towards accessible education system-Access There is no total access as not all children who should be in school are in school because of Inadequate level of capitation, leading to levies that parents cannot afford. Delayed remittances of the grant, forcing school management to impose levies to purchase urgently needed learning materials at the beginning of each year. Certain cultural practices like early marriages and tending to livestock, forcing girls and boys out of school. Inadequate infrastructural facilities, especially lack of classrooms to accommodate all children. While gender parity index generally averages close to one, there is variation in equity when considering ASAL regions and urban slums vis-à-vis the rest of the country.
266. Kingdom Global Education Agency will partner and support globally and nationally towards offering to meet the needs of the labour market by attaching the pre-primary component to each primary school, providing capitation grant, In partnership with teachers commission and organization employ and deploy teachers. Expand access to primary school by reviewing grants upwards, Investing more in infrastructure, In partnership with Teachers commissions, employ and deploy more teachers, Providing additional learning materials and abolishing all levies.
267. Kingdom Global Education Agency will partner and support globally and nationally towards expansion access to secondary school by making the minimum size of a school by Opening junior secondary wings in idle primary school facilities, promoting private sector investments in secondary schools, Building additional schools where there are established demands for places, abolishing all levies in schools, enforcing fees guidelines and mobilization more donor funds and grants upwards.
268. Kingdom Global Education Agency will partner and support globally and nationally towards enhancing quality education at all levels by Training head teachers in skills of quality assurance, financial and human resource management. Training, deploying and supporting quality assurance officers to do their work effectively. Providing adequate learning materials. Carrying out continuous regular course assessments and use them to guide learners towards better performance.
269. Kingdom Global Education Agency will partner and support globally and nationally towards promoting equity by designing special affirmative action programmes for girls regions and slum areas and abolishing all school levies which discriminate against poor households.
270. Kingdom Global Education Agency will partner and support globally and nationally towards making education and training relevant by undertaking major curricula reviews informed by research and needs assessment, to establish the challenges posed by constitution and skills needed for achieving countries goals. Reviewing and revising core learning materials to conform to the new curricula. In-servicing teachers to implement the new curricula and Redesigning teacher education curriculum and training programmes to prepare teachers for implementing the new curricula.
271. Kingdom Global Education Agency will partner and support globally and nationally towards supporting of predominantly nomadic communities are found in draught areas in countries access to education Low cost boarding schools to provide access to learners as communities migrate in search for pasture special bursaries for low regions, Special bursaries for girls under our sponsorships, school feeding programmes, mobile schools and grants in mitigation against hunger through our Kingdom Global Disaster Agency and Kingdom Global Food, Agriculture Agency and 3 JBA agencies along with other partners.

272. Kingdom Global Education Agency will partner and support globally and nationally towards education system support quality in urban slums and informal settlements, there are efforts to provide non-formal institutions at both primary and secondary levels. This is in addition to public primary schools. These institutions do not have regular programmes because, more often than not, the learners are involved in a form of income generating activity to support siblings, old or ailing parents. The teachers are mainly volunteers and are untrained.
273. Kingdom Global Education Agency will partner and support globally and nationally towards Quality education despite these efforts, nomadic communities operate under very harsh climatic conditions and have a myriad of competing needs yet very limited resources at their disposal. The difficulty of reaching children in nomadic communities with special needs who were previously not attended to. Lack of appropriate school infrastructure hampers access to Basic Education in these areas due to their geographical location and harsh ecological conditions. The mobility of nomadic communities, the hardships associated draught makes recruitment, deployment and retention of teachers difficult. Lack of a clear institutional framework to oversee the development, implementation, Monitoring and Evaluation of Nomadic Education. Lack of proper co-ordination of the various agencies involved in the provision of education in the nomadic areas. Duplication of efforts and unnecessary overlaps in the provision of education services. Lack of adequate information relating to nomadic education including data on the population of school going age children out of school. Poor infrastructure in vast ASAL regions making accessibility difficult. High levels of poverty among the pastoralists and cases of insecurity occasioned by banditry and inter -clan conflicts that affect education negatively. The national curriculum does not meet the needs of nomadic children. Stigmatization of those with special needs, cultural and other practices such as FGM and early marriages. Few teachers have a nomadic background, which makes recruitment, deployment and retention of teachers difficult. Boarding schools are culturally unresponsive to nomadic pastoralist children, creating the fear of alienation of children from their communities 'way of life.
274. Kingdom Global Education Agency will partner and support globally and nationally towards Quality of facilities in schools in harsh environments. These schools have inadequate water and sanitation facilities, lack bedding facilities, and the harsh environmental conditions make children susceptible to communicable skin and respiratory illnesses.
275. Kingdom Global Education Agency will partner and support globally and nationally towards Operationalization the Nomadic Education Policy framework to address the challenges in the provision of education in and fast track the establishment of National Council for Nomadic Education in Countries.
276. Kingdom Global Education Agency will partner and support globally and nationally towards Introduction Open Distance Learning (ODL) using local radio stations and mobile telephony to boost the transmission to increase radio coverage and reception. Give incentives such as —conditional cash transfers‖ to encourage enrolment and retention of children in nomadic/pastoral areas. Expand and adequately finance feeder, mobile and low cost boarding primary schools. These schools should be provided with qualified, experienced and motivated teachers. In addition, full time boarding facilities that are not affected by the school academic calendar should be introduced. Develop a coherent education implementation plan to address the needs of ASAL areas. Establish rescue centres to cater for the vulnerable girl-child in ASALs. Rehabilitate one designated TTC to provide in-service training to teachers who are prone to nomadism. Provide regular sensitization of community members on out-of-school children. Provide scholarships for school leavers who make teaching a career of choice in order to have more local teachers. Establish pre-schools in ASAL areas, allocate capitation and development grants in line with all Basic Education sub-sector funding.
277. Kingdom Global Education Agency will partner and support globally and nationally towards adopting a holistic approach to pastoralist education by ensuring provision of proper water and sanitation in schools, immunization and regular de-worming of all school going children, supplementary feeding and registration of births at school level. Provide better remuneration and conditions and terms of service for teachers working in hardship regions for motivation, In addition, the resource/teaching centres should be equipped with relevant instructional materials. Enhance and encourage Private Sector involvement in the development of university education and training to ensure that universities produce graduates with proven qualifications as required by industries. Expand university education in tandem with population growth and the demand for university education and research to ensure standards and quality are sustained. County Education Board to mobilize children and expand access, enhance equity and ensure relevance of education.
278. Kingdom Global Education Agency will partner and support globally and nationally towards Non-Formal Education Non-Formal Education is any organized system of learning activities outside the framework of formal education system (National Action Plan on Education).

279. Kingdom Global Education Agency will partner and support globally and nationally towards provision of instructional materials through funding for education institutions of urban slums in different municipalities, Weak management of education institutions for proper transparency and accountability due to poor registration of education centres. Inadequate quality assurance services and resources in terms of infrastructure support resulting to poor quality education programmes. Inadequate land, water, sanitation facilities, teaching and learning resources. The subsector is highly dynamic as the school can change status from being ineligible for government grants to being eligible and vice versa.
280. Kingdom Global Education Agency will partner and support globally and nationally towards supporting Programmes run by education ministry in poor urban slums, such as the school feeding programme or support grants for the Most Vulnerable Children (MVC) and HIV/AIDS programmes are confined to formal schools and are yet to be expanded to NFE institutions. Household poverty, HIV/AIDS, and geographical challenges coupled with continuing high cost of education and variability of curriculum offered across education curriculum while others offer nomadic curriculum.
281. Kingdom Global Education Agency will partner and support globally and nationally towards dealing with negative attitude by the general public towards normadic education as it is mostly viewed as providing inferior education compared to the formal education system.
282. Kingdom Global Education Agency will partner and support globally and nationally towards dealing with shortage of qualified and competent teachers who understand the diverse backgrounds and needs of learners and who are able to transmit academic skills that can prepare learners for further education and training. Most of the teachers also lack training on pedagogical skills.
283. Kingdom Global Education Agency will partner and support globally and nationally towards Operationalization of alternative Provision of Basic Education and Training Policy. The government, NGOs and other donors supporting education for the marginalized should prioritize and harmonize teacher training for Centres to enhance subject content mastery and pedagogical skills. All providers of Non-Formal Education to work closely so as to be able to address issues of accommodation, infrastructure, staffing, HIV AND AIDS, water, sanitation, health and nutrition. Harmonize all players in the Nomadic Education sub-sector with a view to formalizing their existence. Develop an examination framework for marginalized curriculum to ensure accreditation and linkages with formal curriculum. Prioritize the introduction of capitation/development grants to all Non-Formal Education Centers/Schools to ensure availability of funds for tuition and relevant instructional materials as a short-term measure. Make it easier for schools to register with the Ministries of Education by reviewing requirements for the marginalized areas schools, such as land ownership. Operate a flexible curriculum for Education in marginalized schools that entails the core subjects plus life skills and entrepreneurship. Expand the physical facilities of the available public schools to operate a double shift system to accommodate more students as public schools have adequate land to permit expansion. This could include erecting storey buildings to accommodate more classrooms and to save on prime land. Develop learning resource materials to support NFE curriculum implementation. The government should fast track the formalization of education in marginalized hardship areas and eventually phase out the education centers.
284. Kingdom Global Education Agency will partner and support globally and nationally towards overcoming Issues and Challenges of heavy bureaucratic structures, financial and infrastructural constraints. adequate transport to enable its officers to reach as many institutions as they would wish to, Quality Assurance officers are often directly recruited from serving teachers who may lack the necessary skills, knowledge and competence to deliver on standards and quality assurance. Standards and quality assurance services are irregular and rarely reach the target institutions.

285. Kingdom Global Education Agency will partner and support globally and nationally towards major findings and issues from cluster hearings and literature review officers do not visit all institutions as required since they are few and lack transport. Officers have been cited to lack the required skills and competences to add value to the standards and quality of education in the institutions. It has been observed at the cluster submissions that interaction between the officers and school managers was often not cordial. School managers do not have the necessary skills and competences to monitor standards and quality of curriculum delivery. School managers are not integrated in the standards and quality assurance service delivery. Standards and quality assurances delivery services are poor in the counties and sub counties. Delivery of education services in countries indicates that many children are learning very little and that learning outcomes in literacy and numeracy are poor. Whilst enrolment rates at primary and secondary levels have increased, learning achievement is not commensurate. Concerns were raised on how effectively education centers would be managed as an integrated level of Basic Education as well as constitutionally under the county governments. Submissions were made to the effect that the absence of school inspection services has resulted in falling standards countrywide. Standards and Quality Assurance services have not been felt in foreign curricula schools.
286. Kingdom Global Education Agency will partner and support globally and nationally towards Quality education officers should be aptly trained to equip them with relevant skills and competences. There should be a specific scheme of service for the quality assurance personnel. Proper recruitment mechanisms should be put in place to avoid enrolling less qualified officers in this very important education service.
287. Kingdom Global Education Agency will partner and support globally and nationally towards Quality services should be provided with adequate funding and the necessary infrastructure, such as vehicles, to facilitate research etc.
288. Kingdom Global Education Agency will partner and support globally and nationally towards sound management that should receive appropriate and regular training, retraining and in servicing to ensure they possess relevant skills and competences.
289. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Managers of institutions should be integrated into the standards and quality assurance delivery services and receive regular training and in-servicing to enable them to effectively monitor standards and quality of curriculum delivery.
290. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Mechanisms should be established to ensure that standards and quality Services in education centers are coordinated on policy at national level and effectively devolved to counties for implementation.
291. Kingdom Global Education Agency will partner and support globally and nationally towards Quality benchmarking opportunities be provided in developing countries to enhance the capacity of education officers.
292. Kingdom Global Education Agency will partner and support globally and nationally towards Quality education service programme should apply to all institutions including foreign curricula ones.
293. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Standards and Quality Assurance at Various Levels Early Childhood Development Education (ECDE) Level Early Childhood Development and Education interventions are significant to the social and economic development of a country as they provide children aged between 4 and 5 with a strong start in life.
294. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Children who access education services will be more likely to enrol in primary schools at the right age and less likely to drop out of school or repeat grades. There is also a high probability that these children will have improved school performance and cognitive abilities than those who do not attend remote classes.
295. Kingdom Global Education Agency will partner and support globally and nationally towards quality and standards directorate has not adequately monitored standards and quality of education institutions. Major findings and issues from cluster hearings, submissions and literature review. The level of education is yet to be embraced as an important level of education before a child joins Class 1, Standards and quality are low due to poor delivery of curriculum, Infrastructure and teaching/learning equipment are poor in most schools. , Most infrastructure is unplanned and unsuitable for teaching and learning. Standards and quality directorate has not focused on level for monitoring teaching/ learning delivery. Education level has tended to concentrate mainly on cognitive learning rather than on the child's talents, self-actualization, socialization and environmental appreciation.

296. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Education Standards and Quality Assurance services should monitor education delivery to ensure national standards and quality in delivery of the curriculum, infrastructure and equipment. School services to be devolved to the counties to take care of marginalized remote schools.
297. Kingdom Global Education Agency will partner and support globally and nationally towards Quality education system overcoming Overcrowding in schools/classrooms hence - high pupil/teacher ratio, Inadequate infrastructure and equipment, Low capacity in numbers and skills levels, Inequitable regional distribution of teachers, Lack of empowerment of managers to monitor standards and quality in their schools.
298. Kingdom Global Education Agency will partner and support globally and nationally towards Quality cluster hearings, submissions and literature review Free Primary Education has resulted in increased number of children and subsequent over-stretched and overcrowded facilities and high pupil/teacher ratio. Poor quality of infrastructure - in terms of classrooms, sanitation and furniture in rural areas and more so in remote areas. Most schools are not visited for standards and quality assurance monitoring due to inadequate staff in directorate. Most teachers prefer to work in urban areas. The two-year teacher training programme is inadequate for teacher trainees to acquire mastery in subject content, skills of pedagogy in the many subjects they are expected to teach resulting to poor preparation for quality teaching. Head teachers and management committees lack the necessary skills to monitor standards and quality of teaching in their schools. Emphasis on cognitive abilities for the sake of passing examinations has resulted in rote learning. Most schools do not have well equipped libraries.
299. Kingdom Global Education Agency will partner and support globally and nationally towards Quality education system that will seek to have increased number of schools and pupil enrolment, employ more teachers to improve pupil/teacher ratio and subsequently improve teacher contact for improved standards of teaching and learning, improve and strengthen the standards and quality assurance services to schools by increasing the number of officers and to equip managers with skills and competences to monitor standards and quality of curriculum delivery in their schools, improve on Standards and Quality Assurance officers should ensure that Standards require, infrastructure and equipment are available in schools, Teacher absenteeism is curbed, Teacher imbalance in schools and regions is addressed quickly to ensure equal standards and quality of education in the countries. Ages in primary schools should be enforced to avoid a generation gap that can create problems of managing the children. Adequate funding and resources should be availed to enable standards and quality assurance officers to reach as many schools as possible in the country. Develop and strengthen school based and Sub-county level standards and quality assurance capacities. Establish a programme for teacher development through regular retraining and in servicing to improve teacher competence in curriculum delivery. A system for periodically monitoring teaching and learning competences at various grades using established attainment standards should be established. Quality assurance officers 'powers should be strengthened to include taking action on their reports from different schools.
300. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Secondary School Level by overcoming Issues and Challenges Overcrowding in schools/classrooms – high pupil/teacher ratio. Inadequate infrastructure and equipment. Inadequate standards and quality assurance officers to access all schools. (d) Inadequate teaching staff and inequitable region/school distribution of teachers. Lack of empowerment of managers to monitor standards and quality in their schools. Inadequate or lack of infrastructure such as libraries and laboratories for effective delivery of the curriculum in science and languages. Theoretical (chalk and board) teaching even in science subjects emphasizing mainly on cognitive skills.
301. Kingdom Global Education Agency will partner and support globally and nationally towards Quality Free Day Secondary School Education has resulted in increased enrolment in schools and subsequent overstretched, overcrowded facilities and high pupil/teacher ratio. Most schools are not visited for standards and quality assurance monitoring due to inadequate staffing in the Directorate of Quality Assurance and Standards. Managers lack the necessary skills and competence to monitor standards and quality of teaching in their schools. Most schools lack adequate infrastructure and resources. Adequate funding and resources should be availed to enable standards and quality assurance officers to reach as many schools as possible in the country. Develop and strengthen school-based and zonal level standards and quality assurance capacities. Establish a programme for teacher development through regular retraining and in servicing to improve teacher competence in curriculum delivery. A system for periodically monitoring teaching and learning competences at various grades using established attainment standards should be put in place. Capacities of standards and quality assurance officers should be strengthened, including taking action on their reports from different schools.

302. Kingdom Global Education Agency will partner and support globally and nationally towards dealing with Issues and Challenges that affect Technical, vocational and industrial training programs that include a curriculum, which is not responsive enough to the changing needs of standards and quality of the labour market, mismatch between the skills learned in training institutions and skills demands of the industry, Inadequately trained technical teachers, Weak mechanisms to monitor standards and quality assurance in training institutions, Inadequate old and outdated equipment and physical facilities for training in institutions, High cost of training equipment materials and textbooks, most of which are sourced from overseas, Inadequate participation of the private sector in curriculum design development process monitoring of standards and quality of training.
303. Kingdom Global Education Agency will partner and support globally and nationally towards building high esteem against general perception that TIVET training programmes, especially those practical in nature are for low performing learners, Facilities and equipment that once existed in secondary schools to teach industrial education have been left to go to waste and disuse, There has been a systematic taking over of established middle level technical and polytechnic institutions by Universities, thus reducing their original core purpose of training middle level certificates and diploma graduates, Admissions to TIVET institutions is not based on academic skills qualifications and talents but on the applicants' needs, lack of clear linkages and credit transfers to facilitate horizontal and vertical mobility, Un-coordinated standards and quality assurance programmes in TIVET institutions, Inadequate funding to enable TIVET institutions train for the market.
304. Kingdom Global Education Agency will partner and support globally and nationally towards technical, vocational and industrial training implementstions of recommendations that include producing human resource to enable the country rise to a higher level of industrial development is a critical area to be revitalized. The strategic plan to review and harmonize the many subject's curricula in TIVET to establish acceptable national standards and quality. Encourage the industry/private sectors that are consumers of TIVET graduates to participate in curricula design development process and monitoring standards and quality of training through industrial attachments and internships of students. Institutions officers should be trained retrained and in-serviced in the requisite skills and competences to enable them to deliver standards and quality services to TIVET institutions. Ensure regular review and upgrading of equipment and infrastructure in the training institutions offering technical education to respond to the changing standards and quality of training. Actively revive TIVET programmes in secondary schools through the provision of facilities for industrial arts to offer technical education to promote and attract early interest in TIVET courses to ensure high standards and quality graduates in order to prepare them for various TIVET courses. Technical teachers should be trained retrained and in-serviced to ensure that schools and technical institutions perform to the required training standards and quality delivery of curricula as will be acceptable to the industry. Establish an effective mechanism to devolve the standards and quality services from the national level to the counties for close monitoring of TIVET programmes in the institutions.
305. Kingdom Global Education Agency will partner and support globally and nationally towards Teacher Education Level since not all pre-primary teachers are trained, Pre-primary teachers have largely been trained privately or through government holiday teaching programmes, A large percentage of pre-primary teacher training curriculum at the pre-primary training level is yet to be harmonized through national countries Institute of Education Montessori curricula headmistress curricula etc, Majority of trainers at all levels of teacher training education lack the necessary skills and competences to train teachers, Teacher training education suffers from low funding especially at the Primary level, There is lack of adequate and appropriate tuition equipment and materials particularly in Learning Resource Centres Dilapidated physical facilities at the training institutions, Inadequate ICT infrastructure equipment and materials to incorporate ICT programmes in the training of teachers, Teacher Training Colleges suffer from inadequate old and poorly maintained transport facilities which affect teaching practices, The pre-service teacher training curriculum is yet to fully capture modern trends in education e.g. ICT and other emerging and contemporary issues, Entry level of ECDE teacher trainees is not standard and Over-emphasis on content rather than pedagogical skills.

306. Kingdom Global Education Agency will partner and support globally and nationally towards sorting challenges that have come from major findings and issues from cluster hearings submissions and literature review Most of teacher trainees do not have teaching as a first career choice at all levels of teacher training. Training colleges and universities admit students with low grades as opposed to other disciplines. Schools and communities have not been well sensitized to support trainees on teaching practice. Submissions were received that diploma teachers are often more effective than university degree teachers. Principals and Boards of Management are ill equipped to perform standards and quality assurance duties. Our strategic include a harmonized national training curriculum for the pre-primary teachers to establish national standards and quality to be monitored by established authorities, Adequate and appropriate teaching/learning materials and infrastructure should be provided in all teacher training colleges, Trainers of trainees should receive the necessary pedagogy and skills to teach in teacher training colleges and universities , Adequate funding should be made available to all training colleges at all levels, Adequate transport, learning/teaching materials should be made available to teacher trainees on practice, Communities and schools should be sensitized to support trainees on teaching practice as part of the training programmes, Principals, tutors and Boards of Management should be equipped with the necessary knowledge and skills to undertake standards and quality assurance duties for effective, quality teacher training, Teacher training colleges should not be dumping places for failed teachers from secondary schools as this negatively affects standards and quality of teachers produced, Explore possibilities of ensuring that all trainees for teacher training are vetted to establish their interest and commitment to teaching as a career, Adequate competent staff should be deployed at the county level to ensure effective monitoring of standards and quality teacher training at the colleges and at the University level, the senates to establish mechanisms to do the same.
307. Kingdom Global Education Agency will partner and support globally and nationally towards developing University Level education overcoming Issues and Challenges that includes Issues of standards and quality are not harmonized across the board because of independent nature of some universities, Mandating of Higher Education commissions mandated to regulate higher education hence standards and quality in universities, more attention to standards and quality in private universities, There is lack of clear mechanisms for consultation and collaboration to harmonize issues of standards and quality, There is lack of a harmonized programme to train lecturers in pedagogy a situation that does not guarantee well coordinated standards and quality in university education, The increased demand for university education has resulted in overcrowding in lecture rooms – affecting lecturer/student ration standards and quality, The high number of students has put pressure on existing infrastructure and instructional equipment, Low funding has affected development of additional infrastructure and equipment to match the increased demand.
308. Kingdom Global Education Agency will partner and support globally and nationally towards dealing with challenges of major findings and issues from cluster hearings submissions and literature review , bridging a mismatch between what universities teach and the demands of industries in both standards and skills, Public and private universities have become much commercialized thus compromising standards and quality. The parallel degree programmes in most public universities while opening more places for students who qualify have overstretched the capability for the available lecturers to effectively and competently deliver on the teaching/learning programmes. There is a lot of part-time teaching in universities due to shortage of university lecturers and tutors in the country, thus compromising standards and quality of education. Our strategic plan is focused on funding restructuring and mandate the Commission of Higher Education to be the national standards and quality agency for all universities (Public and Private) education and training. Enhanced standards and quality mechanisms in university education and training, Lecturers and tutors should receive training and skills to ensure standard and quality delivery of curricula. Design an enhanced programme to produce more lecturers and tutors to meet the demand if universities are to produce highly rating and quality graduates. Internship and attachment should be integrated into the training system to enhance standards quality and relevance to meet market and industry needs. Introduce a programmes to equip lecturers in higher institutions of learning with strong communication skills to facilitate delivery of curriculum content.

309. Kingdom Global Education Agency will partner and support globally and nationally towards supporting Adult Basic Education Level helping overcoming Issues and Challenges including Low participation rates. Inadequate funding and other relevant resources, Inappropriate teaching methods that have not added value to the standards and quality of delivery in the sector, Regional and gender disparities in participation rates, Low standards and quality of programmes delivery. The teachers engaged are either unqualified or lack the necessary andragogy for such learners, Negative image hence stigmatization of such learners, Unclear transition and linkages for self-progression of the learners, Lack of standards and quality assurance mechanisms of the sector, Inadequate teaching and learning materials to support the teaching and learning processes, Uncoordinated large number of service providers such as government departments, communities, non-governmental organizations, faith-based organizations etc. resulting in low standards and quality of service delivery and Uncoordinated curricula offered by various providers.
310. Kingdom Global Education Agency will partner and support globally and nationally towards supporting adult education in Major findings and issues from cluster hearings, submissions and literature review, Adult male learners were embarrassed by participating in the same classes with female learners, Most men do not attach much value to Adult Basic Education. Learners do not see the value the sector adds in the absence of linkages for their personal growth and progression. Claims that there was lack of a national assessment and certification framework has demotivated the learners as they see no future in their efforts to learn. Issues were raised that there was dependence on unqualified teachers, who were largely poor performers in their respective fields of study. Reports that learning was taking place in borrowed classrooms, and whose availability depended on the goodwill of facility providers e.g. primary schools.
311. Kingdom Global Education Agency will partner and support globally and nationally towards adult education in the strategic plan than includes Standards and quality assurance services should be integrated to an overall national system, An assessment and national qualification framework to provide opportunities for linkages with the formal education and training systems to create re-entry at all levels to help in monitoring standards and quality should be established. To ensure standards and quality of delivery qualified teachers should be employed with an established scheme of service to motivate and retain staff. More funding and resources should be made available to improve on standards and quality, Adult Basic Education should be implemented through devolved Adult Education Boards in County Education Offices for effective delivery and monitoring of standards and quality, The centres for delivery of Adult Basic Education should be well identified for regular use and hours of attendance agreed upon, A relevant more suitable curriculum should be developed for the adult learners to comprise of numeracy basic literacy communication skills and to integrate acquisition of skills with day-to-day lives of the people to improve on their performances in their daily economic activities. Strengthening Standards and Quality Assurance Services in Educational Institutions Based on the legal principle and given the state of the education sector; high teacher absenteeism, high pupil dropout, declining capacity of students entering universities, the employability of many school graduates and the lack of entrepreneurial skills of many school leavers, the Task Force recommends that the proposed semi-autonomous Education Standards and Quality Assurance Commission be established. It will function as the national custodian of standards and quality in education. It will guide all service providers across the education sector in countries.
312. Kingdom Global Education Agency will partner and support globally and nationally towards Ensuring the effectiveness of policy implementation, strategic planning, resource mobilization and the management of resources by ministries and institutions concerned with education, and their management bodies, Ensure efficient service delivery at basic and tertiary institutions. Liaise with National Examinations and Curriculum bodies in matters of curriculum assessment and development. Coordinate co-curricular activities for the development of a holistic National and local levels, Ensure that quality education and learning outcomes are being provided to the Nation and that quality institutional leadership is being provided, Provide effective sector planning especially with regards to access relevance equity and quality of services provided to the learners.

313. Kingdom Global Education Agency will partner and support globally and nationally towards boasting Quality education includes learners who are healthy ready to learn and are supported in learning by their families and communities. Differences in learner characteristics provide ways in which education providers can intervene to improve quality. A quality context is one that provides an environment that is healthy safe and gender sensitive. The same environment should also provide adequate resources and facilities for learning. Tied to this, is a content that is reflected in the relevant curricula and materials. Enabling inputs, which comprise resources that are required to provide quality education. These inputs include human (teachers and educational administrators), physical (materials, classrooms). This dimension includes participatory governance and management and engagement with local communities and cultures. Teaching and learning dimension considers what takes place in the classroom. These are processes that have a focus on classroom activities involving trained teachers using learner-centred methodologies. This includes time spent in learning, methods of assessment, styles of teaching, language of instruction and how classrooms are organized. Learning outcomes, which encompass knowledge, skills, and attitudes. These outcomes also have linked to the national goals of education. Specifically, learning outcomes are expressed in terms of test grades, emotive and attitudinal outcomes. These five dimensions are captured in the following framework.
314. Kingdom Global Education Agency will partner and support globally and nationally towards empowering Framework for understanding Educational Quality Source in Decision-making is uncoordinated at all levels and hampered by inadequate data creating a sense of urgency on follow-ups, The administrative system is piecemeal and reactive not holistic and proactive, Budgeting is low dispersed and ad hoc not long-term and adequate and Deployment of high-level human resources is haphazard and unscientific.
315. Kingdom Global Education Agency will partner and support globally and nationally towards overcoming Issues and Challenges of predominance of the project-based approach has meant that monitoring activities have not been harmonized resulting in duplication of efforts and ultimately inefficient use of resources. There is inadequate funding for monitoring and evaluation. Funding for Monitoring and Evaluation remains a major challenge within the government due to non-availability of budget lines for Monitoring and evaluation. Hence the funds are not readily available for monitoring and evaluation activities as required. Schools and districts are not well sensitized on the importance of providing reliable and credible data. Some school managers exaggerate the enrolment figures in order to get more government/donor funding. There has been a weak data collection, storage management system and especially lack of accurate baseline upon which to measure changes in the quality of education services provided. There are limited personnel with technical competences and skills in M&E and data management analysis to arrive at the required or expected results. Limited implementation of projects at the district level due to inadequate financial and human resources. Different monitoring requirements for various projects have undermined coordination. Since government ministries and districts have not fully embraced monitoring and evaluation they lack the necessary culture/attitude required to facilitate activities. Some view them as fault finding missions rather than management tools for implementation of projects.
316. Kingdom Global Education Agency will partner and support globally and nationally towards strengthening education Monitoring and Evaluation should be so coordinated and structured so as to serve the needs of the monitoring and evaluation and other stakeholders. Monitoring and Evaluation be devolved from national to county and then to institutional levels. The school-based Monitoring and Evaluation in activities should be enhanced so that management decisions are taken at that level for greater impact on the quality of education services provided. There is need to train personnel in the necessary competences and skills in all devolved areas to ensure that Monitoring and Evaluation achieve the required standards in implementation of programmes. Adequate funding should be made available for inclusive and comprehensive monitoring and evaluation service delivery. Coordinate the process to strengthen monitoring and evaluation with field visits to verify and supplement desk approach. Strengthen the comprehensive baselines before implementing projects by enhancing and linking ICT, Education Management Information Systems (EMIS) to Monitoring and Evaluation to ensure that the required data are fully captured in designing of the necessary software.

317. Kingdom Global Education Agency will partner and support globally And Nationally towards national assessment system and the National Qualification Framework In countries Introduction Assessment of curriculum implementation is a critical component in provision of education service. Assessment provides information on achievement of the set objectives in an education system. Such information is used by policy makers in designing and improving on the current and future education programmes. Our assessment will be used by individual learners to map the way forward either across levels or within the levels. Assessment is therefore part and parcel of curriculum delivery and should be carried out competently and with a high degree of reliability. Emphasis on assessment in education is important for a number of reasons including Enhancing a culture of assessment for the support of the teaching and learning process. That is to support continuous improvement to align with leaning goals and the school vision based on understanding that tests are not a goal in themselves but rather, a tool in the service of learning. Provide for meaningful integration between internal and external assessments, and between formative and summative assessments. Reduction of pressure of high stakes examinations and resultant vices.
318. Kingdom Global Education Agency will partner and support globally and nationally towards evaluating education system through education institutions groups, individuals local and national governments including current summative assessment at the end of learning cycles does not adequately measure learner's abilities. Teachers are not adequately trained in test development and evaluation procedures. Due to the importance that is attached to examinations, there are malpractices reported in the management of examinations because the candidates, parents and teachers want to compete unfairly. The current curriculum is perceived to be examination oriented with little regard to moulding good citizens and for self-reliance. Assessment is no longer seen as part of teaching and learning process but as a sieve to determine those who can move to higher levels of education. The current system of summative assessment at the end of primary and secondary levels dictates the teaching/learning process towards examinations as opposed to learning. The ranking of schools based on examination performance has brought about a lot of negative effects. For example, head teachers of schools that are ranked low often get demoralized and others even resort to suicide.
319. Kingdom Global Education Agency will partner and support globally and nationally towards who score low grades regard themselves as failures in life and some commit suicide. Revise learning materials to ensure skills and competences are emphasized, Develop and introduce a policy on competency assessment, In-service teachers on role of assessments and evaluation in learning and teaching process, Government should introduce a Learners Identification Number (LIN) at entry point, which will be used to track the learner throughout the education system, to introduce special assessment which will be done by candidates who fail to sit the normal examinations at the prescribed time due to reasons of sickness, pregnancy, child birth or any other major hindrance. Schools will be ranked based on a holistic assessment of performance indicators built around the following areas academic, co-curricular activities quality of management, operations and maintenance of physical facilities, environmental care, learners'services and community outreach programmes.
320. Kingdom Global Education Agency will partner and support globally and nationally towards funding through priorities that have been highlighted through National Education Assessment Council to reflect the specific focus of its work, which is shifting towards assessment. It is further recommended that assessment in the new education structure be carried out at two levels National and School levels. NEAC will conduct the National Assessment at Primary as well as end of Junior and Senior Secondary levels, while individual institutions will be responsible for school-based assessment and will conduct Primary numeracy and literacy assessments. NEAC will also conduct the summative examinations at the end of Basic Education cycle and for all Tertiary institutions other than university. The assessment at each level in Pre-Primary the institution shall assess the learners on basic outcomes acquired against the set objectives in the curriculum, Lower Primary There shall be a standardized county-based assessment process for Lower Primary aimed at diagnosing individual learners 'talents and abilities. However, this will only be used to help the teachers and parents to attend to learners individual differences. This assessment will not deter a learner from progressing to the next level. NEAC will provide a database from which these assessments will be developed. Upper Primary There shall be a national upper primary assessment test at the end of Primary leading to the National Primary Education Certificate (NPEC) aimed at identifying individual learner's talents and abilities. Besides, there shall be a continuous school-based assessment to measure learner's progress. This exam will not deter a learner from progressing to the next level of Junior Secondary school, Junior Secondary there shall be a National Assessment at the end of Junior Secondary education leading to the National Junior Secondary Education Certificate. This assessment will help in identifying learner's abilities for placement in the four specialization streams in the Senior Secondary schools.

321. Learners will be prepared with certain amount of subject bias towards science, humanities, social sciences, technical and vocational subjects, to enable them specialize in Senior Secondary education. This assessment in essence will help learners to identify their career paths. Senior Secondary There shall be a National Assessment at the end of Senior Secondary education leading to the Kenya Senior Secondary Education Certificate. The National Assessment at this level will be used for placement at Universities, middle level colleges and progress into the world of work. The Higher Education Cycle shall consist of TIVET, other middle level training institutions and Universities. In the middle level institutions, assessment will be by NEAC and various professional bodies. Performance based on Course Assessment Tests should be integrated into the terminal assessments, which should be competency based.
322. Kingdom Global Education Agency will partner and support globally and nationally towards establishing partnership with governments to address mismanagement of resources, measures should include, the deployment of more auditors to schools and all other expenditure points. We shall support governments to have a policy framework to encourage development partners and the private sector to invest more in infrastructure development and equipping of educational institutions, reaching every educational centre with electricity under Rural Electrification Programmes should be implemented and where institutions are far from the national grid, the development of solar power should be adopted, promote linkages between universities and research centres for collaborative research, allocate reasonable budgets for research authorities to market research products or empower the education system to do so for accelerated national development, To expand access and equity at secondary school level the Ministry should adopt a number of policy measures amongst Introduction of double shifts in selected secondary schools especially in densely populated human settlements, Establishment of day wings in existing boarding schools, Utilization of primary school premises for secondary education and reiterate that the three streams be the minimum size of a school.
323. Kingdom Global Education Agency will partner and support globally and nationally towards National Qualification Framework To succeed in a globally competitive world, countries must work on a national education and training system that provides quality learning. The system has to be responsive to the ever-changing influences of the external environment and should promote the development of a nation that is committed to life skills and lifelong learning, The strategy in response to ensure anyone who has gone through the National education system is globally competitive. Furthermore, it is the set of principles and guidelines by which records of learner achievement are registered to enable national recognition of acquired skills, knowledge, attitudes and values. It provides a way to compare qualifications across systems and ensure that they are quality assured and recognized locally and internationally. Therefore this should provide a framework within which the countries qualifications are gauged internationally. Countries learners at all levels should compete and engage with their peers internationally. Formally recognized qualifications are arranged in a clearly defined structure. In this context qualifications are understood as sets of certified or documented skills – with no preference given to the respective learning path. The framework makes a hierarchical distinction between qualifications in the relevant path and categorizes them by levels. This countries strategies that we shall fund include to improve national education and training so as to determine the quality of education required for all learners, to make national qualifications systems easier to understand, to improving permeability of education and training by clarifying and strengthening the horizontal and vertical links within existing systems, to support lifelong learning by making learning pathways visible and by aiding access, participation and progression, to aid recognition of a broader range of learning outcomes (including those acquired through non-formal and informal learning, to strengthen the link and improve the communication between education and training and the labour market, to open up national qualification systems to qualifications awarded outside formal education and training (for example, awarded by sectors, to provide a reference point for quality assurance. National Qualification Systems in countries education policies and reports is that education in many developing countries need support though access will need improvement through the introduction of free primary education (FPE) and the cost-sharing in secondary school education, the quality of education has deteriorated. This is because teachers are not adequately trained to deal with the high numbers of students and are not motivated by good pay. In addition, schools have limited teaching facilities and practical skills and research are not adequately catered for. Many nations lack the mechanisms for establishing national standards for qualifications and competences to be the basis for accreditation of education and training institutions and programmes.

324. Kingdom Global Education Agency will partner and support globally and nationally towards funding of set the standards and benchmarks for qualifications and competences and definition of the levels of qualifications and competences provide for the recognition of attainment or competences including knowledge skills and values be the basis for accreditation of programmes and institutions. This will facilitate linkages and credit transfers to enable entry, re-entry and exit from the institutions of education and training, establish systems and processes for continuous review and improvement of standards and quality assurance, To spread the cost of providing education services, the government should invite, encourage and facilitate other stakeholders to participate fully in providing such services at all levels continuing and university education.
325. Kingdom Global Education Agency will partner and support globally and nationally towards networking such stakeholders in the private investors in the education sector, NGOs and other members of civil society. We shall support The Government to retain, through policies and legislation, full responsibility for curriculum development, teacher training standards, registration and certification of teachers, public examinations and quality assurance services, to ensure relevance and quality. The Government's main actions in facilitating private sector participation in providing education services that we shall fund and will include Enabling an efficient inspection and licensing services, Provision of curriculum documents and literature speedily, Guidance on teaching establishments and making available lists of trained and registered, but unemployed teachers, Incentives to investors in education by granting free land development infrastructures (roads, water, electricity, telecommunications) tax rebates and tax leave, Designing special credit schemes for investments in education and guaranteeing larger investors to secure international financing, Making available unused government buildings and institutions to be used by private providers at low rentals, Granting of loans bursaries and scholarships to students in private institutions especially at post-secondary and university levels through our support. Our strategic plan further will reach out to fund affordable Secondary Education in nations and globally in public and private sector investment and private public partnership to be strengthened through valuable actions such as Facilitate public investment in education across levels, Facilitate the private school proprietors to secure loans at low interest rates in order to encourage establishment of new schools and the expansion of the existing ones, Standardize the minimum basic requirements for establishment of both public and private schools, Facilitate the establishment of a revolving fund where private sector providers can borrow at low interest rates for development of schools, Provide tax rebate on building materials and other taxable costs to boost the efforts of faith-based organizations in constructing schools and through our faith based agencies JBA Good Samaritan Agency, JBA-Helpers Of Africa International Agency, JBA Ministries & Missions Agency and Dr Luke Foundation many Faith based educations will be bought and build in nationals globally.
326. Kingdom Global Education Agency will partner and support globally and nationally towards advocacy of governments in countries to supporting the ownership of public properties policy so that as we support in infrastructure there will be no disputes on ownership a number of concessionary measures are in place before investments are done. Land bought for educational purposes on application to the Commissioner of Lands, can be exempted from Stamp Duty and the cost of materials used in construction of private university buildings is exempt from VAT. Under certain circumstances a new private education business may qualify for up to 150% tax rebate on capital investments. This is available to all qualifying businesses and advertised by the Investment Promotion Authority. This tax rebates will assist grow the private investment in countries and Helpers Of Africa International and our agency will invest heavily in education sector. Duty concession very little is currently being done to offset the price of land in urban and suburban locations Other than the VAT concession on material inputs to private universities, very little is being done to help with the financing of new institutions. Private investment is only possible in an environment where there is a catchment and rarely in ASALS except residential universities and possibly some private boarding schools. Parents in these regions depend on local state sponsored schools or on private boarding schools.

327. Our engagements with governments to stimulate private sector engagement will be also stretch towards strengthening Quality Assurance in order to address private as well as public education to providers to ensure there is no exploitation of parents and learners, Where possible the government should give land to private developers desiring to invest in Education, Since land has been identified as the biggest single obstacle to the growth of the private education sector investors should be allowed the use of government land and school buildings on a long term lease arrangements so that they can put in fixtures including all furniture, school equipment, library books, textbooks, stationery, office equipment, all teaching resources and all normal overheads including electricity, water and maintenance. We shall fund responsible governments for recruiting staff (teaching, ancillary staff and administration and have sufficient resources to keep the school in operation until it becomes viable) and the state would benefit from corporate tax, VAT and rent as it becomes viable, the new legislative framework should recognize private schools and their diversity. Government to use the data collected and funds we shall give in Value-for-Money to target schools reporting unusual data, to verify the accuracy of submitted data and also to enable it to be assured that there are no problems in the schools supplying aberrant data, to support any initiatives to encourage increased private sector investment have to be coupled with a commensurate increase in the Quality Assurance since there are people who would see this as an opportunity to exploit the public education investment.
328. Other specific tasks, objectives and structure expositions will be available in our Kingdom Global Education Agency strategic plan 2020 to 2050 work book that has highlighted over 700 areas of focus. In conclusion we are well positioned to handle education in nations and globally to secure this generation and many to come through our structure and your funding there is hope in the education sector in the world by the grace of God.

VALUE OF INVESTING IN EDUCATION NUGGETS.

- *No other investment yields as great a return as the investment in education. An educated workforce is the foundation of every community and the future of every economy.- Brad Henry*

- *An investment in education always pays the highest returns. - Benjamin Franklin*

- *Learning is not attained by chance, it must be sought for with ardor and diligence in investment in education.- Abigail Adams*

- *The purpose of education is to replace an empty mind with an open one.-Malcolm Forbes*
- *Education technology and school construction go together. Modernization, updating education facilities, and making a capital investment in education are all included very important towards a better world. Major Owens*
- *Ladies and gentlemen: There can be no greater investment in Alabama's future than an investment in education. Bob Riley*
- *Risk comes from not knowing what you're doing. Knowledge will release the world from Risks- Warren Buffett*
- *The whole purpose of education is to turn mirrors into windows. Sydney J. Harris*
- *Education is not preparation for life; education is life itself.- John Dewey*
- *Education is what remains after one has forgotten what one has learned in school. Albert Einstein*
- *It turns out that advancing equal opportunity and economic empowerment is both morally right and good economics. Why? Because discrimination, poverty and ignorance restrict growth. We know that investments in education, infrastructure and scientific and technological research increase growth. They increase good jobs, and they create new wealth for all of us.*
- *William J. Clinton*
- *Nothing brings more money to the Treasury of the United States, than investment in education of the American people.*
- *Nancy Pelosi*
- *Education is the best provision for old age.- Aristotle*
- *Education is a progressive discovery of our own ignorance.-Will Durant*
- *I do have investments, investments in new jobs, investments in education, skill training, and the opportunities for people to get ahead and stay ahead. That's the kind of approach that will work. Hillary Clinton*
- *The Recovery Act, which helped saved the economy and prevented us going into the Great Depression, was the largest investment in green technology, the largest investment in education. We rebuilt roads and bridges. Barack Obama*
- *The wealthiest Americans often live as though they and their children had nothing to gain from investments in education, infrastructure, clean-energy, and scientific research.- Sam Harris*
- *"There is no greater pillar of stability than a strong, free, and educated woman." Angelina Jolie*
- *"He who opens a school door, closes a prison." Victor Hugo*
- *"Education is the passport to the future, for tomorrow belongs to those who prepare for it today." Malcolm X*
- *"Your attitude, not your aptitude, will determine your altitude. Education builds right attitudes" Zig Ziglar*
- *"If you think education is expensive, try ignorance." Andy McIntyre*
- *"The only person who is educated is the one who has learned how to learn ...and change." Carl Rogers*
- *"Education is a progressive discovery of our own ignorance in the world. "Will Durant*

- *"You can teach a student a lesson for a day; but if you can teach him to learn by creating curiosity, he will continue the learning process as long as he lives." Clay P. Bedford*
- *"A teacher affects eternity and one who invests in education; he can never tell where his influence stops." Henry B Adams*

- *"Much education today is monumentally ineffective. All too often we are giving young people cut flowers when we should be teaching them to grow their own plants." John W. Gardner*
- *"Do not confine your children to your own learning, for they were born in another time."Chinese proverb*

- *"Why should society feel responsible only for the education of children, and not for the education of all adults of every age?" Erich Fromm*

- *"The aim of education should be to teach us rather how to think, than what to think — rather to improve our minds, so as to enable us to think for ourselves, than to load the memory with thoughts of other men." Bill Beattie*
- *"The best teachers are those who show you where to look but don't tell you what to see." Alexandra K. Trenfor*
- *"Education is simply the soul of a society as it passes from one generation to another." G.K. Chesterton*
- *"If someone is going down the wrong road, he doesn't need motivation to speed him up. What he needs is education to turn him around." Jim Rohn*
- *"Education cost money, but then so does ignorance." Claus Moser*
  Steve Irwin

- *"If you are planning for a year, sow rice; if you are planning for a decade, plant trees; if you are planning for a lifetime, educate people." Chinese proverb*

- *"Do not train children to learning by force and harshness, but direct them to it by what amuses their minds, so that you may be better able to discover with accuracy the peculiar bent of the genius of each."*

- *"The whole purpose of education is to turn mirrors into windows for a brighter world." Sydney J. Harris*

- *"Education makes a people easy to lead but difficult to drive: easy to govern, but impossible to enslave." Peter Brougham*

- *"Formal education will make you a living; self-education will make you a fortune." Jim Rohn*
- *"It is in fact a part of the function of education to help us escape, not from our own time – for we are bound by that – but from*

- *Ecclesiastes 9:18 “Wisdom is better than weapons of war; but one sinner destroys much good.”*
- *Proverbs 4:13 “Take hold of instruction, do not let go. Guard her, for she is your life.”*
- *Colossians 1:28 “We proclaim Him, admonishing every man and teaching every man with all wisdom, so that we may present every man complete in Christ.”*
- *Proverbs 9:10 “The fear of the Lord is the beginning of wisdom, and the knowledge of the Holy One is understanding.”*
- *Proverbs 4:6-7 “Do not forsake wisdom, and she will protect you; love her, and she will watch over you. The beginning of wisdom is this: Get wisdom, though it cost all you have, get understanding.”*
- *Proverbs 3:13 “Blessed are those who find wisdom, those who gain understanding.”*
- *Proverbs 9:9 “Give instruction to a wise man and he will be still wiser, teach a righteous man and he will increase his learning.”*
- *Proverbs 3:14 “For her profit is better than the profit of silver and her gain better than fine gold.”*
- *Proverbs 15:33 “The fear of the Lord is the instruction for wisdom, and before honor comes humility.”*
- *Psalm 119:66 “Teach me good discernment and knowledge, for I believer in your commandments.”*
- *Job 28:28 “Behold, the fear of the Lord, that is wisdom, and to depart from evil is understanding.”*
- *Psalm 107:43 “Whoever is wise, let him heed these things and consider the great love of the Lord.”*
- *Proverbs 18:15 “The mind of the prudent acquires knowledge, and the ear of the wise seeks knowledge.”2 Timothy 2:15 “Do your best to present yourself to God as one approved, a worker who does not need to be ashamed and who correctly handles the word of truth.”*
- *Colossians 3:17 “And whatever you do, whether in word or deed, do it all in the name of the Lord Jesus, giving thanks to God the Father through him.”*
- *Joshua 1:8 “Keep this Book of the Law always on your lips; meditate on it day and night, so that you may be careful to do everything written in it. Then you will be prosperous and successful.”*
- *Acts 7:22 “Moses was educated in all the learning of the Egyptians, and he was a man of power in words and deeds.”*
- *Ecclesiastes 1:16 “I said in my heart, ‘I have acquired great wisdom, surpassing all who were over Jerusalem before me, and my heart has had a great experience of wisdom and knowledge.”*
- *1 Kings 3:12 “Behold, I now do according to your word. Behold, I give you a wise and discerning mind, so that none like you has ever been before you, and none like you shall arise after you.”*
- *Proverbs 1:7 “Fear of the Lord is the foundation of true knowledge, but fools despise wisdom and discipline.”*
- *Proverbs 13:10 “Pride only breeds quarrels, but wisdom is found in those who take advice.”*
- *1 Corinthians 1:25 “For the foolishness of God is wiser than human wisdom, and the weakness of God is stronger than human strength.”*
- *James 3:17 “But the wisdom that comes from heaven is first of all pure; then peace-loving, considerate, submissive, full of mercy and good fruit, impartial and sincere.”*
- *1 Corinthians 1:30 “It is because of him that you are in Christ Jesus, who has become for us wisdom from God – that is, our righteousness, holiness, and redemption.”*
- *James 1:5 “If any of you lacks wisdom, he should ask God, who gives generously to all without finding fault, and it will be given to him.”*
- *Daniel 2:23 “To thee, O God of my fathers, I give thanks and praise, for thou hast given me wisdom and strength, and hast made known to me what we asked of thee.”*

Good health is one of the main gifts of happiness that we can offer the world ranging from the young to the old as a will and gift of God it is highly emphasized in the word of God. We can see various people around us that are happy without having a lot of money. However, they are happy because they have good health and they enjoy their lives. We can also see many people that are having a lot of money and are rich enough to buy anything they want but still, they are not totally happy. Moreover, they are not satisfied with their lives. Primary health care is where the battle for human health is won and lost. Strong primary health care is the front line in defending the right to health, including sexual and reproductive health and reproductive rights. It's through strong primary health care that countries can prevent, detect and treat non-communicable diseases. It's through strong primary health care that outbreaks can be detected and stopped before they become epidemics. And it's through strong primary health care that we can protect children and fight the global surge in vaccine-preventable diseases like measles. That's why primary health care is at the heart of the Immunization Agenda 2030, our new strategic initiative, which we are designing with you, to maximize the power of Covid 19 and health care for all in other sectors. Because we cannot achieve health for all without vaccines for all this covid 19 has shown that we cannot be healthy until all are safe. Of course, strong primary health care depends on having a strong health workforce, working in teams. Doctors, nurses, midwives, lab technicians, community health workers – they all have a role to play. But the world is currently facing a shortfall of 18 million health workers to achieve and sustain universal health coverage by 2030. It is imperative that all countries invest in jobs to close that gap and deliver health for all. Our work supporting stronger health systems, we have also contributed to significant progress against many of the world's leading causes of death and disease. Health and fitness is the most important aspect of our life. A healthy world is a wealthy world this has been shown by the Covid 19 global effects that have reversed the socio economic life to 20 years according to economist so we cannot ignore the status of health globally. There is nothing more important than health for any human being. When we are healthy and fit we are able to enjoy our life well. We can talk to our near and dear one, we can laugh, smile, travel, enjoy food, and sleep well our focus is to make this a reality to all global citizens. But when our health and fitness is not up to the mark, we are unable to reach global goals, only a healthy world can reach global goals. Wise people treasure health as they treasure wealth. To maintain good health and fitness at its best all the time, we need to take care of hygiene and sanitation around us, focus on healthy sufficient food, resting, exercise, Medicare, clean environment, safe world from accidents and Gods divine intervention for a healthy world. As we know that health and fitness play an important role in our overall wellbeing so we should try for a good balance between mind, body, and soul as we trust God who is the creator of all and the author and finisher of our faith .

Kingdom Global Health Agency will fund, support and partner for global and national a healthy, productive and globally competitive nation Mission To build a progressive, responsive and sustainable health care system for accelerated attainment of the highest standards of health to all global citizens, To attain equitable affordable, accessible and quality health care, To accelerate the reduction of the burden of communicable conditions, To halt and reverse the rising burden of non-communicable diseases, To reduce the burden of violence and injuries, To improve access to, and quality of, person-centred essential health services, To reduce exposure to health risk factors through inter-sectoral health promotion, To strengthen collaboration with the private sector and other sectors that has an impact on health, to reduce high maternal mortality rate in the nations and the world, reduce medical costs of services, poor geographical and infrastructure access and sociocultural barriers. Kingdom Global Health Agency will fund, support and partner for global and national Health Sector Coordination and Inter-Governmental Affairs, Policy Planning and Healthcare Financing, Standards, Quality Assurance and Regulations, Preventive and Promotive Health, Curative and Rehabilitation Health , Administrative Services Outputs ,Health legislation and regulation, Policy formulation and strategic planning , Ensuring standards and quality assurance , National reporting and monitoring systems, Coordination and partnerships, Resource mobilization, Capacity building and technical support to counties, Research for health, Development of guidelines and protocols on health service delivery, community Advocacy, Health service delivery – for national referral health facilities, Ensuring security of public health commodities for national public health programs. Kingdom Global Health Agency will fund, support and partner for global and national capacity building and technical support at local level and national health referral services, monitoring performance and adherence to the planning cycle will also be core activities of the ministry as well as coordinating with all (internal and external) partners. Only approximately 25% of global citizens in developing world are covered by public, private or community based health insurance schemes which mean that the majority have to pay for healthcare out-of-pocket we seek to immediately begin a Kingdom Good Samaritan Health care to many through health systems in the countries globally. The consultative forum will provide a platform for dialogue on health system and issues of mutual interest to the national and county governments.

We will seek to ensure that health services remain uninterrupted during the transition period and beyond, while maintaining the focus to delivering the standards guarantee to the highest attainable standard of health for all global citizens, Identify issues for discussion during the intergovernmental consultative mechanisms and establish systems to address these issues, Facilitate and coordinate the transfer of functions, power or competencies from and to either level of government, with global authorities and stakeholders Coordinate and harmonies development of health policies and laws, Evaluate the performance of the national or local governments in realizing health goals, and recommend appropriate action, Monitor the implementation of national and counties' sectoral plans for health, Produce annual reports on national and global health statistics pertaining to the health status of the nation, health services coverage and utilization, Promote governance and partnership principles across the health system, Implementation and follow up of actions and recommendations from the National and County Government Coordinating Summit, Supporting Consideration of issues, Supporting Partnership and Coordination Framework,

Helpers Of Africa International through the Kingdom Global Health Agency seeks to Audit and follow up of Aid Effectiveness, built country ownership, alignment, harmonization, managing for results, and mutual accountability. have critical investments to this health agenda and sector especially after the world has been shaken by Covid 19 Pademic has been rising in recent years among low-income countries and weak infrastructure is still hampering growth. Many Governments need to make significant improvements to lay foundations for thriving economies and improving access to healthcare. Good public infrastructure are a precursor to quality health care services. We shall seek to fund and support Public health infrastructure provides communities, states, counties and the Nation the capacity to prevent disease, and promote health. We shall support the world to prepare for and responds to both acute (emergency) threats and chronic (ongoing) challenges to health. Infrastructure is the foundation for planning, delivering, evaluating, and improving public health. Upgrading and expanding health infrastructure, equipment and basic utilities is key pillar in many countries' for national development strategies.
We shall seek to support that no countries are left behind Covid 19 has shown us the health of one country affects health for all because of transmission that has taken as it moves to the middle income status. Some reports from Global donors reveals that the availability of external financing and administrative capacity constraints are key obstacles to scaling up public infrastructure investment in the most vulnerable countries. However, for low-income countries better connected to global capital bazaars, it is the sufficiency of domestic financial resources that is the most important concern. The global average for inpatient bed density is 27 per 10,000 and the average in the African region is 10 beds per 10,000 population. The service availability and readiness assessment survey (SARA) uses benchmarks of 18 and 39 inpatient beds per 10,000 derived from the average of lower- and upper-middle-income countries, respectively. According to the World Health Organisation, there should be at least one ambulance per 70,000 to 100,000 people. The purpose of an ambulance is to reach any place within 15-20 minutes after the distress call and transport the patient to a health facility within 20 minutes. But this rarely happens. Many Developing countries have outlined infrastructure as the foundation of the long-term development plan. As the health sector in countries to move towards "Progressively building a responsive and sustainable health care for accelerated attainment of the highest standard of health to all global citizens" appropriate infrastructure is required to ensure that we have the necessary tools to employ the skills. Access to healthcare is always critical component and measured by efficient utilization of human resources. Kingdom Global Health Agency will support and fund health infrastructure in the countries hereto in different components of these "tools" mainly upgrade and increase of Buildings, Physical infrastructure, Medical technologies equipment, Medical and hospital equipment, Transport: Emergency transport, Information and communication technologies (ICTs). Countries are the main source of health providers to its citizens through a network of public and private facilities under a system of Essential Package for Health.

Globally health system is challenged with underfunding, emergency care remains under developed, under-equipped and unsophisticated even in private facilities that is where our investment focus is valid and timely especially in this season of Covid 19. Referral system strengthening is critical in ensuring holistic delivery of services, though it has not been appropriately coordinated or targeted globally and we appreciate efforts of global organizations, NGOs, private companies and other players that have done well in this sectors. Lack or inadequacy of a rapid referral system and insufficient facilities to handling immediate maternal cases could be one of the key factors underlying the high mortality cases. At the moment referral mechanism between communities and facilities is still very weak pushing workload of basic conditions from basic care facilities to referral facilities. Majority of developing countries at National and local government counties lack ambulance services, others have contracted private companies. In most cases patients are transferred to hospitals by private means. For instance by car, truck or taxi, wheel barrows and animal carts. Few people make it by ambulance given their cost, arcity and the lack of a well-connected, reliable central dispatch system or call centre to coordinate these vital services. Emergency centres are often poorly equipped and unprepared. Dispensaries and health centers do not offer comprehensive basic health care (model health facilities) as stipulated within their mandate; many health centres were elevated to level 4 facilities (hospitals) without the requisite infrastructure this are the areas Helpers Of Africa International through Kingdom Global Health Agency.

However, these changes have no consistent earmarked resources to the elevated status to offer comprehensive services. In addition, there are disparities in the distribution the various health facility categories across the country. This state of affairs constrains the capacity of the public health system to provide quality KEPH services that are acceptable to different countries and constituents of global population. This problem is further compounded by lack of National Policy on to guide development of physical facilities and major equipment resulting to growth of unplanned health facilities which works against the national health sector goals. National and county governments supported by us along with other donors should continuously invest their resources in physical infrastructure development as per required number of health facilities per population without concurrent development to conform to the current norms and standards. Also political influence on where facilities are to be constructed; designs and structures have not been guided by the available norms and standards; There is lack of prioritized roadmap and investment plan for infrastructure development at national and local levels that we seek to intervene in partnership with governments, global authorities and stakeholders in partnership corroboration. Some countries have continued to inherited dilapidated structures and weak maintenance capacity and investments, especially at various levels of facilities; centralized procurement at the national and local government levels has hindered prompt and preventive maintenance. Strengthening physical infrastructure and capacity for application of medical technologies becomes priority health domain areas of investments.

We shall fund and support global briefs / researches through this comprehensive desk review of existing literature that included scientific papers, global reports, health sector strategic documents, Mid-term review report, Service availability and readiness assessment in government and global agencies policy documents. Pathways to optimal health Infrastructure growth globally improves access to healthcare by citizens and increases good return in investments. KGHA Infrastructure pathways for growth aim to support growth in infrastructure by helping address infrastructure constraints through: High return investments in fiscal infrastructure: transport, utilities, and information and communication technologies, Establish regionalized e-Health hubs with call centres for coordination of Emergency transport and services, To facilitate and maximize referral services, there is also need to purchase helicopters at National levels for highly specialized critical emergency evacuation of needy patients. Physical buildings should be expanded and rehabilitated both at national and county levels to conform to the current norms and standards for the health infrastructure. The technical capacity of the Human resources for health for both national and county levels should be enhanced to support the MES and service delivery. Procure and adequately equip health facilities with patient medical beds and medical equipment to conform to the norms and standards for the health infrastructure. There is need to develop guidelines on how to establish and set up a facility and its operations at all levels. Both levels of government should invest in critical communication technologies to facilitate access and efficient use of health services across the country.

We shall support and fund physical infrastructure, inpatient beds, equipment, transport, and technology (including ICT) required for effective delivery of services at the National Government and County Government level. Optimal- functional and operating to the required standards working towards right to the attainment of the highest standard of health to the global citizens which calls for a comprehensive effective and efficient infrastructure development. Making critical steps in infrastructure investments are primarily to support sustainable development goals considering the following key principles; - Promoting equity and access to services; People centeredness organized around people's expectations; Participation; Multi-sectoral approach and Social accountability with public participation and efficiency. Good public infrastructures will lead to linking people to health facilities and access to quality health care services. Bed density remained significantly low in developing countries 14 beds per 10,000 population while health facility population levels is on average health facilities per 10,000 population with great disparities in Counties. National, county and sub-county hospitals have been equipped with specialized equipment and information undergoing automation. Countries need to purchase and maintain the state of art ambulances and modernized some of the health facilities to provide comprehensive service delivery and facilitate referral services along with Coordination of transport for emergency services: There is no established call centre(s) for coordination of transport and management of Emergency services. • Physical health infrastructure (buildings): Majority of the physical buildings are dilapidated, inadequate space and not prioritized by national /counties as areas of critical investments but influenced by political leaders. • Bed capacity and medical equipment:
In many poor and developing countries there is limited bed capacity with 14 beds per 10,000 population against a global average of 27 and medical equipment for diagnostics, treatment and management of patients across the country. This is coupled with inadequate capacity of technical human resources for health to operate the fixed equipment and machines. We shall support Communication technologies to ensure there is noted limited access to communication equipment to the health service providers across the country. Thousands of vehicles-and buildings and a wide range of sophisticated equipment (much of it imported) are used each day in Africa for health purposes. As populations grow, new buildings, vehicles, and equipment will be needed. If funds for this infrastructure and equipment are allocated inefficiently or inequitably or are poorly used, the delivery of health services will be severely impaired. The challenge facing the public sector is particularly immense because most governments are heavily involved in building, operating, and maintaining health facilities. Many Sub-Saharan countries, and especially poorer ones with low population densities, face high infrastructure costs. The goodwill exists only funding and aggressive follow up.

We shall partner with governments and global players both public / private to overcome other challenges that include insufficient maintenance, inappropriate and insufficient expansion, and poor planning. We shall fund and support national and global reviews, datas and this review of the current situation makes it possible to determine what is missing and what health system reforms are needed to improve the planning and management of physical facilities devoted to health purposes. We shall seek to solve **Infrastructure and equipment problems,** Existing health facilities in many developing countries that have deteriorated in recent years rural government dispensaries were in good condition health facilities in most cities and small towns, but they will need major repairs to make them usable this are areas of funding. Poor planning is particularly apparent in imbalances between urban and rural areas. Lack of coordination between the public sector and nongovernment providers has complicated matters because decisions on the location of public sector facilities need to take into account the planning of the nongovernment providers. There are many church hospitals and dispensaries along with individuals that have potential of expansion and growth that we seek to do Joint ventures of repayable loans that can be boasted in size, services and efficiency to meet the needs of the population in rural areas and Helpers Of Africa International together with Governments can support and fund to build on, or complement, such networks. We shall fund and support lack of coordination between government officials and community leaders is another manifestation of weak planning of developing countries, health centers have been built by communities with the understanding that public authorities would operate them, but adequate resources have seldom been set aside for that purpose. Community participation was encouraged by the government, health posts were built at random locations by local communities. In some regions, the proliferation of health posts has resulted in shortages of personnel and material resources. Financial and other constraints have frequently prevented the governments from assuming responsibility for operations at health centers and have made local communities, cynical about the national government. All this will be a focus of Kingdom Global Health Agency

Helpers Of Africa International through Kingdom Global Health Agency will also seek to improve Poor project design and execution through smart team of architects of Kingdom Global Smart Cities Agency because many hospitals were designed in unprofessional way without professional service flows as we help in expansion we shall work on designs to deal with weak infrastructure planning. In the absence of norms for designing catchment areas, national officials responsible for planning health sector construction have often been unable to identify the type and size of infrastructure needed to provide-health services to local communities. Renewing Health Sector Infrastructure and Equipment Physical proximity to health care facilities is only inning of effective health care coverage. A facility that is near people's homes will have little value if it lacks basic equipment In many developing countries this problem has arisen partly because plans were made to construct new facilities before determining whether the money was available to operate them. Some of these problems can be resolved by making improvements in the quality of care, at lower level facilities. What remains critical, however, is to improve infrastructure planning, selection of equipment, and equipment maintenance. Cost-effective allocations of financial resources for infrastructure and equipment tend to be those that give priority to rehabilitation over new investment, and to health centers and local hospitals instead of tertiary facilities. Rehabilitation needs are widespread globally, but effective rehabilitation requires careful analysis of existing investments and a clear ranking of priorities compatible with a commitment to preventive and primary health care and to cost-effective-interventions. To establish a foundation for this kind of analysis through the creation of a data on existing infrastructure, equipment, and associated health care services that will be available to local health administrators. Norms, skills, and procedures for determining where to build health facilities and for the maintenance of buildings, equipment, and vehicles also need to be established and carefully monitored.

We seek to work to support globally with stake holders to promote norms should cover actual maintenance work- as well as its Financing, and should apply to nongovernment as well as public sector facilities. Many developing countries have vision to replace health centers and hospital buildings on maintenance annually but don't have the resources to do this nobel Job that is where we are coming in to fund and support in loans and grants for equipment maintenance, repair, and replacement are also needed. It has been suggested as a rule of thumb that a sum equivalent to 20 percent of the value of existing stock should be allocated annually to maintenance, repair, and replacement .Standardized lists of the equipment used in the various types of health care facilities are also needed, along with norms for maintenance and repair. We shall support countries and private sectors that have vision to planning to set up a hospital equipment maintenance service with workshops, equipment and tools, vehicles, spare parts, and training programs. When health center facilities and equipment are well managed, local communities tend to be involved. The basic principle underlying this arrangement is that facilities planned without the active participation of beneficiaries will, at best, be viewed with indifference. If appropriately planned, partnerships constitute a powerful instrument for promoting local initiatives and strengthening management through a sense of ownership.
Kingdom Global Health Agency will fund, support and partner for global and national Roles in Health Ministry of Planning and stakeholders in sectors to Promote sustainable population growth, Ensure youth and gender is mainstreamed in all sector policies, Provide data that is required to inform health (promotion) planning (e.g. KDHS, vital statistics), Create enabling environment for the implementation of the MTP towards achievement of health goals, Support implementation of transition implementation plans to facilitate devolution of the health system, Ministries of Agriculture/ Livestock and Fisheries, Incorporate considerations of health in safe food production systems, manufacturing, marketing and distribution, Ensure food security for the whole population, Ministry of Lands/ Housing and Urban Development, Promote urban and housing designs and infrastructure planning that take into account health and wellbeing of the population's urbanization, Strengthen access to land and other culturally important resources, in particular for women.

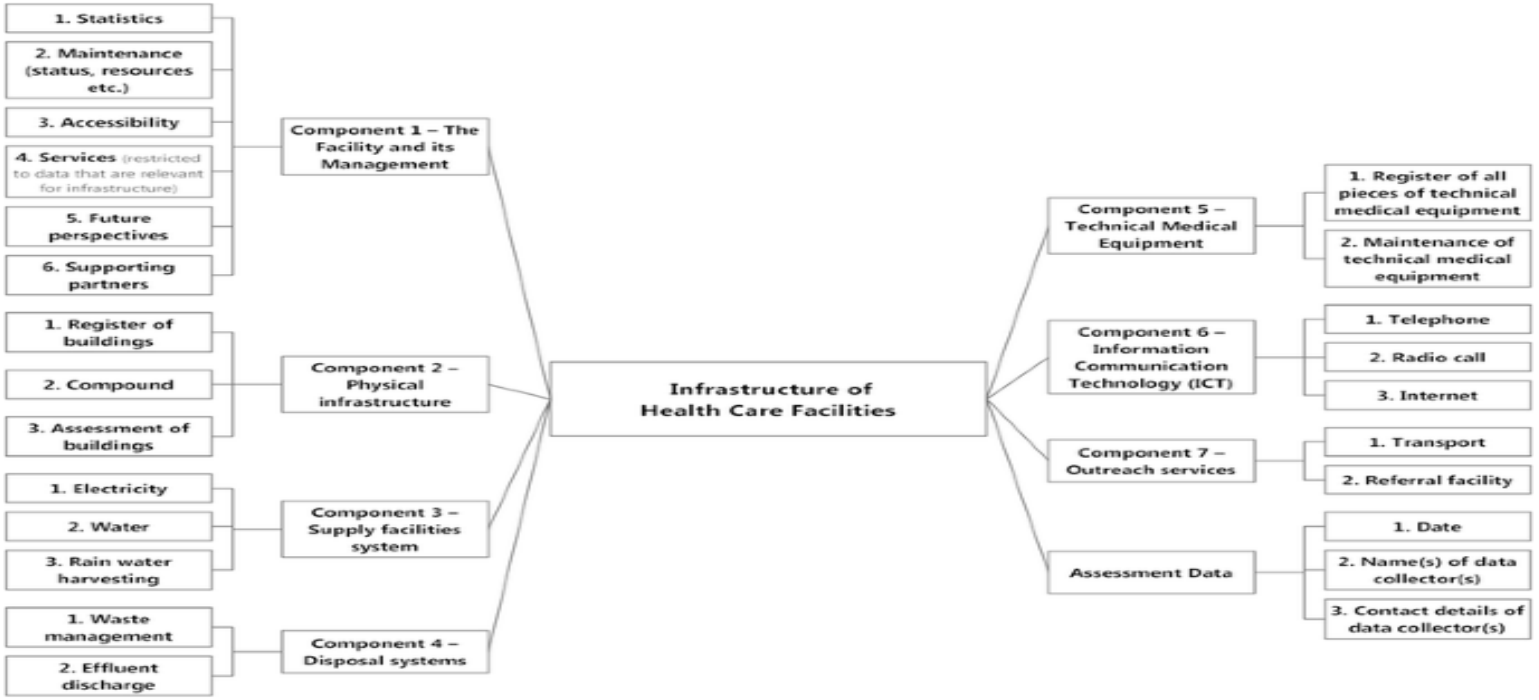
Ministry of Transport and Infrastructure- Ensure optimal planning of construction and maintenance of roads, bridges with due consideration for location of health services in order to facilitate physical access to health services e.g. express lanes for ambulances, Ensure availability of infrastructure to incentivize and support physical activity (cyclists, pedestrians), Facilitate data and voice communication within health sector and with other sectors. Ministry of Industrialization and Enterprise, Ensure work and stable employment and entrepreneur opportunities for all people across different socio economic groups. Ministry of Education, Science and Technology, Support education of men and women in order to enable them to increase control over the determinants of health and thereby improve their health. Directorate of Public Prosecution Ministry of Interior and National Coordination Attorney General Have fair justice systems, particularly in managing access to food, water & sanitation, housing, work opportunities and other determinants of wellbeing Ensure security (a major determinant of access to health), Ensure coordination of optimal disaster management (mitigation and response). Immigration Ensure wellbeing of refugee populations Ensure all visitors comply with regulation with respect to required vaccinations and sharing of critical information concerning their health status under special circumstances e.g bird flu. Ministry of Labour, Social Security and Services Promote progressive workplace and safety policies that safeguard the health of workers. Develop social policies for protection of vulnerable groups, Ensure development and enforcement of proper regulation of cultural practitioners. Ministry of Sports, Culture and Arts - Promote sport and physical exercise. Ministry of Environment, Water and Natural Resources - Influence population consumption patterns of natural resources to meet the health needs of current generations without compromising the ability of future generations to meet their own health needs, Develop and implement legislation to control/minimize pollution, Promote access to safe and clean water to the population. Ministry of commerce tourism and East African affairs, Development and harmonization of health policies and regulations, Coordination of common health sector activities, Regional centers on health,

We shall seek to support and fund tertiary level health facilities. The management of tertiary-level health facilities (meaning mostly major urban hospitals) merits special attention. Improving efficiency at such facilities without increasing their budget allocations in real, or even nominal, terms would be highly desirable. Management audits can lead to the establishment of specific targets for efficiency gains. Kingdom Global Health Agency shall fund hospitals, dispensaries and clinics both government and private to **Assessing technology choice,** many development countries, modem technology is often not used properly, even in leading hospitals and medical schools. This complex technology requires every component to interact at the right place and the right time, but the more complex the technology. The greater risk that a link in the chain will break down. The introduction of medical technology should therefore include the introduction of all the things needed to make the technology work: equipment, training, maintenance, quality control, and the capacity to translate the results of quality control analyses into corrective actions. The maintenance of such is also key and we shall support countries to develop a good maintenance system for its medical equipment, Its ability to do this has been due to the following factors:

We shall support and fund health bodies along with establishment of organizations autonomous body, the Medical and Educational Trust, to operate all health care facilities and train health care and operational personnel such as National Medical Doctors associations to promote and network doctors and nurses towards work practices that encourage good staff performance, combined with strong supervision and incentives. It offers better service conditions than the public sector and has higher staff retention rates. Our research has recognized the importance of maintenance in its operations and health care activities. Mine hospitals are financed significantly better than their public sector counterparts and therefore receive adequate maintenance budgets and foreign exchange. We shall support medical equipment maintenance and safety policies from its operational activities and wisely applied technical and human resources, maintenance, and management expertise from industrial instrumentation to medical applications. We shall support training in management and maintenance for health care specialists has been conducted by mine operational staff. Some operational maintenance staff have been seconded to mine hospitals. We shall support and fund new technologies development to expand the potential scope of the health system Computerized systems that make it possible to store and retrieve the large amounts of vital statistics and other data needed to assess risks and to plan, implement, and evaluate health programs. Pharmaceutical supplies can be managed more efficiently through computerized updating of inventories, thus preventing waste and reducing costs. Computers are only helpful, however, to the extent that they support a management information system with adequate software and maintenance. The role of Radio communication has proven essential in mobilizing the resources needed to deal with epidemics and natural disasters, Health activities in rural areas can be better integrated into district health care through the use of two- way radios, particularly if transport is available to evacuate patients when necessary. Supervisory consultation by radio improves the efficacy of services and. reduces the cost of referral.

We shall support and fund governments facilitate hospitals, clinics and dispensaries with New diagnostic tests, such as "dipsticks" to diagnose HIV and other sexually transmitted diseases, or tests using saliva, may give community health centers diagnostic powers that were previously restricted to specialized urban laboratories. Noninvasive diagnostic tools with high sensitivity and high specificity such as ultra-sound machines, may sharply improve diagnosis at the district level. Less invasive treatment "keyhole" surgery, for example-can minimize patient trauma and reduce the length of hospital stays. A shift to one-day surgery with improved technologies and care practices, as is now being done in many industrial countries, could help to contain the growing demand for hospital beds and other health facilities. The development of powerful drugs that can be effective when administered in a single oral dose has drastically modified the therapeutic approach to such diseases and thermostable vaccines that can be given in a single oral dose have increased the prospects for controlling common children's diseases, such as measles and polio. Drug kits, first aid Kits and blister packs fall in the same category. The greatest obstacle to improving medical technology in developing countries is "technology philanthropy" - the uncoordinated donation of equipment to developing countries by foreign agencies and charities. Given their often precarious finances, developing countries find it hard to refuse such gifts, even when they are unsuited to the-country's immediate needs. One solution would be to devise "donation protocols," whereby the kinds of equipment to be donated would follow a model-paralleling the selection of drugs by using essential drugs lists. There is generally no established mechanism in developing countries for planning the acquisition of new health technologies. Awareness of technologies through sufficient pool of knowledge at universities, among staff returning from abroad, and among consultants and donors. We shall fund and support medical colleges and universities to boast information and knowledge both in construction of new one through many designs we have along with supporting the existing directly or through governments and associations. We shall also seek to support the overcoming the existing challenges of vested interests, pressures, and prejudices through planning, the acquisition of new technologies is to a large extent controlled-by physicians.

We shall support medical engineering at the level of training associated with the technologies needed including public and nongovernment health care providers, engineers, planners, and social scientists—to ensure that the broader cultural, social, and economic dimensions are considered) Public, private voluntary, and private commercial perspectives are all useful to this end. Because the choice of health technologies determines the allocation of human and financial resources in health care. We shall advocate and mobilize governments to support operationally oriented research that will facilitate decisions about whether to introduce new tests, treatments, and their associated technologies into their countries' health care systems. Our research has highlighted the appropriateness and cost-effectiveness of the intervention, its links to the basic package of health services, its impact on health equity, the ease of its use and maintenance, its training requirements, and its life-time cost. A cautious attitude toward uncontrolled diffusion of medical technology is emerging in the industrial countries, and African policymakers would do well to exercise prudence in the face of quite understandable pressures for investment Selection of appropriate equipment, and arrangements-to ensure its maintenance, are appropriate ministry of health roles. Our Much of the work of technology assessment will require intercountry cooperation, because the costs of undertaking assessments and preparing appropriate recommendations are likely to exceed the capacity of most individual developing countries. Some support for such work exists at the international level, including a joint Technology Introduction Panel inaugurated Strengthening the management of infrastructure and equipment is one of the several health system reforms needed to achieve global health goals .We shall advocate and support governments to assign responsibility for decisions about health facilities, equipment, and technology in countries health systems. We shall seek to establish through stakeholders norms for health facilities at different levels in the system and to support operational research on the most cost-effective technologies available. We shall promote budgetary standards and provisions for maintenance and operating costs need to be established, particularly in public sector, health facilities. Since the financial resources required to provide basic health services are frequently depleted by cost overruns and-inefficiencies at the tertiary level, more efficient use of technologies, equipment, and facilities in large urban hospitals should L-e a priority. We shall support ministries of health and departments might take a look at the global -action plan devised by global health organizations for the management, maintenance, and repair of health care equipment.



We shall fund and support Medical equipment and engineering infrastructure involving Engineering Infrastructure Replacement Program funding for replacement of prioritized highest critical risk capital plant items and essential engineering infrastructure. The Medical Equipment Replacement Program provides funding for replacement of prioritized highest critical risk capital medical equipment. In-scope replacement medical equipment items and engineering infrastructure are available to reduce risk to patients, staff and to service availability for metropolitan and rural health services and includes statewide Public Health Reference Laboratory equipment.

The support of Medical equipment asset management framework is crucial. The *Medical equipment asset management framework* presents the foundation business practice to plan and manage medical equipment to achieve efficient, effective and safe service operation of medical equipment. Based on the asset lifecycle (record and maintain asset information -> plan -> acquire -> operate -> dispose), the framework will assist health services manage their assets. The framework: supports risk management and financial planning using a consistent and structured approach informs preparation of asset management plans (medical equipment and other assets) positions health services to best plan, acquire, operate and dispose of medical equipment the practices applied in the framework can be generally applied to all asset classes. Health services research and health care management have frequently focused on the role of supplies and personnel for the quantity and quality of health care services. It is obvious that qualified and motivated personnel are crucial for preventive and curative medical services, and vaccines as well as drugs are of utmost importance for the health of people. However, the role of health care facility infrastructure as a major component of a health care system must not be underestimated. For instance, the Alliance for Health Policy and Systems Research defines six building blocks of health care systems, the infrastructure constituting one component of the building block "service delivery". Helpers Of Africa International through Kingdom Global Health Agency will seek to support global health "facility infrastructure" as the total of all physical, technical and organizational components or assets that are prerequisites for the delivery of health care services. It can be seen as a major component of the structural quality of a health care system. Same applies to health care facilities, i.e., functionality, quality and extent of such components and assets determine the accessibility, availability, quality and acceptability of health care services as well as the working conditions of facility staff. The aspects of this includes facility and its management, the physical infrastructure, the supply facility system, the disposal system, technical medical equipment, information and communication technology, and the outreach services.

Health care facility infrastructure – major components displays the seven major components that comprehensively describe all aspects of health care facility infrastructure. All these components have to be considered in the collection of data on facility infrastructure. Assessment specific data like date, name of data collector etc. complete the data collection.

Professional management is required to safeguard the functionality of all components. Maintenance of infrastructure frequently constitutes a problem in resource poor countries. It is frequently neglected due to lack of funds, availability of spare parts, poor training or little availability of maintenance personnel and a culture disregarding maintenance. Consequently, the condition of assets is often rather poor and contributes to the low structural quality of health care services. Although the relevance of health facility infrastructure for the health care quality is obvious, the literature on health care facility infrastructure is limited. In particular, there are no easy-to-use instruments to assess the quality of health care infrastructure. This article presents a rapid assessment tool which was developed for primary health care facilities in Tanzania. The main purpose is to demonstrate how this tool can provide an evidence-base for health policy decision-making by providing fast and reliable knowledge on the condition of health care infrastructure. We shall also fund health and research **Assessment of health care infrastructure** comprehensive study on health care infrastructure, health policy decision-making cannot be based on snap-shot like research Many developing countries currently implement the roll-out of a contemporary software-based which includes epidemiological and demographic data. The majority of health data are gathered at the level of health care facilities. Data collection is performed by medical or administrative staff of the health care facilities in a monthly, quarterly or yearly routine. However, health information systems are reported to function insufficiently. Furthermore, infrastructural components are only partly assessed even in recently developed tools like 'Service Availability and Readiness Assessment. ' a thorough collection of infrastructural data must cover all seven components of infrastructure (comprehensiveness). Secondly, the procedure must be a routine, i.e., data collection, assessment and recording must be simple enough that administrative or medical staff of (primary) health care facilities can perform it without professional support (easiness of use). Thirdly, data collection should not take too much time (rapidness) and, fourthly, it should fit into the existing HIS (adaptability). Fifthly, the tool and data collection process should be standardized so that the results are comparable (standardization). Sixthly, results have to constitute a reliable base for health policy decision-making including allocation decisions of central funds (usefulness). Finally, it must be easily adaptable to varying circumstances (flexibility). This will help us to have These criteria which were derived from the desired function of the tool are in line with Rogers' research on the diffusion of innovations. Rogers emphasizes the importance of the perception of an innovation by the members of the respective social system. According to his research, the compatibility of an innovation is positively related to its rate of adoption, while complexity has the contrary effect. While various internal stakeholders of a health system are involved in the use of an innovative assessment tool on facility infrastructure, the authors' reflection of compatibility and complexity criteria primarily focused on the first-line users i.e. the health care facility staff.In immediate funding in loans and grants number of assessment tools are available in developing countries that consider facility infrastructure, but they seem to fall short to fulfil the criteria stated above.

Helpers Of Africa International through Kingdom Global Health Agency will fund, support and help in Global and National treatment, prevention, control and advocacy of Typhoid Fever, Typhus, Vaginosis , bacterial (Yeast Infection), Vaping-Associated Lung Injury (e-Cigarette Associated Lung Injury), Varicella (Chickenpox), Vibrio cholerae (Cholera), Vibriosis (Vibrio), Viral Hemorrhagic Fever (Ebola, Lassa, Marburg), West Nile Virus , Yellow Fever, Yersenia (Yersinia), Zika Virus Infection, Some noncommunicable diseases are more common than others. The four main types of noncommunicable diseases include cardiovascular disease, cancer, chronic respiratory disease, and diabetes, **Cardiovascular disease,** Poor diet and physical inactivity can cause increased -blood pressure / blood glucose / blood lipids / obesity. Cardiovascular disease is the leading cause of noncommunicable disease deaths. Some common noncommunicable cardiovascular conditions and diseases include / heart attack / stroke / coronary artery disease / cerebrovascular disease / peripheral artery disease (PAD) / congenital heart disease / deep vein thrombosis and pulmonary embolism. Cancer affects people of all ages, socioeconomic statuses, genders, and ethnicities. It's the second most-common cause Trusted Source of non -communicable disease death globally. Some cancers cannot be avoided due to genetic risks. Cancers are preventable with adoption of healthy lifestyle choices lung / liver / stomach / colorectal / prostate. The most common cancer deaths in women worldwide include ,breast, lung, colorectal, cervical, stomach, **Chronic respiratory disease** . Chronic respiratory diseases are ailments affecting the airways and lung structures. Some of these diseases have a genetic basis. However, other causes include lifestyle choices such as smoking and environmental conditions like exposure to air pollution, poor air quality, and poor ventilation. While these diseases are incurable, they can be managed with medical treatment. The most common chronic respiratory diseases include chronic obstructive pulmonary disease (COPD), asthma, occupational lung diseases, such as black lung, pulmonary hypertension, cystic fibrosis

Diabetes- Diabetes occurs when the body cannot produce enough insulin, a hormone that regulates blood sugar (glucose). It can also occur when the body cannot effectively use the insulin it produces. Some effects of diabetes include heart disease, vision loss, and kidney injury. If blood sugar levels are not controlled, diabetes can seriously damage other organs and systems in the body over time. There are two main types of diabetes:

- **Type 1 diabetes** is often diagnosed during childhood or young adulthood. It's the result of an immune system dysfunction.
- **Type 2 diabetes** is often acquired during later adulthood. It's typically the result of poor diet, inactivity, obesity, and other lifestyle and environmental factors.
- Other types of diabetes include: **Gestational diabetes**, which causes elevated blood sugar affecting many expectant mothers. **Prediabetes**, a condition defined by higher-than-normal blood sugar levels that lead to a very high risk of developing type 2 diabetes in the near future

1. Kingdom Global Health Agency will fund, support global health partnership and nations of new hospitals, clinics, dispensaries and wellness centers across the world we have thousands of designs ready including our headquarter city project that has a health and wellness city section on 2000 acres along with refurbishing existing ones in joint ventures or repayable loans or grants accordingly with governments and private sector. We shall buy existing hospitals worldwide maintain and upgrade as we raise the bar for health standards in nations and globally for bench marking.
2. Kingdom Global Health Agency will fund, support global health partnership and national planning and budgeting and to form the basis for annual planning and performance contracting. Despite immense investments in health sector, global, regional and local challenges still present obstacles to health and human capital development.
3. Kingdom Global Health Agency will fund, support global health partnership and nations to mitigation from political instability in the region, global economic downturn and climatic change continue to adversely that impact on health while increased cross-border movement of people and goods place considerable influence on national health risks and priorities.
4. Kingdom Global Health Agency will fund, support global health partnership and national health commitments Millennium Development Goals, reorientation towards Universal Health Coverage and commitment to global partnerships frameworks.
5. Kingdom Global Health Agency will fund, support global health partnership and national challenges in the health environment including Covid 19 as per exposed plan, high maternal, neonatal and child mortalities from preventable conditions, emerging and re-emerging diseases, increasing numbers of persons newly infected with HIV, threats from fevers such as Ebola and Marbug and the increasing cases of injuries and non-communicable diseases.
6. Kingdom Global Health Agency will fund, support global health partnership and national poverty challenges affecting peoples' ability to maintain health and seek health when needed.
7. Kingdom Global Health Agency will fund, support global health partnership and national challenges of Limited resources, inefficiencies in utilization of available resources and weak regulatory systems have greatly constrained the sector from effectively responding to these challenges.
8. Kingdom Global Health Agency will fund, support global health partnership and national social and economic development agenda affecting health.
9. Kingdom Global Health Agency will fund, support global health partnership and national highest attainable standard of health is a Right, among other constitutional provisions related to health.

11. Kingdom Global Health Agency will fund, support global health partnership and national Integration interventions that will contribute to realization of targets through participating in delivery of national flagship programmes.
12. Kingdom Global Health Agency will fund, support and partner for global and national governments through health Ministries of Health is to provide the policy framework that will facilitate the attainment of highest possible standard of health, and in a manner responsive to the needs of the population.
13. Kingdom Global Health Agency will fund, support global health partnership and national influence constitutional assigned functions of; health policy, health regulation, national and referral facilities and capacity building and technical assistance to countries.
14. Kingdom Global Health Agency will fund, support global health partnership and nations to reduce Infant and child mortality rates while infectious disease like HIV/AIDS, TB, Malaria, respiratory infections and diarrhoeal diseases.
15. Kingdom Global Health Agency will fund, support and partner for global and national control cardiovascular diseases, cancers, diabetes and mental disorders are contributing to 50 percent of all hospital deaths.
16. Kingdom Global Health Agency will fund, support and partner for global and national prevention of maternal deaths remain high although facility utilization is showing an upward trend with introduction of free maternity services.
17. Kingdom Global Health Agency will fund, support global health partnership and national family planning organization but no abortion program- only prolife.

18. Kingdom Global Health Agency will fund, support global health partnership and national essential national health strategic programs (Child Health, HIV Prevention and Control, TB Control, NTD and NCDs and Disease Outbreak Response).
19. Kingdom Global Health Agency will fund, support global health partnership and national organization structure for the purpose such as Department Outcomes Outcome Indicators Health Sector Coordination and Intergovernmental Affairs -A well-coordinated and synchronized national and county health system -A health sector intergovernmental framework -Policies/strategies/Plans for specific technical areas -Percent compliance with coordination framework Policy, Planning and Health Financing -Responsive, appropriate, efficient and cost-effective health care system -Percent of subsector strategies aligned to health policy -Percent of health sub-sectors with policy development capacities -Percent of Annual Work Plan funded Health Standards, Quality Assurance and Regulations -Strengthened systems for management of health care quality and safety -Percent of county health facilities complying with current health norms and standards -Percent of health institutions complying with new or reviewed health laws and regulations Preventive and Promotive Health -Reduced burden of preventive conditions and events -Improved health awareness and practice of positive health behaviours.
20. Kingdom Global Health Agency will fund, support global health partnership and nations to Institute measures to contribute to the national Vision long term aim of providing an efficient, integrated, high quality and affordable health care system.
21. Kingdom Global Health Agency will fund, support global health partnership and national prevalence and incidence of preventable conditions -Level of public awareness and of practice of positive health behaviours Curative and Rehabilitative Health -Improved access to quality and rehabilitative health services -Increased access to quality clinical care in slum areas -Increased access to emergency medical care and disaster management -Increased access to quality national forensic and pathology services Administrative Services -Efficient and responsive administrative support services -Composite score for ministerial performance contract improved -Percent of staff scoring 100 and above in performance appraisal system -Operational units functionally linked to Wide Area Network increased v The plan's strategic model elaborates those departmental outcomes to the specific outputs that Divisions and other operational units will deliver, with indicators and the annual targets to be achieved. Specific interventions and activities and their linkages to hospitals priority interventions areas is presented as appendage to the main document.
22. Kingdom Global Health Agency will fund, support global health partnership and national Health Intergovernmental Consultative Forum formal coordination platform, national and local governments. The plan will further apply the approach and enhance coordination and synergies with health actors to optimize on their roles in health sector advancement. These actors include clients, state, non-state, external actors and professional bodies and associations. A clear partnership and coordination framework establishment.
23. Kingdom Global Health Agency will fund, support global health partnership and national administrative organization into departments and responsible for semi-autonomous government agencies and regulatory bodies. The organization structure with a staff complement is deemed more than adequate for implementation of this plan human resource pool in specific technical areas need to be enhanced and additional financial resources mobilization
24. Kingdom Global Health Agency will fund, support global health partnership and national universal Health Coverage, whose concept involves optimizing equity to make even the poor have access to care, protection from catastrophic health spending and to ensure that resources are utilized in the most efficient and cost-effective way rural hospitals and slums, health insurance through Kingdom Good Samaritan Insurance card as the first project.
25. Kingdom Global Health Agency will fund, support global health partnership and nations to plan to integrate the measures to mitigate likely risks that prevent its successful implementation of feasible plans.
26. Kingdom Global Health Agency will fund, support global health partnership and national increasing fiscal deficit and rising inflation from adverse weather conditions may shrink the public financial resources available to the sector over time; insecurity may affect the plan implementation in some regions while staff may be challenged by rapid advancement of technology among others.
27. Kingdom Global Health Agency will fund, support global health partnership and nations to elaborate program for mitigation of these risks and monitoring mechanisms is included as part of plan implementation. These measures include initiating innovative resource mobilization strategies and cost-cutting measures, optimizing inter-sectoral collaborations and restructuring to instill accountability and efficiency.

28. Kingdom Global Health Agency will fund, support global health partnership and nations towards monitoring by tracking performance of agreed key indicators and annual target that every department, division or unit is expected to achieve. Performance will also be monitored within the sector's overall Monitoring and Evaluation Framework that will combine global, national and local systems to determine overall health sector performance in terms of outcomes and impact.
29. Kingdom Global Health Agency will fund, support global health partnership and nations towards public sector reforms for enhancing efficiency and effectiveness in public service delivery, strategic planning that provides a forum through which the Government can communicate with all its stakeholders the use of public resources for common good.
30. Kingdom Global Health Agency will fund, support global health partnership and nations towards socio-economic development and National Unity", all Government ministries are required to develop Ministerial Strategic Plans (MSPs)
31. Kingdom Global Health Agency will fund, support global health partnership and nations towards resource mobilization tools required to implement the plan, indeed, exceed the estimated available resources, which are based on the Medium Term Expenditure Framework short and long term. This plan will inform the optimization of human resources required to facilitate a successful implementation of the mandate of the Ministry National Health Support.
32. Kingdom Global Health Agency will fund, support global health partnership and nations towards national function of delivering health services and to the Government the functions of stewardship for health policy and oversight of national referral health facilities and to develop health strategic plans as per their mandates to implement the Constitution,
33. Kingdom Global Health Agency will fund, support global health partnership and national development of the Structures of consensus building meetings with all heads of parastatals, national referral facilities, regulatory bodies, departments, divisions, and units of health Devolution and Planning and agree on the roadmap for the development of the Ministerial Strategic Plan to develop health sector.
34. Kingdom Global Health Agency will fund, support and partner for global and national representatives from all departments, divisions and units conducted a situation analysis on the implementation of key MoH policy agenda outlined in documents such as National Health Sector Strategic plans for internal and external stakeholders for inputs and comments.
35. Kingdom Global Health Agency will fund, support global health partnership and nations towards consensus with key stakeholders to plan adopted analysis of the international, regional and national health and politico-socio-economic environments against challenges posed and anticipated in the medium term as a basis for setting the health developmental agenda.
36. Kingdom Global Health Agency will fund, support global health partnership and national foundational basis for the strategic plan demonstrating the relevance and importance of governments institutional arrangement to execute health agenda the health situation, analyses the lessons from previous planning period in order to align the MoH strategic plan agenda on the working approaches.
37. Kingdom Global Health Agency will fund, support global health partnership and national strategic model that outlines the overall intentions, defines what is to be realized and specifies the tangible outputs that will be generated by the ministry over the plan period. Specific outcome and output measures for every Department and Division clearly spelt out for monitoring of performance.
38. Kingdom Global Health Agency will fund, support global health partnership and national organizational and institutional capacity to implement the measures anticipated in credible health systems. The analysis of resource requirements and the available envelope and related issues are presented in Measures that will mitigate the arising risks and promote accountability of health sector.
39. Kingdom Global Health Agency will fund, support global health partnership and national elaborative process for monitoring, evaluation and reporting presents the human resource capacity of the Ministry while presents the specific interventions every ministerial department will deliver and demonstrates how these interventions are contributing to the investment areas spelt out in the countries national Health Policy

40. Kingdom Global Health Agency will fund, support global health partnership and national regional Environments Health, with all its socio-economic ramifications, remains one of the major global challenges and a big obstacle to human capital development. Although there have been immense investments in the sector and international policy and strategic efforts to improve the human conditions through Globalization, political instability and the emerging regional and national macroeconomic challenges triggered by the global economic down turn and climate change, have adversely impacted on health.
41. Kingdom Global Health Agency will fund, support global health partnership and national cross-border movements of goods, services and people as well as international rules and institutions have had a considerable influence on national health risks and priorities especially Covid 19 confirm this. To respond to these challenges, a number of regional and global initiatives focusing on health have been undertaken. These include major reforms within the United Nations and international and regional declarations and commitments. This plan has been developed at a time when the global development efforts towards attainment of Millennium Development Goals (MDGs) are coming to a close while other global initiatives such as those targeting non-communicable diseases, social determinants of health and managing the emerging and re-emerging health threats are gaining momentum.
42. Kingdom Global Health Agency will fund, support global health partnership and nations to emerge towards global efforts and commitments towards achievement of universal health coverage and to implement the principles of Aid Effectiveness that focus on aligning donor support to country policies, strategies and priorities and using country systems in implementation for purposes of ownership.
43. Kingdom Global Health Agency will fund, support global health partnership and national strategic plan aligned to these unfolding global events of Covid 19 and other disease in Persistent Health Conditions and Risks world faces a number of health challenges especially among children, including high mortality from diseases that can be prevented through immunization and high maternal mortality arising from pre-partum, child birth and post-partum conditions. Many people are also exposed to a heavy and wide-ranging disease burden partly because of the country's geographical and climatic conditions.
44. Kingdom Global Health Agency will fund, support global health partnership and national in disaster-prone environment in the arid and semi-arid regions of the country, and the lush but malaria-prone regions in the better endowed parts of the country, all have specific health risks associated with them. Political instability in some countries and regions subsequent displacement of people has resulted in increasing the demand for health services in the country and raising the risk of spreading communicable diseases. These factors are compounded by inadequate resources to fully mitigate the impact of these health risks. At present, developing countries faces problems of emerging and re-emerging diseases. Tuberculosis has resurfaced as a major cause of ill-health while the HIV prevalence has been steadily reducing, the number of newly infected people continues to increase. The threat from hemorrhagic fevers such Covid 19, Surrs, Ebola and Marburg remains real. Moreover, the country faces an increasing health burden from injuries and non-communicable diseases for which additional efforts are required. These are exacerbated by the negative underlying social determinants of health in the country. Poverty still remains a major challenge affecting people's ability to maintain health and to seek health services when needed.
45. Kingdom Global Health Agency will fund, support global health partnership and nations to overcome Health System Challenges Limited resources and inefficiencies in resource utilization have constrained the health sector's ability to fully harness existing technology to manage most of the direct causes of ill health and death. For instance, many of the public hospitals do not have the basic requirements such as adequate human resource, adequate stocks of essential medicines, operating theatres and supplies and functional ambulances. The local governments and hospitals, under whose docket these facilities now lie, will thus require continued support to bring them to the required standards. Existing efforts and support to respond efficiently and effectively to the health challenges are far from sufficient. Although mechanisms for improved coordination and partnership have been defined, including a national Health Sector-wide Approach, and its formal instrument.
46. Kingdom Global Health Agency will fund, support global health partnership and nations towards the Code of Conduct adherence to the obligations of both the by all partners has been poor. Parallel financing continues and not all funds are being channel to the defined sector priority areas. This leads to inefficiencies in the use of available limited resources.

47. Kingdom Global Health Agency will fund, support global health partnership and nations towards well-coordinated and managed devolution process in the health sector will result in further efficiency gains. Weak regulatory structures and the liberalized health market are additional challenges, as they have led to the proliferation of counterfeits and substandard health care services and products.
48. Kingdom Global Health Agency will fund, support global health partnership and nations towards unionization of health workers and the now recurrent industrial actions also continue to present new demands and challenges to the sector. In spite of these challenges, however, the health sector has had many successes that are presently leading to the emerging trends of reduced mortality and prevalence in disease conditions. With accelerated focus on key areas, the health sector should be able to accelerate and sustain the reversal of the downward trends in health indicators in the country.
49. Kingdom Global Health Agency will fund, support global health partnership and nations to improve public health sector management in all sectors of the economy. The health sector has benefited from these changes, which have led to improvements in some of the health indicators, including child health and HIV/AIDS. Multiple adverse shocks, namely; the post-election crisis, drought, the global financial and economic crisis, high international oil and food prices and slowdown in global economic activity.
50. Kingdom Global Health Agency will fund, support global health partnership and nations towards global health priority areas such as infrastructure, education, agriculture and rural development and health. The implementation of the Economic Stimulus Programmes (ESP) by the Government was meant to boost economic growth and lead the Kenyan economy out of the recession situation brought about by the slowdown.
51. Kingdom Global Health Agency will fund, support global health partnership and national citizens right to life, right to the highest attainable standards of health advocacy including reproductive health and emergency treatment, right to be free from hunger and to have food of acceptable quality, right to clean, safe and adequate water and reasonable standards of sanitation and the right to a clean healthy environment.
52. Kingdom Global Health Agency will fund, support global health partnership and nations towards health favorable Constitution reviews that provides a conducive overarching legal framework for ensuring more comprehensive and people-driven, rights–based approach to health. These are premised on the principles of equity and participation which also resonate with the principles of the health care system.
53. Kingdom Global Health Agency will fund, support global health partnership and national Right to life Both local and national governments to create an enabling environment to ensure world global citizens are healthy supporting governments must ensure health services are available, accessible, acceptable and of high quality. The health sector needs to work collaboratively with other sectors such as water, education, agriculture, justice, immigration, roads etc. to ensure health rights are realized. Citizens are empowered to demand for services
54. Kingdom Global Health Agency will fund, support global health partnership and national publication on important information affecting the Nation, Right to the highest attainable standards of health Right to housing, sanitation, food, clean and safe water, Right to emergency treatment, Right to social protection, Consumer rights with respect to health , Child rights with respect to health, Rights of minorities and marginalized groups with respect to health Devolved Governments, Relationship between the levels of government in Health responses.
55. Kingdom Global Health Agency will fund, support global health partnership and national Health and respective Countrie Departments of Health are required to work in a collaborative manner to ensure the achievement of health goals.
56. Kingdom Global Health Agency will fund, support and partner for global and national A devolved health system bringing services closer to the people, improve efficiency, promote transparency , accountability and put citizens at the driver's seat to determine their health agenda.
57. Kingdom Global Health Agency will fund, support global health partnership and national / local Governments health departments to transfer functions to the smallest capable unit that is capable of delivering that service. Functions of local governments Concurrent functions require the cooperation of both levels of government for their successful implementation. There is room for transfer of functions between either levels of government as long as it makes sense from an efficiency of service delivery standpoint.
58. Kingdom Global Health Agency will fund, support global health partnership and national health functions National referral facilities, Health Policy, Capacity building and technical assistance to counties, local health services, County health facilities and pharmacies Ambulance services, Promotion of primary health care, Licensing and control of selling of food in public places, Veterinary services, Cemeteries, funeral parlors and crematorium; Refuse removal, refuse dumps and solid waste.

59. Kingdom Global Health Agency will fund, support global health partnership and nations towards Health Commitments The Health Strategic Plan that aims to support the health sector implement the various global commitments. While these are numerous, the critical ones that have informed the strategy's focus and priorities include: - The International Health Regulations – to guide the country on key actions needed to assure adherence to international health regulations. - The Ouagadougou Declaration on Primary Health Care (PHC) and Health Systems – a re-iteration of the principles of the PHC approach, within the context of an overall health system strengthening approach. - International Health Partnerships (IHP+) on Aid Effectiveness. - The Millennium Development Goals (MDGs) declaration and the post 2015 agenda – a focus on global efforts towards improving health impacts. - The Abuja Health Declaration to support the improvements of health systems in the country by domesticating the provisions through national legislation. By signing the Abuja Declaration.
60. Kingdom Global Health Agency will fund, support global health partnership and national clarity of responsibility between governments across regions, continents and globally with health Analysis contained in the Health Sector Transfer Policy Paper. Functions need to be further unbundled to facilitate costing for each level of government to ensure that health is adequately funded to meet the constitutional aspirations for the right to the highest attainable standards of health. ...
61. Kingdom Global Health Agency will fund, support global health partnership and nations towards increased access of health services including marginalized areas of equitable share leverage on fund to support the development of health infrastructure to bring it at par with other counties enjoying higher level infrastructure Staffing local governments now vested with the responsibilities of managing the health workforce of their respective counties.
62. Kingdom Global Health Agency will fund, support global health partnership and nations towards protection of public officers Health staff are protected from infection Covid 19 has revealed this and victimization or discrimination.
63. Kingdom Global Health Agency will fund, support global health partnership and national prosperous country high quality of life by transforming the country from a third world country into an industrializing middle income country, providing a high quality of life to all its citizens in a clean and secure environment". To improve the overall livelihoods of the country aims to provide an efficient, integrated, high-quality and affordable health care system. Priority will be given to preventive care at community and household level, through a devolved health care system. With devolution of service delivery to local gorvernment level, is in a better position to focus on policy, regulations and standards setting, sector performance monitoring and capacity building.
64. Kingdom Global Health Agency will fund, support global health partnership and national support of the private sector to become the regional provider of choice for highly-specialised health care, thus opening "health tourism". Improved utilization of health care services by all will be achieved.
65. Kingdom Global Health Agency will fund, support global health partnership and national provision of a robust health infrastructure network countrywide, Improving the quality of health service delivery to the highest standards, Promotion of partnerships with the private sector, Providing access to those excluded from health care for financial or other reasons.
66. Kingdom Global Health Agency will fund, support global health partnership and national flagship projects under the social pillar of countries visions and which have already been integrated in Constitutions, devolved health governance and policy framework include the following, Channeling funds directly to health facilities, De-linking the health ministry from service delivery, Fast tracking implementation of community strategy, Development of a Human resource strategy & Establishing equitable financing mechanisms.
67. Kingdom Global Health Agency will fund, support global health partnership and national objectives to eliminate communicable conditions reducing the burden of communicable diseases until they are a minor public health concern along with Halt and reverse the rising burden of non-communicable conditions ensuring the implementation of clear strategies addressing all the identified non communicable conditions in the country.
68. Kingdom Global Health Agency will fund, support global health partnership and national reduction of the burden of violence and injuries aiming at instituting strategies that address all the causes of injuries and violence to Provide essential health care providing medical services that are affordable, equitable, accessible and responsive to clients' needs.
69. Kingdom Global Health Agency will fund, support global health partnership and nations to minimize exposure to health risk factors aiming at strengthening the health promotion interventions which address risk factors to health and also facilitate the use of products and services that lead to healthy behaviors in the population.

70. Kingdom Global Health Agency will fund, support global health partnership and nations to guide national Health Financing Health Leadership Health Products & Technologies, Health Information Health Workforce Service Delivery Systems, Health Infrastructure Efficiency Multi sectoral Social accountability, Equity People centered Participation Eliminate Communicable Conditions Halt, & reverse rising burden of NCD's to Reduce the burden of violence & injuries, Provide essential medical services Minimize exposure to health risk factors Strengthen collaboration with health related sectors, Physical and financial access Quality and safe services, Attaining the highest possible standards of health in a responsive manner Health Research and Development.
71. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen collaboration with health related sectors aiming at adopting a 'Health in all Policies' approach, which ensures that the health sector interacts with and influences design, implementation and monitoring processes in all health related sector actions.
72. Kingdom Global Health Agency will fund, support global health partnership and nations towards framework for Policy Directions The policy framework outlines the need for medium term strategic plans that will elaborate, in a comprehensive manner, the medium term strategic and investment focus as the health sector moves towards attaining the overall policy goal.
73. Kingdom Global Health Agency will fund, support global health partnership and nations towards well integration into the overall Government agenda Health Sector Strategic and Investment Health Sector Strategic and Investment Plan (KHSSP) define the medium term focus, goal, mission, objectives and priorities of the health sector which will facilitate the attainment of the objectives. It is not restricted to the actions of the Ministries of Health includes all actions of other state, non-state and external actors.
74. Kingdom Global Health Agency will fund, support global health partnership and national devolution to facilitate the achievement of key KHSSP principles and strategies of access, equity and quality of health care achieved through the allocation of funds and responsibility for delivery of health care to hospitals, health centers and dispensaries, thereby empowering households and social groups to take an active role in maintaining and managing their health strategic plan has, as its goal, 'Attaining equitable, affordable, accessible and quality health care for all'.
75. Kingdom Global Health Agency will fund, support global health partnership and nations to encompass the focus of the health sector in the medium term, informed by the need to improve numbers of available services, scale up coverage of required services and reduce financial implications of accessing and using health services. The mission of the sector in the medium term is 'To build a progressive, responsive and sustainable health care system for accelerated attainment of highest standards of health to all global citizens'.
76. Kingdom Global Health Agency will fund, support global health partnership and nations to focus on the implementation of a broad based health and related services that will impact on the health of persons in countries places emphasis on implementing interventions and prioritizing investments relating to maternal and newborn health.
77. Kingdom Global Health Agency will fund, support global health partnership and nations to prioritize interventions for each KHSSP investment area priority interventions, with some of them being adjusted to reflect the role of national government in delivering on health interventions.
78. Kingdom Global Health Agency will fund, support global health partnership and nations to pathways to empowerment of health Socio-economic Development, Equity and National Unity in health" achieving the development goals outlined for a stable macroeconomic environment, supported by real time structural reforms focusing on accelerating the devolution of services, rehabilitation and expansion of infrastructure; developing quality human capital to raise productivity and enhance global competitiveness and maximizing economic opportunities for all global citizens through targeted programmes to reduce inequality and poverty.
79. Kingdom Global Health Agency will fund, support global health partnership and nations to key components in delivering the social pillar, "Investing in the People of World through countries", which intends to build the countries into a cohesive society that enjoys equitable social development in a clean and secure environment the health sector playing a critical supportive role in the economic pillar by maintaining a healthy working population that is necessary for the increased labour production required for nations to match its global competition and health standards delivery.
80. Kingdom Global Health Agency will fund, support global health partnership and nations towards medium term priorities and flagship projects for the Government to focus on as it moves towards attaining the objectives of global health Vision.

81. Kingdom Global Health Agency will fund, support global health partnership and national professionalism and ethics in all staff to uphold the highest moral standards and professional competence in service delivery. • Transparency and Integrity: To be responsible, accountable and devoid of corrupt practices in service delivery. • Communication: To ensure smooth information flow for both internal and external stakeholders, People centred and customer satisfaction: To treat customers with courtesy and respect and delight in their satisfaction. • Commitment: To devote all our official time to our duties and undertake to serve customers without unnecessary delays. • Team work: To encourage team spirit, collaboration and consultation as a way of maximizing the synergy of working together for improved service delivery. • Innovativeness and creativity: To be open and proactive in seeking better and more efficient methods of service delivery. • Social justice and equity: Human rights approach and equitable access are fundamental guiding principles to inform delivery of public health services in the country. • Partnership and collaboration: Close working relationship with all stakeholders to promote synergy.
82. Kingdom Global Health Agency will fund, support global health partnership and nations towards health sector objectives Reduce infection of Covid 19, Reducing Maternal Mortality Rate, Reduce infant mortality rate, Reduce HIV/AIDS prevalence rate, Improve under one immunization coverage, Reduce Malaria in-patient case fatality rate, universal access to health care, preventive and primary health care, management of communicable diseases, maternal and child health and non-communicable diseases.
83. Kingdom Global Health Agency will fund, support global health partnership and nations focus on medical research, pharmaceutical production and health tourism as a means of diversifying external revenue sources, create regional hub for health services, to provide a policy framework that will facilitate the attainment of the highest possible standard of health in a manner responsive to the needs of the population, access to quality services with adequate financial risk protection, strengthen health services approach towards a focus on health, using a primary health care approach which remains the most efficient and cost-effective way to organize a health system.
84. Kingdom Global Health Agency will fund, support global health partnership and nations towards responsibilities of Health care by planning cognizance of the roles of the national and local governments interdependent boasting Health policy, health regulation, national referral facilities, capacity building and technical assistance to counties. Sense of identity, belonging and purpose.
85. Kingdom Global Health Agency will fund, support global health partnership and nations towards interventions to find innovative ways to enhance gender equity in health. In addition, concerns for youth, adolescents and persons with disabilities, marginalized and vulnerable population will be mainstreamed and specific programs and interventions tailored for them maternal deaths remain a major challenge.
86. Kingdom Global Health Agency will fund, support global health partnership and nations towards referral hospitals equip them with renal equipment, cancer equipment and others health infrastructure for comprehensive primary, secondary and tertiary health care remains inadequate. In collaboration with the county governments, continue to support infrastructural development, in particular in an effort to increase utilization of primary care services in the slum areas.
87. Kingdom Global Health Agency will fund, support global health partnership and nations towards health developments in service delivery and funding accompanied with strengthened management systems. The strengthening of supportive supervision through hospital 18 management reforms in particular contributed greatly to better quality of services – an approach that requires proper frameworks to realize greater results.
88. Kingdom Global Health Agency will fund, support global health partnership and nations towards health system management partly led to weakening of the role and position in improving the availability of essential medicines and medical supplies at primary care facilities through the national roll-out of the 'pull system'.
89. Kingdom Global Health Agency will fund, support global health partnership and nations towards joint sector planning and monitoring processes with external actors, the focus on developing a better health management information system (HMIS) and careful quantification of health commodities for the key HIV/AIDS, TB, Malaria and childhood vaccination programmes, which enable the continuous availability of the strategic commodities at facility level.

90. Kingdom Global Health Agency will fund, support global health partnership and nations regulatory bodies constitute Boards and Councils and professional bodies/associations whose mandate is drawn from that of the State and have an effect on health. Non State actors: The Trade Unions, Professional associations, Private sector, NGOs, CSOs, FBOs, Traditional Practitioners, the pharmaceutical companies, medical devices manufacturers and other industries, media and all other persons whose actions have an impact on health, but don't draw their mandate from the state.
91. Kingdom Global Health Agency will fund, support global health partnership and nations towards health financing, including the high cost of health care and the low coverage of health insurance. The system of government now offers opportunities to adjust the role to strengthen areas which have not received adequate attention so far. In particular, the greater emphasis at national level on policy development, development of guidelines, setting of norms and standards on all health system components and capacity building and technical assistance to the counties is expected to result in more coherent and comprehensive regulatory and policy framework for the entire sector, including on the key issue of health financing, A more rational use of all resources and Greater capacities at county and local levels to manage and deliver county health services.
92. Kingdom Global Health Agency will fund, support global health partnership and national programs addressing these barriers will, therefore, lead to increased access. The poor geographical and physical access for maternity services and other disease conditions is compounded by the poorly equipped public hospitals that do not conform to the norms and standards of the sector.
93. Kingdom Global Health Agency will fund, support global health partnership and national e-health approaches in a number of health facilities as part of the process to strengthen efficient use of resources and the referral system, the investments have minimal and low impact
94. Kingdom Global Health Agency will fund, support global health partnership and national departments of Health, partnership arrangements, planning and budgeting processes and communication strategies under countries constitutions.
95. Kingdom Global Health Agency will fund, support global health partnership and nations based on having the sector working around: - One planning framework. - One budgeting framework. - One Monitoring framework. The various stakeholders in the health sector

Kingdom Global Health Agency will fund, support global health partnership and nations to minimize exposure to health risk factors by strengthening the health promotion interventions which address risk factors to health and also facilitate the use of products and services that lead to healthy behaviors in the population.
238. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen collaboration with health related sectors adopting a 'Health in all Policies' approach, which ensures that the health sector interacts with and influences design, implementation and monitoring processes in all health related sector actions.
239. Kingdom Global Health Agency will fund, support global health partnership and nations to equip public hospitals.

240. Kingdom Global Health Agency will fund, support global health partnership and nations to Health infrastructure in Slum Areas Health care subsidies for Social Health Protection.
241. Kingdom Global Health Agency will fund, support global health partnership and nations to health Insurance Subsidy program and Establish E-Health Hubs in health facilities, Digitisation of Health Facilities, Improve access to referral systems, Re-engineering human resource for health, Health Products and Technologies, Mainstreaming research and development in Health Tourism, Locally Derived Natural Health Products, Modernize National Hospitals, Equipping of Public Hospitals, Modernize Teaching and Referral Hospital.
242. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, disseminate and implement policy guidelines on the health products and projects Priority departments and units carrying out priority interventions.
243. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and operate a comprehensive data collection and reporting system that will allow the regulator to perform duties as per the Health sectors
244. Kingdom Global Health Agency will fund, support global health partnership and nations to build required capacity at national, county and facility level, as appropriate, for implementing current and future health regulations.
245. Kingdom Global Health Agency will fund, support global health partnership and nations to design a comprehensive national human & veterinary regulatory authority (e.g. Food & Drugs Authority) in line with regional & international best practices.
246. Kingdom Global Health Agency will fund, support global health partnership and nations to establish and operate the regulatory authority in line with the Expand the scope of in line with the Act to provide for health testing.
247. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and maintain global website which provides easily accessible information for health professionals, patients, consumers and the health industry on all relevant aspects of regulatory control of Health including Policy Guidelines.
248. Kingdom Global Health Agency will fund, support global health partnership and nations to rational investment and efficient management of Health Sector including national Governments to ensure National Strategic Reserve for key public health commodities.
249. Kingdom Global Health Agency will fund, support global health partnership and nations to promote generic medicines use throughout the whole health system through legal and administrative interventions and Facilitate implementation, monitoring.
250. Kingdom Global Health Agency will fund, support global health partnership and nations to priority Interventions departments and units carrying out priority interventions review & update of National Pharmaceutical Policy into a comprehensive Health policy
251. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure mobilization and allocation of sufficient national and county resources for the provision of adequate supplies of Develop and disseminate Policy Guidelines including how to allocate sufficient resources at national and global level for all.
252. Kingdom Global Health Agency will fund, support global health partnership and nations to support investment in health sector in Health Financing Strategy, produce, publish and disseminate the global Strategy.
253. Kingdom Global Health Agency will fund, support global health partnership and nations to Institute a preventive and corrective medical equipment maintenance and repair system.
254. Kingdom Global Health Agency will fund, support global health partnership and nations to establish county and global systems for coordinating and managing health sectors investments.
255. Kingdom Global Health Agency will fund, support global health partnership and nations to develop & disseminate quantification & procurement training curriculum & implementation guideline; undertake county capacity building.
256. Kingdom Global Health Agency will fund, support global health partnership and nations to develop & disseminate Health Supply Management (Inventory) Guidelines; undertake county capacity building and Other Technical health Units.

257. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and disseminate health Supportive Supervision undertake county capacity building and Establish system for Priority Interventions departments and units carrying out priority interventions collection, monitoring and wide dissemination of prices for a basket and develop a constantly updated price data-base; establish, regularly update, publish health facilities and product indicator price guide.
258. Kingdom Global Health Agency will fund, support global health partnership and nations to enhance and integrate the M&E system for national and county level health management comprehensively to capture key elements of access.
259. Kingdom Global Health Agency will fund, support global health partnership and nations to assist the counties to attain the required capacity to undertake effective health sector management and ensure appropriate use.
260. Kingdom Global Health Agency will fund, support global health partnership and nations to undertake relevant operational research (OR) into HPT Investments, Management and Use.
261. Kingdom Global Health Agency will fund, support global health partnership and nations to participate in the work of the intergovernmental structure responsible for providing leadership and guidance in national and global policy, investment and systems management.
262. Kingdom Global Health Agency will fund, support global health partnership and nations to establish effective and reliable health procurement and supply management.
263. Kingdom Global Health Agency will fund, support global health partnership and nations to Review the current legislation applicable to the import and procurement of health commodities for the public sector and revise as required to facilitate access to required essential items.
264. Kingdom Global Health Agency will fund, support global health partnership and nations to Institutionalize national level (for national programs) & global level Medium Term Procurement Plan (MTPP) for international health sector standards.
265. Kingdom Global Health Agency will fund, support global health partnership and nations to undertake an assessment on the feasibility and options for a pooled system of health financing, procurement, distribution and storage for health sector in the countries.
266. Kingdom Global Health Agency will fund, support global health partnership and nations to carry out feasibility study, establish a devolved system of pooled health procurement, storage and distribution for health facilities in countries prepare & disseminate policy & operational guidelines.
267. Kingdom Global Health Agency will fund, support global health partnership and nations to develop health sectors quantification & procurement training curriculum & implementation guidelines; build county capacity through ToT training.
268. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and operationalise an effective system for supplies management during disasters and emergencies including establishment of a National Strategic Health Storage Reserves.
269. Kingdom Global Health Agency will fund, support global health partnership and nations to Introduce facility-based IT systems to manage and monitor HPT supplies and link with countries and globally.
270. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement a National Logistics Management Information System framework for public sector facilities.
271. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement a National Pharmacy Management Information System.
272. Kingdom Global Health Agency will fund, support global health partnership and nations to prioritize Interventions health departments and units carrying out priority interventions strengthen the existing demand-driven (pull) system in the counties, extend this as appropriate to include national programme supplies and establish a supplies chain audit mechanism.
273. Kingdom Global Health Agency will fund, support global health partnership and nations to promote local health facilities and equipment production, research and innovation and Review current legislation applicable to local production and research, and revise/amend as required to facilitate research and local production of health sector.

274. Kingdom Global Health Agency will fund, support global health partnership and nations to develop comprehensive policy and strategies to facilitate research, innovation and local production of health sector for priority health conditions.
275. Kingdom Global Health Agency will fund, support global health partnership and nations to identify priority health equipment and facility research review update of global standards & requirements; publish & disseminate and make easily accessible through the global website.
276. Kingdom Global Health Agency will fund, support and partner for global and national to develop & disseminate Guidelines on Local Production of health equipment's and facilities along with develop & disseminate Guidelines on Innovation & Research.
277. Kingdom Global Health Agency will fund, support global health partnership and nations to establish and operate systems to monitor and report on the adherence to, and results of the application of legislation and policies developed to promote local production, research and innovation of health sector equipment.
278. Kingdom Global Health Agency will fund, support global health partnership and nations to create and operate effective communication/collabo ration between other government priority Interventions.
279. Kingdom Global Health Agency will fund, support global health partnership and nations to build local capacity in current Good Manufacturing Practice and Health equipment's Research, Innovation and Development.
280. Kingdom Global Health Agency will fund, support global health partnership and nations to Identify and undertake initiatives to exploit Trade-Related Aspects of Intellectual provisions and safeguards in order to secure access to Health equipment and facilities.
281. Kingdom Global Health Agency will fund, support global health partnership and nations to review current health equipment patent, counterfeit and associated legislation & revise as necessary to make provisions to ensure compliance with current recommended by WHO international best practices.
282. Kingdom Global Health Agency will fund, support global health partnership and nations to prepare and ensure easy access to Policy Guidelines on implementation of health equipments provisions in the health sector.
283. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement system for monitoring of the application of health provisions in facilitating access to lower priced versions of expensive patented medicines.
284. Kingdom Global Health Agency will fund, support global health partnership and nations to create and operate a coordination mechanism with relevant ministries and government agencies.
285. Kingdom Global Health Agency will fund, support global health partnership and nations to undertake preparation of training materials and train relevant staff of health ministries involved in health Priority Interventions health departments and units carrying out priority interventions and Introduce locally-derived natural health products.
286. Kingdom Global Health Agency will fund, support global health partnership and nations to formulate regulations to permit registration of eligible health facilitations and Prepare, publish & disseminate Policy Guidelines, Operational Guidelines, norms & Standards.
287. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and establish monitoring system for health facilities control, management & utilization.
288. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity among producers and sellers of health facilities to comply with regulations (on safety, quality and efficacy).
289. Kingdom Global Health Agency will fund, support global health partnership and nations to promote research into useful health facilitate their subsequent development and incorporation into the health system.
290. Kingdom Global Health Agency will fund, support global health partnership and nations to prioritize Interventions health departments and units carrying out priority health interventions and Adopt evidence based health infrastructure investments, maintenance and replacement through utilization of norms and standards in line with governments in countries Institutions policies.
291. Kingdom Global Health Agency will fund, support global health partnership and nations to support Development of norms and standards to guide the planning, development and maintenance of health infrastructure and Complete existing norms and standards on physical infrastructure with norms on number and size of rooms in each service unit (by level), plant and non-medical equipment (laundry and kitchens);

292. Kingdom Global Health Agency will fund, support global health partnership and nations to publish and disseminate develop, publish and disseminate health norms and standards on Health IT and transportation.
293. Kingdom Global Health Agency will fund, support global health partnership and nations to define county-specific health infrastructure gaps in requirements for all norms (e.g. service units, quantity of equipment and transportation).
294. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity to develop costed county-specific health infrastructure plans with recurrent cost calculations.
295. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, institutionalize and implement facility specific maintenance plans and budgets for the ministry and develop capacity at counties level
296. Kingdom Global Health Agency will fund, support global health partnership and nations to priority Interventions departments and units carrying out priority interventions same, county facilities, covering all health infrastructure components, time frame and modalities (including administrative structures).
297. Kingdom Global Health Agency will fund, support global health partnership and nations to advocacy for the employment of medical engineers to maintain health equipment and review the staff establishment for medical engineering (engineers, technologists and technicians and employ staff accordingly.
298. Kingdom Global Health Agency will fund, support global health partnership and nations to facilitate development of infrastructure that progressively moves towards the prevailing norms and standards To equip public hospitals and Identify the facilities to be upgraded, identify health infrastructure needs (gap analysis), cost the required capital expenditure and recurrent cost implications
299. Kingdom Global Health Agency will fund, support global health partnership and nations to progressive transformation to conform with high level infrastructure norms and standards. To equip health facilities in slum areas and Upgrading of existing government to conform to the high level infrastructure norms and standards.
300. Kingdom Global Health Agency will fund, support global health partnership and nations to equip health facilities in slum areas and Upgrading of existing government level facilities to conform to high level infrastructure norms and standards.
301. Kingdom Global Health Agency will fund, support global health partnership and nations to invest in health infrastructure to ensure progressive increased access to health services.
302. Kingdom Global Health Agency will fund, support global health partnership and nations to establish an intergovernmental coordinating function to provide leadership and guidance in national and county health infrastructure policy, regulations, norms and standards setting, investment and systems management
303. Kingdom Global Health Agency will fund, support global health partnership and nations to build appropriate organizational structures, processes and procedures at health facilities to manage health infrastructure (planning, costing, master plans, maintenance, training of users, disposal).
304. Kingdom Global Health Agency will fund, support global health partnership and nations to provide the necessary logistical support for efficiently functioning referral system and Procure ambulances as per the National Ambulance Policy.
305. Kingdom Global Health Agency will fund, support global health partnership and nations to procure the vehicles and other investments required to operationalise the national referral system with Priority Interventions departments and units carrying out priority interventions.
306. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement an ICT master-plan hospitals referral facilities as part of the health Flagship Projects.
307. Kingdom Global Health Agency will fund, support global health partnership and nations to promote and increase private sector investments in the provision of health services through infrastructure development.
308. Kingdom Global Health Agency will fund, support global health partnership and nations to develop guidelines for donations and purchase of vehicles, medical equipment and the disposal of the same.
309. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen the regulatory bodies to enforce health infrastructure standards.

310. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, obtain approval, disseminate, monitor and evaluate a regulatory framework for adequate post-market surveillance of non-medical equipment aiming at ensuring effectiveness, quality and safety of equipment.
311. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement a Health Infrastructure Policy Formulate, obtain approval, disseminate and monitor and evaluate a comprehensive Health Infrastructure Policy and Strategic Plan.
312. Kingdom Global Health Agency will fund, support global health partnership and nations to develop the regulatory framework for registration and licensing of private health facilities, to encompass all types of facilities/consulting rooms and standards related thereto to ensure quality and safety in these facilities.
313. Kingdom Global Health Agency will fund, support global health partnership and nations to prioritize Interventions Departments and units carrying out priority interventions and develop a prioritised national health research agenda.
314. Kingdom Global Health Agency will fund, support global health partnership and nations to set up, monitor the implementation and evaluate the results of the health research agenda on the medium term and establish a process to monitor health research utilization by decision makers.
315. Kingdom Global Health Agency will fund, support global health partnership and nations to establish Country Health Research Observatory and Contribute to the Country Health Research Observatory by ensuring health research information is readily available to the observatory.
316. Kingdom Global Health Agency will fund, support global health partnership and nations to effective dissemination of research findings and Develop a virtual IT based health research data base interlinked with other Health sectors to ensure it is interconnected, web-based and establish and operate a National Research Repository.
317. Kingdom Global Health Agency will fund, support global health partnership and nations to conduct annual Health Research dissemination forums and Publish annual National Health facilities.
318. Kingdom Global Health Agency will fund, support global health partnership and nations to prioritize Interventions in health ministries and Departments and units carrying out priority interventions.
319. Kingdom Global Health Agency will fund, support global health partnership and nations to harness the development partners' and government funds to implement the national health agenda.
320. Kingdom Global Health Agency will fund, support global health partnership and nations to establish a Health Research Fund and Promote research through policy dialogue in order to ensure that research is relevant to the needs of the people.
321. Kingdom Global Health Agency will fund, support global health partnership and nations to establish and operate a Health Research Policy Forum and Strengthen health research capacity in institutions at all levels and develop quality human resource and infrastructure.
322. Kingdom Global Health Agency will fund, support global health partnership and nations to carry out regular audits of Health Research quality and Build capacity in health research at all levels.
323. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure an ethical code of conduct for health research in countries in accordance with the Science, Technology and Innovation
324. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure an ethical approval process is adopted for all research carried out in countries.
325. Kingdom Global Health Agency will fund, support global health partnership and nations to develop an updated Health Research legal framework aligned to the Countries Health Policy and Health platforms
326. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure a fully functional coordination framework for Health Research.
327. Kingdom Global Health Agency will fund, support global health partnership and nations to develop & disseminate operational guidelines on process for effective
328. Kingdom Global Health Agency will fund, support global health partnership and nations to host and network Development Partnership Forums to strengthen mutual accountability between the Government and its development partners to accelerate the development of health issues in countries and globally involving It is a multi-sectoral biannual high-level forum to reflect on on-going cooperation, discuss political and policy developments as they relate to countries economic and social development program to identify joint goals and targets.

329. Kingdom Global Health Agency will fund, support global health partnership and national Coordination Group to provide a high level forums for governments to discuss economic, development and humanitarian issues with a focus on aid effectiveness across ministries. It also helps increase the effectiveness and efficiency of external assistance to countries by exchanging information and experiences on key issues and ensuring that clear guidance is communicated to development partners in a coordinated manner and aligned with shared objectives.
330. Kingdom Global Health Agency will fund, support global health partnership and nations to host and network donor to provide forum for donors to discuss economic and development issues and to increase the effectiveness and efficiency of external assistance to countries on health sectors and other related by exchanging information and experiences on key issues, ensuring that support is provided in a predictable and coordinated manner and aligned with shared objectives.
331. Kingdom Global Health Agency will fund, support global health partnership and nations to aid effectiveness bringing gorvernments and donors together on basis with an aim to increase the effectiveness and efficiency of development assistance in countries globally in collaboration with global agencies by reducing transactions costs to the government, streamlining systems for delivering aid, standardizing procedures, eliminating duplication, managing for development results and upholding mutual accountability.
332. Kingdom Global Health Agency will fund, support and partner for global and national Aid Effectiveness Secretariat (AES) whose purpose is to promote aid and develop effectiveness through improvement in harmonization, alignment and coordination through the provision of support to facilitate and account for donor funding along with intergovernmental sectoral working groups and committees to enable harmonization of inputs and better coordination of investments in the sector partnership for more effective use of all available resources.
333. Kingdom Global Health Agency will fund, support global health partnership and national communication ensuring that all stakeholders are fully informed and understand their roles and responsibilities in the implementation of the health programs.
334. Kingdom Global Health Agency will fund, support global health partnership and nations to enhance consultation with agencies in achieving set outcomes and ensuring that all stakeholders understand on-going health reform process.
335. Kingdom Global Health Agency will fund, support global health partnership and national establishment of medical risk preventing the deprivation of care because of a patient's inability to pay, avoiding wasteful spending and allowing care to reflect the different tastes of individual patients.
336. Kingdom Global Health Agency will fund, support global health partnership and national disaster preparedness strategy. report on disaster response, political risks Insecurity for health workers in some regions, Strengthen inter-sectoral collaboration. Report and minutes of the collaboration.
337. Kingdom Global Health Agency will fund, support global health partnership and nations to mitigate organizational risks increased trade unionism among health personnel to strengthen engagement with unions, counties and national government.
338. Kingdom Global Health Agency will fund, support global health partnership and national cohesion on management including staff operational risks, staff underutilized, reorganization, staff rationalization ,technological Risks Rapid changes in technology, Task shifting and capacity building.
339. Kingdom Global Health Agency will fund, support global health partnership and nations to develop an anti-corruption policy/mechanism.
340. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement an incentive policy for attraction and retention of health workers including for hard to reach areas, including on establishing resource centres and recreation facilities.
341. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement a reward system as a Health Workforce motivation strategy for attracting and retention of Health Workforce.
342. Kingdom Global Health Agency will fund, support global health partnership and nations for institutional capacity and Health Workforce performance to develop, review and harmonise schemes of service for all staff cadres including new and emerging cadres.
343. Kingdom Global Health Agency will fund, support global health partnership and nations to capacity at local gorvernment level to regularly monitor, and institute corrective measures for improving health Workforce productivity.
344. Kingdom Global Health Agency will fund, support and partner for global and national to strengthen the Performance Appraisal System at all levels and training capacity building and development of Health Workforce.

345. Kingdom Global Health Agency will fund, support global health partnership and nations to update the pre-service curricula to align these to the Health Workforce needs.
346. Kingdom Global Health Agency will fund, support global health partnership and nations to develop health systems and services leadership and management capacity at all levels of departments and units carrying out priority interventions.
347. Kingdom Global Health Agency will fund, support global health partnership and nations to coordinate the in-service training programs of the health ministry and staff across the board.
348. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement a Training Policy.
349. Kingdom Global Health Agency will fund, support global health partnership and nations to develop a Continuous Professional Development Framework.
350. Kingdom Global Health Agency will fund, support global health partnership and nations to advocate for greater allocation by both national and county governments to attain universal health coverage.
351. Kingdom Global Health Agency will fund, support global health partnership and nations to advocate for increased financing for health and health related sectors to meet agreed national and international benchmarks and to ensure that required interventions are implemented.
352. Kingdom Global Health Agency will fund, support global health partnership and nations to devise and develop annual health programs based on public and on-budget donor resources at National and local governments.
353. Kingdom Global Health Agency will fund, support global health partnership and nations to establish social health protection mechanism to progressively facilitate attainment of Health insurance for all.
354. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and strengthen Innovative Health sectors for communities by periodically reviewing the criteria for resource allocation and purchasing mechanisms to improve efficiency and utilization of resources.
355. Kingdom Global Health Agency will fund, support global health partnership and nations to establish sustainable framework for disbursing conditional grants to local governments and other subnational entities.
356. Kingdom Global Health Agency will fund, support global health partnership and nations to scale up results based financing initiatives for health care and Increase funding to cover more healthcare at local level.
357. Kingdom Global Health Agency will fund, support global health partnership and nations to progressively work towards the elimination of payment at the point of use of health services, especially by marginalized and indigent populations through social health insurance and government subsidies.
358. Kingdom Global Health Agency will fund, support global health partnership and nations to develop framework, and support implementation of health financial risk pooling mechanisms.
359. Kingdom Global Health Agency will fund, support global health partnership and nations to put in place comprehensive mechanisms for financing of emergency health services.
360. Kingdom Global Health Agency will fund, support global health partnership and nations to have contingence funds for emergency and Promote private sector participation in financing of health through PPP and other mechanisms.
361. Kingdom Global Health Agency will fund, support global health partnership and nations to pool global resources to increase efficiency in utilization of health resources.
362. Kingdom Global Health Agency will fund, support global health partnership and nations to institutionalize preparation of annual National Health Accounts to develop framework, and support implementation of health financial risk pooling mechanisms.
363. Kingdom Global Health Agency will fund, support global health partnership and nations to introduce and fund Health Insurance Subsidy Program for the Poor.
364. Kingdom Global Health Agency will fund, support global health partnership and nations to Implement free maternity services policy, including increasing coverage and benefit package.
365. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement framework for pooling of resources for primary care services.

366. Kingdom Global Health Agency will fund, support global health partnership and nations to prioritizw Interventions through departments and Units carrying out priority interventions Sector Services Fund, free primary care, local gorvernments allocations for primary care etc.)
367. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement health care financing policy considering paid services, national and local government funding.
368. Kingdom Global Health Agency will fund, support global health partnership and nations to finalise and ensure the implementation of the local gorvernments Health Care Financing Policy and Strategy and implementation road map.
369. Kingdom Global Health Agency will fund, support global health partnership and nations to enhance fiduciary and social accountability systems.
370. Kingdom Global Health Agency will fund, support global health partnership and nations to departments and units carrying out priority interventions Admin to Collaborate, harmonise and integrate data collection, storage, analysis and dissemination mechanisms of state and non-state actors to ensure availability of adequate and complete information for decision-making.
371. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure fully functional coordination framework.
372. Kingdom Global Health Agency will fund, support global health partnership and nations to develop/ update legal framework aligned to the Health Policy and Health Act.
373. Kingdom Global Health Agency will fund, support global health partnership and nations to develop/review the health Policy and Strategic Plan.
374. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure national application generating complete timely and accurate information as per legislation.
375. Kingdom Global Health Agency will fund, support global health partnership and nations to establish virtual system interlinking different databases of health sector to ensure all information is inter-connected, web based where possible. E-Health.
376. Kingdom Global Health Agency will fund, support global health partnership and nations to assure data storage capacity for national and local government (physical or virtual storage capacity).
377. Kingdom Global Health Agency will fund, support global health partnership and nations to introduce and advance e-Health to Establish Country Health Observatory for assuring comprehensive analysis of Health Information linked with other research institutions.
378. Kingdom Global Health Agency will fund, support global health partnership and nations to establish Policy Analysis team, to monitor use of evidence in policy making.
379. Kingdom Global Health Agency will fund, support global health partnership and nations to establish process to monitor data utilisation by decision makers by puting in place the Health Information System required for disaster management.
380. Kingdom Global Health Agency will fund, support global health partnership and nations to carry out systematic reviews on priority health topics that have been identified by policy makers.
381. Kingdom Global Health Agency will fund, support global health partnership and nations to enhance continued strengthening of accuracy, timeliness, completeness of health information from population and health facilities.
382. Kingdom Global Health Agency will fund, support global health partnership and nations to update and harmonise all reporting tools from health facilities and priority Interventions for departments and units carrying out priority interventions private).
383. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure national applications generating complete timely and accurate information on electronic reporting)
384. Kingdom Global Health Agency will fund, support global health partnership and nations to establish IT based system for collecting information on Vital Events e-Health
385. Kingdom Global Health Agency will fund, support global health partnership and nations to carry out regular Data Quality Audits for HIS information.
386. Kingdom Global Health Agency will fund, support global health partnership and nations to carry out regular data verification assessments.

387. Kingdom Global Health Agency will fund, support global health partnership and nations to conduct studies required to provide accurate and timely information from the population and health facilities.
388. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen mechanisms for health information dissemination to ensure information is available where and when needed.
389. Kingdom Global Health Agency will fund, support global health partnership and nations to conduct annual Health Information Dissemination forums at national level.
390. Kingdom Global Health Agency will fund, support global health partnership and nations to publish Annual National and global Health Statistical Abstracts in partnership with WHO along with annual publication on 'the state of Health in nations and the world', based on analysis of Health Information by Health Observatory.
391. Kingdom Global Health Agency will fund, support global health partnership and nations to develop quarterly publications on national Health Outcome Trends and other regular programmatic publication.
392. Kingdom Global Health Agency will fund, support global health partnership and nations to put in place the health information systems required for health surveillance and response mechanisms.
393. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement the health information system required to collect, collate, analyse and utilise data relevant to risk mapping for diseases.
394. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen capacity for health sector reporting.
395. Kingdom Global Health Agency will fund, support global health partnership and nations to progressive utilisation of information and communication technologies to aid strategy.
396. Kingdom Global Health Agency will fund, support global health partnership and nations to review and update the Health Sector to establish coordinated system for health emergency response management in facilities.
397. Kingdom Global Health Agency will fund, support global health partnership and nations to data storage and transmission capacity for national and local government physical or virtual storage capacity).
398. Kingdom Global Health Agency will fund, support global health partnership and nations to facilitate access to information to the public while protecting privacy and confidentiality and Establish coordinated system for health sector management in facilities. ICT e-Health.
399. Kingdom Global Health Agency will fund, support global health partnership and nations to define and apply an evidence-based essential packages of health sector.
400. Kingdom Global Health Agency will fund, support global health partnership and nations to devise national and county policies, strategies and interventions to address the issue of inappropriate use of antimicrobials and development of antimicrobial resistance.
401. Kingdom Global Health Agency will fund, support global health partnership and nations to establish a Pharmaceutical Care System in all facilities, starting with hospitals.
402. Kingdom Global Health Agency will fund, support global health partnership and nations to restructure and operationalize the National Medicines and Therapeutics Committee into a statutory committee covering all sectors.
403. Kingdom Global Health Agency will fund, support global health partnership and nations to prepare operational guidelines for establishing hospital & county Medicines and Therapeutic Committees with responsibilities covering all sectors.
404. Kingdom Global Health Agency will fund, support global health partnership and nations to review and update Clinical Guidelines, Essential Medicines List and develop National Formulary.
405. Kingdom Global Health Agency will fund, support global health partnership and nations to develop national essential lists and specifications for other health sectors (e.g. medical devices, vaccines, radiological, dental, laboratory supplies, blood products).
406. Kingdom Global Health Agency will fund, support global health partnership and nations to Institute systematic county and national monitoring of health sector utilization.

407. Kingdom Global Health Agency will fund, support global health partnership and nations to priority Interventions departments and units carrying out priority interventions.
408. Kingdom Global Health Agency will fund, support global health partnership and nations to participate in the work of the intergovernmental structure responsible for providing leadership and guidance in national and local health sector policy, investment and systems management.
409. Kingdom Global Health Agency will fund, support global health partnership and nations to Build countries health professionals capacity in Good Prescribing Practices (GPP) and Good Dispensing Practices (GDP) making use of pre- & post-service training, guidelines and targeted supportive supervision.
410. Kingdom Global Health Agency will fund, support global health partnership and nations to for Systematic training of users of medical equipment devices at time of commissioning/ installation and thereafter as required to undertake availability, management & utilisation assessment.
411. Kingdom Global Health Agency will fund, support global health partnership and nations to Implement funds for all health sector
412. Kingdom Global Health Agency will fund, support global health partnership and nations to establish a national appraisal mechanism for health sector, clinical practice and interventional procedures (ie. Health Technology Assessment & other health sectors).
413. Kingdom Global Health Agency will fund, support global health partnership and nations to formulate appropriate health sector legislation within Health Act (including Food Safety).
414. Kingdom Global Health Agency will fund, support global health partnership and nations to develop Policy Guidelines on the National health sector Institutions.

415. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and publish a system for monitoring the performance of the National Health sector Institutions.
416. Kingdom Global Health Agency will fund, support global health partnership and nations to conduct a feasibility study and prepare a roadmap on the establishment of the National Health Sector Institution.
417. Kingdom Global Health Agency will fund, support global health partnership and nations based on comprehensive health feasibility prioritize Interventions through departments and units carrying out priority interventions.
418. Kingdom Global Health Agency will fund, support global health partnership and nations to study and before actual establishment of the Institution, build technical capacity of health staff/independent advisors to manage & undertake appraisals.
419. Kingdom Global Health Agency will fund, support global health partnership and nations to define and publish specifications/N&S to provide for the capital required for the establishment of, and subsequent recurrent expenditure of the National Health sector.
420. Kingdom Global Health Agency will fund, support global health partnership and nations to put in place a harmonised regulatory framework for Health sector.
421. Kingdom Global Health Agency will fund, support global health partnership and nations to formulate a new law to cover all health sectors from pre-market controls to post-market surveillance.
422. Kingdom Global Health Agency will fund, support global health partnership and nations to review, amend and develop as required suitable regulations covering each type of health sector and for food safety to provide for the required degree of control and protection of the public.
423. Kingdom Global Health Agency will fund, support global health partnership and nations to Harmonise health sector regulations with other Countries for joint health response.
424. Kingdom Global Health Agency will fund, support global health partnership and nations to maintain & strengthen national & county level pharmacovigilance and post market surveillance.
425. Kingdom Global Health Agency will fund, support global health partnership and nations to establish county mandate, roles & responsibilities in health sector regulation.
426. Kingdom Global Health Agency will fund, support global health partnership and nations to formulate, obtain approval, disseminate, and monitor and evaluate both short and long term in comprehensive health Policy with Strategic Plan.

427. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, disseminate and implement policy guidelines on the health sector priority Interventions departments and units.
428. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and operate a comprehensive data collection and reporting system that will allow the regulator to perform duties as per health sectors.
429. Kingdom Global Health Agency will fund, support global health partnership and nations to build required capacity at national, local and facility level, as appropriate, for implementing current and future health sector regulations.
430. Kingdom Global Health Agency will fund, support global health partnership and nations to design a comprehensive national human & veterinary health sector regulatory authority (e.g. Food & Drugs Authority) in line with regional & international best practices.
431. Kingdom Global Health Agency will fund, support global health partnership and nations to establish and operate the health sector regulatory authority in line with the global and national health Acts.
432. Kingdom Global Health Agency will fund, support global health partnership and nations to expand the scope of national operations in line with the health sectors Act to provide for testing.
433. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and maintain health sector website which provides easily accessible information for health professionals, patients, consumers and the health industry on all relevant aspects of regulatory control of health sector including policy Guidelines.
434. Kingdom Global Health Agency will fund, support global health partnership and nations towards rational investment and efficient management of health sector, including national Government to ensure National Strategic Reserve for key public health commodities.
435. Kingdom Global Health Agency will fund, support global health partnership and nations to Promote generic medicines use throughout the whole health system through legal and administrative interventions.
436. Kingdom Global Health Agency will fund, support and partner for global and national to facilitate implementation, monitoring, priority Interventions health sector departments and units carrying out priority interventions.
437. Kingdom Global Health Agency will fund, support global health partnership and nations to review & update of National Pharmaceutical Policy into a comprehensive health sector Policy for efficiency, excellence and maintain high standards.
438. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure mobilization and allocation of sufficient national and county resources for the provision of adequate supplies of health sector.
439. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and disseminate health sector policy guidelines including how to allocate sufficient resources at national and county level for all stakeholders.
440. Kingdom Global Health Agency will fund, support global health partnership and nations to incorporate investment in health sectors in Health Financing Strategy, produce, publish and disseminate the Strategy.
441. Kingdom Global Health Agency will fund, support global health partnership and nations to Institute a preventive and corrective medical equipment maintenance and repair system.
442. Kingdom Global Health Agency will fund, support global health partnership and nations to establish county systems for coordinating and managing health sector investments.
443. Kingdom Global Health Agency will fund, support and partner for global and national to develop & disseminate quantification & procurement training curriculum & implementation guideline; undertake county capacity building.
444. Kingdom Global Health Agency will fund, support global health partnership and nations to develop & disseminate health sector Supply Management (Inventory) Guidelines; undertake countries capacity building.
445. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and disseminate health sector Supportive Supervision Guidelines to undertake countries capacity building.

446. Kingdom Global Health Agency will fund, support global health partnership and nations to establish system for priority Interventions for health departments and units carrying out priority interventions.
447. Kingdom Global Health Agency will fund, support global health partnership and nations for collection, monitoring and wide dissemination of prices for a basket of key health sectors programmes and develop a constantly updated price data-base; establish, regularly update, publish health sector indicator price guide.
448. Kingdom Global Health Agency will fund, support global health partnership and nations to enhance and integrate the Monitoring and evaluation systems for national and local level health systems management comprehensively to capture key elements of access.
449. Kingdom Global Health Agency will fund, support global health partnership and nations to sssist the countries to attain the required capacity to undertake effective health sector management and ensure appropriate use.
450. Kingdom Global Health Agency will fund, support global health partnership and nations to undertake relevant operational research (OR) into health sector Investments, Management and Use.
451. Kingdom Global Health Agency will fund, support global health partnership and nations to participate in the work of the intergovernmental structure responsible for providing leadership and guidance in national and county health sector policy, investment and systems management.
452. Kingdom Global Health Agency will fund, support global health partnership and nations to establish effective and reliable health sector procurement and supply management.
453. Kingdom Global Health Agency will fund, support global health partnership and nations to review the current legislation applicable to the import and procurement of health commodities for the public sector and revise as required to facilitate access to required essential items.
454. Kingdom Global Health Agency will fund, support global health partnership and nations to Institutionalize national level (for national programmes) & local level Medium Term Procurement Plan for priority Interventions of health departments and units carrying out priority interventions.
455. Kingdom Global Health Agency will fund, support and partner for global and national to undertake an assessment on the feasibility and options for a pooled system of health sectors financing, procurement, distribution and storage for gorvernments in the countries.
456. Kingdom Global Health Agency will fund, support global health partnership and nations to establish a devolved system of pooled health sector procurement, storage and distribution for gorvernment facilities in countries; prepare & disseminate policy & operational guidelines through strong research.
457. Kingdom Global Health Agency will fund, support global health partnership and nations to develop health sector quantification & procurement training curriculum & implementation guidelines; build countries health capacity through ToT training.
458. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and operationalize an effective system for health sector supplies management during disasters and emergencies including establishment of a National Strategic health sector Reserve (NSHR).
459. Kingdom Global Health Agency will fund, support global health partnership and nations to introduce facility-based IT systems to manage and monitor HPT supplies and link with local and national e-health.
460. Kingdom Global Health Agency will fund, support global health partnership and nations to enhance Logistics Management Information System framework for public sector facilities.
461. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement a National Pharmacy Management Information System (PMIS).
462. Kingdom Global Health Agency will fund, support global health partnership and nations to Institutionalize priority Interventions through departments and units carrying out priority interventions to strengthen the existing emergency responses in disasters demand-driven (pull) system in the countries, extend this as appropriate to include national programme supplies and establish a supplies chain audit mechanism.
463. Kingdom Global Health Agency will fund, support global health partnership and nations to promote local production, research and innovation of medical equipments and machineries.
464. Kingdom Global Health Agency will fund, support global health partnership and nations to review current legislation applicable to local production and research, and revise/amend as required to facilitate research and local production.

465. Kingdom Global Health Agency will fund, support global health partnership and nations to develop comprehensive policy and strategies to facilitate research, innovation and local production of health equipment, machinery and facilities for priority health conditions.
466. Kingdom Global Health Agency will fund, support global health partnership and nations to review and update of health equipment and facilities to standards & requirements; publish & disseminate and make easily accessible through the website.
467. Kingdom Global Health Agency will fund, support global health partnership and nations to develop & disseminate guidelines on local Production establish and operate systems to monitor and report on the adherence to, and results of the application of legislation and policies developed to promote local production, research and innovation of health equipment and machinery.
468. Kingdom Global Health Agency will fund, support global health partnership and nations to create and operate effective communication/collabo ration between departments and units carrying out priority interventions stakeholders and relevant industries.
469. Kingdom Global Health Agency will fund, support global health partnership and nations to research, Innovation and Development of health products services along with mobilization of resources for priority research.
470. Kingdom Global Health Agency will fund, support global health partnership and nations to Identify and undertake initiatives to exploit Trade-Related Aspects of Intellectual Property Rights provisions and safeguards for health products and equipment's, facilities products in order to secure patents, counterfeit and associated legislation & revise as necessary to make provisions to ensure compliance with current recommended (eg. WHO) international best practices.
471. Kingdom Global Health Agency will fund, support global health partnership and nations to repair and ensure easy access to Policy Guidelines on implementation of health sectors provisions to develop & disseminate operational guidelines on process for effective application of provisions (to accompany Policy Guidelines in single document).
472. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement system for monitoring of the application of provisions in facilitating access to lower priced versions of expensive patented medicines.
473. Kingdom Global Health Agency will fund, support global health partnership and nations to create and operate a coordination mechanism with relevant ministries and government agencies along with undertaking preparation of training materials and train relevant staff of ministries involved in priority Interventions in departments and units carrying out priority interventions.
474. Kingdom Global Health Agency will fund, support global health partnership and nations to introduce locally-derived natural health products along with formulating regulations to permit registration of eligible machinery and facilities.
475. Kingdom Global Health Agency will fund, support and partner for global and national Prepare, publish & disseminate prelated Policy Guidelines, Operational Guidelines, Norms & Standards along with developing and establish monitoring system for control, management & utilization.
476. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity among producers and sellers of health products to comply with regulations (on safety, quality and efficacy) along with promotion research into usefulness to facilitate their subsequent development and incorporation into the health system.
477. Kingdom Global Health Agency will fund, support global health partnership and nations to adopt evidence based health infrastructure investments, maintenance and replacement through utilization of norms and standards in line with government Institutions policies.
478. Kingdom Global Health Agency will fund, support global health partnership and nations to develop norms and standards to guide the planning, development and maintenance of health infrastructure.
479. Kingdom Global Health Agency will fund, support global health partnership and nations to complete existing norms and standards on physical infrastructure with norms on number and size of rooms in each service unit (by level), plant and non-medical equipment (laundry and kitchens); publish and disseminate.
480. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, publish and disseminate norms and standards on IT and transportation.
481. Kingdom Global Health Agency will fund, support global health partnership and nations to define county-specific health infrastructure gaps in requirements for all norms (e.g. service units, quantity of equipment and transportation).

482. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity to develop costed county-specific health infrastructure plans with recurrent cost calculations.
483. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, institutionalize and implement facility specific maintenance plans and budgets for governments to develop capacity at counties for the IT for prioritize Interventions of departments and units carrying out priority interventions same, county facilities, covering all health infrastructure components, time frame and modalities (including administrative structures).
484. Kingdom Global Health Agency will fund, support global health partnership and nations to facilitate development of infrastructure that progressively moves towards the prevailing norms and standards.
485. Kingdom Global Health Agency will fund, support global health partnership and nations to Identify the facilities to be upgraded, identify health infrastructure needs (gap analysis), cost the required capital expenditure and recurrent cost implications.
486. Kingdom Global Health Agency will fund, support global health partnership and nations to progressive transformation of facilities, conform with norms and standards of level 1 to level 6 along with to equip health facilities in slum areas.
487. Kingdom Global Health Agency will fund, support global health partnership and nations to provide the necessary logistical support for efficiently functioning referral system and procure ambulances as per the National Ambulance Policy.
488. Kingdom Global Health Agency will fund, support global health partnership and nations to rocure the vehicles and other investments required to operationalise the national referral system, emergencies and national health systems.
489. Kingdom Global Health Agency will fund, support global health partnership and nations to develop a prioritized national health research agenda along with Setting up monitoring the implementation and evaluate the results of the health research agenda on the medium term.
490. Kingdom Global Health Agency will fund, support global health partnership and nations to establish a process to monitor health research utilization by decision makers and establish Countriea Health Research Observatory.
491. Kingdom Global Health Agency will fund, support global health partnership and nations to contribute to the Country Health Research Observatory by ensuring health research information is readily available to the observatory.
492. Kingdom Global Health Agency will fund, support global health partnership and nations to effective dissemination of research findings and develop a virtual IT based health research data base interlinked with other HIS to ensure it is interconnected, web-based and establish and operate a National Research Repository.
493. Kingdom Global Health Agency will fund, support global health partnership and nations to conduct annual Health Research dissemination forums and Publish annual National Health Research Abstracts to Harness the development partners' and government funds to implement the national health agenda.
494. Kingdom Global Health Agency will fund, support global health partnership and nations to establish Health Research Funds in countries.
495. Kingdom Global Health Agency will fund, support global health partnership and nations to Promote research through policy dialogue in order to ensure that research is relevant to the needs of the people and establish operate a Health Research Policy Forum to strengthen health research capacity in institutions at all levels and develop quality human resource and infrastructure.
496. Kingdom Global Health Agency will fund, support global health partnership and nations to carry out regular audits of Health Research quality.
497. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity in health research at all levels.
498. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure an ethical code of conduct for health research in accordance with the Science, Technology and Innovation ensuring an ethical approval process is adopted for all research carried out developing an updated Health Research legal framework aligned to the countries / global Health Policy and Health Act.
499. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure a fully functional coordination framework for Health Research and conduct/commission research.
500. Kingdom Global Health Agency will fund, support global health partnership and nations to continue to strengthen its capacities and those of the counties and other stakeholders so as to address challenges and constraints in order to achieve the goals set out in the strategic plan.

501. Kingdom Global Health Agency will fund, support global health partnership and nations to mobilize resources for the implementation of the Strategic Plan through the Medium Term Expenditure Framework (M.T.E.F) and partnerships with development partners as well as the promotion of the Public Private Partnership (PPP) approaches.
502. Kingdom Global Health Agency will fund, support global health partnership and nations to provide oversight over semi-autonomous government agencies and regulatory bodies for the regulation of various cadres of health workers in the health sector.
503. Kingdom Global Health Agency will fund, support global health partnership and nations to fund organizational structures to enable the ministry meet its expanded mandate there is need to develop an appropriate structure that could maximise the efficiency and success, facilitate working relationships between various sections of the ministry and retain order and command while promoting flexibility and creativity.
504. Kingdom Global Health Agency will fund, support global health partnership and nations to create a management framework within which the activities of the ministry can be planned, organized, coordinated and controlled.
505. Kingdom Global Health Agency will fund, support global health partnership and nations to establish a basis for allocation of duties and responsibilities in recommending an appropriate structure for the ministry, therefore, the following principal tenets of a good organization structure have been taken into account chain of command, Lines of communication, Span of control and delegation.
506. Kingdom Global Health Agency will fund, support global health partnership and nations to support improved coordination and communication; provides clarity of roles, responsibilities and accountabilities by symmetrical or asymmetrical.
507. Kingdom Global Health Agency will fund, support global health partnership and nations to support the Human Resource Capacities and Skills Outcome Area Capabilities by Function Policy Planning and health financing Policy Competencies Develops overall framework.
508. Kingdom Global Health Agency will fund, support global health partnership and nations towards Health policy specialist with knowledge of countries and global health system, ability to translate evidence into policy.
509. Kingdom Global Health Agency will fund, support global health partnership and nations to capacity building specialty to facilitate departmental capacity building on policy development; health policy communication skills; ability to develop policy briefs for a wide range of audiences; monitoring and evaluation skills to help monitor policy implementation.
510. Kingdom Global Health Agency will fund, support global health partnership and nations to develop information management expertise stakeholder engagement skills health systems expertise Knowledge of health issues in other sectors.
511. Kingdom Global Health Agency will fund, support global health partnership and nations to communicate with various health professionals in user departments inject Knowledge Good writing skills, including writing sessional papers, cabinet memos, technical writing along with accurate knowledge of (public) health terminology knowledge on health developments nationally and internationally, knowledge and understanding of the health sector in the context of devolution. Some legal expertise.
512. Kingdom Global Health Agency will fund, support global health partnership and nations towards public policy development and analysis, with emphasis on health policies knowledge of the legal frameworks in the health sector, including the role of the various regulatory bodies.
513. Kingdom Global Health Agency will fund, support global health partnership and nations knowledge of court procedures, experience in preparing health sector bills and ability to work with professionals in other sectors Coordinates development of national health policy with resource for other user departments for development thematic policies.
514. Kingdom Global Health Agency will fund, support global health partnership and nations to develop strategy for communicating national and thematic policies develop framework for policy monitoring, establishes and manage health sector policy repository.
515. Kingdom Global Health Agency will fund, support global health partnership and nations develop Multi-sector policy liaison Strategic Plans Competencies Develops overall framework for strategic & operational planning.
516. Kingdom Global Health Agency will fund, support global health partnership and nations to develop Health sector strategic planning and Health systems specialty to connect various inputs of the health system building blocks.

517. Kingdom Global Health Agency will fund, support global health partnership and nations to promote Health economics specialty and experience, to facilitate health financing and budgeting strategies.
518. Kingdom Global Health Agency will fund, support global health partnership and nations for Monitoring and evaluation skills to help develop strategic plan M&E framework.
519. Kingdom Global Health Agency will fund, support global health partnership and nations for staff empowerment in technical writing skills to assemble the strategic plan, health background; health information expertise; stakeholder engagement management skills.
520. Kingdom Global Health Agency will fund, support global health partnership and nations knowledge in background in health expertise in health service delivery system in countries Knowledge and skills in strategic planning, with emphasis on the health sector, preferably with experience.
521. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity in Knowledge of the national and countries budget and planning cycle. Knowledge of situation analysis, costing methodologies, M&E frameworks, including information systems (health, financial, commodities etc.).
522. Kingdom Global Health Agency will fund, support global health partnership and nations staff to capacity to communicate with various health professionals in user departments. Knowledge of stakeholder analysis and consultation processes, Good writing & communication skills, including writing sessional papers, cabinet memos.
523. Kingdom Global Health Agency will fund, support global health partnership and nations to Coordinate sector Health Sector project process. Coordinates development of KHSSP, KEPH. Resource for other user departments for development of thematic strategies by developing strategies for communicating national and thematic strategies.
524. Kingdom Global Health Agency will fund, support global health partnership and nations to develops framework for monitoring strategic plans.
525. Kingdom Global Health Agency will fund, support global health partnership and nations to established and manage health sector strategy repository, Multi-sector policy liaison, Health Financing Competencies Develop and implement Knowledge of the countries health sector and financing mechanisms.
526. Kingdom Global Health Agency will fund, support global health partnership and nations to empower outcome Area Capabilities by Function financing strategies and innovations, health economics specialty, financial quantitative and analytical skills, including modelling, costing, specialty in conditional granting, performance based financing. Knowledge, skills and experience in health financing and new initiatives in the countries and internationally.
527. Kingdom Global Health Agency will fund, support global health partnership and nations towards understanding of development, welfare /micro-economics along with personal experience in preparing in health expenditure reports and audits.
528. Kingdom Global Health Agency will fund, support global health partnership and nations towards good understanding of health sector and Knowledge of preparing conditional grant frameworks, including service agreements, Health MoUs Working experience in the health sector in Knowledge, skills, experience in health service delivery systems and health management practices.
529. Kingdom Global Health Agency will fund, support global health partnership and nations capacity in training background in pharmacy, medicine, nursing, laboratory along with Tracking and reporting on health expenditure.
530. Kingdom Global Health Agency will fund, support global health partnership and nations developing conditional grant frameworks, Health Research and Development Competencies Ability to set research priorities, familiar with research methodologies, including data analysis packages; familiar with research application process; competencies in preparing for researchers, manage contracts of consultants, knowledge of research policy development; Presentation skills, Competencies in managing a multi-media resource centre.
531. Kingdom Global Health Agency will fund, support global health partnership and nations to familiarize with quality assurance methods and quality improvements approaches, including performance improvement Standards, quality assurance and regulations Quality assurance Competencies Service delivery norms and standards.
532. Kingdom Global Health Agency will fund, support global health partnership and nations to develop Medical specialty skills (child and paediatric health, reproductive health, obstetrics and gynecological skills, surgical skills, internal medicine skills).

533. Kingdom Global Health Agency will fund, support global health partnership and nations to develop health systems specialty coordination skills across specialties to facilitate consensus on norms and standards and communication skills to disseminate norms and standards.
534. Kingdom Global Health Agency will fund, support global health partnership and nations to develop Health systems inputs norms and standards through regulation Competencies Licensing, gazettment and registration along with Medico-legal skills, legal drafting skills to facilitate writing of Acts and build capacity of counties (on request) to develop county health legislation; understanding of how different health legislation relate to one another; ability to harmonise various types of health legislation, Public health specialists: epidemiologists, health promotion, biostatisticians, environmental health.
535. Kingdom Global Health Agency will fund, support global health partnership and nations towards competencies in forecasting, quantifying and monitoring commodities (including laboratory supplies) related to these conditions on Legal and regulatory frameworks.
536. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity and empower regulatory bodies for Preventive and promotive health Health Promotion, Disease Prevention and Control Competencies Disease prevention and control programs.
537. Kingdom Global Health Agency will fund, support global health partnership and nations towards public health skills (epidemiological skills, biostatistics) to facilitate quarantine administration, primary health knowledge and experience, health advocacy skills, health communication skills, laboratory technical and management skills, understanding of international and cross border health regulations, certification and inspection skills in aircraft, ship, train, road vehicles, environmental health and sanitation skills to facilitate control of noise dust, smoke, and odour; food inspection skills to facilitate inspection of food imports and exports; ability to respond to health emergencies within port area; skills in building planning for ports.
538. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity in Knowledge of international travel regulations and infectious disease control and Knowledge of cost effectiveness assessments of various disease control intervention.
539. Kingdom Global Health Agency will fund, support global health partnership and nations to develop supply chain management system specialists. Medical laboratory specialists (microbiologists, virologists, histologists, chemists, toxicologists, forensic medicine, etc.) Health promotion specialists, social marketing skills, communication and advocacy skills, social mobilization skills along with skills in communication strategies design.
540. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity in Knowledge on both communicable and non-communicable disease control, disease surveillance and outbreak response, Quarantine management especially with Covid 19, Port Health National Lab Services.
541. Kingdom Global Health Agency will fund, support global health partnership and nations on Health Promotion Curative and Rehabilitation Health Services Clinical services Competencies Skill in policy, guidelines, norms and standards developed and implementation, monitoring and evaluation Managerial skills – Financial , Communication, HR, Team building post merging of the ministries to realign the different 'cultures' Succession management skills, in specialized areas.
542. Kingdom Global Health Agency will fund, support global health partnership and boast nations outcome in area of capabilities by function anesthesia, mental health & psychiatry Skills to take care of people with special needs eg the deaf, blind, Skill in policy, guidelines, norms and standards developed and implementation, monitoring and evaluation.
543. Kingdom Global Health Agency will fund, support global health partnership and nations to boast Managerial skills – Financial , Communication, HR, Administrative services Health sector coordination & intergovernmental affairs Support Competencies HR Management Fleet management skills to facilitate effective and efficient management of transport, civil engineering skills to facilitate building inspections and improvements planning;
544. Kingdom Global Health Agency will fund, support global health partnership and nations towards recruitment and training of specialist skills to ensure recruitment of high calibre staff, labour law specialist to translate existing legal framework on labour, information management specialty to facilitate effective HRIS, Performance management specialty to facilitate performance management monitoring and development of performance improvement plans ;
545. Kingdom Global Health Agency will fund, support global health partnership and nations towards understanding of ICT hardware knowledge and skills to ensure adequate user support for hardware and advice on procurement; ICT software knowledge and skills to ensure adequate user support for software;

546. Kingdom Global Health Agency will fund, support global health partnership and nations toward professional procurement (analysts, managers) specialty to facilitate transparent and efficient mechanisms for procurement; Office management skills; Book keeping skills to ensure accurate postings, Financial management skills to facilitate analysis of financial information Negotiation and consultation skills, organizational skills, public administration skills, conflict resolutions skills. In-depth understanding of the Constitution and related laws, in-depth understanding of the health sector.
547. Kingdom Global Health Agency will fund, support global health partnership and nations toward acquisition of Knowledge of knowledge in the health sector of the mutual expectations at National and global level including Negotiation, consultation, communication, conflict resolution, counselling skills. General Administration Accounting and Finance Procurement Internal audit ICT Facilities and Transport Sector Coordination Competencies Liaison, linkage, and coordination with local Governments.
548. Kingdom Global Health Agency will fund, support global health partnership and nations to change management skills to oversee transition related to re-organisation of countries ministry and transition to devolved governments; capacity building skills (basement, training, follow-up) for both national and local, knowledge management; research management and leadership skills to facilitate effective communication of national health research agenda; negotiation and engagement skills to facilitate effective engagement with other countries and gorvernments.
549. Kingdom Global Health Agency will fund, support global health partnership and nations towards resources Mobilization and Requirements The health financing objectives of the ministry will be geared towards a sure resource adequacy for the implementation of the Strategic Plan. The resources mobilization strategy will consist of mobilizing funding from the donor community, National Government, Development Partners, private sector (mainly from the out of pocket expenditures for services rendered). During the planning period, strategies will be developed that facilitate the realignment of resources to contribute to moving towards Universal Health Coverage. In this regard, efforts will be made to generate additional resources by advocating for higher budgetary allocations by both the national and county governments for health, enhance mechanisms that ensure donor support is aligned to the sector goals and objectives and promote financial risk pooling mechanisms. Besides, adoption of payment mechanisms that provide incentives for better productivity and efficiency in service delivery, including an implementation framework that minimizes wastage in service delivery and cost-containment across the sector will be encouraged.
550. Kingdom Global Health Agency will fund, support global health partnership and nations towards stewardship of current financial resources. A significant part of this funding is both on budget and off budget resources. World Health Organization (WHO) defines health financing as the “function of a health system concerned with the mobilization, accumulation and allocation of money to cover the health needs of the people, individually and collectively, in the health system”. It states that the “purpose of health financing is to make funding available, as well as to set the right financial incentive to providers, to ensure that all individuals have access to effective public health and personal health care” (WHO 2000). A desirable system for providing and financing health care would achieve three goals preventing the deprivation of care because of a patient's inability to pay, avoiding wasteful spending and allowing care to reflect the different tastes of individual patients.
551. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure value for money in the health system, the counties ministries and departments must ensure health system resources are used in the most efficient and effective way possible. The ministry, along with its health system partners, will collaborate on the effective implementation and management of a shared and consistent strategic plan for the health system with built-in accountability and attention to factors needed.
552. Kingdom Global Health Agency will fund, support global health partnership and nations to provide a broad framework on resource requirements as a means of informing donor and government allocations in support of its implementation.
553. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure health workers have the required knowledge, skills and attitudes to implement the health sector, its conditions/diseases, service areas and interventions Covid 19, Malaria, Cancer etc.
554. Kingdom Global Health Agency will fund, support global health partnership and nations to promote, support, commission, manage and conduct health sector related research along with developing and implementation of awareness creation approaches and materials on countries heath conditions, services and interventions.

555. Kingdom Global Health Agency will fund, support global health partnership and nations to develop legislation that will guide the classification and operations of each level of priority Interventions in health departments and Units.
556. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, disseminate and implement policies and strategies, guidelines, norms and standards related to the organisation of health service delivery.
557. Kingdom Global Health Agency will fund, support global health partnership and nations establish, and participate in platform for sharing early warning information and enhance competencies at national level in Emergency and Disaster Risk Management.
558. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement policies, strategies and plans for disease outbreaks.
559. Kingdom Global Health Agency will fund, support global health partnership and nations towards supervision and mentorship services to carry out integrated supportive supervision using countries Quality Model for Health.
560. Kingdom Global Health Agency will fund, support global health partnership and nations to provide oversight for the implementation of a functionally integrated, pluralistic health system develop and enact in Health regulatory framework.
561. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and operationalize to establish a coordination forum to enhance policy dialogue between the public and private sector.
562. Kingdom Global Health Agency will fund, support global health partnership and nations to undertake capacity building of Health Public Private Partnership in departments and units carrying out priority interventions.

566. Kingdom Global Health Agency will fund, support global health partnership and nations to create and operate national advisory body on Multi sectoral Action for Health and advocate for better Multi sectoral Action for Health.
567. Kingdom Global Health Agency will fund, support global health partnership and nations towards joint development of operational and strategic plans and review processes.
568. Kingdom Global Health Agency will fund, support global health partnership and nations to operationalize a health sector intergovernmental consultative and coordination mechanism.
569. Kingdom Global Health Agency will fund, support global health partnership and nations to develop sector wide annual work plans at national level based on available resources and guided by strategic plans and develop annual local gorvernment, National and global Health Sector Performance Reports.
570. Kingdom Global Health Agency will fund, support global health partnership and nations towards stewardship for health, including evidence-based planning and budgeting, budget analysis and budget tracking studies.
571. Kingdom Global Health Agency will fund, support global health partnership and nations towards advocacy with National Treasury for a review of gorvernments budget structure in order to facilitate evidence-based decision-making.
572. Kingdom Global Health Agency will fund, support global health partnership and nations to regulate standards for health services, including quality of services, and their assessment and Develop, disseminate, implement and monitor Leadership Norms and Standards for Health Facilities.
573. Kingdom Global Health Agency will fund, support global health partnership and nations to develop a legal and policy framework for Quality Assurance, Accreditation and Joint Inspections of Health Facilities.
574. Kingdom Global Health Agency will fund, support global health partnership and nations to develop a National Infection Prevention and Control Policy and subsidiary strategies and develop Operational Guidelines and Assessment tools on Quality Clinical Care.

575. Kingdom Global Health Agency will fund, support global health partnership and nations to build capacity in countries on health stardards and Infection Prevention & Control through a comprehensive legal and regulatory framework in the Health Sector that guides sector actions.
576. Kingdom Global Health Agency will fund, support global health partnership and nations to update the health legal framework and develop specific health laws.
577. Kingdom Global Health Agency will fund, support global health partnership and nations to develop the legal and regulatory work on Traditional and Complementary Medicine subsector and thematic policies and strategies where needed and aligned to Constitution and devolution.
578. Kingdom Global Health Agency will fund, support global health partnership and nations Develop and implement a standard approach to policy and strategic planning in terms of process, methodology and formats to ensure functional health governance mechanisms at all levels of health care .
579. Kingdom Global Health Agency will fund, support global health partnership and nations to Strengthen youth, gender and disability and social accountability mainstreaming in policies, regulations, norms and standards, planning and Monitoring / evaluation.
580. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen complaints handling mechanisms: locally and at local and national levels along with Build capacity in social accountability approaches at health sector facilities.
581. Kingdom Global Health Agency will fund, support global health partnership and nations to conduct periodical client satisfaction and responsiveness surveys and functional strategic partnership mechanisms 2.8.1 Adopt the Draft Health Sector Partnership Framework and implement its recommendations for a new health sector partnership and coordination structures in the context of devolution, including the development and implementation of a new Code of Conduct and a mechanism to monitor adherence to it.
582. Kingdom Global Health Agency will fund, support global health partnership and nations towards a transparent and comprehensive sector-wide resource tracking information system to provide timely information to national health sector for countries and sector partners on financing requirements, expected inputs, funding gaps, and actual disbursements.
583. Kingdom Global Health Agency will fund, support global health partnership and nations towards adequate, appropriate and equitably distributed health workers and Develop and implement health sector policy.
584. Kingdom Global Health Agency will fund, support global health partnership and nations to review develop and implement evidence based health workforce norms and standards along with developing County-specific health staffing targets.
585. Kingdom Global Health Agency will fund, support global health partnership and nations to re-engineer health sector development and management in line with health sector norms to develop and institutionalize a unified database system-including on training needs and projections.
586. Kingdom Global Health Agency will fund, support global health partnership and nations attraction and retention of Health Workforce through healthy working relationship and remunerations.
587. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement an incentive policy for attraction and retention of health workers including for hard to reach areas, including on establishing resource centres and recreation facilities.
588. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and implement a reward system as a Health Workforce motivation strategy along with documentation of local government experiences with attraction and retention of Health Workforce.
589. Kingdom Global Health Agency will fund, support global health partnership and nations to institutional capacity and Health Workforce performance along with development review and harmonise schemes of service for all staff cadres including new and emerging cadres.
590. Kingdom Global Health Agency will fund, support global health partnership and nations to develop capacity at county level to regularly monitor, and institute corrective measures for improving Health Workforce productivity and strengthen the Performance Appraisal System at all levels.
591. Kingdom Global Health Agency will fund, support global health partnership and nations towards training capacity building and development of Health Workforce to Update the pre-service curricula to align these to the Health Workforce needs.
592. Kingdom Global Health Agency will fund, support global health partnership and nations to develop health systems and services leadership and management capacity at all.

593. Kingdom Global Health Agency will fund, support global health partnership and nations towards to coordinate the in-service training program of develop and implement a Training Policy.
594. Kingdom Global Health Agency will fund, support global health partnership and nations to develop a Continuous Professional Development Framework carrying out priority interventions and advocate for greater allocation by both national and county governments to attain universal health coverage.
595. Kingdom Global Health Agency will fund, support global health partnership and nations to advocate for increased financing for health and health related sectors to meet agreed national and international benchmarks and to ensure that required interventions are implemented.
596. Kingdom Global Health Agency will fund, support global health partnership and nations to establish social health protection mechanism to progressively facilitate attainment and Health insurance for all.
597. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and strengthen Innovative health sector for communities by periodically reviewing the criteria for resource allocation and purchasing mechanisms to improve efficiency and utilization of resources.
598. Kingdom Global Health Agency will fund, support global health partnership and nations finalize framework for disbursing conditional grants from to Counties and other subnational entities along with scaling up results based financing initiatives for health care with Increase in efficiency to cover more countries.
599. Kingdom Global Health Agency will fund, support global health partnership and nations towards supporting health of Orphans and Vulnerable children through Good Samaritan Insuarance Card along with building or maintaining clinics, dispensaries, mobile clinics in this institutions to ensure health care for all including the OVCs directly or through gorvernments and departments.
600. Kingdom Global Health Agency will fund, support global health partnership and nations towards providing institutional structure to ensure that all current and future mitigation and adaptation climate change measures, policies and strategies integrate health issues at all levels.
601. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen health, social and environmental systems and services to improve their capacity to prevent, prepare for, and cope with climate change;
602. Kingdom Global Health Agency will fund, support global health partnership and nations towards to raise awareness to encourage healthy mitigation and adaptation policies in all sectors;
603. Kingdom Global Health Agency will fund, support global health partnership and nations towards to increase the health and environment sectors' contribution to reducing greenhouse gas emissions;
604. Kingdom Global Health Agency will fund, support global health partnership and nations towards to share best practices, research, data, information, technology and tools at all levels on climate change, environment and health.
605. Kingdom Global Health Agency will fund, support global health partnership and nations to Integrate health issues in measures, policies and strategies for mitigation and adaptation to climate change. This entails assessing the risks, developing national health adaptation strategies and promoting measures that benefit both human health and the climate system, such as clean energy and the promotion of cycling and walking. It also involves further research on and monitoring of the costs, benefits and effectiveness of interventions.
606. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen health, social and environment systems and services to improve their capacity to prevent, prepare for and cope with climate change. This requires improved warning systems, monitoring and surveillance, prevention and treatment, as well as environmental services.
607. Kingdom Global Health Agency will fund, support global health partnership and nations to raise awareness to encourage and facilitate healthy mitigation and adaptation policies in all sectors. This involves training, communication strategies and advocacy campaigns.
608. Kingdom Global Health Agency will fund, support global health partnership and nations to Increase the health and environment sectors' contribution to reducing greenhouse gas emissions. This includes action to promote efficient management of energy and resources.
609. Kingdom Global Health Agency will fund, support global health partnership and nations to at all levels, share best practices, research, data, information, technology and tools related to climate change, environment and health. This is done through participating in scientific and policy events, and making available information and publications online.

610. Kingdom Global Health Agency will fund, support global health partnership and nations to co-ordinate reviews of the scientific evidence on the links between climate and health ensuring complementarity and coordination with other global health and environmental agencies
611. Kingdom Global Health Agency will fund, support global health partnership and nations to develop guideline and recommendation on specific topics, i.e. heat waves, floods, cold wave in partnership with relevant agencies of environment and disaster response.
612. Kingdom Global Health Agency will fund, support global health partnership and nations to ensure that policy objectives become concrete actions on-the-ground through global priorities implementation or Projects implementation with consideration of defined set of processes and procedures (heat-health action plans; disaster preparedness; programmes to combat infectious disease, improve water and sanitation services and respond to natural disasters.
613. Kingdom Global Health Agency will fund, support global health partnership and nations to information to the public on how to avoid risks; capacity building on climate change and health and provide information related to the technical, financial and institutional support mechanism
614. Kingdom Global Health Agency will fund, support global health partnership and nations to assist institutional capacity building and human capacity development and strengthening health systems' capacity to monitor and minimize the public health impacts of climate change.
615. Kingdom Global Health Agency will fund, support global health partnership and nations to strengthen health systems' management of its workforce and establishing an early warning systems, for adequate preventive measures, preparedness, timely response and effective management of natural disasters.
616. Kingdom Global Health Agency will fund, support global health partnership and nations to estimating health and adaptation cost due to climate change.
617. Kingdom Global Health Agency will fund, support global health partnership and nations to Climate Change, health and adaptation vulnerability assessments within program manager, Climate Change, Green health services and Sustainable Development Unit.
618. Kingdom Global Health Agency will fund, support global health partnership and nations to focus on "landmark" projects that have a clear public health goal.
619. Kingdom Global Health Agency will fund, support global health partnership and nations to spotlight activities that build on core competencies to support conveners, facilitators, and interlocutor with developing countries.
620. Kingdom Global Health Agency will fund, support global health partnership and nations to Increase the involvement of developing countries in product development partnerships, research, training and institutional capacity strengthening, both in vaccine clinical trials and implementation research.
621. Kingdom Global Health Agency will fund, support global health partnership and nations to build on normative role to guide and facilitate vaccine development and evaluation.
622. Kingdom Global Health Agency will fund, support global health partnership and nations to develop a long-term strategic plan to provide a durable framework for interaction with partners and firmly position in the evolving global vaccine research arena on Covid 19, Measles, influenza, polio, Malaria and other health vaccines.
623. Kingdom Global Health Agency will fund, support global health partnership and nations towards development of research standards and guidelines.
624. Kingdom Global Health Agency will fund, support global health partnership and nations to the strengthening of research and product development capacity; and the translation of research results into policy and practice.
625. Kingdom Global Health Agency will fund, support global health partnership and nations towards research priorities research standards Capacity strengthening Translation of research results Priority areas Vaccination for health security Vaccination for all ages Vaccines for diseases of poverty.
626. Kingdom Global Health Agency will fund, support global health partnership and nations towards Identification of vaccine and vaccination research priorities In an increasingly complex landscape of global health research, and a growing number of players in the field, it is important that actual public health needs are assessed through a transparent and inclusive process.
627. Kingdom Global Health Agency will fund, support global health partnership and nations to develop and apply rigorous scientific review processes, including systematic reviews and methodologies, and prioritize the research gaps identified.
628. Kingdom Global Health Agency will fund, support global health partnership and nations to develop technical agendas such as target product profiles and conduct assessments to screen for promising and accessible vaccine technologies.

629. Kingdom Global Health Agency will fund, support global health partnership and nations to convene ad hoc advisory committees establishing norms, standards and guidelines for health sector and vaccines development, vaccine research, standards help to achieve a consistently high level of quality, ensure comparability of results, provide national authorities with guidance for the evaluation of products and, in the form of good practice guidelines, ensure that research is conducted efficiently and to the highest ethical principles.
630. Kingdom Global Health Agency will fund, support global health partnership and nations to help to protect research participants and to maintain public confidence.
631. Kingdom Global Health Agency will fund, support global health partnership and nations to regulatory standards, identifies, initiates and coordinates pre-normative research leading to the establishment of regulatory standards for the evaluation and quality control of vaccines and biologicals by other teams.
632. Kingdom Global Health Agency will fund, support global health partnership and nations to facilitate priority research into the statistical methods for estimating efficacy against the overall community burden of infectious diseases and synthesize the wealth of information on all vaccines performance as an aid to policy-makers and as a bridge between scientific proof-of-principle endpoints and the public health impact of vaccines focused on Covid 19, HIV, tuberculosis and dengue vaccines, among others along with harmonized methods, such as health economics.
633. Kingdom Global Health Agency will fund, support global health partnership and nations to support the implementation of good practice guidelines through its training and capacity strengthening activities for improved efficiency and harmonized, quality research, in collaboration with other global health agencies and countries.
634. Kingdom Global Health Agency will fund, support global health partnership and nations to identify and prioritize needs for research standards development, and conduct pre-normative research to identify and improve suitable methods and measurement technologies and conduct comparative studies to inform biological standards development.
635. Kingdom Global Health Agency will fund, support global health partnership and nations to develop consensus and guidelines for the evaluation of complex vaccines and related technologies, based on broad consultations and special studies and develop good practice guidelines in areas where it is critical to protect research subjects, or to advance the relevance and comparability of research.
636. Kingdom Global Health Agency will fund, support global health partnership and nations to develop, disseminate and implement good practice guidelines in conjunction with training and capacity strengthening efforts and with global collaborating centres.
637. Kingdom Global Health Agency will fund, support global health partnership and nations to enhance the competencies needed for health-sponsored research projects, and exploit opportunities offered by training schemes developed by partner program and use training efforts to disseminate and implement good practice guidelines; manufacturers.
638. Kingdom Global Health Agency will fund, support global health partnership and nations to seek suitable projects and strategies for technology transfer and encourage the set-up of research networks by and for developing countries; ♣ participate in research platforms that aim to establish research capacity at country level.
639. Kingdom Global Health Agency will fund, support global health partnership and nations to develop the concept of technology hubs as competency centres to assist with technology transfer to developing country vaccine manufactures and related public sector institutions along with assisting Advisory Committee on Quantitative Research in Immunization.
640. Kingdom Global Health Agency will fund, support global health partnership and nations to develop tools for decision-making informed by country-relevant and support studies that examine vaccine effectiveness and economic impact in relevant country scenarios.
641. Kingdom Global Health Agency will fund, support global health partnership and nations to conduct a comprehensive review of immunization schedules and conduct systematic analyses of available evidence and synthesize the knowledge into guidance and technical advice to Member States and global partners to serve as the research arm for vaccines on the health global agencies Strategic Advisory Group of Experts on immunization.
642. Kingdom Global Health Agency will fund, support global health partnership and nations to assure excellence and impartiality in quantitative research through the involvement of a dedicated advisory committee and carry out activities in the area of gathering reliable, valid and comparable data on infectious disease burden in older adult populations in representative developing countries.

643. Kingdom Global Health Agency will fund, support global health partnership and nations to measure the immunogenicity and, where appropriate, efficacy of vaccines in the elderly in developing countries, and compare this to age-matched cohorts in industrialized countries. This will provide information on the effectiveness of existing and improved vaccines in developing country populations, whether they experience a comparable process of immune senescence, or whether this is modified by environmental factors.
644. Kingdom Global Health Agency will fund, support global health partnership and nations to promote an evaluation and understanding of how vaccination earlier in adulthood could impact the immune function in later life and delay hypo-responsiveness. The implementation of schedules beyond childhood is already taking shape in some developing countries and may provide preliminary data on immune functions and the challenges to reaching adult populations.
645. Kingdom Global Health Agency will fund, support global health partnership and nations to support the development of policies for the use of vaccines in adults and the elderly ensuring safety, and on ethical and social measures to accompany clinical trials.
646. Kingdom Global Health Agency will fund, support global health partnership and nations to serves as the key facilitator for prioritization of the essential immunological measures for lead candidates entering efficacy trials and for enabling access to reagents, controls and consensus-harmonized standard operating procedures for the generation of clinical data. The outcome of these activities and ultimately the development of correlates of protection will be hallmarks for the accelerated evaluation of vaccines. Target product profiles may be developed for some vaccines in order to guide research towards products with the highest expected public health impact for neglected poverty-related diseases, where the utility of a vaccine has been clearly identified.
647. Kingdom Global Health Agency will fund, support global health partnership and nations to develop research agendas and promote product development partnerships to develop and facilitate implementation of polices, norms and standards related to vaccine evaluation and access.
648. Kingdom Global Health Agency will fund, support global health partnership and nations to support sustainable capacity strengthening of clinical trial sites that are integrated into other prevention efforts.
649. Kingdom Global Health Agency will fund, support global health partnership and nations to Capacity strengthening Translation of research results Priority areas Vaccination for health security Technology transfer platforms Tools for decision-making Vaccination for all ages Vaccines for the elderly Immunization schedules Vaccines for diseases of poverty Target product profiles Clinical trial design and evaluation
650. Kingdom Global Health Agency will fund, support global health partnership and nations to hold regular cutting-edge scientific conferences for follow-ups monitoring and evaluation as we fund manufacturers to produce more to reach out to the poor in the world.
651. Kingdom Global Health Agency will fund, support global health partnership and nations to engage facilitate , give special care, provide equipment and facilities to meet the needs of people living with the following disabilities Blindness, Low-vision, Leprosy Cured persons, Hearing Impairment (deaf and hard of hearing), Locomotor Disability, Dwarfism, Intellectual Disability, Mental Illness, Autism Spectrum Disorder, Cerebral Palsy, Muscular Dystrophy, Chronic Neurological conditions, Specific Learning Disabilities, Multiple Sclerosis, Speech and Language disability, Thalassemia, Hemophilia, Sickle Cell disease, Multiple Disabilities including deaf-blindness, Acid Attack victim and Parkinson's disease.
    - **Blindness-** Blindness is defined as the state of being sightless. A blind individual is unable to see. In a strict sense the word blindness denotes the condition of total blackness of vision with the inability of a person to distinguish darkness from bright light in either eye.
    - **Low-vision-** Low-vision means a condition where a person has any of the following conditions, namely: visual acuity not exceeding 6/18 or less than 20/60 upto 3/60 or upto 10/200 (Snellen) in the better eye with best possible corrections; or
    - limitation of the field of vision subtending an angle of less than 40 degree up to 10 degree.
    - **Leprosy Cured Persons-** *Leprosy*, also known as Hansen's disease (HD), is a chronic infectious disease caused by a bacteria called *Mycobacterium leprae*. The disease mainly affects the skin, the peripheral nerves, mucosal surfaces of the upper respiratory tract and the eyes. Leprosy is known to occur at all ages ranging from early infancy to very old age. About 95% of people who contact *M. Leprea* do not develop the disease.

- **Hearing Impairment-** Hearing impairment is a partial or total inability to hear. It is a **disability** which is sub-divided in two categories of deaf and hard of hearing. *"Deaf"* means persons having 70 dB hearing loss in speech frequencies in both ears. *"Hard of hearing"* means person having 60 dB to 70 dB hearing loss in speech frequencies in both ears.
- **Locomotor Disability-** Strictly speaking Locomotor Disability means problem in moving from one place to another — i.e. disability in legs. But, in general, it is taken as a disability related with bones, joints and muscles. It causes problems in person's movements (like walking, picking or holding things in hand etc.)
- **Dwarfism-** Dwarfism is a growth disorder characterized by shorter than average body height.
- **Intellectual Disability-** Intellectual disability, also known as general learning disability and mental retardation (MR), is a condition characterized by significant limitation both in intellectual functioning (reasoning, learning, problem solving) and in adaptive behavior which covers a range of every day, social and practical skills.
- **Mental Illness-** Mental illness or mental disorder refers to a substantial disorder of thinking, mood, perception, orientation or memory that grossly impairs judgment, behavior, capacity to recognize reality or ability to meet the ordinary demands of life. But it does not include retardation which is a condition of arrested or incomplete development of mind of a person, specially characterized by sub-normality of intelligence.
- **Autism Spectrum Disorder-** Autism Spectrum Disorder (ASD) is a neurological and developmental disorder which affects communication and behavior. Autism can be diagnosed at any age. But still it is called a "developmental disorder" because symptoms generally appear in the first two years of life. Autism affects affects the overall cognitive, emotional, social and physical health of the affected individual.
- **Cerebral Palsy-** Cerebral Palsy (CP) is a disabling physical condition in which muscle coordination is impaired due to damage to the brain. It occurs at or before child birth. Cerebral Palsy is not a progressive condition; meaning it does not get worse with time. However, muscle disuse could increase the extent of disability over the period of time. At present there is no cure available for this condition. Thus, Cerebral Palsy is incurable and life-long condition, at present.
- **Muscular Dystrophy-** Muscular Dystrophy (MD) is a group of neuromuscular genetic disorders that cause muscle weakness and overall loss of muscle mass. MD is a progressive condition; meaning that it gets worse with the passage of time.
- **Chronic Neurological Conditions-** Alzheimer's disease and Dementia, Parkinson's disease, Dystonia, ALS (Lou Gehrig's disease), Huntington's disease, Neuromuscular disease, Multiple sclerosis, Epilepsy & Stroke
- **Specific Learning Disabilities-** Specific Learning Disabilities is a group of disabling conditions that hampers a person's ability to listen, think, speak, write, spell, or do mathematical calculations. One or more of these abilities may be hampered.
- **Multiple Sclerosis-** In Multiple Sclerosis (MS), the immune system of body attacks the Central Nervous System, which includes brain and spinal cord. As a result of MS, the myelin sheath covering on neurons gets damaged. This exposes the nerve fiber and causes problems in the information flow through nerves. With time, MS can lead to the permanent damage to nerves.
- **Speech and Language Disability-** A permanent disability arising out of conditions such as laryngectomy or aphasia affecting one or more components of speech and language due to organic or neurological causes.
- **Thalassemia-** Thalassemia is a genetically inherited blood disorder which is characterized by the production of less or abnormal hemoglobin. As we know, hemoglobin is a protein found in Red Blood Cells. Hemoglobin is responsible for carrying oxygen around in the body. Thalassemia results in large numbers of red blood cells being destroyed, which leads to anemia. As a result of anemia, person affected with Thalassemia will have pale skin, fatigue and dark coloration of urine.
- **Hemophilia-** Hemophilia is a blood disorder characterized by the lack of blood clotting proteins. In the absence of these proteins, bleeding goes on for a longer time than normal. Hemophilia almost always occurs in males and they get it from their mothers. Females are rarely affected with hemophilia.

- **Sickle Cell Disease-** Sickle Cell Disease is a group of blood disorders that causes red blood cells (RBCs) to become sickle-shaped, misshapen and break down. The oxygen-carrying capacity of such misshapen RBCs reduce significantly. It is a genetically transferred disease. Red Blood Cells contain a protein called hemoglobin. This is the protein that binds oxygen and carry it to all the parts of the body.
- **Multiple Disabilities including Deaf-blindness-** Multiple Disabilities is the simultaneous occurrence of two or more disabling conditions that affect learning or other important life functions. These disabilities could be a combination of both motor and sensory nature.
- **Acid Attack Victims-** An acid attack victim means a person disfigured due to violent assaults by throwing of acid or similar corrosive substance.
- **Parkinson's disease-** Parkinson's disease (PD) is Central Nervous System disorder which affects movement. Parkinson's disease is characterized by tremors and stiffness. It is a progressive disease, which means that it worsens with time. There is no cure available at present.

- **Albinoism** – The Albinism is a genetic condition where people are born without the usual pigment (color) in their bodies. Their bodies aren't able to make a normal amount of melanin, the chemical that is responsible for eye, skin, and hair color. So most people with albinism have very pale skin, hair, and eyes

In summary Helpers Of Africa International through Kingdom Global Health Agency will fund, support global health partnership and nations to work with other global health agencies to save lives of global citizens in preventive and protective health along with promoting dignity in humanitarian and public health emergencies in countries for a safer generations and world. We shall seek to support and participate in in all sectors to prepare for and responds to humanitarian and public health disasters emergencies to improve the health outcomes of affected populations through timely, predictable, appropriate and effective coordinated health actions. Our strategic plans focuses on People at the centre of response - affected populations at the heart of decision making, Strengthen coordination for collective action and collective results, building capacity for leadership and countries along with stakeholders, Strengthen the coordination, technical and operational capacity of national-, regional- and global-level actors to prevent, prepare for, respond to and recover from public health and humanitarian emergencies, Strengthen inter-cluster and multi-sector collaboration to achieve better health outcomes, strengthen our collective and respective health information management and use, Address strategic and technical gaps, Prevent detect, and respond to epidemics, Provide health services in emergencies and strengthen health systems, Help countries to achieve universal health coverage, Lead on health related including women, children and adolescents; climate and environmental change; communicable and noncommunicable diseases, and Provide the world's platform for collective decision-making in health.

In achieving these strategic priorities we shall work with and through countries, focus on cost effectiveness, seek for organizational excellence as detailed for all our agencies, support in research, resource mobilization, collaboration & partnerships with global players along with private health providers, advocate for health administration and management virtues globally. We shall seek to fund and promote business / financial innovation – accelerates the attainment of SDGs as a global partner of development in honor and partnership of global agencies WHO, NGOs, Health Stakeholders, funders including foundations and innovation programs of governments. We shall seek to advocate, strengthen and support health diplomacy, resource mobilization, and networking.

We appreciate all our donors and partners for your generous contributions that will position and empower us to be great players and supporters of this valuable health sector in countries and globally through our vision, mission, projects, areas of focus and specific objective outlined in this brief of our strategic plan. May God the giver of life and health grace us and grant us to be stewards of global citizens who He has entrusted in our care to be rewarded in this life and life to come for our faithfulness to this task in all our strategic plans. We shall do our best through our structure, plan and expertize as we allow God to do the rest for He alone is the author of life and health. God bless us all as we partner , donate and do our best in this valuable partnership that will make the world a better, safer and habitable dwelling for all in for us and generations to come.

Health Quotes

"Love yourself enough to live a healthy lifestyle and love the world to care for her health." Jules Robson

"To keep the body in good health is a duty, otherwise we shall not be able to keep our mind strong and clear." Buddha

"Health is not valued till sickness comes." Thomas Fuller

"Health is the greatest gift, lets take care of it." Buddha

"Health is the crown on the well person's head that only the ill person can see." Robin Sharma

"It is health that is real wealth and not pieces of gold and silver." Mahatma Gandhi

"Those who think they have no time for healthy eating will sooner or later have to find time for illness." Edward Stanley

"You can't enjoy wealth if you're not in good health." Anonymous

"The mind and body are not separate. what affects one, affects the other." Anonymous

"The first wealth is health, care for it." Ralph Waldo Emerson

"Healthy citizens are the greatest asset any country can have." Winston Churchill

"Take care of yourself, be healthy, and always believe you can be successful in anything you truly want." Alessandra Ambrosio

"I'm healthy as can be – not an ache or pain. A lot of my prayer is thanking God that I am healthy. I pray for long life and good health." Joel Osteen

Good health and good sense are two of life's greatest blessings. Publilius Syrus

Give a man health and a course to steer, and he'll never stop to trouble about whether he's happy or not. George Bernard Shaw

I believe that the greatest gift you can give your family and the world is a healthy you. Joyce Meyer

Nobody can be in good health if he does not have all the time fresh air, sunshine and good water. Flying Hawk (Native American saying)

Health is the greatest gift, contentment the greatest wealth, faithfulness the best relationship. Buddha

Physical fitness is not only one of the most important keys to a healthy body, it is the basis of dynamic and creative intellectual activity and world. John F. Kennedy

Our greatest happiness does not depend on the condition of life in which chance has placed us, but is always the result of a good conscience, good health, occupation, and freedom in all just pursuits. Thomas Jefferson

Leave all the afternoon for exercise and recreation, which are as necessary as reading. I will rather say more necessary because health is worth more than learning. Thomas Jefferson

The doctor of the future will give no medicines, but will interest his patients in the care of the human frame, in diet, and in the causes and prevention of disease. Thomas Edison

Healthy citizens are the greatest asset any country can have. Winston Churchill

Water, air, and cleanness are the chief articles in my pharmacy. Napoleon Bonaparte

Health is not valued until sickness comes. Thomas Fuller

When health is absent, wisdom cannot reveal itself, art cannot manifest, strength cannot fight, wealth becomes useless, and intelligence cannot be applied. Herophilus

A fit, healthy body – that is the best fashion statement. Jess C. Scott

Health is a state of body. Wellness is a state of being. J. Stanford

To ensure good health: eat lightly, breathe deeply, live moderately, cultivate cheerfulness, and maintain an interest in life. William Londen

Good health is a duty to yourself, to your contemporaries, to your inheritors, to the progress of the world. Gwendolyn Brooks

Healthcare is the cornerstone of the great state. It is the crown jewel of the welfare state. Monica Crowley

Access to maternal healthcare is a human right. Christy Turlington

There should be choice in healthcare. Anne Wojcicki

HONORING KINGDOM CHAMPIONS IN NATIONS AND GLOBALLY IN ALL AREAS

Honor – Hold In High & Great Esteem / Regard, Remembrance, Not Forgetting, Giving To, Respect, Appreciation, Celebrating, Showing Loyalty, Being Submissive To A Person Higher Than You, Treating One With A lot Of Love, To Show Courtesy Love And Behavior Towards Someone, To Elevate Or Have High Repute To Someone Else, Esteem Paid To Worth And Is Associated With Reverence, Dignity, Distinction, Reputation, Good Name, And A Good Sense Of What Is Right, Just, And True. (1 Samuel 15:23.) While Honoring Doesn't Always Mean To "Obey", It Has To Do With Having A Spirit Of Submission, In Which We Weigh Carefully What Our Biological Parents Say And Respond To Them With The Utmost Respect And Humility. Honor In This Context Has To Do With Recognizing What A Person Is Worth, Celebrating Who They Are And What They Have Accomplished, And Making Room For Them According To The God Given Honor They Deserve. Celebrated, Appreciated, Honored, Recognized, Motivated, Cared For, Loved, Preserved, Remembered

Helpers Of Africa International whose moto is Raising Kingdom Champions will be honoring achievements, success, achievements, record breakers, pace setters, innovations, best work, most work, best presentation and outstanding performances in all major charity , humanitarian, socio-economic, leadership, industry, science, education, medicine, environment, gender, talents, skills, sports, games, hospitality, beauty, fashion, aviation, wildlife, peace, faith and religion, music, art, socio media, conservation, food, tourism and many others we shall be highlighting through Kingdom Global Honor Agency. We shall support existing honor initiatives , competitions, talent searches, national honor award schemes, Presidential awards, schools, communities, talent searches at a national level, regional, continental and globally on international platform such us Paralympics, Olympics, world cup, World motor sports, global marathons, sports and talents search for disability, champions in all sectors for women , youth, men, children and youths across all professionals, businesses along with all socio-economic status. We shall not just give them one time awards and prizes but also raise them to be Helpers Of Africa International good will ambassadors and Our various agencies depending on the sectors and platforms they represent and excel to form a strong team of Smart team of curtain raisers, advertisers, peace, humanitarian and icon. These national and global heroes the appreciation, support, and respect they deserve is to offer the understanding and specialized care they need to enjoy a high quality of life and, ultimately, to experience a meaningful, peaceful end of life with comfort, independence, and dignity. Our honor and appreciation is not just about the gift value or presentation but it's a compassionate, pace setting and motivation philosophy to motivate others.

We shall also seek for welfare of previous leaders and champion to ensure people who once paid exempionary price and devotion in various sectors are not forgotten or neglected. We shall support some national celebrations that are focused towards this end such as mashujaa day in Kenya, veterans, Guinness book of world records, Media houses Honor etc. We shall seek to also support lives and livelihood of current and past champions who are living below acceptable economic standards and status who may have suffered financial loses, or health or rejection or separation because of their stand or resolve in their efforts to stand out in various sectors and platforms such as injuries for sports celebrities through special care homes and estates of Kingdom champions homes, estates and cities of care that can be provided in a facilities or wherever the patient calls home. A multidisciplinary team of Kingdom Global Honor Agency to provide comprehensive social, medical, and spiritual care that gives comfort and support to patients and their families when an illness no longer responds to curative treatments, or when a patient chooses not to pursue aggressive therapies. Palliative care is often an important part of hospice, but it also can accompany curative treatment. Sometimes called comfort care, palliative care is a health care specialty focused on relieving pain and other symptoms with a combination of medical and non-medical interventions.

Our strategic plan includes searching for this champions through institutions, socio media, media, government agencies and systems, hosting and supporting events, auditions, tournaments, mobilizing recommendations and vetting such through pools of judges, consultants and past achievers to profile and categorize such for honor appreciation. We shall seek to support and fund other organizations in public and private sectors at national and global level that are already involved in this initiatives as we look search to package new outfits of honor platforms cutting across all sectors and all genders. Kingdom Global Honor Agency will seek for partnership between hospice care providers, professionals, and other interested organizations with the common goal to honor veterans' preferences and past military service while providing the best possible health care for Kingdom champions in the best possible manner and setting in better communication, coordination, and collaboration our agency through networking, education, training, shared resources and best practices—make it possible to connect more champions and their families with an array of champions-centered services to meet their unique needs and promote their passions further for the benefit communities, less fortunate and motivate others to success in schools and institutions.

Our agencies will do monthly and annual Magazine and maintain in our headquarter a wall of Honor to keep records and profiles of achievers we have honored along with publishing books in memory of heroes to be used for coming generations. We shall seek professional specialization in guiding champions and their families through their life stories, providing referrals and responding to their needs in an educated manner, and accompanying them through a peaceful end of life and bereavement process. Our approach involves respectful inquiry, compassionate listening, and grateful acknowledgment of their service and achievements—through personal goal setting and wish fulfillment whenever possible, and meaningful recognition ceremonies and memorial events. We shall also support and fund governments to care for their own heroes by supporting. This will bring honor to our Helpers Of Africa International and our agencies along with penetration in Nations and Globe in reception and acceptance of other projects and programs that will follow in countries and organizations as we engage them as partners and collaborators in our valuable activities. Our Kingdom Champions care will include specialized health care for complex needs, Long-term care (support and assistance with activities of daily living), Home-based and community services (including day health care, short-term skilled care, primary care, homemaker and home health aide care, hospice care, palliative care, respite care, and remote monitoring care), Pensions (supplemental income for champions), Aid & Attendance (supplemental income for individuals who require daily help especially elderly or health/ physically challenged), Housebound (supplemental income for individuals with a permanent disability), Disability compensation and Burial (monetary allowance for service-related or non-service-related death). Our gifts shall also be sustainable and considered to give value and sustainability such as contracts of recording for musicians, buying gifts relevant to their sector or that can further there mission.

- "If you seek money, be wise; if you seek power, be strong; if you seek honor, be virtuous; if you seek happiness, be yourself." — **Matshona Dhliwayo**
- "An eagle earns its honor from the storms it endures." — **Matshona Dhliwayo**
- "A river is honored for its fish, not its size."— **Matshona Dhliwayo**
- "Regard those who respect you. Esteem those who honor you. Cherish those who love you. Reward those who adore you." — **Matshona Dhliwayo**
- "Learn from the Sun; on account of its warmth it doesn't need to beg anyone to esteem it"— **Matshona Dhliwayo**
- "The brightest stars earn their honor in the darkest skies."
  — **Matshona Dhliwayo**
- "It is a ship that fights the storm, but its architect who gets all the praise."— **Matshona Dhliwayo**

- "Noble leaders choose: wisdom over wealth, knowledge over fame, understanding over honor, virtue over titles, and people over power."— **Matshona Dhliwayo**
- "A lion earns its honor in the jungle." — **Matshona Dhliwayo**
- "Light earns its highest honors in the dark." — **Matshona Dhliwayo**
- "You honor the dead by honoring the living."— **Matshona Dhliwayo**
- "A life of honor offers abundant rewards; a life of dishonor comes at a very steep price."
  — **Frank Sonnenberg, Soul Food: Change Your Thinking, Change Your Life**
- The shortest and surest way to live with honor in the world, is to be in reality what we would appear to be, all human virtues increase and strengthen themselves by the practice and experience of them. – Socrates
- He has honor if he holds himself to an ideal of conduct though it is inconvenient, unprofitable, or dangerous to do so. – Walter Lippmann
- Honor is not the appendage of any social class. It is a way of life which may be freely chosen by any man or women, regardless of race, color, or creed. – T. Braxton Woody
- You can abandon your own body, but never let go of your honor. – Miyamoto Musashi
- Honor is the inner garment of the Soul; the first thing put on by it with the flesh, and the last it layeth down at its separation from it. – Akhenaton
- True honor is an outflow from a heart that fears God. – John Bevere
- Honor must start in the heart, but if it ends there, it isn't honor. Honor must be expressed through words, symbols, actions, or gestures. Honor is among the most incarnational of the virtues. It must have feet and hands. – Douglas Wilson
- Who sows virtue to people and world reaps honor. – Leonardo da Vinc
- Smears are not only to be expected but fought. Honor is to be earned, not bought. – Margaret Chase Smith
- Honor may not win power, but it wins respect. And respect earns power. – Mitsunari Ishida
- Humility forms the basis of honor, just as the low ground forms the foundation of a high elevation. – Bruce Lee
- Honor is honesty to what is, not blind duty to what you wish to be. – Terry Goodkind
- Honor is no phantom. Duty doesn't melt away, no matter how much we might wish it to. – Claudia J. Edwards
- Service to others in their time of need is a privilege and an honor. – Harley King
- A man of honor does swiftly that which must be done. – Susan Kearney
- A gentleman protects secrets. A man of honor protects the truth. – Mekael Shane
- If you think your honor demands you kill every dog that barks at you...you will only find yourself spending all your time chasing dogs. There is no honor in that. – Dorothy Hoobler
- A life of honor offers abundant rewards; a life of dishonor comes at a very steep price. – Frank Sonnenberg
- Honor is a complex and important matter best served by doing the right thing. – Mark Helprin
- Honor is the only code we uphold and I would die for it. – Jessica Leake
- Honor Comes from honest toil for others - Seffl.com
- Honor is self-esteem made visible in action. – Ayn Rand
- Honor — it was transitory and subjective, and often directly opposed to practicality. – Amanda Downum
- Honor ought to be given to virtue and it is true riches. – Anacharsis
- It is Men honor men who honor their fellow men. – Ken Alstad
- Honor is infinitely more valuable than positions of honor. – Georg Christoph Lichtenberg
- Show me the man you honor, and I will know what kind of man you are. – Thomas Carlyle
- For me, commitment boils down to honor. – Ian Somerhalder
- Concepts of integrity and heroism and honor are still important to the world today. Some people behave well, and some people behave badly. – Oliver Stone

- Let your ways and actions be in honor of Christ. – Sunday Adelaja
- Honor is a balancing act and only the heart can strike that balance. – Stefan Emunds
- Honor always comes at a price, else it would be worthless. – Michelle Griep
- Honor doesn't revise according to company just as integrity doesn't diminish due to circumstance. – Donna Lynn Hope
- Honor was like a coat: sometimes one did not have time or did not have opportunity to put it on. – Adrian Tchaikovsky.
- Every day, live in a way that honors who you are. – A.D. Posey
- Without honor, a knight is no more than a common killer. It is better to die with honor than to live without it. – George R.R. Martin
- Nobody can acquire honor by doing what is wrong. – Thomas Jefferson
- Keep to your precious honor. Rather die than sully it. There is only honor in a man's life and the rest is meaningless gibberish. – Alaric Longward
- "Honor," she said, "is the coin that stays in your pocket when all your silver has been spent." – Craig Schaefer
- Living your life with honor Brings forth friends You didn't know you had – Frank Julius
- Honor is the only thing that separates us from animals. – Peter Tieryas
- The most assured way of gaining maximum respect, is to permanently become a person of great honor by serving others and the world. – Edmond Mbiaka
- I, too, shall seek honor. But I shall seek it where I know it will be found by serving others and giving to the world. – Lloyd Alexander
- 76. If it be a sin to covet honor, I am the most offending soul. – William Shakespeare
- If honor were profitable, everybody would be honorable. – Thomas More
- Keep your word. Honor commitments, and they will double back to honor you. – Bill Rancic
- It is not our purpose to become each other; it is to recognize each other, to learn to see the other and honor him for what he is. – Hermann Hesse
- Nothing reflects so much honor on a workman as a trial of his work and its endurance of it. So it is with God. It honors Him when His saints serve others and world with integrity. – Charles Spurgeon
- There is an honor to what we do, and there are no shortcuts. – Cody Rhodes
- Honor is the reward of virtue. – Marcus Tullius Cicero
- Honor and shame from no condition rise. Act well your part: there all the honor lies. – Alexander Pope
- The man who interprets Nature is always held in great honor. – Zora Neale Hurston
- Honor is like a match, you can only use it once. – Marcel Pagnol
- The coming of honor or disgrace must be a reflection of one's inner power. – Xun Kuang
- I can be forced to live without happiness, but I will never consent to live without honor. – Pierre Corneille
- Favor and honor sometimes fall more fitly on those who do not desire them. – Livy
- A man's vanity tells him what is honor, a man's conscience what is justice. – Walter Savage Landor
- Without money honor is merely a disease. – Jean Racine
- You can be deprived of your money, your job and your home by someone else, but remember that no one can ever take away your honor. – William Lyon Phelps
- Honor wears different coats to different eyes. – Barbara W. Tuchman
- I have found that the more I honored others, the more they honored me and the more fulfilling my career became. In the business arena, I have been surrounded by people with awesome skills. The difference between good and great is determined by the mindset you choose to bring to the work. The concept of honor should be part of that mindset. – Douglas Conant
- It's always strange to get an honor from people who are the ones that should be honored. – Nancy Dubuc
- The best way to honor someone who has passed is to live a legacy for others. – Marvin Sapp
- Honor is not what you say. Honor is what you do. – Pierce Brown
- Honor is for the living. Dead is dead, so honor men while they can see and hear. – Drew Karpyshyn

- If you be faithful, you will have that honor that comes from God and man his Spirit will say in your hearts, Well done, good and faithful servants. – Adam Clarke
- It is a luxury to put our interests first. It is an honor to put the interests of others be; our own. – Simon Sinek
- Honor is kind of what you get when you weaponized manners. – Jasper Fforde
- Act well your part, there all the honor lies. – Edgar Lee Master
- No man of honor avoided what needed to be done, simply because it might not proceed in his favor. – Claire Delacroix
- There is no honor in sending men to die for something you won't even fight for yourself. – Mark Owen
- Never give in–never, never, never, never, in nothing great or small, large or petty, never give in except to convictions of honor and good sense. Never yield to force; never yield to the apparently overwhelming might of the enemy. – Winston Churchill
- The essence of honor lay in the moment of combat between equals. – Dan Simmons
- To die with honor when one can no longer live with honor. – John Luther Long
- Honor the image of God. Human beings are not accidents, but creations. – Timothy Keller
- The law of honor: Go along only on the paths of honor. Fight, and never be a coward. Leave the path of infamy to others. Better to fall in an honorable fight than win by infamy. – Corneliu Zelea Codreanu
- We must remember how to honor and respect life with each breath, step, word, and thought. What you bless blesses you in return. This is the power of reciprocity. – Sandra Ingerman
- You need to know that you can't honor God when you're chained to the voice and opinions of man. – Tyler Perry
- Live with honor and follow your conscience. – Benigno Aquino, Jr.
- Any honor is an honor. You can't really say which one is better than the next, but it's always wonderful when you're honored by your peers for your work. – David Bryan

Vision – On His Eagles Wings (Jesus is Lord)

To refresh the Globe through Travel

Helpers Of Africa International will invest heavily in global Air transport through Kingdom Global Airline and Aviation Agency by owing and running her airline Kingdom Airways in to run globally and build a full fragged ultra-modern airport in Kenya as a home for the operation of our Kingdom Airways adjacent to our City Headquarters to provide that annex to the 12 segments of our city along with funding other Airline restoration plan especially during this time of World Economic Meltdown by Covid 19 where many airlines were grounded. Many airlines need support equipment program involving the acquisition aircrafts, countries in development of airports along with engagement in various projects that are aimed at supporting the development of sustainable air transport networks. The types of projects range from aircraft acquisitions, airport and air traffic control infrastructure investments, capacity building in regulatory oversight, advise on aviation policy matters and environmental issues, as well as fostering private sector participation in air transport in emerging markets. The global Air Transport Industry continues on its successful path, marked by strong growth especially in certain emerging markets, and healthy consolidation in more mature regions. While air cargo still remains potential air transport industry over 66 million Jobs before Covid and over US$ 2.7 trillion in global GDP economic activity. The improved performance of the sector has made investments in air transport more attractive. Many airlines' need economic boast to return to function after losing US$84 according to reports by AITA and on capital exceeded their cost of capital on a global scale, and many mid-sized airports in emerging markets are able to attract private capital to finance needed infrastructure expansion. Nevertheless, not all regions experience equal financial performance though all are potential Asia-Pacific carriers were able to post a profit of US$ 900 million in 2016, African airlines lost US$ 800 million, and many Africa airports still experience insufficient traffic for being able to finance needed investments along with Covid effects.

The Helpers Of Africa International continues to recognize the potential of air transport irrespective of global effects of Covid 19 to contribute to economic development and shared prosperity. However, given the heterogeneous development of the sector in emerging markets, it is important to focus support and investments in regions and markets where the private sector is challenged by low or negative returns. This explains the declining number for public sector airport projects, as well as the global funders and donors enhanced focus on Public-Private Partnerships in airport infrastructure projects. Helpers Of Africa International will invest heavily in global Air transport through Kingdom Global Airline and Aviation Agency air transport development activities, which include an overall portfolio of US$1.24 billion, and several analytical and technical research products. With this activity we shall remain actively engaged around the world on air transport development in partnership and collaboration with the existing global stakeholder's organizations, by addressing policy and regulation, safety, infrastructure rehabilitation, institutional strengthening, and capacity building in client countries.

Helpers Of Africa International will invest heavily in global Air transport through Kingdom Global Airline and Aviation Agency .The current economic challenges facing this potential sector of aviation industry and how to mitigate them in emerging markets, continue to be a top priority for the KGB group along with our KGAAA agency which will address in cooperation with strategic partners. We look forward to continue addressing the challenges and opportunities of the sector in our 2020 to 2050 strategic plan to help achieving safe, affordable, and sustainable air transport for all. We shall partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally including Global & National Automatic Dependent Surveillance Units, Global & National Air Traffic Control projects and units, Global & National Air Traffic Management projects and Units, Global & National Build-Operate-Transfer Air transport projects, Global & National Civil Aviation Authorities and units, Global & National Air Transport Advisory Services Departments, Global & National Air Transport Specialist units, Global & National Aviation Infrastructure Departments and Units, Global & National Distance Measuring Equipment's Unit, Global & National Navigation Satellite System, Global & National Aviation Safety Agency, Global & National Finance Economics and Urban Departments, Global & National Federal Aviation Administration Units, Global & National Aviation Strategy Strategy consortium, IATA

International Air Transport Association, IASA International Aviation Safety Assessment, ICAO International Civil Aviation Organization, IDA International Development Association, ILS Instrument Landing System IOSA, IATA Operational Safety Audit , Global & National Runway TA Technical Assistance Units, Global & National Transport Unit of the Transport Water ICT Departments, Global & National Universal Safety and Security Oversight Audits Program,

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Global & National Air traffic flow and capacity management units, Global & National Airborne detect and avoid algorithms units, Global & National Airborne collision avoidance systems units, Global & National Area control centres, Global & National Airport collaborative decision-making units, Global & National clearances and information units, Global & National ATC communications management units, Global & National ATS data exchange presentation units, Global & National Automatic dependent surveillance units, Global & National Aerodrome flight information service centres, Global & National Aeronautical fixed telecommunication networks, Global & National Air traffic message handling system units, Global & National Aeronautical information conceptual model Units, Global & National ATS interfacility data communications units, Global & National Aeronautical information publication units, Global & National Enhanced traffic situational awareness during flight operations centers and Units,

Kingdom Global Airline and Aviation Agency Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Global & National ATM information reference models units, Global & National Aeronautical information services units, Global & National Aeronautical information exchange models, Global & National Airport movement area units, Global & National Arrival/departure management centers and systems, Global & National ATC microphone check units, Global & National Aeronautical mobile satellite (route) service units, Global & National notification message units, Global & National Air navigation services units, Global & National Air navigation services provider centers, Global & National Aerodrome operations /Aircraft operators units, Global & National Aeronautical operational control units, Global & National Airspace organization and management units, Global & National Air navigation planning and implementation units, Global & National Airport Operations Centre units, Global & National Aeronautical radio navigation service units, Global & National Aeronautical radio navigation satellite service units, Global & National Air route traffic control centers units, Global & National Aircraft surveillance systems and units, Global & National Airborne separation assistance systems, Global & National Airport surface detection equipment systems and Units, Global & National Airborne separation unit, Global & National Airborne separation in-trail follow systems, Global & National Airspace management units, Global & National Advanced surface movement guidance and control system, Global & National Airborne spacing systems and units, Global & National Air traffic control systems and units, Global & National Air traffic controller system and units, Global & National Air traffic control system command center, Global & National Air traffic flow and capacity management units, Global & National Air traffic flow management systems and units, Global & National Air traffic management control systems and units, Global & National Air traffic management requirements and performance panel, Global & National Aeronautical Telecommunication Network units, Global & National Air traffic situational awareness systems and units, Global & National Air traffic services message handling services systems and units, Global & National Airspace user systems and units, Global & National Airspace user operations units, Global & National Barometric vertical navigations units, Global & National Benefit/cost ratio systems and units, Global & National Basic area navigation units, Global & National Closely spaced parallel operations units, Global & National Controller-pilot data link communications systems and units, Global & National Continuous descent operations units and systems, Global Functional Airspace Block Europe Central Center, Global & National Final approach fix/final approach point units, Global & National Future air navigation systems and units, Global & National Flight data processing unit, Global & National Flight data processing system, Global & National Flight and flow information for a collaborative environment units, Global & National Flight information regions and units, Global & National Flight information exchange model units,

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Global & National Flight management computer sytems and units, Global & National Flight management system and units, Global & National Flight message transfer protocol systems and unit, Global & National Flight Operations Centre, Global & National Flight planning systems and Units, Global & National Free route airspace management systems and units, Global & National Flexible use of airspace management units, Global & National Flight update message systems and units, Global & National Air Navigation Industry Symposium units, Global & National air navigation plan units, Global & National General air traffic systems and units, Global & National

Ground-based augmentation systems, Global & National Ground based sense and avoid satellite units, Global & National Geostationary satellite units, Global & National landing system and units, Global & National navigation satellite systems, Global & National aviation plan initiative units, Global & National positioning system units, Global & National runway safety symposium systems and units, Global & National unique flight identifier systems and units, Global & National Aviation Conflict management systems and units, Global & National Collaborative decision-making units and consortiums, Global & National Central flow management units, Global & National Collaborative departure queue management units, Global & National Controller working position units, Global & National Computer aided design units, Global & National Control time of arrival systems and units, Global & National Collaborative actions for renovation of air traffic systems, Global & National Controlled flight into terrain systems and units, Global & National Cockpit display of traffic information systems and units, Global & National Continuous climb operations systems, Global & National Corporation for Air Navigation Services, Global & National Detect and avoid systems, Global & National Demand/capacity balancing systems and units, Global & National Departure clearance systems,

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Global & National Departure flow management systems, Global & National Data link initiation capability systems, Global & National Departure management systems, Global & National Dynamic management of airspace networks systems and centers, Global & National Data link operational terminal information service units, Global & National Departure planning information systems, Global & National Data link taxi clearance delivery units, Global & National AIS database systems, Global & National Electronic AIP systems, Global & National navigation overlay service systems, Global & National Enhanced air traffic management systems and units, Global & National Enhanced vision systems and unit, Global & National Minimum aviation system performance standards systems, Global & National Mixed integer linear optimization sytems and units,

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Global & National Microwave landing systems and units, Global & National Maximum take-off weight evaluation systems, Global & National Noise abatement departure procedure evaluation systems, Global & National airspace system and units, Global & National Non-directional radio beacon systems, Global & National Next generation air transportation systems, Global & National Next Generation of Aviation Professionals units, Global & National Network operations procedures, Global & National On-line data interchange systems and units, Global & National Optimized profile descent system and units, Global & National Operational service and environment definition units, Global & National organized track systems, Global & National Procedures for air navigation services, Global & National aircraft operations sytems and units, Global & National Performance-based navigation systems, Global & National test of air/ground data link systems, Global & National Performance improvement systems, Global & National Precision area navigations sytems, Global & National Height above threshold sytems, Global & National Human-machine interface systems, Global & National Head-up display I IDAC systems, Global & National Integrated departure-arrival capability systems, Global & National Interfacility data communications systems, Global & National Integrated departure route planner sytems and units, Global & National Instrument flight rules management units, Global & National Fuel Savings Estimation Tools, Global & National Instrument landing systems, Global & National Implementation and Interoperability systems, Global & National Internetworking protocol systems, Global & National Internal rate of return systems, Global & National Information service reference models, Global & National In-trail-procedure systems, Global & National ICAO weather exchange models systems, Global & National Key performance areas evaluation programs and systems, Global & National Local and sub-regional airspace management support systems, Global & National Light detection and ranging (aerial laser scans) systems, Global & National Lateral navigation systems and units, Global & National Aviation Letter of Agreement managments, Global & National Letter of Coordination managments, Global & National Localizer performance with vertical guidance systems, Global & National Low visibility procedures and systems, Global & National Traffic flow management systems, Global & National Traffic information service-broadcast systems, Global & National Trajectory management advisory, Global & National Traffic management initiatives, Global & National Traffic management units, Global & National Terminal radar approach control systems, Global & National Traffic synchronization systems, Global & National Temporary segregated area monitoring, Global & National Technical standard order Management systems, Global & National Aerodrome control tower units, Global & National Unmanned aircraft Surveillance Management, Global & National Unmanned aerial vehicle management system, Global & National User driven prioritization process systems, Global & National Visual flight rules sytems, Global & National Visual line-of-sight systems,

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Global & National Vertical navigation systems, Global & National Very high frequency Aviation systems, Global & National omnidirectional radio range systems, Global & National Enhanced visual separation on approach system, Global & National Wide area augmentation systems, Global & National Weather avoidance fields, Global & National World geodetic systems, Global & National Wake independent departure and arrival operations systems, Global & National Wake turbulence mitigation for arrivals systems, Global & National Wake turbulence mitigation for departures systems, Global & National Resolution advisory systems and units, Global & National Receiver autonomous integrity monitoring system, Global & National Route availability planning tool System, Global & National Area navigation systems, Global & National Required navigation performance System, Global & National Remotely piloted aircraft system, Global & National Remote tower centres and systems, Global & National Standards and Recommended Practices systems and units, Global & National Separation and airspace safety panel system, Global & National Satellite-based augmentation system, Global & National Service delivery management systems and units, Global & National Single European sky ATM research system, Global & National System-wide enhancements for versatile electronic negotiation Systems, Global & National Standard instrument departures Systems, Global & National Surface management Systems, Global & National Safety management systems and units, Global & National Aviation Special programme resources system, Global & National Safety risk management document systems, Global & National Self-separation Systems, Global & National Secondary surveillance radar systems, Global & National Scheduled time of arrival Systems and units, Global & National Standard terminal arrivals systems, Global & National Enhanced traffic situational awareness on the airport surface systems, Global & National Synthetic vision systems, Global & National System-wide information management systems, Global & National Time-based flow management systems, Global & National Trajectory-based operations systems, Global & National Traffic alert and collision avoidance systems and units, Global & National Air traffic flow and capacity management Systems, Global & National Airborne detect and avoid algorithms Systems, Global & National Airborne collision avoidance systems, Global & National Area control centre, Global & National Airport collaborative decision-making center, Global & National clearances and information systems and units, Global & National communications management and units, Global & National data exchange presentation systems and units, Global & National Automatic dependent surveillance systems, Global & National Automatic dependent surveillance systems, Global & National Aerodrome flight information service, Global & National Aeronautical fixed telecommunication network system, Global & National Air traffic message handling system.

Helpers Of Africa International

Kingdom Global Airline and Aviation Agency

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Global & National Aeronautical information conceptual model system, Global & National interfaculty data communications system, Global & National Aeronautical information publication systems and units, Global & National Enhanced traffic situational awareness during flight operations systems, Global & National information reference model systems, Global & National Aeronautical information services, Global & National Aeronautical information exchange model Systems-Units-Centres, Global & National Airport movement area Surveillance Systems, Global & National Arrival/departure management systems, Global & National Airspace user systems, Global & National Airspace user operations systems, Global & National Barometric vertical navigation systems, Global & National Basic area navigation Systems, Global & National Closely spaced parallel operations system, Global & National Controller-pilot data Systems, Global & National link communications system, Global & National Continuous descent operations systems, Global & National Cost-benefit analysis system, Global & National Closely spaced parallel runways Systems, Global & National Acronym Glossary detection Systems, Global & National Final approach fix/final approach point systems, Global & National Flight data processing storage systems, Global & National Flight data processing systems, Global & National Flight and flow information for a collaborative environment systems and units, Global & National Flight information region units, Global & National Flight information exchange model units, Global & National Flight management computer system, Global & National Flight management systems, Global & National Flight message transfer protocol systems, Global & National Flight object control systems, Global & National Flight Operations Centre Systems, Global & National Filed flight plan Systems, Global & National Flight planning systems, Global & National Free route airspace surveillance system, Global & National Flight update message System, Global & National Global Air Navigation Industry Symposium systems, Global & National air navigation plan systems and units, Global & National General air traffic detection systems, Global & National Ground-based augmentation system, Global & National Ground based sense and avoid systems, Global & National Geostationary satellite System, Global & National landing systems, Global & National navigation satellite system, Global & National Satellite-based augmentation system, Global & National Service delivery management systems, Global & National System-wide enhancements for versatile electronic negotiation system, – Global & National Standard instrument departures units, Global & National Surface management systems, Global & National Safety management systems and Centers, Global & National Special programme resources centers, Global & National Safety risk management documentation Center, Global & National Secondary surveillance radar Centers, STA – Global & National Standard terminal arrivals Units, Global & National Enhanced traffic situational awareness on the airport surface systems, Global & National Synthetic vision systems, Global & National System-wide information management, Global & National Time-based flow management Systems.

We shall seek to countries and airlines to improve the Civil Aviation Authority's (CAA) compliance with International Civil Aviation Organization (ICAO) safety standards, increase CAA's compliance with ICAO's security standard and enhance the main international airports' compliance with ICAO's security standards. The main outcome targeted for participating countries is to reach full compliance with ICAO safety and security standards, for their civil aviation authorities and major international airports. The activities and investments in each country range from capacity building to procurement of safety and security equipment. Given the small size of the air transport industry and the limited resources in each country, these goals can only be achieved through regional cooperation. This has been achieved with the establishment of Regional Aviation Safety Oversight Agencies (RASOAs). Furthermore the project team is monitoring progress under ICAO’s Cooperative Development of Operational Safety and Continued Airworthiness Program (COSCAP).

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally including support to the Countries Airports Authority for airport infrastructure improvements and enhancing security in airports, and support to the Countries Civil Aviation Authority for regulatory capacity building and specific investments in navigation aids and training equipment. In order to deal with the high growth in passenger flows resulting from a sudden economic upturn. Our credit supports will help airline companies and countries upgrade their air transport facilities along with the financing of a new passenger terminals and facilities at International Airports. Our projected boost in upgrade of security equipment including security fence and screening equipment as well as fire and emergency response, procurement and staff training on security management will help airports in countries obtain security clearance from the developed countries Transport Security Administration and represents another mile stone towards FAA IASA Category 1 Certification. We shall seek to support remarkable improvements in recruiting key professional staff, staffing levels along with dealing with inadequate inspectors in place still lack the skills necessary to provide safety surveillance required by ICAO. We shall support governments to empower countries Airports Authorities to have financial autonomy and now retain the revenues generated. We shall seek to support countries Aviation Authorities to restructure by raising pay packages to attract and retain qualified and experienced flight safety operations staff including taking charge to professionally taken over the responsibility of screening passengers and baggage to partner with police and security agencies.

We shall support authorities to separate the service provision from its regulatory function along with supporting bus and taxis transport system to and from airports together with the enlargement of parking spaces for efficient and excellent services. Countries will be supported and funded through grants or loans to establish Bus rapid Transit system along with rehabilitation and extension of airport runways, the pavement of the existing runway and full rehabilitation. Other projects that we seek to support include runway marking, construction of perimeter access road, repair and provision of new aeronautical ground lights provision of new filter drainage system on each side of the runway for the full length. We shall support new airports construction detailed design for new establishments and feasibility studies of other potential airports spots. Our infrastructure projects include upgrading of turning loops and taxiway entrances to safely accommodate modern aircraft-works along with improvements rehabilitation and expansion of the terminal building including the installation and upgrading of water and electricity facilities required for security, sanitation, firefighting and rescue operations along with water , power provision standby generators, modern navigation installation and tower equipment's with operational training for airport employees is ongoing. In order to increase efficiency and competitiveness of countries Airports Authority and baggage handling chains with strong passage interior transport system.

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally including working with consulting companies to provide technical advice throughout the preparation of design and bidding documents for the airport infrastructure rehabilitation. Some developments projects in countries have been packaged with components for railways, ports, and aviation together interconnecting all sectors in a hurb with an overall objective of the project is to improve transport connectivity and to support national economic integration. In addition, it seeks to restore and develop the national railway system connected to airports supporting state owned enterprises in the transport sector, and implementing a sector wide governance plan. Our aviation sector upgrade will involve the procurement and installation of ADS-B surveillance equipment by the Global and National Airways Management Agency (RVA), , a new category II ILS/VOR/DME systems, training for RVA personnel in air traffic control, and airport rescue and fire fighting services.

Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to run Kingdom Airways as a mega world airline, aviation school and a ultra-modern airport in Kenya home and headquarter of Helpers Of Africa International dubbed Kingdom Dream City maintaining a far sightedness in order to ensure that the funds are utilized well and runs in an Excellent Safe profitable and efficient way, procurement of aircrafts of various types ranging from small to mega dream liners from reputable brands and manufactures , Registration of airline licenses at National and international level along with airline training School, Setting up operation offices, hangers and owning airfields as a base for running airline, To hire competent staff for the airline In partnership with HR conduct sound interview to get very faithful careful experienced sober and faithful pilots-hostesses - engineers and induct them on work and ethics that does not infringe with organizational morals and ethics, To schedule all the flights coming in and going out, To manage the delays that take in the flight timings, To do security checks and then hire staff for their department, To provide expert training to all the staff, To make sure that all the government standards for safety and security are implemented, Designs of airport and for the runways if they find any specification out of order they can stop the operations on that runway till the problem is rectified, To coordinate with the in-flight crew while landing, In case of emergency landings, they have to take charge of the whole operation, Make a report on what went wrong and give it the proper authorities for inspection, have a wing of hiring out all manner of aircrafts from big –small-Jets- helicopters-top range, run an arm of humanitarian airline to help in disasters-health emergencies- special mission- missionaries, Constantly update themselves on newer and safer ways of coordinating operations, Plan organize and manage the work of subordinate staff of pilots crew & stewards / mechanics fleet controllers to ensure that the work is accomplished in a manner consistent with professional ethics and organizational requirements, Direct investigations to verify and resolve customer or complaints, Implement schedule and policy changes in the Air transport government regulations and international laws, Collaborate with other airlines, authorities and managers and staff members in order to formulate and implement policies- procedures- goals and objectives for airline profitability- compliance and management,

Monitor operations to ensure that staff members comply with administrative policies and procedures, safety rules, union contracts, and government regulations.

- Promote safe work activities by conducting safety audits, attending company safety meetings, and meeting with individual staff members.
- Develop criteria, application instructions, procedural manuals, and contracts for federal and state public transportation programs on speed governors, maintaince, insurance, uniforms, branding of vehicles in liason with communication and public relations departments.
- Monitor spending to ensure that expenses are consistent with approved budgets for staff, fueling, licences and maintenance.
- Direct and coordinate, through subordinates, activities of operations department in order to obtain use of aircrafts efficiently and economically.
- Inspect and monitor direct activities of staff performing repairs and maintenance to equipment, vehicles, and facilities
- Conduct investigations in cooperation with government agencies to determine causes of threats, accidents in loading, maintainance and in operation to improve safety procedures
- Analyze expenditures and other financial information in order to develop plans, policies, and budgets for increasing profits and improving services including hiring of aircrafts to other organizations and partnerships in shifting customer demands.
- Negotiate and authorize contracts with equipment, spare parts, body builders and materials suppliers, and monitor contract fulfillment efficiently. Establish a store of spare parts to be bought at whole sale prices and kept in all maintainance hangers.
- Supervise workers assigning tariff classifications and preparing billing.
- Set operations policies and standards, including determination of safety procedures for the handling special groups sick, risky, disadvantaged etc.
- Recommend or authorize capital expenditures for acquisition of new aircrafts according to departmental needs increase efficiency and services of operations department.
- Prepare management recommendations, such as proposed fee and tariff increases or schedule and season changes airfare and hire services.
- Conduct employee training sessions on subjects such as hazardous material handling, employee orientation, quality improvement and all other aspects of it.
- Participate in union contract negotiations and settlements of grievances.
- Direct procurement processes, including equipment research and testing, vendor contracts, and requisitions approval from our yards

- Ensuring ethics and brand of our aircrafts in partnership with airport securities when on hire by others that aircrafts are used for drugs, immoral or illegal behavior and that only gospel music is played in all the vehicles. No pilots should ever drink alcohol and fly or drugs they should all report to a central place to be confirmed sober from alcohol and fatigue before being entrusted with any aircraft.
- Making Decisions and Solving Problems -- Analyzing information and evaluating results to choose the best solution and solve problems.
- Getting Information -- Observing, receiving, and otherwise obtaining information from all relevant sources on suitable vehicle types & designs trends, maintaince and management
- Documenting/Recording Information -- Entering, transcribing, recording, storing, or maintaining information in written or electronic/magnetic form services schedules / insurance etc.
- Communicating with Supervisors, Peers, or Subordinates -- Providing information to supervisors, co-workers, and subordinates by telephone, in written form, e-mail, or in person running a centralized communication to call pilots, staff and avail them at short notice to reschedule and enhance communication and accountability disciplines.
- Ensure all vehicles are well inspected at purchase fitted with speed governors, music systems of worship and trucking devices along all other accessories as per order.
- Updating and Using Relevant Knowledge -- Keeping up-to-date technically and applying new knowledge in the transport department & sector.
- Communicating with Persons Outside Organization -- Communicating with people outside the organization, representing the organization to customers, the public, government, and other external sources where a major crises involving public use Public relations & Communication & Central Security department networked to Air traffic agencies to resolve issues and address media .Maintain a strong data base to to engage people in writing, or by telephone or e-mail transport
- Evaluating Information to Determine Compliance with Standards -- Using relevant information and individual judgment to determine whether events or processes comply with laws, regulations, or standards.
- Scheduling Work and Activities -- Scheduling events, programs, and activities, as well as the work of others.
- Organizing, Planning, and Prioritizing Work -- Developing specific goals and plans to prioritize, organize, and accomplish your work.
- Judging the Qualities of Things, Services, or People -- Assessing the value, importance, or quality of things or people.
- Guiding, Directing, and Motivating Subordinates -- Providing guidance and direction to subordinates, including setting performance standards and monitoring performance.
- Resolving Conflicts and Negotiating with Others -- Handling complaints, settling disputes, and resolving grievances and conflicts, or otherwise negotiating with others
- Coordinating the Work and Activities of Others -- Getting members of a group to work together to accomplish tasks.
- Training and Teaching Others -- Identifying the educational needs of others, developing formal educational or training programs or classes, and teaching or instructing others.
- Monitor Processes, Materials, or Surroundings -- Monitoring and reviewing information from materials, events, or the environment, to detect or assess problems.
- Performing Administrative Activities -- Performing day-to-day administrative tasks such as maintaining information files and processing paperwork.
- Inspecting Aircrafts Equipment, Structures, or Material -- Inspecting equipment, structures, or materials to identify the cause of errors or other problems or defects.
- Establishing and Maintaining Interpersonal Relationships -- Developing constructive and cooperative working relationships with others, and maintaining them over time.
- Performing for or Working Directly with the Public -- Performing for people or dealing directly with the public. This includes serving customers in restaurants and stores, and receiving clients or guests.

- Provide Consultation and Advice to Others -- Providing guidance and expert advice to management or other groups on technical, systems-, or process-related topics.
- Identifying Objects, Actions, and Events -- Identifying information by categorizing, estimating, recognizing differences or similarities, and detecting changes in circumstances or events.
- Estimating the Quantifiable Characteristics of Products, Events, Information -- Estimating sizes, distances, and quantities; or determining time, costs, resources, or materials needed to perform a work activity.

Mandate of Kingdom Global Airline & Aviation Agency:

- Analyzing Data or Information -- Identifying the underlying principles, reasons, or facts of information by breaking down information or data into separate parts.
- Interacting With Computers -- Using computers and computer systems (including hardware and software) to program, write software, set up functions, enter data, or process information.
- Developing and Building Teams -- Encouraging and building mutual trust, respect, and cooperation among team members.
- Processing Information -- Compiling, coding, categorizing, calculating, tabulating, auditing, or verifying information or data of fleet, parts, staff etc.
- Maintain electronic databases of sales, registration, inspections and maintenance of fleet management.
- Ensure fleet availability to meet all requests by scheduling, forecasting and surveying current user trends.
- Maintain knowledge and utilize all fleet information and user surveys to forecast new requirements.
- Arrange fleets and fleet operational staff to provide support and schedule Special Event Planning.
- Perform aircraft registration, insurance and CHP formalities and documentation regarding induction of new vehicles in existing fleet.
- Oversee routine and ad hoc maintenance, obtain tags for new vehicles and renew old ones to ensure schedule fleet management.
- Monitor and ensure fleet operation in compliance with local, state and international rules and regulations.
- Maintain and monitor data management system to organize fleets as per various schedules and requests.
- Streamline and monitor fuel purchase system with assistance of fuel companies and airport authorities.
- Participate in various workshops and educational programs and maintain knowledge on all industry relevant publications.
- Do a magazine of transporters supported by organization transport activities.
- Develop and implement standard operational standards to maintain aircrafts by advocating best practices in industry.
- Provide direction to department staff to regulate budget cycle requirements and control budgeting process.
- Plan, process and execute aircraft purchase and vehicle replacement through efficient settlement.
- Plan and prepare annual budget, expenditures and analyze all financial objectives.
- Facilitate and implement corrective actions and capacity building to manage entire fleet to achieve company objectives.
- Offer guidance to contracted drivers on the best ways to maximize their earnings.
- Ensure that all drivers understand and procure the licenses and permits they need to legally carry loads to customer destinations.
- Collaborate with human resources and marketing to add quality employee drivers and contracted drivers to the fleet
- Work closely with the maintenance team to find ways to reduce downtime due to repairs or lack of routine maintenance.
- Ensure that all load paperwork associated with each run is accurate and submitted to the proper people
- Hiring, training and evaluating engineers and support staff are the main duty of this position. Since the aircraft industry is constantly evolving, ensuring staff undergoes continuing education is imperative. Auto shop service managers must also stay abreast of warranty information and pricing changes.
- Marketing and setting business goals is a critical duty of this department.

- Supervising a team of engineers and international networks of engineers of other airline for updates and skill sharpening
- Organizing bookings and assigning work to mechanics.
- Ordering parts, Checking the quality of work, Controlling a budget

OTHER OBJECTS, PROJECTS AND AREAS OF FOCUS ON NATIONAL AND GLOBAL AVIATION.

1. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally including to improve land, maritime and air transport sector management. Technical assistance will be provided to the Governments of for the implementation of institutional reforms, sector capacity strengthening and promotion of PPP for the development of transport infrastructure.
2. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally including the aviation component of the project is specifically concerned with institutional support and capacity building for the air transport subsector.
3. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally including by enhancing the quality of air transport services in countries by increasing traffic-handling capacities in Airports.
4. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally by strengthening countries air transport in the context of international competition and international standizition.
5. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally towards critical link in the chain of services required and developed by tourism-related businesses, manufacturing industries and export-oriented specialty agriculture, contributing to their international competitiveness. As competition among alternative routings intensifies, efficiency, that is, quality of service vs. connection costs, of connecting airports is critical to the competitiveness of carriers based at or serving such airports.
6. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally to upgrading to FY2011 airport systems of operation along with overall investment for the airports to correspond to investment related to safety and security. Our aviation development projects aims, through better infrastructure and key equipment, to enhance the safety and security of the airport and improve conditions for operational reliability. This will allow flight operation under conditions which now prohibit landings and departures.
7. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally projects support for Airports Improvement Program, through the carrying out of the necessary civil works and supervision activities for the construction of a new taxiway, apron, control tower, operations building, rescue and firefighting buildings, an access road, and a passenger terminal; and the acquisition and installation of aviation control, rescue and firefighting equipment.
8. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations globally support to disaster Vulnerability Reduction making airports as gateways to provide emergency relief locally as well as regionally by building relief warehouses next to airports for transits storage because many airports don't have adequate storage to position traffic support in emergency situations along with critical investments that are required both to maintain an adequate emergency response capability and to comply with operational standards as required by the International Civil Aviation Organization (ICAO). Replacement and upgrade of aging emergency response equipment and deficiencies in operational equipment have been cited in many airports this will be an area.

9. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations including airport certification inspections and must be addressed to maintain the operational certification. Absent investment in these purchases, Grenada and the region risk a downgrading of its airport certification. A downgrade in operational certification would prohibit most commercial aircraft from using the current facilities in airports in countries, crippling communications and tourism activities. The equipment identified under the project addresses the major deficiencies noted, allowing the airport to comply with ICAO requirements, and improving operational resilience and response capacity to disaster impacts. We shall support to equip airports to mitigate the risk of natural disasters.
10. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in nations to repair airports that have been affected by earth quakes, floods, identification missions to review Haiti's air transport sector The country's air transport sector has proven to be a key element for conducting the humanitarian relief efforts to make airports to be operational entry point to deploy relief personnel, equipment and materials. While the runway and apron were not affected during the quake, preexisting cracks and damages of the pavement represent a danger to aircrafts and passengers.
11. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in lighting systems and power supply are insufficient for night operations, and navigational aids (ILS/VOR), passenger backup systems along with reconstruction of ground - air communications tower, upgrades of VOR (PAP, OBN), verification of ILS (IMG), repair of runway lights at PAP, financing of associated cost for air traffic controllers training, and construction of a runway end safety areas.
12. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors of country's transport and logistics issues, packaging includes targeted investment lending for key reforms, and to respond to needs for improvement of infrastructure and its operation to reduce the cost of trade and transport logistics to raise service quality to international standards enhance export competitiveness and accelerate industrialization.
13. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to help by providing the analytical underpinning necessary to implement the reform agenda, and by preparing investments that are an integral component to address the identified development issues, a civil aviation component for the National Trade and Transport Facilitation Project, development of Air Transport Master Plan for countries and an air safety improvement component.
14. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to improve operational safety by financing several GNSS-based instrument approaches, and by assessing the regulatory oversight by the CAA in view of ICAO audits.
15. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by supporting responder Rescue Fire units and Financing of fleet renewal program.
16. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors management system upgrades that include use of high international standards of safety and technical equipment of the airport, modern check-in procedures, customs legalization and passport control centers
17. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in airport expansion projects the airport's capacity and manage increasing demand. The investment will be used for construction of a new runway and taxiway suitable for larger aircraft, expansion of the existing passenger terminal, installation of additional safety equipment and repair of the existing runways among many other areas of focus to capital expansion program, benefit the country's economy and help develop its tourism industry, a key earner of foreign exchange for many countries.
18. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to provide worker training, investment knowledge and general management guidance, to strengthen existing airline companies and provide them with efficient equipment and resources to implement a turnaround and growth strategy for countries airlines carriers.

19. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors including acquisition of aircraft and spare parts, refurbishment cost, a hangars crew training costs, consolidation of various overhead and common functions of the airlines, funding of start-up and expansion expenses until the airlines' turnaround and to overhaul their route network, finance a new fleet and consolidate their commercial, procurement, administrative and financial functions.
20. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to stimulate demand through improved frequencies, increase market shares and revenue growth, and will implement cost reduction initiatives improving their competitive position to help fill voids in national and regional air transport services, while catalyzing further progress with the much needed consolidation and co-operation in the region's air transport industry.
21. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors towards development of aviation industry and tourism in countries through polished airline undertaken investments plan to replace its older aircrafts with new and more fuel-efficient aircraft types to help the airline to compete more effectively and deliver better services to customers.
22. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors which will provide the airport with new Common Use Terminal Equipment, which increases the flexibility of the check-in system, and improves the interface between ground handling services, airline passenger handling, and the airport operator. The project also comprises a new baggage handling and screening system.
23. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in expanding existing airports have recorded strong traffic growth in recent years, and some face severe congestion. More growth is expected as a result of planned tourism and manufacturing developments, and of the outcome of the negotiations for an open skies agreement with global funders.
24. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in airport operation and management, to operate the existing Airports, and to build, finance, and operate a new airports with ample space for future expansion.
25. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to support capital expenditures for airports and airlines especially with the effects of Covid 19 for operations and management responsibilities to the private sector as loans and grants.
26. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors towards full divestiture Ownership, operations, and investment responsibilities are fully transferred to the private sector airports and airlines many have loans that keep them tied in operations that don’t favor healthy operations. We shall package buy off of loans and do joint ventures with potential high profiled airlines
27. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by packaging affordable and friendly funding with a blend of first-phase BOT followed by public offering can maximize benefits through our Public-Private Partnerships (PPP) Advisory Mandates in Airlines as the airline industry has proceeded along this privatization path over the last 20 years including national carriers.
28. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by supporting fixed-cost structure: Airlines tend to build up a legacy-costs base (staff and fleet) that is difficult for a new owner to manage. In addition, fuel costs are beyond management’s control. During the recent oil price spike, they accounted for as much as 30% of the cost base.
29. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors towards supporting price-sensitive product: Demand for travel is highly elastic, especially in tourist markets. In recessions, people forgo vacations for other consumer goods. Conversely, price reductions increase passenger numbers dramatically.
30. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors towards complicated demand chain. Customers often purchase tickets through travel agents, frequently in a package with hotel accommodations. Since airlines rely on these other actors for their sales, if there are bottlenecks elsewhere the aviation sector suffers.

31. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors mitigate overregulation: Bilateral agreements between governments, still prevalent in many parts of the world, prevent competition from functioning normally. Open skies are being adopted, but not in all countries.
32. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by participating in airline of year awards through our Kingdom Global Honor Agencies by motivating to airlines to improve excellence in the sector.
33. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by funding investors to provide a one-stop solution to governments covering all aspects of the proposed transaction. One of the distinguishing features of value addition is its ability to balance private and public sector interests and take into account sustainable long term economic and social effects.
34. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors as the Lead Transaction Advisor to assist with the implementation of the PPP in the Airline transaction by offering securities and insured guarantees acting as a honest agent, ensuring transparency in the bidding process, and coordinating the entire transaction as Lead Advisor.
35. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to understand investor appetite for Projects , and structure the transaction in an optimum manner vetting bids from international consortia, and following a detailed technical evaluation proceeding to the financial round.
36. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors packaging eco-friendly passenger terminal building and operational techniques leading it to obtain a stamp of approval an internationally-recognized green building certification system; this would be a first within the region. Such projects in countries will provide direct employment through construction and airport operations, and indirect employment through increases in tourism and the development of knowledge-based industries in the area.
37. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by being a Multilateral Investment Guarantee Agency covering projects in a broad range of sectors, with projects in infrastructure accounting outstanding portfolio. Infrastructure development is an important priority for MIGA, given the estimated need for US$230 billion a year solely for new investment (maintenance needs are of a similar magnitude).
38. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors This will also deal with the rapidly-growing urban centers and underserved rural populations in developing countries guarantee for a performance bond coverage against the risk of expropriation (the wrongful call of the performance bond). This will help government sees airport privatization as a key factor in its effort to expand employment opportunities, and create a modern transportation facility to serve as the country's gateway to the world along with enhancing and expanding tourism, another government goal.
39. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors towards new infrastructure, including upgrades to the current terminal, construction of a new passenger concourse, expansion and addition of new aircraft aprons and taxiways, and creation of a hotel and world-class retail center within the existing airport perimeter.
40. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by issuing guarantees for the investors' respective equity investments in the project enterprise. This strategic Development Corporation plan will cover shareholder loans while providing coverage against the risks of Transfer Restriction, War and Civil Disturbance, and Breach of Contract this will be key to economic driver for sustainable economic development of the metropolitan region of countries which lack guarantees and securities to implement projects related to infrastructure.
41. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors will support ICAO that enjoy a longstanding, strong, and cooperative relationship on various air transport issues to provide safety and security audits and supervision services for the our Bank’s projects in identifying needs and priorities of air transport projects in various countries.

42. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors on management of important areas of focus in aviation safety, climate change, aviation safety, and aviation security, and followed other issues such as policy and facilitation. Our agency and bank will hold numerous bilateral meetings with client countries and organizations, as well as partner states and organizations to discuss current and potential new projects and research along with facilitating of signing of memorandum of understanding to create a framework and path forward to launch the Global Safety Information Exchange.
43. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors support IATA to keep a strong cooperation by pooling and selecting the most relevant information for improving safety by risk reduction from each organization's data collection. The Bank will coordinate its air transport development efforts in the domain of safety with organizations such as ICAO, IATA, the US DOT, EC and other global players.
44. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors will support COCESNA, which has had an excellent track and safety record over fifty years in providing air traffic control services, is considering various options for modernizing its ATC infrastructure.
45. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors of aviation as an economic development catalyst, and airports and airlines as drivers of urban renewal and economic development by creating a platform of dynamic interactions between the industry leaders, and stakeholders on Environmental Challenges and Opportunities for the Industry, and on Security Issues, Tourism and Air Services Summit maping out Global Route to Infrastructure Development.
46. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors supporting engagements of stakeholders in evaluating the state of the aviation industry, security and facilitation, aviation and the environment, "Protection of the Environment: Technological & Operational Solutions to mitigate Covid 19 effects along with other future challenges.
47. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors in staff empowerment and refreshment to remain current on their pilot's qualifications, they regularly fly and undergo required refresher training.
48. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors to support humanitarian airlines ,programs and projects in aviation on health, disaster relieve and our airline Kingdom Airline will have a charity arm of operation in this area along with missionaries, special missions services .The most rewarding way of maintaining currency is to provide community service by providing free air transportation to people of all ages whose medical needs – evaluation, diagnosis, and treatment – can only be met by health care facilities far from their homes such us medical relief through our health and disaster agency to provide timely travel to patients who can't withstand traveling long distances by automobile, rail, or bus, and who do not have the financial means to purchase suitable alternative transportation. Kingdom Airline will run smaller private aircraft to be better to accommodate those patients whose condition could worsen if exposed to the re-circulated air on commercial flights, and who need efficient point-to-point transport.
49. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors providing sustainable Airship Logistics for the Developing World.
50. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors by supporting creativity and innovations in new aviation products, technology, creativity , including the environmental benefits of new technology. We shall support the formation and establishment of aviation institutions and curriculums from lower level to make aviation interesting for coming generations including Aviation clubs, Aircraft Toys for children to be excited about aviation industry.

51. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions and organization in this sectors assessment and mitigation from air pollution that causes excess emissions such us Airships that could potentially provide transoceanic service at speeds and prices comparable to trucking, with energy consumption and carbon emissions lower than shipping for markets that have no such mid-range option. Both fuel consumption, greenhouse gas emissions could be reduced more than 90% compared to jet transportation, and by 75% compared to trucking, while transport times are reduced on average by 62% compared to container ships. Importantly, little to no infrastructure will be required, allowing remote and isolated communities to access global markets without the need for lengthy, environmentally damaging, and costly transportation infrastructure upgrading projects.
52. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sectors towards Global Air Traffic Control Efficiency and safe air transport services that have become a basic ingredient for economic development around the world. However, the industry has come under increased scrutiny given its growing environmental impact, especially fostering the effect of climate change by its CO2 emissions. One of the low hanging fruits of reducing CO2 emissions are measures achieving fuel efficiency in flight operations. More direct routings or continuous descent approaches are two examples of effectively introducing such measures. In terms of safety, air transportation has reached a remarkable record. Nevertheless, air traffic surveillance in developing countries is generally very modest as many States cannot afford radar coverage for effective surveillance. As a result, many emerging are still controlled by "procedural air traffic control", which is inefficient and less accurate. New surveillance technologies, so called Automatic Dependence Surveillance System Broadcast (ADS-B), are currently deployed in the US and some other areas around the world. These new, innovative technologies provide very accurate surveillance capability at a fraction of the cost of traditional radar systems (compare it with the introduction of cell phones, substituting land lines).
53. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sectors in a strategic plan that is focused in the air transport sector strategy consisted in definition of the core responsibility of designated ministries of Transport including recommendations for a sector policy, definition of the responsibility of a future Civil Aviation Authority, review and policy recommendations on the national air traffic management entity, considerations for restructuring and/or granting of concessions for the country's main and domestic airports, and sector policy recommendations concerning the national carrier Air and its competitive and regulatory environment.
54. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector mission preparedness and presented a technical note that include airline restructuring and privatization options, necessary investments in airport and ATC infrastructure, proposed construction of a new airport well developed domestic air traffic service, maintenance of Airports, investments in infrastructure (runway paving, lighting, and telecommunications), the development of an effective air traffic management system.
55. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support to analyze and report trends, issues and major policy developments of international civil aviation, consider the relevance and impact of these trends issues, and policies for developing countries, respond to inquiries about our support in air transport related projects, and meet with representatives of client countries and relevant international organizations to discuss air transport related matters has prepared an internal publication of the observations and speaker. A series of presentations followed which focused on air transport and economic development, policies, management and technologies, air traffic carriers, and development cooperation in civil aviation. The workshop underlined the importance of air transportation in economic development. In fact, air transportation's outreach and economic effect directly influence the outcome of the progress of reaching the MDG in many countries.
56. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector oversight and regulation, meeting infrastructure requirements, and providing a sustainable environment for air carriers and services create a working group ICAO with the objectives of exchanging data and information on the developmental needs for aviation oversight and infrastructure, preparing an outline of needs for support of client countries, planning and coordinating support activities between donors and partners.

57. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by supporting Airport Authorities in providing facilitative infrastructure for aviation services between countries and the outside world, Administer control and manage aerodromes, Provide and maintain facilities necessary for efficient operations of aircrafts, Provide rescue and firefighting equipment and services, Construct operate and maintain aerodromes and other related activities, Construct or maintain aerodromes on an agency basis on the request of any Government Department, Provide such other amenities or facilities for passengers and other persons making use of the services or facilities provided by the Authority as may appear to the Board necessary or desirable and approve the establishment of private airstrips and control of operations thereof.
58. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support cargo Infrastructure at Airports managing the development and maintenance of airport infrastructure, safety and security services. However, services such as ground handling and ramp services are managed through concessions where the authority strives to achieve its mandate through continuous development of the airports and airstrips in the country.
59. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting Infrastructure to accommodate wide bodied aircrafts at any one time, transit sheds equipped with state of the art cold rooms, Airfreight Handling, Cargo Handling, Trans Global Cargo Center, expansion roads, improving lighting, water and sewerage systems and provided adequate parking facilities.
60. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector in Safety & Security installation of up-to-date, top notch security systems for screening cargo and also put in place safety procedures that are in line with ICAO recommendations.
61. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector meeting World Standards other regulators such as countries Civil Aviation Authority, National Bureau of Standards, Nations Plant Health Inspectorate Services, Nations Wild Life Services, Veterinary Department and Port Health working very closely to ensure that international standards are met.
62. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting private sector participation exclusive freight area specially earmarked for operators who deal in cut flowers and fresh produce seeking to ensure that the delicate produce is handled at a strategically dedicated area within the Airport next to the cargo terminals. We also work closely with recognized clearing & forwarding agents who utilize these facilities to hasten the processes for the fresh produce before loading onto the Aircraft.
63. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector role of Nations Airports Authority in economic development as part of its mandate to deliver in objectives of Vision 2020 to 2050 and enhance technology in agriculture and industry or food security and national growth. These include Infrastructure development, Business process automation, Public-private partnerships, Expansion of cargo facilities, Aggressive marketing of airports and Customer service focus.
64. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to focus on expansion into increased aircraft, passenger and cargo traffic, expanded cargo apron with capacity to handle more aircrafts, private concessionaires who have developed packing houses for horticultural products and flowers, Animal holding area to facilitate import and export of animals, All these facilities have cold storage facilities that handle import, export, fresh produce and specialized cargo, with a capacity to handle tonnes of cargo.
65. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector through ICAO to document the list of standards, procedures, guidance material and approval documents needed to get the full benefit of the operational improvement.
66. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector Standardization Roadmap by supporting ICAO working on a Standardization Roadmap to utilize to the maximum extent appropriate and subject to the adequacy of a verification and validation process, the work of other recognized standards making organizations in development.

67. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting compliance of suitable high level principles or guidelines to identify essential Modules at a global level will be necessary considering safety and interoperability as basic targets, such principles providing direct and tangible safety improvements, interoperability of ground-to-ground systems, recognizing the desirability of automation systems to be able to effectively communicate globally, interoperability of air-to-air systems, recognizing the need for airborne applications to be able to interact without restriction.
68. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector will assess the status of all Modules based on the level of deployment and the updated availability of the technology and standards turning ideas in action points personnel needs, and to assist the global aviation community in attracting, training, educating and retaining the next generation of aviation professionals. It is therefore critical that the concepts being developed within the aviation sector take into account the strengths and weaknesses of existing and future skilled personnel at every juncture. All actors with a stake in a safe air transportation system will need to intensify efforts to manage risks associated with human performance and the sector will need to proactively anticipate interface and workstation design, training needs and operational procedures while promulgating best practices.
69. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector working with stakeholders through ICAO under to develop training manuals for Air Traffic Controllers (ATCOs) and Air Traffic Safety Electronics Personnel (ATSEPs) utilizing competency-based training methods. ICAO has long recognized these factors, and thus the consideration of human performance in the context of the Block Upgrades requirements will continue to evolve through State Safety Programme (SSP) and Industry Safety Management Systems (SMS) approaches. Training, Recruiting and Human Performance Considerations Aviation professionals have an essential role in the transition to, and successful implementation. The system changes will affect the work of many skilled personnel in the air and on the ground, potentially changing their roles and interactions and even requiring new proficiencies to be developed. Furthermore, with the expected growth of aviation, it is critical that enough qualified and competent personnel are available to ensure a safe and efficient aviation system as part of the Next Generation of Aviation Professionals (NGAP) programme.
70. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector working with ICAO stakeholders to create greater awareness of the impending shortages of personnel, to forecast both global and regional aviation welfare establishing a rolling global planning horizon. The resultant framework is intended primarily to ensure that the aviation system will be maintained and enhanced, that air traffic management (ATM) improvement programmes are effectively harmonized, and that barriers to future aviation efficiency and environmental gains can be removed at a reasonable cost. In this sense, the adoption of the safety methodology significantly clarifies how the airspace users should plan for future equipage.
71. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector safety by inherent flexibility in the methodology allows States to implement Modules based on their specific operational requirements. Regional and State planners should identify those Modules which provide any needed operational improvements. Although the Block Upgrades do not dictate when or where a particular Module is to be implemented, this may change in the future should uneven progress hinder the passage of aircraft from one region of airspace to another. The regular review of implementation progress and the analysis of potential impediments will ultimately ensure the harmonious transition from one region to another following major traffic flows, as well as ease the continuous evolution towards the performance targets.

72. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector in change management to the Block Upgrades evolution should include human performance-related considerations in the areas of Initial training, competence and/or adaptation of new/ active operational staff, New roles and responsibilities and tasks to be defined and implemented, Social factors and management of the cultural changes linked to increased automation. Human performance needs to be embedded both in the planning and design phases of new systems and technologies as well as during implementation. Early involvement of operational personnel is also essential. Sharing of information regarding the various aspects of human performance and the identification of human performance risk management approaches will be a prerequisite for improving safety outcomes. This is particularly true in today's aviation operational context and the successful implementation of the Block Upgrades and other new systems into the future. Widespread and effective management of human performance risks within an operational context cannot be achieved without a coordinated effort from regulators, industry service providers, and operational personnel representing all disciplines.
73. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector according to their needs and operational and geographical environment of ICAO partnership to mobilize Multi-disciplinary Working Group (MDWG) developed guidance material on how to set up implementation, considering economic impact assessment, business cases, cost-benefit analyses, financial instruments, incentives and the relation with ICAO policy documents, to assist States, stakeholders and regions in implementing the global safety stardards.
74. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector developed to provide States and different stakeholders with financial guidance for the implementation of global safety. It also provides a methodology for financing a project.
75. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting ICAO to continue to develop guidance material for the implementation of global safety standards making it available to stakeholders globally.
76. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting logical architecture is providing logical architecture complements upgrades while also providing a graphical linkage between safety Modules and the elements of the Global Operational Concept.
77. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector Modules and the intended operational environment and the expected performance benefits Continuation of the work on the architecture to further mature and, when and where needed, detail it, will be instrumental in scoping the work on the Modules, Understanding and maintaining interdependencies and interoperability issues, Providing "situational awareness".
78. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector of aviation system performance to prioritize future investment and to improve system efficiency, adoption of a performance-based approach in the spirit of ICAO set of performance indicators is used that also allows for monitoring of current operations.
79. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector encouraging all States to collectively use a performance-based approach for implementation based on Agreement on a simple set of Key Performance Indicators (KPIs), based on existing best practices in more mature regions that have already published performance information and on ICAO publications, Initial development of guidance material, illustrating the benefits of a performance-based approach and explaining the data collection, calculation and analysis required for the selected Illustratrating links between safety Modules and exchange of experience and best practices at regional and sub-regional levels.

80. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to update of performance related ICAO manuals and development of additional guidance material on data collection, data analysis, define a global performance baseline, based on States' performance monitoring and reporting, against which future progress will be measured, Standardization of performance data and enhanced data exchanges to automate and reduce the cost of performance data collection and processing. This work could benefit from existing work on exchange models a performance-based approach is results-oriented, helping decision makers set priorities and determine appropriate trade-offs that support optimum resource allocation while maintaining an acceptable level of safety performance and promoting transparency and accountability among stakeholders. In promoting a performance-based approach, ICAO recommends that States utilize a focused set of Key Performance Indicators that provide the means of identifying shortfalls and prioritizing investments.
81. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector in assessing performance in key areas of efficiency, capacity and predictability along in sharing performance issues and best practices at a global level, develop business cases for safety module implementation with investment, determine timeliness and appropriateness (geographical and fleet-wise) of ASBU Module deployment according to a performance-driven approach, Manage readiness of safety Modules for deployment (driving the required speed of R&D, global standardization and development of ICAO provisions), Measure and document the performance benefits brought by the Modules implemented.
82. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector cooperative surveillance will use technologies currently available using refinements to capabilities may be identified, it is expected that the surveillance infrastructure currently foreseen could meet all the demands placed upon it. The airborne part of the surveillance system will become more important and should be "future proof" and globally interoperable in order to support the various surveillance techniques which will be used. There will be growing use of downlinked aircraft parameters bringing clear presentation of call-sign and level, Improved situational awareness, Use of some downlinked aircraft parameters, altitude reporting to improve surveillance tracking including safety nets, Display of vertical stack lists, Reduction in radio transmission (controller and pilot), Improved management of aircraft in stacks, Reductions in level busts, Functionality will migrate from the ground to the air, The twin demands of increased traffic levels and reduced separation will require an improved, There will be significant deployment of cooperative surveillance systems, Ground processing systems will become increasingly sophisticated as they will need to fuse data from various sources and make increasing use of the data available from aircraft, Deployment of cooperative surveillance systems will expand, Cooperative surveillance techniques will enhance surface operations, Additional safety net functions based on available aircraft data will be developed, It is expected that multi-static primary surveillance radar (MPSR) will be available for ATS use and its deployment will provide significant cost savings, Surveillance data from various sources along with aircraft data will be used to provide basic safety net functions. Surveillance data will also be available for non-separation purposes. Remote operation of aerodromes and control towers will require remote visual surveillance techniques, e.g. cameras, to provide visual situational awareness. This visual situational awareness will be supplemented with graphical overlays such as tracking information, weather data, visual range values and ground light status, Cooperative surveillance techniques will be dominant as primary surveillance radar (PSR) use will be limited to demanding or specialized applications.
83. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector primary surveillance radar will be used less and less as it is replaced by cooperative surveillance techniques and space-based is likely to be fully available.
84. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector technology will begin to be used for basic airborne (delegated) separation, Basic airborne situational awareness applications, advanced situational awareness applications will become available.
85. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector with ICAO to focus its efforts to ensure effective and coordinated implementation. The need for guidance material, workshops and symposia on all aspects of safety including regulatory oversight issues the design and validation of procedures, aircraft operations approval, stakeholder consultation, etc

86. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector refresher Online learning packages, In classroom courses to ensure that updated safety requirements and Standards are fully understood and properly implemented through ICAO focus its efforts on the development and implementation of performance based navigation , continuous descent operations, continuous climb operations and air traffic flow management Collaborative Air Traffic Flow Management•
87. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector active, coordinated support for continuing Standards development and amendment and Support for a harmonized approach to regional performance based navigation implementation. Specific products to assist a State with its navigation implementation needs and assistance to ensure harmonized and integrated implementation of related technologies and support tools to optimize performance capability objectives products through online real time notifications and through our navigation website, and ICAO continues to coordinate with all aviation stakeholders to identify new initiatives, develop more in-depth guidance material and create additional training courses (online and classroom), as required, to support high-level requirements for navigation implementation.
88. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support the path to achieve global interoperability deployment of such Modules in the earliest available time frame will result in maximum benefits for the aviation stakeholders and implementations of such Modules should take place around the same time periods.
89. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to provide short-term improvements to existing airborne collision avoidance systems to reduce nuisance alerts while maintaining existing levels of safety. This will reduce trajectory perturbation and increase safety in cases where there is a breakdown of separation increased effectiveness of ground-based safety nets.
90. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to enable monitoring of flights while airborne to provide timely alerts to air traffic controllers of potential risks to flight safety (such as short-term conflict alerts, area proximity warnings and minimum safe altitude warnings).
91. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support increased capacity and efficiency through interval management Interval management improves the management of traffic flows and aircraft spacing. Precise management of intervals between aircraft with common or merging trajectories maximizes airspace throughput while reducing workload along with more efficient aircraft fuel burn enhancing ground-based safety nets on approach.
92. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to enhance safety by reducing the risk of controlled flight into terrain accidents on final approach through the use of approach path monitoring facilitating flexibility and efficiency in descent profiles.
93. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to enhance vertical flight path precision during descent, arrival, and enables aircraft to fly an arrival procedure not reliant on ground-based equipment for vertical guidance including Improved traffic synchronization and initial trajectory-based operation to improve the synchronization of traffic flows at en-route merging points and to optimize the approach sequence through the use of safety capability and airport applications.
94. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector provision of meteorological information supporting enhanced operational efficiency and safety Global, regional and local meteorological information: a. forecasts provided by world area forecast centres, volcanic ash advisory centres and tropical cyclone advisory centres.
95. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support safety aerodrome warnings to give concise information of meteorological conditions that could adversely affect all aircraft at an aerodrome, including wind shear to provide information on occurrence or expected occurrence of specific en-route weather phenomena which may affect the safety of aircraft operations and other operational meteorological information.

96. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to provide routine and special observations and forecasts of meteorological conditions occurring or expected to occur at the aerodrome. This information supports flexible airspace management, improved situational awareness and collaborative decision making, and dynamically-optimized flight trajectory planning. This module includes elements which should be viewed as a subset of all available meteorological information that can be used to support enhanced operational efficiency and safety Applicability Applicable to traffic flow planning, and to all aircraft operations in all domains and flight phases, regardless of level of aircraft equipage.
97. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards increased sector capacity efficiency in routes/tracks and flights can be separated by reduced minima, allowing flexible routings and vertical profiles closer to the user-preferred ones.
98. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector routes/ tracks and flights can be separated by reduced minima, allowing flexible routings and vertical profiles closer to the user-preferred ones permiting easier route change. Allows for prioritization of incoming messages there is a possibility of modifying task allocation in such a way that the Planning Controller may support the Tactical Controller in carrying out data link communication with the pilots.
99. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector in securing safety, Increased controller's situational awareness, based safety nets like cleared level adherence monitoring, route adherence monitoring, danger area infringement warning and better support to search and rescue.
100. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support Increased situational awareness reduced occurrences of misunderstandings solution to stuck microphone situations business case has proven to be positive due to the benefits that flights can obtain in terms of better flight efficiency (better routes and vertical profiles, better and tactical resolution of conflicts) to provide enhanced safety and efficiency of surface operations.
101. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to provide enhancements for surface situational awareness, including both cockpit and ground elements, in the interest of runway and taxiway safety, and surface movement efficiency. Cockpit improvements including the use of surface moving maps with traffic information for flight crew traffic situational awareness on the taxiways and on the runway. Cockpit capabilities work independently of ground infrastructure, however additional ground surveillance capability will improve the availability of service.
102. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to promote safety reduced risk of collisions. Cost The business case for this element can mainly be made around safety. Currently, taxiing on the aerodrome surface may be considered as the phase of flight which has the most risk for aircraft safety, where there is lack of surveillance on the ground acting in redundancy with cockpit capabilities. Efficiency gains are expected to be marginal and modest in nature. Improving flight crew situational awareness of aircraft position (especially during periods of reduced visibility) will reduce errors in the conduct of taxi and runway operations, which leads to both safety and efficiency gains.
103. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to enhance the planning and management of airport operations and allows their full integration in air traffic management using performance targets compliant with those of the surrounding airspace. This entails implementing collaborative airport operations planning and where needed, an airport operations center applicability for use at all the airports (sophistication will depend on the complexity of the operations and their impact on the network).
104. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector safety support to be implemented at major/complex airports (sophistication will depend on the complexity of the operations and their impact on the network). Benefits Efficiency Through collaborative procedures, comprehensive planning and proactive action to foreseeable problems a major reduction in on-ground and in-air holding is expected thereby reducing fuel consumption.

105. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector support planning and proactive actions will also support efficient use of resources; however, some minor increase in resources may be expected to support the solution(s).
106. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector providing safe environment in airports and air space through collaborative procedures, comprehensive planning and proactive action to foreseeable problems a major reduction in on-ground and in-air holding is expected thereby reducing noise and air pollution in the vicinity of the airport. Predictability Through the operational management of performance, reliability and accuracy of the schedule and demand forecast will increase (in association with initiatives being developed in other modules). Cost Through collaborative procedures, comprehensive planning and proactive action to foreseeable problems, a major reduction in on-ground and in-air holding is expected thereby reducing fuel consumption. The planning and proactive actions will also support efficient use of resources; however, some minor increase in resources may be expected to support the solution(s).
107. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to provide a safe and cost-effective air traffic services from a remote facility to one or more aerodromes where dedicated, local are no longer sustainable or cost-effective, but there is a local economic and social benefit from aviation. This can also be applied to contingency situations and depends on enhanced situational awareness of the aerodrome under remote control. Applicability The main target for the single and multiple remote tower services are small rural airports, which today are struggling with low business margins.
108. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector for enhanced safety aerodromes are expected to benefit. The main targets for the contingency tower solution are medium to large airports – those that are large enough to require a contingency solution, but who require an alternative to based “heads down” solutions or where maintaining a visual view is required. Although some cost benefits are possible with remote provision of a single aerodrome, maximum benefit is expected with the remote provision of ATS to multiple aerodromes. Benefits Capacity may be increased through the use of digital enhancements in low visibility.
109. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector promoting safety and efficiency benefits through the ability to exploit the use of technology in the provision of the services IT networks, efficient air-ground services will require ground-ground inter-centre trajectory and clearance coordination via extensions or new flight data exchanges compatible with the safety framework.
110. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to develop services to mature and expand publish/ subscribe and request/reply services in parallel to the more traditional messaging services based on use of safety networks through Information security, integrity, confidentiality and availability will be managed in order to mitigate the risks of intentional disruption and/or changes to safety critical information.
111. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to promote safety in the surveillance tracking algorithms, including safety nets, Display of vertical stack lists, Reduction in radio transmission (controller and pilot), Improved management of aircraft in stacks, Reductions in level busts, Functionality will migrate from the ground to the air, The twin demands of increased traffic levels and reduced separation will require an improved form of safety,
112. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support airports and aviation will be significant deployment of cooperative surveillance systems ground processing systems will become increasingly sophisticated as they will need to fuse data from various sources and make increasing use of the data available from aircraft.
113. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector promoting efficiency and safety deployment of cooperative surveillance systems will expand with Cooperative surveillance techniques will enhance surface operations.

114. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector support additional safety net functions based on available aircraft data will be developed through partnership with ICAO and other bodies boasting multi-static primary surveillance radar (MPSR) will be available for ATS use and its deployment will provide significant cost savings.
115. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector promoting safety through additional surveillance data from various sources along with aircraft data to be used to provide basic safety net functions. Surveillance data will also be available for non-separation purposes.
116. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector promote safety by facilitating remote operation of aerodromes and control towers will require remote visual surveillance techniques, e.g. cameras, to provide high trucking operations along with empowering airports with modern Traffic alert and collision avoidance system.
117. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector airport operators and air transport users whose interests overlap with often different priorities. Some states are primarily concerned with full compliance with laws and regulations relating to aviation safety and the facilitation of air transport, and are concerned at the same time with economic and financial measures in this area. Aircraft operators are primarily interested in increasing productivity, minimizing the costs of administrative processes and operational delays. Airport operators are interested in reducing congestion at passenger terminals. Airline users expect a quality, fluid and economically accessible service to operate at airports, whether in transit or at arrival, and that the delay and difficulties are minimal.
118. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to improve the connectivity of air transport nationally and globally meeting the interests air traffic by managing regional airport density passengers transported in relation to population size and GDP, increasing the level of air cargo transported relative to the regional GDP is one of the smallest in the world.
119. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by managing capacity constraints at airports and air navigation services Several airports in the region experience capacity constraints on the land and airsides of their terminals. In order for airports to withstand the doubling of traffic by 2050, infrastructure capacity will need to be increased in many airports so that it can efficiently sustain the expected increase in the flow of flights, passengers and cargo.
120. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector increasing fluency in passenger and cargo traffic Airport processes giving fluency to passenger and cargo traffic will need to be modernized and streamlined as the increase occurs. There are several types of technologies worldwide that have been applied in the most important airports to simplify and automate the processes of check-in, security, customs, boarding, and disembarking and baggage delivery, among others. The improvements implemented to promote greater air traffic flow, benefiting connectivity and reducing operating costs with the elimination of deficiencies and congestions that cause additional costs to airlines and passengers.
121. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support Security control for passengers in transit According to the current scheme applied in the airports in countries passengers in transit are checked for safety at the point of origin and again at each airport within the region where they make connections, until reaching their final destination.
122. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by consolidation of "Aviation Safety and Facilitation Group" through ICAO for transit passengers, to the benefit of greater traffic flow and the potential of hub airports. To make the change it is required the formalization of bilateral agreements between States.
123. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector advocate harmonization of taxes on air transport. The application of taxes or fees to air transport are measures that generate costs on aircraft operators and users aviation activity on the environment.

124. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector in promoting safety and excellency with regard to aircraft noise in the vicinity of airports through national and global regulations adopted in the regulations of states on the application of noise standards. This considerations concerns aircraft engine emissions national and global regulations or adopted another State regulation on fuel drainage and exhaust emissions from turbine engine aircraft.
125. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by supporting environmental management programs for the treatment of environmental aspects of aviation adopted a related environmental policy on the reduction of CO2 emissions in civil aviation activities through ICAO an action plan with a description of the respective policies and measures to be implemented for various regions, airports and aviation space. This includes the implementation of the Market Based Measures Plan (MBM), established by ICAO Assembly Resolution in the form of a Carbon offsetting and reduction scheme for international aviation. This includes promoting operational measures and regulations that strike the balance between air operations at the aerodromes and the quality of life of surrounding populations. We shall seek to work together with other stakeholders to enhance prevention of emission and implementation of norms and procedures to attenuate the noise coming from the ground tests of engines along with Promotion of the implementation of aircraft certification standards in terms of noise.
126. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by promoting the implementation of technologies to optimize air operations and allow working with quieter aircraft and advanced technology along with promoting the gradual renewal of aircraft operating in the region by quieter aircrafts . Limitation or reduction to the maximum extent possible the impact of aviation emissions on local air quality along with promoting the adoption of measures to reduce emissions from engines that affect local air quality (particles of materials, nitrous oxides, among others).
127. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to promote the issuance and implementation of local regulations regarding the certification of aircraft in relation to engine emissions and promote the gradual renewal of aircraft operating in the region by higher technology aircraft and lower emissions. Limitation, reduction to the maximum extent possible or compensation of the impact of greenhouse gas emissions by aviation in the regional and global climate.
128. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to promote the study and research of the effects of greenhouse gases on local, regional and global climate and promote the development, emission and updating of action plans for CO2 reduction.
129. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector promote the adoption of a system of inventory or accounting of emissions from civil aviation through the implementation of measurement, reporting and verification (MRV) systems and Create capacities in the States so that they can assume the responsibilities inherent to participation in the Carbon offsetting and reduction scheme for international aviation.
130. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards safe and orderly development of civil aviation in relation to the quality of the environment and Conduct studies and research to enable civil aviation authorities to gain a full understanding of the impacts of aviation on the environment along with other innovations to prevent accidents from all threats of weather, technology, personal error ettc.
131. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to promote the planning, remodeling or construction of greener airports, with designs and architecture that allow ventilation and natural lighting, using renewable energies, electric vehicles and ecologically treated water, also considering the recovery of affected areas and the reforestation of endemic flora.
132. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to ensure that land-use planning in the vicinity of airports is effectively compatible with aeronautical activity and does not endanger aircraft or surrounding communities.

133. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector achieve the greatest possible compatibility between the safe and orderly development of civil aviation and the quality of the environment.
134. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to support monitoring and evaluation a structured, yet flexible, approach to developing the new strategy involving forming a core strategy working group comprised of agents, operators, intelligence specialists, and mission support staff and conducting extensive internal and external partner interviews to understand the ever-changing operational environment, our partners' emerging priorities, and opportunities to strengthen relationships.
135. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by facilitation of staff employees to review and give feedback on aviation development and safety evaluation for relevancy to our current operational environment and identified strengths and opportunities for improvement by developing new creativity and innovation in organizational way forward that meets evolving mission needs and aligns.
136. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector empowering workforce at all levels—leadership, agents, operators, engineers, intelligence specialists, and mission support— and internal and external stakeholders participated in the development of Aviation sector Vision and Strategy 2030.
137. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector Assess and determine requirements to properly resource recruitment functions and develop recruitment sources and activities tailored to specific positions and priorities along with evaluating and amend core qualifications and specialized experience requirements.
138. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to explore and implement additional retention approaches Outcome Initiatives Staffing Levels Meet Mission Requirements to Improve Aviation staff Recruitment, Hiring, and Retention of valuable staff has made a number of improvements to recruitment and hiring in recent years along with formalizing and encourage wide fitness, resiliency, and work-life balance programs.
139. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to enhance employee engagement activities across aviation staff outcome Initiatives Workforce is Resilient and Highly Engaged along with research workforce duties and properly resource functions performed across Aviation sector.
140. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to Improve coordination between all staff in aviation sector through human resource related functions to perform threat-based risk assessments to identify and address workforce operational gaps.
141. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to conduct annual assessments of initial duty location prioritization based on threat and need Outcome Initiatives proper Organizational Alignment Based on Threat and Need It is important to create a safe working environment that promotes trust, supports high levels of engagement, and provides proactive employee support formalizing Professional Development and Career Advancement Programs.
142. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to document and communicate the promotion process and requirements for leadership positions at all levels and convey clear career progression paths for all positions along with forming a standardized senior leadership training program to grow our future leaders in aviation industries across all departments.
143. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to form a standardized training program for new hires and converting Aviation employees into a highly performance team to formalize Aviation staff cross-training and operational/ organizational familiarization activities for all Aviation sector employees
144. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards creating internships and entry-level positions for mission support and operational positions along with developing a formal field training officer program specific to each area of responsibility for graduating students from our schools of aviation or others.

145. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards offering leadership development opportunities to employees at appropriate levels for all positions Outcome Initiatives Well-Trained Workforce with Clear Advancement Paths A well-trained, resilient, and highly engaged workforce is essential to organizational success. Every employee should understand their role in accomplishing Aviation sector staffing mission. There must also be a focus on standardizing training, equipment, and technology to improve high mission performance.
146. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards sssess, study, and implement ways to reduce injury and foster agent longevity along with conducting and communicate periodic wide safety assessments together with unit inspections.
147. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards research and offer more safety training methods to expand the role of the Field Safety Officer along with Collecting document, and communicate safety stories from the field Outcome Initiatives in Self-Sustaining and Impactful Objectives.
148. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards fully Integrated Safety Management Systems that provides a structured management approach to control risk and proactively identify aviation hazards through the pillars of safety that comprised of Safety Policy.
149. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards structured management approaches, policies, and procedures to control operational safety risks and a commitment to improving safety.
150. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Safety Risk Management in aviation a proactive and reactive processes designed to identify hazards, mitigate threats within operations, and ultimately reduce mishaps, preserve assets, and safeguard the health and wellness of AMO employees.
151. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector safety assurance in aviation- Processes to monitor, measure, and verify the effectiveness of safety and determine if Safety management goals are being met (safety assurance ultimately provides management with confidence in the SMS).
152. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Safety Promotion in aviation education, training and other activities focused on communicating management's commitment to safety and providing support for all other SMS processes (safety promotion also includes establishing requirements for safety- related positions and required training for personnel.)
153. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards safety of systems, technology, and architecture to react decisively and yield maximum effect along with assessing and prioritizing gaps in domain surveillance and detection with exploring domain awareness technology solutions.
154. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards complete capability gap Analysis Process and Joint Requirements Integration and Management documents for addressing gaps in domain awareness.
155. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to Identify and leverage existing international, federal, state, and local government capabilities to address existing domain awareness gaps.
156. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards enhancing domain awareness network with a focus on increased data sharing and enterprise-level unity of effort.
157. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector Advance sustainable unmanned aircraft systems operations to meet mission requirements Outcome Initiatives Persistent Wide-Area Surveillance of the Air and Maritime Domains Objectives.

158. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards closing Gaps in Domain Awareness, It is critical to close the gaps in awareness of the threat landscape across all domains process for implementing the aviation intelligence cycle and educate workforce regarding their role in the intelligence cycle with assess and obtain appropriate clearances for intelligence sharing.
159. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Integrating intelligence personnel throughout the organization and prioritize intelligence-driven and collection operations to Leverage aviation Intelligence Enterprise to enhance secure intelligence sharing systems and protocols.
160. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards leverage counter-intelligence techniques to mitigate vulnerabilities in aviation staffing tactics, techniques, and procedures.
161. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Improving execution of congressionally mandated measures • Identify performance metrics for the aviation staffing mission areas and the geographical areas of operation Outcome Initiatives Intelligence Informs and Increase Intelligence Capabilities and Operational Performance Reliable, actionable intelligence is a critical element in the success of operations and strategic decision-making. Aviation and Marianne Organization remains committed to expanding intelligence gathering, processing, and sharing to enable collected intelligence to drive operations. Air and Marianne operations fosters a unified environment in which all operational personnel work together to address threats and clearly understand their role in operational intelligence cycle. To identify, disrupt, and defeat threat networks, including terrorists and illicit networks.
162. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to coordinate to develop means to collect, analyze, and transmit Air Marianne data in near real-time, pursue commonality and secure communications interoperability Outcome Initiatives Secure Access to a Near Real-Time Operational Picture along with Improving Information Sharing information work appropriately to pursue the modernization of its voice and data communications using advanced technology that integrates near real-time operational data.
163. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards working collectively to enable a vibrant economy, supported by a safe, reliable and efficient air transportation system. We shall support the Cycle and Preventive Maintenance Rebuild initiative to restore transportation infrastructure and assets to a state of good repair through asset management planning and innovative maintenance strategies that take into account long term operational and financial considerations.
164. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Risk Management by Providing research, technical assistance, and targeted funding to ensure that transportation infrastructure is planned, constructed, and maintained using best operational and risk management practices.
165. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards System Operations and Performance System Reliability Improving the reliability and efficiency of passenger travel and freight movement on the Nation's transportation systems by working with state aviation and other stakeholders to identify, collect, and analyze data sources and models to assess overall system reliability and implement strategies that target the sources of unreliable travel and freight movement Performance.

166. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by Measuring the performance of transportation systems and commercial and general aviation-related fatalities and serious injuries and Increasing sharing of harmonized and secure data across all stakeholders to include industry and international partners through joint development of a quantified Integrated Safety Assessment Model with FAA, other DOT modes, NASA, and Eurocontrol.
167. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Improving surface safety by reducing runway incursions and wrong surface operations caused by vehicle/pedestrian deviations or by pilot error as well as improve Runway Safety Areas.
168. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards address the risks to aircraft operations caused by unsafe cargo loading practices through intra and inter-agency coordination and industry outreach through enhanced Safely integrate Commercial Space Transportation launch and reentry activities, as well as increasingly more complex operations. We shall stakeholders to develop and disseminate safety enhancements to mitigate any added safety risks posed by unmanned operations through partnerships with industry, such as the Unmanned Aircraft Safety Team.
169. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards focused on continuous improvement of safety oversight capabilities in countries or regions with strategic importance, as well as underserved rural areas, by developing and enhancing partnerships with mature countries where countries can leverage resources to enhance shared oversight obligations and maintain proportionate levels of safety.
170. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards a Focused Airport Improvement Program funding on improving national airport infrastructure, which supports system-wide impacts while leveraging state and local funding and private sector investment. This will support the ability of rural airports to use to restore and sustain their infrastructure.
171. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Optimizing access to airport development funds and effective land use at constrained airports, through risk-based decision-making that involves airport operators, air traffic systems and aircraft manufacturers along with Promoting the Airport Privatization Pilot Program as a means of generating access to private capital for airport improvement and development.
172. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by automating and streamling the data sharing process for non-NAS users through new technologies, such as cloud storage along with using data to develop and execute clear plans to prepare for weather events and other disruptions, and use operational forecasting, shared with operators.
173. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to reduce errors in delivering precise routes on both the ground and in the air, as well as sharing surface safety information between air traffic controllers and pilots by using digital communication along with Minimizing the volume and length of time airspace is restricted by integrating real-time spaceflight data into management structure, reducing time and fuel costs to users.
174. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Sustaining and improvement of cybersecurity in the aviation ecosystem through relationships with external partners in government and industry.
175. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Increasing the international competitiveness and innovation of aviation transportation industry by advocating the global adoption of global regulations and best practices through global players ICAO, FAA and others.
176. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by working effectively with international partners and private industry to guide standards that stimulate frameworks for harmonization and economic growth, improving efficiency of the global aviation infrastructure, and enabling the safe movement of people and goods.

177. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by providing support towards international guidance, technical assistance, and research and development that accelerate harmonization with aviation systems, regulations, procedures and policies by using strategic and innovative forms of global leadership, through multilateral and bilateral relationships. we can maximize efficiency by returning to develop strategies to develop technologies that improve the safety and performance of the global aviation system.
178. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by focusing on research and development in improving the safety and performance of airport infrastructure and operations, air traffic, and airspace management capabilities to include working with both domestic and international stakeholders.
179. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by supporting to develop tools and processes to continue improvements in the integration of commercial space operations into in a partnership with other government agencies and industry to reduce aviation critical infrastructure risk and transportation ecosystem stakeholders have adopted the National Institute of Standards and Technology Cybersecurity Framework. Additionally, the agency will continue to work with stakeholders to mitigate risks to our mission and services by improving the protection of confidential aviation information, information system, and networks.
180. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector to promote global aviation cyber community engagement with the public sector, intelligence community, private sector, and international partners along with developing improved cybersecurity capabilities for secure collection, transmission, management and analysis of data in coordination with interagency, industry and international stakeholders.
181. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector in partnerships with innovators in academia and industry to Leverage new technology to increase the amount of data we share with stakeholders in a more cost-effective way. Improve our own utilization of radio spectrum, and make it available for shared use through means such as consolidating surveillance radars. Relevant initiatives include the Spectrum Efficient National Surveillance Radar effort with goals of providing high efficient spectrum in high bands to facilitate Global Communications efficiency impacting the aviation sector.
182. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards enhancing safety through use of more accurate aircraft surveillance technology by supporting global aviation Concept of Operations for Integrating Commercial Space Operations Integration to achieve improved efficiency through reductions in delays, route deviations, fuel burn and emissions.
183. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by supporting deployment tools to provide automated assessments by scoring proposed launch sites and launch vehicle types/missions, analyzing data across a host of air and ground safety hazards by Increasing access, capacity and safety at airports by certifying remote towers. Remote towers will use personnel located in a facility other than a traditional control tower. Cost savings are realized through the use of video-based situational displays, radio communication, surveillance technologies and other decision-support tools.
184. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by supporting innovation to reduce regulatory burdens while preserving safety within the National Airspace System (NAS). To reduce the regulatory burden on society, we shall support global aviation to identify regulations that should be repealed, replaced, or modified.
185. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by supporting global aviation specific strategies that include Streamlining regulatory processes to improve government efficiency and reduce impediments to innovation, project delivery, and program implementation along with refining rulemaking prioritization and seek early engagement of stakeholders to assist with policy development.

186. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector supporting application of a portfolio-based approach to reducing regulatory burdens by developing an annual rulemaking plan that considers future years and potential cost savings along with promoting performance-based regulations, which provide additional flexibility to regulated entities and avoid “one-size-fits-all” approaches.
187. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Identifying and implementing processes to address strategic rulemaking objectives, such as Unmanned Aircraft Systems, commercial space, and supersonic towards Improving accountability efforts to support increasingly global business models and worldwide travel of passengers. Ensure focus on key communication, navigation, surveillance, and infrastructure needed to support global carriers.
188. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards effectiveness and Accountability ensuring that the global aviation through countries and private airlines has the human resources needed to accomplish its safety mission through robust strategic workforce planning, leadership development, succession planning, performance management and Total Rewards programs
189. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards improving processes, systems and structures to enhance human resources service delivery. This can be realized by implementing process automation improvements, leveraging internal communications, facilitating internal collaboration and labor partnerships, and enhancing policy dissemination and compliance oversight to meet organizational needs aligning global aviation towards internal organizations to maximize efforts toward workforce development, cyber, shared services ideals, and overall philosophy.
190. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Implementing solutions that are integrated with other global modal systems and processes of aviation by expanded capabilities to conduct its mission support services through more efficient use of human capital resources. The agency will have expanded its alignment with countries air transport as well as shared services and personnel reform goal sufficient, and economical aviation system.
191. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards ensuring global aviation research activities align with these expectations to characterize the value and role (to lead, contribute, or monitor) of its research towards leverage the Research, Engineering & Development Advisory Committee to assess research landscapes within the global aviation including identifying aviation drivers, issues, requirements, and influencing technologies and understanding the level of research investment the industry is making or is willing to make.
192. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards global aviation Cybersecurity – Vulnerability Management Processes Initiative: Evolve mitigation strategies to safely secure global aviation infrastructure, reducing cybersecurity risks by determining the likelihood of a security breach and potential impacts to networks and systems. This will support Protection and defending global aviation information, information systems and networks to mitigate risks to aviation mission and services. The Global Information Security Standards is crucial in collaboration with ICAO, Industry, Euro-control, Single European Skies ATM Research strategic and others organizations.
193. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards priorities of the organization empowerment in countries to shape the human resources needed to accomplish its safety mission through enhancement of strategic workforce planning, leadership development and succession planning initiatives. These will promote a high-performing workforce, identify and close senior manager skill gaps and implement and maintain programs to attract, acquire, develop, promote, and retain quality and diverse talent.
194. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards succession Planning to promote the use of succession planning principles to assist countries aviation organizations and sector in developing strategies to fill key roles, starting at the executive level to the casual workers.

195. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Workforce Transformation Program Effectiveness Initiative to strengthen service delivery to aviation organizations globally and streamline the execution of human resource functions across the employee lifecycle. This will be accomplished by implementing process automation improvements, leveraging internal communications, facilitating internal collaboration and labor partnerships and enhancing policy dissemination and compliance oversight to meet internal targets and organizational needs.
196. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards recruiting & Hiring Measurably improve or maintain day-to-day execution of HR by implementing tactical initiatives to operate efficient and effective hiring and onboarding processes. This will go along with empowering organization to give benefits & improve worklife to enhance the quality, efficiencies, and awareness of aviation sector in countries by improving communications through an expanded number of seminars, briefings and resources that address needs throughout the employee lifecycle.
197. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector by supporting compliance & Program Review by Conducting program reviews to evaluate compliance with policy and applicable regulations, as well as to identify opportunities for improvement for workforce Transformation to drive performance to promote efficiency and effectiveness of aviation global workforce by evaluating and implementing systems and structures that engage, develop and inspire a diverse, capable workforce by creating, implementing and maintaining effective performance management strategies, practices and activities that support mission objectives.
198. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards Total Rewards vision and strategy for global aviation workforce and evaluate program options (existing, new or planned) to best meet the strategy and vision.
199. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards performance Management to Create, implement and maintain effective performance management strategies, practices and activities to foster an efficient and effective workforce.
200. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector toward establishing international corporations in shared Services – Workforce Initiative Work internally and in collaboration with countries department and other federal agencies on efforts to establish shared service models for the delivery of crucial processes and systems to improve customer service and reduce redundancy, resulting in workforce efficiencies and cost savings.
201. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector with when beneficial, establish ourselves as the Human Resources (HR) shared service provider of choice by preparing and maintaining plans to enact as appropriate based on needs and priorities of administration.
202. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards promoting shared Services – Finance, Technology & Infrastructure Initiative: Promote cost and process efficiency through the adoption of shared service strategies supporting agency operations and administrative services. Promote efficient acquisition and financial management strategies through enterprise-wide Category Management practices and contract vehicles.
203. Kingdom Global Airline and Aviation Agency will partner, fund, collaborate and support air transport agencies, institutions, organizations, projects in this sector towards enhancing Mission Efficiency Opportunities Analysis: Identify opportunities that benefit the global aviation and other federal users (e.g., cost sharing, enterprise license agreements, enterprise solutions, fee for service).
204. In conclusion this will be a good beginning managing and funding all this objectives, programs, projects and areas of focus. We shall seek more areas as we continue and update them in our monthly, quarterly and annual reviews publications God bless our vision of providing a safe, secure and efficient Airline Kingdom Airways and positively impact the the global aviation industry through your support by the grace of God.

QUOTES ON AVIATION AND FLYING

- "When once you have tasted flight, you will forever walk the earth with your eyes turned skyward, for there you have been, and there you will always long to return."– Leonardo DaVinci
- "Man must rise above the Earth—to the top of the atmosphere and beyond—for only thus will he fully understand the world in which he lives."– Socrates
- "I fly because it releases my mind from the tyranny of petty things."– Antoine de Saint-Exupery
- "The desire to fly is an idea handed down to us by our ancestors who, in their grueling travels across trackless lands in prehistoric times, looked enviously on the birds soaring freely through space, at full speed, above all obstacles, on the infinite highway of the air."– Wilbur Wright
- "Sometimes, flying feels too God-like to be attained by man. Sometimes, the world from above seems too beautiful, too wonderful, too distant for human eyes to see."– Charles A. Lindbergh
- "Fighter pilots have ice in their veins. They don't have emotions. They think, anticipate. They know that fear and other concerns cloud your mind from what's going on and what you should be involved in."– Buzz Aldrin
- "Learning to fly an airplane taught me a way of thinking, an approach to problem-solving that was applicable and effective. Pilots are very methodical and meticulous, and artists tend not to be."– Chris Carter
- "Pilots are a rare kind of human. They leave the ordinary surface of the word, to purify their soul in the sky, and they come down to earth, only after receiving the communion of the infinite."– Jose Maria Velasco Ibarra
- "Let's get one thing straight. There's a big difference between a pilot and an aviator. One is a technician; the other is an artist in love with flight."
- "He moves not through distance, but through the ranges of satisfaction that come from hauling himself up into the air with complete and utter control; from knowing himself and knowing his airplane so well that he can come somewhere close to touching, in his own special and solitary way, that thing that is called perfection."

Common Sayings

- "A 'good' landing is one from which you can walk away. A 'great' landing is one after which they can use the plane again."
- "Every takeoff is optional. Every landing is mandatory."
- "Flying isn't dangerous. Crashing is what's dangerous."
- "The propeller is just a big fan in front of the plane used to keep the pilot cool. When it stops, you can actually watch the pilot start sweating."
- "Airspeed, altitude, and brains. Two are always needed to successfully complete the flight."
- "Lovers of air travel find it exhilarating to hang poised between the illusion of immortality and the fact of death."– Alexander Chase
- "Both optimists and pessimists contribute to our society. The optimist invents the airplane and the pessimist the parachute."– Gil Stern
- "If black boxes survive air crashes, why don't they make the whole plane out of that stuff?"– George Carlin
- "The only mystery in life is why the kamikaze pilots wore helmets."– Al McGuire
- "What is the similarity between air traffic controllers and pilots? If a pilot screws up, the pilot dies; If Air traffic controller screws up, the pilot dies." Both are needed to work

- *"The engine is the heart of an airplane, but the pilot is its soul." - unknown*

- *"If you can walk away from a landing, it's a good landing. If you can use the aircraft the next day, it's an outstanding landing." - Chuck Yeager*

- *"Until you spread your wings, you have no idea how far you'll fly." - unknown*

- *"A pilot who says he has never been frightened in an airplane is, I'm afraid, lying." - Louise Thaden*
- *"The pilot who teaches himself has a fool for a student." - unknown*
- *"Great pilots are made not born... A man may possess good eyesight, sensitive hands, and perfect coordination, but the end result is only fashioned by steady coaching, much practice, and experience." - unknown*
- *"Don't be a show-off. Never be too proud to turn back. There are old pilots and bold pilots, but no old, bold pilots." - unknown*
- *"If you're ever faced with a forced landing at night, turn on the landing lights to see the landing area. If you don't like what you see, turn' em back off." - unknown*
- *"There are three simple rules for making a smooth landing. Unfortunately, no one knows what they are." - unknown*
- *Flying the airplane is more important that radioing your plight to a person on the ground incapable of understanding or doing anything about it -Unknown*
- *"In the ongoing battle between objects made of aluminum going hundreds of miles per hour and the ground going zero miles per hour, the ground has yet to lose." - unknown*
- *"In flying, you need at least two of these three to stay alive: altitude, speed or brains." - unknown*
- *If an airplane is still in one piece, don't cheat on it; ride the bastard down. - Ernest K. Gann, author & aviator*
- *"I think it is a pity to lose the romantic side of flying and simply to accept it as a common means of transport." - Amy Johnson*
- *"The good thing about flying solo is it's never boring." - Steve Fossett*
- *"More than anything else, the sensation of flying is one of perfect peace mingled with an excitement that strains every nerve to the utmost. If you can conceive of such a combination." - Wilbur Wright*
- *"Every flyer who ventures across oceans to distant lands is a potential explorer; in his or her breast burns the same fire that urged adventurers of old to set forth in their sailing-ships for foreign lands." - Jean Batten*
- *"Sometimes you have to go up really high to see how small you are." - Felix Baumgartner*

VISION
Equipping and empowering Africa mining sector with mineral markets, machinery, technology, capacity building in management skills and welfare.

MISSION
Providing support to mining sector in Africa to improve and increase productivity through mechanization of mining, establish global marketing Networks, Providing management solutions of mines and packaging welfare solutions for mines owner and workers to enhance profitability and efficiency mining industry in Africa for Job creation, poverty eradication and economic empowerment.

The world is endured with Trillions of dollars' worth unexploited minerals and on top people dying in poverty. Over 100 types minerals in some regions totally. Our role as Helpers Of Africa International through Kingdom Global Mining and Oil agency in very timely to join the players in the world towards empowering this valuable wealth and job creating sector. We seek to Fund & Conduct Geo-survey in Mineral potential areas to verify quality and quantities as basis of planning for potential industrial sites. In Kenya we have the first 7 regions, Providing funding for mining licenses by packaging lands into mining concessions, providing Machinery Skills & Technology to boast mining production, Providing International markets for mineral good prices, Improving welfare of miners housing schools vehicles, hospitals as a win win situation . This will be revolving funds since we project big incomes from Joint venture projects. We have reports of all mineral potential nations and areas 2000 page report done and like Kenya, Congo, Zambia and other countries mines that do have great potential need funding above. Establishing Industrial Parks & Mining Cities in this Regions for empowerment of both Nations and globally to unearth trillions of dollars buried in the ground yet economies especially in the developing countries are suffering especially with Covid 19 melt down. Our Survey and reports indicate many meetings have been done by Stake holders in the mining sector along with those in Petroleum Exporting Countries to stabilize production and prises of minerals, Oil and petroleum products. As we work with countries and organizations to control the spread of virus and deceleration in the number of COVID-related deaths and other diseases, this will stabilize minerals and oil prices, there is still much uncertainty that will destroy this sector. Many of our partners & donors in Helpers Of Africa International so we are very keen to ensure that the revenue streams from this sector is maintained so that you can give more and keep the stability of this bank for generations. On the background of a viral outbreak already dampening the demand for oil, this oil-price war is predicted to have grave implications for the global economy. In more ordinary times, cheap oil may have functioned as an advantage for economies but a set back on producers and stakeholders. However, savings on petrol are unlikely to be redirected into more spending as populations are instructed to practise social distancing and the working class are uncertain about job security. Furthermore, any increase to consumer activity is likely to be outweighed by damage caused to populations reliant on revenue from other forms of energy. Ideas of having and supporting more exploration of oil, harvesting, setting up more refineries to reduce transportion cost and logistics to consumers are being considered through your advice and networks. We shall work with various governments and relevant national and global organizations in mining and oil to stabilize this sector which is key through mining and oil production department and we welcome more ideas from your expertise, experience and networks from your great and smart minds.

The Global agenda of economic recovery plan because of the meltdowns caused by Covid 19 cannot ignore this sector of Mining and oil to tap into Gods original wealth to humanity Isaiah 43.3 I will give you treasures hidden in darkness of riches of secret places that you may Know that I am the Lord. The global development goals Vision 2030 of elimination poverty has been reversed by almost 20 years according to researchers and through mining of minerals and oil this setbacks can be restored through our strategic plan in nations and globally. Our Strategic plan through Kingdom Global Mining and Oil Agency will work and contribute a long way towards wealth creation This will pave way for the preparation of various sector plans to guide the implementation of our mining work of minerals and oil partnership in nations and globally. Our agency strategic plan described outlines to develop Oil and Other Mineral Resources Sector Plan across nations and globally. The Plan outlines the policies, strategies, programmes and flagship projects to be given priority along with areas of focus and specific partnership areas to be funded and financed by Helpers Of Africa International through Kingdom Global Mining and Oil Agency. The Oil and Other Mineral Resources Sector currently contributes a big percentage of global economy we can do more to create Jobs and wealth along with improving infrastructure in mining territory.

Due to this envisaged contribution of the sector in spurring global economic growth and development through foreign exchange earnings, creation of employment opportunities, industrial growth and infrastructural development, it has been identified as a major priority sector under the Economic Pillars of the global world economy. The sector, however, faces a number of challenges and emerging issues in nations varying but generally globally our research shows challenges to overcome to get more value for wealth creation and return on investment include weak legal, regulatory and institutional framework, high expectations, huge capital outlays, inadequate budgetary allocations, understaffing, inadequate technical capacity, conflicts with communities, lack our accuracy in prospecting work and environmental degradation among many more others addressed in our strategic plan. To address some of these challenges and emerging issues our agencies is seeking to engage governments beginning with those that have huge known deposits of mineral and oil reserves along with regional and global agencies / organizations towards reviewing the outdated policies, bills and Acts to align them to the Constitution of countries and make them to conform to international best practices and standards for both local miners along with international investors. Our Kingdom Global Mining and Oil Agency will establish operations in all the countries in focus along directorates and supporting countries to set up new institutions in partnership and/or restructuring the existing ones with a view to improving their efficiency and capacity to coordinate, manage and govern the operations of stakeholders in the sector in nations and globally.

Kingdom Global Mining and Oil Agency will support digitalization of operations such as licensing and mineral mapping will improve integrity, transparency and accountability in the sector along with investing in other flagship projects developing infrastructure i.e. rail, port and pipeline; improving laboratory analysis of petroleum and other minerals; enhancing exploration and exploitation of oil/gas and other mineral resources; and improving geological and geophysical data among others.
The implementation of the Oil and Other Mineral Resources Sector Plan will be done by engaging countries and global key stakeholders that include Ministries of Mining and Ministry of Energy & Petroleum, Parastatals, private sector of association of miners both big players and artisans. These joint partnership will outline implementing of our agencies projects will develop annual work-plans, cost the activities and develop specific, measurable, achievable realistic and time-bound indicators that will be used to monitor and evaluate the implementation of the Plan. Monitoring and evaluation will be done in a participatory manner by Monitoring and evaluation Committees, who will report on the achievement of the targets on quarterly basis. Annual reports will be published and shared among stakeholders. .

A research of Africa our operations seat of our headquarter and also where a lot of the world's poor live, yet endured with resources including mineral potential that Helpers Of Africa Internationalseeks to explore. We have packaged 2 pilot projects in Kenya of setting up an a mining and industrial park and city to both activate mining and value additions chain of minor and industries to process the minerals and value additions in Taita region and Turkana. In this two mineral rich territories in Kenya Taita and Turkana we have mineral potential of over 100 billion Usd rich deposits of mineral and oil reserves as per geologically confirmed industrial and precious minerals combined with East and Central region extending to Africa geo-survey yet our country is in debts and the regions are the poorest county in Kenya. This is unfortunate scenery replicates itself in many developing countries where the mineral and oil reserves have not been exploited resources and wealth buried in the soil that should be transforming nations and lives here on earth funding developments, charity, humanitarian, ministry and valuable missions to alleviate poverty and economic empowerment activities of our global agenda along with lifting the standards of living in communities and nations. The mineral value in this locations and surrounding countries can pay off all Africa debts with structure and through our strategic plans that will impact various areas and sectors that need streamlining along with investments that we seek to do in a big way to also keep our funds of Helpers Of Africa International revolving and growing throughout generations. We intend to refresh our funds through all our projects and programs but the biggest income avenue will be through Minerals and oil, Cities and Real Estate, Infrastructure projects and loans, Tourism, Aviation and others that will sustain all our grants to communities and nations through our 37 agencies along with those that will be given directly by Helpers Of Africa International.

The US Geological Survey (USGS) ranks Africa as the largest or second-largest reserve worldwide for bauxite (the main source of aluminium), cobalt (used to make alloys and batteries), and industrial diamonds (needed to cut hard materials), manganese (the anticorrosive element in steel), phosphate rock (a key ingredient in fertilizers), platinum group metals (a primary component in automotive catalytic convertors), soda ash (an element in glass production), vermiculite (a component in fireproof materials) and zirconium (used to manufacture heat resistant ceramic materials). All of these products except for fertilizers are found in everyday life within the automobiles we use to travel from point A to point B. In an eco-conscious world where renewable materials are becoming more important, many new automobiles have an increasing volume of plant based materials in them, phosphate rock is as important to the cars being manufactured today as the other minerals found on the continent. This is an illustration of how world citizens are directly and indirectly linked to the fortunes of the African mining sector. But the application of its metal and mineral produce goes much further than just automobiles. Mining and quarrying of some 60 mineral products currently represents around 20% of Africa's economic activity, while minerals are the continent's second-largest export category worth 10% of the continent's total exports only exceeded by hydrocarbons. More than 80% by value of these mineral commodities originate in just five countries: In Africa mining in done both at large scale and small scale. In some African countries, environmental problems and social issues caused by mining have been sources of protests and conflicts between mining companies and communities in mining areas.

Mining has often been associated with deforestation, land degradation, air pollution, and disruption of the ecosystem. For example, the recent strikes and deaths in major platinum and gold fields in South Africa have highlighted the social impacts and uncertainties surrounding the country's strategic mining sector. To curb social and environmental impacts of mining, industry players and governments should strive for a more inclusive and transparent partnership by encouraging public participation in mining communities .Africa is blessed with a rich bounty of natural resources. The continent holds around 30% of the world's known mineral reserves. These include cobalt, uranium, diamonds and gold, as well as significant oil and gas reserves. Given this natural wealth, it comes as no surprise that with the tripling of global mineral and oil prices in the past decade, mining has exploded on the African continent. My country Kenya's mineral and oil wealth worth over Sh15 trillion. Kenya is firmly on the path to earn the trillions from its 77 different minerals, petroleum and gas reserves. Another research by the Strathmore University's Extractive Industries Centre puts the expected contribution of the mining sector at 10 – 15 per cent of the GDP, including the new jobs and value addition down the supply chain.

Kenya our first case study and pilot projects has 77 minerals according to the Department of Mines, among them rubies, emerald and tsavorite - though small quantities. IEA projects that the State will earn about Sh5.5 trillion from the estimated 40 million tonnes of rare earth minerals, and a further Sh300 million from mineral sands. The earnings will be in the form of royalties and taxes paid by the companies involved in the mining and export. Over the period 2000 to 2008 resource extraction contributed more that 30 percent of Africa's GDP, while the annual flow of foreign direct investment into Africa increased from However, despite being so richly endowed, and despite the mining boom of the past decade, Africa has drawn little benefit from this mineral wealth and remains one the poorest continents on the globe, with almost fifty per cent of the population living on less than $1.25 per day. The Kingdom Global Mining and Oil Agency will support mining sector in Exploration & licensing, Technology, machinery, market and welfare to miners by returning back to community uplift in livelihood regions in building schools, hospitals, roads, trade centers, water access, environmental conservations along with charity and humanitarian empowerments of school bursaries. Job creation , poverty eradication, economic empowerment and infrastructure development is a direct outcome of a well managed mining exploration projects on a win / win situation that Kingdom Global Mining and Oil Agency will seek to attain. The mineral industry of Africa is the largest mineral industries in the world. Africa is the second largest continent, with 11.73 million miles of land, which implies large quantities of resources. With a population of 1.216 billion living there. For many African countries, mineral exploration and production constitute significant parts of their economies and remain keys to economic growth.

Many nations of the world especially in Africa is richly endowed with mineral reserves and ranks first or second in quantity of world reserves of bauxite, cobalt, industrial diamond, Phosphorite phosphate rock, Platinum in Africa platinum-group metals, vermiculite, Mineral Resources of African Countries Country Precious Metals gemstones and semi-precious stones Metallic Minerals Industrial Minerals Algeria Gold, silver Mercury, wolframite, lead, zinc, iron Phosphate, barite, kaolin, bentonite, diatomite, feldspar, gypsum, pozzolana, salt, marble, rhyolite, sulphur, fuller's earth Angola Diamonds, gold, silver, PGMs Uranium, nickel, chromium, bauxite, copper, lead, iron, zinc Phosphate, granite, marble, salt, gypsum, lignite, mica, peat, manganese Benin Gold Marble Botswana Diamonds, gold, platinum group metals, semi-precious gemstones Copper, nickel, cobalt Coal, soda ash, salt Burkina Faso Gold Lead, zinc, uranium Granite, marble, phosphate, pumice, salt, manganese Burundi Gold Tin, nickel, copper, cobalt, niobium, coltan, vanadium, tungsten Phosphate, peat Cameroon Gemstones, gold, diamonds Nickel, bauxite, iron., rutile, cobalt, uranium, tantalite, tin Lignite, marble, mica, manganèse Cape Verde Gypsum, pozzolana, salt, Central African Republic Diamonds, gold Copper, tin, iron, uranium Clay, graphite, ilmenite, kyanite, lignite, monazite, quartz, salt, manganese, rutile Chad Gold Salt, soda ash Comoros Congo DR Diamonds, gold, silver Copper, zinc,

Kenya is endowed with a variety of mineral resources including base metals(gold, silver, copper), dimension stones (granite, marble and limestone), industrial minerals (fluorspar, titanium and limestone), gemstones (ruby, sapphire, rhodolite) and chemical minerals(soda ash, carbon dioxide, salt and hydrocarbons), and recently , fossil fuels (coal, oil and gas). Minerals occur in a variety of locations in Kenya, and some of these areas have limited alternative sources of economic activity. Kenya is under-explored as far as petroleum and natural gas are concerned. There are positive indications of hydrocarbon potentialin the form of oil seeps, gas and oil, but only relatively few exploration and development wells have been drilled. The Oil and Other Mineral Resources sector has been identified as an additional priority sector under the Economic Pillar of Kenya Vision 2030. The sector currently contributes about one (1) per cent to Gross Domestic Product (GDP) and three (3) per cent total export earnings to the economy. Although this contribution is not significant, the potential for higher contribution exists following the recent discoveries of strategic minerals such as oil in Turkana County, Titanium and Rare Earth Elements (REE) in Kwale County, coal and gas in Kitui and Lamu Counties respectively. Once exploitation and exportation of the minerals begin, the contribution to GDP is expected to rise to three (3) per cent by 2017. It is expected that with more discoveries, development and management of oil, gas and other mineral resources, industrial growth can be realized. The extractive industry will create employment opportunities to Kenyans thus alleviating unemployment and poverty. It will also spur economic growth and development in form of social amenities such as roads, railways, health facilities, electricity, water and schools among others. It is against this background that this Sector Plan is developed by the Ministries of Energy and Petroleum and Mining. The Oil and Other Mineral Resources outlines the policies, strategies, programmes and projects to be given priority in terms of resource allocation and implementation. It is expected that successful implementation of the programmes and projects outlined in this Plan will help the country attain the 10 per cent growth target envisioned in the Vision 2030 that will make Kenya to be a globally competitive middle-income country by 2030. Our strategic plan contains situational analysis legal and institutional framework in which the sector operates.

Helpers Of Africa International recognizes the importance of oil and other mineral resources sector in facilitating economic growth and development. As a result, oil and other mineral resources sector has been identified as a priority sector under the Economic Pillar of nations globally in our vision 2020 to 2050. This era presents a strong situation and opportunity for stakeholder analyses for the minerals and oil Gas exploration in nations. Exploration of gas oil and exploration of minerals both onshore and offshore blocks is yet to be maximized especially in many developing countries. Therefore we have more opportunities to explore and drill more wells for economic empowerment of Nations, the world along with sustenance of our economic base as Kingdom Global Mining and Oil Agency as a main income to sustain our economic base as we refresh nations through charity and humanitarian work. More discoveries are expected to be enhanced in the country's exploration to make countries to be globally competitive middle-income country by 2050. Due to this envisaged contribution of the sector in spurring economic growth and development through foreign exchange earnings, creation of employment opportunities, industrial growth and infrastructural development, it has been identified as a priority sector under the Economic Pillar of the global economic growth Vision 2030. The sector, however, faces a number of challenges and emerging issues including weak legal, regulatory and institutional framework, high expectations, huge capital outlays, inadequate budgetary allocations, understaffing, inadequate technical capacity, conflicts with community, and environmental degradation. To address some of these challenges and emerging issues, Helpers Of Africa International through Kingdom Global Mining and Oil Agency will work with nations to review the outdated policies, bills and Acts to align them to the Constitution of potential countries and make them to conform to international best practices and standards in a view to improving their efficiency and capacity to coordinate, manage and govern the operations of stakeholders in the sector. Digitalization of operations such as licensingthis will improve integrity, transparency and accountability in the sector. In addition, other flagship projects for implementation include developing infrastructure i.e. rail, port and pipeline; improving laboratory analysis of petroleum and other minerals; enhancing exploration and exploitation of oil/gas and other mineral resources; and improving geological and geophysical data among others. The implementation of the Oil and Other Mineral Resources Sector Plan will be done by key stakeholders;

Ministry of Mining and Ministry of Energy & Petroleum, Parastatals/SAGAs in the two ministries and private sector. These implementing agencies will develop annual work-plans, cost the activities and develop specific, measurable, achievable realistic and time-bound indicators that will be used to monitor and evaluate the implementation of the Plan. Monitoring and evaluation will be done in a participatory manner by M & E Committee, who will report on the achievement of the targets on quarterly basis.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organization along with stakeholders in the mining sector to enhance mine and mineral audits, carry out statutory obligations to upgrade mining cadastre to allow online transactional applications improve openness and accountable management of revenues from minerals, intensify geological survey by carrying out a national airborne geophysical survey to map out where potential mineral deposits are located, follow up airborne survey with field mapping, intensify exploration of all manner of minerals , to create a internationally accredited mineral certification laboratories, narrow the skill gap in mining sector so that the sector employs more people in nations and globally, build institutional capacity; and undertake reorganization including establishing coordination structures with Countries Governments. We will endeavour to facilitate creation of mineral and metals commodity exchange, mineral audit agency and mineral value addition centers to plan policies and development energy regulation, security and conservation fossil fuels exploration and development, oil and gas and minerals sector capacity development, and petroleum products, import/export/marketing policy management. Our strategic plan goes towards owning oil and mineral consessions globally along with mineral exploration and mining policy and management, inventory and mapping of mineral resources, mining and minerals development, policies on the management of quarrying and mining of rocks and industrial minerals, management of health and safety in mines, policy around extractive industry; maintenance of geological data and resources survey and remote sensing.

We shall seek to support government ministries to provide the overall leadership, oversight, guidance and policy direction in the implementation of the sector plan globally to ensure top management incorporate the projects in their performance contracts, annual work plans and set up committees to report on the attainment of the targets to undertake oil gas and mineral exploration and marketing and distribution of petroleum products. On oil sector we shall support management of the oil pipeline for transportation of oil products and Petroleum Refineries works supporting countries to be able to import crude oil for consumption for both local and regional markets. We shall seek to support creation of Nation Corporations which will coordinate exploration and development of various dominant minerals to facilitate exploration, development and management of other mineral resources along with monitoring and evaluation of the plan in nations and globally. We shall support the mobilization of the Private Sector to play a pivotal role in economic development of the country through investment in economic activities and provision of social amenities. In the oil and other mineral resources sector, private sector is involved in exploration of oil/gas and minerals and mining. Private companies also invest in distribution and marketing of oil/gas and mineral resources

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to provide an inspirational statement “Transparent, equitable and optimal exploitation of mineral resources to underpin broad based sustainable growth and socio-economic development”. Our strategic plan seeks to foster “A transparent and inclusive mining sector that is environmentally and socially-responsible…which provides lasting benefits to the community and pursues an integrated view of the rights of various stakeholders…is essential for addressing the adverse impacts of the mining sector and to avoid conflicts induced by mineral exploitation. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to foster peace through public participation in assessing the environmental and social impacts and the enforcement of impact assessment requirements is important in tackling these challenges”. The vision envisages a knowledge-driven mining sector that catalysis and contributes to the broad-based growth and development of, and is fully integrated into, a single mineral and oil market through down-stream linkages into mineral beneficiation and manufacturing, Up-stream linkages into mining capital goods, consumables & services industries, Side-stream linkages into infrastructure (power, logistics; communications, water) and skills & technology development Mutually beneficial partnerships between the state the private sector civil society local communities and other stakeholders and a comprehensive knowledge of its mineral endowment, A sustainable and well-governed mining sector that effectively garners and deploys resource rents and that is safe, healthy, gender and ethnically inclusive, environmentally friendly, socially responsible and appreciated by surrounding communities.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector a mining sector that has become a key component of a diversified, vibrant and globally competitive industrializing countries economy, A mining sector that has helped establish a competitive countries infrastructure platform, through the maximization of its propulsive local and regional economic linkages, a mining sector that optimizes and husbands countries finite mineral resource endowments and that is diversified, incorporating both high value metals and lower value industrial minerals at both commercial and small-scale levels; A mining sector that harness the potential of artisanal and small-scale mining to stimulate local/national entrepreneurship, improve livelihoods and advance integrated rural social and economic development; and A mining sector that is a major player in vibrant and competitive national, continental and international capital and commodity markets.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to establish key indicator of counties desire for a sustainable mining framework that takes into account the institutional, social, environmental and economic development dimensions. Through its Counties Minerals Development Centre, A Country Mining Vision strategic to be developed where it doesn't exist to facilitate the domestication of the countries Mining Vision at the national level as a way of harmonizing mining operations in the continents and globally.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector with actions to promote sustainability with highlights specific actions required to facilitate and nurture human resources development and skills formation in tandem with the development of resources technological clusters through the facilitation of research and development and the building of knowledge networks and niches involving academia, industry, the government and other players, provide supporting infrastructure including roads, rail ports, energy and water and telecom encourage the establishment of strong instruments of collaboration (industry/professional associations, Chambers of Mines, cluster councils, incubator /technology packs) and foster agglomeration effects and learning processes by the establishment of a critical mass of key similar, ancillary, related and associated industry players that share information, collaborate and compete to improve the initial factor advantages, enhance competency, reinvention, innovation, technology evolution and spillovers, and diversification.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to promote local beneficiation and value addition of minerals to provide manufacturing feedstock, Promote the development of mineral resources (especially industrial minerals) for the local production of consumer and industrial goods, Establish an industrial base through backward and forward linkages, Encourage and support small and medium-scale enterprises to enter the supply chain, Improve the quality of the business environment, increase private sector confidence and participation, and reduce entry barriers and operating costs to achieve external economies of scale, Ensure compliance of industry players with the highest standards of corporate governance, and environmental, social and material stewardship, Harness the potential of mid-tier resources that may not necessarily attract major international companies but high net worth individuals, including local entrepreneurs, Establish the requisite enabling mineral markets and common platforms for services (raising capital, commodity exchanges, legal and regulatory support, marketing support and know-how), Harness the potential of Public Private Partnerships (PPPs); and Promote regional integration and harmonization to facilitate factor flows.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector with a scope of Sustainable Mining Standards with principles and Objectives of Standards Harmonization the standardization of countries Standards for mining shall be based on the sustainability principles and criteria with the following broad objectives of Global and National Institutional Framework, Global and National Policy and Legal Framework for Large Scale Mining, Global and National Policy and Legal Framework for Artisanal and Small-Scale Mining, Global and National Guidance on Governance Aspects of mining sector, Global and National Guidance on Legal Compliance, Global and National Environmental and Social Impact Assessment in mining projects, Global and National Environment and Social Impact Monitoring in mining projects Units, Global and National Protection and Remedy Framework Units, Global and National Mines Reclamation and Closure Units, Global and National Mining Economic Guidelines, Global and National Econometric Assessment of Mining Developments Units, Global and National Mineral Revenue Royalty and Rent Payments Transparency Units, Global and National Transparent Marketing and Fair Pricing Practices for Minerals, Global and National Linkage Framework for Market Access Units, Global and National Local Mineral Beneficiation and Mineral Separation Requirements Units Transparent Mineral Valuation Frameworks Units, Global and National Community and Stakeholder Engagement Units, Global and National Engagement with Indigenous People, Global and National Fair Labour and Working Conditions, Global and National Occupational Health and Safety in mining sector, Global and National Emergency and Preparedness Response units, Global and National Human Rights Due Diligence and Compliance Units, Global and National Mining and Conflict-Affected or High-Risk Areas, Global and National Security and Human Rights in munites, Global and National Health Community Support and Delivering Benefits in mining areas, Global and National Cultural Heritage preservation in relocations, Global and National Resettlement of Communities, Global and National Environmental Guidelines Units, Global and National Water Quality and quantity units, Global and National Mine Waste Management units, Global and National Air Quality units, Global and National Noise and Vibration management units, Global and National Greenhouse Gas Emissions Unit, Global and National Protected Areas Units, Global and National Conservation and Protection of Biodiversity Units, Global and National Mercury Management units, Global and National Environmental Impacts of Different Mining Processes Units, Global and National End of Life Mine Reclamation/Closure Requirements units, Global and National Mines Scope of Standards Harmonization.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector in sustainability Standards — Glossary and basic descriptions, General Principals and criteria for sustainability, Sustainability criteria for mining, Sustainability criteria for artisanal and small-scale mining , Conformity criteria to sustainable mining, Draft standard for mineral valuation, Sustainable mining of radioactive minerals , Guide for Sustainable Surface Coal Mine Reclamation, Guidelines for Sustainable Hard rock Mining Reclamation/Closure, Guidelines for Sustainable Reclamation of Disused Mines, Liaison Possibility In the harmonization work, liaison possibilities with Initiative for Responsible Mining Assurance, Mine reclamation management and Extractive Industries Transparency Initiative

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organization, projects along with stakeholders in the mining sector to create an enabling environment for the private sector participation in the implementation of the plan, which includes monitoring and evaluation and reporting on progress made. The private sector will participate as independent investments and/or in Public Private Partnerships. The oil and other minerals sector has a number of stakeholders who participate in policy formulation, implementation of programmes and projects as well as monitoring the implementation of the programmes and projects in the sector. Formulation and dissemination of policies, laws, regulations, procedures , Generation and accessibility of basic data and information on oil/gas and other mineral resources , Coordination of stakeholders in the oil/gas and other minerals sector , Marketing and promotion of the oil/gas and other minerals , Mobilization of resources , Capacity building Other Government Institutions/ Line Ministries , Timely and accurate information and reports , Revenue generation from mining of oil/gas and other minerals , Provision of data on natural resources/environment and geoinformation services , Budgetary support and fiscal regime formulation (The National Treasury) , Strict adherence to laws, regulations and policies to minimize legal tussles , Efficient and timely provision of technical services , Collaboration and networking Industry , Affordable energy in the form of oil/gas and oil/gas products , Availability of minerals as raw materials for industries Public/Citizens , Availability of oil/gas products at affordable prices , Timely access to data and information , Equitable sharing of revenues from oil/gas and other minerals , Transparency and accountability , Efficient and prudent utilization of resources , Amicable conflict resolutions , Employment and wealth creation Research and academic institutions , Timely access to data and information , Knowledge management and sharing , Manpower development , Development of appropriate technologies and Collaboration in research and internship.

Our strategic plan with nations , communities will extend towards the support of timely and accurate information and reports sharing , Encouragement and promotion of viable Public Private Partnership , Investment in exploration and mining of oil/gas and other minerals , Efficient and timely provision of commercial technical services , Contract compliance , Private sector forum Amicable conflict resolutions Professional bodies including regional and international forums , Subscriptions , Participation in the forums , Implementation of resolutions Civil societies (NGOs, FBOs, CBOs etc) , Timely and accurate information and reports sharing , Transparency, accountability, governance , Contract compliance , Collaboration Development Partners and International Organizations , Financial probity and technical support , Timely and accurate information and reports , Collaboration in the implementation of programmes , Transparency, accountability, governance , Contract compliance , Meeting international obligations Parliament , Timely information sharing , Appropriate legislation to govern the sector ,

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organization, projects along with stakeholders in the mining sector Budgetary framework linked to performance , Transparency, accountability, governance County governments , Equitable sharing of resources , Information sharing , Amicable conflict resolution Suppliers & Merchants , Timely information sharing , Transparency in procurement of goods and services , Timely payment for goods and services Media , Reliable data and information Staff (Internal customers) , Training and development , Conducive working environment , Appropriate working tools , Welfare of staff , Better terms and conditions of service, Petroleum Exploration and Production Acts, Energy Act, The Mining Act, The Trading in Unwrought Precious Metal Cap, The Diamond Industry Protection Act, Huge financial outlays for exploration and production of oil, gas and other mineral resources hence limited data, Inadequate funding of the sector Ministries, This constrains exploration and development of minerals, Limited attraction of capital for exploration and production activities, Before oil/gas and other mineral resources are discovered, the country is considered a frontier and high risk for investments, Human capacity constraints. There is shortage of specialized local manpower in the field of mining, petroleum geology, geo-physics and reservoir and production engineering, Inadequate specialized exploration and survey equipment, Inadequate infrastructure development of the requisite network of roads railways, ports, pipeline, and refining and distribution systems to support the mining and oil sector, High expectations from host community leading to conflicts, Low value addition for mineral resources hence low returns, Environmental and health concerns i.e. derelict land, pollution, use, exposure and disposal of toxic substances, and illegal use of explosives; and Volatility in international market prices for oil, gas and other minerals.

We shall seek to support the Ministries of Energy and Petroleum to focus on the following strategic objectives to spur economic growth through Petroleum exploration, development and production of oil/gas, Processing, distribution and marketing of oil/gas products; and Increase electric power generation, to spur economic growth through the minerals and mining sector, Formulate and implement policies, laws and regulations governing the extractive industry, commercial explosives and geo-information services, Carry out geological surveys, mineral exploration and deposit evaluation for development, management and audit, Establish systems and structures for management of mine health, safety and environment, Undertake assessment, mapping and monitoring of land cover and land use for conservation, planning and decision making, Develop geospatial data infrastructure for effective collection, analysis and dissemination of mineral, environmental and natural resources information for planning and decision making, Promote capacity building to improve efficiency, proficiency and productivity in the mining sector and geo-information services; and Promote commercialization of the mining industry

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organization, projects along with stakeholders in the mining sector to restructure the institutions within the oil sub-sector i.e. restructure and enhance the National Oil Corporation of financial capacity to conduct upstream business, Sub-divide and create new petroleum exploration blocks based on technical data, Facilitate development of rail and road networks for exploitation of mineral deposits other parts of the country, Enhance primary data acquisition analysis and interpretation in the open blocks so as to make them attractive to investors, Establish a national petroleum data centre, Enhance partnership in data exchange so as to reduce cost in exploration and access to new technology, Skills development and enhancement of local expertise in petroleum exploration and production through training, technical collaboration with exploration companies and universities, Develop Logistics and Supply Chain Management for the oil and gas, Effectively manage the environment and social economic issues,

Develop the trade routes in mineral corridors and regions through infracture (rail, road, power, water, sanitation, schools, hospitals etc) along with mineral processing plants, construction of crude oil refinery, modern oil terminals in Ports, pipeline to transport refined oil products to markets and refineries, Develop a policy on management of commercial discoveries of petroleum resources, Revise the Energy Bills to make them investor freindly, Reconstitute the National Fossil Fuels Advisory Committees, Acquire specialized survey and exploration equipment; and Enhance corporate governance in the government institutions charged with petroleum exploration and development, Restructure the institutions within the other mineral resources sub-sector, Conduct a National Airborne Geo-physical Survey, Conduct mineral exploration and evaluation, Create Special Mineral Processing Economic Zones, Establish an Internationally accredited Mineral Certification Laboratory, Global & National Establish Mineral Audit Agency, Facilitate the establishment of Global & National Minerals and Metal Commodity Exchange centers, Establish Global & National Geological Survey and Research Centre, Establish a Global & National Mineral Sovereign Fund, Establish a Global & National Mining Corporations Establish Global & National Seismological Networks, Undertake Global & National geo-hazard mapping and monitoring units, Enhance partnership in data exchange so as to reduce cost in exploration and access to new technology, Undertake commercial production of mineral sands project (titanium), Support artisanal mining in coutries, develop a single fiscal regime for mining, develop a National Mining Policy, Legal, Regulatory and Institutional Framework, develop Global & National Extractive Industry Transparency Initiative , Facilitate establishment of a National Mining Institutes and university institutions, Develop online mining cadastre system , Construction of oil refinery , Establish directorates in the Ministry of Mining to facilitate realization of the full potential of the mining sector, Global & National Minerals Resources Development Corporation, including exploration, mining and consumption, Global & National Mineral Audit Agency, To establish the true value, quantity and quality of minerals, Metal and Mineral Commodity Exchange, To attract investment through trading of futures.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organization, projects along with stakeholders in the mining sector to process the raw minerals before they are sold/exported, Internationally Accredited Certification Laboratory, To confirm certain characteristics of a mineral in terms of identification, quality, quantity and value; National Mining Corporation: Mining Corporation which shall be the investment arm, National Institute of Mining, To build human capacity in mining sector. carry out respective responsibilities and report on progress made on a timely basis, The stakeholders should be involved in participatory monitoring and evaluation of their programmes and projects, stakeholders to develop comprehensive annual work plans and cost the activities/strategies, stakeholders will report on attainment of the indicators towards achievement of the targets. We shall also seek to support monitoring and evaluation and reporting ministry involved in oil/gas and other mineral resources sector will constitute M & E Committee to conduct continuous monitoring and periodic evaluation of the Plan, to increase tonnage of mineral Concession, Re-tendering for concession, Petroleum exploration, development and production of oil/gas, Processing distribution and marketing of oil/gas products, Increase electric power generation, Formulate and implement policies, laws and regulations governing the extractive industry, commercial explosives and geo-information services, Carry out geological surveys, mineral exploration and deposit evaluation for development, management and audit, Establish systems and structures for management of mine health, safety and environment, Undertake assessment, mapping and monitoring of land cover and land use for conservation, planning and decision making, Develop geospatial data infrastructure for effective collection, analysis and dissemination of mineral, environmental and natural resources information for planning and decision making, Promote capacity building to improve efficiency, proficiency and productivity in the mining sector and geo-information services; and Promote commercialization of the mining industry, Restructure the institutions within the oil sub-sector i.e. restructure and enhance the National Oil Corporation of Kenya financial capacity to conduct upstream business, Sub-divide and create new petroleum exploration blocks based on technical data, Facilitate development of rail and road networks for exploitation of the minerals in all regions and sectors, Enhance primary data acquisition, analysis and interpretation in the open blocks so as to make them attractive to investors, Establish national petroleum data centre, Enhance partnership in data exchange so as to reduce cost in exploration and access to new technology, Skills development and enhancement of local expertise in petroleum exploration and production through training, technical collaboration with exploration companies and universities, Develop Logistics and Supply Chain Management for the oil and gas, Effectively manage the environment and social economic issues, Reconstitute the National Fossil Fuels Advisory Committee , Acquire specialized survey and exploration equipment; and Enhance corporate governance in the government institutions charged with petroleum exploration and development.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to Restructure the institutions within the other mineral resources sub-sector, Conduct a National Airborne Geo-physical Survey, Conduct mineral exploration and evaluation, Create a Special Mineral Processing Economic Zones, Establish an Internationally accredited Mineral Certification Laboratory, Establish a Mineral Audit Agency, Facilitate the establishment of Minerals and Metal Commodity Exchange, Establish a Geological Survey and Research Centre, Establish a Mineral Sovereign Fund, Establish a National Mining Corporation, Establish a National Seismological Network, Undertake geo-hazard mapping and monitoring, Enhance partnership in data exchange so as to reduce cost in exploration and access to new technology, Develop fiscal regime for mining, Develop a National Mining Policy, Legal, Regulatory and Institutional Framework, Participate in the Extractive Industry Transparency Initiative, Facilitate establishment of a National Mining Institutions from artisal to University , To establish the true value, quantity and quality of minerals, Metal and Mineral Commodity Exchange, ,Establish the commercial viability, develop the requisite infrastructure and production in the oil, gas and other minerals sector Strategic objectives Data collection, collation and analysis, enhance partnership in data exchange so as to reduce cost in exploration and access to new technology, skills development and enhancement of local expertise, commercial production of oil and mineral resources, development of the requisite infrastructure National airborne geophysical survey, To identify potential mineralized areas for ground follow-up, Potential mineralized areas mapped, Upgrade and annual maintenance of mining cadas- tre system, To implement allow online transactional application, Web portal for public access, Geological survey and research, To increase geological data acquisition Geological mapping of the country, Mineral exploration and evaluation, To evaluate mineral deposits in the country, Resource evaluation reports, Mine health status, safety and environment, To improve health and safety in mines and quarries, Reduced mine fatalities, Programme/ Project Objectives Expected Output/Outcome Implementing Agency, Geo-hazard mapping and monitoring, To reduce risk from geo-hazards and contribute to the national disaster platform, Reduced death and loss of property due to geo-hazards, Purchase of specialized tools and equipment, To facilitate effective geological and mineral data collection and interpretation Equipment and tolls purchased, National geosciences data and information centre To enhance access to and dissemination of geological data and information Databases developed, Mineral audit agency, To value minerals for the purpose of taxation Increased revenue to the country, Mineral certification laboratory, To establish an accredited mineral laboratory Strengthened capacity for mineral analysis and identification Increased revenue , Pro- gramme/ Project Objectives Expected Output/Out- come Implementing Agency. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to Mineral Processing Economic Zones To promote and develop skills and value addition Processed raw minerals, Natural Resource Data and Information Policy & Bill To develop a policy that ensures sustainable management of natural resources Policy document; a Natural Resource Data and Information, Development of Natural Resources Geo-database and ICT infra- structure, To analyses store and disseminate data and information for sustainable management of environment and natural resources, Created databases on land use/land cover status wildlife/livestock populations in the rangelands and vegetation/ forest cover, Aerial surveys for natural resource assessment and monitoring in the rangelands , To generate data and information on environmental attributes and status of wildlife/ livestock in the rangelands Mapped spatial distribution of natural resources, Mapped wildlife dispersal areas, migratory routes/corridors,. Effective management of the environment / Natural Resources and socio economics , To study the impacts of mining activities on the environment and natural resources e. Impacts in specific areas established and documented , Surveys for land use/ land cover assessment and mapping, To generate spatial data and information on land use/land cover and land degradation Land use and land cover assessed and mapped , To increase supply reliability and safety Modernized pipeline, Construction of additional storage tanks, To increase supply reliability and safety Additional Tanks ,Installation of a oil pumps, To improve efficiency of the pipeline Pumps installed, Expansion of truck loading facilities Depots, To improve efficiency, Installation of integrated security system in mines and pipelines, To improve security within oil and mines facilities Integrated Security System improved, boasting mining techology machinery and equipment for artisans and commercial mines, To expand retail network, additional retail oil stations and mineral shops, Procurement of National Strategic Stocks of petroleum products To stabilize oil industry, Oil Exploration and exploitation To discover and exploit oil and gas reserves Oil from explored wells exploited, exploration wells drilled , Establishment of an Integrated Data Management System, To computerize existing manual systems in licens- ing of petroleum businesses, Management. Monitoring and implementation of petroleum Exploration Programmes, licensing of petroleum Retail Businesses, licensing of petroleum logistic facilities, businesses & licensing of petroleum road transportation businesses, Integrated Data Management System , Establishment of a modern petroleum and mineral analytical Laboratory, Gemstones polishing plants, Gold refineries, enhance analysis of all rock samples, cutting to ascertain, mineral marketing hurbs, Petroleum analysis enhanment, Speed Diesel electricity generation plants to increase power generation from medium speed diesel electricity generation plants, To increase power generation

from gas and other sources to mines, participation in Petroleum and Natural Gas Explorations nationally and globally, building capacity in exploration of oil/gas, commercial discoveries of oil and/or gas.

Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector towards construction of Geo-chemical and Petro-physical laboratory, To enhance chemical analysis of petroleum, Combined Laboratory (Geochemical & Petro-physical) developed, Construction of a National Petroleum Data Centre to improve data & information on petroleum,Establish Petroleum and Natural Gas Drilling Services Unit to enhance provision of drilling services for oil & gas, Drilling Service Unit developed, Creation of new petroleum exploration blocks to increase oil exploration, New petroleum exploration blocks created & gazetted ,Primary data acquisition in open blocks to collect geological & geophysical data, open petroleum blocks enhanced with new primary geological and geophysical data, Local Manpower Development in Fossil Fuel (Hydrocarbons) Resource Exploration, Development and Production to improve technical skills & knowledge in fossil fuel, to hydrocarbon exploration, development production, building and civil engineering works in mining and oil, auditing, taxation, petroleum law and petroleum market survey, to be determined Construction of New Oil Pipeline, to improve transportation of new oil pipeline and associated infrastructure constructed, Programme/ Project Objectives Expected Output/Outcome Implementing Agency, Petroleum Trading Hub to improve storage of oil Storage tanks of total capacity, Constructed to ease current storage shortage, Construction to improve transportation of oil, Procurement of National Strategic of Petroleum products Stabilized oil industry, Regional and continental Oil pipelines and Port facilities to increase capacity Crude oil and refined Oil pipeline, Oil Refinery, Lamu Oil Terminal and port facilities and Extension of the existing,

We shall seek to support Global & National Chemical Information Exchange Networks, Global & National International Mineral and oil Trade, Global & National Mineral and Oil Common Market in regions and continents, Global & National Mining Sector Coordination Unit, Global & National Mineral Sector Extension Units, Global & National Natural Resources Management Units, Global & National Mineral Houses Units, Global & National Regional Mineral Development Authorities, Global & National Mineral Infrustructure Units, Global & National Miners Savings and Credit Co-operatives to promote artisanal mining, Global & National Mining ICT Information Communication and Technology Units,

1. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector Equipping and empowering mining sector with mineral markets, machinery, technology, capacity building in management skills and welfare in nations
2. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by owning our own consessions of minerals and oil to do exploarations and harvesting as a way of sustaining our global fund mining is key in this agenda.
3. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by Providing support to mining sector in Africa to improve and increase productivity through mechanization of mining, establish global marketing Networks, Providing management solutions of mines and packaging welfare solutions for mines owner and workers to enhance profitability and efficiency mining industry in Africa for Job creation, poverty eradication and economic empowerment.
4. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by Solving challenges of people in the mining sector and create opportunities by Providing global market and network. We have already a data base of all major players and stake holders in the world in mining industries including mine owners, association, financers, facilitators and buyers. We use this network to provide markets for minerals globally. We also package marketing networking to provide safety and efficiency in the marketing of minerals. We seek opportunities for new investment or sales growth via our proprietary market forecasts, which cover all major industry, economic and demographic indicators. Market Opportunities & Risk Management – Identify and quantify operational, market and country-specific risks to your activities via our unique country-comparative risk-reward Business Environment Ratings.
5. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by assessing trend Analysis – evaluate the commercial potential of regulatory and reimbursement developments, investment dynamics, new research and broader economic trends, as well as the impact of global/regional dynamics in your market and domestic demand.
6. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by untertaking national and global competitors analysis Assess the activities, strategy and market position of your competitors, partners and clients via our Company Profiles and Competitive Landscape Tables.

7. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by examining the competitive positioning and short- to medium-term business strategies of key industry players. Strategy is examined, our macroeconomic views and our understanding of the wider competitive landscape to generate Company SWOT analyses. The latest financial and operating statistics and key company developments are also incorporated within the company profiles, enabling a full evaluation of recent company performance and future growth prospects.
8. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector machinery partner with many factories and industries in the world who produce and sell mining machinery to be able to provide appropriate technology in the mining sector through technology advisory and research, Hire, purchase packages, trading minerals for machine along with Providing financial management for miners to create a platform for loans and banks guarantees for miners, advising, educating and training of miners.
9. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector in technology- Provide Miners with appropriate technology to provide efficiency and safety in overcoming various challenges. This skill accusation enhances productivity and profitability of the mining industries and sectors.
10. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector capacity building- Many mines workers have not gone through any formal training in undertaking mining. Through refresher courses we seek to empower all those involved in the mining sector at different levels with relevant skills to enhance productivity through our smart of consultants who include engineers, managers, financial consultants and others experts.
11. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector in welfare- After profitability through mining and mineral many people are not able to manage their wealth for sustainability to develop their families and community. We run an advisory that seeks to create and package opportunities of investments in real estate stock markets, financial services and other viable areas for valuable expenditure and investment of resources acquired through mining sector.
12. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector will engage a team of mining consultants to the department with the first assignment of engage county governments and governments to evaluate existing geo-survey mineral mapping to access potentials and needs since through the secretariat through a PR engage the Governors & MPs to a partnership meeting involving all departments win win partnership in liason with national governments to consider potential projects that need funding with returns and community benefits in the mining sector.
13. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector through religious institutions and networks of men and women to the communities grass root invite community prospecting for people who have seen traces of minerals in their location so that we can engage professional prospecting to verify existing and establish potential community mining projects.
14. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by Identifying and evaluating all our mining companies' prospect institutions and establishment's potential of establishing joint venture funding and facilitation of equipment and machinery and markets along with improving the welfare of community through schools, hospitals etc.
15. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to do joint venture companies and finance licensing and prospecting and activities.
16. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector department to buy high level all mineral prospecting equipment to establish a strong in-house consortium in all regions and countries to have efficient and cost effective prospecting.
17. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector in partnership with governments securing mineral territory and making it safe for mining against wars and arbitrating community water towers in tree planting exercises etc.

18. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector in partnership with our Cities and Development department organize the development of infrastructure and cities / towns around the mining territories.
19. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to buy and maintain complex and variety of mining machines and equipment's as an in-house resource and maintenance shops for the purpose of effectiveness and cost control and engage experienced mining contractors for commercial full scale mining.
20. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to consolidate artisan miners to groups and loan them equipment's and with a revolving fund to build their capacity.
21. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector In liaison with Legal department package / proposals to contracts agreements with county and national governments on repayable funding build infrastructure within mining communities road, schools, bridges, etc.
22. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to provide technical expertise and structure in actual construction works with our Cities and Development department smart team of consultants either as a joint venture or total turnkey all-inclusive construction of industries and factories within the mining territories to enhance value addition and capital formation .BOT (Build Operate Transfer) contracts for some and others we own throughout especially for mega plants and industries.
23. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by engaging into sustainability of BOT contracts for government mines with follow-ups. No project that we begun should die or stall for stewardship and accountability along with image of organization.
24. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector capacity building for the mining sector involves education and training on mineral education and information, updating on legal structures and framework of the country and international laws that establish mining and many more.
25. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to ensure environmental safety from mercury contamination in gold mining areas by advocating Green Clean mining technology in mining operations from the mining sites but concentrated effort and scientific analysis must be done to begin formulating a comprehensive reclamation plan for recovery to clean Up, treat the water and evaluate the extent of problems to the health and welfare of the people as well as the wildlife.
26. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to establish an integrated timeline for benchmark completion dates involving all solution goals.
27. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to find the sources of the contamination evaluate the current health problems associated with the contamination and make an assessment and determination of medical clinics and personnel needed to cure and prevent further health issues.
28. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector set up a monitoring system with the clinics to prevent this from happening to all of the area people and future generations.
29. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to evaluate where the contaminated materials will be taken and treated
30. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by setting up with the local government delivery of minerals for processing.
31. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to develop a master plan road system connecting villages to project sites and means to transport workers on modern highways and bridges.
32. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector utilization of an existing large commercial airfield and deep water port, to be used or import and export of materials and commodities.

33. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector for any mine to effectively operate and produce the desired performance targets set, Establish a roadmap on planning, execution, oversight and management of all the operations pertaining to the Mines. Such a move and decision must be informed and sanction the need to have a Site Manager to carry out such like functions as; Operational and strategic vision of the maintenance on mobile mining equipment.
34. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector in collaboration with the overall management team/client, he/she will be responsible for the supervision, coordination and management of all the processes and operations at the mine site including coaching, training, equipment, tools, logistic, and financial operations side.
35. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector Security systems to secure minerals, machinery, tools and equipment from robbery.
36. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector safely in Quarries and safe working procedures are worked on Securing the working area, following safe systems of work that have been developed in the planning stage ,Carrying out maintenance work only when a machine has been stopped , making sure that protective measures are taken, Installing safety signs whenever a hazard or danger cannot be avoided or reduced in some other way, ensuring that there is safe access to and exit from all work areas, preventing harm to workers carrying out maintenance, protect all workers from accidents and ill-health.
37. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector maintenance of roads regularly maintained to ensure vehicles can be used safely. Roads mustn't be pot-holed or otherwise in bad condition and they should also be kept free of dust by regular wetting.
38. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by advicing and Supervising on Maintenance of edge protection and safety banks. Many accidents at quarries happen as a result of in adequate, or lack of, edge protection, safety banks or barriers. Road side safety banks or barriers are essential safety features at quarries. They can effectively reduce the number of accidents involving quarry vehicles. Safety banks deteriorate due to weathering and the traffic and they should be regularly inspected and maintained.
39. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector in advising and supervising Maintenance of mining and humanitarian vehicles - brake maintenance many transport accident at quarries occur due to faulty brakes. Daily checks should be carried out by the drivers and regular maintenance of the whole of braking system should be done according to manufacturer's recommendations.
40. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector advice and supervise on dust control – maintenance of dust extraction equipment and air filter systems Dust poses a potential health risk to quarry workers. Dust is generated by drilling and sawing, by blasting and excavation operations as well as by haulage. There should be control measures in place to prevent dust reaching levels that could cause harm. Saws and drilling machines should have adequate dust extraction equipment and air filtration systems. Regular maintenance of the systems is essential to ensure that they are effective
41. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector environmental management in green clean mining successful environmental management in the resources sector is dependent on recognizing, and avoiding or minimizing, environmental impacts. Protection of the environment requires careful planning and commitment from all levels and groups within a mining company. Best practice environmental management in mining demands a continuing, integrated process through all phases of a resource project from the initial exploration, through construction, operation, decommissioning and closure. Mining and energy extraction, and associated processing, have the potential to cause a number of environmental problems if projects are not properly planned and managed.

42. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by dealing with mining site Potential problems include: Wind and water erosion (erosion may increase sediment loads and decrease water quality in streams, reduce the productivity of the soil and create a dust nuisance), Contamination of surface or ground water by sediment, mobilization of salt, release of toxic elements from overburden, tailings or wastes, or spills of oil, chemicals or fuel as surface runoff or as underground seepage; Changes to surface and ground water flows and levels; Damage to soils including salination, acidification, pollution and compaction or loss of soil structure.
43. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by managing dust or noise nuisance, vibration and a reduction of visual landscape values; Generation of tailings and other wastes that may release toxic elements or be mobilized by erosive forces; Gaseous emissions from mineral processing, methane emissions from mine openings, fumes from coal seam fires; Possible sudden failure of engineered contain men structures such as tailings dam embankments, settling and holding ponds, resulting in release of high concentration/high volume contaminants; Acid mine drainage (tailings, ore and waste dumps, and old mining areas which contain sulphur or sulphides such as iron sulphide, can generate acid through bacterial oxidation when exposed to moisture and oxygen - this acid leachate may then mobilize heavy metals that can be released into the environment; Loss of flora including direct losses through clearing and indirect effects due to the spread of plant pathogens and weeds; Loss of fauna including direct losses through vegetation clearing and the indirect effects on species through the reduction and fragmentation of habitat and the introduction of feral animals; Damage to heritage sites; and Destruction of adjacent habitats arising from the development of camps, towns and services stimulated by the mining project.
44. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by addressing enviromental mining concerns through governments, mining companies and the minerals industries should as a minimum towards recognizing environmental management as a high priority, notably during the licensing process and through the development and implementation of environmental management systems. These should include early and comprehensive environmental impact assessments, pollution control and other preventive and mitigate measures, monitoring and auditing activities, and emergency response procedures.
45. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by Recognising and managing the importance of socio-economic impact assessments and social planning in mining operations. Social-economic impacts should be taken into account at the earliest stages of project development. Gender issues should also be considered at a policy and project level.
46. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by establishing environmental accountability in industry and government at the highest management and policy-making levels.
47. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector in encouraging employees at all levels to recognise their responsibility for environmental management and ensure that adequate resources, staff and requisite training are available to implement environmental plans.
48. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by ensuring the participation of and dialogue with the affected community and other directly interested parties on the environmental and social aspects of all phases of mining activities and include the full participation of women and other marginalised groups.
49. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by adopting best practices to minimise environmental degradation, notably in the absence of specific environmental regulations.
50. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector adopting environmentally sound technologies in all phases of mining activities and increase the emphasis on the transfer of appropriate technologies that mitigate environmental impacts including those from small-scale mining operations.
51. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by seeking to provide additional funds and innovative financial arrangements to improve environmental performance of existing mining operations.

52. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector adopting risk analysis and risk management in the development of regulation and in the design, operation, and decommissioning of mining activities, including the handling and disposal of hazardous mining and other wastes.
53. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector reinforcing the infrastructure, information systems service, training and skills in environmental management in relation to mining activities.
54. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by advocating the avoidance of the use of such environmental regulations that act as unnecessary barriers to trade and investment.
55. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by recognizing the linkages between ecology, socio-cultural conditions and human health and safety, the local community and the natural environment.
56. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by evaluating and adopt, wherever appropriate, economic and administrative instruments such as tax incentive policies to encourage the reduction of pollutant emissions and the introduction of innovative technology.
57. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by exploring the feasibility of reciprocal agreements to reduce trans-boundary pollution through best practices. Ideally there needs to be personnel responsible for environmental issues, irrespective of the mine's location, with the information they need to achieve good environmental performance, minimize conflicts with other land users, maintain ecological values in surrounding areas and restore or enhance the land use capability of the areas affected by their activities. They cover planning, monitoring, management systems and technical issues. The information is also valuable for staff at other levels and in other areas of the mining company hierarchy to improve their understanding of environmental issues and to build a sense of responsibility amongst all mine staff. Members of stakeholder representative groups, regulatory authorities, and students of mining and environment subjects will also find the booklets a valuable resource to improve environmental awareness, understanding of various principles and technologies, and the capacities of leading practitioners to significantly reduce the level of environmental impact from mining.
58. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector by adopting in depth approach, guidelines and recommendations to effective environment Management Practices including Mine planning for environment protection, Conduct and Environmental impact assessment, Community consultation and involvement, Environmental management systems, Environmental risk management, Cleaner production , Planning a workforce environmental awareness training program, Water management, Energy efficiency use, Air and Dust control, Noise vibration and air-blast control, Managing sulphuric mine wastes and acid drainage, Environmental monitoring and performance, Environmental auditing , Landform design for rehabilitation & Reclamation and Mine decommissioning
59. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by managing the gender impacts of mining that green clean mining project. Our work shows that the impacts of mining are not gender neutral. Women often experience the negative impacts of mining more than men, and rarely receive the benefits that men do. Our works shows that women aren't consulted when companies negotiate access to land, compensation or benefits. When mining damages the environment, it undermines women's ability to provide food and clean water for their families and can increase their workload. Compensation and benefits are paid to men "on behalf of" their families, denying women access to mining's financial benefits and potentially increasing their economic dependence on men. Women can lose their traditional status in society when mining creates a cash-based economy. A transient male work force can bring increased alcohol, sex workers and violence into a community, which can affect women's safety. Women mine workers often face discrimination, poor working conditions and unequal pay for equal work.

60. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by embracing guidance to ensure positive value in clean mining. Mining is destructive to the environment as trees and vegetation are cleared and burned for mining. Natural minerals and metals are stripped from the soil. In fact mining is one of the causes for deforestation. When environment is drastically affected, naturally the people will be affected. The mining pits dug during land dredging mining remain as stagnant water pools serving as breeding ground for mosquitoes and other water-born insects. People living near such water pool areas have high possibility of getting water-born diseases such as malaria. The gravel, mud, and rocks displaced during river dredging mining disrupt the natural flow of the river. As a result, fish and other aquatic living organisms often die and fishermen find it very difficult to navigate in the obstructed rivers. Sand and gravel mining may sometimes pave way for contaminating the groundwater.
61. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by managing chemical contamination. Chemicals used during mining process causes pollution to the environment, animals, and people. The chemicals such as cyanide, mercury, or methyl mercury used to amalgamate the metals and minerals extracted by mining are discharged into rivers, streams, bays, and oceans, thus contaminating the water bodies and the aquatic organisms such as fish living within the water bodies. People who consume such contaminated aquatic organisms are prone to serious health hazards. The contaminated water cannot be used for bathing, drinking, cooking, or washing clothes, thus creating water scarcity problem for people living nearby. The toxic waste from mine tailings flow into either an abandoned mining pit or adjacent forest in the case of land dredging and pollute the river in the case of river dredging. The people who are exposed to the toxic waste from the tailings suffer health problems. They may suffer from skin rashes, headaches, vomiting, diarrhoea, etc. Some mining involves the unintentional dispersal of heavy metals, such as lead, into the atmosphere. This can have serious health effects such as mental retardation in children. Asbestos dispersed into the environment during asbestos mining is life threatening for local residents and workers.
62. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector dealing with negative impacts of socio economic livelihood in mining areas. People living near mining areas or mining villages are very much disturbed and affected by the impact of mining. Theft, drugs/alcohol, prostitution, rape, cultural degradation and sexual abuse are unfortunately some of the worst problems of people living in mining areas.
63. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector in dealing with poverty. The poor people who face the health problems of mining cannot afford for a medical treatment, or the people who live in a remote village where a doctor is not accessible remain untreated for their illness. The mining operators and their families may also face problems. The miners also have life risks when they are working in the mine. The family of small scale miners may suffer from financial and protection problems as the miners leave their family in search of work. The effect of each proposed mining process on the environmental should be analysed before granting permission to precede mining.
64. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector dealing with effects of aftermath of negative effects of materials used in mining. Use of asbestos are banned in most parts of the world life as asbestos dispersed into the environment is life threatening for people for several years. Thus deforestation, mineral/metal depletion and chemical pollution due to mining can have unfavourable impact on the environment, aquatic habitats, people, animals, and of course the mining operators. Mining operators must be aware of the impacts of their mining operations, adopt self-safety measures and ensure minimum risk to the environment and people.
65. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by managing the economic impact of clean mining in the project. According to the proponents, mining leads to economic expansion and decreasing poverty. They especially regard the following aspects as economic advantages, Higher tax incomes for states, thanks to mining activity, Improving services and increasing employment in local communities, The raised demand for goods and services makes the economy of local communities thrive. The costs and profits of mining are not fairly distributed and in many cases the profits even don't live up to the costs, as a result of the enormous passive social and ecological costs. Private enterprises make profits, but the agricultural communities have to bear the (passive) costs. The local economies are seriously disturbed, by e.g. the Dutch disease effect, a macro-economic phenomenon which occurs when foreign currencies gain by the extraction of natural resources. In many cases the contribution of mining to a micro-economic situation, then, in a global perspective, is rather negative than positive.

66. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector managing pollution of the environment means a serious threat to the ecosystem and the health of the local communities, with grave consequences for the farmers, who depend on agriculture. On a global level, it is injust that natural resources which actually belong to the South, produce enormous profits for western enterprises and shareholders in the North and merely a very small percentage remains as 'royalties' for the local communities. The well-known story about the colonisation of the South just goes on, but on a much larger scale today than centuries ago.
67. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector in management and maintenance in quarry management for clean mining we shall also own and run sand quarries, barrast quarries and blocks quarries for our development and city projects. Mining and quarry work has to be performed safely. Quarries are very dangerous places and safe working procedures are absolutely vital. These include Securing the working area, Following safe systems of work that have been developed in the planning stage, Carrying out maintenance work only when a machine has been stopped and, where this is not possible, making sure that protective measures are taken, Installing safety signs whenever a hazard or danger cannot be avoided or reduced in some other way, ensuring that there is safe access to and exit from all work areas.
68. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector creating environment of safety to workers and machinery. The focus of this e-fact is on preventing harm to workers carrying out maintenance, but it should also be kept in mind that maintenance is essential to protect all workers from accidents and ill-health – lack of maintenance can cause serious and deadly accidents.
69. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by Maintenance of roads in the mines and mining communities. Where possible, long-term haul roads should have asphalt or concrete paving and all road surfaces should be regularly maintained to ensure vehicles can be used safely. Roads mustn't be pot-holed or otherwise in bad condition and they should also be kept free of dust by regular wetting.
70. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to advice and supervise on Maintenance of edge protection and safety banks Many accidents at quarries happen as a result of in adequate, or lack of, edge protection, safety banks or barriers. Road side safety banks or barriers are essential safety features at quarries. They can effectively reduce the number of accidents involving quarry vehicles. Safety banks deteriorate due to weathering and the traffic and they should be regularly inspected and maintained.
71. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to advice and Supervise Maintenance of vehicles - brake maintenance. Many transport accident at quarries occur due to faulty brakes. Quarry vehicles operate in extreme working environment and under difficult conditions and this should be taken into account when setting up the frequency of brake maintenance schedules. Daily checks should be carried out by the drivers and regular maintenance of the whole of braking system should be done according to manufacturer's recommendations.
72. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by strong advice and supervise on dust control – maintenance of dust extraction equipment and air filter systems. Dust poses a potential health risk to quarry workers. Dust is generated by drilling and sawing, by blasting and excavation operations as well as by haulage. There should be control measures in place to prevent dust reaching levels that could cause harm. Saws and drilling machines should have adequate dust extraction equipment and air filtration systems. Regular maintenance of the systems is essential to ensure that they are effective.
73. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by environment management in clean mining. Successful environmental management in the resources sector is dependent on recognizing, and avoiding or minimizing, environmental impacts. Protection of the environment requires careful planning and commitment from all levels and groups within a mining company. Best practice environmental management in mining demands a continuing, integrated process through all phases of a resource project from the initial exploration, through construction, operation, decommissioning and closure. Mining and energy extraction, and associated processing, have the potential to cause a number of environmental problems if projects are not properly planned and managed.

74. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector managing all applications and types of mining operation along with quarries that we own along with others.
75. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively strip mining process – as the name suggests the surface of the earth is stripped. In this process the soil and rocks that lie above is removed generally by heavy machinery and then the material is extracted. This type is possible only when the targeted materials are relatively near the surface. The mineral generally extracted is coal or some kinds of sedimentary rocks.
76. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively placer mining process – in this process alluvial deposits in sand or gravel are extracted. This process does not involve the usage of any sort of heavy materials and can be considered relatively easy when compared to others. Generally gold and other gemstones are mined in this process.
77. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively mountain top process – this process involves blasting of the top of mountains expose the coal below it.
78. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to manage effectively the hydraulic mining process – in this process high pressure water jets are used to dislodge rocks and minerals. During earlier times gold was found in an easier way by this method. However, this process has been discontinued due to environmental concerns.
79. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively dredging process – it is the process of underwater excavation by deepening a water body. In this method sediments and other substances are removed from harbours, rivers and other water bodies and minerals are extracted.
80. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to manage effectively open pit process – the easiest and the cheapest way to mine materials that are close to the surface, large open holes are dug in the ground. Sometimes, explosives are used to get large blocks of rocks out of the way. Regarding underground mining there are five processes.
81. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively slope mining process – a type of underground mining, slopes are made into the ground and the desired material is accessed. This is done when the minerals are located far enough and surface mining cannot be employed to reach it.
82. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively hard rock process – here tunnels deep in the ground are dug sometimes with dynamite or large drills. The tunnels are supported by pillars through which miners can move about. Tin, lead, copper, silver, gold etc. are mined with this process. This is typically the mine that comes to our minds when we think of it.
83. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively drift mining process – this process is carried out when the material is situated sideways of a mountain. The materials are easier to access and the mouth is made slightly lower than the resource area so as to allow gravity to pull down the materials easily. Generally, coal or iron ore is mined through this process.
84. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage effectively shaft process – the deepest form of underground mining, this is done by excavating a vertical passageway deep down. The materials to be extracted are situated deep inside and elevators are used to take the miners up and down. It is kept in mind that the tunnels are made airy for miners to work without any problems.
85. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to manage effectively borehole process – using a drill a deep hole is dug and a high pressure water-jet is used to force the materials up the hole. Sand, galena, gold etc. are mined by this process. The mining processes are interesting and the advancement in machinery has brought revolutionary changes in the mining process and safety of the miners.
86. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to support staff, processes and activities for maintaining all plant machinery to ensure safe, continual and efficient operation.

87. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to ensure periodic and preventive maintenance are appropriately scheduled and accomplished and that emergency troubleshooting and maintenance support are readily available as needed.
88. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions , organizations, projects along with stakeholders in the mining sector to oversee maintenance goal setting, activity scheduling, work performance and performance management to ensure measurable goals, proper workload distribution, goal satisfaction and effective staff performance management.
89. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to monitor and continually improve maintenance processes and maintenance personnel performance to achieve enhanced levels of efficiency through plant Maintenance Manager Competencies.
90. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector towards soundness in plant mining Maintenance Manager Guide and includes t competencies expected for excellence in mining of oil and gas.
91. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector managing multiple and distributed manufacturing plants.
92. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector implements and enforces premises security programs, Designs and plans the operation and integration of multiple manufacturing plants, Monitoring industry trends and marketplace experiences relevant to manufacturing plant operations, Evaluating productivity and cost-effectiveness of operations, workflow and equipment, industry benchmarks and trends, identifies characteristics of high performers in industry.
93. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to Human Resources management and hiring top staff in the company and mines.
94. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector Carrying out oil and gas exploration and productions advancing production technologies have produced an upsurge in exploration into new technology involved in exploring for, finding, and eventually producing oil and/or gas will aid in understanding the need for some of the provisions mineral owners.
95. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector for oil and minerals through the process followed by oil and gas companies to explore for and produce petroleum by initial interest, leasing, geophysical survey, drilling, and production using best practices.
96. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector ensuring coherence between programme activities designing capacity development tools, training materials and knowledge products, conducting data analysis and disseminating widely, conducting communication and outreach activities, coordinating with existing partners and forging new partnerships, and leading the organisation of events.
97. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector providing substantive and technical support to programme implementation through conceptualization, formulation and design of capacity building interventions (e.g. project documents concept notes, guidelines, toolkits, manuals, background documents, policy papers, training manuals etc.
98. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector leading the delivery of the structured formalisation and business acceleration package for selected countries.
99. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector monitoring the progress on the programme's results framework and performance indicators and take action/decision and/or provide timely support to project staff.
100. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector coordinate the preparation of work plans, and produce timely reports as required by and donor reporting systems.

101. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to ensure a management information system is established, which allows the efficient and effective collection, storage and analysis of data throughout the project, including gender and sex-disaggregated data where relevant.
102. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to ensure the timeliness and quality of the outputs as well as the timely preparation of reports on achievements and challenges faced within the project.
103. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to ensure gender is integrated and mainstreamed throughout the programme's outputs.
104. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to support establishment and monitoring of contractual arrangements with partners at the regional/ sub-regional level.
105. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector conduct assessments of partners' capacity and prepare guidelines for small grants under the project and ensure adherence to them.
106. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to promote identification and synthesis of best practices and lessons learned for organizational sharing and learning.
107. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector partnerships and policy advocacy under the guidance of the Project Managers, mobilize, foster and strengthen strategic partnerships with intergovernmental organisations, regional institutions of the private sector, industry associations, multi-lateral and bilateral organizations, global agencies, civil society actors, academia and research institutions to advance and support the program.
108. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by Seek and identify additional partnership and funding opportunities for scaling up mining projects activities, and oversee the preparation of funding proposals, briefings and presentations in support of resource mobilization to advance the programme's.
109. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector providing strategic inputs into policy dialogues at regional, sub-regional and country levels that improve the profile and management of the Development Minerals sector communications and knowledge management.
110. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector supporting knowledge generation, management and knowledge sharing across countries and regions as part of the program.
111. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector ensuring collation of project's training materials, communications materials, reports and other key documents.
112. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector providing oversight in the management of the programme's knowledge-sharing platform, and the websites at global and national level.
113. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector coordinate the preparation of the regional workshops along with leading and coordinate the implementation of the project's communication and visibility guidelines.
114. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector providing active stakeholder engagement with the relevant documentation and communication products required to effectively deliver on messaging to key stakeholders.
115. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector ensuring implementation of communications activities related to the project.
116. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector programme is successfully implemented in accordance with its programme document and the contribution agreement with countries, miners organizations and companies.
117. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector building the capacities of key stakeholders in the development Minerals sector is enhanced.

118. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector steps are taken in selected countries to improve the management and operations of the Development Minerals sector.
119. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector research methods such as stratigraphic analysis, geophysical techniques, review of geological maps and literature, and photo geographical mapping coupled with on-site examination of rock strata out-cropping, may indicate if petroleum deposits exist in a particular area.
120. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector towards exploration activity in a particular area is another indication that a company not previously involved may want to explore whether other petroleum deposits may have been overlooked.
121. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector Initial interest also may be established on a hunch. The hunch is still based on research, but the decision to drill an exploratory well is based on less detailed research information than the other two methods.
122. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector leasing and purchasing lands along with mineral rights after establishing an initial interest in a particular area, the next step for the company is to determine who owns the land -- especially the mineral rights -- and, if possible, acquire (purchase or lease) the rights to allow further exploration as a lone agency investment or a joint venture. A mineral lease is a contract that temporarily conveys a property right to the company, not unlike any other lease. In this case, the company that leases the mineral rights acquires the right to explore for and extract oil and gas. Each lease is negotiated and agreed upon individually. The negotiating process usually begins with the landman offering the company's standard lease.
123. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector investing in the initial compensation to the mineral owner for leasing the mineral rights is a bonus payment and perhaps a delay rental payment. These payments are explained as part of the discussion about the royalty clause in a mineral lease.
124. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by helping to manage competition for Leases that brings strives and war in communities. The basic geological potential for oil and gas deposits exists throughout most of No. However, it is unlikely that payments for leases will become competitive until the potential exists for production that can be integrated into established transportation systems (i.e., trucks or pipeline). Thus, access to transportation imposes a pattern of leasing activity that spreads outward from discoveries of significant quantities of oil and gas.
125. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to do exploration of surrounding land in mineral territories quite distant from existing wells to be leased if they have production potential. Some companies are prepared to invest in the cost of holding large lease acreages, hoping that successful exploration by themselves or other companies will cause a portion of their holdings to become valuable. When a successful wildcat well is drilled a significant distance from previous production, there is likely to be an increase in leasing activity. This also may occur when new information from geophysical testing gives a favorable indication of deposits. Even though drilling information is readily available in local oil industry journals or on the Industrial Commission web site, the results of geophysical tests are seldom made known to the public. Neither distance from existing production wells nor lack of recent exploratory activity is a reliable indicator of production potential. Interest in developing a particular area is best determined by consulting as many sources as possible including neighboring mineral owners, oil industry journals, and county and state officials charged with issuing permits for various phases of the exploration and production process.
126. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to carryout geophysical survey on potential lands a lot minerals exists without verifications in many developing countries we shall invest in the latest technology of verification of minerals. With initial exploration and lease acquisition completed, the company can begin more advanced phases of exploration we shall begin additional exploration to check additional information and data, or wait in "frontier areas" to see what oil gas and mineral activity develops. In some situations, on-going activities within the company may take priority over new exploration projects.

127. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by investing in seismic Exploration. The seismograph provides the only direct way of acquiring subsurface structural information without drilling a well. Shock waves, generated at or near the earth's surface, penetrate the earth's crust and reflect back to the surface from the subsurface rock layers. The reflected signals are recorded and a record obtained from which the depth of various underground formations can be measured. Ideally, such information will reveal patterns of rock formations such as faults, anticlines, and folds where oil and gas deposits have a good chance of being found including 3-D sesmic reports.
128. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector invest in drilling and harvesting of minerals machinery technology. After the leases are signed we shall go further towards drilling or harvesting we shall invest heavily on oil and mineral drilling equipment as our inventory to lease to artisanal miners and for our own use. We shall do final environmental and mining plans to ensure minimal damage on the mines and communities. In this process ensure availability of water in wells or boreholes.
129. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector will help nations to confirm viability for productive well of oil and gas along with mineral pockets to warrant mass investment in mining. Many lose money by investing in dry holes- If drilling does not result in the discovery of a petroleum deposit, the well is plugged with cement and abandoned. Should a well prove to be productive, the well is completed (which may include hydraulic fracturing), and production equipment is installed. In either case, the drilling rig is “demobilized” and removed -- possibly to another well site where productivity is not valid.
130. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector commercial production of oil and mineral harvesting. A decision on whether a well is productive or non-productive is made when drilling reaches the pre-calculated producing zones. If oil or gas does not come to the surface in the drilling mud, tests can be taken to pinpoint the petroleum containing-formations. Two types of tests normally used are the drill stem test and well logging.A mineral lease obligates the oil company to operate the well and produce the oil if a sufficient quantity is found. The issue becomes whether a well is producing a sufficient quantity to warrant operation. If the exploration yields a dry-hole or if it yields considerable oil, the answer is clear as to whether or not the well will be operated. It is the marginal producing well where this becomes an issue. The price of oil also can impact the decision; a marginal well may not warrant operation if the price of oil is low, but it may be economical to operate if the price is high. Thus the determination of whether a well warrants production can change with a rise or fall in the market price of oil. It is not just a matter of the quantity produced; it also is a matter of the cost of operating relative to the value of the oil produced. Mineral owners will want to address this issue of operation as part of mineral lease which we seek to do.
131. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by engaging governments on matter of managing tax negative effects on mining. Perceived mineral endowment, infrastructure, unilaterally change an agreed tax regime by political stability, investment policies, and adding new taxes or increasing tax rates institutional framework, are all key determinants impose price controls on inputs or outputs of exploration and investment decisions. There is or both general agreement that sound, stable policies insist on the company undertaking marginal could significantly reduce investor risk even in the investments including smelting or refining face of political changes and corruption.
132. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector that requires infrastructure or community-social The lack of basic geological data and maps is investments which were not originally a constraint to doing business in many independence, considerable compilation.
133. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by establishing sound mining and investment efforts have been made by governments, often codes with clear rules and guarantees with international and bi-lateral assistance, and the regarding exploration and mining rights, resulting maps and publications provide useful majority ownership by the private investor, information. However, these assistance programs taxation, foreign exchange, escrow accounts, were frequently shaped to the needs of the and profit and capital repatriation. It is contributor rather than the receiver and the essential that these rules be set out before resulting information is published at a variety of exploration takes place. scales and in vastly different formats. In some instances, information was not retained in the host. Assuring companies that they will have the country and is only available today from the right to mine following successful assistance group. Major repositories of geological exploration, and that they will be permitted to and geophysical information outside the region transfer or trade exploration or mining can be found.

134. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to engage on legal framework which adequately defines the investor's rights and obligations. This It is instructive to see how developing includes legal safeguards which set forth countries in other parts of the world attract important details like operational control, mining investment. Important examples are marketing arrangements and dispute resolution.
135. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to negotiate a flscal package which shares out equitably attitude which favors creation of wealth rather the rent of profitable production among the than controlling its production, a coherent body of various parties concerned. laws and contractual regulations, and effective state institutions to support the mining sector.
136. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector liquidity and security to guarantee access to foreign exchange to be able to attract market rates for repayment of debts, capital foreign mining investment at a rate at least and profit repatriation, and purchase of commensurate with their perceived geological essential inputs. promise, and on terms and conditions generally favorable to the countries mine value through mine value collateral
137. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector win win legislation drawn up for artisanal small-scale mineral gold and precious minerals miners. Apply equally to all investors, public and rush type operation then prevalent in mind and private, domestic and foreign. Both the envisaged a negligible economic or technical role code and associated tax system should for government. The legislation was deficient in encourage efficient and orderly exploration that it provided insufficient rights and obligations and development. for both governments and investors, including inadequate security of tenure for investors willing.
138. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector enacting the mining policy into constitutions to clearly specify the ownership of mineral to undertake the larger mining operations which resources (for example national or provincial ownership) and vest a single authority with comprehensive mining code. However in the power to grant exploration and mining countries with little mining background, poor rights and administrative capabilities. Individual Investment agreements will probably be more suitable.
139. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector contains explicit criteria for the allocation of rights, the transition from exploration to A mining code has an enabling, as well as a mining rights, and allow exploration and restricting, purpose. If all provisions are written mining rights to be transferable and saleable.
140. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to ensure that land under license is either circumstances in which the particular grant is actively explored and worked or relinquished appropriate have to be envisaged in advance. Minimum work requirements or surface areas, environmental protection is a rentals should be clearly specified good example, where rapidly changing international standards make it difficult
141. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to prescribe procedures for settlement of implement detailed legislation without frequent disputes either in the courts or by arbitration.
142. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to provide legal frameworks to support artisanal mining general legislation over arrangements for the resolution of with subsidiary specific regulations approved by disputes but the emergence of satisfactory decree that circumscribe ministerial discretion in systems of international arbitration reasonable and risk-reducing ways is preferable. Depending on the circumstances of individual difficulty countries, reform of mining codes can probably be best achieved by gradual adjustment rather than much of the mining legislation enacted in an immediate shift to another fully-elaborated developing countries since independence envisages framework. Pending enactment of new mining that "small-scale mining" will be reserved for codes, investment agreements should be citizens or local companies while "large-scale negotiated.

143. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector Legal Safeguards for investors. Countries need to establish arrangements for settlement and fiscal environment in the country, form a of disputes, force-majeure provisions, clear picture of the way their "deal" would be guarantees against improper termination or structured, and review the guarantees and confiscation, including the use of internadonal safeguards which would underpin it. Among the arbitration through agencies such as more important issues in such documents are: International Center for the Settlement of Investment Disputes (ICSID) * Clarification of Mineral Rights: The draft model agreement represents only agreement should not duplicate the mineral the government's first position with respect to a rights in the mining to or acquisition of foreign financial assets.
144. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to do provide extensive training for host country this effectively it is necessary to estimate the workers. Core technology will then be possible a wealth of duties would be licensing and administration of knowledge has been generated on the mineral exploration and mining rights, monitoring potential of in developing countries.
145. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to impact Mining Projects on Soil Quality Mining operations routinely modify the surrounding landscape by exposing previously undisturbed earthen materials. Erosion of exposed soils, extracted mineral ores, tailings, and fine material in waste rock piles can result in substantial sediment loading to surface waters and drainage ways. In addition, spills and leaks of hazardous materials and the deposition of contaminated windblown dust can lead to soil contamination.
146. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to mitigate human health and environmental risks from soils generally contaminated soil resulting from windblown dust, and soils contaminated from chemical spills and residues. Fugitive dust can pose significant environmental problems at some mines.
147. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage inherent toxicity of the dust depends upon the proximity of environmental receptors and type of ore being mined. High levels of arsenic, lead, and radio nuclides in windblown dust usually pose the greatest risk.
148. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to manage adverse social impacts of mining which include Displacement of populations and resulting disruption of livelihoods, Increased poverty through a degraded environment on which community subsistence may depend, Increased internal economic inequalities—for example, between men and women, between those with jobs at the mine and those without and between communities receiving royalty payments and other benefits and resource rents and those who do not; and Economic dependency as local economic activity is reorganized to meet the needs of the mine, leaving the community vulnerable to a typical “boom and bust” economy, especially when the mine closes down or experiences reduced profitability as a result of low commodity prices by Mining Projects.
149. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector poor Living conditions for a Mining Project in terms of shelter, hospitals, schools, electricity connectivity, water , sanitation among more areas of live hood.
150. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector challenges about water surface and ground water contamination with metals and elements microbiological contamination from sewage and wastes in campsites and mine worker residential areas.
151. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector challenges of air pollution. Air exposure to high concentrations of sulfur dioxide, particulate matter, heavy metals, including lead, mercury and cadmium and Soil Deposition of toxic elements from air emissions. Mining activities can suddenly affect quality of life and the physical, mental, and social well-being of local communities. Improvised mining towns and camps often threaten food availability and safety, increasing the risk of malnourishment. Indirect effects of mining on public health can include increased incidence of tuberculosis, asthma, chronic bronchitis, and gastrointestinal diseases.

152. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector mitigation complete destruction of the resource through surface disturbance or excavation degradation or destruction, due to topographic or hydrological pattern changes, or from soil movement (removal, erosion, sedimentation), Unauthorized removal of artefacts or vandalism as a result of increased access to previously inaccessible areas; and visual impacts due to clearing of vegetation, large excavations, dust, and the presence of large-scale equipment, and vehicles. Mining Militarization violent Conflicts and Resource Competition Other social impacts of mining can result from militarizing mining areas to protect a mine's assets, potentially in response to local protests against mining operations, existing conflicts with local militant groups or scavenging by poor communities. Militarization can generally lead to human rights abuses, especially those brought about by increased sexual violence and forced relocation.
153. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to mitigate conflict between a mine and community, mining can be the primary driver of severe conflict, with armed groups fighting for control over mineral spoils. and implemented as part of a broad rural development strategy, and should include regularizing informal, simplifying and decentralizing procedures for acquiring mining rights, providing a realistic implementation plan, including institutional capacity enhancement, assisting miners to graduate from subsistence to sustainable businesses, assuring a legal regime that gives right holders enough land, duration of rights and security of tenure, providing accessible institutional, technical and financial support, encouraging support for mining rights from the more established private sector, expanding exploration work that leads to the designation and allocation of areas for mining rights, ensuring regional and international cooperation to address the challenges of conflict minerals, Raising capacity locally to run tracking and certification schemes before enforcing bans on transporting non-compliant minerals, enforcing international norms prohibiting child labour, exploring and launching measures to redress discrimination against women, whether due to the law or operation in practice; and Promoting sub regional cooperation in technology development, research, construction of appropriate plant and machinery, technical standards, compilation of a database of local capacity and generation of financial resources. Sustainable Mining in countries.
154. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector best practice in entire mining process which involves the life cycle of mining begins with exploration, continues through production, and ends with closure and post mining land use. New technologies can benefit the mining industry and consumers in all stages of this life cycle. This report does not include downstream processing, such as smelting of mineral concentrates or refining of metals. The discussion is limited to the technologies that affect steps leading to the sale of the first commercial product after extraction. The three major components of mining (exploration, mining, and processing) overlap somewhat. After a mineral deposit has been identified through exploration, the industry must make a considerable investment in mine development before production begins. Further exploration near the deposit and further development drilling within the deposit are done while the mining is ongoing. Comminution (i.e., the breaking of rock to facilitate the separation of ore minerals from waste) combines blasting (a unit process of mining) with crushing and grinding (processing steps). In-situ mining, which is treated under a separate heading in this chapter, is a special case that combines aspects of mining and processing but does not require the excavation, comminution, and waste disposal steps. The major components can also be combined innovatively, such as when in-situ leaching of copper is undertaken after conventional mining has rubblized ore in underground block-caving operations
155. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector in Modern mineral exploration has been driven largely by technology. Many mineral discoveries since the 1950s can be attributed to geophysical and geochemical technologies developed by both industry and government. Even though industrial investment in in-house exploration research and development in the United States decreased during the 1990s, new technologies, such as tomographic imaging (developed by the medical community) and GPS (developed by the defense community), were newly applied to mineral exploration. Research in basic geological sciences, geophysical and geochemical methods, and drilling technologies could improve the effectiveness and productivity of mineral exploration. These fields sometimes overlap, and developments in one area are likely to cross-fertilize research and development in other areas.

156. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector modern geological Methods Underlying physical and chemical processes of formation are common to many metallic and nonmetallic ore deposits. A good deal of data is lacking about the processes of ore formation, ranging from how metals are released from source rocks through transport to deposition and post-deposition alteration. Modeling of these processes has been limited by significant gaps in thermodynamic and kinetic data on ore and gangue (waste) minerals, wall-rock minerals, and alteration products. With the exception of proprietary data held by companies, detailed geologic maps and geochronological and petrogenetic data for interpreting geologic structures in and around mining districts and in frontier areas that might have significant mineral deposits are not available. These data are critical to an understanding of the geological history of ore formation. A geologic database would be beneficial not only to the mining industry but also to land-use planners and environmental scientists. In many instances, particularly in arid environments where rocks are exposed, detailed geologic and alteration mapping has been the key factor in the discovery of major copper and gold deposits.
157. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector support for technological development, primarily the miniaturization of drilling technologies and analytical tools, could dramatically improve the efficiency of exploration and improve the mining process. Although industry currently supports the development of most new geochemical and geophysical technologies, basic research on the chemistry, biology, and spectral characterization of soils could significantly benefit the mineral industry. Continued government support for space borne remote sensing, particularly hyperspectral systems, will be necessary to ensure that this technology reaches a stage at which it could bring value to the nations and global mining industry.
158. Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector to carry out geological studies using all manner of technology which includes

More robust thermodynamic and kinetic geochemical data to confirm new ore-deposit models particularly for deposits with less environmental impact when mined, better geo hydrological models, geological maps of more mineralized areas, databases for mineralized areas.

Drilling Technology
• application of existing petroleum and geothermal drilling technologies to minerals sector (directional drilling, better bits, down-hole logging)b
• novel drilling techniques (e.g., improvements in slimhole drilling and in-situ measurements)
a Highest priority for this category.
b Has applications for other aspects of the mining industries.
Metal and Coal Mining
• effects of various blasting and ore-handling schemes on comminution efficiency and productivity
• more energy-efficient comminution methods
• more energy-efficient production of ultra-fine particles
• improved components leading toward overall optimization of mining systems
• development of fast, accurate, mineral-liberation analysis with feedback to comminution
• minimization of fine particles in coal production
• development of more efficient recovery and reconfiguration of coal fines
• improved wear resistance in materials used in crushing and grinding
Industrial Minerals
• improved methods for selective grinding and efficient sizing
• improved quality control for consistently sized products

• measurement and control of product size
• measurement of properties of dry fine particles

PHYSICAL SEPARATION

Gravity Separation

• efficient gravity separation for fine particles and ultra-fine minerals
• improvements in multiforce separation technology
• more efficient heavy media
• integration of approaches in multiprocess (gravity and flotation) systems for total plant optimization
• lower cost and increased dependability of process instrumentation and control mechanisms for process parameters

Magnetic/Electrostatic Separation (Wet and Dry)

• efficient, economical, high-intensity magnetic separation technology
• expansion of efficient, economical electrical separation technology
• broader use of efficient, economical nonconductive (eddy-current) type separation technology
• improved on-stream mineral analysis and particle-size distribution

Ore-Sorting Separation

• discovery of specific reagents or instrumentation for surface identification of individual minerals
• ore-sorting systems for minerals with particle sizes under 2.5 mm
• methods of rapid, continuous mineral identification

Flotation

• improved flotation systems for fine and ultra-fine mineral systems
• improved, economical flotation reagents
• improved understanding of column-cell process dynamics and cell design
• perfected on-stream analysis of mineral species, chemical composition, and particle-size distribution
• optimized flotation operations

Selective Flocculation

• selective flocculation processes

HYDROMETALLURGY AND CHEMICAL PROCESSING

• nontoxic, efficient lixiviates for metals extraction
• control and management of environmental hazards and stabilization of solid wastes and aqueous effluents
• new corrosion/abrasion-resistant materials for chemical-processing reactors
• robust, effective on-stream sensors
• models and simulations of processing to predict and optimize processing
• fundamentals of high-pressure and high-temperature reactions
• selective, stable ion-exchange resins and polymers for metals separation
• membrane technologies

Biotechnology

• fundamental advances in understanding of micro-organism/mineral interactions, genetics related to monitoring microbial activity in processing and strain development, and nonacidic microbial leaching systems
• basic research on the genetics of micro-organisms used in mineral processing to develop enumeration and identification techniques and improve microbial strains
• identification of nonacidic microbial mineral-processing technologies with scale-up of the most technically and economically promising processes
• bioprocessing methods for selective metal recovery and concentration

In Conclusion -Kingdom Global Mining and Oil Agency will partner and fund nations, institutions, organizations, projects along with stakeholders in the mining sector by Processing, distribution and marketing of oil/gas products, Increase electric power generation, Formulate and implement policies, laws and regulations governing the extractive industry, commercial explosives and geo-information services, Carry out geological surveys, mineral exploration and deposit evaluation for development, management and audit, Establish systems and structures for management of mine health, safety and environment, Undertake assessment, mapping and monitoring of land cover and land use for conservation, planning and decision making, Develop geospatial data infrastructure for effective collection, analysis and dissemination of mineral, environmental and natural resources information for planning and decision making, Promote capacity building to improve efficiency, proficiency and productivity in the mining sector and geo-information services; and Promote commercialization of the mining industry, restructure the institutions within the oil sub-sector, Sub-divide and create new petroleum exploration blocks based on technical data, Facilitate development of rail and road networks for exploitation of the coal deposits in Mui Basin and other parts of the country, Enhance primary data acquisition analysis and interpretation in the open blocks so as to make them attractive to investors, Establish a national petroleum data centre, Enhance partnership in data exchange so as to reduce cost in exploration and access to new technology, Skills development and enhancement of local expertise in petroleum exploration and production through training, technical collaboration with exploration companies and universities, Develop Logistics and Supply Chain Management for the oil and gas, Effectively manage the environment and social economic issues, Acquire specialized survey and exploration equipment, Enhance corporate governance in the government institutions charged with petroleum exploration and development, Empower institutions within the other mineral resources sub-sector, Conduct a Global and National Airborne Geo-physical Survey; , Conduct mineral exploration and evaluation, Create a Special Mineral Processing Economic Zones, Establish an Internationally accredited Mineral Certification Laboratory, Establish a Mineral Audit Agency, Facilitate the establishment of Minerals and Metal Commodity Exchange, Establish a Geological Survey and Research Centre, Establish a Mineral Sovereign Fund, Establish a National Mining Corporation, Establish a National Seismological Network, Undertake geo-hazard mapping and monitoring, Enhance partnership in data exchange so as to reduce cost in exploration and access to new technology, Undertake commercial production mineral sands project (titanium), Develop a single fiscal regime for mining; • Develop a National Mining Policy, Legal, Regulatory and Institutional Framework, Participate in the Extractive Industry Transparency Initiative, Facilitate establishment of a National Mining Institute and Develop online mining cadaster system and all other projects and objectives mentioned including innovation of new other areas in the future through our research.

The promised land by God was full of minerals- Deuteronomy 8.8 a land where you will eat food without scarcity, in which you will not lack anything; a land whose stones are iron, and out of whose hills you can dig copper.

Abraham and David were all Rich in Gold and Riches

- The real wealth of the Nation lies in the resources of the earth soil, water, forests, minerals, and wildlife. To utilize them for present needs while insuring their preservation for future generations requires a delicately balanced and continuing program, based on the most extensive research. Their administration is not properly, and cannot be, a matter of stewardship and managment.- Rachel Carson
- “Oil creates the illusion of a completely changed life, life without work, life for free. Oil is a resource that anaesthetises thought, blurs vision, corrupts.” — Ryszard Kapuściński, Shah of Shahs
- “Unless government appropriately regulates oil developments and holds oil executives accountable, the public will not trust them to drill, baby, drill. And we must!” — Sarah Palin
- “By the fall of 1918, it was clear that a nation's prosperity, even its very survival, depended on securing a safe, abundant supply of cheap oil.” — Albert Marrin,
- “It is in our best interest to. . . embark on a revolutionary change that will lead us away from oil dependency rather than drag our feet and suffer the costs of becoming growingly dependent on a diminishing resource.' Truer words were never written.” — Albert Marrin
- “For every one calorie of food you eat, ten calories of (rapidly depleting) fossil fuels are stealthily expended in producing it.” — Chris Martenson
- A primary abode and protect us from death. The unfortunate thing is there aren't even any plots held in perpetuity in the cemeteries any more.”— Jean Baudrillard,
- “The oils we used on our torches and in our lamps have kept the darkness of night and predators at bay in our corporate and singular lives. Residual oil was even found in our ancestors’ campfires that were most likely from a meal shared in common around said fire. Oil was in one sense a residual and sign of community and social and cooperative sharing.” — L.B. Ó Ceallaigh,

- “Unless government appropriately regulates oil developments and holds oil executives accountable, the public will not trust them to drill, baby, drill. And we must!”— Sarah Palin
- “By the fall of 1918, it was clear that a nation's prosperity, even its very survival, depended on securing a safe, abundant supply of cheap oil.”— Albert Marrin, Black Gold:
- We think that diamonds are very important, gold is very important, all these minerals are very important. We call them precious minerals, but they are all forms of the soil. But that part of this mineral that is on top, like it is the skin of the earth, that is the most precious of the commons. - Wangari Maathai
- That is the artist's job: take mineral rock from dark silent earth, transform it into shining light-reflecting form from sky.
- Philip K. Dick
- Plants and minerals are bound to predestination. The faithful is only bound to the Divine orders.- Muhammad Iqbal
- After death, life reappears in a different form and with different laws. It is inscribed in the laws of the permanence of life on the surface of the earth and everything that has been a plant and an animal will be destroyed and transformed into a gaseous, volatile and mineral substance.- Louis Pasteur
- Our national conservation effort must include the complete spectrum of resources: air, water, and land; fuels, energy, and minerals; soils, forests, and forage; fish and wildlife. Together they make up the world of nature which surrounds us- of the American heritage.- John F. Kennedy
- And the meek shall inherit the earth.Geddy Lee

- The nation has vast minerals that are still untapped. It has one of the world's largest deposits of gold, nickel, copper and chromite. Through responsible mining, we intend to generate more revenues from the extraction of these resources.
- Benigno Aquino III
- A flower is not a flower. It is made only of non-flower elements - sunshine, clouds, time, space, earth, minerals, gardeners, and so on. A true flower contains the whole universe. If we return any one of these non-flower elements to its source, there will be no flower.- Nhat Hanh
- You do not explain the tree by telling of the water it has drunk, the minerals it has absorbed, and the sunlight that strengthened it.- Antoine de Saint-Exupery
- I am the very model of a modern major general- W. S. Gilbert
- Ten years ago I was not heavily involved in the film world but on reflection it was a boom time with the mineral boom happening, so there was immense growth for industrial training films, documentaries to do with the mining, and the outback world.- Ann Macbeth
- Natural bodies are divided into three kingdomes of nature: viz. the mineral, vegetable, and animal kingdoms. Minerals grow, Plants grow and live, Animals grow, live, and have feeling.- Carl Linnaeus
- I am the very model of a modern Major-General, I've information vegetable, animal, and mineral, I know the kings of England, and I quote the fights historical, From Marathon to Waterloo, in order categorical.
- W. S. Gilbert
- The mineral kingdom consists of the fossil substances found in the earth. These are either entirely destitute of organic structure, or, having once possessed it, possess it no longer: such are the petrefactions. Torbern Bergman
- JavThe twelve precious stones of Aaron’s breastplate. Each stone represented one of the tribes of Israel (Exod.28.17-Exod.28.20; Exod.39.10-Exod.39.13).
- The wisdom of Job (Job.28.16-Job.28.19). Listed are onyx, sapphire, crystal, coral, jaspar, ruby, and topaz.
- The gems of the king of Tyre (Ezek.28.13). Listed are ruby, topaz, emerald, chrysolite, onyx, jaspar, sapphire, turquoise, and beryl.
- The precious stones of the Holy City (Rev.21.18-Rev.21.21). There is a precious stone for each of twelve foundations.
- The precious stones of the Bible are as follows:
- **Agate** (ăg'at) (Exod.28.19; Exod.39.12). This member of the chalcedony family is described under *Chalcedony.* It was the second stone in the third row of the priest’s breastplate.
- **Amethyst** (ăm'e*ch-thĭst) (Exod.28.19; Exod.39.12; Rev.21.20). A purple to blue-violet form of quartz. This is one of the loveliest forms of quartz, and there is general agreement that the amethyst of the Bible is our present amethyst. The LXX translates the term by *amethystos* (amethyst). Natural cubic crystals of fluorite in transparent blues and purples match amethyst for beauty, but this mineral has a hardness of only 4 and is easily split by the tap of a knife blade. Amethyst was the third stone of the third row of the priest’s breastplate and will be the twelfth of the foundation stones of the Holy City.
- **Beryl** (bĕr'yl) (Exod.28.17; Exod.39.10; Ezek.28.13; Rev.21.20). A beryllium aluminum silicate. It is now mined and valued as a source of beryllium, a light metal unknown until a.d. 1828. A single crystal taken from the Black Hills of South Dakota weighed as much as seventy-five tons. Gem varieties include yellow or golden beryl; emerald, which is a highly prized translucent to transparent sea-green stone; aquamarine, which is blue; and morganite, a rose-red variety. Beryl was the third stone in the top row of the priest’s breastplate, and will be the eighth of the foundation stones of the Holy City.
- **Carnelian** (kar-nēl'yan) (Rev.4.3; Rev.21.20). (See carnelian under *Chalcedony.*) Carnelian is also known as sard or sardius. (See *Sardius.*) It is to be the sixth foundation stone of the Holy City.
- **Chalcedony** (kăl-sĕd'ō-nĭ) (Rev.21.19). The third foundation stone of the Holy City. Quartz and chalcedony are both composed of silicon dioxide, but chalcedony does not crystallize into the bold hexagonal forms taken by quartz. Any crystalline character that the various forms of chalcedony have is of microscopic size. The lighter colored varieties are named chalcedony in contrast to such names as carnelian and jaspar.
- The following are some of the varieties of chalcedony.

- **Agate.** Agate is chalcedony with colors unevenly distributed, often banded, with the bands curved. Petrified wood is often a form of agate in which the silicon dioxide has replaced the original wood. Agates are very common and many varieties exist. They have become one of the most popular minerals for cutting and polishing. The moss agates found along the Yellowstone River from Glendive, Montana, to Yellowstone Park are particularly well known. The "thunder eggs" of Idaho and Oregon may look like drab gray stones, but when sawed in two with a diamond saw, they may reveal a center of lovely agate.
- **Carnelian, sard**, or **sardius.** Carnelian is chalcedony with colors usually clear red to brownish red. Iron oxide imparts the color.
- **Chrysoprase.** This is an apple-green variety of chalcedony, sometimes called green jaspar. A small percentage of nickel may account for the green color. Beads of genuine chrysoprase dating to 1500 b.c. have been taken from an Egyptian grave.
- **Flint.** This is usually a dull gray to black form, not prized or classified as a precious stone, but highly prized by primitive peoples for arrowheads, spear points, skinning knives, etc.
- **Jaspar.** Jaspar pebbles may be found in many gravel deposits. The petrified wood of Arizona is largely jaspar. Jaspar is hard, opaque, and takes a beautiful polish. It is sufficiently abundant so that it must have been used by ancient man as a gem stone. Although this gem has many shades, the chief colors are red, yellow, brown, and green. Green jaspar is also known as chrysoprase. The colors largely result from the presence of iron oxide.
- **Onyx.** Onyx is similar to banded agates, except that the bands are flat. Specimens are usually cut and polished parallel to the layers. This enables cameo production. Objects of Mexican onyx, beautifully cut and polished and available in a number of Mexican border cities, are really not onyx at all. The composition is calcium carbonate instead of silicon dioxide. A little hydrochloride acid added to Mexican onyx will cause effervescence, whereas all forms of silica react to this negatively.
- **Sardonyx.** Sardonyx is merely onyx that includes layers of carnelian or sard.
- **Chrysoprase** (krĭs'ō-prāz) (Rev.21.20). (See under *Chalcedony.*) The tenth foundation stone of the Holy City.
- **Coral.** (Job.28.18; Ezek.27.16). Although coral has its origin in the animal world, it is considered here because it is included along with gem stones in the Bible, and gem coral is used in the production of jewelry today.
- When the writer of Job speaks of the priceless value of wisdom, he compares it to a number of precious stones and metals. One of these is coral. The inclusion of coral, which grows in the sea, is difficult to understand on the basis of modern classifications of precious stones. This indicates that in the ancient world other factors were taken into account in the classification of gem stones. Factors that contributed to the value of coral probably included its beauty; its use in the production of jewelry, creating an economic demand for it; and its workability.
- In Ezekiel, coral is associated with turquoise and ruby.
- **Crystal** (Job.28.17; Rev.4.6; Rev.21.11; Rev.22.1). In the OT the word "crystal" is derived from a verb that means "bright," "pure." In the NT it is derived from the word for "ice" and thus connotes a mineral that is bright and transparent. It is generally understood to refer to glass or clear quartz. This type of quartz is remarkably brilliant and beautifully shaped, even as it is found in nature. However, the word could connote other brilliant colorless minerals. The Book of Jobsays that wisdom cannot compare with it. It is used in Revelation to depict the brilliance of the objects with which it is compared, such as the "sea" of glass (Rev.4.6), the Holy City (Rev.21.11), and the water of life (Rev.22.1).
- **Emerald** (Exod.28.18; Exod.39.11; Ezek.28.13; Rev.4.3; Rev.21.19). The emerald is a transparent to translucent deep green form of beryl (beryllium aluminum silicate). The meaning of the Hebrew word is uncertain. It is probably derived from a root that means "to hammer" and may refer to the hardness of this gem. The Greek word connotes a light green gem and is almost certainly the emerald. The emerald was the last stone in the second row of the priest's breastplate and is listed as the fourth foundation stone of the Holy City.
- **Flint** (Exod.4.25; Josh.5.2-Josh.5.3; Isa.5.28; Isa.50.7; Jer.17.1; Ezek.3.9; Zech.7.12). (See under *Chalcedony.*) In all its occurrences in the Bible the emphasis is on its hardness and its ability to hold a sharp edge.

- **Jacinth** (jā'sĭnth) (Exod.28.19; Exod.39.12; Rev.21.20). In modern mineralogy the jacinth is the transparent red, yellow, orange, or brown form of the mineral zircon (zirconium orthosilicate). The meaning of the word in Hebrew is uncertain. However, in the Greek the word connotes a dark blue stone. It is possible that it is the sapphire; if so, the NIV renderings of "sapphire" may represent the lapis lazuli (see *Sapphire*). The jacinth was the first stone in the third row of the priest's breastplate and will be the eleventh foundation stone of the Holy City.
- **Jaspar** (Exod.28.20; Exod.39.13; Job.28.18; Ezek.28.13; Rev.4.3; Rev.21.11, Rev.21.18-Rev.21.19). (See under *Chalcedony.*) The jaspar was the third stone in the fourth row of the priest's breastplate and is listed as the first foundation stone of the Holy City.
- **Lapis lazuli** (lăp'ĭs lăz'ū-lī). (niv margin for sapphire in OT.) The lapis lazuli is a gem of deep azure-blue. It is a soft stone composed of sodium aluminum silicate. It was fashioned by the ancients into various types of ornaments (see *Sapphire*).
- In three of the references given above, there is a strong implication that the mineral referred to was blue (Exod.24.10; Ezek.1.26; Ezek.10.1).
- In Lamentations sapphire is linked to ruby, the other highly prized form of corundum.
- S. **Sardonyx** (sar-dŏn'ĭks) (Rev.21.20). The sardonyx is an onyx layered with red sard or carnelian. It is the fifth foundation stone in the Holy City.
- T. **Topaz** (tō'păz) (Exod.28.17; Exod.39.10; Job.28.19; Ezek.28.13; Rev.21.20). The modern topaz is an aluminum fluoro hydroxy silicate with a hardness of 8, thus harder than the quartz and chalcedony groups. The most highly prized is the yellow topaz; but colorless, pink, blue, and green varieties occur as well.
- The topaz was the second stone of the first row of the priest's breastplate and is listed as the ninth foundation stone of the Holy City.
- U. **Turquoise** (tûr'koiz) (Exod.28.18; Exod.39.11; 1Chr.29.2; Isa.54.11; Ezek.27.16; Ezek.28.13). A blue to bluish-green mineral which is a hydrous phosphate of aluminum and copper. It has a hardness of 5 to 6. The stone polishes well and is commonly fashioned into beads. It was the first stone in the second row of the priest's breastplate.
- **II. Metals.** Of the 103 elements now known to man, 78 are metals. Of these only gold, silver, iron, copper, lead, tin, and mercury were known to the ancients. A metal is an element with a metallic luster; it is usually a good conductor of heat and electricity. Metals such as gold, silver, and copper may occur in nature as the free recognizable metal, or as is true of most metals, they may occur in compound form, chemically united with other elements in such a way that the ore appears dull and nonmetallic.
- Metallurgy is the science of separating the metal from its ore and the subsequent refining and treating for adapting it to its many and varied uses. The earliest reference to a man skilled in iron and bronze work is to Tubal-Cain in Gen.4.22.
- Human progress in metal working has provided anthropologists and archaeologists with a chronological structure for dating various periods in ancient history. This structure includes the Chalcolithic, or Copper Age (4000-3000 b.c.), the Bronze Age (3000-1200), and the Iron Age (1200-586). There is, of course, much overlapping, and none of these ages has really ended. In fact, when one considers the tonnages used, it should be apparent that we are still living in the Iron or Steel Age.
- The metals mentioned in the Bible are as follows:
- **Bronze.** A metal alloy composed of varying amounts of copper and tin. It is generally believed that bronze had its origin in Mesopotamia. The discovery and production of bronze marked a turning point in human history because of its degree of hardness. The softer copper, which continued to be used for some purposes, was replaced to a great extent by bronze in the production of utilitarian objects. However, nails, knives, statuettes, and other objects continued to be made of pure copper far into the Bronze Age. Cyprus bronze usually contained from 2 to 4 percent tin, while a cup from Nineveh, dated about 1000 b.c., tested over 18 percent tin.
- In Hebrew the same word refers to both bronze and pure copper, doubtless because of their similarity. The KJV uses the word *brass*, which at the time of its writing denoted any alloy of copper.
- **Copper.** Copper is a heavy, reddish-yellow metal. It is frequently found on or near the surface of the ground. Its malleability and accessibility account for its being one of the first metals to be used by early man.

- Pliny claimed that copper was found first on the island of Cyprus. He also indicated that it was sometimes alloyed with silver and gold.
- In the Bible the presence of copper ore in Canaan is cited as one of the benefits of that land (Deut.8.9). The process of smelting copper and other metals is used illustratively in its other references in the OT (Job.28.2; Ezek.22.18, Ezek.22.20; Ezek.24.11). In the NT reference is made to the use of copper only in coinage (Matt.10.9; Mark.12.42; Luke.21.2).
- **Gold.** Gold was used freely and skillfully in the oldest of civilizations. A multitude of gold ornaments in the museums of the world verify this. The earliest evidence of gold mining may be found in rock carvings of Egypt, depicting the washing of gold sands and the melting of gold in a small furnace. This went back to at least 2500 b.c. Strabo describes the country of the Iberians (Spain) as full of metal such as gold, silver, copper, and iron. He tells of mining gold by digging for it in the usual way and also by washing for it (hydraulic mining). Pliny the Elder accurately described the occurrence of placer gold in stream beds, including the finding of nuggets. He also described the process of hydraulic mining. He claimed that a river was brought from a distance and from the heights, with enough fall to wash away whole mountain sides, leaving the gold in sluice baffles. Most surprising of all, Pliny described in some detail the use of mercury to capture the gold from the ore by amalgamation.
- Gold is mentioned very early in the Bible (Gen.2.11-Gen.2.12). We are told that in the land of Havilah, in the vicinity of the Garden of Eden, there was gold, and that the gold was good
- Why has man valued gold so highly? Why is gold good? Gold is good and highly prized because it is warmly beautiful. It is enduring, for it never rusts or dissolves away. It retains its beauty. Of the common acids, only a mixture of concentrated nitric and hydrochloric acids (*aqua regia*) will dissolve it. Strong acid alone will have no effect. Pliny mentions gold as the only metal unharmed by fire. In fact Pliny said each time it went through a fire it came out better or more refined than before. Gold is good because it is so adaptable to shaping. It can be melted without harm; it can be hammered into thin leaves because it is extremely malleable. It may easily overlay large objects thus imparting beauty and protection to the whole. It may readily be alloyed with other metals with an improvement of the degree of hardness while still retaining the beauty of gold. In fact Pliny noted correctly that gold comes naturally alloyed with silver. Finally gold has been valued because of its scarcity. It seems reasonable to presume that if the core of the earth is largely iron, the free metals such as gold, platinum, and even cobalt and nickel have been depleted to a great extent because they have dissolved in this core.
- Gold is also mentioned at the end of the Bible in Rev.21.15, Rev.21.18, Rev.21.21. Here the most precious of metals is envisioned as constituting the Holy City and its streets. The rod used to measure the city was a gold rod.
- There are so many references to gold in the Bible that one must use a concordance to find them all. Exod.37.1-Exod.37.29 describes the construction of the ark of the covenant and other appointments of the tabernacle, all made of gold or overlaid with gold.
- When the writer of Job asks where wisdom can be found (Job.28.12), he responds by observing that wisdom is so priceless that gold, silver, and precious stones cannot buy it (Job.28.15-Job.28.19). It is worthy to note that gold is mentioned five times in this passage, whereas each of the other precious items is mentioned only once.
- **Iron.** In spite of advances in the use of light metals such as aluminum, magnesium, and beryllium, we are still living in the Iron Age. No other metal rivals iron in the amount produced. The reason for this is that iron ores, chiefly the oxides and carbonates, are abundant in concentrated deposits, the metal is easily won from the ore and varies over a wide range in its properties. By removing impurities, by heat treatment, and by alloying, the strength, hardness, ductility, malleability, resistance to corrosion, appearance, and retention of temper may be varied.

- Iron does not occur free in nature. When it is so found it is on such a minute scale that it may be considered a curiosity. Terrestrial-free iron is very likely secondary, having been formed from regular ores by hot carbon or carbon-containing materials, a process that is carried out in blast furnaces today. It is clear that ancient man found meteoric iron and shaped it for utilitarian purposes. Iron beds taken from a grave in Egypt dating from about 4000 b.c. contain a nickel analysis corresponding favorably to that of meteorites. In fact, the Egyptians and people of other cultures referred to iron as the metal from heaven. In ancient religious literature the Egyptians claimed that the firmament of heaven was made of iron. An iron object dating to about 3000 was blasted out of the masonry at the top of the Great Pyramid of Gizeh and is now in the British Museum. No one knows who first discovered the way to reduce iron from ore in a furnace. Evidently the discovery was made in the undetermined past. Egyptian frescoes dated at about 1500 depict small furnaces with men operating bellows or mouth blowpipes. This is the essential principle of the modern blast furnace. The first reference to iron in the Bible is found in Gen.4.22 where Tubal-Cain is cited as a worker of iron. In Deut.4.20; 1Kgs.8.51; and Jer.11.4 there is evidence that the Hebrews were familiar with furnaces for the making of iron. There is evidence that as slaves in Egypt they had to work at these furnaces. Their lot must have been difficult. The smith and his forge were well known to Isaiah (Jer.44.12 and 54:16). The Philistines hindered the Hebrew occupation of the whole of Canaan because they were skilled in iron working. They prevented the Hebrews from making and maintaining their own tools and weapons by refusing to allow a single smith in all the land. The Israelites were forced to go to the Philistines to sharpen their plowshares, mattocks, axes, and sickles (1Sam.13.19-1Sam.13.20). But the great victories of David ended all this. When David came to power, iron was used freely by the Israelites. Additional items of iron not previously mentioned are as follows:
- The bed of Og, the Amorite king of Bashan, was made of iron (Deut.3.11). Og was a giant and needed a large strong bed. It was about thirteen feet (four m.) long and six feet (two m.) wide.
- The Israelites feared the Canaanites because they had iron chariots (Josh.17.16, Josh.17.18).
- The spear shaft of Goliath weighed six hundred shekels (roughly fifteen pounds) (1Sam.17.7).
- There is ample evidence that many types of fetters and other implements for binding captives and slaves were made of iron. In addition to these references the term is used in a figurative sense (Ps.2.9; Ps.107.10; Jer.28.13-Jer.28.14).
- Pliny in his thirty-fifth book of natural history discusses the working of iron at considerable length. He introduces his discussion with this comment: “Iron serves as the best and the worst of the apparatus of life, inasmuch as with it we plough the ground, plant trees, trim the trees…with it we build houses and quarry rocks, and we employ it for all other useful purposes, but we likewise use it for wars and slaughter and brigandage.” His further discourses are reminiscent of Isa.2.4 concerning beating swords into plowshares and spears into pruning hooks.
- **Lead.** Free metallic lead is extremely rare. The chief ore is lead sulfide (galena), which often occurs as bright glistening clusters of cubic crystals. The metal is readily obtained from the ore and was known long before it came into common usage. The British Museum had a lead figure of Egyptian origin dated at about 3000 b.c. Lead plates and statuettes have been found in Egyptian tombs of 1200.
- References to lead in the Scriptures are as follows:
- The high density of lead is noted in Exod.15.10. In Num.31.22 lead is listed along with gold, silver, bronze, iron, and tin. Its use for lettering in rock is noted in Job.19.24. Jer.6.29 speaks of the use of bellows in the processing of the metal. Lead is listed with copper, tin, and iron as metals melted in a furnace (Ezek.22.18, Ezek.22.20) and again with silver, iron, and tin as metals used for monetary exchange (Ezek.27.12). See also Zech.5.7-Zech.5.8.
- **Silver.** At the present time much more silver is obtained as a by-product of the refining of copper and lead than by mining native silver or silver ore. The methods used in this refining were not available to the Hebrews, since it requires the extensive use of electricity, cyanide, zinc, and aluminum. However, silver is ten times as abundant in the crust of the earth as is gold, and much of it was mined by the ancients. Pliny says, “Silver is only found in deep shafts, and raises no hopes of its existence by any signs, giving off no shining sparkles such as are seen in the case of gold.” He describes its use for making mirrors and notes that, “the property of reflecting is marvelous; it is generally agreed that it takes place owing to the repercussion of the air which is thrown back into the eyes.”

- The shekel and talent of silver were used as mediums of exchange. At first this was done by weighing out the silver pieces. This is apparent in Job.28.15: "...nor can its price be weighed in silver."
- Silver was used in conjunction with gold because of its beauty. A great many references to silver and gold are found in the Bible. Only occasionally are the terms reversed as in Esth.1.6, which refers to couches made of gold and silver. When Christ sent out the Twelve, he commanded them to carry neither gold nor silver nor brass in their purses (Matt.10.9).
- Many objects made of silver are referred to in the Scriptures. The cup that Joseph had hidden in Benjamin's sack of food was a silver cup (Gen.44.2). Demetrius, the silversmith of Ephesus, made silver shrines for Diana (Acts.19.24).
- **III. The Common Minerals.**
- **Alabaster** (Matt.26.7; Mark.14.3; Luke.7.37). These passages refer to an alabaster box or jar used to contain a precious ointment. Modern alabaster is a form of gypsum (hydrated calcium sulfate). It is soft, with a hardness of 2, and may be scratched by the thumbnail. It is easily carved and many larger decorative articles like book ends, vases, and paper weights are made of this material. It is usually very light in color, but may be mottled or veined with various colors. The ancients may have used a calcite or aragonite mineral resembling our modern alabaster in its general appearance. A simple test with the thumbnail will distinguish between the two varieties. Calcite has a hardness of 3 and cannot be scratched with the thumbnail. Alabaster is usually formed by the process of water deposition in caves.
- **Glass** (Rev.4.6; Rev.15.2; Rev.21.18, Rev.21.21). Glass is a product of the fusion of silicates, borates, or phosphates. Although its use appears to have been widespread in the ancient world, its place of origin is unknown. The ancient Egyptians were, to the best of our knowledge, the first to make small vessels of glass. It appears in the Bible only in the Book of Revelation where it describes the appearance of the "sea" before the throne, and the purity and transparency of the gold of which the street and wall of the Holy City are made.
- **Marble** (1Chr.29.2; Esth.1.6; Song.5.15; Rev.18.12). Marble is recrystallized limestone, capable of receiving a high polish. Limestone is somewhat impure calcium carbonate. Dolomitic marble contains a considerable amount of magnesium carbonate as well as the calcium compound. Marble is used for decorative purposes such as statuary, pillars, and walls of buildings. There is no reason to think that the marble of the Bible was different from the marble of modern times, except in the sense that marble from different quarries varies in color and texture.
- **Salt.** Salt is extremely abundant. The evaporation of one cubic mile of sea water would leave approximately 140 million tons of salts, most of which would be sodium chloride or common salt. The "salt sea" of the Bible was no doubt the Dead Sea. In most of the many references to salt, either the preservative property or else the savor it adds to food is the point of interest. Jesus states that the children of the kingdom are the salt of the earth (Matt.5.13). He uses the analogy of salt losing its "saltiness." The implication is that Christians must not lose that which makes them distinctive. How could salt lose its "saltiness"? It has been suggested by some that as salt was stored it would eventually react chemically and be salt no more. Under any conditions salt would remain salt. But if stored salt was contaminated with other salts, such as magnesium chloride or sulfate, these salts would attract moisture. In due time enough salt might leach away to leave behind the less soluble contaminants, and this would result in a salt of much poorer quality. The container might then be emptied on a foot path to inhibit the growth of weeds.
- **Soda** (Job.9.30; Prov.25.20; Jer.2.22). Soda is a term applied today to several forms of sodium. In the Bible it probably refers only to sodium carbonate. This forms a gas with vinegar and effervesces freely. It thus fits the description of the process described in Prov.25.20 where it speaks of vinegar poured on soda.
  In Job.9.30 and Jer.2.22 it is associated with soap. Sodium carbonate would be useful in washing with soap because it acts as a softener of water. It is used today in the making of soap. It is found either in solution in salty seas or in the mud that surrounds such seas.
- In the Bible sulphur is nearly always associated with fire and metaphorically with punishment or devastation. No natural product readily available to the ancients would so completely symbolize the awful punishment to be meted out to the wicked. The flame of burning sulphur is very hot, and the sulfur dioxide gas has a suffocating stench. Hot sulfur eventually turns to a bubbling, dark red, sticky liquid.

The Agencies Mandate is: "To Support and Fund nations to formulate and implement policies, strategies, plans and programs that promotes tourism, wildlife and cultural heritage conservation for socio-economic development and transformation of the countries."

The Agency Vision is: "To support a global Sustainable tourism, wildlife and cultural heritage contributing to the transformation of the Nations society to a peasant to a modern and prosperous one."

The Our Agency mission is: "To support Nations to develop and promote tourism, wildlife and cultural heritage resources for enhancement of Nations as a preferred tourist destinations, with accelerated sector contribution to the national economyOur core values
Integrity- We deliver our services with professionalism, transparency and honesty while upholding high ethical standards.
Accountability- We are result-oriented, honor our commitments and take responsibility for our actions.

Innovation- We embrace forward-thinking solutions in addressing challenges facing the Tourism and wildlife sector.

Diligence- We are a hardworking, result-oriented organization, that sets high performance expectations for quality service delivery.

Collaboration- We partner with communities and relevant stakeholders in undertaking our duties and delivering our services.

Helpers Of Africa International will invest and fund promotion of Tourism in all its forms in Nations and Conservancy works to conserve wildlife, provide a sanctuary for great apes, and to generate income through wildlife tourism and complementary enterprise for reinvestment in conservation and communities along with becoming an innovative and sustainable development model that conserves biodiversity (particularly endangered species) and contributes to economic growth and livelihoods of rural communities. We shall seek to implement the Wildlife Conservation to improve subsequent regulations to ensure that wildlife resources available. In response to the rapid rise in wildlife crime, including poaching and illegal ivory trade, rhino horn and other animal product experienced in nations globally that lead to the consequent decline in wildlife populations, especially of African elephants and other endangered spicies. We shall support countries to strive to reinforce law enforcement by conducting Anti poaching patrols, protection of human and their properties against problem animals, strengthening of law enforcement by conduct inspection of trophy at entry and exit points to prohibit poaching and Illegal Wildlife Trafficking and outflow of trophies outside the country and supervise hunting activities conducted in different blocks and inspecting permits at zoos and farms. Other activities include liaison with other law enforcement agencies investigation and prosecution of Wildlife related cases.

We shall *Support recreation and prosperity through conservation* of habitats in all forms in partnership with global agencies as one of the key processes sustaining life and with potential to effectively contribute to socio-economic development through creation of employment, availing recreational environment and providing a genetic resource bank for potential multiple uses and benefits for future generations by exhibiting *excellence in conservation of wildlife resources* spiring to see that wildlife resources in its protected areas are effectively protected and are thriving. We shall support and fund rigorous animals survey of key source populations especially the endangered spicies of the most charismatic species on earth, across the world as a symbol of courage and strength to preserve and be a good custodian of Gods creation through promotion Tourism and Wildlife because they a big part in healthy ecosystem and this sector is a key developer towards national GDPs of various countries. The sad truth is that throughout Africa the status of dominant wildlife is shrinking because of porching, droughts and diseases increasingly bleak. In the last **25 years** alone Africa may have lost almost half of its remaining lions and today there may be as few as **20,000** left on the continent that also relates to elephants and rhinos that have been killed because of horns. When important species like lions decline it becomes critical for us to be able to accurately count them, especially in source populations where lions are breeding, since these areas are essential to their long-term survival.

Kingdom Global Tourism & Wildlife Agency will support countries Ministry of Tourism is charged with the responsibility of formulating tourism policy and coordinating the implementation of strategies aimed at developing the tourism sector. The sector is among the leading foreign exchange earners and a major generator of employment in countries contributing about 10% of the Gross Domestic Product in Kenya with others countries going upto 50% of GDP. The sector has linkages with other sectors of the economy thus facilitating growth in those sectors such us aviation, transport, agriculture, construction etc. Tourism sector has been instrumental in the realization of the goals set out in the countries Economic Recovery Strategy for Wealth and Employment Creation and has once again been identified as one of the key six growth sectors in the economic pillar of Vision 2030 in many countries. Specific goals for the tourism sector which include quadrupling tourism contribution to the GDP, increasing international arrivals and trebling revenue and increasing number of hotel beds, vision to make countries to be destination of choice and a global leader in sustainable tourism with the mission of facilitating sustainable tourism for national development and posterity assessesing the countries Ministry's of Tourism and Wildlife strengths, weaknesses, threats and opportunities, culminating into specific strategies which will be pursued. The dynamic nature of tourism and wildlife sector poses numerous and complex challenges which calls for clearly spelt out effective management tools. Our global strategic plan is one of such important tools that will assist the Ministry to achieve its goals within the medium term period. Our plan identifies strategic issues and proposes strategies which will be implemented through a number of outlined activities. Our strategic plan aligns the Ministry's mandate, vision, mission as well as priorities outlined in the countries vision to ensure tourism sector's tangible contribution to the dynamism and transformation of the economy towards a globally competitive and prosperous nation. The plan lays out the path to be followed by Our agency in support to the Ministry in collaboration with other tourism stakeholders in ensuring the achievement of the medium term goals set out in the vision 2030 Through stakeholders' consultative process, nine strategic issues will form the cornerstone of this strategic plan both short term and long term. These are policy and legal framework for the sector diversity of tourism products and source markets, marketing of tourism products and facilities, Tourism standards, Safety and security of tourists, financial resources for the sector, Human resource development and management, Tourism resource conflict and information management and research. The strategic plan will be implemented through annual work plans and will form the basis for identifying deliverables under the annual performance contracts. The strategic plan will also form the basis for the Ministry's budget proposals under the Medium term expenditure frame work (MTEF) budgeting process as well as the human resource planning. Successful implementation of this Plan calls for close collaboration and partnerships between the Ministry of Tourism and other Government agencies as well as with private sector stakeholders. The Plan will follow the approach enshrined in the vision where the economy is Countries Government-led but industry-driven, the Ministry will step up its coordination and facilitation role creating an enabling environment for the development of private sector and community-based initiatives.

Kingdom Global Tourism & Wildlife Agency will seek to fund and collaboration with tourism stakeholders in Nations globally effectively deal with the major challenges and address all the strategic issues in the tourism industry for its sustainability as well as facilitating the overall economic growth as envisioned to formulate and implement an appropriate policy and legal framework for the development of the tourism sector, finalize and facilitate the enactment of the National Tourism Bill , Harmonize and enhance coordination of tourism development and service delivery, To develop new products and diversify source markets, Develop and diversify tourism products, Broaden the source markets, To increase tourism revenue in countries through tourism, Increase the number of international tourists, develop domestic tourism especially Covid 19 has shown this need, Increase the number of domestic bednights, Increase average spending per visitor by value addation, To offer and maintain internationally accepted standards of tourist service , Review the hotel and restaurant classification criteria , Coordinate compliance with regulations and standards, To enhance safety and security of tourists , Develop capacity of the Tourist Police Unit and National Wildlife Service rangers, Enhance capacity of crisis management centre, Coordinate management of beach activities , To enhance and sustain the financial resources for the tourism sector, Establish a sustainable funding mechanism for the sector , Mobilize resources from external sources , Improve efficiency of resource utilization , To attract develop and retain competent and motivated staff, Upgrade skills in the workforce , Rationalize staff capacity, Improve work environment, Mainstream public sector integrity programme , To reduce tourism resource conflict , Promote tourism area management , Enhance community based tourism , To enhance tourism information management and research capacity, Improve use of ICT in tourism sector , Establish tourism research centre , Enhance publicity and information flow on tourism Implementation of the objectives and strategies outlined above will enable the Ministry to harness its resources and to take advantage of the opportunities existing in the dynamic tourism sector and address pertinent challenges as outlined later in this Plan. This will in turn propel the Ministry to higher levels of performance and realization of its mission and vision for the benefit of all stakeholders.

Due to tourism's linkage with other sectors, it has a very high multiplier effect on the economy, and as a result the capacity to stimulate demand for locally-produced goods and services, provide a wide market for agricultural products, promote regional development, and even create new commercial and industrial enterprises. These include insecurity, untapped regional and domestic tourism, narrow product diversity, inadequate hotel/bed capacity, inadequate skilled human resource research and development, inadequate infrastructure support and environmental issues, formulation, coordination and administration of policy along with making countries beginning with Kenya the destination of choice and a global leader in sustainable tourism. To facilitate sustainable tourism for national development and posterity. Core Values In its endeavour to execute its mandate, the Ministry will be guided by the following core values Quality service delivery to all tourism stakeholders ,Integrity, transparency and accountability in all operations, Professionalism within the sector ,Efficiency and effectiveness in utilization of resources, Social equity, Innovation and creativity , Proactive leadership ,Team spirit among staff and other key stakeholders.

Kingdom Global Tourism & Wildlife Agency will seek to fund and collaboration with tourism stakeholders in Nations globally towards Core Functions of the Ministry in Planning and Policy-making, Overall tourism policy formulation, implementation, monitoring and review in collaboration with stakeholders, Overall Co-ordination Liaise and coordinate with international, regional and local institutions on tourism issues, Resource Mobilisation for Internal and external resource mobilization in consultation with the Treasury for the development of tourism, Facilitation for establishment of an enabling legal and regulatory framework, promotion of local and foreign investments, safety and security of tourists, and conservation of biodiversity, Marketing to Undertake and facilitating of domestic and international tourism marketing activities in collaboration with stakeholders, Regulation and Monitoring Setting standards for hotels and restaurants and regulating tourism enterprises with oversight authority in all tourism issues, Code of Practice to Collaborate with stakeholders in establishment and enforcement of codes of practice for tourism at all levels benchmarked on internationally accepted standards, Product Development and Diversification to Develop viable tourism products and promotion of community participation in tourism, Capacity Development to Coordinate capacity development and setting of standards in the hospitality industry, Research and Development by Undertake and coordinate research in the sector and responsible for overall guidance and policy coordination for the following state corporations and organisationsWe shall seek to support and fund objectives of various arms in this sectors National Tourist Development Corporations that is responsible for tourism facilities development by financing private investors, National Tourist Boards that promotes and market countries as a tourist destination internationally and locally, Catering and Tourism Development Levy Trustees established through the Hotels and Restaurants Acts to control and administer the Levy Fund to establish and set standards for training institutions, Nation Utalii College with the objective of enhancing professionalism and improvement of standards of services in the tourism and hospitality sector, to promote conference tourism, with the principal function of developing and promoting countries cultural values promotion of countries rich cultural heritage as a tourism product, while ensuring that such development is sustainable, Hotel and Restaurants Authority (HRA) responsible for the regulation and standardization of hotels and restaurants.

Our strategic plan has has priority focus as per exposition wil seek Increased political cooperation and alliances, Over-reliance on traditional markets, Implementation of MDGs, Increased awareness on Human Rights issues, Growing insecurity due to global terrorism, Enlargement of regional marketing through regional gorvernments, Increased awareness on Human Rights issues , Covid 19 effects , Political instability of countries neighbours, Political integration, Increased democratisation , Restoration of peace in the Countries, empowering of Tourist Police Units, Increased awareness on Human Rights issues, Review of Tourism legislation, Increased security due to operationalization, Difficulties in marketing countries as an ideal tourist destination due to perceived political instability-Regional instability- Travel advisories Economic , Expansion of the ebusiness Formation of regional marketing blocks, Custom Unions and Free Trade Area, Emerging tourist destinations, Increasing Adoption of tourism as a leisure activity, Increased demand for benefits from tourism resources by host communities .

Kingdom Global Tourism & Wildlife Agency will seek to fund and collaboration with tourism stakeholders in Nations globally in wildlife sanctuaries villas homestays, Joint marketing of regions as one tourist destination , More employment opportunities in Eco- and cultural tourism, Increased domestic tourism , More access to information , Diversification of tourist source markets Slow growth in local employment opportunities, Poverty and insecurity, Increasing tourism resource conflict, Brain drain , Current economic recession in the traditional source markets , Intense competition, Issues and/or developments that are likely to impact negatively or positively on the Ministry's capacity to achieve its objectives. Effects the changes present in terms of opportunities and threats to the Ministry Social-cultural increased permanent migration to some countries, Interactions have increased spread of infectious diseases, increased crossborder movements and interactions, rapidly growing labour force. , Rising crime due to unemployment, Increasing social contacts across ethnic, regional and other facets , Increased protection of women and children , Population pressure on areas previously set aside for wildlife, Increased appreciation of the cultural and geographical diversities, Better informed populace, Changes in lifestyles , Growing unemployment, Increased insecurity , Increased spread of infectious diseases.

Cultural degradation due to global cultural influences Technological , Growing use of ICT and e-business , Global village phenomena , Expansion of air and water transportation , rapid change in technology , Growing adoption of computer and ICT in business, Growing adoption of ebusiness , Increased capacity for e- tourism, Costs of communication and transportation , Reduced need for workers due to automation, Data insecurity due to viruses, ecrime and Internet terrorism, Growing digital divide Environmental (Natural) , Adverse climatic changes, Increased involvement of environmentalists and NGOs in production, trade and tourism issues, Increasing regional cooperation in environmental issues , Involvement of NGOs and CSOs in tourism & environmental issues, Existence of the National Environment Management Authority (NEMA) , Increasing involvement of NGOs and CSOs in tourism & environmental issues, Increased challenges in bio-diversity conservation , Environmental Impact assessment becoming legal requirement , NGOs becoming useful partners in information dissemination, Expanding Eco and cultural tourism , Curtailing of certain development activities through environmental action group, Adverse climatic changes , Increased environmental problems due to polluting technologies and poor waste management systems , Internal Environment Analysis, The purpose of internal environment analysis is to identify key assets, resources, skills and processes of the Ministry that represent either strengths or weaknesses. Strengths are aspects of the Ministry's operations that represent a competitive advantage; that is, activities performed very well or resources that it controls. Weaknesses are activities

The value of Wildlife cencus is paramount In addition to numbers, good monitoring techniques are able to provide a lot of other useful information on parameters such as sex ratios, movement patterns, and survival and recruitment rates. Long-term monitoring of these parameters within key source populations helps us understand if our conservation interventions are working and provide a sound basis to create better plans to conserve wildlife. Counting of lions accurately is notoriously difficult since some naturally occur at low density, are nocturnal, cryptic and wide-ranging. As such, across Africa, a variety of indirect methods, such as track counts, call-in surveys and expert opinion, have been used in the past. These methods are frequently unreliable and this has hindered the ability to assess especially the lion population status and trends.
We shall support the Nation Wildlife Trust through defined flagship programme in specific conservarsies and national parks such us Maasai Mara. We have researched that in the previous five years there had been a quantum leap in the development of scientifically-sound methods and that a framework known as Spatially-Explicit Capture-Recapture was rapidly emerging as the industry standard for monitoring large carnivores. Kenya adapted, developed and applied these tools to begin long-term monitoring of lions and cheetahs are still conducting annual surveys. In most instances, obtaining accurate and precise estimates of wildlife at a national level is impractical and attempts to do so usually result in figures that are over-simplified and are fraught with uncertainty, thereby limiting their usefulness. With this in mind we shall support and fund collaborations summit and confrences at National and global levels in planning workshops was held bringing together a large group of scientists and conservationists with the aim of developing a plan to determine the status of dominant animals along with endangered spices and other large carnivores in using a science-based approach.

Many developing countrie's economic and population growth is already coming with a high ecological cost. Whereas leaders are taking many of the right steps to attract financial capital, oftentimes they are more careless about preserving Africa's natural capital. Poorly planned agriculture, settlements, infrastructure development, and resource extraction are driving degradation of forests, rivers, and grasslands. The resulting habitat loss and fragmentation threaten the ecosystem goods and services upon which people and wildlife both depend. Without adequate training, technical support, and empowerment, African leaders risk decisions that rank short-term benefits above long-term growth. Developing this way is a choice. From a household level to the statehouses, many believe that the transformation in Africa will inevitably come at the cost of wildlife and wild lands, perhaps that it even should. In fact, the opposite is true, the services that are being lost underpin human well-being, political stability, and the continued economic prosperity that African leaders desire.

The world's economies in 2019 are more connected than they have ever been. While this connectivity brings benefits in terms of investment, access to information, and the possibility to connect to global markets, it also has a cost, particularly for the environment. Never has this been more apparent than today, as we fight the human, economic, and ecological impacts of COVID-19. Global demand for illegal wildlife products has decimated Africa's wildlife populations. From ivory to rhino horn, pangolin scales, lion bone, and more, Africa is being robbed of its wildlife resources by international criminals servicing the demand of a global black market. The role this trade plays in undermining good governance and funding violent conflict is well documented. The poaching crisis puts into clear focus why one cannot separate conservation and development. There are three variables that enter into the calculation of wildlife trade on the supply side — the reward, the punishment, and the likelihood of being caught and penalized.

To do the actual poaching, crime syndicates recruit local people who have few alternatives, leading vulnerable rural Africans to take the greatest risk in return for the smallest portion of the illicitly won reward. The willingness of communities to cooperate with crime syndicates and of government officials to ignore wildlife crime is related to their own connections to wildlife and wild lands and also to their economic situations — both as households and nations. The largest and most serious long-term threat to wildlife in Africa is habitat loss and fragmentation. The result is a steady decline in the space available for wildlife and increasing pressure on places set aside for conservation. This trend threatens Africa's iconic species and the resilience of the fabric of living systems, degrading important ecosystem goods and services, thus jeopardizing Africa's economic development and human well being. In an increasingly urban Africa, people are more and more detached from nature; hence they value protected areas less. There is an urgent need to shift the perceived value of nature in the minds of urban and rural communities, African leaders, and especially youth. If wildlife and wild lands are to thrive, then they must be interwoven into the positive narrative of growth on the continent.

The wildlife in Africa is an incredible resource that can provide greater economic and social opportunities while promoting ecological integrity and resilience. In many areas, wildlife offers far greater viability for custodians of the land than livestock, which is rapidly encroaching into wildlife habitat across the continent. Wildlife has greater resilience to drought and disease and offers a wider range of potential enterprises that can be developed with associated employment opportunities. Wildlife can also sustainably carry more biomass per unit area than livestock, due to the range of ecological niches occupied. Where appropriate and with the right support. Wildlife can be the center of competitive land use that has much greater economic and social benefits than livestock. Through the development of conservancies and other wildlife-based activities, communities can diversify their economies and become more resilient to climate change. The result would be an Africa where wildlife is viewed as one of its most unique and greatest assets. Kingdom Global Tourism and Wildlife Agency will invest in investments in wildlife colleges that train for capacity and leadership for conservation along with supporting priority landscapes is to build the capacity of local institutions to take on roles and responsibilities to deliver conservation. The ownership of conservation must be with the people who ultimately bear the responsibility as we fund the conserversies with sustainability of revenue some of this funding will be packaged in a short or long term repayable debts and the communities of Nations will reap the benefits of the action, meaning the communities, protected-area authorities, and national governments who hold rights over the resource base. We shall engage governments and private-sector entities all over the world to seek new approaches and a different style of partnership for various conservancies because they are different in foundation and structure.

Our mission requires us to assist the governments and people of Africa to navigate the continuing economic transition with a significant and representative patrimony of wildlife and wild places intact. We are uniquely positioned and qualified to help articulate, describe, and promulgate a vision for nations in which wildlife coexists with modern cities, productive farmlands, expanded infrastructure, rural areas, and manufacturing. We have a repertoire of processes, tools, approaches, and practical experiences built through decades of implementation that shows how conservation and development can be delivered together.We have strategic programs embrace and promote countries progress in promoting tourism and wildlife. We shall work in partnership with communities and nations to create a prosperous future of cities, mining, urbanization but not at the expense of wildlife and wild lands. Our global vision in this agenda implores us to make good and hard choices about the models that are most likely to achieve a desirable future for people and wildlife world wide. It is especially important that our collaboration and investment will interface of nations where wildlife and wild lands intersect with human activities and settlements.Our Agency is uniquely positioned to own conservancies also with hotels and camps to accommodate toursist both domestic and international across nations taking an in-situ approach that serves the conservation and development goals of individual countries. We shall seek to fund in providing and elevating countries voices for wildlife and wild lands both on the continents and abroad while also offering a global presence and perspective.

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Goal Description Safeguarding our valuable wildlife resources for current and future generations is an urgent issue. This strategy enhances species conservation and management for healthier, more resilient wildlife communities and populations focusing on three aspects – develop and expand the use of assessment tools to prioritize interventions, enhanced protection through improved security, disease control, and reduction in unsustainable utilization and illegal wildlife trade through collaboration and support from local communities and government at all levels, and promote the coexistence of people and wildlife through a targeted reduction in human wildlife conflict and the development of incentives for living with wildlife.

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by entrenching protective policies in countries are in precipitous decline with an average loss of 68% in the last alone. While most of this decline has occurred outside of gazette protected areas, designated conservation areas have also suffered losses. In addition there are mammalian plant species in Kenya under severe threat of extinction. These losses are driven by a combination of factors including, climate and land use change, habitat loss and fragmentation, poaching and illegal wildlife trade, and human wildlife conflict. To deal with Wildlife insecurity in countries is characterized by international trade in trophies and meat, commercial poaching for bushmeat, illegal wildlife trade, and illegal bioprospecting and biopiracy. While the illegal killing of elephants and rhinos for export trade in ivory and rhino horn has been widely recognized as a key threat, the rise of commercial poaching for bushmeat is emerging as a serious threat to species survival, as well as affecting tourism in key protected areas. High levels of poaching coupled with in the past have been a threat to species conservation in countries.

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by enhancing the legal frameworks and enhancing supporting to anti- poaching activities will increase the possibility of species survival in countries. Human Wildlife Conflict (HWC) has severe direct and indirect effects on conservation efforts throughout countries. Increasing human populations, land use change, poorly planned development, and unsustainable policies all lead to increased conflict resulting from human encroachment into wildlife areas and the degradation of ecosystems. The destruction of property, loss of livestock, crop destruction, injury and loss of life undermine livelihoods and foster resentment towards wildlife and conservation efforts more generally. By reversing the negative impacts of HWC is an essential first step in transforming wildlife conservation in countries. This goal addresses these issues with a focus on developing and implementing new tools to increase the impact of species based interventions within the context of integrated ecosystem planning, enhancing wildlife security, and developing innovative approaches to offset the costs of living with wildlife, reducing human wildlife conflict, and promoting coexistence.

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy strategies and Priority Actions Strategy Catalyze the conservation of endangered and threatened species through the development and implementation of conservation tools for prioritizing, monitoring, and managing wildlife species. By developing and implementing a process for regular updating and ongoing review of the National Red list of threatened and endangered species. By prioritizing, developing and implementing species specific conservation and management plans that address emerging issues and challenges (e.g. climate change, genetic diversity, etc) facing endangered and threatened species while supporting the conservation of the broader community of wildlife species by working synergistically with ecosystem plans and landscape level planning tools.
To achieve our vision, we approach our work in line with six overarching principles. We are the voice of African wildlife: We serve as the primary advocate for Africa's wildlife, ensuring its right to exist in modern Africa, and promoting that it will play an integral role in countries' overall success .

Empowering countries ownership and stewardship of wildlife and wild lands: All major threats to wildlife conservation in countries are ultimately driven by a balanced choice between people and wildlife, resulting in a lack of prioritization of conservation and wildlife in decision-making at all levels. For conservation to succeed in countries, it must be owned and led by the leaders in Investing in efficient, planned, and sustainable utilization of land and natural resources: The most serious long-term threat to wildlife in countries is habitat loss and fragmentation. As a result of countries's population and economic growth alongside widespread rural poverty and increasing global demand, governments face significant pressure to allocate more and more land for agriculture, livestock, human settlement, resource extraction, mining and infrastructure therefore the balance approach will be important. Additionally, most of countries's protected areas are dramatically underfunded and/or poorly managed. This threatens countries's iconic species and puts at risk countries's economic development and human wellbeing by degrading important ecosystem goods and services. We shall support and fund shutting down the illegal wildlife trade: Africa's and other countries wildlife iconic species, especially elephant, lion, rhino, giraffe, and pangolin, are severely threatened by poaching, which is occurring at an alarming and biologically unsustainable rate. This epidemic is fueled by international demand for wildlife products, exploited by international crime syndicates, and facilitated by the underlying issues of poverty, corruption, and weak enforcement mechanisms within countries that we shall seek to support gorvernments and interpole and global intelligence to deal with this challanges.

Kingdom Global Tourism and Wildlife Agency will seek to build influence of the countries constituency for conservation. Although countries have set aside large areas to protect wildlife and while many countri love and respect nature with examples of successful grassroots environmental campaigns around the continent, there is not yet a broad affinity for conservation on the continent. This condition is being exacerbated by the broad trend toward urbanization, furthering a generalized disconnect from nature for everyday. We shall seek to create and advocate a global conservation movement along with stimulating international efforts to conserve wildlife in countries. We shall fund gorvernments to fence off wildlife parks and conservancies We shall seek to support protected areas management by supporting conducive policy through technical support to policymakers, develop viable context-specific conservancy models. We shall assist governments with species-action planning and implementation. This strategy forms the core of our species-specific work and ensures that species plans and strategies are based on the best available science and are integrated with regional development. We shall seek to join with other stakeholders to fight the illegal wildlife trade funding to end wildlife trade. Our Agency strategy is focused on each stage of wildlife trafficking, from decreasing the opportunities for wildlife trafficking through improving detection and increasing prosecutorial capacity, to reducing demand in target countries. We shall recognize and honor leaders, volunteers, staff and whestle blowers who show exemporary efforts in conservancy as Kingdom Global Wildlife ambassadors and Kingdom Global Wildlife Chamipions to drive shifts in policy, planning, and finance which leverage wildlife and wildlands as essential to development as we motivate many to be engaged. Kingdom Global Tourism and Wildlife Agency will seek to be a strong funder to be trusted by the global community to partner with in the interests of preserving countries' natural heritage. Global wildlife conservation should be ultimately owned by up by global citizens and thus the responsibility of all in the world that will be a strong advocacy we shall carry across the world. . The mounting pressures on wildlife and wild lands posed by countries accelerating growth necessitates an investment from the public countries conservation practitioners, political and economic leaders, and others. KGTWA is committed to sensitizing, educating, and mobilizing African leadership on all fronts. We shall support to conserve, protect and restore countries ecosystems and the services they provide. Placing economic development and environmental conservation as an either/or option is a false choice. Functional, healthy ecosystems are critical for the long-term stability and prosperity of the continent.

Negative development outcomes are driven not by a lack of options but by a failure to invest in the hard decisions around land and natural resource use planning and negotiated trade-offs. To address the issue of habitat loss, KGTWA will continue to focus on large landscape (Heartlands) participatory conservation planning, working with governments, communities, public-sector partners, development NGOs, and the private sector to facilitate investments and promote policy and economic planning that both promote wildlife as a competitive land use while reinforcing countries-led protection of wildlife and wild lands.

We shall seek to conserve countries wildlife in-situ, reduce poaching and trafficking as major causes of wildlife decline. Poachers and international criminal networks engaged in the illegal trade of wildlife products are robbing Africa of its priceless natural heritage. It is a collective responsibility of the world to support and empower Africa's relevant law enforcement bodies to combat this scourge. In cases of highest biological threat, KGTWA will continue to invest in direct activities that address the reduction of demand for wildlife, and on-the-ground anti-poaching activities with a strong bias toward capacity enhancements to countries own wildlife protection forces.

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to Conduct a comprehensive and continuous assessment, and communicate the results, of the status threats for wildlife species and Develop, adopt and implement policy guidelines on species specific conservation interventions - including captive breeding, introduction, reintroductions, and translocations, Implement conservation interventions for priority species (threatened/vulnerable/endangered) to address emerging and critical threats, including climate change, disease, and land use change and develop an Endangered Species Act for countries to catalyze broad public support and coordinate cross sectoral engagement in the conservation and management of endangered and threatened species, Reduce poaching, over utilization, and the illegal wildlife trade and their related impacts, Enhance the coordination and capacity of security and law enforcement agencies to reduce, and improve responses to, incidents of poaching, illegal wildlife trade and reduce wildlife related crimes. Modernize and expand wildlife security units to increase coordination and effectiveness Promote coexistence to reduce human wildlife conflict. Develop and implement innovative mitigation measures in areas with incompatible land-uses, including wildlife-proof barriers. Develop and implement management approaches including harnessing traditional/indigenous knowledge in mitigating human wildlife conflict, with focus on education, awareness, integrated planning and building capacity of wildlife officers and local communities. Develop and provide communication and education materials, and extension services on human wildlife conflict mitigation measures and management strategies (as above). Develop and promote alternative consolation programmes to ensure prompt response for loss, injury and damage caused by wildlife. Develop sustainable innovative national compensation scheme including insurance and community supported programmes for loss of property, livestock and crops. Setup anti-venom centres in relevant priority areas with high incidences of snake bite related deaths. Establish and maintain a database, bringing together existing and new data, on the types, extent, causes and impacts of human wildlife conflict and mitigation measures for such conflict Activity.

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy including Global & National Green organizations , Global & National Wildlife Clubs in Schools / Communities/ work places, Global & National Youth Movements for Conservation especially those that live near parks and conserversies, Global & National Arid and Semi-Arid Lands management boards, Global & National Wildlife Services, KNBSAP Global & National Biodiversity Strategy and Action Plan, Global & National Agricultural Sector Coordination Unit , Global & National Posts and Telecommunications Corporation to support communication, Global & National Agricultural Sector Development Strategy office to guide on Wildlife Conflict agriculture, Global & National Rural Development Strategy to guide on wildlife habitation in the rural areas, Global & National County and Constituency leaders to guide engagements, Global & National Transparency Communication Infrastructure Programme, Global & National Convention of Biological Diversity, Global & National Tourism Development Corporation, Global & National Development Authorities, Global & National Climate and Development Knowledge Networks, Global & National Clean Development Mechanism, Global & National Local Area Networks, Global & National Code Division Multiple Access, Global & National Lake Basin Development Authority, Global & National Community Development Trust Funds, Global & National Ministry of Environment and Mineral Resources, Global & National Ministry of Chemical Information Exchange Network, Global & National Ministry of Youth Affairs- Sports & gender, Global & National International Trade in Endangered Species, Global & National Marine Protected Areas , Global & National Common Market Agencies, Global & National Commission for Revenue Allocation office, Global & National Agricultural Sector Coordination Unit, Global & National Agriculture Sector Extension Policy offices, Global & National National Climate Change Activities Coordination Committee, Global & National Designated Authorities, Global & National Climate Change Response Strategy office, Global & National Disaster Risk Reduction, Global & National Environment Action Plan, Global & National Environment and Climate Change Unit , Global & National Environmental Management Authority, Global & National units, Global & National

Early Childhood Development and Education units, Global & National Environmental Policy unit, Global & National Education for All Units, Global & National Net Enrolment Ratio units, Global & National Environmental Management and Co-ordination units, Global & National Museums of Units, Global & National Poverty Eradication Plan units, Global & National Secondary Education units, Global & National Reproductive Health Strategy units, Global & National Social Protection Council units, Global & National Water Resources Management Strategy units, Global & National Government Common Core Network units, Global & National Public Private Partnerships units, Global & National Tourism Promtion boards, Global & National Government statistics and Data Centre units, Global & National Audit Units, Global & National Regional Development Authorities Units, Global & National Rural Electrification Master Plan units, Global & National Hotels Keepers and Restaurant owners organizations, Global & National Tourist Industry Licensing Act units, Global & National Justice and Reconciliation Commission office, Global & National Inter-Ministerial Committee on Environment, Global & National Internet Service Providers units , Global & National Hydrological Observation cycle units, Global & National Agricultural Research Institute units, Global & National Water Resource Users Associations Units, Global & National Forestry Research Institute

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy including Global & National Economic Recovery Strategy for Wealth and Employment Creation Units , Global & National Ministry of Planning and National Development, Global & National Tourism Policy units, Global & National Ministry of Tourism and Wildlife departments, Global & National Forest Policy units, Global & National Ministry of Environment and Natural Resources, Global & National Forest Service Strategic Plan units, Global & National Tourism Trust fund units, Global & National Ecotourism Conference units, Global & National Ocean Marine Science Association Marine Science Country Units, Global & National Ministry of Agriculture and Ministry of Livestock and Fisheries Development, Global & National Forest Law Enforcement and Governance units, Global & National Africa Forest Law Enforcement and Governance units, Global & National Charcoal Survey and Monitoring units on deforestation, Global & National Environment Management and Coordination units, Global & National Biodiversity Strategy and Action Plan units,
Global & National Industries in Sustaining Water Quality units, Global & National Arid Lands Resources Management Project units, Global & National Agriculture Sector Development Strategy units, Global & National Agriculture sector Policy units, Global & National Food and Agriculture Policy units, Global & National Agriculture Sector Extension Policy units, Global & National Electricity Access Investment Programme Unit, Global & National Power Development Program, Global & National Rural Electrification Master Plan Unit, Global & National Renewable Energy Unit, Global & National Water Master Plan unit, Global & National Water Services Strategy Unit, Global & National Water Resources Management Strategy Unit, Global & National Game watchers Institutional Partners Unit, Global & Africa Network for Animal Welfare Unit, Global & African Conservation Centre, Global & National Conservation Alliance Unit, Global & National Department of Resource Surveys and Remote Sensing, Global & National Wild Life Society International Unit, Global & National Union for Conservation of Nature, Global & National Wildlife Conservancies Association, Global & National Wildlife Service Pathways to Resilience in Semi-Arid Economies, Global & National Save the Elephants Units, Global & National Museums Unit, Global & National Escape Foundation Unit, Global & National National Wildlife Strategy Unit, Global & National African Conservation Centre, Global & National Africa Network for Animal Welfare Unit, Global & National Beach Management Unit, Global & National Community Wildlife Association , Global & National Wildlife Conservation and Compensation Committee,
Global & National Directorate of Resource Surveys, Global & National Remote Sensing Unit, Global & National Human Wildlife Unit, Global & National Tourism Promotion Board, Global & National Tourism Exhibition Promotion Unit. Global & National habitat degradation and loss management project.

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and istitutions to promote Tourism and develop wildlife conservancy including Global & National Tourism Wildlife infrastructure development project, Global & National illegal grazing management project, Global & National alien and invasive species management project, Global & National charcoal management project. Global & National illegal settlement management project, Global & National protected area management project, Global & National buffer zones management project, Global & National over utilization management project, Global & National population growth management project, Global & National land use management project, Global & National species management project, Global & National Wildlife disease control and management project, Global & National pollution management project, Global & National Conflict Resolution Wildlife & Communitees Project, Global & National Community Based Tourism & Wildlife Organisations, Global & National Catering and Tourism Development Levy Trustees, Global & National Department of Tourism promotion, Global & National Directorate of Personnel Management , Global & National Domestic Tourism Councils, Global & National Tourism Development Corporations, Global & National Confrence Tourism promotion projects, Global & National Medical Tourism Promotion Projects, Global & National Tourism Development Funds, Global & National Tourism Federations, Global & National Tourism and Wildlife Colleges, Global & National Tourism Trust Funds, Global & National Tourism Administration and Management Units, Global & National Tourism and Wildlife Human resource units, Global & National Tourism and Wildlife Unit, Global & National Tourism and Wildlife Finance units, Global & National Procurement Units, Global & National Tourism and Wildlife ICT Units, Global & National Tourism and Wildlife Audit Units, Global & National Tourism and Wildlife Central Planning Units, Global & National Tourism Product and Market Development Units, Global & National Licensing Units, Global & National Tourism and Wildlife litigation Units, Global & National Tourism inspectorate and standardization Units, Global & National Tourism and Wildlife Research Unit, Global & National Catering & Tourism Development Units, Global & National Beach Cleaning and Management Units, Global & National Organizations of Hotel Keepers, Global & National Organizations of Restaurant and Lodge Owners, Global & National Organization of Tour Operators, Global & National Organization of Aviations, Global & National Organization of Cruize ship Operators and all other stakeholders in the Tourism and Wildlife Sector.

Our strategic plan that have been expounded include maintaining and controlling the quality of the tourist experience, To overcome hurdles in Tourism and Wildlife Ministry will work together with relevant stakeholders' in order to ensure consistency in product quality and service delivery, To offer and maintain internationally accepted standards of tourist service, Review the hotel and restaurant classification criteria , Coordinate compliance with regulations and standards , Safety and Security of Tourists Security is a key consideration for many tourists when selecting a holiday destination, To enhance safety and security of tourists, Facilitate capacity development of the Tourist Police Unit and NWS , Enhance capacity of the crisis management centre, Coordinate management of beach activities, Financial Resources to establish a sustainable funding mechanism for tourism to support product development and facilities, To enhance and sustain the financial resources for the tourism sector, Establish a sustainable funding mechanism for the sector, Mobilize resources from external sources , Improve efficiency of resource utilization, Human Resource Development and Management to attract develop and retain competent and motivated, Upgrade skills in the workforce, Rationalize staff capacity, Improve work environment , Mainstream public sector integrity program, Tourism Resource Conflict Inadequate involvement of local communities has led to resentment and undermining of the tourism product and wildlife conservation, To reduce tourism resource conflict, Promote tourism area management , Enhance community based tourism, Information management and research capacity , Improve use of ICT in the tourism sector, Establish a tourism research centre , Enhance publicity and information flow on tourism , devising policies, allocating resources, reviewing the current organizational structure, revising reward and incentive systems, minimizing resistance to change, developing a strategy-supportive work environment and corporate culture, adapting operations, delivery; and information systems; and developing an effective human resource function. Draft national tourism bill , Draft Wildlife bill , Sensitize stakeholders , Establish relevant structures and institutions , Structures and institutions in place , Improved Service Delivery , Enhance public-private sector partnership , Public-private sector consultative forum , Harmonized operations , Strengthen inter-ministerial collaboration , Inter-ministerial roundtable forums , Improved tourism service delivery , Harmonize and enhance coordination of tourism development and service delivery, New collaborations/linkages , To develop new products and diversify source markets , License high quality home-stays High quality home-stays sites , Enhance tourism products New tourism products launched , Develop and diversify tourism products , Develop resort cities, Enhanced tourist capacity , Tourist products diversify , Carry out a market study on emerging markets, New markets , Increased volume and value of business, To increase tourism revenue , Increase number of quality tourists , Increase MICE (meetings, incentives, conferences & exhibition facilities), Increase accessibility, international tourists increased , Increase number of international tourists , Increase promotional campaigns in traditional and emerging markets Increase in arrivals and earnings ,

Intensify Domestic and Regional tourism promotion campaigns Increased bed nights , Increase the number of domestic bed nights , Adopt consumer sensitive pricing mechanism Increased bed nights , Improve the upmarket safari and niche products Increased average spending per visitor , Increase average spending.

Our strategic plan that have been expounded include Improve quality of tourism facilities Increased average spending per visitor, To offer and maintain internationally accepted standards of tourist service, Review the hotel and restaurant classification criteria, Classify and reclassify of tourists establishments Tourist establishments classified and reclassified License tourists establishments, tourism institution's data bases, Data bank of all tourist facilities developed , Tourism institutions' data linked , Coordinate compliance of regulations and standards , Inspect tourist establishments, To enhance safety and security of tourists, Facilitate capacity , Carry out needs assessment study Needs assessment report development of Tourist Police Unit, Implement approved recommendations, Reduced incidences of tourist attacks and harassments , Enhanced National Wildlife, Carry out status and inventory survey, Prioritized list of requirements, Enhance capacity of crisis management centre , Equip train and expand Centre Efficiency in service delivery, Coordinate management of activities of beach operators, Construct beach operator markets , Beach operator markets constructed, Reduced incidences of tourist harassment , Organise and regulate beach activities, Organized beach operations To enhance and sustain the financial resources for the tourism sector , Establish a tourism development fund , Develop and submit a proposal for retention of revenue, Proposal submitted , Establish a sustainable funding mechanism for the sector , Develop and submit a proposal for sharing of airport passenger service charge , Mobilize resources from external sources, , Write funding proposals to private sector investors, Sensitize staff on cost saving measures , Sensitized Staff , Ensure efficient procurement procedures, Efficient procurement process, Improve efficiency of resource utilization , Ensure proper budgeting and budget administration Adherence to budget , Review the internal control systems, To attract develop and retain competent and motivated, Carry out needs Assessment, Upgrade skills in the workforce , Undertake training and capacity building Skilled staff , Undertake workload analysis , Rationalize staff capacity Right staff in right place, Review and develop job descriptions and specifications Improved performance , Undertake a Work environment survey, Improve work Work environment survey report environment , Implement survey recommendations , Undertake corruption risk assessment, Develop corruption prevention plan Corruption prevention plan, Develop anti-corruption code of conduct Code of conduct , Sensitize staff on ethical practices Seminar report , Carry out survey Survey report , Mainstream public sector integrity programme ,Monitor and evaluate integrity practices and perceptions , Reduce level of corruption , To reduce tourism resource conflict , Develop and implement tourism area management plans, Promote tourism area Tourism area management plans management , Coordinate Mobilization of resources for plan implementation Resources mobilized (financial and nonfinancial), Build capacity on CBOs in tourism and wildlife, Capacity Building programme , Disburse revolving Fund to viable SMEs in tourism and wildlife SMEs strengthened , Enhance community based tourism , Design and implement a CSR Plan among communities, To enhance tourism information management and research capacity , Review status of ICT application in the sector Status report , Sensitize stakeholders Number of stakeholders sensitized , Improve the use of ICT in tourism sector , Coordinate implementation of viable regular recommendations ,Improved service Outcome/Output, Set up a Research Centre , Centre established , Quality information, Collaborate with both national and international research institutes, Establish tourism research centre,

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to establish a wildlife innovation hub at the National Wildlife Services. Conduct priority research to improve wildlife conservation and management. Develop data and information management systems as part of a Bioinformatics Platform, to ensure data quality, enhance sharing, and promote access and use. Develop and harmonize existing protocols, standards and tools for information management, sharing and access as part of a data sharing and management framework. Develop and appropriately deploy relevant capacity to build data information systems, manage information systems and ensure sharing and access. Avail research information and knowledge to sectors with direct and indirect impacts on wildlife conservation for use in decision making processes, policy development, and reporting. Strengthen coordination and implementation of research, monitoring, and modeling of ecosystems and wildlife, climate and land use change, and other threats and opportunities to support effective management. Establish a think-tank made up of an interdisciplinary team of expert advisors to strengthen research coordination and implementation, knowledge sharing, and use. Hold a bi-annual conference to bring data producers, managers, and users together to review, plan, and coordinate with the goal of catalyzing innovation, developing new technologies, and spurring investment to promote data collection, sharing, and use for evidence based wildlife conservation and management.

Develop and implement a framework for public-private partnerships in coordination, training and of biodiversity research. Reflect the functions of the institute as stipulated in the wildlife act. Ensure the capacity of individuals, institutions, and communities, including systems, equipment, technology and networks to meet current and emerging challenges in wildlife conservation. Identify capacity needs and priorities to support sustainable wildlife conservation and management at all levels. Conduct a collaborative needs assessment and develop a capacity building strategy for supporting conservation and management of wildlife in Kenya with broad support from stakeholders including the public and private sector, universities and colleges, and policy makers. Support the coordination of training and capacity development in wildlife conservation and biodiversity management through the training institute and a network of partner institutions and exchange programmes across levels and sectors.

Establish a task force comprising the Ministry of Tourism and Wildlife, KWS, Conservation NGOs, University, Wildlife Research and Training Institute, NACOSTI and Private sector to develop a five year agenda on research on conservation, management and business opportunities for local entrepreneurs and communities Activity Develop curricula with Universities and colleges to initiate a Conservation Leadership Programme (CLP) for individuals, game scouts and communities members to build the next generation of conservation leaders Implement relevant, appropriate, and dynamic training programmes at multiple levels. Strengthen local institutions and universities to use cuttingedge science to understand the impacts of various drivers (including climate change) on wildlife and natural resources through academic exchange programmes (students and lectures) and collaborations with external universities. Develop Youth programs for various age classes to inspire and equip the next generation of conservation leaders.

Our strategic plan that have been expounded include Develop Tourism Satellite Account , Operational TSA account, Accurate tourism data , Publish ministry's newsletter and other publicity materials, Enhanced information dissemination , Update Ministry's website , Availability of current information , Enhance publicity and information flow on tourism , Coordinate media coverage of ministry's activities , Well informed public and potential tourists , to support the implementation of strategic plans, improve efficiency, a new parastatal,

1) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and wildlife by Owning Hotels, Conserversies, Restaurants, and lodges all over the world directly, through shareholding, partnerships, joint venture along with extending repayable loans to stakeholders in this sector through governments, or directly to institutions, organizations and governments.
2) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife Marine and coastal environment the coastal zone includes closely connected terrestrial and marine environment. It consists of distinctively rich, diverse and productive ecosystems, habitats and resources coastal wetlands, coastal forests, mangrove swamps, coral reefs, tidal flats, beach /dunes, and fishery resources.
3) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife through Governments Wildlife service management custodian of government forests and parks as a main stakeholder of conservancy efforts where many hotels and lodges are hosted also.
4) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife.
5) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife forests are also habitation for birds and many others that need conservation
6) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife units including habitation for migratory birds, fish and a great many invertebrates, reptiles, amphibians and plants. Some of the wildlife species have been identified as endangered, threatened or rare.
7) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife including diverse marine environment including estuaries, mangroves, sea grass beds and intertidal reef platforms and coral reefs which are vital for the diversity and reproduction of marine organisms.
8) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife including highly productive systems in the coastal area that play a crucial role in the socio-economic development of the country. The coastal economy depends heavily on tourism and the tourism sector is dependent on countrie's coastal and marine resources. The coastal environments globally are also at risk from marine transportation activities at the port and shipping along the coastline.

9) Our core strategies to achieve our vision, There are a number of core strategy types that supplement our values and highlight AWF's strengths and will be applied, where relevant, to achieve our vision and its goals and objectives. We shall seek to build African capacity and leadership through our agencies core work in training, enterprise development, and capacity building for our relevant target audiences in each landscape. We seek to employ cutting edge research and thought leadership to establish wildlife as competitive land use and use AWF's platform to document what works what does not and why.
10) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by amplifying countries voices for conservation to build from our agencies communications, networking, and leadership strengths to amplify countries voices.
11) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by promoting entrepreneurial conservation and innovative technology enterprises through regional private sector, entrepreneurial, or emerging technology partners, we will be able to provide access to or develop projects that support countries leadership, community development opportunities, women and youth in conservation enterprises.
12) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by investing in children and youth to build the next generation of leaders, we need to ensure that children are inspired and engaged in our work of conservation through entrenching importance of conservation in school circiculums along with funding and promoting visits to parks we shall raise generational voices, Partnership with education ministries in creating and support existing wildlife clubs we will support the existing education system in bringing wildlife, wildlands, and development knowledge to primary school children along with students across all education spheres.
13) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing sustainable land-use plans with communities. Bringing the right people together for mutually beneficial results is core to this strategy. Through engagement with government agencies responsible for development and land use planning, we will offer support and ensure Kingdom Global Tourism and Wildlife Agency is included in the planning process to bring the best option for wildlife and tourism development.
14) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by working with governments and global leaders to engage government agencies through bilateral meetings and public sessions to prioritize opportunities, concerns, and challenges in creating revenue and viability from wildlife-based activities.
15) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by believing in countries leadership and integrity: We are most successful when our results are owned and carried forward by others; thus in partnerships, we develop conservation solutions that emphasize countries capacity and leadership.
16) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by recognizing and empowering youth and women: Our work will only be sustainable if future generations subscribe to our mission.
17) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by promoting prosperity through holistic and pragmatic, creating sustainable conservation gains that preserve wildlife habitat while directly benefiting people living in and near wildlife areas.
18) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by innovation and technology mechanisms that can scale up our work and impact and digital technologies that can create new experiences by more directly connecting people to wildlands and wildlife.
19) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by we commit to respect, protect and promote human rights: At all times irrespective of gender, race, sexual orientation, age, or class we will adopt a rights-based conservation approach.

20) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife along with marine that is prone to oil pollution from ships emotions and oil tankers Oil pollution may result from normal activities such as ship to shore transfers and upland tank storage at the port. Marine Protected Areas (MPAs) are defined as 'Areas set aside by law to protect and conserve the marine and coastal biodiversity and the related ecotones for posterity by enhancing the regeneration and ecological integrity of the mangroves, coral reefs, sea grass beds, sand beaches and their associated resources which are vital for sustainable development through scientific research, education, recreation and other compatible resource utilization.
21) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife supporting government's effort in comprehensively managing countries marine and coastal resources is evident through the integrated coastal zone management policy which provides for the development of the coastal zone in countries. The framework is intended to guide actions and policies related to the use and management of countrie's coastal zone resources, including their protection and restoration.
22) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife including adequate coastal and marine resources management that include developing country-wide maps depicting areas that will require shore protection and those to be left to adapt naturally, Establishing a biodiversity monitoring network to identify species that will be affected by climate change and those could be used as biological indicators , Establishing networks of marine protected regions and Providing economic incentives to diversify livelihood options to reduce over dependence on coastal resources In terms of legal and regulatory frameworks, the government has made efforts by putting in place the following legal instruments through National Maritime Authority Act units.
23) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through countries Law include Integrated approach to forest management, conservation and development including sustainability concerns, ecological values and social interests Management to entail sustainable multiple forest uses and benefits including timber, fuel, food and other forest products, as well as biological diversity and resources, protection of ecosystems and watersheds, recreation and tourism, and other environmental services such as carbon sequestration, Existence of adequate planning tools (in particular management plans, Existence of environmental and social impact assessments/audits (e.g. certification schemes).
24) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy transparent forest concessions and other contractual arrangements, with provisions for accountability, Community-based arrangements, decentralization of responsibilities and devolution of powers to local actors. Commitment to inter-sectoral development sustainable use of forest resources and international conventions and other agreements to promote sustainable management, conservation and utilization of forests and biological diversity.
25) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to address the challenges obtaining in the forest sector in the countries to Contribute to poverty reduction, employment creation and improvement of livelihoods through sustainable use, conservation and management of forests and trees, Contribute to sustainable land use through soil, water and biodiversity conservation, and tree planting through the sustainable management of forests and trees;
26) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to promote the participation of the private sector, communities and other stakeholders in forest management to conserve water catchment areas, create employment, reduce poverty and ensure the sustainability of the forest sector.
27) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to Promote farm forestry to produce timber, wood fuel and other forest products, Promote dry land forestry to produce wood fuel and to supply wood and non-wood forest products and Promote forest extension to enable farmers and other forest stakeholders to benefit from forest management approaches and technologies.

28) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy Development Policy strategy is to improve the standard of living of population by appropriately integrating into the mainstream national economy and social development in an environmentally sustainable manner. This Policy is largely supportive to sustainable utilization of fuel wood materials for charcoal especially in areas that are currently under communal land ownership.
29) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by enacting National Land Policy that provides a platform for addressing current issues such as access to land, land use planning, restitution of historical injustices, environmental degradation, conflicts, unplanned proliferation of informal settlements, outdated legal framework, institutional framework and information management on forest.
30) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy energy Policy that seeks to ensure to ensure adequate, quality, cost-effective and affordable supply of energy to meet development needs, while protecting and conserving the environment. It recognizes environmental protection as one of the biggest challenge. It proposes several policy responses with the following being relevant to forest conservation.
31) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy enforcing protection of catchment areas, reforestation and afforestation, and encouraging agro forestry practices.
32) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy for countries to enact Water Policy to provide for the supply and distribution of water resources throughout countries that manages and recognises the fact that increased human activities in catchment areas have reduced forest cover and is hence a threat to water availability. This policy is applicable to river basin management and can therefore be applied in the management of river deltas, riverine forests and adjacent catchments. Its holistic approach to catchment protection provides room for synergies between forestry and water sectors in terms of resource mobilization.
33) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy be enacting National Food Policy that summarizes the land use situation and the intensity of land use required for self-sufficiency in food. The biggest threat facing countrie's forests is agricultural land expansion especially through the short-term shifting cultivation. The policy advocates for stoppage of further destruction of forests in both gazetted and trust land forests. Its emphasis on increased food production may be at the expense of forests. It is an important policy to reconcile land use given the stiff competition forestry is facing from agriculture.
34) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through strong Environmental Management and Coordination policies that provides a framework for integrating environmental considerations into the country's overall economic and social development. It aims at harmonising the various sector specific legislations that impact on environment to ensure greater protection of the physical and social environment. Implementation of this Act is guided by the principle of public participation in the development of policies, plans and processes for environmental management. It also recognises the cultural and social dimensions applied in the management of natural resources.
35) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy be enacting Water Act that provides for catchment protection and protection of wells and springs that occurs in the forest and further support community involvement in management of these catchments. It is also useful in riverine vegetation protection including other smaller rivers that flow into the ocean.
36) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to support Forests Act. Countries Forest Service can therefore work with water user groups (consumers), service providers and water service boards to conserve catchment forests.
37) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy be embracing the Wildlife (Conservation and Management) strongly provides for the protection of endangered flora and Fauna as provided for in the
38)

Act, the process of gazettement and de-gazettement of protected areas under National Wildlife Service jurisdiction requires parliamentary approval. This level of decision-making and legitimacy of the whole process ensures protection of these areas.

39) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy be enacting The Agriculture Act, that provides for soil and water conservation and prevents the destruction of vegetation. Its effective implementation can help address short term shifting cultivation or the slash/burn agriculture, which is the main force behind forest degradation. The Act provides for rules to prohibit, regulate, and control clearing of land for cultivation and grazing of livestock thus complementing the Forests Act. Enforcement of the Act has been the biggest problem especially on protection of riverbanks that have been cultivated resulting in soil erosion and heavy silt load on rivers.
40) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to embrace the Antiques and Monuments Act used for gazettement of areas of historical importance and threatened heritage now under threat from cultivation, charcoal burning and mining.
41) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by embracing The Local Government that empowers local authorities to make by-laws used to control cutting of timber, destruction of trees and shrubs and afforestation. It also authorizes local authorities to take measures necessary to control bush fires, quarrying for minerals, sand, gravel, clay or stones. The Act is applicable in trust lands where resource exploitation needs control. Fires have been listed as major threat to our forests so an opportunity is available for engaging communities in firefighting and control. The trust lands under the control of the local authorities have witnessed massive destruction of forest resources through 52 charcoal burning and other illegal forest activities.
42) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by embracing The Fisheries Act that regulates trout fishing in the forests and protects fish breeding areas and is relevant to mangrove management at the coast.
43) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy be enforcing local leaders and in Africa context Chiefs' Authority Act The Act empowers local Chiefs to enforce implementation of various environmental and conservation provisions within the local limits of their jurisdiction, including controlled use of tree resources on private land. This act is important because it checks the activities at grassroots level but its implementation has been weak.
44) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy towards policies relevant to Environment and Mineral resources sector Policies that also manages mining activities not to affect forestation and all activities have vision of tree planting along with recovery with rehabilitation.
45) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife ecosystems that faces various threats from the ever increasing human population pressure through tourism, industrial pollution, over fishing, destructive fishing, mangrove logging and other unsustainable use of marine resources.
46) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy disaster management responses as an emerging environmental issue and states that the government will adopt approaches in combating climate change – mitigation and adaptation, response units to manage forest fires and restore, The policy recognizes that many of the natural disasters in countries are climate related, e.g. fires, floods, drought, occasional landslides, increased disease episodes, etc, and that the economic impact of these disasters cut across the key sectors of the economy. With agricultural production, industrial processing, manufacturing, tourism, infrastructure and public health being the most impacted. The policy anticipates that with climate change the frequency and intensity of extreme weather events such as floods and droughts will increase.
47) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy In order to deal with Climate Change to develop and implement a National Climate Change Strategy, Identify and raise awareness of opportunities for adaptation measures through promotion of appropriate technology transfer and capacity building, Develop and implement under the Kyoto Protocol's Clean Development Mechanism (CDM) programmes and projects that encourage significant levels of investment and technology transfer for sustainable development,

Develop an integrated improved early warning and response systems for climate and disaster risks with a clear strategy for dissemination of information to the grassroots, Build and strengthen research capacity on climate change and related environmental issues

48) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by embracing The Environmental Management and Coordination Act The legal framework for environmental concerns within countries is the Environmental Management and Coordination Act that has minimal content relating explicitly to either adaptation or mitigation of climate change.
49) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy institutionalizes a committee mandated to produce a National Environment Action Plans.
50) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy a comprehensive approach and understanding around adaptation which tackles vulnerable pastoral and agricultural communities, for instance, is lacking entirely. Although there are opportunities for mitigation through use of incentives/disincentives in section and reduction of emissions through proposed Air Quality Regulations in section, there is need to amend in light of the shortcoming and the fact that a new Environmental Policy to be established.
51) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy be embracing a Balanced Mining Act Prospecting and exploitation of mineral resources is regulated by the Mining Act managing a balanced mining work includes minerals found within countries parks, Continental Shelf, Territorial waters and the Exclusive Economic Zone that all activities take care of balanced investment.
52) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by developing infractructure of roads, power connectivity, water for animals and hotels in parks, Renewable Energy solar and wind along with security servalance systems and vehicles in parks and conservancies.
53) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by supporting clean environment in parks and conserverncies ,Biodiversity, Climate Change, Desertification, protection Endangered Species, Law of the Sea, Marine Dumping, Marine Life Conservation, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Wetlands, and Whaling.
54) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by ratified the Convention on Biological Diversity, the negotiated biodiversity agreement committed to sustainable use of biodiversity through significant progress in island biodiversity, mountain biodiversity and marine and coastal biodiversity.
55) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by embracing National Practice and Policy Framework there are protected areas to protect specific sites of biodiversity and cultural interest, with significance ranging from local to global.
56) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by Joint Biodiversity Management Some currently existing initiatives for the joint management of biodiversity resources include medicinal plants networks, management of forest reserves, coastal forests and some sacred sites. This joint management is achieved through partnerships with local communities, businesses, multilateral institutions and not-for-profit organizations.
57) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through In-situ conservation efforts and strategies These are achieved through National Parks, National Reserves, Sanctuaries, Marine Reserves and Forest Reserves managed in-situ & ex-situ conservation facilities in are mainly for plant species conservation. The National Gene bank undertakes ex-situ conservation of cultivated species and wild species of economic value such as medicinal plants and wild relatives of crops by supporting forestry research and also maintains ex-situ seed.
58) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy in preservation of botanical and Zoological Gardens along with National Museum that holds plants collections for research, education, conservation and recreation. Some institutions of learning and private institutions also maintain their own facilities.

59) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy arboreta and Parks in Urban centers and Municipalities are also served by gardens and parks like kenya has Uhuru Park and City Park in Nairobi.
60) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy of Rangeland Management in Kenya occupy about 70% of the land area and are home to large populations of wild animals and plants. Rangelands have a high value for leisure, pastoral livelihoods and scientific studies.
61) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy in supporting Integrated Land-Use Planning: Land-use planning as envisaged in the New Land Policy and the new constitution has opportunities that can help ensure that each part of the landscape is used for those purposes for which it is best suited for biodiversity conservation.
62) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy in supporting countries specialized programmes: These programmes are mainly centered on large, critical ecosystems or specific groups of critically endangered species, programmes for biodiversity audits, fencing off wildlife parks and reserves to stem human-wildlife conflict, the Save the Mau integrated project for catchments protection, the Lake Victoria Ecosystem Management Program that addresses challenges of dwindling inland fisheries, etc.
63) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy supporting Institutions in charge of Pollution Control Institution Ministry of Environment and Mineral Resources is the ministry responsible for the wide environmental management in countries through it parastatal, the National Environment Management Authority Ministries of public health and sanitation-environmental health including; Public Health, the working environment radiation control and management of hazardous wastes. Ministry of water development-through management of water resources utilization. Ministry of Local government-through management of urban environments by urban councils. Ministry of forestry and wild life-anti poaching and deforestation Ministry of Agriculture-Controls farming practices to prevent soil erosion in areas with sloppy land.
64) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by Promoting environmental conservation in order to provide better support to the economic pillar flagship projects and for the purposes of achieving the Millennium Development Goals (MDGs) Improving pollution and waste management through the design and application of economic incentives Commissioning of public-private partnerships (PPPs) for improved efficiency in water and sanitation delivery Enhancing disaster preparedness in all disaster-prone areas and improve the capacity for adaptation to global climatic change Harmonizing environment-related laws for better environmental planning and governance.
65) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy flagship programmes for Pollution Control sector Flagship programmes The Water Catchment Management Initiative Securing the Wildlife Corridors and Migratory Routes Initiative the Solid Waste Management System InitiativeThe Plastic Bags Initiative which will require tightening regulations in order to limit production and usage of environmentally-detrimental plastic bags The Land Cover and Land Use Mapping Initiative.
66) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy programmes in the Land Degradation sector flagship programmes Programme Details Land Use Master Plan. This will involve collecting accurate and continuously updated mapping of land use patterns in countries and of tracking development. This project will also entail undertaking both livestock and wildlife censuses and zooming of land in rural and urban areas that are currently unmapped. Waste management system this will entail preparation of a waste management strategy aimed at involving mainly the youth groups.
67) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy particularly the dandora dump site in Nairobi and the establishment of a solid waste management system for the city of Nairobi on a 67 public private partnership basis. Urban sewerage programme will aim to improve sanitation and hygiene and reduce environmental pollution of towns located on shared water basins. Pilot projects will be based in Malaba, Lagdera, Wajir / Elwak and Liboi. Land Information Management system this intervention will contribute to poverty reduction, good governance and improved security of land tenure. The system will also enable the capture, management and analysis of geographically referenced land-related data in order to produce land information for decision-making in land administration and management.

68) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy project entails full rehabilitation of the water towers of Escarpments, Hills, Mt Elgon, Rehabilitation, Regeneration & Restoration of Rivers The aim of the programme is to fully rehabilitate the catchment basin of the Nairobi River in order to make it a recreation site. Other rivers like Ngong will also be covered under this programme. Water resources information management This will entail rehabilitation and acquisition of new hydrometric data which will be installed in strategic and vulnerable water resources (surface and groundwater) country-wide, and be linked to support World Hydrological Observation cycle rehabilitate hydro meteorological stations; capacities of will be built in lakes for purposes of planning groundwater development in the and replicated in other water harvesting and storage programme of dams in parks.
69) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through construction of large multi-purpose dams some of this dam create water for wildlife, tourism water sports in nations , irrigation , facilitates tree growths along Water dykes will also be constructed along the lower reaches of rivers.
70) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy water storage and harvesting especially in parks the government aimed to construct two multi-purpose dams with a total storage capacity of cubic meters along rivers Nzoia and Nyando.
71) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy resources upon which our collective development depends through National Wildlife Strategy gives life to the Wildlife Policy. It provides a mechanism to coordinate the sector and implement the Wildlife Conservation and Management. Our strategy plan is designed to bring Kenyans together through a shared vision for wildlife as a cornerstone of our social, cultural, environmental, and economic development. In addition, the strategy provides a collaborative framework for implementation and crosssectorial coordination. Essentially, it is a mechanism to identify priorities, coordinate implementation and monitor impact. National Wildlife Strategy.
72) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy for this Strategy to succeed, the national government, local governments, communities and landowners' to improve effectiveness of their actions.
73) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy collective focus of countries to target threats and embrace opportunities for wildlife conservation.
74) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to promote an ecosystem approach and inclusion of biodiversity in totality, Promote integrated planning and cross-sectorial coordination, Enhance awareness and participation, Include evidence-based decisionmaking, Embrace equitable and inclusive access to benefit sharing, climate resilience, good governance and sustainable financing.
75) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy towards resilient ecosystems engagement by all citizen in the countries and globally towards evidence-based decision making Sustainability and governance.
76) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy geared towards the purpose of the National Wildlife Strategy to provide an overarching framework that prioritizes, coordinates, and inspires participation for the transformation of the wildlife sector in countries.
77) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by prescribing principles, objectives, standards, indicators, procedures and incentives for the protection, conservation, and management of wildlife resources.
78) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy with pillars that underpin this strategy focused on protection of wildlife and ecosystem services for the benefit of all citizens Nationally and Globally.

79) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy stewardship in the formulation of this strategy rests with the Ministries of Tourism and Wildlife It is a transformative vision that speaks to Kenya's rich heritage and calls on all Kenyans to participate in–and directly benefit from– wildlife conservation and management.
80) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy roadmap to wildlife conservation proactive government intervention in wildlife conservation in countries with wildlife regulations enacted to regulate and control indiscriminate hunting and purposes of strict wildlife and habitat preservation.
81) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through wildlife conservation and management policy along with functions of the National Parks Trustees, Game Department, Wildlife Conservation and Management Departments.
82) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy provide an opportunity for a paradigm shift in conservation strategies and approaches to address these challenges through the concept of devolution, the principle of subsidiarity, and the requirement to prepare a National Wildlife Conservation and Management Strategy.
83) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through Habitats and Ecosystem, Species and Conservation, Participation and Awareness , Access and Sustainable use , Research and Knowledge, Capacity and Training ,Sustainability and Governance through National Wildlife Strategy
84) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by supporting freshwater ecosystems Freshwater ecosystems are vital to human well-being, ecological integrity and national development of freshwater resources, including rivers, lakes and swamps, cubic meters.
85) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy freshwater ecosystems are a lifeline for fisheries, agriculture, livestock and biodiversity conservation.
86) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to support Marine and Coastal Ecosystem coastline–from in Nations and globally hosting a large proportion of the marine species found on the beaches, mangroves, coastal wetlands, sea-grass beds, lagoons and coral reefs. The distribution of ecosystems along the coastline is influenced by coastal geology, hydrology, oceanography, and the characteristics of the continental shelf. Sandy soils and a relatively dry climate have produced a mosaic of coastal forests and bushland vegetation at the coast.
87) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy enabling the development of a continuous fringing coral reef, rocky cliffs, white sandy beaches, mangrove creeks, estuaries, Inland waters and wetlands contain unique species and some are the last refuge for rare and threatened species. They also provide a wide variety of environmental services and are breeding grounds for fish and thousands of migratory birds. The rivers and lakes provide water for irrigation, hydropower generation, industrial and domestic use, and modulation of local climate. Marine protected areas have healthier corals with abundant fish due to limited human interference. The coral reefs and rocky shores harbour a rich biodiversity of birds, fish, crustaceans, molluscs and echinoderms.
88) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to support urban Ecosystems simply the community of plants, animals, and humans that inhabit the urban environment. It is an area physically dominated by man-made structures like buildings, roads, sewers, and power lines. Managing urban areas as ecosystems begins with a better understanding of what green spaces contribute to urban life, as well as an appreciation for the pressures they face and the rapid expansion or urban spaces now occurring. The green spaces provide shade, temperature control, air filtering, noise reduction, storm water control, biodiversity and wildlife habitat, and food production of urban narrow-ranged plants and animals.
89) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy ecosystems projected Impacts Savanna Climate change can alter migratory routes (and timings) of species that use both seasonal wetlands

90) (e.g., migratory birds) and track seasonal changes in vegetation (e.g wildebeest) change in the intensity or duration of the rainy versus dry seasons could change relative breeding rates, phenology, synchrony and genetic structures of species populations, Invasive species and other species with high fertility and dispersal capabilities have been shown to be highly adaptive to variable climatic conditions in the savannas. • A changing climate may worsen the threats to forests, such as pest outbreaks, fires, and human encroachment to forest. Warming temperatures could increase could also shift the geographic ranges of some tree species, reduced provision of environmental services and economic activity.
91) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy mitigating effects of climate change along with promoting mountain climbing will be at risk due to rising temperatures and snowfalls, loss of plants in the afro-alpine zone and bird in higher mountain ranges. Freshwater factors determining weed growth such as water hyacinth rates are water temperature and nitrogen concentration; with growth rates maximal at 29.6°C. Climate change will lead to an increase in pests and diseases in fisheries due to increased temperature and reduced water quality. Increased precipitation may lead to pollution of fish farming facilities by heavy metals. Marine and Coastal • Marine species that might be affected by climate change will include plankton - which forms the basis of marine food chains - corals, fish and seabirds. • Rising sea levels and more extreme weather events threaten beaches and coastal infrastructure enjoyed by hundreds of millions of tourists each year. • The combination of rising water temperatures and increasing ocean acidification, caused by the absorption of carbon dioxide, spell particular peril for reef ecosystems and the dive tourism they support. Cropland • Maize is grown in temperatures of 18°C–27°C. A 1.5°C warming by the 2030s could lead to about 40 percent of present maize cropping areas being no longer suitable for current cultivars. • The optimum mean annual temperature range (for Arabica coffee) is 18°C–21°C. Above 23°C, development and ripening of fruits are accelerated, often leading to loss of quality. Urban • Reduced volumes of water supply, floods, mudslides, increase in water borne diseases.
92) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy managing the processes that affect wildlife and wildlife habitats; habitat loss, land degradation, over- utilization of natural resources, poaching and illegal wildlife trade, pollution and invasive species, siltation and over-abstraction and human wildlife conflict. Habitat loss, fragmentation and degradation Biodiversity is changing at an unprecedented speed and scale as a complex response to several human-induced changes in the global environment.
93) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through our strategy into a conceptual framework to enhance communication, coordination, and collaboration, while inspiring engagement and catalyzing action.
94) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy resilient Ecosystems Addresses the prioritization, planning, and protection of ecosystems and species. This pillar emphasizes a comprehensive assessment of the status and conservation priorities for ecosystems and species, development of frameworks for integrated planning, and the effective coordination and implementation of species protection and wildlife security in the country, including reducing human wildlife conflict and promoting coexistence.
95) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by engagement of all citizens highlighting the need to engage all global citizens in recognizing the value of our wildlife and embracing their role in its conservation through appropriate collaborative initiatives. This includes outreach and awareness activities, conservation education and curriculum development, and incentive programmes that enhance access to benefits and promote participation by all citizens.
96) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy evidence based decision making emphasizes the importance of knowledge, information, and human capital for successful conservation. This pillar includes strategies to enhance capacity, develop evidence based decision support tools for adaptive management, and promote data sharing, use, and integrated cross sectoral and multi-scale planning for conservation and sustainable development.
97) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by boasting sustainability and Governance outlining a framework and set of priority actions for ensuring the coordination, effective implementation, and sustainability of wildlife conservation in countries.

98) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy development of an effective governance structure involving communities, counties, and the national government, a conservation fund, and innovative funding opportunities based on a comprehensive understanding of the value of wildlife to countrie's sustainable development.

99) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through National Wildlife Strategy that responds to current and future challenges, the strategy provides a coherent structure and theory of change. This is how we will move from the current state of declining wildlife and degraded habitats to one of health wildlife populations and functioning ecosystems, Habitats & Ecosystems Species Conservation Participation & Awareness Access & Sustainable Use Research & Knowledge Capacity & Training Governance & Finance Fragmented Degraded Declining Vulnerable Connected Resilient Functional Narrow focus Limited knowledge Over-utilization Conflict and poaching Biodiversity Healthy populations.

100) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by improvement coexistence little information and not accessible No awareness Nobody Cares! High levels of awareness, engagement and participation Limited awareness of opportunities, Over-utilization, Conflict and poaching All Kenyans are aware of opportunities and with access to benefits Uncoordinated underfunded limited sharing and access Coordinated relevant Research which supports Conservation decision Making Lack of capacity for nature based opportunities, modelling, and planning Individuals and Institutions implementing effective conservation Little support and investments. Lack of coordination and collaboration Financially sustainable, collaborative, coordinated, effective and harmonized

101) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy in line with, and support, international treaties and obligations such as the Convention on Biological Diversity, Targets, and the Sustainable Development Goals . Sustainable Development Goals, Transformation of wildlife conservation in countries requires commitment at local, county, national and international levels. This is strengthened through leveraging existing efforts and global visions for effective coordination and collaboration.

102) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy towards visualization of the SDGs recognizes the essential role of a healthy environment in supporting sustainable development in countries and across the globe. This vision for development – where economic, social, and ecological development are interlinked and mutually supporting – is central to this National Wildlife Strategy 2020 to 2050.

103) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy Knowledge Capacity Sustainability No Poverty Quality Education Gender Equality Clean Water Economic Growth Industry innovation and infrastructure Sustainable Communities Climate Action Life Below Water Life on Land Peace Justice and strong institutions Partnerships for goals Sustainable Development Goals The strategy will directly contribute to a number of national targets.

104) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy through our strategic goals that represent priority areas of intervention. They guide government policy, provide a framework for collaboration to direct countries's wildlife is healthy, resilient and valued by countries Resilient Ecosystems Sustainability and Governance in Habitats & Ecosystems, Species Conservation, Participation and Awareness, Access and Sustainable use, Research and Knowledge, Capacity and Training Engagement by all countries citizens, Evidence based Decision Making, Governance and Finance efforts and ensure coordination for enhanced impact.

105) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy that addresses these issues with a focus on evidence-based decision support tools, adaptive management, integrated cross-sectoral and multiscale planning, and enhanced protection, rehabilitation and restoration of key ecosystems and wildlife habitats.

106) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by Increasing understanding of ecosystem functioning through identification, prioritization, and securing of key conservation areas and ecosystems to focus and enhance the effectiveness of conservation investments and interventions.

107) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to Improve integrated data driven land use planning at regional (transboundary), national, county, PA and ecosystem levels to enhance the protection of wildlife habitat, ecosystem services, and reduce biodiversity loss.

108) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy to Identify key biodiversity resources and determine their Minimum Viable Conservation Areas (MVCA) at national and county levels, with special reference to wildlife dispersal areas, wildlife corridors and transboundary ecosystems.

109) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations and institutions to promote Tourism and develop wildlife conservancy by developing and implementing an integrated multilevel, multi-sectoral, collaborative planning framework, including tools, guidelines, and standards for ecosystem planning to support national and county level land use planning and sustainable infrastructure development Activity

110) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, institutions, projects to promote Tourism and develop wildlife conservancy by develop and implement management plans at protected area, ecosystem, county, and national levels.

111) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, institutions, projects to promote Tourism and develop wildlife conservancy towards National Wildlife Strategy to Protect, rehabilitate, and restore wildlife habitats and their connectivity, including forests, savannas, freshwater, marine, and mountain ecosystems to increase the resilience of key habitats and ecosystems.

112) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, institutions, projects to promote Tourism and develop wildlife conservancy by securing existing protected areas through assessment of status, demarcation of boundaries, and acquisition of title deeds.

113) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, institutions, projects to promote Tourism and develop wildlife conservancy by ensuring all existing protected areas are effectively managed, including currently inactive “paper parks”.

114) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations , institutions projects to promote Tourism and develop wildlife conservancy by rehabilitating and restore degraded habitats in protected areas, corridors and dispersal areas through priority parks for restoration in kenya pilot will be Shimba, Tsavo East and West, Chyulu, Amboseli Nairobi, Nakuru, Aberdare, Mt.Kenya and Meru parks.

115) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, institutions, projects to promote Tourism and develop wildlife conservancy by increasing the area of land under effective wildlife conservation management through the creation of new wildlife protected areas and the securing of priority wildlife corridors and dispersal areas.

116) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects and institutions to promote Tourism and develop wildlife conservancy by increasing the extent of land effectively managed by communities for biodiversity conservation.

117) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Increasing the extent and management effectiveness of the conservation and protection of marine and coastal ecosystems.

118) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by enhancing species protection and management to ensure healthier, more resilient wildlife communities and populations.

119) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by species Conservation Prioritization Planning Conservation and Management Assessment Monitoring Modelling Species Plans and Strategies Protection and Security Biodiveristy Healthy Populations Coexistence Narrow Focus Limited Knowledge Over Utilization Conflict Poaching.

120) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Conducting a comprehensive and continuous assessment, and communicate the results, of the status and threats for wildlife species.

121) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing, adopting and implementing policy guidelines on species specific conservation interventions - including captive breeding, introduction, reintroductions, and translocations.

122) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by implementing conservation interventions for priority species (threatened/vulnerable/ endangered) to address emerging and critical threats, including climate change, disease, and land use change.

123) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy developing an endangered Species Act for countries to catalyze broad public support and coordinate cross sectoral engagement in the conservation and management of endangered and threatened species.

124) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by reducing poaching, over utilization, and the illegal wildlife trade and their related impacts.

125) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by enhancing the coordination and capacity of security and law enforcement agencies to reduce, and improve responses to, incidents of poaching, illegal wildlife trade and reduce wildlife related crimes.

126) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Modernizing and expanding wildlife security units to increase coordination and effectiveness.

127) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to promote coexistence to reduce human wildlife conflict.

128) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing innovative mitigation measures in areas with incompatible land-uses, including wildlife-proof barriers, bomas, etc

129) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing management approaches including harnessing traditional/ indigenous knowledge in mitigating human wildlife conflict, with focus on education, awareness, integrated planning and building capacity of wildlife officers and local communities .

130) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and providing communication and education materials, and extension services on human wildlife conflict mitigation measures and management strategies.

131) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy developing and promoting alternative consolation programmes to ensure prompt response for loss, injury and damage caused by wildlife.

132) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy developing sustainable innovative national compensation scheme including insurance and community supported programmes for loss of property, livestock and crops.

133) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy setuping anti-venom centres, with partners, in relevant priority areas with high incidences of snake bite related deaths.

134) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by establish and maintain a database, bringing together existing and new data, on the types, extent, causes and impacts of human wildlife conflict and mitigation measures for such conflict.

135) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by training and equiping wildlife officers and local communities in rapid response to human wildlife conflict, mitigation, and management approaches.

136) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by achieving Global Goals Sustainable Development Goals of Conservation Master Plan Ecosystems plans will be developed, paper parks will be restored, new marine plans will be developed to include the blue economy, red list updated – breeding programs enhanced, reduced Human Wildlife Conflict death through snakes – starting anti-venom centers, have an effective security and law enforcement responses.

137) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Invasive Species Management Plan - Indian House Crow, Beach Management Plans , Establish Breeding Sanctuaries for rare & endangered species , Strengthening countries Wildlife Service, Enhance coordination, build capacity and support law enforcement to poaching and illegal wildlife trade, Human Wildlife Conflict - mitigation measures and Rapid Response Unit, Setup anti-venom centres in relevant priority conflict areas in partnership with the Kenya Red Cross, the Ministry of Health, and others.

138) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy developing a national conservation master plan by Increase the awareness and appreciation of wildlife by all countries and motivate them to support and take action that enhances their participation in conservation. Participation and Awareness Value Care Act Relevant information available and accessible Partnerships and collaborations for effective and coordinated participation High levels of awareness and understanding, engagement and participation little information and not accessible No awareness Nobody Cares! “Reckless” behaviour Low engagement and active alienation.

139) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Goal Description All country citizens be active participants and stakeholders in the conservation of wildlife. The goal aims at cultivating national pride, public support and active engagement of all citizens in the conservation of this rich national heritage and natural asset. Activities under this goal are designed to ensure citizens can access information and are aware on the intrinsic and economic values of wildlife. Awareness activities, outreach and diverse training opportunities will ensure citizens take individual and collective action to support wildlife conservation.

140) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by people are more inclined to protect and conserve what they understand and appreciate. The better all sectors are aware of and understand the complexity and implications of their actions, the more responsibly they will respond.

141) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by historically has had strong ties between people and nature. Over time, there have been changing attitudes with shifting expectations and aspirations. This has led to a gradual disconnect between people and nature. Most citizens are indifferent to conservation with low engagement and understanding on the value and benefits of wildlife conservation. This lack of engagement and understanding of the value and benefits of wildlife conservation has deep environmental ramifications.

142) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy the devolved governance framework it enshrines, supports strong linkages and engagement at all levels, including national, county and across the general public with special reference to women and youth. This goal seeks to restore these natural connections by cultivating value and inspiring action through building awareness and appreciation, building partnerships, and encouraging engagement and participation.

143) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to Increase awareness and understanding to enhance appreciation and encourage action by all citizens.

144) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to Introduce into all education curricula at all levels a comprehensive conservation education and awareness content through e-learning platforms and traditional set books

145) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing comprehensive public outreach and awareness programmes embedded within a public participation strategy to engage all citizens (including people living with wildlife) - “Wildlife our Heritage”

146) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy develop programs for the general public to experience countrie's wildlife and nature.

147) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by fostering partnerships and collaboration among stakeholders to mainstream conservation action across all sectors of society.

148) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by engaging the public, youth, and communities through targeted education and outreach, and stewardship opportunities to enhance participation.

149) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy Conduct a National Competition - across all local gorvernments counties - to select a unique wildlife species for each county (flora or fauna), and then for countries and local gorvernments.

150) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by establishing designated natural areas for public use in cities through partnerships with multiple sectors.

151) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by engaging with 'private sector partnerships' to mainstream biodiversity initiatives in their supply chains, including the development of a Green Business Awards Scheme, with special reference to the government's priority development pillars - Infrastructure, food security, health care and housing and settlements.

152) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by establishing an annual wildlife conservation award scheme to recognize achievement in various aspects of conservation.

153) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy organizing a biennial National wildlife Expo and Investment Forum to showcase best practices in wildlife conservation to the countries public and prospective donors we shall participate in creating global partnership.

154) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by creating a culture of conservation in youth through projects and partnerships that engage them in wildlife conservation and environmental stewardship. Including, tree planting, invasive plant removal, river/ watershed management and recycling projects.

155) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Increasing the awareness and appreciation of wildlife by all Kenyans and motivate them to support and take action that enhances their participation in conservation.

156) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Innovative Approaches to Capturing Benefits All countries citizen are aware of opportunities and with access benefiting Coexistence for Mutual Benefit Narrow Focus Limited Knowledge of opportunities and Techniques Over Utilization Conflict Poaching.

157) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by making nations to be dream tourist global destinations by developing all forms of tourism medical, local tourist, conference tourism, wildlife tourism, hospitality tourism offering a high-end, diverse, and distinctive visitor experience.

158) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy emphasizing the place of value of Wildlife and tourism as an essential component of economic development in country's and global socio economic development blueprint . Wildlife is an essential precondition for its conservation in the face of increasing demands on resources and space. For citizens in a country to value their wildlife, this goal promotes an enhanced understanding of benefits. It promotes the development and implementation of mechanisms for equitable sharing and facilitates to access the benefits through sustainable pro-wildlife investments. The goal also proposes mechanisms for rebalancing the relationship between people and wildlife for those that bear the costs and the burden of sustaining this essential natural resource on behalf of all citizens and the world.

159) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by advocation for protective living with wildlife comes with both direct and indirect costs. However, it also presents an opportunity for those that designate their land for wildlife conservation to ensure sustainable exploitation, utilization, management and conservation of the environment and natural resources, while ensuring equitable sharing of accruing benefits.

160) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by strong advocacy of the Wildlife Act provides that benefits are to be derived from wildlife conservation to enable offset the costs of managing wildlife and ensure value of wildlife does not decline. In the above context, access to wildlife resources is recognized as a legal right under the Act for landowners and communities involved in wildlife conservation and living with wildlife. Wildlife-related tourism is a top foreign exchange earner and an important economic driver in countries. Yet, the direct economic returns and other benefits are poorly quantified and unequally distributed in some countries. While the potential and actual benefits–social, cultural, economic, and ecological– from wildlife and wildlife resources (e.g. habitat) are substantial, the ordinary Kenyan has limited appreciation of the scope of these benefits and potential mechanisms to access the benefits. The perception is still that wildlife conservation is for foreigners and a few elite citizens.

161) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by advocating positive change for constructive feelings are compounded by the very real costs associated with living with wildlife that are disproportionately born by local communities. In addition, there is a narrow focus on short-term benefits from habitats and ecosystems–poaching, overgrazing, charcoal production, illegal logging, etc.–and unsustainable tourism development. There is little investment in conservation and this slowly erodes the resources and ecosystem services on which countries's sustainable development depends on Combined with the currently high (and rising) levels of conflict, countries wildlife resources and rich natural heritage are too often seen as an actual cost rather than a potential benefit.

162) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy through our strategic goals that addresses these issues and seeks to broaden our understanding of benefits associated with healthy ecosystems and wildlife. It promotes equitable sharing of benefits for all country citizens and enhances access to benefits through innovative prowildlife nature based enterprises. This will reduce the costs, and increase the benefits, of living with wildlife to ensure mutually beneficial coexistence. Increasing the value of wildlife to countries citizens will promote voluntary conservation action (participation) towards improving wildlife conservation.

163) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy including the rights and responsibilities of landowners, to facilitate equitable and effective benefit sharing for sustainable livelihoods to support wildlife conservation. This includes Assess, review, and revise tax structure on nature based enterprises and activities including exemption of stamp duty on registration of land for conservation, including exemption of stamp duty on registration of land for conservation, reduced land tax burdens(e.g. rents and rates), etc, to promote investment in wildlife conservation and wildlife compatible land uses.

164) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing a clear framework for access and benefit sharing from wildlife resources and biodiversity.

165) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy Conduct a market study, including a review of past and current efforts, to establish and inform the sustainability of consumptive wildlife utilisation including game farming and game ranching.

166) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing a comprehensive incentives package to encourage voluntary conservation through wildlife conservancies, sanctuaries, game farms, game ranches, and other green spaces, including use of land leasing, conservation easements and offsets, land banking and other means.

167) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and promoting innovative and strategic investment for the sustainable use of wildlife resources and biodiversity along with Conducting a collaborative study (pull together existing studies) on sustainable utilization and natural resource management of marine and coastal resources and innovative opportunities for investment and sustainable livelihoods - with special reference to marine protected areas, but look at ecosystems broadly to avoid poor sectoral coordination.

168) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and promoting innovative approaches for catalyzing investment and benefits from sustainable utilization and natural resource management through innovative structures (e.g. conservancies) in marine and coastal ecosystems.

169) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and promoting the cross sectoral coordination of marine and coastal natural resource management for sustainable utilization.

170) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and promoting innovative and strategic investment for the sustainable use of wildlife resources and biodiversity.

171) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and piloting local industry for value addition and marketing of wildlife and wildlife products.

172) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by providing education and extension services, including pilot programs, demonstrations, to promote opportunities for wildlife based enterprises.

173) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by creating opportunities for employment and participation for local communities in biodiversity conservation activities and sustainable use.

174) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Consumptive utilization to review of past and current efforts and opportunities in the future countries for Wildlife Increase partnership with private sector and tourism industry, promote investments across the county through tourist facilities, local added value of local cultural products, innovative tax incentives (example green cities and green counties) and promote opportunities for job creation and employment.

175) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Increasing knowledge and information access and use to support evidence based decision making and adaptive management by Research and Knowledge to Catalyze Action Bioinformatics Platform Bi-annual Conference Modelling and Scenarios Prioritization Coordinated Reelevant Research which supports Conservation Decision Making Uncoordinated Underfunded Limited Access and Sharing Disconnected from Needs Little Social and Economic Information.

176) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy through our strategic goal that addresses the need to strengthen the science-policy interface by setting up a Research and Innovation Hub and strengthening the Countries Wildlife Service Training Institutions. The bioinformatics hub will bring together dispersed biodiversity information and provide a platform for biodiversity assessments as to enhance evidence-based decision-making at all levels. Context Better information on the status, trends and drivers of biodiversity change is needed to assist governments in developing more effective and timely policy responses.

177) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting Tourism promotion E publications and hand copies for the need for free access to information of all citizens. Biodiversity information in countries is not well coordinated. It is under- funded and with limited data sharing or use of access (Conservation International and Ministry of Environment). Biodiversity reporting at both national and international level needs data to be integrated and modeled to derive meaningful information for decisionmaking. Biodiversity information in countries should be collected by many agencies. These include Countries Museums, Directorate of Resource Surveys and Remote Sensing, National Wildlife Services,

178) Nations Forestry departments, Nations Marine and Fisheries departments, and others. However, there is no existing framework for its consolidation or common access in many countries that we seek to support. This strategy proposes a setup of bioinformatics hub(s), tools and protocols based on global standards that allow for interoperable data sharing platforms. Biodiversity informatics will enhance the efficiency of biodiversity management (data collection, intermigration of data, integration, and analytical tools) by researchers (scientist and local community), policy makers, and funding agencies.

179) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy through our strategy that advocates training upto masters and ten PhD in the field of bioinformatics (data mining, statistical modeling, climate modelers, and environmental economists). To oversee this development our agency will support government Ministries to set up a Wildlife and Tourism Thinktank to coordinate the establishment of bioinformatics hub and the training of future managers and scientists. This will involve other government agencies, local communities, universities and the private sector. The strategy also proposes exchange of scientist between the north and south tofoster learning and also future collaboration on biodiversity and wildlife monitoring and assessments. The hub(s) could be established in government institution or our facilities that we shall procure and build as the requisite infrastructure. This includes modern computers, high-speed Internet connectivity, microwave connectivity and backup facilities. The desired scenario is to conduct a biannual conference for review and plan purposes. The conference's focus will be Information, Innovation, Technology and Investments in wildlife and biodiversity. Training in bioinformatics for young graduate students, a peer-to-peer review program and student mentorship.

180) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy supporting National Wildlife Strategy Strategies by Operationalizing the wildlife research and training institute to establish a wildlife innovation hub at the National Wildlife Servieces and our KGTWA centers.

181) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by conducting priority research to improve wildlife conservation and management, Develop and harmonize existing protocols, standards and tools for information management, sharing and access as part of a data sharing and management framework, Develop and appropriately deploy relevant capacity to build data information systems, manage information systems and ensure sharing and access, Avail research information and knowledge to sectors with direct and indirect impacts on wildlife conservation for use in decision making processes, policy development, and reporting.

182) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Supporting wildlife conservation and management decisions and actions with the best available knowledge derived from natural, and social sciences, and traditional knowledge.

183) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by develop data and information management systems as part of a BioInformatics Platform, to ensure data quality, enhance sharing, and promote access and use.

184) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to establish a think-tank made up of an interdisciplinary team of expert advisors to strengthen research coordination and implementation, knowledge sharing, and use.

185) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to Hold a bi-annual conference to bring data producers, managers, and users together to review, plan, and coordinate with the goal of catalyzing innovation, developing new technologies, and spurring investment to promote data collection, sharing, and use for evidence based wildlife conservation and management.

186) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing a framework for public-private partnerships in coordination, training and of biodiversity research. Reflect the functions of Tourism and Wildlife institutions as stipulated in the wildlife act to strengthen coordination and implementation of research, monitoring, and modeling of ecosystems and wildlife, climate and land use change, and other threats and opportunities to support effective management.

187) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by building the capacity of individuals, institutions, communities and networks – including equipment and technology – to meet current and emerging challenges in wildlife conservation.

188) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting capacity and Training Capacity for Change Gap Analysis Research and Training Institute Curriculum Colleges and Universitites Exchange Programme Individuals and Institutions Implementing Effective Conservation Lack of capacity for nature based opportunities, modelling, and planning. This goal supports the training and capacity building of communities, conservation professionals, interested citizens, students, and the youth to enhance their participation and effectiveness in the conservation of wildlife and ecosystem services. Context In this strategy, great emphasis has been placed on capacity building and training. Feedback from counties, community and academia consultations have indicated big gaps of information and education needs. These are on top of added are the challenges of accelerating land use changes, tenure, and climate change, continuing loss of wildlife, forest and marine resources.

189) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting Spatial Planning, reporting on status of wildlife, forest, etc.) and international (CBD, Aichi targets, etc.) reporting and planning requires up to date data. These data should stand up to rigorous scientific analysis, projections and model the various potential scenarios driven by the various land use and climate options. Therefore countries need to review of our training and capacity building programs. In this strategy the focus will be on academia, local communities and the youth (young scientist and leaders) with equal emphasis on women (individuals or organizations).

Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting Tourism and Wildlife institutions Wildlife Training Institute, universities and bioinformatics hubs–will be used to build capacity of the local community and youth. Individuals, young researchers, youth groups/networks and institutions will be mentored and provided with opportunities of work attachments (both locally and internationally) to increase their ability to effectively work within their communities on conservation matters. This has to be supported by sound science that is focused on generating knowledge but also providing opportunity for development. Therefore, there is urgent need to link the information providers and information users. This will inspire innovation, technologies and open more business opportunities in the tourism and wildlife sector.

190) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by conducting a collaborative needs assessment and develop a capacity building strategy for supporting conservation and management of wildlife in countries with broad support from stakeholders including the public and private sector, universities and colleges, and policy makers.

191) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Identifying capacity needs and priorities to support sustainable wildlife conservation and management at all levels.

192) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Establishing a task force comprising the Ministry of Tourism and Wildlife, KWS, Conservation NGOs, University, Wildlife Research and Training Institute, and Private sector to develop short and long term agendas on research on conservation, management and business opportunities for local entrepreneurs and communities.

193) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing curricula with Universities and colleges to initiate a Conservation Leadership Programme (CLP) for individuals, game scouts and communities members to build the next generation of conservation leaders.

194) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by strengthening local institutions and universities to use cutting-edge science to understand the impacts of various drivers (including climate change) on wildlife and natural resources through academic exchange programmes (students and lectures) and collaborations with external universities.

195) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing Youth programs for various age classes to inspire and equip the next generation of conservation leaders. This includes - discovering parks for Youth under 15, Enjoying opportunities for 15 -18 years (short term attachments to these institutions) and exploring careers for the Youth for 18 - 35 years (employment in these institutions).

196) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by promoting peer-to-peer learning, knowledge sharing, and documentation of best practices to make local action more effective.

197) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Piloting the curriculum developed under this strategy by Supporting the coordination of training and capacity development in wildlife conservation and biodiversity management through the training institute and a network of partner institutions and exchange programmes across levels and sectors.

198) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Implementing relevant, appropriate, and dynamic training programmes at multiple levels. Research and Innovation Hub will be a collaborative centres that brings together people and knowledge and houses the national biodiversity databases. This is a space for entrepreneurs and innovators to try their concepts and pilot innovations – breeds, business ventures, surveys and communication equipment, modelling – climate and wildlife populations.

199) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting research and Innovation hub for Wildlife. The promotion of this agenda on new research on conservation management and business, Youth programs for various age classes to inspire and equip the next generation of conservation leaders - MABINGWA Program.

200) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing an effective governance structure and sustainable financing framework to support conservation actions and improve accountability and transparency on conservation financing. Sustainability and Governance Sustianable Conservation Outcomes Conservation Trust Fund Clear Opportunities for Treasury and Development Partners Private Sector Contributions Real Valuation of Ecosystem Services Innovative PES and tax incentive strategy Coordination Body M&E System for regular review of strategy Clear targets, roles and responsibilities Sustainable Collaborative Coordinated Effective Harmonized support from Gorvernments and Private Sector Short term investments No clear aluation of economic, socila, cultural, and ecological contributions Limited coordination low collaboration Unclear roles Conflicting policies, strategies, and mandates.

201) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy raising more money for conservancy. Several finance mechanisms have been developed, including land acquisition and conservation easements, as well as advocacy programs for environmental protection. However, conservation financing has largely focused on trying to meet conservation needs by trying to overcome challenges and barriers and has continued to be demand driven. The strategy aims to shift focus from demand for to the supply of conservation financing. It is also crucial that the field of conservation finance expands from donor-driven financing toward a commercial, investor-driven market Context. Mnay countries are endowed with vast and diverse natural resources including biodiversity, land and unique ecosystems as well as recently confirmed deposits of oil and gas and other extractives. Yet natural resource governance structure is loose and sector-based, with existing policies and legislation functioning independent of each sector.

202) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy through our stratergy considering adoption of conservation financing across the ecosystem planning and management to mitigate degradation and depletion of habitats and species. This goal addresses these challenges with the development of implementation and monitoring structures, the establishment of a clear governance framework for coordinating and facilitating wildlife conservation activities across all levels, and establishing innovative and sustainable financing mechanisms.

203) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting coordinated national and global networked approach. This uncoordinated approach leads to replication of action for conservation and sustainable use of natural resources. Local communities, private sector and non- governmental organizations work independent of each other. Yet, they compete for the same of public sector and philanthropic financing. This reduces their outputs and intended impact. Historically, the main sources of financing have been through the government budget and conservation fees. However development partners and private philanthropists have become a dependable source for conservation finance. We seek to be the greatest mobilizers and fundraisers of this agenda globally to sustain countrie's natural capital and the services that ecosystems provide are still poorly understood and rarely monitored in terms of economic, social, cultural and ecological contributions. As a result, valuable ecosystems are today undergoing rapid degradation and depletion thus, larger amounts of conservation financing are required than the sums currently being allocated to conservation through public financing, foreign development aid and private philanthropy. Conservation financing can be assessed by its ability to deliver positive transformational impact on key conservation priorities. It includes supporting social and economic pillars in countries development blueprint. Thank you partners for your generosity may you raise even more funds for this noble agenda.

204) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing, reviewing, enacting, harmonizing, and implementing wildlife related policies, laws, regulations, guidelines, and plans.

205) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy developing and Implementing a Monitoring and Evaluation System and communication portal for the Strategy to track progress, evaluate impact, and ensure transparency and engagement.

206) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting the effective coordination and implementation of the strategy at National and global Level. Supporting the effective coordination and implementation of the strategy at County Level. Supporting the effective coordination and implementation of the strategy at Ecosystem Level.

207) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing effective implementation frameworks and monitoring structures for the effective implementation, coordination, and monitoring of the Strategy.

208) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Supporting the effective coordination and implementation of the strategy at National, county, and local levels.

209) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by building the case for conservation finance from within the government along with establishing a National Wildlife Conservation Trust Fund.

210) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by establish an effective wildlife compensation insurance scheme in consultation with the Ministries of Agriculture, Livestock, and Fisheries along with Maping economic flows and values of ecosystem services in order to identify potential markets and payment mechanisms for ecosystem services using information derived from a National Natural Capital assessment.

211) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, and institutions to promote Tourism and develop wildlife conservancy to establish mechanisms for fundraising through conservation events/campaigns/ for conservation programs to net donors, philanthropists and private sector (e.g. Rhino charge, Lewa marathon, etc).

212) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy Explore alternative/innovative tourism options to get more conservation value from tourism, including increased utilization of non traditional areas and reinvestment in communities and conservation initiatives.

213) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Identifying and developing innovative mechanisms for sustainable financing and distribution of funds to support biodiversity conservation and the implementation of the Strategy.

214) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Undertaking Natural Capital Valuation of wildlife sector and its contribution to the economy.

215) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by establish a National Wildlife Conservation Trust fund which donors will contribute including our Helpers Of Africa International through KGTWA.

216) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing private sector partnerships for innovative financing Valuing Wildlife Conduct an economic valuation of wildlife, revise the contribution of wildlife of countries GDP and other economic sector. Negotiate funding from central government, development partners and the private sector for the wildlife and environment sectors to ensure sufficient support for National Wildlife Service and other key institutions. Increase the awareness to both National and county government. Negotiate for the next mid-term plan. “If we can’t all swim together, we will sink.

217) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by reducing the adverse per capita environmental impact of cities, including by paying special attention to air quality and county and other waste management.

218) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by providing universal access to safe, inclusive and accessible, green and public spaces, in particular for women and children, older persons and persons with disabilities.

219) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting positive economic, social and environmental links between urban, peri-urban and rural areas by strengthening national and regional development.

220) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting our cities Green Capitals Urban green spaces are critical ecosystems that support biodiversity. Integrating city and green space planning, recreational development and management, cities can become incubators of biodiversity. Functional green cities provide their residents with recreational areas, a clean environment, and promote healthy living. At the same time, animals, birds, insects, fish and plants are able to thrive in the same urban spaces. Future development of our buildings and infrastructure planning, design and development must have an environmentalist input. A sustainable City is a city that is designed with environmental concerns in mind that also boasts local and international tourism.

221) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting establishment of County Wildlife Conservation and Compensation Committees to support in conservation activities and compensation process of losses occasioned by wildlife.

222) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting community and private conservancies’ participation in national wildlife decision making process through representation in the board of trustees of the National Wildlife Service board and the board of Wildlife Research and Training Institute, Financing mechanism of wildlife conservation outside state protected areas through the Wildlife Endowment Fund, Recognition of community wildlife scouts as wildlife security officers and Access to wildlife resources by the people through sustainable and equitable means.

223) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by engaging and advocating participation of the public in decision making processes including development of subsidiary legislations under the Wildlife Act as well as declaration and variation of boundaries of National Parks and development of the National Wildlife Conservation and Management Strategy. The principle of devolution of wildlife conservation and management should be well developed within the Wildlife and Tourism sustainable development.

224) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by making our stratergies achievable through supportive policies and strategies whose implementation is through concerted effort and goodwill by multiple stakeholders. All countries, irrespective of their size or location, should make, a significant contribution to the management and protection of natural resources. As the sphere of government closest to the community, local government is responsible for good governance and the care and protection of local communities and their environment within a framework of sustainable development.

225) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by envisioning this strategy that provides a platform for the principles of Sustainable Development Goals (SDG) to be enshrined in the countries government Acts. Country governments need to undertake more responsibility to manage, support and regulate natural resource management (NRM) within their jurisdiction. This includes the development and implementation of land use planning schemes, managing public land including parks and protected areas, and regulating private activities. Country governments must now play a key role to adopt and enact NRM policies from the Commonwealth (references) and state governments. Examples include County Integrated Development Plans (CIDP), National Wildlife and Conservation Management Strategy, Forest Conservation and County Spatial Planning. Implemented in the right manner, these local projects will also enable the country governments to achieve the following Sustainable Goals (SDG).

226) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by implementing strategic goals and activities in this strategy address how to get the Counties on board the conservation agenda. They include capacity building, developing tools and procedures for spatial planning, development and management of conservancies across counties and inclusion of communities and youth to manage these activities and programs.

227) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by working with the National and local gorvernments to build and support Countries to enhance existing and develop new wildlife and tourism facilities based on the varying landscapes and unique potential of tourism found in each country.

228) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by allowing access to wildlife and other natural resources as envisioned in Wildlife Act though appropriate legislation of wildlife regulations with the aim of involving communities as co-managers of this resources.

229) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by ensuring equitable sharing of benefits from conservation related activities as well as job opportunities for communities living alongside wildlife. Without communities benefiting, the future of conservation is bleak.

230) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by helping mitigate human-wildlife conflict and ensure prompt compensation for losses incurred as soon as they occur to avoid revenge missions of killing wildlife on revenge missions.

231) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing diversify community livelihood sources through investment in alternative compatible income generating activities including nature-based enterprises to reduce over-reliance on income from tourism realizing value for countries and its people. There are several sectors and activities that have the potential to both support and benefit from wildlife conservation. One is smart agriculture by responsible use of pesticides, conservation agriculture in agroforestry systems low water consumption, payment for ecosystem services and the blue economy.

232) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by enacting Housing in another critical sector which includes green and open spaces, connectivity and flood control from urban areas. Other sectors are green energy, wildlife sensitive planning (over/under passes, appropriate corridors) and better water management (efficient use, effective distribution and enhanced flows) and integration of climate resilience. Key enabling sectors include devolution and planning (county level engagement on wildlife management, spatial planning and frameworks that include conservation priorities), tourism (investments that feedback to conservation, coordinated planning and development) and education, science and technology (relevant curriculum, training programmes, research and knowledge). A key cross-sectoral, and natural, partner for implementing the National Wildlife Strategy 2020 to 2050 is the private sector. This sector has immense capacity to catalyze change and drive sustainable development.

233) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by New approaches to measuring value, including the triple bottom line of planet, people, and profit, represent exciting opportunities for transforming wildlife conservation for prosperity. This Strategy aims to catalyze innovation to promote private sector engagement in conservation and natural resource management through the development of incentives and new approaches. There is need for over-arching strategies common to all sectors who benefit from wildlife resources to address opportunities that help conservation and create cobenefit opportunities.

234) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Improved consideration of impacts on wildlife of development projects , Enhanced co-ordination and integrated planning across sectors , Best available science and developing of decision support tools and Compensatory mitigation for damage (offsets) Implementation Successful implementation of the National Wildlife Strategy 2020 to 2050 will require commitment and resources from government, non-government agencies, private sector and local communities. Key to these is coordination and planning, cross sectoral engagement, collaboration and partnership, monitoring and learning, communication and outreach, and the development of innovative and sustainable financing. The implementation of this Strategy will be guided by core principles of inclusivity, collaboration, integration, and participation. Transformation requires that things are done differently. It starts with developing an open and collaborative institutional architecture to ensure coordination, effective implementation and sustainability.

235) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Coordinating and Planning The implementation of this Strategy will be led by a Coordination Team under the stewardship of the State Department of Wildlife. The team will guide implementation and ensure accountability, monitoring and reporting and outreach. This team will draw from a cross section of the conservation sector including representatives from civil society, communities, other natural resources management sectors, Council of Governors and relevant government agencies to provide a framework to enhance coordination within the sector, and between sectors, and promote integrated planning and collaborative implementation. To facilitate this process we shall support Tourism and wildlife Ministry to host an Implementation Team to link partners, monitor progress, and facilitate implementation and communication. This team will include components of coordination, partnerships, communication and learning. It will play a key role in fostering collaborations, facilitating implementation and reporting on progress. The timely establishment of this Implementation Team is a key step in ensuring the successful transition of this Strategy from paper to action.

236) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Implementation Team Coordination Partnership Monitoring & Evaluation Communication To oversee the implementation Funding and proposal writing Knowledge management Newsletters, reports, website NWS Wildlife Research & Innovation Centre is an essential component of countries long-term development. In order to ensure that wildlife continue as a core driver of countries sustainable development, and to achieve transformation of wildlife conservation in the country, we must broaden the conversation beyond the traditional wildlife sector, identify opportunities for cross-sectoral engagement, ensure cross sectoral planning, and highlight benefits of wildlife conservation and ecosystem services for different sectors. This ranges from agriculture to industry, from urban development to healthcare and from food security to transportation. This Strategy is more than just a roadmap for the wildlife conservation sector, however. It is also a blueprint for enhancing prosperity more generally by embedding environmental considerations and integrated planning across sectors.

237) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by ensuring cross-sectoral engagement and linkages, the Strategy will be implemented in conjunction with a cross-ministerial, Inter-Sectoral Council responsible for ensuring integrated planning, effective coordination across sectors and links with other government initiatives. Education Agriculture Tourism Infrastructure Extractives Housing County Government County Governments who are key partners in the implementation of this strategy of this strategy and expressed commitment to supporting its implementation going forward. This Strategy is designed to help catalyze and coordinate Development Partner support for enhanced conservation impact. This Strategy will also inform the development of assistance programmes and bilateral partnerships which promote wildlife conservation and sustainable natural resource management. The Strategy coordination team should actively engage with Development Partners through quarterly meetings to harmonize strategies and action plans, collaborate on resource mobilization, and share knowledge and lessons learned. Finance and Sustainability Successful implementation of this Strategy requires commitment from all stakeholders – national and county and government, non-government agencies, private sector, development partners, local communities and individuals. This includes sufficient allocation of resources from Treasury, support from conservation sector actors, and partners. The strategy seeks to catalyse investment and the development of innovative strategies for ensuring the long-term financing and mainstreaming of wildlife conservation and natural resource management as the foundation for countries sustainable development for current and future generations. Key to sustainable financing is the quantification and recognition of the real value of wildlife and ecosystem services to society through natural capital accounting and the exploration and development of innovative funding mechanisms. This includes the development of a Wildlife Conservation Trust fund and associated mechanisms to ensure effective coordination, efficient use of resources, accountability, and transparency.

238) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by strategy integrated planning and budgeting process in compliance with Government procedures - including performance contracting, Medium-Term Economic Framework (MTEF), etc. Historically there has been an imbalance between the financial resources availed to the wildlife conservation sector and its contribution to the national economy and well-being of the nation. While releasing our funds to contries we shall mobilize more funding through you generous partners and along with advocating for countries to sustain Tourism and wildlife through innovative nontraditional funding sources and nontraditional financing mechanisms such as fees, levies, lotteries, incentives (e.g. tax breaks), local philanthropy, etc., to support conservation initiatives.

239) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by monitoring and Learning that provides an overarching framework to focus efforts, guide resource allocation, and enhance collaboration for conservation impact. It also provides a long-term vision with clear goals and targets, while enhancing responsiveness to emerging challenges and new opportunities. The Strategy is based on a process of continuous evaluation and learning for improved implementation. One of the first steps in the rollout of this Strategy is the development of a comprehensive monitoring and evaluation system to support implementation, report progress, and ensure accountability. This framework will build on the principles of evidence based adaptive management with clear targets and timelines, measurable indicators, means of verification, and clear linkages between implementation and learning for adaptation and improvement. Where possible targets, indicators and monitoring methods will be linked with other national and international priorities to streamline implementation, learning, and reporting.

240) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by ensuring the strategy is implemented effectively and is properly aligned with emerging issues and challenges, the Strategy Coordination Committee will conduct an annual review of the implementation process, including progress against goals, prioritization and targeting to inform integrated work planning. In addition to annual reviews, the Strategy will be subject to a midterm and final reviews to ensure ongoing adaptive management and improvement.

241) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by maintaining ownership and facilitate achievement of the goals outlined in this document, the Strategy requires an effective communication strategy. Key elements of this communication strategy will include a website, written materials, databases, and an active social media presence.

242) The website, will serve as an interactive platform for tracking progress on goals, disseminating and archiving written reports, consolidating supporting documents, and catalyzing engagement and participation. Written documentation will include the publication of baseline reports, bi-annual progress reports, brochures, posters, infographics and supporting documents for the strategy (ecosystem papers, public participation, etc.). Communication and outreach will be essential for maintaining linkages with major partners, enhancing collaboration and coordination and ensuring transparency and accountability.

243) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Maintaining and Improving Habitat and Ecosystem Integrity to reduce biodiversity loss, protect ecosystem function, enhance connectivity, increase resilience, Increase understanding of ecosystem functioning through identification, prioritization, and securing of key conservation areas and ecosystems to focus and enhance the effectiveness of conservation investments and interventions, Identify key biodiversity resources and determine their Minimum Viable Conservation Areas (MVCA) at national and county levels, with special reference to transboundary ecosystems, dispersal areas, and wildlife corridors.

244) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Improving integrated data driven land use planning at regional (transboundary), national, county, PA and ecosystem levels to enhance the protection of wildlife habitat, ecosystem services, and reduce biodiversity loss.

245) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing an integrated multi-level, multisectoral, collaborative planning framework, including tools, guidelines, and standards for ecosystem planning to support national and county level land use planning along with developing and implementing management plans at protected area, ecosystem, county, and national levels.

246) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to protect, rehabilitate, and restore wildlife habitats and their connectivity, including forests, savannas, freshwater, marine, and mountain ecosystems to increase the resilience of key habitats and ecosystems along with securing existing protected areas through assessment of status, demarcation of boundaries, and acquisition of title deeds.

247) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by ensuring all existing protected areas are effectively managed, including currently inactive "paper parks" and rehabilitating and restore degraded habitats in protected areas, corridors and dispersal areas along with Increasing the area of land under effective wildlife conservation through the creation of new wildlife protected areas and the securing of priority wildlife corridors and dispersal areas.

248) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by increasing in the extent of land effectively managed by communities for biodiversity conservation and Increasing the extent and effectiveness of the conservation and protection of marine and coastal ecosystems.

249) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by enhancing species Conservation and Management to ensure healthier, more resilient wildlife communities and populations along with Catalyze the conservation of endangered and threatened species through the development and implementation of a process for regular updating and ongoing review of the National Red list of threatened and endangered species.

250) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by implementation of conservation tools for prioritizing, monitoring, and managing wildlife species to Prioritize, develop and implement species-specific conservation and management plans that address emerging issues and challenges (e.g. climate change, genetic diversity, etc) facing endangered and threatened species while supporting the conservation of the broader community of wildlife species by working synergistically with ecosystem plans and landscape level planning tools.

251) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by managing the framework that has external environment influences Political, Economic, Social, Technological, Environmental, and Legal.

252) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by assessing strengths and Weaknesses Unique hospitality and diverse tourism products. Outdated legal and policy framework Relatively secure destination Over-reliance on traditional source markets Established tourist facilities Poor infrastructure Renowned tourist destination Insufficient financial resources for tourism development and marketing Strategic regional communication centre Inadequate development of products and facilities Trained staff in tourism operations Inadequate skills in areas necessary for strengthening the sector Inappropriate standardization guidelines for tourist facilities Inadequate research in tourism Under-developed domestic and regional tourism markets Inadequate capacity of tourist security agents

253) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting nations towards SWOT Analysis is a framework for generating strategic alternatives from a situation analysis. SWOT is an acronym for Strengths, Weaknesses, Opportunities and Threats. The SWOT analysis classifies the internal aspects of an organization as strengths or weaknesses and the external situational factors as opportunities or threats. Over-reliance on traditional source markets Established tourist facilities Poor infrastructure Renowned tourist destination Insufficient financial resources for tourism development and marketing Strategic regional communication centre Inadequate development of products and facilities Trained staff in tourism operations Inadequate skills in areas necessary for strengthening the sector Inappropriate standardization guidelines for tourist facilities Inadequate research in tourism Under-developed domestic and regional tourism markets Inadequate capacity of tourist security agents Opportunities Threats Untapped tourism potential e.g. eco-tourism, culture, conference, and cruise Negative media publicity Unexploited domestic tourism market Perception of countries as a cheap tourist and unsafe destination Emerging markets in tourism in Africa, Asia and the Middle East Increasing tourism competition in the region Expansion of global digital economy (E-business). Erosion of cultural values Expansion of air and water transportation Increased spread of infectious diseases 13 Illegal trade in endangered species and environmental degradation.

254) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Product Development and Diversification beyond counties traditional framework in Kenya the brand has been regarded and developed as a coastal (beach) and wildlife safari destination. The National Tourism Policy seeks to develop and diversify tourism products in Kenya. The strategies to develop and diversify tourism products will focus mainly on Eco- tourism; Conference Tourism; Sports; and Cultural Tourism. Potential exists for spreading tourism to new areas away from the most visited and at times crowded destinations. These areas include Lake Victoria, the Western Region, North Rift, Central, and North-Eastern Provinces which will be our first pilot project.

255) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by support Marketing and Promotion the image and perception of many countries has, in recent past, been adversely affected by negative publicity. The strategies to counter the negative image and perceptions will be undertaken in the concerned overseas markets. Tourist marketing will be strengthened to promote upmarket tourism and wildlife safaris in order to gradually move away from low value package or mass tourism. Regional markets and especially those with good air links and to which countries can offer complementary – rather than similar – products will also be targeted.

256) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Domestic Tourism Development countrie's tourism products attract visitors from all over the world. However, most Kenyan nationals have not been able to experience the same attractions due to financial constraints, lack of tourism knowledge coupled with a paucity of programmes and packages that would enable 6 nationals to participate in domestic tourism. Strategically, the domestic market will be developed to form an enduring foundation of the demand for tourism facilities and services.

257) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by improving Safety and Security Security is a key consideration for tourists when selecting a holiday destination. Government will continually improve security for both visitors and residents. In order to counter any perception that top tourist countries destinations is an unsafe destination, safety concerns will be closely monitored and addressed.

258) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by managing Tourism Resources Conflict. We shall support the government to undertake various changes in policies and laws such as those relating to wildlife conservation and management, protection of endangered species; wildlife cropping; wildlife hunting; land ownership and land-use in order to minimize areas of conflict and contention.

259) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Investment and Financing countries unique combination of spectacular tourist attractions and liberalized economy makes it an ideal investment location, especially for investors interested in the development of sustainable and quality tourism. In order to exploit fully this potential, the government shall continue to improve the investment climate that is capable of attracting both local and foreign investment. Incentives shall be offered to encourage investment in this sector, especially to long term investors.

260) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting ministry that It is responsible for all matters pertaining to product and market development, standardization, licensing, inspection and litigation. It also acts as the link between the Ministry and the private sector stakeholders. The Administration and Management Units provides support services in Finance, Human Resource, Accounts, Planning, Public relations, and ICT.

261) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by supporting policy and legal framework for the development of tourism To realize the set goals and sustain tourism development, various policy changes need to be completed. To formulate and implement an appropriate policy and legal framework for the development of tourism sector The objective will be achieved through the following strategies, Finalize and facilitate the enactment of the National Tourism Bill, Operationalize the Tourism Act Harmonize and enhance coordination of tourism development and service delivery. Strategic Issue

262) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by promoting diversity of Tourism Products and Source Markets. There is need to develop and diversify tourism products. The traditional beach and wildlife safari products, being rather passive products, are not in line with the changing travel trends and patterns where tourists want to have a multiplicity of activities and experiences. There is, therefore, need to facilitate development and promotion of other products such as eco-tourism, sports tourism, cultural tourism, conference tourism, shopping tourism as additional products.

263) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing new products and diversify source markets Develop and diversify tourism products , Broaden the source markets, Marketing of Tourism Products and Facilities , To increase tourism revenue, Increase the number of international tourists, Increase the number of domestic bednights , Increase average spending per visitor, Tourism Standards Tourism has many components comprising the overall "travel experience." Along with transportation, it includes accommodation, food and beverage services, shops, entertainment, aesthetics and special events.

264) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Training and equiping wildlife officers and local communities in rapid response to human wildlife conflict, mitigation, and management approaches Increase the awareness and appreciation of wildlife, and motivate support and participatory action by all citizens, to enhance participation in Conservation. Increase awareness and understanding to enhance appreciation and encourage action.

265) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Introducing into all education curricula at all levels a comprehensive conservation education and awareness content through elearning platforms and traditional set books.

266) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing comprehensive public outreach and awareness programmes embedded within a public participation strategy to engage all Kenyans (including people living with wildlife) - "Wildlife our Heritage"

267) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing programs for the general public to experience countrie's wildlife and nature.

268) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by fostering partnerships and collaboration among stakeholders to mainstream conservation action across all sectors of society.

269) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by conducting a National Competition establish designated natural areas for public use in cities through partnerships with multiple sectors.

270) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by engage with 'private sector partnerships' to mainstream biodiversity initiatives in their supply chains, including the development of a Green Business Awards Scheme, with special reference to the government's priority development pillars - Infrastructure, food security, health care and housing and settlements.

271) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by engaging the public, youth, and Establish an annual tourist and wildlife conservation award scheme to communities through targeted education and outreach, and stewardship opportunities to enhance participation by recognizing achievement in various aspects of conservation

272) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by organizing a biennial National wildlife Expo and Investment Forum to showcase best practices in wildlife conservation to the countries public, in partnership with National Tourism promotion boards.

273) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by creating a culture of conservation in youth through projects and partnerships that engage them in wildlife conservation, tourism and environmental stewardship Including, tree planting, invasive plant removal, river/watershed management and recycling projects.

274) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Increasing access, incentives, and sustainable use of wildlife resources, while ensuring equitable sharing of benefits.

275) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing a clear framework for access and benefit sharing from wildlife resources and biodiversity.

276) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by review, revise, and gazette appropriate regulations, including the rights and responsibilities of landowners, to facilitate equitable and effective benefit sharing for sustainable livelihoods to support wildlife conservation.

277) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by assess, review, and revise tax structure on nature based enterprises and activities including exemption of stamp duty on registration of land for conservation, including exemption of stamp duty on registration of land for conservation, reduced land tax burdens(e.g. rents and rates), etc, to promote investment in wildlife conservation and wildlife compatible land uses.

278) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and promoting innovative and strategic investment for the sustainable use of wildlife resources and biodiversity.

279) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by conducting a market study, including a review of past and current efforts, to establish and inform the sustainability of consumptive wildlife utilisation including game farming and game ranching.

280) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and implementing a comprehensive incentives package to encourage voluntary conservation through wildlife conservancies, sanctuaries, game farms, game ranches, and other green spaces, including use of land leasing, conservation easements and offsets, land banking and other means,

281) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and piloting local industry for value addition and marketing of wildlife and wildlife products.

282) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by providing education and extension services, including pilot programs, demonstrations, to promote opportunities for wildlife based enterprises creating opportunities for employment and participation for local communities in biodiversity conservation activities and sustainable use.

283) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by developing and promoting the cross sectoral coordination of marine and coastal natural resource management for sustainable utilization.

284) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by conducting a collaborative study (pull together existing studies) on sustainable utilization and natural resource management of marine and coastal resources and innovative opportunities for investment and sustainable livelihoods - with special reference to marine protected areas, but look at ecosystems broadly to avoid poor sectoral coordination.

285) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to develop and promote innovative approaches for catalyzing investment and benefits from sustainable utilization and natural resource management through innovative structures (e.g. conservancies) in marine and coastal ecosystems.

286) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy by Increase knowledge and information access and use to support evidence based decision making and adaptive management.

287) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to support wildlife conservation and management decisions and actions with the best available knowledge derived from natural, and social sciences, and traditional knowledge.

288) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to Operationalizing the wildlife research and training institute along with develop effective implementation which involves develop, review, enact, harmonize, and implement wildlife frameworks and monitoring structures for the effective implementation, coordination, and monitoring of the related policies, laws, regulations, guidelines, and plans.

289) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to develop and Implement a Monitoring and Evaluation System and communication portal for the Strategy to track progress, evaluate impact, and ensure transparency and engagement.

290) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to Support the effective coordination and implementation of the strategy at National, county, and local levels ensuring the effective coordination and implementation of the strategy at National Level. Ensure the effective coordination and implementation of the strategy at County Level. Ensure the effective coordination and implementation of the strategy at Ecosystem Level. Identify and develop innovative mechanisms for sustainable financing and distribution of funds to support biodiversity conservation and the implementation of building the case for conservation finance from within the gorvernments.

291) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to establish a National Wildlife Conservation Trust Fund including wildlife compensation insurance scheme in consultation with the Ministry of Agriculture, Livestock, and Fisheries.

292) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to Map out economic flows and values of ecosystem services in order to identify potential markets and payment mechanisms for ecosystem services using information derived from a National Natural Capital assessment establish mechanisms for fundraising through conservation events/campaigns/ for conservation programs to net donors, philanthropists and private sector (e.g. Rhino charge, Lewa marathon, in Kenya has had a big impact we shall seek to partner and support such.

293) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism and develop wildlife conservancy to explore alternative/innovative tourism options to get more conservation value from tourism, including increased utilization of non traditional areas and reinvestment in communities and conservation initiatives, fishing, hunting and gathering protection of animals and wildlife, water protection, securing sufficient residual water, hydraulic engineering and safety of dam, forestry, environmental laws, energy policy; and exploitation of minerals and natural resources.

294) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism by supporting Nations Hotel Keepers association whose mandate bringing together hotels, lodges, camps, restaurants, membership clubs and prominent airline caterers whose common theme is to render services in the hospitality industry. By supporting this organization we shall make Countries Hospitality "globally competitive and viable" for the stakeholders, who include guests, shareholders, employees, local communities, suppliers and the Government. This Association aims to create a conducive business environment for players in the hospitality industry by influencing decisions within institutions and economic systems. They also help in building industrial relations promoting and protecting harmonious industrial relations. This is achieved through Collective Bargaining Agreements (C.B.As) that are negotiated and signed with the Union in the trade. Through such agreements, elaborate and conclusive methods are enunciated viually evolving minimum terms and conditions of service within gazette remuneration, Dispute settlement procedures via Joint Industrial Council & Coast Disputes Council, Liaison with other partners on workers-related issues - the Ministry of Labor, -The Federation of Kenya Employers, as well as the Industrial Court. The Association is the principal voice for hotels and restaurants to the government and other agencies on matters of regulations, licensing, and policy. This role is fulfilled through representation and contribution in such bodies as: Kenya Tourism Board, Kenya Tourism Federation, Federation of Kenya Employers, Tourism Regulatory Authority, Kenya Utalii College, Tourism Fund, and other forums. The Association promotes and showcases its member's products and services though the Hotel & Restaurant Guide, and collaboration with the Kenya Tourism Board, where we participate in various Tourism Trade shows, and exhibitions. **On training** The Association coordinates with the Kenya Utalii College as well as other training institutions on Training and Development programmes along with **Information Exchange** the Association acts as the principal information exchange network for members and the industry by Maintaining an industry data bank, Maintaining regular communication with members on issues such as Government policies on tax and pricing, Industry human resource development, Hotels and Restaurants licensing and classification, Security, Safety and Standards, Legislation and Labor laws, Performance Appraisals & Certification. Membership of this Association gives individual hotels or hotel groups an invaluable stamp of recognition, of belonging to an important and reputable organization in the hospitality fraternity. It affords them a forum to air their views, discuss common problems, and present a united front as the most fundamental sub-sector of the tourism industry. The principles of "Engagement", "Evaluation", "Recognition" constitute key guidelines for our membership, while establishing 'Rating', 'Certification' and 'Standards' crucial to recognizing contributors & stars of the industry. The association also encourages 'Innovation' makes Coutries's Hospitality Globally Competitive. We operate and negotiate with one voice, one vision. Hospitality is our commitment and passion. We shall seek to support such associations across the countries as it has had great success in Kenya.

295) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism by enhancing Public/Private partnership in marketing initiatives, Bilateral Development Partners/Donor support, Prudent management through activity-based budgeting, Linking budgeting and planning , , Enforce efficient use of supplies and other resources; and A sustainable source funding will be established under , Money payable as appropriation for the purpose of the Act, Levies, fees, and other moneys paid under the proposed Tourism , Donations, Loans and other financial assistance.

296) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote Tourism by Operationalize the Tourism Act, Establish relevant structures and institutions, Structures and institutions in place , Improved Service Delivery, Structures and institutions in place, Improved Service , Enhance public private sector partnership, public-private sector consultative forum , Harmonized operations, public private sector consultative forum, Harmonized operations, Strengthen inter-ministerial collaboration, inter-ministerial roundtable forums , improved tourism service delivery, interministerial forum meetings, resolutions implemented, Harmonize and enhance coordination of tourism development and service delivery , To develop new products and diversify source markets , Time frame Performance Indicators , License high quality home-stays High quality homestays sites licensed, Develop and diversify tourism products, Number and size of new markets • Increased volume and value of business, Review the hotel and restaurant classification, Classify and reclassify tourists establishments, License tourist establishments, Link tourism institution's data bases , Data bank of all tourist facilities developed, Coordinate compliance with regulations and standards, Inspect tourist establishments Tourist establishments, To Enhance safety and security of tourists, Carry out needs assessment study Needs assessment, , Facilitate capacity development of the Tourist Police Unit and KWS, manage incidences of tourist attacks and harassments, Enhanced tourist security, Reduced incidences of tourist attacks and harassments, Enhance capacity of the crisis management centre, Equip Train and Expand Centre Efficiency in service delivery, Construct beach operator markets, Beach operators licensed to reduce crime, To enhance and sustain the financial resources for the tourism sector, Establish a tourism development fund, Establish a sustainable funding mechanism for the sector , Develop and submit a proposal for sharing of airport passenger service charge, Ensure efficient procurement procedures , Efficient procurement process Continually , Procurement committees Operational , Procurement plan documents , Committee minutes , Improve efficiency of resource utilization , Review the internal control systems, To attract develop and retain competent and motivated Ministry staff, Upgrade skills in the workforce, Rationalize staff capacity, Undertake workload analysis , Review and develop job descriptions and specifications, Improved performance, develop Work environment survey report, survey report, Develop corruption prevention plan corruption prevention plan, Develop anticorruption code of conduct code of conduct, Monitor and evaluate integrity practices and perceptions, To reduce tourism resource conflict, Develop and implement tourism area management plans tourism area management plans.

297) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to Promote tourism area management, Build capacity on CBOs in tourism and wildlife , Capacity Building programme, Training Tourism CBOs trained, Revolving Fund to viable SMEs in tourism and wildlife, CSR Plan in place promote stakeholder satisfaction survey local Authorities Communities Cooperation of stakeholders to enhance tourism information management and research capacity , Establish tourism research centre , Develop tourism , accurate tourism data, Operational account, Accurate tourism data Immigration, Enhance publicity and information flow on tourism, Publish ministry's newsletter and other publicity materials , Update Ministry's, Coordinate media coverage of ministry's activities , Enhanced information dissemination , Availability of current information , Well informed public and potential tourists.

298) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promotion tourism by productions of promotional material like the book I did Kenya Dreamland to Tour and Invest to promote Nations as tourism and investors destination along with exhibitions at global level, national level and tourism regional circuits marketing the underutilized parks; e.g. marketing Tsavo to cruise tourists, Providing incentives such as concessionary land leases and tax incentives, Revamping the ranger force to curb poaching and insecurity (including human-wildlife conflict through installing electric fence around the parks) , Maasai Mara National Reserve The Maasai Mara National Reserve flagship project will be implemented as an independent project from the premium parks initiative, To address problems of unplanned development of lodges, poor access roads and mismanagement of revenues, the government will work with the County government to develop and market the Maasai Mara as a national iconic brand; and implement the Mara Ecosystem, development of Coastal Beach Ecosystem Management, re-development of into modern resort destinations by upgrading transport infrastructure and beach management programmes. Private sector will renovate existing hotels and build new ones, and participate in improving hygiene and sanitation facilities and beautification programmes. The project will also entail development of new niche products that include water sports (scuba diving, surfing, water skiing), development of Marina along the marine continental shelf, enhanced security and safety (such as establishment of a coast guard service). Expansion of Tourism Training To be able to train more skilled tourism labour force, the Tourism Fund has embarked on the development of a tourism and hospitality training college.

299) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote they will introduce contribute in diversifying tourism products, while fostering heritage conservation and discovering new products for tourism promotion through heritage research, Development of National Museum, Gazette of new heritage sites: over the plan period, identify and gazette new heritage sites and monuments for diversifying tourism , Undertake survey and document major tourist attractions, facilities and service per county , Disseminate the information through booklets, internet and other means , Information centres would also be created in key tourist areas such as points of entry, key streets in main towns . Put directional signage in prime tourist areas. This will involve working with relevant stakeholders to have clear signage at all border point tourist areas streets railways and bus terminals, Conduct a country wide vulnerability assessment for tourism areas on the effects of climate change, Develop and implement action plans to build resilience of vulnerable tourism areas to climate change and variability.

300) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote include mapping of climate change vulnerable areas and ensure that the touristic appeal of those areas is not degraded by climate change, Implement green tourism including identification and replication of sustainable tourism projects with involvement of and equitable benefits to the local people. Enhanced and better distribution of tourism earnings and adapting more resilient and sustainable tourism products, Development and dissemination of guidelines on resource efficiency for both the operational of existing and development of new tourism facilities. It will lead to reduced carbon footprint of the tourism sector and cost savings hence enhanced profitability, Implement research, training and capacity building programmes in tourism on enhanced resilience against climate change, adaptation and mitigation and green economy best practices, Participate in environmental conservation initiative, Eco-tourism which is a strategy for promoting tourism while also addressing environmental conservation is becoming popular in the industry. Many enterprises are embracing eco-tourism which encompasses eco-lodges, the branded private/community group ranches tourism and nature trails among others. So far, the strategy appears to have enticed any tourism clients with majority showing preferences to eco-tourism products compared to other environmentally less sensitive products. The strategy is then making a major contribution in promoting environmental sustainability while also promoting tourism sustainability at the long-term.

301) Kingdom Global Tourism and Wildlife Agency will fund, collaborate, partner and invest in organizations, projects, institutions to promote this sector by spearheading other sector stakeholders in promoting eco-tourism through the following activities, Identifying and mapping potential eco-tourism development sites, Creating awareness of value of eco-tourism to the industry players, Developing standards for eco-tourism establishments, Facilitating access to eco-tourism development incentives, Marketing eco-tourism facilities, to improve the development management and marketing, Development of National Tourism Strategy, Establishment of Tourism Regulatory Authority, Establishment of Tourism Research Institute, Enhancing Sustainable Tourism, Address concerns on the accuracy and reliability of tourism statistics, Develop Tourism Management Information System , Undertake market Research and Intelligence , Tourism Product Research , Tourism Area Development Plans and Carrying Capacities , Crisis Management, Early Warning Systems of conflicts, Establishment of Tourism and wildlife Tribunal, Increase in human population which affect the wildlife habitats, Climate change is affecting the sustainability of tourism resources , Lack of proper land use policies and practices to control land degradation also affects tourism resources, Development and implementation of national tourism policies, strategies and programmes, Coordination of partnerships between county governments and other stakeholders, development and implementation of bilateral, regional and international agreements on tourism matters; , Development of programme and incentives for attracting investments in the tourism industry in collaboration with county governments, Enforcement of the provisions contained and any other laws relating to tourism, Provision of technical support and knowhow to entities engaged in tourism activities and services, Coordination and maintenance of quality tourism products, high standards of tourism facilities and quality management in liaison with tourism industry stakeholders and the county government.

QUOTES

The wildlife and its habitat cannot speak, so we must and we will. Theodore Roosevelt
“
Wildlife is decreasing in the jungles, but it is increasing in the towns. Mahatma Gandhi
“
Wildlife is something which man cannot construct. Once it is gone, it is gone forever. Man can rebuild a pyramid, but he can't rebuild ecology, or a giraffe. Joy Adamson
“
If you can reach out and touch and love and be with wildlife, you will forever be changed, and you will want to make the world a better place. Terri Irwin
“
The rules of wildlife are simple and clear, which is not the case for men. Laurent Baheux
“
If we can teach people about wildlife, they will be touched. Share my wildlife with me. Because humans want to save things that they love. Steve Irwin
“
Each species is a masterpiece, a creation assembled with extreme care and genius. E. O. Wilson
“
To observe the wild animals in the natural settings one have to become wild to achieve specific goal. Muhammad Awais
“
Seeing wildlife is like seeing celebrities, only better. Tanja Andrews
“
Born a wildlife warrior, die a wildlife warrior. Steve Irwin
“
A peculiar virtue in wildlife ethics is that the hunter ordinarily has no gallery to applaud or disapprove of his conduct Aldo Leopold
“
Eating wildlife is probably not the smartest thing that we can do in terms of maintaining the integrity of natural systems. Sylvia Earle
“
When wildlife damages agriculture we eliminate the wildlife. Rather we should eliminate agriculture when it damages wildlife. James Cook
“
Wildlife needs wilderness-not just to survive, but also to live freely. Sadly, many species struggle to survive due to increased human activity and expansion into habitats they call home. Zoe Helene
“
Whenever we encounter wild animals in nature, we must only ever show kindness and compassion. Paul Oxton
“
There is just something spectacular about seeing wildlife in its natural environment that thrills us and helps us better understand the exotic cats in our care. Arun Kejriwal
“
Our lifestyle, our wildlife, our land and our water remain critical to our definition of Wyoming and to our economic future. Dave Freudenthal
“
Plans to protect air and water, wilderness and wildlife are in fact plans to protect man. Stewart Udall

Mission:

- ✓ Empowering communities globally
- ✓ Exalting the saviour
- ✓ Equiping and empowering the believer
- ✓ Evangelizing the world
- ✓ Prosperity of body, soul and spirit.
- ✓ Making christianity relevant

JBA Helpers Of Africa International Agency is family and Christian based as a legacy organization to the good will of the founder of Helpers Of Africa International that will be funded as per budget of Helpers Of Africa International and other charity donations from individuals, organizations, international development agencies along with all like-minded private stakeholders Christian organization providing spiritual and physical aid to hurting people around the world. We shall seek by the grace of god and his help to meet needs of charity, empowerment and development with a humanitarian focus to help people who are victims of war, poverty, natural disasters, disease, and famine with the purpose of sharing god's love through his son, Jesus Christ. The organization will serves the church and global citizens worldwide to promote the gospel of the lord Jesus Christ. Jba-missions and ministry global agency will do our utmost to follow Christ's command by going to the aid of the world's poor, sick, and suffering. They are an effective means of reaching hurting people in countries around the world with food, medicine, shelter, emergency help and other assistances in the name of Jesus Christ. This, in turn, earns us a hearing for the gospel, the good news of eternal life through Jesus Christ. Through our emergency relief programs provide desperately needed assistance to victims of natural disaster, war, disease, and famine. As we offer food, water, clothing, temporary and permanent shelter the people need to meet critical needs and give people a chance to rebuild their lives. This foundation will also will run businesses in many sectors and income projects and programs to sustain it charity, empowerment and development such us schools, hospitals, companies, real estate, mining and oil, airline, industries, manufacturing , banking and finance, technology among many others. We shall seek to empower the job seekers through entrepreneurship training and financing through repayable loans to sustain livelihood beyond charity for sustainability of communities, churches, religious institutions. Our community development and vocational programs will reach the impoverished people in the villages and neighborhoods help people break the cycle of poverty and give them hope for a better tomorrow. We shall seek to lift the lives of orphans, vulnerable children, widows, elderly through educational, feeding, clothing, and shelter programs that let them know they are not forgotten. They also provide first-class treatment in the name of the great physician through medical projects, as well as supplying mission hospitals with much needed equipment and supplies. As Helpers Of Africa International engages with nations and countries on bigger scale JBA-missions and ministry global agency, JBA-Helpers Of Africa International and JBA missions and ministries will engage at community, faith based, private institution levels in different locations and scopes they will coordinate the small and middle level engagements on charity, empowerment and development through the projects, areas of focus, objectives and programs highlighted as follows.

Church based children homes & special schools empowerment department -this department will be hosting Good Samaritan festival national and county events to bring together the nation and people for charity to minister to the needy. Under this department also we have programs to support children homes & special institutions on child protection, stigma reduction, parenting, personalized counseling , adoptions , immunization, proper nutrition, home based care, birth registrations, clothing, forester care, child development child rights, life skills program, protection from early marriages, protection from female genital mutilation, prevention from sexually transmitted diseases, psycho-social support, sanitary ware to children, education for all orphans and Vulnerable, vocational training, prevention from infection including h.i.v, supportive intervention, access to health facilities and medicine, sanitary towers , support community based responses, coordination & structures, legal aid, related institutional support, discrimination stigma, good governance, transparency, care, mosquito nets, income generation activities, succession planning, reintegration of children back to community, bursary funds, hiv/ fund, school enrollment, school uniforms & stationery, safe water access, water harvesting, sanitation, teachers training, empowering social welfare service providers, monitoring and evaluation and many more , vacation to provide holidays, career & vocation, education trips, equipping, mentorship, feeding, clothing, facilitation, bursaries, children rights along with supporting equipping and empowering schools with furniture, computers, beds, tvs, radios, libraries, dining halls, sound equipments, books and school uniforms. This very valuable department expected to impact millions of Vulnerable children through our network to be champions in all areas of life in partnership and network with schools.

Church based care for elderly department- we seek to ensure the neglected elderly people are cared for and live in a life of honor to bless the coming generations. We conducted a honor event for spiritual fathers and mothers of kenya and there was a great release of gods blessings in the land. We have also been conducting this advocacy for the young to take care of there parents and grandies to establish the blessings of long life as the bible commands us to do so. We have a vision of building homes to care for this people including freedom fighters some who are homeless and many who have served communities along with honoring them to depart gracefully from this life when god calls them home blessing the land and coming generations.

Rehabs, talent & sports centres department- we have hundreds of ready designs of rehabilitation centers, talent and sports centers that we envision to buy and build. These centers shall be established & run as also for orphans, Vulnerable children, community / business leaders and all groups we are dealing with for recreation, training, team building and vacations. Through this facilities and programs we envision being able to identify and develop in talents in all sports, athletics, movie, art, music, crafts, public speaking, bykes and motor sports speaking and many more sectors. We have hundred of design concepts of these centers and identified lands in various places with successful team in many sectors to raise champions in all this areas impacting millions in our region of operations. This will include hosting and supporting talent exhibitions in schools, colleges, university, among children homes and specials schools along with reaching out to community youth, women and men in various settings. Africa has a lot of talents in sports as you have seen especially kenya in athletics. We have been having mentorship programs to motivate many in talents and sports. We have ready designs for athletics and sports stadiums, film production to get products for media houses, motor sports, games are now great models of how big this sector can become offering jobs, capital formation, sustainable infrastructure development and improving livelihood of the people especially youth preventing them from crime through positive and valuable occupation.

Church based disaster & relief administration department. This department is involved with administration of help inform food / clothes/ tents/ water / medicine in disaster and draught, regions along with resettlement programs in areas affected by war, floods, famine, draught, fires slums and having teams ready and facilitated staff & volunteers to handle all kinds of disasters. We have capacity and strong smart team of logistics network to operate in the nation of kenya africa, asia other nations through support through the various embassies and regional directors across the world.
